But Messana did not long enjoy her newly recovered freedom. Soon after the establishment of Agathocles at Syracuse, that monarch turned his arms against Messana, and, though his first attempts, in n. c. 315, were unsuccessful, and he was even compelled to restore the fortress of Mylae, of which he had for a time made himself master, a few years later, n. c. 313, he succeeded in establishing his power at Messana itself. (Diod. xix. 65, 102.) But the severities which he exercised against the party which had opposed him completely alienated the minds of the Messanians, and they readily embraced the opportunity of the defeat of the tyrant at Ecnomus in the following year, n. c. 311, to throw off the yoke of their despots, and declare in favor of the Carthaginian alliance. (Id. xix. 110.) The death of Agathocles, soon after, brought upon the Messanians even heavier calamities than his enmity had done. The numerous bands of mercenary troops, chiefly of Campania, or at least Oscan, extraction, which the despot had assembled in Sicily, were, after his death, compelled by the Syracusans, with the support of the Carthaginians, to retreat to their own country. (Diod. xix. 110.) But, having arrived with that object at Messana, where they were hospitably received by the citizens, and quartered in their houses, they suddenly turned against them, massacred the male inhabitants, made themselves masters of their wives, houses, and property, and thus established themselves in undisputed possession of the city. (Pol. l. 7; Diod. xxi. 18, Exc. H. p. 493; Strab. xvi. p. 589.) They now assumed the name of Mamertines (Mamertini), or "the children of Mars" from Mammis, an Oscan name of that deity, which is found also in old Latin. (Diod. l. c.; Varr. L. L. v. 73.) The city, however, continued to be called Messana, though they attempted to change its name to Mamertia: Cicero, indeed, in several instances calls it "Mamertina civitas." (Cic. Verr. ii. 5, 46, iii. 6, iv. 10, &c.), but much more frequently Messana, though the inhabitants were in his time universally called Mamertini. The precise period of the occupation of Messana by the Mamertines is nowhere stated. Polybius tells us that it occurred not long before that of Rhegium by the Campanians under Decius, which may be referred to the year 280 n. c., while it must have taken place some time after the death of Agathocles in n. c. 282: the year 282 is that commonly assigned, but within the above limits this is merely conjectural.

The Mamertines now rapidly extended their power over the whole NE. angle of Sicily, and made themselves masters of several fortresses and towns. The occupation of Rhegium by the Campanians, under very similar circumstances, contributed to strengthen their position, and they became one of the most formidable powers in Sicily. The arrival of Pyrrhus in the island (n. c. 278) for a time gave a check to their aggrandisement: they in vain combined with the Carthaginians to prevent his landing; but, though he defeated their forces in a battle and took several of their fortresses, he did not attack Messana itself; and on his return to Italy the Mamertines sent a large force across the straits which attacked the army of the king on its march, and inflicted on him severe losses. (Plut. Pyrrh. 23, 24; Diod. xxi. 7. p. 495.) The Mamertines, however, soon found a more formidable enemy in Hieron of Syracuse, who, shortly after the departure of Pyrrhus from Sicily, established himself in the possession of the city. His efforts were early directed against the Mamertines; and after the fall of Rhegium, which was taken by the Romans in n. c. 271, he invaded their territory with a great army, reduced the fortress of Mylae, and defeated the Mamertines in a battle on the banks of the river Longauns, with such slaughter that they were on the point of surrendering Messana itself without a blow; and the city was saved only by the intervention of a Carthaginian force under Hannibal. (Pol. l. 8, 9; Diod. xxi. 13, pp. 499, 500.) The events which followed are obscurely known to us, and their chronology is very uncertain; but the Mamertines seem to have found that they were no longer able to stand alone against the power of Hieron; and, in order to save themselves, they submitted to the terms of peace arranged by the Romans, and themselves into the arms of the Carthaginians, another sought protection from the power of Rome. The latter ultimately prevailed, and an embassy sent by the Mamertines, to invoke the alliance of the Romans, was the occasion of the intervention of that people in the affairs of Sicily, and became the origin of the First Punic War, n. c. 264. (Pol. l. 10; Diod. xxi. 1; Zonar, viii. 8, 9, Dion Cass. Exc. Vat. 58—60.) Messana was now protected by a Roman garrison; and, during the whole course of the war which followed, continued to be one of the chief strongholds and the principal station of their fleets. The importance of its harbour, as well as its ready communication with Italy, rendered it a point of vital importance to the Romans; and the Mamertines either continued steadily faithful or were kept under the constant presence of a Roman force. (Pol. l. 21, 25, 38, 52; Diod. xxi. 18. p. 505, xxiv. 1. p. 508; Zonar, viii. 10, 13.) At the close of the war the Mamertines obtained a renewal of their treaty, and continued to enjoy henceforth the nominal privilege of an allied city (foderato civitas), while they in reality passed under the dominion of Rome. (Cic. Verr. iii. 6.) Even in the time of Cicero we find them still retaining this privileged condition; and though this alone would not have sufficed to protect them against the exactions of Verres, the Mamertines appear to have adopted the safer policy of supporting the pretor in all his oppressions and conciliating him by bribes, so that they are represented by the orator as the accomplices, as well as defenders, of all his iniquities. (Cic. T. 5. ii. 5, 46, iv. 8, 67, &c.)

Messana was certainly at this time one of the most populous and flourishing places in Sicily. Cicero
MESSANA.

calls it a very great and very rich city ("civitas maxima et locupletissimia," Verr. v. 17), and extols the advantages of its situation, its port, and its buildings. (Ib. iv. 2.) Like all other allied cities, it had its own senate and magistrates, and was legally subject to no other contributions than the furnishing ships and naval supplies in case of war, and the payment of a certain proportion of the corn furnished by Sicily to Rome at a given rate of re-
muneration. (Ib. v. 17—22.) Nor does Messana appear to have suffered severely from any of the wars that caused such ravages in Sicily, though it narrowly escaped being taken and plundered by Athenion during the Servile War, b.c. 101. (Dion Cass. Fr. Val. p. 534.) In the Civil War, a.c. 48, it was the station of a part of the fleet of Caesar, which was attacked there by that of Pompey under Cassius, and the whole of the ships, thirty-five in number, burnt; but the city itself was protected by the presence of a Roman legion. (Cass. B. C. iii. 101.)

At a somewhat later period it was the head-quarters and chief stronghold of Sextus Pompeius during his war against Caesar, and it was from this place that the har-
bour became the station of the fleet with which he commanded the coasts of Sicily, as far as Tau-
romenion on the one side and Tyndaris on the other. It was from thence also that Pompeius, after the total defeat of his fleet by Agrigippa, made his escape with a squadron of only seventeen ships. (Appian. B. C. v. 97, 109, 129; Dion Cass. xix. 1—15; Strab. vi. 268.)

It was in all probability in consequence of this war that Messana lost the privileged condition it had so long enjoyed; but its inhabitants received in ex-
change the Roman franchise, and it was placed in the ordinary position of a Roman municipium. It still continued to be a flourishing place. Strabo speaks of it as one of the few cities in Sicily that were in his day well peopled; and though no sub-
sequent mention of it is found in history under the Roman Empire, it reappears during the Gothic wars as one of the chief cities and most important for-
tresses in the island,—a rank it had undoubtedly held throughout the intervening period. (Strab. vi. p. 263; Plin. iii. 6. s. 14; Ptol. iii. 3, 7; Appian B. C. ii. 71; Polyb. iii. 39.) The site of the neighbour-hood of Messana, known as Vinum Mamertinum, enjoyed a great reputation in the days of Pliny; it was first brought into vogue by the dictator Caesar. (Plin. xiv. 6. s. 8.)

Throughout the vicissitudes of the middle ages Messana continued to be one of the most important cities of Sicily; and still ranks as the second city in the island. It has, however, but few remains of antiquity. The only vestiges are some baths and tesselated pavements, and a small old church, sup-
powed to have formed part of a Roman basilica. (Smyth's Sicily, p. 118.) Another church, called S. Giovanni de' Fiorentini is believed, but wholly without authority, to occupy the site of the Sac-
crarium or family chapel of Heius, from which Verrus purloined a bronze statue of Hercules, attri-
buted to Myron, and one of Cupid, which was be-
themed to be the work of Praxiteles. (Cic. Verr. iv. 2. 3.)

The celebrated port of Messana, to which the city owed its chief importance in ancient as well as modern times, is formed by a projecting spit or tongue of sand, which curves round in the form of a crescent or sickle (whence the name of Zancle was supposed to be derived), and constitutes a natural

mole, rendering the harbour within perfectly secure. This singular bulwark is called by Diodorus the Acte (Ἀκτή), and its construction was attributed by fable to the giant Orion (Diod. iv. 85), though there can be no doubt of its being of perfectly natural formation. The harbour within is said by

Diodorus to be capable of containing a fleet of 600 ships (xiv. 26), and has abundant depth of water, even for the largest ships of modern days. The celebrated whirlpool of the Charybdis is situated just outside the Acte, nearly opposite the modern lighthouse, but out of the track of vessels entering the harbour of Messana. (Smyth's Sicily, p. 123.)

Though the city itself is built close to the harbour on level ground, immediately at the back of it rise steep hills, forming the underfalls of a range of mountains which extends from the neighbourhood of Cape Pelorus to that of Tauromenion. This ridge, or at least the part of it next to Cape Pelorus, was known in ancient times as the Mons Tau-
romenius; but a part of the same range forming one of the underfalls near Messana is called, both by Dio-
dorus and Polybius, the Chaereticus (de Xalix-
ciusn ὁρός, Poly. i. 11; Ἀλφος ἐν καλώπερον Χα-
ερετίκου, Diod. xxiii. 1), and was the position oc-
cupied by Hieron of Syracuse when he laid siege to

Messana, b.c. 264. But neither this, nor the position taken up by the Carthaginians at the same time at a place called Sune or Euneus (Σωνε, Poly.; Eunius, Diod.), can be identified with any degree of certainty.

The coins of Messana are numerous and interest-
ing, as illustrating the historical vicissitudes of the city. There exist:—1. Coins of Zancle, before the time of Anaxilas, with the name written in old characters ΔΑΝΚΑΙ, a dialectic form of the name. 2. Coins of Messana, with the Ionic legend ΜΕΣΣΑΝΙΟΝ, and types taken from the coins of Samos. These must be referred to the period of Anaxilas immedi-
ately after his conquest of the city, while the Samian colonists still inhabited it. 3. Coins of Messana, with the type of a hare, which seems to have been adopted as the ordinary symbol of the city, because that animal is said to have been first introduced into Sicily by Anaxilas. (Pollux, Onom. iv. v. 75.) These coins, which are numerous, and range over a considerable period of time, show the gradual preponderance of the Doric element in the city; the ruder and earlier ones having the legend in the Ionic form ΜΕΣΣΕΝΙΟΝ, the latter ones in the Doric

form MESSANION or MESSANION. 4. Coins struck by the Mamertines, with the name of MA-

MEPTION. These are very numerous, but in copper only. (Millingen, Trans. of Roy. Soc. of Lit.

vol. i. pt. ii. pp. 93—98; Eckhel, vol. i. pp. 219—

224.)

[=H.B.]

MESSAPIA (Messapia), was the name commonly given by the Greeks to the peninsula forming the SE. extremity of Italy, called by the Romans Calabria, but the passage of the name was very fluctuating; Iapygia and Messapia being used sometimes as synonymous, sometimes the latter con-

sidered as a part only of the former more general designation. (Pol. iii. 88; Strab. vi. pp. 277, 282.)

[This question is more fully discussed under CALA-

BRIA, Vol. I. p. 472.] The same uncertainty pre-

vails, though to a less degree, in the use of the name of the people, the Messapi (Messárioi), who are described by Herodotus (vii. 170) as a tribe of the Iapygians, and appear to be certainly identical with the Calabri of the Romans, though we have no explanation of the origin of two such different apppellations. The ethnical affinities of the Messapians have already been discussed, as well as their history relative to the article CALABRIA. There are in the topographical in general admit the exist-

ence of a town of the name of Messapia, the site of which is supposed to be marked by the village now called Mesas, between Orius and Brindisi; but the passage of Pliny, in which alone the name is found, appears to be corrupt; and we should probably read, with Cluverius and Mommsen, "Varia (Umbriae) villas, ac inde leas Mesi-[p. 283] -

apasia." (Plin. iii. 11. a. 16. § 100; Cluver. Ital.

p. 1248; Mommsen, Die Unter. Ital. Dialekte, p. 61.)

2. A fountain of Therapae in Laconia. (Paus. iii.

20. § 1.)

MESSENE (Messene; Eth. and Adj. Me-

sénios: Adj. Messénios). The later capital of Messenia, built under the direction of Epaminondas in B.C. 369. (Diod. xvi. 66; Paus. iv. 27.) The name of Messene had been applied in ancient times to the country inhabited by the Messenians; but there was no city of this name till the one founded by Epaminondas. The Thebans and their allies assisted the Messenians in building it; and the best architects and masters were invited from all Greece to lay out the city with regularity, and to arrange and construct properly the temples and other public buildings. Epaminondas also took especial pains with the fortifications, which were regarded by Pausanias as the most perfect in Greece. The walls, as well as the towers and bulwarks, were built entirely of stone; and the excellence and solidity of the masonry are still apparent in the existing remains. (Paus. iv. 31. § 5.) The foundation of the city was attended with great pomp and the celebration of solemn sacrifices. First, sacrifices were offered by Epaminondas, who was recognised as Oeakrat or Founder, to Dionysus and Apollo Iasimenius,—by the Argives to the Argive Hera and Zeus Nemeneus,—by the Messenians to Zeus Itho-

matas and the Dioscuri. Next, prayer was offered to the ancient Heroes and Heroes of the Messenian nation, especially to the warrior Aristomachus, that they would come back and take up their abode in

the new city. After this, the ground was marked out and the building begun, under the sound of Argive and Boeotian drums, playing the strains of Pronomos and Scadas. (Paus. iv. 28. § 6; Grote's Greece, vol. ix. p. 309.) The history of this town is related under Messenia, so that it is only necessary in this place to give an account of its topography.

Messene is situated upon a rugged mountain, which rises between the two great Messenian plains, and which thus commands the whole country. This mountain, about half-way up, divides into two en-

ummits, of which the northern was called Ithome and the southern Eva. The sharp ridge connecting them is about half a mile in length. Mt. Ithome is one of the most striking objects in all Pelopon-

nesus. It rises to the height of 2631 feet, or more than 700 feet higher than the Acrocorintus; but it looks much lower than it really is, in consequence of its precipitous sides and isolated position. Upon this summit the Acropolis of Messene was built; but the city itself was situated in a hollow somewhat in the form of a shell, extending on the west side of the sharp ridge which connects Ithome and Eva. The city was connected by a continuous wall, and space which the present road runs to the southern Messenian plain, no line of walls can be traced; but on the western side the walls may again be clearly followed. The circumference of the walls is about 47 stadia, or nearly 6 English miles; but it includes a large space altogether unfit for the site of buildings; and the great extent was doubtless intended to receive a part of the surrounding popula-

tion in time of war.

The space included within the city-walls now con-

sists of corn-fields and pastures amidst woods of wild olive and oak. Nearly in the centre of the ancient town is the modern village of Mavromati; and near the southern gate, at the foot of Mount Eva, are two poor villages, named Simania. On the eastern slope of Mount Eva is the monastery of Parnasse, embosmed in cypress and orange groves, and one of the most

PLAN OF ARCADIAN OR MEGALOPOLITAN GATE.
mes of Greek military architecture in existence. Its form is seen in the preceding plan. It is a small fortress, containing double gates opposite to one another, and connected by a circular court of 62 feet in diameter. In front of the outer gate on either side is a strong rectangular tower. Upon entering the court through the outer gate, there is a niche on each side for a statue, with an inscription over it. The one on the left hand is still legible, and mentions Quintus Plotius Euphemion as the restorer (Böckh, Insocr. No. 1460). Pausanias (iv. 33, § 3) notices in this gate a Hermes in the Attic style, which may possibly have stood in one of these niches. Leake observes that the interior masonry of the circular court is the most exact and beautiful he ever saw. The lower course is a row of stones, each about 5\(\frac{1}{2}\) in length and half as much in height; upon this is placed another course of stones of equal length and of half the height, the joints of which are precisely over the centre of each stone in the lower course. The upper part of the walls has fallen; nine courses are the most that remain. Neither gateway retains its covering, but the flat architrave of the inner one lies in an oblique position upon the ruins of the wall by which it was formerly supported; it measures 18 feet 8 inches in length by 4 feet 2 inches in breadth, and 2 feet 10 inches in thickness.

The road still leads through this gate into the circuit of the ancient city. The ruins of the towers, with the interjacent curtains, close to the gate on the slope of Mount Ithome, show this part of the fortifications to have resembled a chain of strong redoubts, each tower constituting a fortress of itself. A flight of steps behind the curtain led to a door in the flank of the tower at half its height. The upper apartment, which was entered by the door, had a range of loopholes, or embrasures, on a line with the door, looking along the parapet of the curtain, and was lighted by two windows above. The embrasures, of which there are some in each face of the towers, have an opening of 7 inches within, and of 3 feet 9 inches without, so that, with a small opening, their scope is very great. The windows appear to be too high for any purpose but to give light. Both the curtains and towers in this part of the walls are constructed entirely of large squared blocks, without rubble or cement. The curtains are 9 feet thick. The inner face of the towers has neither door nor window. The tower next to the gate of Megapolitis has had all the stones disjoined, like those of the Propylæa at Athens, probably by an earthquake. The towers are in general about 25 feet square, projecting about 14 feet from a curtain varying in length according to the nature of the ground, and 8 or 10 feet in thickness.
In ascending Mount Ithome, there is about half way up a terrace of considerable size, which commands a fine view of the Messenian gulf. Here the French Commission discovered some ruins overgrown with shrubs, which appear to have been an Ionic temple facing the east, containing a porch with two columns and a cella. This was probably a temple of Artemis, as an inscription here found contains the names of Messenians, who had held the priesthood of Artemis Linnatia, and the remains of the statue discovered in the cella appear to be those of this goddess. Below the temple are two smaller terraces; and 60 feet further sideways, WSW. of the temple, is a kind of grotto cut out of the rock, with a portico, of which there are remains of five pillars. This was, perhaps, intended to receive the water of the fountain Clepydra, which Pausanias mentions in his ascent to the summit of the mountain.

The summit itself is a small flat surface, extending from SE. to NW. On the northern and eastern sides the wall runs along the edge of the perpendicular cliffs, and some remains of a more ancient ministry may be perceived, which probably belonged to the earlier fortifications of Messene. At the northern and eastern ends of the terrace are the deserted buildings of the monastery of Varkos; this was undoubtedly the site of the temple of Zeus Ithomatas. There is a magnificent view from the summit. Along the northern boundary of the horizon the Lycean range extends; to the east are seen the mountains now named by the Greeks Teygeton; to the north-west the sea-coast between the rivers Cyparissea and Neda is visible; while to the south the mouth of the Pamisos and the Messenian gulf are open to view.

The similarity of Ithome to Acrocorinthus is noticed by Strabo (viii. p. 361). He observes, that both are lofty and precipitous mountains, overhanging their respective cities, but connected with them by a common line of fortifications. Messene continued to exist in the later times of the Roman empire, as we learn from inscriptions; but in the middle ages it had ceased to be a place of any importance; and hence the ancient remains have been less disturbed by the hands of man than in most other parts of Greece. (Leake, Morea, vol. i. p. 366, seq.; vol. ii. p. 136, seq.; Ithome, Adm. xxi. 15; Curtius, Peloponnesus, vol. ii. p. 138, seq.)

**MESSENEIA (Μεσσηνία, Herod. Thuc.)**

In old writers, Mesene, Hom. Od. xxi. 15; Mesardus, Pind. Pyth. iv. 126; shortened Messes, Mery, Steph. B. s. s. Messenia; Messenias, Thuc. iv. 41: Ech. and Adj. Messenias: Adj. Messenides, the south-western district of Peloponnesus, bounded on the east by Laconia, on the north by Elis and Arcadia, and on the south and west by the sea. It was separated from Laconia by Mt. Taygetus, but part of the western slope of this mountain belonged to Laconia, and the exact boundary between the two states, which varied at different times, will be mentioned presently. It is the head or knot of mountains, which form the watershed of the rivers Neda, Pamisos, and Alpheius. On the south it was washed by the Messenian gulf (Μεσσηνικὸς κόλοφος, Strab. viii. p. 335), called also the Coronean or Asinean gulf, from the towns of Corone or Asine, on its western shore, now the Gulf of Koroni. On the west it was bounded by the Sicilian or Ionian sea. The area of Messene, as calculated by Clinton, from Arrowsmith's map is 1162 square miles.
Messenia.

I. General Description of the Country.

Messenia, in its general features, resembles Laconia. The Pamisos in Messenia, like the Eurotas in Laconia, flows through the entire length of the country, from north to south, and forms its most cultivated and fertile plains. But these plains are much larger than those in Laconia, and constitute a considerable portion of the whole country; while the mountains on the western coast of Messenia are much less rugged than on the eastern coast of Laconia, and contain a larger proportion of fertile land. Hence the rich plains of Messenia are often contrasted with the sterile and rugged soil of Laconia; and the climate of the former country is praised by the ancients, as temperate and soft, in comparison with that of the latter. The basin of the Pamisos is divided into two distinct parts, which are separated from each other on the east by a ridge of mountains extending from Mt. Taygetus to the Pamisos, and on the west by Mt. Ithome. The upper part, called the plain of Stenyclerus or Stenyclauros (ςτενόθερευα νομίων), is of small extent and moderately fertile, entirely shut in by mountains. The lower plain, which occupies the eastern part of the Messenian gulf, is much more extensive, and was sometimes called Macaria (Μακάρια), or the "Blessed," on account of its surprising fertility. (Strab. viii. p. 361.) It was, doubtless, to this district that Epicles referred, when he described the excellence of the Messenian soil as too great for words to explain, and terminating his encomium by saying, "without doubt, the crops will be very abundant." (Strab. viii. p. 366.) Even in the present day, although a part of the plain has become marshy by neglecting the embankments of the Pamisos, it is described by travellers as the most fertile district in the Peloponnese. It now produces oil, silk, figs, wheat, maize, cotton, wine, and honey, and presents, as rich a cultivation as can well be imagined. (Leake, Morea, vol. i. pp. 347, 352.) Besides the Pamisos, numerous other streams and copious perennial springs gush in all directions from the base of the mountains. The most remarkable feature on the western coast is the deep bay of Pylos, now called Navarino, which is the best, and indeed the only really good harbor in the Peloponnese.

II. Mountains, Promontories, Rivers, and Islands.

1. Mountains.—The upper plain, in which are the sources of the Pamisos, was the original abode of the Messenians, and the stronghold of the nation. Here was Andania, the capital of the most ancient Messenian kings. Thither the Messenians retreated, as often as they were overpowered by their enemies in the lower plains, for here were their two great natural fortresses, Ithome and Eira, the former commanding the entrance to the lower plain, and the latter, the entrance to the mountains in the northern part of the upper plain. These mountains, now called Tetrads, form, as has been already said, the watershed of the rivers Neda, Pamisos, and Alpheius. From this central ridge, which is 4554 feet high, a chain extends towards the west, along the banks of the Neda, and is also prolonged towards the south, forming the mountains of the western peninsula, and terminating at the promontory of Crotasia. From the same central ridge of Tetrads, another chain extends towards the east, dividing the Messenian plain from the upper basin of the Alpheius, and then uniting with Mount Taygetus, and forming the barrier between the basins of the lower Pamisos and the Eurotas. These two mountain chains, which, issuing from the same point, almost meet about half-way between Mount Tetrads and the sea, leave only a narrow defile through which the waters of the Pamisos force their way from the upper to the lower plain. South of this defile the mountains again retire to the east and west, leaving a wide opening for the lower plain, which has been already described.

Scarcey in any part of Greece have the names of the ancient mountains been so little preserved as in Messenia. Tetrads was perhaps the mountains of Eira. The eastern continuation of Tetrads, now named Makryg疖, formed part of the ancient Mt. Nomia. (Nausica 8n, Paus. viii. 38. § 11.) The western prolongation of Tetrads along the banks of the Neda was called ELAKUM (Ελάκωμ), now Kwikela, and was partly in the territories of Phigalia. (Paus. viii. 41. § 7.) The mountains Ithomi and Evaion are so closely connected with the city of Messina, that they are described under that head. [Messena.] In the southern part of Messenia, extending down the western peninsula, the names only of Aegaleum, Buphara, Tomenus, and Mathia, and Temathia have been preserved. AEGALEUM (Αγαλέωμ) appears to have been the name of the long and lofty ridge, running parallel to the western shore near Cyraphum and Cyraphosum (Pylaos); since Strabo places Temathia on the lower coast of Mt. Aegaleum (viii. p. 359; Leake, Morea, vol. i. pp. 426, 427). BUPHAROS (Βούφαρος) and TOMENUS (Τομινος) are mentioned by Thucydides (iv. 118) as points near Cyraphosum (Pylaos), beyond which the Lacones soon garrisoned the latter place were not to pass. That they were mountains we may conclude from the statement of Stephanus B, who speaks of the "seven new spots near Cypaphosum. (Steph. B. z. v. Tuetes.) TEMATHIA (Τμαθαία), or Mathia, the reading is doubtful, was situated, according to Pausanias (iv. 34. § 4), at the foot of Corone, and must therefore correspond to Libiokemo, which rises to the height of 3140 feet, and is prolonged southward in a gradually rising ridge till it terminates in the promontory of Crotasia.

2. Promontories.—Of these only four are mentioned by name, ACRTAS (Άκριται), now C. Gallo, the most southerly point of Messenia [Acratas]; and on the west coast CYPHRASM, forming the entrance to the bay of Pylos [Πυλης]; PLATAMODES (Πλαταμοδῆς, Strab. viii. p. 348), called by Pliny (iv. 5. s. 6) Phanodes, distant, according to Strabo (L c. 120 stadia N. of Cyraphosum, and therefore not far from Αίαν Κυρικάδο (Leake, vol. i. p. 427); and lastly CYPARISSUS [CYRIPRISA], a little further north, so called from the town Cyraphia.

3. Rivers. The PAMISOS (Παμίσος) is described by Strabo as the greatest of the rivers within the Ithamus (viii. p. 381); but this name is only known to the ancient writers to the river in the lower plain, though the moderns, to facilitate the description of the geography of the country, apply this name to the whole course of the waters from their sources in the upper plain till they fall into the Messensias Gulf. The principal river in the upper plain was called BALIKE (Βαλίκη). It rises near the village of Stiad, and flows along the western side of the plain; two of the streams composing it.
were the Electra ('Háseýa) and the Corus (Kórus). Near Ithome the Balyra receives the united waters of the Leucasia (Lwéscasia) and the Amphitus ('Amytós), of which the former flows from the valley of Bopasi, in a direction from N. to E., while the latter rises in Mt. Mokryphiál, and flows through the plain from E. to W. This river (the Amphitus), which may be regarded as the principal one, is formed out of two streams, of which the northern is the Charadrus (Kárados). (On the Balyra and its tributaries, see Paus. iv. 33. §§ 3-6.) The Balyra above the junction of the Amphitus and Leucasia is called Fanáláki, and below it Macrausimeno, though the latter name is sometimes given to the river in its upper course also. At the junction of the Balyra and the Amphitus is a celebrated triangular bridge, known by the name of the bridge of Macrausimeno. It consists of three branches or arms meeting in a common centre, and corresponding to the three principal roads through the plain of Stamyclerus. The arm, running from north to south, passes over no river, but only over the low swampy ground between the two streams. At the southern end of this arm, the two others branch off, one to the SW. over the Balyra, and the other to the SE. over the Amphitus, the former leading to Messene and the other to Thuria. The foundations of this bridge and the upper parts of the piers are ancient; and from the resemblance of their masonry to that of the neighbouring Messene, they may be presumed to belong to the same period. The arches are entirely modern. The distance of this bridge from the Megapolitan gate of Messene agrees with the 30 stadia which Pausanias (iv. 33. § 3) assigns as the interval between that gate and the Balyra; and as he says immediately afterwards that the Leucasia and Amphitus there fall into the Balyra, there can be little doubt that the bridge is the point to which Pausanias proceeded from the gate. (Leake, Morea, vol. i. pp. 480, 481.)

**PLAN OF THE BRIDGE OF MAVROZUMÉKHO.**

The Macrausimeno, shortly after entering the lower plain, received on its left or western side a considerable stream, which the ancients regarded as the genuine Pausanias. The sources of this river are at a north-eastern corner of the plain near the chapel of St. Floro, and at the foot of the ridge of Saka. The position of these sources agrees sufficiently with the distances of Pausanias (iv. 31. § 4) and Strabo (viii. p. 361), of whom the former writer describes them as 40 stadia from Messene, while the latter assigns to the Pausanias a course of only 100 stadia. Between two and three miles south of the sources of the Pausanias there rises another river called Píthima, which flows SW. and falls into the Macrausimeno, lower down in the plain below Níaf, and at no great distance from the sea. Arús ('Arús) was the ancient name of the Píthima. (Paus. iv. 31. § 2.) The Macrausimeno, after the junction of the Píthima, assumes the name of Dhíopamáno, or the double river, and is navigable by small boats. Pausanias describes it as navigable 10 stadia from the sea. He further says that seafarers ascend it, especially in the spring, and that the mouth of the river is 80 stadia from Messene (iv. 34. § 1).

The other rivers of Messenia, with the exception of the Neda, which belongs to Arcadia also, are little more than mountain torrents. Of these the most important is the Nádon (Nádon), not to be confounded with the above-mentioned Neda, flowing into the Messenian gulf, east of the Pamisos, at Phetre. It rises in the mountains on the frontiers of Laconia and Messenia, and is now called the river of Kalas-
mía: on it there was a town of the same name, and also a temple of Athena Nedula. (Strab. vii. pp. 353, 356; Leake, Morea, vol. i. pp. 344, 345; Ross, Peloponnesus, p. 1.) The other mountain torrents mentioned by Pausanias are the Isasthos, flowing into the western side of the Messenian gulf, a little above Corone (Paus. iv. 34. § 4); and on the coast of the Sicilian or Ionian sea, the Skleos (Skálos, Ptol. iii. 16. § 7), now the Longoserdho, a little S. of the island Prote, and the Oýparismos (Oýparismos), or river of Arkadiás. (See Vol. i. p. 729.)

4. Islands.—Thégantúrea (Thégántúrea), now Venétiski, distant 3700 feet from the southern point of the promontory Acritas, is called by Pausanias a desert island; but it appears to have been inhabited at some period, as graves have been found there, and ruins near a fountain. (Paus. iv. 34. § 12; Θεγάντυρος or Θεγάντυρος, Ptol. iii. 16. § 23; Plin. iv. 12. a. 19. § 55; Curtius, Peloponnesos, vol. ii. p. 172.) West of Thegantúrea is a group of islands called Ókmonári (Ókmonári), of which the two largest are now called Cabrera (by the Greeks Σκιά and Sapiens). They are valuable for the pasture which they afford to cattle and horses in the spring. On the eastern side of Sapiens there is a well protected harbour; and here are found cisterns and other remains of an ancient settlement. (Paus. iv. 34. § 12; Plin. iv. 12. a. 19. § 55; Leake, vol. i. p. 433; Curtius, vol. ii. p. 172.) On the western coast was the island of Sphacteria, opposite the harbour of Pylos; and further north the small island of Prote (Prote), which still retains its ancient name. (Thuc. iv. 13; Plin. iv. 12. a. 19. § 55; Mela, ii. 7; Steph. B. s. v.)

**III. HISTORY.**

The earliest inhabitants of Messenia are said to have been Léleges. Polyaëmon, the younger son of Lelex, the king of Laconia, married the Arbige Messene, and took possession of the country, which he named after his wife. He built several towns, and among others Andania, where he took up his residence. (Paus. i. 1.) At the end of five generations Aeolians came into the country under Perieres, a son of Aeoclus. He was succeeded by his son Aphaereus, who founded Arne, and received the Aeolian Néclus, a fugitive from Thessaly. Néclus founded Pylos, and his descendants reigned here over the western coast. (Paus. i. 2.) On the extinction of the family of Aphaereus, the eastern half of Messenia was united with Laconia, and came under the sovereignty of the Atridas; while the western half con-
MESSENA.

continued to belong to the kings of Pylus. (Paus. iv. 3. § 1.) Hence Euripides, in referring to the mythic times, makes the Parnium the boundary of Laconia and Messenia; for which he is reproved by Strabo, because this was not the case in the time of the geographer. (Strab. viii. p. 366.) Of the seven cities which Agamemnon in the Iliad (ix. 149) offers to Achilles, some were undoubtedly in Messenia; but as only two, Pherae and Cardamyle, retained their Homeric names in the historical age, it is difficult to identify the other five. (Strab. viii. p. 359; Dio. xvi. 66.)

With the conquest of Peloponnesus by the Dorians a new epoch commences in the history of Messenia. This country fell to the lot of Cressphontes, who is represented as driving the Neleidae out of Pylus and making himself master of the whole country. According to the statement of Ephorus (ap. Strab. viii. p. 361), Cressphontes divided Messenia into five parts, of which he made Steencylerus the royal residence.*

In the other four towns he appointed viceroys, and bestowed upon the former inhabitants the same rights and privileges as the Dorian conquerors. But this gave offence to the Dorians; and he was obliged to collect them all in Steencylerus, and to declare this the only city of Messenia. Notwithstanding these concessions, the Dorians put Cressphontes and all his children to death, with the exception of Aeypytus, who was then very young, and was living with his grandfather Gypeolus in Arcadia. When this youth had grown up, he was restored to his kingdom by the help of the Arcadians, Spartans, and Argives. From Aeypytus the Messenian kings were called Aeypytidae, in preference to Heraclidæ, and continued to reign in Steencylerus till the sixth generation,—their names being Aeypytus, Giancus, Isthmius, Dotadas, Sybotes, Phintas,—when the first Messenian war with Sparta began. (Paus. iv. 3.) According to the common legend, which represents the Dorian invaders as conquering Peloponnesus at one stroke, Cressphontes immediately became master of the whole of Messenia. But, as in the case of Laconia [Laconia], there is good reason for believing this to be the invention of a later age, and that the Dorians in Messenia were at first confined to the plain of Steencylerus. They appear to have penetrated into this plain from Arcadia, and their whole legendary history points to their close connection with the latter country. Cressphontes himself married the daughter of the Arcadian king Gypeolus; and the name of his son Aeypytus, from whom the line of the Messenian kings was called, was that of an ancient Arcadian hero. (Hom. II. ii. 604, Schol. ad loc.; comp. Grote, Hist. of Greece, vol. ii. p. 437, seq.)

The Messenian wars and Spartas are related in every history of Greece, and need not be repeated here. According to the common chronology, the first war lasted from B.C. 743 to 724, and the second from B.C. 685 to 668; but both of these dates are probably too early. It is necessary, however, to glance at the origin of the first war, because it is connected with a disputed topographical question, which has only recently received a satisfactory solution. Mt. Taygetus rises abruptly and almost precipitously above the valley of the Eurotas, but descends more gradually, and in many terraces, on the other side. The Spartans had at a very early period taken pos-

* Of the other four parts Strabo mentions Pylus, Ebian, and Hyameis; but the passage is corrupt, and the name of Mesola should probably be added to complete the number. (Müller, Doriana, vol. i. p. 111, transl.) Stephanus B. calls Mesola, a city of Messene, one of the five (s. v. Messa); and Strabo in another passage (viii. p. 361) describes it as lying towards the gulf between Taygetus and Messenia; and as the latter name can only apply to the western part of the country, Mesola was probably the district between Taygetus and the Parnians. Pylus apparently comprehended the whole western coast. Ebian is the southern peninsula, opposite Tamaron. (Strab. viii. p. 360.) The position of Hyameis, of which the city was called Hyameis (Týmías, Steph. B. s. v.), is quite uncertain.
sension of the western slopes, but how far their territ

tory extended on this side has been a matter of dis

}pute. The confines of the two countries was marked by a temple of Artemis Linniath, at a place called

Limnas, where the Messenians and Lacconians offered sacrifices in common and it was the murder of the

Spaian king Teleclus at this place which gave oc

}casion to the First Messenian War. (Paus. iii. 2. § 6, 

|v. 4. § 32; iv. 31. § 8; comp. Strab. vi. p. 257, 

|viii. p. 362.) The exact site of Limnas is not indicated by Pausanias; and accordingly Leake, led chiefly by

|the name, supposes it to have been situated in the

|plain upon the left bank of the Pamisos, at the

|marshes near the confines of the Aris and Pamisos,

|and not far from the site of the modern town of Nisi

|a (Nisi, island), which derives that appellation from

|the similar circumstance of its position. (Leake,

|Mora, vol. i. p. 361.) But Ross has discovered the

|ruins of the temple of Artemis Linniath on the west

|ern slope of Mt. Taygetus, on a part of the moun

|tains called Vellomeos (Vellomeos), and amidst the

|ruins of the church of Pumohia Vellomeiasiana (Pum

|ohia Vellomeiasiana). Vellomeos is the name of a

|hollow in the mountains near a mountain torrent

|flowing into the Nedo, and situated between the vil

|lages of Sitioos and Polomn, of which the latter is

|about 7 miles NE. of Kakaimata, the ancient Piss.

|nasa. The fact of the similarity of the names, BK

|Aamos and Kikamos, is given above, and the ancient

|Bk

|Aamoi, and especially the temple of two

|boundary stones to the eastward of the ruins, upo

|the highest ridge of Taygetus, upon which are in

|scribed "Oros Akaedamos prós Messaín." These

|pillars, therefore, show that the boundaries of Mes

|senia and Laconia must at one period have been at

|no great distance from this temple, which is always

|represented as standing near the confines of the two

|countries, and it was a subject of dispute between the Messenians and Lacconians even in the times of the

|Roman Empire, as we shall see presently. Tacitus calls it the "Dentihelates Ager." (Hist. iv. 43); and that this name, or some

|thing similar, was the proper appellation of the dis

|trict, appears from other authorities. Stephanus B.

|speaks of a town "Dentihalii" (Denthalii, a n.

|others read Debdhalii), which was a subject of

|contention between the Messenians and Lacconia

|monians. Alcamo also (ap. Athen. i. p. 31), in enu

|merating the different kinds of Lacconian wine, men

|tions also a Denthalian wine (Dentbrius oenos), which

|came from a fortress Dentihalici (in Denthalici rhy

|moures rhyms), as particularly good. Ross conjectures

|that this wine may have stood upon the moun

|tain of St. George, a little S. of Sitioos, where a few

|ancient remains are said to exist. The wine of this

|mountain is still celebrated. The position of the

|above-mentioned places will be best shown by the

|accompanying map.

|But to return to the history of Messenia. In

|early times the two countries with Sparta, the Messenians

|after being defeated in the open plain, took refuge in

|a strong fortress, in Ithome in the first war, and

|in Eira or Ira in the second, where they maintained

|themselves for several years. At the conclusion of

|the Second Messenian War, many of the Messenians

|left their country, and settled in various parts of

|Greece, where their descendants continued to dwell

|as exiles, hoping for their restoration to their native

|land. A large number of them, under the two sons

|of Aristomenes, sailed to Rhegium in Italy, and

|afterwards crossed over their opposite coast of Sicily,

|where they obtained possession of Zancle, to which

|they gave their own name, which the city has re

|tained down to the present day. (Messen.)

|These who remained were reduced to the condition

|of Helots, and the whole of Messenia was incor

|porated with Sparta. From this time (s. c. 668)

|to the battle of Leuctra (s. c. 371), a period of nearly

|300 years, the name of Messenia was blotted out of

|history, and their country bore the name of Laconia,

|a fact which it is important to recollect in reading

|the history of that period. Once only the Messenians

|attempted to recover their independence. The great

|earthquake of s. c. 484, which reduced Sparta to a

|heap of ruins, encouraged the Messenians and other

|Helots to rise against their oppressors. They took

|refuge in their ancient stronghold of Ithome; and

|the Spartans, after besieging the place in vain for

|ten years, at length obtained possession of it, by

|allowing the Messenians to retire unmolested from

|Peloponnesus. The Athenians settled the exiles at

|Naupactus, which they had lately taken from the

|Locri Oenacæ; and in the Peloponnesian War they

|were again called the allies of Naupactus. (Thuc. i.

|101—103; Paus. iv. 24. § 5, seq.) The capture of

|Athens by the Laccdonians compelled the Messenians
to quit Naupactus. Many of them took refuge in Sicily and Rhegium, where some of their countrymen were settled; but the greater part sailed to Africa, and obtained settlements among the

|Eunaries and Macabees. (Paus. iv. 26. § 2.) After the power of Sparta had been broken by the

|battle of Leuctra (s. c. 371), Epaminondas, in order to

|prevent her from regaining her former influence in

|the Peloponnesus, resolved upon forming an Ar

|cadian confederation, of which Megalopolis was to be

|the capital, and at the same time of restoring the

|Messens state. To accomplish the latter object, he

|proposed that this city should not only remain the

|trading centre of the district, but should be also

|eminent as the land continued uncultivated and

|deserted. (Strab. viii. p. 362.) Under the protec

|tion of Thebes, and in close alliance with the Arca

|dians (comp. Polyb. iv. 39), Messene maintained its

|independence, and the Laccdonians lost Messenia for

|ever. On the downfall of the Theban supremacy,

|the Messenians turned the alliance of Philip of

|Macedon, and consequently took no part with the

|other Greeks at the battle of Chaeronea, s. c. 338.

|(Paus. iv. 28. § 2.) Philip rewarded them by com

|pelling the Laccdonians to cede to them Limnas and
certain districts. (Polyb. ix. 28; Tac. Ame
in the reign of Tiberius; but he differs from the latter writer in assigning the possession of the Lacedaemonians to a decision of C. Caesar and M. Antony ("post C. Caesaris et Marci Antonii sententia redditum"). In such a matter, however, the authority of Pausanias deserves the preference. We learn, however, from Tacitus (i.c.), that Tiberius reversed the decision of Augustus, and restored the disputed district to the Messenians, who continued to keep possession of it in the time of Pausanias; for this writer mentions the woody hollow called Cheorius, 20 stadia south of Abia, as the boundary between the two states in his time (iv. 1. § 1, iv. 30. § 1). It is a curious fact that the district, which had been such a frequent subject of dispute in antiquity, was in the year 1835 taken from the government of Mithra (Sparta), to which it had always belonged in modern times, and given to that of Kalamita. (Ross, Reisen im Peloponnes, p. 2.)

IV. TOWNS.

1. In the plain of Stenyclerus. — ANDANIA, the capital of the Messenian kings before the Dorians, Oechalia, at the distance of 8 stadia from Andania, the reputed residence of Eurytus, occupied, according to Pausanias, the grove of cypresses called Carnesium. AMPHIRA, in the mountains on the borders of Arcadia. Two roads led into Arcadia: the more northerly ran along the river Charadrus past Carnesium (Paus. viii. 35. § 1); the more southerly started from Messene, and was a military road made by Epanomondas, to connect more closely the two newly founded cities of Messene and Megalopolis. (Paus. viii. 34; comp. Leake, Morea, vol. ii. p. 296.)

STENYCLARUS, the capital of the Dorian conquerors, and which gave its name to the plain, was also on the borders of Arcadia. Ira or Iera, where the citizens maintained themselves during the Second Messenian War, was situated upon the mountain of this name, to the north of the plain above the river Neda. At the extreme south of this plain, commanding also the entrance of the plain Macaria, was MESSINES, with its citadel Ithone. To the west part of the plain, on the road from Andania to Cyperis, were POLICINE and DOMITIUM.

2. In the plain of Macaria. — PHERAE, the modern Kalamita, situated about a mile from the sea, on the left bank of the river Neda, was in antiquity, as it is at present, the chief town in the plain. Three roads lead from Pherae; one southwards along the coast to Abia, said to be the Homeric Ira; a second up the valley of the Neda, across Mt. Taygetus to Sparta, one of whose gates was hence called the gate towards Phares ("porta quae Phares ducitur," Liv. xxxv. 30); while the third road ran across the Neda in a north-easterly direction to CALAMAE, the modern Kalami, where it divided into two, the one to the west going across the Pamias, and the other to the north leading to Thuria, of which there were two towns so called, and from thence to the sources of the Pamias. To the east of Pherae was the mountainous district called the Ager Dendelhætes, and containing LIMNÆ, which has been already described.

3. In the western peninsula and on the western coast. — CORONE and ASINE were on the Messenian gulf, and consequently on the east coast of this peninsula. The situation of COLONIDEIS is uncertain, some placing it on the Messenian gulf, and others near the harbour Phoenixus, NW. of the promontory Aetna. At the extreme southern point
of the western coast stood Methone, supposed to be the Homeric Pedasus. North of Methone, on the W. coast, was Pylos, on the promontory Coryphasmum, opposite to which was the island Sparaesus. Further north, was the small town Euna, and then the more important Cyprosimus; beyond which was a place Aelon, at the entrance of the defile of this name, through which flowed the river Cyprus.

(On the geography of Messenia, see Leake, Moræa, vol. i. pp. 324, seq.; Bublaye, Recercheres, p. 103, seq.; Curtius, Peloponnesos, vol ii. p. 121, seq.)

COIN OF MESSENIA.

MESSENIACUS SINUS. [Messen.] MESUSA, in Gallia Narbonensis, is described by Mela (ii. 5) "as a hill surrounded by the sea almost on all sides, and it would be an island if it were not joined to the mainland by a narrow neck." The place is supposed to be Messa or Messa, on the border of the Etna de Taus, between Agde and Montpellier.

[G. L.]

METAGONITAE (Messyanus, Ptol. iv. 2, § 10), a people of Mauretania, between the Mulucha and the Pillars of Hercules. Their name recalls the urbem Metagonitanum (Messyanus, Apoll. iii. 58), or settlements founded by the Carthaginians on the N.W. coast, and which seem to have formed a chain from their frontier to the Pillars of Hercules (Soyl. p. 81). These marks enabled the republic to carry on inland trade with the nomad tribes, as well as to keep open a communication by land with Spain. (Hieros. African. Nations, vol. i. p. 52, transl.)

[E. B. J.]

METAGONITAS ROMANUS, (Messyanus Romanus, Ptol. iv. i. § 7), a headland of Mauretania Tingitana, W. of the Mulucha, now Cape Tres Forzos or Ras-es-Delhir of the natives. (Strab. vii. p. 94.)

[E. B. J.]

METAGONIUM (Messyanus, Strab. xvii. pp. 827—839; Pompon. Mela, i. 7. § 11), a headland of N. Africa, which Strabo (i. c.) places over against Carthago Nova, at a distance of 3000 stadia. He describes the district about it as being dry and barren, and bearing the same name; the headland is now called Ras-el-Horabah. (Compl. Shaw, Trav. p. 94.)

METALLUM, [Metallum].

METALLUM. [Metalla.]

METAPA (§ Méara: Æol. Metapanus, Metavaides), a town in Aetolia, situated on the northern shore of the lake Trichonis, at the entrance of a narrow defile, and 60 stadia from Thermum. It was burnt by Philip, on his invasion of Aetolia, B.C. 218, as he returned from the capture of Thermum. Its site cannot be fixed with certainty, notwithstanding the description of Polybius. Leake places it immediately below Frakdorh, near the eastern extremity of the lake Hyris, or the northern of the two lakes; supposing that as these two lakes are connected with one another, the larger division may often have given name to the whole. (Pol. v. 7, 13; Steph. B. e. s.; Leake, Northern Greece, vol. i. p. 150, seq.; comp. Thermum.)

METAPNINUM OSTIUM. [Rhodand.]

METAPONUM or METAPONITUM (Metavonos: Thuc, Strab., and all Greek writers have this form; the Latins almost universally Metapontum: Æol. Metaponos, Paus, Steph. B., and on coins; but Herod. has Metapontos; in Latin, Metapontinus: Ru. near Torre di More), an important city of Magna Graecia, situated on the gulf of Tarentum, between the river Bradanus and the Casentus. It was distant about 14 miles from Hercules and 24 from Tarentum. Historically speaking, there is no doubt that Metapontum was a Greek city founded by an Achaean colony; but various traditions assigned to it a much earlier origin. Strabo ascribes its foundation to a body of Pylians, a part of those who had followed Nestor to Troy (Strab. v. p. 232, vi. p. 264); while Justin tells us it was founded by Epeius, the hero who constructed the wooden horse at Troy; in proof of which the inhabitants showed, in a temple of Minerva, the tools used by him on that occasion. (Justin, xx. 2.) Another tradition, reported by Ephorus (ap. Strab. p. 264), assigned to it a Phocian origin, and called Daulius, the tyrant of Cris near Delphi, its founder. Other legends carried back its origin to a still more remote period. Antiochus of Syracuse said that it was originally called Metabus, from a hero of that name, who appears to have been identified with the Metapontus who figured in the Greek mythical story as the husband of Melanippe and father of Aeolus and Beooetus. (Antioch. ap. Strab. l. c.; Hygin. Fab. 186; Eustath. ad Dionys. Per. 368; Diol. iv. 67.)

Whether there may have really been a settlement on the spot more ancient than the Achaean colony, we have no means of determining; but we are told that at the time of the foundation of this city the site was unoccupied; for which reason the Achaean settlers at Crotona and Sybaris were desirous to colonise it, in order to prevent the Tarentines from taking possession of it. With this view a colony was sent from the mother-country, under the command of a leader named Leucippus, who, according to one account, was compelled to obtain the territory by a fraudulent treaty. Another and a more plausible statement is that the new colonists were at first engaged in a contest with the Tarentines, as well as with the neighbouring tribes of the Oenotrians, which was at length terminated by a treaty, leaving them in the possession of the territory they had acquired. (Strab. vi. pp. 264, 265.) The date of the colonisation of Metapontum cannot be determined with certainty; but it was evidently, from the circumstances just related, subsequent to that of Tarentum, as well as of Sybaris and Crotona: hence the date assigned by Eusebius, who would carry it back as far as n.c. 747, is wholly untenable; nor is it easy to see how such an error can have arisen. (Curtius, Arm. Tyr. p. 99.) It may probably be referred to about 700—690 n. c.

We hear very little of Metapontum during the first ages of its existence; but it seems certain that it rose rapidly to a considerable amount of prosperity, for which it was indebted to the extreme fertility of its territory. The same policy which had led to its foundation would naturally unite it in the bonds of a close alliance with the other Achaean cities, Sybaris and Crotona; and the first occasion on which we meet with its name in history is as joining with
these two cities in a league against Siris, with the view of expelling the Ionian colonists of that city. (Justin, xx. 2.) The war seems to have ended in the capture and destruction of Siris, but our account of it is very obscure, and the period at which it took place very uncertain. [Scriba.] It does not appear that Metapontum took any part in the war between Crotona and Sybaris, which ended in the destruction of the latter city; but it was frequently mentioned in connection with the changes introduced by Pythagoras, and the troubles consequent upon them. Metapontum, indeed, appears to have been one of the cities where the doctrines and sect of that philosopher obtained the firmest footing. Even when the Pythagoreans were expelled from Crotona, they maintained themselves at Metapontum, whither the philosopher himself retired, and where he ended his days. The Metapontines paid the greatest respect to his memory; they consecrated the house in which he had lived as a temple to Ceres, and gave to the street in which it was situated the name of the Museum. His tomb was still shown there in the days of Cicero. (Lamb. Vit. Pyth. 170, 249, 266; Porphyry, Vit. Pyth. 56, 57; Plut. de Gen. Soc. 13; Diod. Laist. vii. 1, § 40; Liv. i. 18; Cic. de Fin. v. 2.) The Metapontines were afterwards called in as mediators to appease the troubles which had arisen at Crotona; and appear, therefore, to have suffered comparatively little themselves from civil dissensions arising from this source. (Diod. xiii. 262.)

At the time of the Athenian expedition to Sicily, n. c. 415, the Metapontines at first, like the other states of Magna Graecia, endeavoured to maintain a strict neutrality; but in the following year were induced to enter into an alliance with Athens, and furnish a small auxiliary force to the armament under Demosthenes and Eurymedon. (Diod. xiii. 4; Thuc. vi. 44, vii. 33, 57.) It seems clear that Metapontum was at this time a flourishing and opulent city; nor have we any reason to suppose that its decline began until long after. From its position it was secured from the attacks of Dionysius of Syracuse; and though it must have been endangered in common with the other Greek cities by the advancing power of the Lucanians, it does not appear to have suffered so severely as to render it uninhabitable to the people, and probably suffered but little from their attacks. Its name is again mentioned in n. c. 345, when Timoleon touched there on his expedition to Sicily, but it does not appear to have taken any part in his favour. (Diod. xvi. 66.) In n. c. 352, when Alexander, king of Epirus, crossed over into Italy at the invitation of the Tarantines, the Metapontines were among the first to conclude an alliance with that monarch, and support him in his wars against the Lucanians and Bruttians. Hence, after his defeat and death at Pandosia, n. c. 326, it was to Metapontum that his remains were sent for interment. (Justin, xli. 2; Liv. viii. 24.) But some years later, n. c. 305, when Cleonymus of Sparta was in his turn invited by the Tarantines, the Metapontines, for what reason we know not, pursued a different policy, and incurred the resentment of that leader, who, in consequence, turned his own arms, as well as those of the Lucanians, against them. He was then admitted into the city on friendly terms, but nevertheless exacted from them a large sum of money, and compelled them to pay other expenses. (Diod. xx. 104.) It is evident that Metapontum was at this period still wealthy; but its citizens had apparently, like their neighbours the Tarantines, fallen into a state of slothfulness and luxury, so that they were become almost proverbial for their effeminacy. (Plut. Apophth. Lec. p. 233.) It seems certain that the Metapontines, as well as the Tarantines, lent an active support to Pyrrhus, when that monarch came over to Italy; but we do not find them mentioned during his war there; nor have we any account of their proceedings in the wars which they passed under the yoke of Rome. Their name is, however, again mentioned repeatedly in the Second Punic War. We are told that they were among the first to declare in favour of Hannibal after the battle of Cannae (Liv. xxii. 61); but notwithstanding this, we find their city occupied by a Roman garrison some years later, and it was not till after the capture of Tarentum, in n. c. 212, that they were able to rid themselves of this force and openly expose the Carthaginian cause. (Id. xxv. 11, 15; Pol. viii. 36; Appian, Asiac. 38, 35.) Hannibal now occupied Metapontum with a Carthaginian garrison, and seems to have made it one of his principal places of deposit until the fatal battle of the Metaurus having now opened him a road to give him a free passage into the interior of Italy. In the session of this part of Italy, n. c. 207, he withdrew his forces from Metapontum, and, at the same time, removed from thence all the inhabitants in order to save them from the vengeance of Rome. (Id. xxvii. 1, 16, 42, 51.)

From this time the name of Metapontum does not again appear in history; and it seems certain that it never recovered from the blow thus inflicted on it. But it did not altogether cease to exist; for its name is found in Mela (ii. 4, § 8), who does not notice any extinct places; and Cicero speaks of visiting it in terms that show it was still a town. (Cic. de Fin. v. 2; see also Appian, B. C. v. 93.) That orator, however, elsewhere alludes to the cities of Magna Graecia as being in his day sunk into almost complete decay; Strabo says the same thing, and Pausanias tells us that Metapontum in particular was in his time completely in ruins, and nothing remained of it but the theatre and the circuit of its walls. (Cic. de Asiac. 4; Strab. vi. p. 262; Paus. vi. 19. § 11.) Hence, though the name is still found in Polybius, and the "ager Metapontinus" is recognized in the Liber Colonorum, all that is told of the city subsequently disappears, and it is not even noticed in the Itineraries where they give the line of route along the coast from Tarentum to Thurii. The site was probably already subject to malaria, and from the same cause has remained desolate ever since.

Though we hear much less of Metapontum than of Sybaris, Crotona, and Tarentum, yet all accounts agree in representing it as, in the days of its prosperity, one of the most opulent and flourishing of the cities of Magna Graecia. The fertility of its territory, especially in the growth of corn, vied with the neighbouring district of the Siritis. Hence we are told that the Metapontines sent to the temple at Delphi an offering of "a golden harvest" (Μεταποντικὴ καλλωπίς), by which we must probably understand a sheaf or bundle of corn wrought in gold. For the same reason an ear of corn became the characteristic symbol on their coins, the number and variety of which in itself sufficiently attests the wealth of the city. (Millingen, Numismatique de l'Italie, p. 22.) We learn also that they had a treasury of their own, the Olympeion, still existing in the days of Pausanias (Paus. vi. 19. § 11; Athen. xi. p. 479.) Herodotus tells us that they paid par-
ticular honours to Aristea, who was said to have appeared in their city 340 years after he had dis-
appeared from Cyzicus. They erected to him a
statue in the middle of the forum, with an altar to
Apollo surrounded by a groove of laurels. (Herod. iv.
15.; Ath.¼. Hist. iv. 500.b, c.) From their coin they
would appear also to have paid heroic honours to
Lucippus, as the founder of their city. (Millingen,
L.c. p. 24.) Strabo tells us, as a proof of their
Pyan origin, that they continued to perform sacri-
fices to the Neileiada. (Strab. vi. p. 264.)

The site and remains of Metapontum have been
carefully examined by the Duce de Luyres, who has
illustrated them in a special work (Metapontae, fol.
Paris, 1838). It is remarkable that no trace exists
of the ancient walls or the theatre of which Pana-
nias speaks. The most important of the still exist-
ing monuments is a temple, the remains of which occupy
a slight elevation near the right bank of the Brad-
anus, about 2 miles from its mouth. They are
now known as the Tempe del Paladino. Fifteen
columns are still standing, ten on one side and five
on the other; but the two ends, as well as the whole
of the entablature above the architrave and the walls
of the cells, have wholly disappeared. The archi-
tecture is of the Doric order, but its proportions
are lighter and more slender than those of the celebrated temple of Didyma. (Paus. vi. 14.) It is in all probability of later date. Some remains of another temple, but prostrate, and a mere heap of ruins, are visible
nearly 2 miles to the S. of the preceding, and a short
distance from the mouth of the Bradanus. This
spot, called the Chiesa di S. Alessano, appears to mark
the site of the city itself, numerous foundations of
buildings having been discovered all around it. It
may be doubted whether the more distant temple
was ever included within the walls; but it is im-
possible now to trace the extent of the ancient city.
The Torre di Mare, now the only inhabited spot on
the plain, derives its name from a castellated edifice
of the middle ages; it is situated above 1½ mile
from the sea, and the same distance from the river
Bastiento, the ancient Casentino. Immediately op-
posite to it, on the sea-shore, is a small salt-water
basin or lagoon, now called the Lago di St. Pola-
gina, which, though neither deep nor spacious, in
all probability formed the ancient port of Metap-
ontum.

Metapontum was thus situated between the two
rivers Bradanus and Casentino, and occupied (with
its port and appendances) a considerable part of
the intermediate space. Appian speaks of "a river
between Metapontum and Tarentum of the same
name," by which he probably means the Bradanus,
which may have been commonly known as the river
of Metapontum. This is certainly the only river
large enough to answer to the description which he
gives of the meeting of Octavius and Antony which
took place on its banks. (Appian, B. C. v. 104.)
The coins of Metapontum, as already observed,
soon as the Carthaginian general discovered the arrival of Claudius, with an auxiliary force of 6000 foot and 1000 horses, he broke up his camp and retreated in the night to the Metaurus, which was about 14 miles from Sena. He had intended to cross the river, but missed the ford, and ascended the right bank of the stream for some distance in search of one till finding the height and situation of the Metaurus so much higher and farther he receded from the sea, he was compelled to halt and encamp on a hill. With the break of day the Roman armies overtook him, and compelled him to a general engagement, without leaving him time to cross the river. From this account it is clear that the battle was fought on the right bank of the Metaurus, and at so great a distance from its mouth, as the troops of Hasdrubal could not, nor any of their night march from Sena, have proceeded many miles up the course of the river. The ground, which is well described by Arnold from personal inspection, agrees in general character with the description of Livy; but the exact scene of the battle cannot be determined. It is, however, certain an английск as the richest and most florid of the period. Appian and Zonaras, though they do not mention the name of the Metaurus, speak of the battle near such a river as the Metaurus at Sena; but the former has confounded this with Sena in Etruria, and has thence transferred the whole theatre of operations to that country. (Appian, Assab. 52; Zonar. iv. 9; Arnold's Rome, vol. iii. pp. 364—374; Vandoucort, Compagnie d'Anville, vol. iii. pp. 59—64; Cramer's Italy, vol. i. p. 260.)

(1) (Metéllinum), a river of Brutium, flowing into the Metaurus river between Mesine and Sicyonian promontory. It is mentioned both by Piny and Strabo; and there can be no doubt that it is the river now called the Marvo, one of the most considerable streams in this part of Brutium, which flows into the sea about 7 miles S. of the Metaurus, and 18 from the rock of Scilla. (Strab. vi. p. 356; Plin. iii. 5. a. 10; Romanselli, vol. i. p. 66.) There was a town on the same name at its mouth. [METELLINUM.] [E. H. B.]

METELLINUM. (It. Anton. p. 416; Metelion, Geogr. Rev. iv. 44), or METALLUMINUM (Colonia Metelium, Plin. iv. 21. a. 35), a Roman colony of Lusitania on the Ana, 24 Roman miles from Augusta Emerita, now Metellina. The modern town lies on the southern side of the river, so that the ancient town ought to have been included in Baetica. Hence some modern writers have conjectured that the Ana may here have changed its bed. The form of the name would lead to the supposition that the colony was founded by Metellus, in which case Metellinum would be a more correct form than Metal- linium.

METEON, a town of the Labeates, to which Gentius removed his wife and family. (Liv. xiv. 32; Median, Geogr. Rev.) It may perhaps be represented by the village of Meterees in the Rieda district of Monte-Negro, to the N. of Lake Scutari. (Wilkinson, Dalmatia, vol. i. p. 552.) [E. B. J.]

METHANA (Athen. p. 263, Paus. Strab., et alii; Methone, Thuc. iv. 45; Diod. xii. 65; Methon, Sostr., Paus. i. 40. 8). Strabo says (viii. p. 574), "that in some copies of Thucydides it was written Methowa, like the town

Ptol. iii. 16. § 19; Methone), a striking rocky peninsula, connected by a narrow isthmus with the territory of Troezen in Argolis, and containing a city of the same name. Pausanias first describes Methana as an isthmus running far into the sea (ii. 34. § 1); Thucydides more correctly distinguishes between the isthmus and chersonesus (iv. 45.); and Pausanias also speaks of the chersonesus (iii. 16. § 12). The isthmus is only about 1000 feet broad, but it immediately spreads out equally on both sides. The outline of the peninsula is grand and picturesque. The highest mountain, called Chelonia, which is 2281 (French) feet above the level of the sea, is of a conical form, and was thrown up by a volcano. The whole peninsula bears marks of volcanic agency. The rocks are composed chiefly of that variety of lava called trachyte; and there are hot sulphurous springs, which were used in antiquity for medicinal purposes. Pausanias speaks of hot baths at the distance of 30 stadia from the city of Methana, which were said to have first burst out of the ground in the time of Antigonus, son of Demetrius, king of Macedonia, after a violent volcanic eruption. Pausanias adds that there was no cold water for the use of the bather after the warm bath, and that he could not plunge in the sea in consequence of the sea-dogs and other monsters. (Paus. l. c.) Strabo, in describing the same volcanic eruption to which Pausanias alludes, says that a hill 7 stadia high, and fragments of rocks as high as the same hill, was thrown up; that in the day-time the plain could not be approached in consequence of the heat and sulphurous smell, while at night there was no unpleasant smell, but that the heat thrown out was so great that the sea boiled at the distance of 5 stadia, and its waters were troubled for 20 stadia (l. c. p. 59). Ovid describes, apparently, the same eruption in the lines beginning "Est prope Pitheas tumulus Troezena." (Met. xv. 294), and says that a plain was upheaved into a hill by the confined air seeking vent. (Comp. Lyell's Principles of Geology, pp. 10, 11, 9th ed.) The French Commission point out the site of two hot sulphurous springs; one called Vrenna, in the middle of the northern coast of the island, and the other in the village Vromolimes, a little above the eastern shore. There are traces of ancient baths at both places; but the northern must be those alluded to by Pausanias.

The peninsula Methana was part of the territory of Troezen; but the Athenians took possession of the peninsula in the seventh year of the Peloponnesian War, a. c. 425, and fortified the isthmus. (Thuc. iv. 45.) There are still traces of an ancient fortification, renewed in the middle ages, and united by means of two forts. In the peninsula there are Hellenic remains of three different mountain fortresses; but the capital lay on the west coast, and the ruins are near the small village of the same name. Part of the walls of the acropolis and an ancient town on the north side still remain. Within the citadel stands a chapel, containing stones belonging to an ancient building, and two inscriptions on marble, one of which refers so called in Macedonia." This form is now found in all the existing MSS. of Thucydides. But there can be no doubt that Methone, which has prevailed down to the present day, is the genuine Doric form of the name.
METHONE. 

350 to Iasia. This, accordingly, was the site of the temple of Iasia, mentioned by Pausanias, who also speaks of statues of Hermes and Heracles, in the Agora. (Leake, *Mores* vol. ii. p. 453, seq.; *Peloponnesiacae*, p. 278; Bollay, *Eleutheues*, *p. 59; Curtius, *Peloponnesiacae*, vol. ii. p. 438, seq.)

METHONE (Μήθονε, Steph. B.), a town of Pieria in Macedonia, on the Thermo gulf, mentioned in the Peripitus of Sclavos (p. 26), and therefore one of the Greek colonies established in early times on this coast. According to Plutarch (*Quaest. Graec. p. 293*), a party of Eretrians settled there, who were called Methonians (p. 438), and who appear to have come near them at the same time as the occupation of Corecyra by the Corinthians a. c. 730-720.

The town was occupied by the Athenians with a view of annoying Perdiccas, by ravaging his territory, and affording a refuge to his discontented subjects. (Thuc. vi. 7.) It appears to have been in 354-353 B.C. that Philip attacked Methone, the last remaining possession of Athens in the Macedonian coast. The position was a convenient station for Athenian privateers to intercept trading vessels, not merely to and from Macedonian ports, but also from Olynthus and Ptolemais. The siege was vigorously pressed by Philip; and the Methonians, who gave up their attempts to escape, and were themselves ex- 

METHONE (Μήθονε, Steph. B.), a town of Pieria in Macedonia, on the Thermo gulf, mentioned in the Peripitus of Sclavos (p. 26), and therefore one of the Greek colonies established in early times on this coast. According to Plutarch (*Quaest. Graec. p. 293*), a party of Eretrians settled there, who were called Methonians (p. 438), and who appear to have come near them at the same time as the occupation of Corecyra by the Corinthians a. c. 730-720.

The town was occupied by the Athenians with a view of annoying Perdiccas, by ravaging his territory, and affording a refuge to his discontented subjects. (Thuc. vi. 7.) It appears to have been in 354-353 B.C. that Philip attacked Methone, the last remaining possession of Athens in the Macedonian coast. The position was a convenient station for Athenian privateers to intercept trading vessels, not merely to and from Macedonian ports, but also from Olynthus and Ptolemais. The siege was vigorously pressed by Philip; and the Methonians, who gave up their attempts to escape, and were themselves ex- 

of the seven cities which Agamenmon offered to Achilles. (Hom. II. ix. 294.) Homer gives to 

the poet of the seven cities which Agamenmon offered to Achilles. (Hom. II. ix. 294.) Homer gives to pedasus the epithet ἄργανδρος, and Methone seems to have been celebrated in antiquity for the cultivation of the vine. The eponymous heroine Methone, is called the daughter of Oenomeus, the "wine- 

man" (Paus. l. c.); and the same name occurs in the islands Oenussa, lying opposite the city. The name of Methone first occurs in the Messenian war. Methone and Pyius were the only two places which the Messenians continued to hold in the second war, after they had retired to the mountain fortress of Lakedaimon. (Paus. l. c., xii. 18. § 1.) At the end of the Second Messenian War, the Lacedaemonians gave Methone to the inhabitants of Nauplia, who had lately been expelled from their own city by the Argives. (Paus. iv. 24. § 4, iv. 35. § 2.) The descendents of the Nauplians continued to inhabit Methone, and were allowed to remain there even after the restoration of the Messenian state by Epaminondas. (Paus. iv. 37. § 6.) In the first year of the Peloponnesian War, a. c. 431, the Athenians attempted to obtain possession of Methone, but were repulsed by Brasidas. (Thuc. ii. 25.) Methone suffered greatly from an attack of some Ilyrian privateers, who, under the pretext of purchasing wine, entered into intercourse with the inhabitants and failed to get the wine, attacked, and burnt it. (Paus. iv. 35. §§ 6, 7.) Shortly before the battle of Actium, Methone, which had been strongly fortified by Antony, was besieged and taken by Agrippa, who found there Bogun, king of Mauretania, whom he put to death. (Dion. Cass. l. 11.; Strab. viii. p. 359; Oros. vi. 19.) Methone was favoured by Trajan, who made it a free city. (Paus. iv. 35. § 8.) It is also mentioned by Mela (ii. 3), Pliny (iv. 5. 47), Ptolemy (iii. 15. § 7), and Hierocles (p. 647).

Pausanias found at Methone a temple of Athena Anemotis, the "storm-stiller," and one of Artemis. He also mentions a well of bituminous water, similar both in smell and colour to the tincture of Cyriaca, but of which no trace is now found. In 1124 Modon was conquered by Venetians, but did not assume the name of Methone until 1435. Methone at Elaphocho-khóri, 3 miles from the sea; but the Epitome is not much to be depended on in this passage. [E. B. J.]

METHONE. 1. (Μήθονε, Strab.; Methona, Paus., Sclavos, *p. 17; Eth. *Methonei*; Paus. iv. 15. § 1, and Coins; Methoneus, Steph. B. a. e.: Methoni, *Methonion*, *Modono*), an ancient town in the SW. corner of Messenia, has always been an important place, both in ancient and in modern times, on account of its excellent harbour and salubrious situation. It is situated at the extreme point of a rocky ridge, which runs into the sea, opposite the island Tsepies, one of the group called in ancient times Oenussa. Off the outer end of the town, is the little isolated rock which Pausanias (iv. 35. § 1) calls Methon, and which he describes as forming at once a narrow entrance and a shelter to the harbour of his time: it is now occupied by a tower and lantern, which is connected by a bridge with the fortification of Methoni. A mole branches from it, which runs parallel to the eastern wall of the town, and forms a harbour for small boats, but is exactly in the position of the ancient port, the entrance into which was probably where the bridge now stands." (Leake.) According to the unanimous testimony of the ancient writers (Strab. viii. p. 359; Paus. iv. 35. § 1), Methone was the Homeric Pedasus, one
METHORA.  

METHEPIDA (Μεθόπηδα, Arrian, Indic. 8), a small state in the centre of India, which was subject to the great tribe of the Prasali. It was situated near, if not upon, the Jumane or Jumna (Plin. vi. 19. a. 29), and has, with much probability, been assumed to be on the site of the present Allahabad. [V.]

METHEPIDAS (Μεθόπηδας), a group of small islands, lying between Nicaea, the port of Meqara, and Salaminis. (Plin. iv. 12. a. 19.) Strabo describes them, without mentioning their names, as five small islands, which, on sailing into Attica (ix. p. 393), Stephanus B. (s. v.) loosely speaks of them as lying between Aegina and Attica.

METHEYDRIUM (Μεθηύδριον; Eth. Μεθηύδρια), a town in central Arcadia, situated 170 stadia north of Megapolis (Paus. viii. 35. § 5), obtained its name, like Interamna, from being situated upon a lofty height between the two rivers Maloetes and Mylais. (Paus. viii. 36. § 1.) It was founded by Orchomenus; but its inhabitants were removed to Megapolis, upon the establishment of that city. It never recovered its former population, and is mentioned by Strabo (viii. p. 386) among the places of Arcadia which had almost entirely disappeared. In 431 B.C. it was, however, to exist for a time as the Passus of Poseidon Hippius upon the river Mylais. He also mentions, above the river Maloetes, a mountain called Thaumatisus, in which was a cave where Rhea took refuge when pregnant with Zeus. At the distance of 30 stadia from Methydrium was a fountain named Mylasia. (Paus. viii. 36. §§ 1—3; comp. vii. 13. § 2, 27. §§ 4, 7.) Methydrium is also mentioned in the following passages: Thuc. v. 58; Polyb. v. 10, 11, 13; Plin. iv. 6. a. 10; Steph. B. s. v.

There is some difficulty in determining the exact site of Methydrum. Some writers identify it with the Hellenic remains called Palatus; but these are not on a lofty hill between two rivers, but in a low situation above the junction of the rivers on the right bank of one of them. Methydrum should rather be placed 45 minutes further, at the distance of 10 miles SE. of the village of Nimatisa, where there are some ancient ruins, one between two streams, on a height below Pyrgos, otherwise called Pyrgidus. It is true that this also is not a lofty hill; but Pausanias uses the expression σαλάκης βαλζᾶν, and θαυμασίας has reference to σαλάκης, which means only a slight elevation. (Leske, Morea, vol. ii. p. 57, Peloponnesica, p. 201: Boblaise, Recherches, ii. p. 151: Ross, Reisen im Peloponnes, p. 116: Curtius, Peloponnesica, vol. i. p. 309.)

METINTHIUM (Μεθύνθιον, and on coins Μήθυνθιον, Μεθύνθιος; Eth. Μήθυνθιονιος), a town in Lesbos, the most important next after Mytilene. It was situated on the northern shore of the island, where a channel of 60 stadia (Strab. xiii. p. 618) intervened between it and the coast of the mainland near Assos.

One of the earliest notices of the Metynthienses is the mention of their conquest of Arisba, another town of Lesbos, and their enslaving of its citizens. (Herod, i. 151.) The territory of Methyntis seems to have been contiguous to that of Mytilene, and this may have been one cause of the jealousy between the two cities. The power and fame of Mytilene was on the whole far greater; but in one period of the history of Lesbos, Methyntis enjoyed greater prosperity. She did not join the revolt of the other Lesbians from Athens in the Peloponnesian War (Thuc. iii. 2, 18), and she was therefore exempted from the severe punishment which fell on Mytilene. (Thuc. iii. 50.) Hence she retained the old privilege of furnishing a naval contingent instead of a tribute in money. (Thuc. vi. 85, vii. 57.) Shortly before the battle of Arginusae, Methyntis fell into the power of the Lacedaemonians, and it was on this occasion that the magnanimous conduct of Callixarchidas presented so remarkable a contrast to that of the Athenians in reference to Mytilene. (Xen. Hell. i. 6. § 14.) After this, lying before the time Methyntis seems to have become less and less important. It comes into notice, however, in every subsequent period of history. It is mentioned in the treaty forced by the Romans (s. c. 154) between Attalus II. and Ptolemy II. (Polyb. xxxii. 11.) It is stated by Livy (xiv. 31) and by Pliny (v. 31) to have incorporated the inhabitants of Antissa with its own. Its coins, both autonomous and imperial, are numerous. It was honourably distinguished [see Lesbos] for its resistance to the Mahomedans, both in the 12th and 15th centuries; and it exists on the same spot at the present day, under the name of Mouros.

We have no information concerning the buildings and appearance of ancient Methyntis. It evidently possessed a good harbour. Its chief fame was connected with the excellent wine produced in its neighbourhood. (Verg. Georg. ii. 90; Ovid, Art. Am. i. 57; Hor. Sat. ii. 8. 50.) Horace (Od. iv. 17. 21) calls Lesbian wine "innocent;" and Athenaeus (ii. p. 45) applies the epithet βουλαγμων to a sweet Lesbian wine. In another place (i. p. 23) he describes the medicinal effect of the wine of this island. (See also i. pp. 28, 29; and Aug. Gell. xii. 5.) Pliny says (xiv. 9) that it had a salt taste, and apparently mentions this as a merit. Pausanias, in his account of Delphi (x. 19), tells a story of some fishermen of Methyntis dragging in their nets out of the sea a rude image of Bacchus, which was afterwards worshipped.

Methyntis was the birthplace of the poet and musician Arion. Myrillus also, who is said to have written a history of Lesbos, is supposed to have been born here. [J. S. H.]

COIN OF METHYNTIS.

METYTHYMNA (Μεθυθύμνη), a city in Crete, near Rhocca, which Aelian (N. A. xiv. 20) mentions in connection with a curious story respecting a remedy for hydrophobia discovered by a Cretan fisherman. Mr. Pasheley (Trans. vol. ii. p. 40) considers that the remains near the chapel of Hephæstis Georgitica, by Nopia, on the extreme eastern edge of the plain of Kissamos-kastelli, represent Methyntis. [E. B. J.]

METYNA INSULA. [RHOADAM.] METHYOMEDUM. [MELIODUNUM.]

METRO️ES (Μετρωχε, Psil. vi. 4. § 3), a branch of the great robber tribe of the Mardi, who were settled in Persia. Their name is sometimes written Matropses.

METYTOPOLIS (Μεθυτωπόλις; Eth. Μεθυτωπο-Αλτης.) 1. A town in the Cretan plain in
METROPOLIS.

Lydia, on the road from Smyrna to Ephesus, at a distance of 120 stadia from Ephesus, and 180 from Smyrna. The district of Metropolis produced excellent wine. (Strab. xix. pp. 653, 657; Ptol. v. 2. § 17; Stephan. B. s. a.; Plin. v. 81; Hieroc. p. 600.) Near the modern village of Toumbi, no doubt a corruption of the ancient name Metropolis, some ruins are still seen; and as their distance from Smyrna and Ephesus agrees with that mentioned by Strabo, there can be no hesitation in identifying the place. (Cmp. Arundell, Sees of Church, p. 33, B., 4. Chichester, p. 542; Rasche, Lexic. Num. iii. 1, p. 653, 654.)

2. A town in the north of Phrygia, and, as the name seems to indicate, the capital of the ancient kings of Phrygia, though Stephanus Byz. (s. e.) derives the name from the mother of the gods. It was situated to the north of Symba ( Athen. xiii. p. 574.), and must not be confounded with another town of the same name in the south of Phrygia. Its site is, in all probability, indicated by the ruins of Pniosph Kalass, north of Doganis, which show a very antique style of architecture, and mainly consist of tombs cut into the rocks; one of these tombs is that of king Midas. Leake (Asia Minor, p. 24) is inclined to think that these ruins mark the site of Nocissi; but other travellers, apparently more just, identify them with a place called Kastri, or Kastri, which the name of Myrtoonlar occurs in an inscription. (Leake, Northern Greece, vol. iii. p. 371.)

3. (Logodizes), a town in the interior of Acarnania, S. of Stratus, and on the road from the latter place to Conope in Aetolia. At a later time it fell into the hands of the Aetolians, but was taken and burned by Philip in his expedition against the Aetolians, a. c. 219. It is mentioned as one of the towns of Acarnania, in a Greek inscription found at Actium, the date of which is probably prior to the time of Augustus. (Poltby. iv. 64; Stephan. B. s. v. ; Böckh, Corpus Inscription. No. 1793; Leake, Northern Greece, vol. iii. p. 376.)

4. A town in Amphipolis, near Olynth. (Thuc. iii. 107.) As to its site, see Argos Amphipolium.

METROPOLIS (Μητροπολις; Eub. Μητροπολις).—1. A town of Hissiatissa in Thessaly, described by Stephanus Byz. (s. e.) as a town in Upper Thessaly. Strabo says (ix. p. 438), that Metropolis was founded by three insignificant towns, but that a larger number was afterward added, among which was Ithome. He further says, that Ithome was within a quadrangle, formed by the four cities Tricca, Metropolis, Pelionaeum, and Gomphi. The position of Metropolis is also determined by its being on Caesar's march from Gomphi to Pharsalus. (Caes. B. G. iii. 81; Appian, B. C. ii. 64; Dion Cass. xili. 51.) It was taken by Pausanias on his descending this part of Thessaly, after the battle of the Aoos, a. c. 198. (Liv. xxxii. 15.) We learn from an inscription that the territory of Metropolis adjoined that of Cierium (the ancient Arne), and that the adjustment of their boundaries was a frequent subject of discussion between the two peoples. [Ciceron.] Metropolis is mentioned in the sixth century Hierocles (p. 642), and continued to exist in the middle ages under the name of Neo-Patra (Νεο Πατρα, Constant. de Them. ii. p. 50, ed. Bonn). The remains of Metropolis are placed by Leake at the small village of Paleokastro, about five miles SW. of Karditsa. The city was of a circular form, and in the centre of the circle are the vestiges of a circular citadel, part of the wall of which still exists in the yard of the village church of Paleokastro, where is a collection of the sculptures or inscribed remains found upon the spot within late years. Among other sculptures Leake noticed one in low relief, representing a figure seated upon a rock, in long drapery, and a mountain rising in face of the figure, at the foot of which there is a man in a posture of adoration, while on the top of the mountain there are other men, one of whom holds a log in his hands. Leake conjectured with great probability that the seated figure represents the Aphrodite of Metropolis, to whom Strabo says (i. c.) that hogs were offered in sacrifice. (Leake, Northern Greece, vol. iv. p. 506.)

2. Another town in Thessaly, which Stephanus B. calls simply a town in Thessaly. This appears to be the Metropolis mentioned by Livy in his account of the campaign of Antiochus, in a. c. 191, where it is related that the Syrian king having landed at Demetrias, first took Phereas, then Crannon, then Cyparissus and Metropolis, and all the neighbouring fortresses, except Atrax and Gyton, and afterwards proceeded to Larissa. (Liv. xxxvi. 10.) From this account it would appear that this Metropolis was in Perrhebasia; and its site has been discovered by M. de Vogue, in the ruins of a village called Kastri, where the name of Μητροπολις occurs in an inscription. (Leake, Northern Greece, vol. iii. p. 371.)

3. (Logodizes), a town in the interior of Acarnania, S. of Stratus, and on the road from the latter place to Conope in Aetolia. At a later time it fell into the hands of the Aetolians, but was taken and burned by Philip in his expedition against the Aetolians, a. c. 219. It is mentioned as one of the towns of Acarnania, in a Greek inscription found at Actium, the date of which is probably prior to the time of Augustus. (Poltby. iv. 64; Stephan. B. s. v.; Böckh, Corpus Inscription. No. 1793; Leake, Northern Greece, vol. iii. p. 376.)

4. A town in Amphipolis, near Olynth. (Thuc. iii. 107.) As to its site, see Argos Amphipolium.

5. A town of Doria. (Stephan. B. s. v.)

6. A town of Eueoba. (Stephan. B. s. v.)

METULUM. [TARODES, Vol. II. p. 8, b.]

MEVANIA (Μεβανία, Streb. Ptol.: Eub. Μεβανία, Streb. B., Eub.) a considerable city of Umbria, on the Flaminian Way, between Carsium and Fureginnim. It was situated on the river Tinia, in a broad and fertile valley, which extends from the neighbourhood of Spoletoium to the Tiber, separating the main chain of the Apennines from a lateral mass or offshoot of the same range, which extends from Mevaonia and Spoletoium to Tuder and Ameria. It is this valley, about 8 or 10 miles in breadth, watered by the Flumimnian and Tinnia, with several tributary streams, the pastures of which were celebrated for their breed of white oxen, the only ones thought worthy to be sacrificed as victims on triumphal and other solemn occasions. Hence their praises are not less frequently associated with the name of Mevaonia than with that of the Flumimnian. (Colum. iii. 5, 8. 8. 474. v. 457. vi. 458; Lucca. s. f. 473.) Mevaonia appears to have been an important place before the Roman conquest of this part of Italy. In a. c. 308 it was chosen by the Umbrians as the headquarters of their assembles forces, where they were defeated by Q. Fabius. (Liv. ix. 41.) At a much
MEVANIAŁA.

later period it was occupied by the emperor Vitellian, with the intention of defending the passes of the Apenines against the generals of Verusian, but he quickly abandoned it again, and retired to Rome. (Tac. Hist. iii. 55, 59.) As it was situated in the plain, it could scarcely be a very strong fortress; but Pliny notices it as one of the few cities of Italy that had walls of brick (xxxv. 56. 49). Scabo speaks of living at this time in the magnificent towns in the interior of Umbria: it was only of municipal rank, but seems to have continued a flourishing place throughout the period of the Empire. (Strab. v. p. 227; Plin. iii. 14. a. 19; Potl. iii. 1. § 54; Hist. Asiat. p. 311; Orell. Inscr. 19.) The modern Besevi is a very poor and decayed place, with little more than 2000 inhabitants, though retaining its episcopal see, and the title of a city. It contains some remains of an amphitheatre, and mosaic pavements which belonged to the ancient Thermas. (Calindri, Stat. del Pontif. Stato, p. 104.)

Mevania appears to be indicated by the poet Propertius himself as the place of his birth (iv. 1. 123), though others suggest his passage, and regard Hesepulum as having the better claim. (Barth. Vitr. Propert.; Kuinoel, ad l c.) It was noted for the fogs to which it was subject. (Propert. i. 5.; Sil. Ital. vi. 646.) Pliny speaks of its territory (Mevanias ager, xiv. 3. § 37) as producing a particular kind of vine, which he calls Irisola; probably the same now called "Pinotello," for which the district is still celebrated. (Hardouin, ad loc.; Rampoldi, Corografia, vol. i. p. 233.) [E. H. B.]

MEVANIAŁA. [UMBRIA.]

MIACOBUS or MILCOCBUS (Miczepus, Mić- kowycz; Thopomp. ap. Steph. B. s. v.), a city which may be assigned to the interior of Chalcedon. (Leake, North Greece, vol. iii. p. 456.) [E. B. J.]

MIBA, in Britain, supposed more correctly Mida, is placed in the Ravenna's Chronography among the towns in the south of Britain. It has been conjectured that Midhara, in Sussex, is its modern representative; but this supposition is not warranted by existing remains. [G. R. S.]

MICHMAS (Māyūs, LXX.; Māyūs, Joseph., Buesse), a city of the tribe of Benjamin, eastward from Bethel (cf. Brook Sm. xii. 25), held by the Philistines, while Saul and the Israelites were in Gibeath. It was on the line of march of an invading army from the north, and the Assyrians are represented as depositing their baggage there when advancing against Jerusalem. (Isaiah, x. 28.) It is placed by Buesseins and St. Jerome in the borders of Asial, and was then a considerable village, retaining its ancient name, 9 miles from Asial, near Rama. (Onomast. s. v.) The same description exactly applies to it at the present day. It is 3 hours distant from Jerusalem, nearly due north. 

Midhams stands on a low ridge between two small Wadya running south into the much larger valley named Wadya es-Swēitī. It bears marks of having been a large village, the larger part of which lies in the vicinity. There are many foundations of hewn stones, and some columns among them. The Wadya es-Swēitī is "the Passage of Michmas" spoken of in 1 Samuel (xiii. 23), and Isaiah (x. 29). It is an extremely steep and rugged valley, which commences in the neighbourhood of Bethel, and a little below (E.) Midhams contracts between perpendicular precipices.

The rocks Broses and Seneb, mentioned in connection with Jonathan's exploit (1 Sam. iv. 4),

[VOL. II.]

MIDEIA. 353

may still be recognised in two conical rocky knolls projecting into the valley between Jebel (ancient Gibeath) and Mākandā (R. Robinson, Bib. Res. vol. ii. pp. 116, 117.) In the Talmud the soil of Michmash is celebrated for its fertility. (Reland, Palaeas- tosia, s. c. p. 897.)

MIDAEUM or MIDAEUM (Mīdēsow), a town in the NE. of Phrygia, on the little river Bathys, on the road from the Ionian to the Phrygian province, belonging to the conventus of Synnada. (Steph. B. s. v.; Plin. v. 32. a. 41; Potl. v. 2. § 22; Strab. xii. p. 576; Hieroc. p. 678, where it is wrongly called Mēdeiow.) The town, as its name indicates, must have been built by one of the ancient kings of Phrygia, and has become celebrated in history by the fact that Sextus Pompeius, the son of Pompey the Great, was there taken prisoner by the generals of M. Antony, and afterwards put to death. (Dios. Casm. xiii. 18.) It has been supposed, with some probability, that the town of Mygdonum, mentioned by Ammianus Marcellinus (xxvi. 7), is the same as Midaeum. [L. S.]

MIDEIA or MIDEA. 1. (Mīdeas, Paus.; Mīdeas, Strab.; Ed. Mīdeēōs), an ancient city of the Argoitia, was originally called Persepolis (Περσεπόλις ἄνδης, Steph. B. s. v. Mīdeas), and is mentioned by Apollodoros (i. 4. § 4) in connection with this hero. It was said to have derived its name from the wife of Electryon, and was celebrated as the residence of Electryon and the birthplace of his daughter Alcma- na. (Paus. ii. 25. § 9; Schol. ad Pind. Alc. vii. 49.)

But it is mentioned in the earliest division of the country, along with the Heraeum and Tiryns, as belonging to Preussas. (Paus. ii. 16. § 2.) It was the residence of Hippodameia in her banishment. (Paus. vi. 20. § 7.) It was destroyed by Argos, probably at the same time as Tiryns, soon after the Persian war. (Paus. viii. 37. § 1; Strab. viii. p. 373.)

Strabo describes Midea as near Tiryns; and from its mention with Panasias, in connection with the Heraeum and Tiryns, it must be placed on the eastern edge of the Argián plain; but the only clue to its exact position is the statement of Panasias, who says that, returning from Tiryns into the road leading from Argos to Epi- danos, "you will reach Midea on the left." (ii. 25. § 9.)

Two different sites have been assigned to Midea. The French Commission place it at the Hellenic remains at Demetr, 5 geographical miles direct E. by N. from the citadel of Argos, as this place lies to the left of the road from Argos to Epidanos. But Leake objects, that the distance of Demetr from this road—more than 3 geographical miles—is greater than is implied by the words of Panasias. He therefore places Midea at the Hellenic remains near Kataien, 2 geographical miles due E. of Tiryns. The objection to the latter site is that it lies to the right of the road from Argos to Epidanos, and is separated by a deep ravine. The ruins at Demetr stand upon a hill almost inaccessible on three sides, enclosed by four different walls, one above another. In one of them is a gateway formed of three pieces of stone, resembling the smaller gateway of the citadel of Mycenaean. The ruins descend from the summit to a fountain, which springs out of a grotto near a chapel of the Panagia. The surrounding meadows afford good pasture for horses, and thus illustrate the epithet of Statius (Theb. iv. 44).
354

MIDIANITAE.

"aptor armentis Midae," and the selection of this place as the residence of the horse-loving Hippodameia in her banishment. (Bophlay, Récherches, cl. p. 38; Leake, Peloponnesian, p. 268; Curtius, Peloponnesian, vol. ii. p. 335.)

2. A city of Berosus. [Keradiez.] MIDIANITAE (Μαχαιρίται), the descendants of Midian, one of the sons of Abraham by Keturah, whom the patriarch is said to have sent away during his lifetime "eastward, unto the east country" (Gen. xxv. 2, 6), and whom we subsequently find reckoned among the "children of the east." (Judg. vi. 5.) In the third generation after Abraham they were a distinct people, trading between Gilead and Egypt; but are associated with, or confounded with, another Arab family, the Ishmaelites. (Gen. xxxviii. 25, 28, 36.)

The Midianites were probably a Bedaw tribe, and their situation may be pretty accurately determined, by the following notices, to the territory afterwards occupied by the Arabians, to the south and east of Palestine. Moses fed the sheep of Jethro, a priest of Midian, in the peninsula of Mount Sinai, and about Mount Horeb (Exod. iii. 1); subsequently Jethro came to his son-in-law from the land of Midian, while Israel was encamped in the vicinity of Horeb (Exvii. 2, 6); and Moses was glad to avail himself of his local knowledge while traversing the desert from Mount Sinai to the peninsula. (Num. x. 29-32.) The close alliance between the Midianites and the Moabites, to oppose the progress of Israel, indicates the proximity of the two peoples; and the hostility of the former proves that the alliance of Moses with one of their family did not conciliate the national feeling. (Num. xxxiv. 4, 7, xxxv. 1-3.)

The Midianites continued the bitter enemies of the Israelites throughout the period of the Judges, when, in concert with the Amalekites and the children of the east, they invaded simultaneously, and in countless numbers, the southern frontier towards Gaza and the trans-Jordanic tribes in Gilead and Bashan (Judg. vii. viii.), from whence their attacks were carried to the west. xxxiii. 20, the north as far as the confines of Naphthali and Asher. After their signal defeat by Gideon, they disappear from the records of history, but their slaughter became proverbial. (Psalm lxxxii. 9; Isaiah, ix. 4, 26.)

The country of the Midianites, however, had still a traditionary collose and subsequent notices, consistently with the foregoing, place them between Edom and Paran, which border on Egypt (1 Kings, xi. 17, 18), in the country afterwards comprehended under the name of Idumaea, and still later assigned to the Saraceni. Indeed Josephus (Ant. iv. 7. § 1) asserts that Petra, the capital of Arabia (i.e. Idumaea), was called by the natives Arabam (I'ôrubam), from the Midianitic king Rekem, one of the five slain by Moses. (Num. xxxvi. 8.) Eusebius and St. Jerome mention a city Madian, so named after one of the sons of Abraham by Keturah, situated beyond Arabia (i.e. Idumaea) to the south, in the desert of the Saracens, by the Red Sea, from which the district was called; and another close to the name of the Amron and Aseropolis, the ruins of which only exist in their days. (Onomast. e. v.; comp. Hieron. Comm. ad Jos. ix. and Ezech. xxv.)

The situation of these two cities would define the limits of the territory of the Midianites in their most palmy days. The former of these two cities is doubtless that mentioned by Josephus (Ant. ii. 11. § 1) under the name of Madiene (Melêbôr), situated at the Red Sea, and is properly identified by Rendel as the modern Mîdina (the Median of Amudefa), identical with the Midiana of Ptolemy. (Rendel, Palestine, pp. 98-100.) It is situated about half-way down the eastern coast of the Eilatik gulf. (Forster, Geog. of Arabia, vol. ii. p. 116; and see the references in his index under Midian.)

MIEZA (Mîêza; Elîk. Mîêçûr, Mîêserî), a city of Berosus, the position of which is most difficult to ascertain. Stephanus of Byzantium (s. v.), on the authority of Theagenes, assigns to an eponymous founder, Mieza, a sister of Beroea, and grand-daughter of Macedon: this legend implies that it was an important city. From the name it would seem most natural to look for it in the neighbourhood of Beroea, which agrees with Ptolemy (iii. 13. § 59), who classifies it among the cities of Emathia. Stephanus, on the other hand, still deriving his information apparently from Theagenes, alludes to it as a τῶν Χρυσών, and adds that it was sometimes called Strymonium. Alexander the Great established an Aristotelian school at Mieza (Plut. Alex. M. 7); and it was famed for a stalactite cavern. (Plin. xxxii. 2 a. 30; Leake, North. Greece, vol. iv. p. 583.)

MIGDOL, a Hebrew word signifying "a tower," and used as a complement of several proper names of places in Holy Scripture.

1. MIGDOL-EDER, translated in Gen. xxxiv. 21 (v. 16 in LXX.), τῶν τίφρους Γαβρίλ, Ath. Ver. "the tower of Eder," and in Micah, iv. 8, τίφρους δεξαμενοῦ, Vulg. "Tower of the Deanery," (marg. "Edar.") From the first cited passage, it would appear to have been near Bethlehem; and St. Jerome mentions a shepherd's tower a mile from Bethlehem, so called, as he suggests, in prophetic anticipation of the angelic announcement of the Nativity. (Onomast. s. v.; Beland, Palestine, s. v. p. 585.)

2. MIGDOL-ETO, a town in the tribe of Naphthali (Gen. xlvii. 19), and one of the cities of the Levites (Num. xxxv. 2). The two names together, read Ἐγραφαῖα for "Migdal-el, Horem." Eusebius and St. Jerome mention it as a large village named Magdiel, i. M. P. (St. Jerome writes v. M. P.) from Doras on the road to Polemais, probably identical with the modern El-Megdel, in the plain of Esdrasia, a little to the SW. of Shejfa' 'Amur, which is, however, more remote than even Esbusitic states from Dora, i. e. the modern Tamara. Neither could this have any connection with the Migdal-el of Naphthali, as Beland, in agreement with his two authors, seems to imagine, seeing it was situated in the tribe of Asher or Issachar. (Beland, Palestine, p. 986.) The Magdalæ of Galliæ (now El-Megdel) is much more probably the Migdel-el of Naphthali. (Magdala.)

3. MIGDAL-AD (Μηγισταγγύδ, LXX.), a city of the tribe of Judah. (Jos. xv. 37.)

4. MIGDOL-SHUM, corrupted to Megdalah Zerém in Eusebius (Onomast. s. v. Senuma), which, however, St. Jerome's translation enables us to correct to Megdalah Zerém, "quod interpretatur terrae Senuma." Hence the corruption of the Greek connected in the Latin; the former having Μηγισταγγύδ τῆς Κοινᾶς, the latter, correctly, "terræ Senumae." A village of this name existed in their days 7 miles north of Jericho. (G. W.)

MIGONIUM. [Gethsam.]
MIGRON.

MIGRON, a town in the tribe of Benjamin, mentioned in 1 Samuel, xvi. 2 (where the LXX. reads Μηγερσία) as in the extreme border of Gibeah, celebrated for its pomegranate tree; and connected with Aiath (probably Aí) in Isaiah, x. 28 (where the LXX. reads Μηγερωθύ). Its site has not been recovered in modern times. Dr. Robinson remarks, "Migron must have been situated between Deir Abas and Michmash;" and so the line of the ancient march in Isaiah would seem to require. But the passage in Samuel implies that it was S. of Michmash, which was then occupied by the Philistine garrison, watched by the Israelites in Gibeah, which lay to the S. of "the passage of Michmash," and with which Migron is connected. (Robinson, Bibl. Res. vol. ii. p. 149.) [G. W.]

MILETUS POLIS (Μηλητόπολις), a town in the north of Asia, at the confluence of the rivers Maeceutas and Rhynacmus, and on the west of the lake which derives its name from it. (Strab. xii. p. 575, xiv. p. 681; Steph. B. s. e.; Plin. v. 32, 40.) Some modern geographers, as D'Anville and Manter, have identified Miletus polis with the modern Beli Ksar or Balikesir, but this place is situated too far north and too far to the east of the lake, and identifies it with Miletos, which others regard as the site of the ancient Poenaemum. The most probable view is, that the site of Miletus is marked by the modern Moaliq or Muhalitche, or by the place Homalis, near which many remains of ancient town are found. (Hamilton, Researches, &c., vol. i. p. 1, &c.) [L. S.]

MILETOLITIS LACUS (Μηλετολίτων λίμνη), a lake in the north-west of Asia, deriving its name from the town of Miletus, near its western shore. (Strab. xii. pp. 575, 576.) According to Pliny (v. 40) the lake also bore the name Artynia, and probably confounding the river Tardeus with the Rhynacmus, he fancifully describes the latter river as having its origin in the lake, whereas, in fact, the Rhynacmus enters the lake in the south, and issues from it in the north. It now bears the name of the lake of Mancia (Hamilton, Researches, &c., vol. ii. p. 105, &c.) [L. S.]

MILETOS (Μηλετός; Elc. Μῆλῦς, Milesia), once the most flourishing city of Ionia, was situated on a narrow isthmus, to which it was extended, in the south-west of the Latiumic Sinus, by Mount Grion. The city stood opposite the mouth of the Meander, from which its distance amounted to 80 stadia.

At the time when the Ionian colonies were planted on the coast of Asia Minor, Miletus already existed as a town, and was inhabited, according to Herodotus (i. 146), by Carians, while Ecylus (ap. Strab. xiv. p. 634) related that the original inhabitants had been Leleges, and that afterwards Sarpidon introduced Cretan settlers. The testimony of Herodotus is born out by the Homeric poems, in which (I. ii. 867) Miletus is spoken of as a place of the Carians, and that the place was successively in the hands of different tribes, is intimated also by the fact mentioned by Pliny (v. 30), that the earlier names of Miletus were Leleges, Pitayas, and Anactoria. (Comp. Paus. viii. 2. § 3; Steph. B. s. e.) On the arrival of the Ionians, Naxos, their leader, with a band of his followers, took forcible possession of the town, massacred all the men, and took the women for their wives—an event to which certain social customs, regulating the intercourse between the sexes, were traced by subsequent generations.

It appears, however, that Naxos did not occupy the ancient town itself, but built a new one on a site somewhat nearer the sea. (Strab. i. c.) Temples, fortifications, and other remains, attributed to the ancient Leleges, were shown at Miletus as late as the time of Strabo (xiv. p. 611; comp. Herod. ix. 97). As in most other colonies the Ionians had amalgamated with the ancient inhabitants of the country, the Milesians were not to be the purest representatives of the Ionians in Asia. Owing to their excellent situation, and the convenience of four harbours, one of which was capacious enough to contain a fleet, Miletus soon rose to a great preponderance among the Ionian cities. It became the most powerful maritime and commercial place; its ships sailed to every part of the Mediterranean, and even into the Atlantic; but the Milesians turned their attention principally to the Euxine, on the coast of Thrace, and as well elsewhere, they founded upwards of 75 colonies. (Plin. v. 31; Senec. Cons. ad Hel. 6; Strab. xiv. p. 635; Athen. xii. p. 523.) The most remarkable of these colonies were Abydos, Lampsaecus, and Parium, on the Halicarnassus; Proconnesus and Cynus were two others which were founded by Sines and Amias on the Euxine; while others were founded in Thrace, the Crimea, and on the Bosporus. The colonists during which Miletus acquired this extraordinary power and prosperity, was that between its occupation by the Ionians and its conquest by the Persians, a.c. 494.

The history of Miletus, especially the earlier portion of it, is very obscure. It appears to have been established there at an early time, at a period of the extravagance of this tyranny, we are told, the city was split into two factions, one of which seems to have been an oligarchical and the other a democratic party. (Plut. Quaest. Gr. 32.) The former gained the ascendant, but was obliged to take extraordinary precautions to preserve it. On another occasion we hear of a struggle between two factions of citizens and the commonalty, accompanied with horrible excesses of cruelty on both sides. (Athen. xii. p. 524.) Herodotus (v. 28) also speaks of a civil war at Miletus, which lasted for two generations, and reduced the people to great distress. It was at length terminated by the mediation of the Persians, who conferred on Miletus certain government to those landowners who had shown the greatest moderation, or had kept aloof from the contest of the parties. All these convulsions took place within the period in which Miletus rose to the summit of her greatness as a maritime state. When the kingdom of Lydia began its career of conquest, its rulers were naturally attracted by the wealth and prosperity of Miletus. The first attempt to conquer it was made by Arydas, and then by Sadyatta, who conquered the Milesians in two engagements. After the death of Sadyatta, the war was continued by Alyatta, who, however, concluded a peace, because he was taken ill in consequence, it was believed, of his troops having burnt a temple of Athena in the territory of Miletus (v. 91). At this time the city was governed by the tyrant Thrasybulus, a friend of Periander of Corinth (Herod. v. 92), and a crafty politician. Subsequently Miletus seems to have concluded a treaty with Croesus, whose sovereignty was recognised, and to whom tribute was paid.

After the conquest of Lydia by the Persians, Miletus entered into a similar relation to Cyrus.
as that in which it had stood to Croesus, and was thereby saved from the calamities inflicted upon other Ionian cities. (Herod. i. 141, &c.) In the reign of Darius, the Ionians allowed themselves to be prevailed upon by Histiaea, and his unscrupulous kinman and successor openly to revolt against Persia, b. c. 500. Miletus having, in the person of its tyrant, headed the expedition, had to pay a severe penalty for its rashness. After repeated defeats in the field, the city was besieged by land and by sea, and finally taken by storm b. c. 494. The city was massacred, its inhabitants, and the survivors were transplanted, by order of Darius, to a place called Ampe, near the mouth of the Tigris. The town itself was given up to the Carians. (Herod. vi. 6, &c.; Strab. xiv. p. 635.)

The battle of Mycale, in b. c. 479, restored the freedom of Miletus, which soon after joined the Athenian confederacy. But the days of its greatness and glory were gone (Thuc. i. 15, 115, &c.); its ancient spirit of liberty, however, was not yet extinct, for, towards the end of the Peloponnesian War, Miletus threw off the yoke imposed upon her by Athens. In a battle fought under the very walls of their city, the Milesians defeated their opponents and Phrygians; the Athenian admiral, abandoned the enterprise. (Thuc. viii. 25, &c.) Not long after this, the Milesians demolished a fort which the Persian Tissaphernes was erecting in their territory, for the purpose of bringing them to submission. (Thuc. viii. 85.) In b. c. 334, when Alexander, on his Eastern expedition, appeared before Miletus, the inhabitants, encouraged by the presence of the Athenian army and fleet stationed at Mycale, refused to submit to him. Upon this, Alexander immediately commenced a vigorous attack upon the walls, and finally took the city by assault. A part of it was destroyed on that occasion; but Alexander pardoned the surviving inhabitants, and granted them their liberty. (Arrian, Anab. i. 18, &c.; Strab. l.c.) After this time Miletus continued, indeed, to flourish as a commercial place, but was only a second-rate town in the war between the Romans and Antiochus. Miletus sided with the former. (Liv. xxvii. 16, xliii. 6.) The city continued to enjoy some degree of prosperity at the time when Strabo wrote, and even as late as the time of Pliny and Pausanias. (Comp. Tac. Ann. iv. 65, 55.) From the Acts (xx. 17), it appears that St. Paul stayed a few days there, on his return from Macedonia and Troas. In the Christian times, Ephesus was the seat of a bishop, who occupied the first rank among the bishops of Caria; and in this condition the town remained for several centuries (Hieroc. p. 657; Mich. Duc. p. 14), until it was destroyed by the Turks and other barbarians.

Miletus, in its best days, consisted of an inner and an outer city, each of which had its own fortifications (Arrian l. c.); while its harbours were protected by the group of the Tsigasesaian islands in front of which Lade was the largest. Great and beautiful as the city may have been, we have now no means of forming an idea of its topography, since its site and its whole territory have been changed by the deposits of the Maeander into a pestilential swamp, covering the remains of the ancient city with water and mud. Chandler, and other travellers not being aware of this change, mistook the ruins of Myus for those of Miletus, and describe them as such. (Leake, Asia Minor, p. 339.)

MILETUS.

Great as Miletus was as a commercial city, it is no less great in the history of Greek literature, being the birthplace of the philosophers Thales, Anaximander, and Anaximenes, and of the historians Cadmus and Hecataeus.

The Milesians, like the rest of the Ionians, were notorious for their voluptuousness and effeminacy, though, at one time, they must have been brave and warlike. Their manufactories of couches and other furniture were very celebrated, and their woolen cloths and carpets were particularly esteemed. (Athen. i. p. 28, &c.; Paus. viii. 553, xvi. 491; Virg. Georg. iii. 306, iv. 335; comp. Rambach, De Milet et ses colonies. Halse, 1790, 4°.) Schroeder, Comment. de Rebus Miletiorum, part. i. Stralsund, 1817, 4°; Soldan, Rerum Miletianarum Comment. i. Darmstadt, 1829, 4°.)

COIN OF MILETUS.

MILETUS, a town of Myus, in the territory of Scepsi, on the river Euenus, which was destroyed as early as the time of Philya (v. 52). Another town of the same name in Paphlagonia, on the road between Amasia and Sinope, is mentioned only in the Peuting. Table. (L. S.)

MILEIUS (Mileuros), a town of Cret, mentioned in the Iliad, and in the Catalogue. (IL. ii. 647.) This town, which no longer existed in the time of Strabo, was looked upon by some writers as the mother-city of the Ionian colony of the same name. (Ephorus, op. Strab. xii. p. 573, xiv. p. 634; Schol. Apoll. Rhod. i. 186; Apollod. iii. 1, 2, 3; Plin. iv. 12.)

Mr. Paishie (Proc. vol. i. p. 269) explored the site of this Homeric city not far from Eupinocion, at which considerable remains of walls of polygonal masonry, both of the acropolis and city are still to be seen. (Höck, Kret. vol. i. pp. 15, 418.)

MILEUM, a Roman "colonia" ("Mileu colonia"
"Pest. Tab.") in Numidia, which the Antonine Itinerary places at 25 M. F. from Cirta. There can be little doubt that this place, which, from the circumstance of two councils having been held there, was of some importance (Morcelli, Africa Christiana, vol. i. p. 228), was the same as Mileum (Mepocrus al. Milas, Ptol. iv. 3. § 28).

MILICHIUS. (Achaja, p. 13. b.)

MILITURUM (It. Ant. p. 322; Melalica, It. Hieroe p. 602; Mutilon, Geogr. Rav. iv. 6), a town in the interior of Thrace, on the road from Maximilianopolis to Trajanopolis. (A. L.)

MILOSIA. (Milas.)

MILYAS (Milunds) is said to have been the ancient and original name of the country afterwards called Lycia (Herod. i. 173); but during the period of the Persian dominion, it was the name given to the whole mountainous country in the north of Lycia, the south of Phocis, and a portion of eastern Phrygia. (Strab. xii. p. 573.) The boundaries of this country, however, were never properly fixed, and the whole of it is sometimes described as a part of Lycia. (Arrian, Anab. i. 25.) After the accession of the dynasty of the Seleucidae in Syria, the name Milyas was limited to the south-western part of
MIMAS.

Psidia, bordering upon Lyca, that is, the territory extending from Ternessus northward to the foot of mount Cadmus. (Polyb. v. 72; Strab. xii. p. 570, xiii. p. 631, xiv. p. 666.) This district, the western part of which bore the name of Cabaliss, is after wards described, sometimes as a part of Lyca (Ptol. v. 3, § 7, 5, § 6), and sometimes under the names of Ephtha or Psidia. (Ptol. v. 2, § 12; Plin. v. 42.) After the conquest of Antiochus the Great, the Romans gave the county to Eumenes (Polyb. Exc. de Leg. 36), though Psidian princes still continue to be mentioned as its rulers.

The greater part of Milyas was rugged and mountainous, but it also contained a few fertile plains. (Strab. xii. p. 570.) The inhabitants were called Milyae. (Ctes. H. R. vii. 77; Strab. xiv. p. 566; Plin. v. 35, 42.) This name, which does not occur in the Homeric poems, probably belonged to the remnant of the ancient Solymi, the original inhabitants of Lyca, who had been driven into the mountainous and immigrating Cretians. The most important town in Milyas was Chyra, Omoanda, Balhora, and Buron, which formed the Cibyrian tetrapolis. Some authors also mention a town of Milyas (Polyb. v. 72; Ptol. v. 2, § 13; Steph. B. a. v. Milya), which must have been situated N of Ternessus in Psidia. (L. S.)

MIMASES (Mimaseis), a people in Byzacium (Ptol. v. 3, § 26), and also in Libya Incredibile (Ptol. iv. § 20). (E. B. J.)

MIMAS (Mimas), a mountain range in Ionia, traversing the peninsula of Erythrae from south to north. It still bears its ancient name, under which it is mentioned in the Odyssey (iii. 172). It is, properly speaking, only a branch of Mount Tmolus, and was celebrated in ancient times for its abundance of wood and game (Strabiv. p. 613, 645). The neck at the south-western extremity of the peninsula formed by Mount Mimas, a little to the north of Tees, is only about 7 Roman miles broad, and Alexander the Great intended to cut a canal through the isthmus, so as to connect the Cystrian and Hermesian bays; but it was one of the few undertakings in which he did not proceed. (Diod. v. 31; comp. vii. 4, § 1; Thucyd. v. 34; Or. Met. ii. 223; Amm. Mar. xxxi. 43; Callim. Hym. in Del. 157; Sil. Ital. ii. 494.)

Mount Mimas forms three promontories in the peninsula; in the south Coryceum (Korakos or Kikibo), in the west Argenum (Cape Blanco), and in the north Melasera (Kara Burna). Chandler (Travels, p. 318) describes the shores of Mount Mimas as covered with pines and shrubs, and garnished with flowers. He passed many small pleasant spots, well watered, and green with corn or with myrtles and shrubs. The summit of the mountain commands a magnificent view, extending over the bays of Smyrna, Chios, and Erythrae, the island of Naxos, and the coast of Caria on the east. The latter mountain says the most active in it; from which fact the frankincense came to be called Mimaeanum (xii. 80). And in speaking of the various qualities of myrrh, he mentions second, "Minaeana, in qua Atratimica", as most esteemed next to the Troglydotes (xii. 35).

With regard to the position of this important tribe in the modern map of Arabia, there is a wide difference of opinion among geographers. D'Anville finds their capital Carana in the modern Almakarama, which is, he says, a strong place. (Geograph. Anc. tom. ii. p. 221; comp. Forster, Arabia, vol. i. p. iii.) Gosselin contends that Almakarama is too far south for the Carana of the Minaeans, and is disposed to look to the capital of Carana and to the Bochard had suggested (Phalèg. lii. cap. 22, p. 121) which Edris places two days' journey from Meda, on the road to Sanaa. (Gosselin, Récurrences sur la Géographie des Anciens, tom. ii. p. 116.) Dean Vincent thus attempts to fix their position:—"The site of the Minaeans is not so easy to fix; but by a comparison of different accounts, they were S. of Hedjaz, N. of Hadramaut, and to the eastward of Sobh; and they were the carriers to all these provinces: their caravans passed in 70 days from Hadramaut to Aila, as we learn from Strabo; and Aila is but 10 miles (7) from Petra." He re-
marks, in direct opposition to Gosselin, that Bochart, in placing them at Carma-'l-Mansourli (i. Karwi-
Al-Moghaful), only 3 stations S. of Mecca, which he supposes to be the Carma or Carana of Pliny, brings them too far to the N., for that "Poleteny
places them much farther S." (Periplus, cap. xxvii. p. 363, and note 254.) But M. Jomard
holds that Wady-Mina, to the S. (? of Mecca, cor-
responding to those of Pliny, was about 2 miles distant from Abyd he computes as 101 degrees, or 294 hours
Mr. Forster assigns them a wide extent of territory in the modern provinces of Hejazas, Nejdj, and
Yemen, even to the borders of Hadramaunt. "The seat of this great commercial people, who divided
with the Garam, the commerce of the peninsula (transported by D'Anville to the heart of Mecca,
and by Vincent to the country of the Agey Arabs),
assuredly lay, if any reliance whatever may be placed in the position of Poleteny, in an inland
direction ESE. of Mecca. For the Minaeans, according
to him, lay immediately S. of the "regio interior myrrhiferas." In this regard, he speaks of the
merits of the Minaeans. The Minaeans being the same
with the Mazayen, this description would identify the "in-
terior myrrhiferas" with the fruitful mountain region
E. of Taif, and the Minaeans, consequently, with the
great Atybe tribe described by Burckhardt, as the
most numerous of the tribes of Hejazas, and inhab-
iting the habitable country stretching eastward, under the shadow of the Talaith, and the Taurab.
(Arabia, vol. ii. pp. 251, 252.) He adds, in a note, "its site (viz. that of the 'interior myrr-
hiferas'), with that of its inhabitants, the Minaeans,
may be determined independently, by the concurrent
testimonies of Poleteny and Pliny; the former places
his Charghata [Kabsa, Pal Xarif], and the latter his Carma, near the mountains of the Minaeans.
The town thus denominated is clearly that of Karkasat; but Karkasat is seated beneath, or rather
upon the mountains of Taif." Having thus
determined their northern border "S. of Karkasat,
or in the plains below the mountain chain running
E. from Taif," he thus defines their southern
limits. On the hypothesis so established, the Minaeans
were bounded by the Dourani, or the Mokertane. It is
impossible to mistake, in the Dourani, the inhab-
habitants of Zokran, or in the Mokertane, those of
Mekka, two adjoining provinces, lying S. of Mecca
and Taif, and crossing the entire space between the
sea and the uninhabited desert. This decisive ver-
ification shuts in the ancient Minaeans between the
mountains of Zokran and Mekka, and those N.
of Taif." (p. 255.) "The chief towns, the territory,
and the national habits of the Minaeans, as described
by the ancient geographers, bear a remarkable
resemblance to those of the Atybe Arabs, the present
inhabitants of this district; and the coinci-
dence of the palm-groves, and other fruit-trees of the
same species, and the wealth in date palm, noticed by
Pliny, with the excellent pasture-grounds, the great
bounty of camels and sheep, possessed by the
powerful tribe of Atyba, and with the plantations for
which Tarab is remarkable, that furnish all the
surrounding country with dates, environs, as
Burckhardt describes both it and Taif to be, 'with
palm-groves and gardens watered by numerous
rivers,' must be allowed to corroborate, in a very
remarkable manner, this verification of the ancient
seats of the Minaeans." (Forster, Arabia, vol. ii.
pp. 254—257.)

Mr. Forster further identifies the principal town of the Minaeans (the Cearma Regia of Poleteny)
with Karw-al-Mansourli, a considerable town still in
being between Taif and Mecca; and Carnon
with Karw-al-Moghaful, upon the mountains S.
of Taif, which former Bochart had already identified
with the Carma or Carana of Pliny. "The site of
their capital, within a few miles of Wady-Mina
(immediately to the E. of Mecca), suggests the not
improbable derivation of their name from that famous
seat of the idolatry of ancient Arabia." (p. 254, note;)
an hypothesis in which, it has been seen, Jomard coin-
cides. But, though fixing the original and principal
seat of the Minaeans in the S. of the Hejaz, he thinks
"it is still certain, from Pliny's statement, that this
people possessed a key to the commerce of the
incense country, by having obtained the command of
one of the two passes into the Djibal-al-Kamar" (which is in the heart of Hadramaunt); and he hence
inferences they possessed one of the two emporiums
of the trade in incense and myrrh, mentioned by
Pliny, on the southern coast; "an inference which at
first sight, seems to be confirmed by Poleteny's
statement of the Doore, and Koleth in the
Turabah." (Arabia, vol. ii. pp. 251, 252.) He adds,
in a note, "Its site (viz. that of the 'interior myrr-
riferas'), with that of its inhabitants, the Minaeans,
may be determined independently, by the concurrent
testimonies of Poleteny and Pliny; the former places
his Charghata [Kabsa, Pal Xarif], and the latter his Carma, near the mountains of the Minaeans.
The town thus denominated is clearly that of Karwa-
sat; but Karwa-sat is seated beneath, or rather
upon the mountains of Taif." Having thus
determined their northern border "S. of Karwa-
sat, or in the plains below the mountain chain running
E. from Taif," he thus defines their southern
limits. On the hypothesis so established, the Minaeans
were bounded by the Dourani, or the Mokertane. It is
impossible to mistake, in the Dourani, the inhab-
habitants of Zokran, or in the Mokertane, those of
Mekka, two adjoining provinces, lying S. of Mecca
and Taif, and crossing the entire space between the
sea and the uninhabited desert. This decisive ver-
ification shuts in the ancient Minaeans between the
mountains of Zokran and Mekka, and those N.
of Taif." (p. 255.) "The chief towns, the territory,
and the national habits of the Minaeans, as described
by the ancient geographers, bear a remarkable
resemblance to those of the Atybe Arabs, the present
inhabitants of this district; and the coinci-
dence of the palm-groves, and other fruit-trees of the
same species, and the wealth in date palm, noticed by
Pliny, with the excellent pasture-grounds, the great
bounty of camels and sheep, possessed by the
powerful tribe of Atybe, and with the plantations for
which Tarab is remarkable, that furnish all the
surrounding country with dates, environs, as
Burckhardt describes both it and Taif to be, 'with
palm-groves and gardens watered by numerous
rivers,' must be allowed to corroborate, in a very
remarkable manner, this verification of the ancient
seats of the Minaeans." (Forster, Arabia, vol. ii.
pp. 254—257.)
MINARICUM.

Hadrumetum. Their country must have comprehended the eastern half of the territory of Yafa, and the western half of the modern Hadrumetum. So that Shishon and Forsin, and the tomb of Hid, and the walls of Barbati (Polome's source of the Styx), which now form part of Hadrumetum, pertain to the Missae Flatter, Eridanos now called Biskra, i. pp. 278—284. [G. W.]

MINARICUM, in Belgica, is placed on a road from Castellum (Cassae) to Turnacum (Tournay); and a road also ran from Castellum through Minaricum to Nemetaicum (Arras). The distance is xi. (leagues) from Cassae, a well-known position, to Minaricum. D'Anville contends that the geographers are mistaken in placing Minaricum at Mersa-em, or, as the French call it, Merville, on the river Lys, instead of placing it at Esteva, also on the river Lys. The distances as usual cause a difficulty, and there is nothing else that decides the question. An old Roman road leads from Cassae to Esteva, and Roman coins have been found at Esteva. [G. L.]

MINAS SABBATTIA (Medicea Sabattia, Zosim., iii. 34. 10). It is mentioned in Belgica, and in Bede's time. In Bede's time it is named by Zosim. As he, in his day, occupied the site of the celebrated Parthian capital Ctesiphon. Abulfeda (p. 253) speaks of a place in the neighbourhood called Sabath. [V.]

MINATIICUM, in Belgica, is placed by the Antonine Itin. and the Table on a road from Bagonis (Boulogne) to Dinareum (Soissons). It is mentioned in the Itin. between Catnasium (Choiseux) and Auxemusa or Auxemasa. [Auxemusa.] Catnasium is omitted in the Table, and Minatiticum appears under the form Ninettacii, or Ninetacii, as D'Anville writes it. Here, as in some other cases, the name in the Table appears to be more exact, for Ninettacii is Nessio de Comite, which stands on an old Roman road that leads from Choiseux to Reims. [G. L.]

MINCUS (Mincus: Mincio), a considerable river of Gallia Cisalpina, and one of the most important of the northern tributaries of the Padus. (Plin. iii. 16. a. 20, 19. a. 23; Strab. iv. p. 209.) It has its sources in the Rhetian Alps, at the foot of the Monte Tornale, from which it flows to the lake Benacus, or Lago di Garda, which is formed by the accumulation of its waters. It issues again at Peschiera (the ancient Ardelia), and has from thence a course of about 40 miles, till it falls into the Fo near Genua, about 10 miles above Hostilia. In the upper part of its course it is a mere mountain torrent; but after it leaves the lake Benacus it is a deep and clear stream, which holds a slow and winding course through the low and marshy plains of this part of Cisalpine Gaul. It is characterized by Virgil, who dwelt on its banks. (Virg. Eccl. viii. 18; Georg. iii. 15, Aes. x. 206.) In the immediate neighborhood of Mantua the waters of the Mincus stagnate, so as to form shallow lakes of considerable extent, which surround city on three sides, the fourth also being protected by artificial inundations.

A battle was fought on the banks of the Mincus in b. c. 197, between the consuls Cornelian and the combined forces of the Inselves and Cenomanii, in which the latter were entirely defeated, and their leader, the Carthaginian Hamilcar, taken prisoner. (Liv. xxxii. 50.) At a much later period it was on the banks of the Mincus near its confluence with the Padus, at a place called by Jornandes Acroventum, Mamboleitua, that the celebrated interview took place between Pope Leo I. and Attila, which led the king of the Huns to withdraw his forces from Italy. (Jornand. Got. 42; F. Duc. Hist. Miscell. xv. p. 549.) [E. H. B.]

MINERVIAE FRONOMOTORIUM (Ae Aquae exaripe), Suburb. Ponta della Campomolla), a promontory on the coast of Campania, opposite to the island of Capraea. Forming the southern boundary of the celebrated Cistern of Messina, it is a bold and rocky headland, constituting the extremity of a mountain ridge, which branches off from the main mass of the Apennines near Nuceria, and forms a great mountain promontory, about 35 miles in length, which separates the Bay of Naples from that of Pasiteum or Salerno. The actual headland derives its name from a temple of Minerva, situated on its summit, which was said to have been founded by Ulysses (Strab. v. p. 247) : it was separated by a channel of only 3 miles in width from the island of Capreae (Capri). On the S. side of the promontory, but about 5 miles from the extreme headland, are some small rocky islets now called Le Galli, very bold and picturesque in appearance, which were selected by tradition as the sittings of the gods of the sea. The headlands are therefore named the Serrusiae Insulare (Xeopromou- tai orinpas), Plut. ili. 1. § 79; Strab. v. p. 247; Paus. Arist. Mirab. 110.) From the proximity of these, according to Strabo, the headland itself was sometimes called the Promontory of the Sirens (Thepromou- tai orinpe), but all other writers give it the more usual appellation of Promontorium Minerviae. Though Pliny adds that it had once been the abode of the Sirens, and there was an ancient temple on the side towards Surrentum in honour of those mythical beings, which had at one time been an object of great veneration to the surrounding population. (Strab. v. pp. 242, 247; Plin. iii. 5. a. 9; Paus. Arist. i. c. Ovid. Met. xvi. 708; Mal. ii. 4. § 9; Liv. xiii. 90.) Tacitus in one passage calls the headland Surrentinum Promontorium, from its proximity to the town of Surrentum, from which it was only 5 miles distant; and Statius also speaks of the temple of Minerva as situated "in vertice Surrentino." (Teo. Aes. iv. 67; Stat. Silv. v. 3. 168.)

The Promontory of Minerva is a point of considerable importance in the coast of Italy, and in the navigation of its harbours. It is still used as the station for the two squadrons which were appointed to guard the seas of pirates; the one protecting the coasts from thence to Massilia, the other those on the S. as far as the entrance of the Adriatic. (Liv. xi. 18.) In b. c. 86 a part of the fleet of Augustus, under Appius Claudius, on its voyage from Misenum to Sicily, encountered a tempest in passing this cape, from which it suffered heavy loss. (Appian, B. C. v. 98.) It is mentioned also by Lucullus as a point of importance in his voyage along the coast of Italy. (Lucil. Sat. iii. Fr. 10.) [E. H. B.]

MINDIO (Migno), a small river of Etruria, flowing into the Otryene sea, between Centumcellae (Cetona) and Graccianica (Rapallo), at 3 miles S. of the mouth of the Marta. It is a trifling stream, though noticed by Virgil, as well as by Rutilius in his voyage along this coast, but Maiet and the Geographer of Ranaeus are the only geographical writers who deem it worthy of mention. (Virg. Aes. i. 183; Serv. ad loc.; Rutili. Hist. ii. 179; Mal. ii. 4. § 9; Geor. iv. Erv. iv. 62.)

MINUS (Mius; Mino), a river of Spain, rising in the north of Galciaulia, in the Cantabrian mountains, and falling into the Ocean. (Strab. iii. p. 153.) Strabo erroneously says that it is the

to execute his task; and heroon the magistrates determined to send Marius away, and put him on board a ship which conveyed him to Africa. (Plut. Mor. 36–39; Appian, B. C. ii. 61, 62; Vell. Pat. ii. 19; Val. Max. i. 5. § 5; ii. 10, § 6; Liv. Epit. lxxxvii.; Juv. xiv. 276; Cic. pro Pansa 10, pro Sest. 22.)

We hear little more of Minturnae under the Empire, though it is repeatedly noticed incidentally by Cicero (ad Att. v. i. 3, vii. 13, xvi. 10). It still retained in his time the title of a colony; but received a material accession from a fresh body of colonists established there by Augustus; and again at a later period under Caligula. (Lab. Colum. p. 235; Hyg. de Lamiat. p. 179; Zumpt, de Coloni. p. 355.) We find it in consequence distinguished both by Pliny and Ptolemy by the title of a colony, as well as in inscriptions (Plin. iii. 5. s. 9; Ptol. iii. § 63; Orell. Inscr. 3762; Mommsen, I. R. N. 4058 —4061); and notwithstanding its unhealthy situation, which is alluded to by Ovid, who calls it "Minturnae graves" (Met. xv. 716), it appears to have been by the time of the Emperor Hadrian to have been a flourishing and important town. Its prosperity is attested by numerous inscriptions, as well as by the ruins still existing on the site. These comprise the extensive remains of an amphitheatre, of an aqueduct which served to bring water from the neighbouring hills, and the substructions of a temenos, as well as portions of the ancient walls and towers. (Romanelli, vol. iii. p. 430; Enestace, Classical Tour, vol. ii. p. 318.) All these remains are on the right bank of the Liris, but according to Pliny the city extended itself on both sides of the river; and it is certain that its territory comprised a considerable extent on both banks of the Liris. (Hygin. de Lem. p. 178.) The period of its destruction is unknown: we find it still mentioned in Procopius (B. G. iii. 26) as a city, and apparently a place of some strength; but at the commencement of the middle ages all trace of it is lost, and it was probably destroyed either by the Lombards or Saracens. The inhabitants seem to have withdrawn to the site of the modern Proletia, a village on a hill, the limits of which are marked by a ridge of inaccessible rocks. (Strabo. v. p. 253.) She appears to have been properly a local divinity; at least we do not meet with her worship under that name anywhere else in Italy; though many writers call her the mother of Latinus, and others, perhaps on that very account, identified her with Circe. (Virg. Aen. vii. 47; Serv.处注, ii. 19; Liv. xxiii. 29.) We may probably conclude that she was connected with the old Latin religion; and this will explain the veneration with which her grove and temple were regarded, not only by the inhabitants of Minturnae, but by the Romans themselves. Frequent allusions to them are found in the Latin poets, but always in close connection with Minturnae and the Liris. (Hor. Carm. iii. 17; 7; Luc. ii. 434; Martial, xiii. 68; Claudian, Proel. et Ol. Cons. 259.)

Strabo calls Minturnae about 80 stadia from Formiae, and the same distance from Sinuessa: the

Itineraries give the distance in each case as 9 miles. (Strab. v. p. 233; Itin. Ant. pp. 108, 121.) After crossing the Liris a branch road quitted the Appian Way on the left, and led by Sessa to Teanum, where it joined the Via Latina. [E. H. B.]

MINTA (Mintia), a city of Thessaly, said by Stephanus B. (s. v.) to have been formerly called Halmonia (Halmowia) and also disused by the name of Mineia from Minyas. It is mentioned by Pliny (iv. 5. s. 15) under the name of Almon, and in conjunction with Orchomenus Minyeus in Thessaly. (See Müller, Orchomenos und die Minger, p. 244, 2nd ed.)

MINYAE (Miniaus), an ancient race in Greece, said to have been descended from Minyas, the son of Orchomenus, who originally dwelt in Thessaly, and afterwards migrated into Boeotia, and founded Orchomenus. [For details see ORCHOMENUS.]

Most of the Argonautic heroes were Minyasians; and some of them having settled in the island of Lemnos, continued to be called Minyaes. These Lemnian Minyas were driven out of the island by the Tyrrhenian Pelasgians, and took refuge in Leucadia, from whence some of them migrated to the land now called others to Triphylia in Elis, where they founded the six Triphylan cities. (Herd. iv. 145—148.)

[Elia, p. 818.]

MINYEIUS (Minyeus), the ancient name of the river Anigrus in Elia. (Hom. Il. xi. 721.) [Anigrus.]

MISOBIGA (Misybige). 1. Also called MISOBORICA (Plin. iv. 12. s. 35; Cosma), a town of the Celts in Lusitania, upon the Ocean (Ptol. ii. s. § 6), identified by some with Odemira, by others with Sines. (Mentelle, Esp. Ann. p. 260; Ukert, ii. 1. p. 390.)

2. A Roman municipality, in the territory of the Turduli, in Hispania Baetica, on the road from Emerita to Caesaraugusta, now Cápula, N. of Fuente Ovejuna. (Ptol. ii. 4. § 13; Plin. iii. 1. s. 3; It. Anton. p. 444; Inser. Gruter, pp. 76, 257.)

3. A town of the Oretani, in Hispania Tarraconensis, mentioned only by Ptolemy (i. § 59).

MISENUM (Misenus), was the name of a remarkable promontory on the southern limit of the Roman city called the Crater, or Sinus Cumannus (the Bay of Naples). It is an almost isolated headland, forming a hill of considerable elevation, and of a somewhat pyramidal form, joined to the mainland opposite to Procida only by a narrow strip of low land, between which and the continuation of the coast at Baiae and Baise is a deep inlet forming the smaller port of Misenum (Strab. v. p. 243). A large stagnant pool or basin, still deeper in, now called the Mare Morto, communicated with this outer port by a very narrow entrance, which could be closed by a bridge or causeway. It is probable that the headland of Misenum itself at one time formed part of the encircling heights of the crater of a long extinct volcano, of which the Mare Morto occupies the centre, and the Misenus or Procida (as the headland opposite to the island of that name is now called) constituted the opposite margin. (Daubeney On Volcanoes, p. 302, 2nd edit.)
MISENUM.

The name of the promontory of Misenum was derived, according to a tradition very generally adopted by the Roman writers, from the trumpet of Aeneas, who was supposed to be buried there (Virg. Aen. vi. 163, 212—235; Propert. iv. 18. 3; Sil. Ital. iii. 155; Suid. Sic. ii. 1. 156; Mel. ii. 4. § 2; Colum. ii. 2. § 18). Another legend has represented the promontory of Misenum as one of the companions of Ulysses (Strab. v. p. 245). There is no trace of the existence of a town on the spot at an early period, though it is almost certain that its secure and land-locked port (already alluded to by Lycephon, Alex. 787) must have been turned to account by the Cumaeans during the period of their naval and commercial power. Before the close of the Roman Republic the actual promontory of Misenum, as well as the neighbouring shores of Baiae and Pozzuoli, became a favourite site for the villas of wealthy Romans; but it was not till the reign of Augustus that any considerable population was collected there. That emperor first introduced the custom of maintaining a fleet for the defence of the Tyrrenian or Lower Sea, of which Misenum was made the permanent station (Suet. Aug. 49; Tac. Ann. iv. 5), as it continued throughout the period of the Empire. Thus we find the "classis Misenensis" continually alluded to by Tacitus (Ann. xiv. 3, 62, xv. 51, Hist. ii. 106, iii. 56, &c.); and the elder Pliny was stationed at Misenum in command of the fleet, when the memorable eruption of Vesuvius broke out, in which he perished, a.D. 79, and of which his nephew has left us so interesting an account (Ep. vi. 16. 20). At a much later period we find the establishment of a fleet at Misenum, with a legion specially organised for its service, referred to as a permanent institution, both by Vegetius and Notitia. (Veget. v. 1. 2; Notit. Dign. ii. p. 118.) There can be no doubt that in consequence of this important establishment a considerable town grew up around the port of Misenum; and we learn from several inscriptions that it possessed municipal privileges, even before the title of a colony. (Orell. Inscr. 3772; Mommsen, i. F. R. N. 2575—2577.) But the "Misenienses," whose name frequently occurs in inscriptions written in general the names of the soldiers of the fleet (Militiae classis praetorii Misenatium, Mommsen, l.c. 2725, &c.), were the inhabitants of the town.

Before it became thus memorable as the station of the Roman fleet, Misenum was remarkable in history for the interview between Octavian and Antony and Sextus Pompeius, in which the two former were received by Sextus on board his ship, and a treaty was concluded for the division of the Roman Empire between the three contracting parties. It was on this occasion that his admiral Menas proposed to Pompey to cut the cables and carry the two triumvirs off to sea. (Plut. Anti. 32; Dion Cass. xivii. 36; Vell. Pat. ii. 77.) At a somewhat earlier period Cicero mentions having been visited by the Cilician pirates, who carried off from thence the daughters of M. Antonius, who had himself carried on the war against them. (Cic. pro Leg. Manil. 12.) We learn from Plutarch that C. Marius had a villa there, which he describes as more splendid and luxurious than was usual to the character of the man (Plut. Mari. 12); and it was near this spot that he referred to what became in the hands of L. Lucullus, who subsequently purchased it for a sum of 2,500,000 denarii, and adorned it with his usual magnificence. It subsequently passed into the hands of the emperor Tiberius, who appears to have not infrequently made it his residence; and who ultimately died there, on the 16th of March, a.d. 37. The villa itself is described as situated on the summit of the hill, commanding an extensive view over the sea; but it is evident, from the account of its vast sub-structures and subterranean galleries, &c., that it must have comprised within its circumference a large part of the promontory. (Plut. L. c., Lucull. 39; Seneca, Ep. 51; Tac. Ann. vi. 50; Suet. Tib. 72, 73; Dion Cass. iviii. 28; Phaedr. Fab. ii. 36.)

Besides this celebrated villa of Lucullus, we learn from Cicero that M. Antonius the orator had a villa at Misenum, and that the triumvir, his grandson, made it a frequent place of residence. (Cic. de Or. ii. 14, aed Alt. x. 8, xiv. 20, Phil. ii. 19.) At a much later period Misenum became the place of exile or confinement of the unhappy Marcus Augustus, the last emperor of the West, to whom the villa of Lucullus was assigned as a place of residence by Odoacer after his deposition, a.d. 476. (Jordand. Oct. 46; Marcellin. Chron. p. 44.) Horace notices the sea off Cape Misenum as celebrated for its scilini or sea-turtles. (Hor. Sat. ii. 4. 33.)

Some ruins, still extant near the summit of the hill, are in all probability those of the villa of Lucullus. Of the town of Misenum the remains are but inconsiderable; they are situated on the S. side of the Portus di Miseno, at a place now called Calamia; while those of the theatre are situated in a spot called il Forno, a little further to the W., just where the inner basin or Mare Morto opens into the outer port. The two were separated in ancient times by a bridge of three arches, which has recently been replaced by a closed causeway, the effect of which has been to cause both the inner basin and harbour to fill up with great rapidity, and the latter has in consequence become almost useless. In the sides of the hill at the head of the port, and on the N. of the Mare Morto are excavated numerous sepulchres, which, as we learn from the inscriptions discovered there, are those of officers and soldiers of the fleet stationed at Misenum. Many of these inscriptions are of considerable interest, and give the light in general the name of the soldiers of the fleet (Militiae classis praetorii Misenatium, Mommsen, l.c. 2725, &c.), not the inhabitants of the town.

MITHRIDATIUM.

The name of Mithridatium is only given in two inscriptions. One was given by a V. Scaevola (Philostr.iphy. 7, &c.), the other by a Manilius (Cic. de Div. ii. 27), who is the last authority for the name of the place. (Cic. de Div. ii. 27; Plin. Ant. v. 46; Suet. Cal. 60; Cels. x. 15; Mommsen, l.c. 2725, &c.) The name occurs in the inscriptions of the 3rd and 1st centuries B.C., and it is certain that the place was in existence long before the time of Augustus. It is also certain that Mithridatium is the name of the place which appears in the title of the emperor Claudius (Plin. iv. 5; Tac. Ann. xii. 15; Dion Cass. xiv. 8.) (E. B. J.)

MITHRIDATIUS (Μύθριδατιός, a fortress of the Trocmi, situated on the frontiers of Galatia and Pontus. After the subjugation of Pontus by the Romans, Pompey took Mithridatium from Pontus,
and gave it to a Galatian prince Bogediataros, or Bogretius, as he is called on coins. (Strab. xii. p. 557; Sestini, p. 192.)

MITYLENE. [MITYLENE.]

MITYS, a river of Pieria in Macedonia, which the Roman army, in the third campaign against Perses, under Q. Marcus, reached on the first day after their occupation of Dium. (Livy. xii. 7.) The Mitys was perhaps the river of Katerina. (Leake, North. Greece, vol. iii. p. 434.) [E. B. J.]

MIZAGUS. [MIZAGUS.]

MIZPAH v. MIZEPEH (Nasiq). This Hebrew appellative (נִמְנָפ), signifying "a commanding height," "a beacon," "a watchtower," and the like (הַמְנָפָה אָוֹן סְמָה; בַּהַמְנָפָה אָוֹן סְמָה; יִשָּׂרְאֵל כַּהַמָּן גְּלֶטְנָה; Joseph. Antiq. vi. 2. § 1), is used as the proper name of several sites or towns in Palestine, doublets from their positions.

1. The most important was Mizpeh (once written Mizepeh, Josh. xvii. 36), in the tribe of Benjamin, where a convocation of the tribes of Israel was held on important occasions, during the times of the Judges, and was one of the stations of Samuel's annual circuit. (Judges, xx. 1, 3, xxx. 1; 1 Sam. vii. 5—17, x. 17, &c.) It was strengthened by Ass, king of Judah, as a frontier gate against Israel, and he used for his works the materials brought from the neighbouring Ramah, which Bashaa, king of Israel, had built on his southern frontier, "that he might not suffer any to go out or come in to Ass, king of Judah." (1 Kings, xv. 17—22; comp. 2 Chron. xvi. 6.) After the destruction of Jerusalem by Nebuchadnezzar it became, for a short time, the seat of the government, and there it was that Gedaliah and his officers were barbarously murdered by Ishmael and his company. (2 Kings, xxv. 22—25; Jeremiah, xi. xii.) It is clear from this narrative that it was situated on the highroad between Samaria and Jerusalem (xii. 5, 6); and it is evident from the narrative in Judges that it could not be far distant from Gibeath of Benjamin, as the head-quarters of the Israelites were at Mizpeh while they were besieging Gibeath.

It was restored and inhabited soon after the captivity (Nehem. ii. 7, 15), and is mentioned in the book of Maccabees as situated over against Jerusaleem (Macc. 4. 31; 1 Macc. i. 16), and as having been formerly an oracle of the god, and there it was that Judas Maccabaeus and his brothers inaugurated their great work with fasting and prayer. (1 Macc. iii. 46.) It is frequently mentioned by Josephus in his narrative of the Scripture history, but his orthography is far from uniform. Macepaph (v. 2. § 1), Macepaph (vi. 4. § 2, 4, 5), Macepod (viii. 13. § 4). In the last cited passage he informs us that the Macepod was in the same place as Ramathon (or Ramah), which he places 40 stadia from Jerusalem (§ 3). Eusebius and St. Jerome most unaccountably confound this Mizpeh with the Macepod of Gilead, (Inf. No. 3). They place it near Kirjathjearim. (Onomast. s. v. Macepod.) Its site has not been satisfactorily identified. Dr. Robinson thinks that either Tell-el-Ful (Bean-hill), lying about an hour south of Er-Ram (Ramah) towards Jerusalem, or Nebi Samwil, somewhat further distant from Er-Ram, to the west of the former site, would correspond to the site of Mizpeh. He inclines strongly to the latter site (Oik. Rese. vol. ii. p. 144); which, however, seems to be too far removed from the highroad between Jerusalem and Samaria, on which Mizpeh was certainly situated. Possibly the modern village of Skophat, identical in meaning with Mizpeh, situated on that road, near Tell-el-Ful, may mark this ancient site; or another site, between this and Er-Ram, on the east of the road, still called 'Asm Nusef, may mark the spot. It is worthy of remark that the high ground to the north of Jerusalem is called by a name of kindred significance with Mizpeh, and doubtless derived its name Zebron, from that town. It is on this ridge that Skophat lies.

2. Mizpeh (LXX, Macepod) is mentioned among the cities of Judah (Josh. xvii. 38); and this must be either the one which Eusebius mentions as still existing under the same name, in the borders of Eleutheropolis to the north, or the other in the tribe of Judah, on the way to Asia. The former of these is probably Tell-es-Safiya, the Alba Specula of the middle ages; the latter may be Beil-Safiya, a little to the south of Jerusalem, between that city and Bethlehem.

3. Mizpeh, in Mount Gilead, probably identical with Ramath-Mizpeh in Gad (Josh. xiii. 26), derived its name from the incised name on the rock-carving in Naas, xxi. 44—55, and was apparently the site of the rough monument of unburnt stones called by Laban in Chaldee, "Yegar-sahadutha," and by Jacob in Hebrew, "Galeed," both signifying "the heap of witness." The site was called "Mizpeh;" for, he said, "The Lord watch between me and thee, and when we are absent one from the other." This is doubtless the Mizpeh of Joel, that of Gileadite, which seems to have had somewhat of a sacred character, and to have served for the national conventions of the trans-Jordanic tribes, as its name-sake in Benjamin did in Palestine Proper. (Judges, x. 17, xi. 34.) Eusebius notices it as a Levitical city in the tribe of Gad. (Onomast. s. v. Macepod.)

4. A fourth Mizpeh is in Damascus, 3 m. more to the north of Perasa, where we read of the "Hivite under Hermon, in the land of Mizpeh, and presently afterwards of "the valley of Mizpeh eastward" (ver. 8), which cannot be identical with the Gileadite Mizpeh, but must have been in the southern base of Mount Hermon.

5. Mizpeh of Moab is mentioned (in 1 Sam. xxi. 8) in a manner which seems to intimate that it was the capital of that country in the time of David, as it was certainly the residence of its king. (Euseb. Onomast. s. v. Macepod.)

[MNIZUS, or MINIZUS, a small town in Galatia, between Lagania and Ancyra, where the Emperor Anastasius must have resided for some time, as several of his constitutions are dated from that place, both in the Codex Theodosianus and the Codex Justinianianus. (Itin. Hieros. p. 675; It. Ant. p. 142; Notit. Episc., where it is called Mwataq; Hieroc. p. 697, where it bears the name Percympor; Tab. Pute. calls it Miszago; Cod. Theod. de his qui ad Eccles. i. 3; de Epist. i. 33; de Poen. i. 16.)

6. Moabus was the see of a bishop, as we know from several councils at which he signs as mentioned. Kiepert identifies the place with the modern Ajas.

7. MOAB (Maed), vallis, regio, campestria, &c [MOABITAE.] The notice of Eusebius may be here introduced (Onomast. s. v. Maed):—"A city of Arabia, now called Areopolis. The country is called Moab, but the city Rabath Moab." (Areopolis.)

[M. W.]

MOABITAE (Moesorba: the country Moebist-va), the people descended from Moab, the son of...
Lot, the fruit of his incestuous connection with his eldest daughter. (Gen. xix. 37.) Moses has preserved the very early history of their country in Deuteronomy (i. 9—11):—"The Lord said unto me, Distress not the Moabites, neither contend with them in battle, for I will not give thee of their land for a possession; because I have given Ar unto the children of Lot for a possession." The Emims dwelt there in times past, a people great, and many, and tall, as the Anakims. The Moabites, having dispossessed those gigantic aborigines, held possession of the country, which was bounded on the north by the river Arnon, which separated them from the Amorites. At an earlier period, indeed, they had extended their conquests far to the north of the Arnon, but had been forced to retire before the Amorites, to whom they had ceded their northern conquests, even before the children of Israel came into their coasts; and several fragments of the ancient war-songs relating to these times are preserved by Moses. (Num. xxii. 13—15, 26—30.) The boundary question was revived subsequently, in the days of Jephthah, when the Amorites demanded the restoration of the conquests that Israel had made between the Arnon and the Jabboth south and north, and to the Jordan westward, as of right belonging to them, or their title to it having been invalidated, and being invaded by 300 years' occupation by the Israelites. It appears from Jephthah's historical review of the facts, that the Israelites had neither invaded nor occupied any part of the territories of which Moab and Ammon were in actual possession at the period referred to; but only so much of their ancient possessions as Bishon king of the Amorites had already forced them to evacuate. (Judges, xi. 13—15, 18.) It is remarkable that the memorial of the occupation of the territory north of the Arnon by the Moabites has been preserved, through the Mosaic records, even to this day, in the name that is popularly assigned to that remarkable mountain district east of the Dead Seas, which forms so conspicuous and remarkable a feature in the landscape view from Jerusalem toward the east, as the "mountains of Moab," as in Deuteronomy that high table land is described as the "plains of Moab" (Deut. xxxii. 1, xxxii. 49); and Josephus occasionally uses the name with the same latitude, of the country north of the Arnon, describing the Moabites as still a mighty nation of coast Syria (Ant. i. 11. § 4); and reckoning among the Moabite cities occupied by the Jews under Alexander Jannaeus, Chebon (Heshbon), Medeba, Penlea, and others that lay considerably north of the Arnon (Ant. xiii. 15. § 4), although in other passages he makes that river divide the Moabites from the Amorites (Ant. iv. 5. § 1), and describes the country of Moab as the southern limit of Persea (Book Jud. iii. 5. § 5), consistently with which notices he compares the country of the Amorites to an island, bounded by the Arnon on the S., the Jabboth on the N., and the Jordan on the E. (Ant. iv. 5. § 2.) It is then justly remarked by Beland (Palestina, p. 102), that by "the plains of Moab," where the Israelites were encamped before they crossed the Jordan (Num. xxxii. 48, 49, 50), which is described as being against Jericho, and by the "land of Moab," in which mount Nebo is said to be situated (Deut. xxxii. 49, comp. xxxiv. 1. 5. 6. 8), it is not to be understood as though that district was actually in possession of the Moabites at that time; but is so called because they formerly held it under their dominion. (Numb. xxii. 26.) It may be added, that after it had been occupied by the tribes of Gad and Reuben, to whom Moses assigned it (Num. xxxii.1. 35—38), the Moabites again conquered it for a time, as it is clear that Egion must have subjugated that district east of the Jordan, before he could have possessed himself of Jericho, on the west of that river. (Judges, iii. 12—30.) Their long and undisturbed tenure of their own proper country is forcibly described by the prophet Jeremiah. "Moab hath been at ease from his youth, and he hath settled on his lees, and hath not moved from his place." He has also been brought into captivity; therefore his taste remained in him, and his scent is not changed (xlvi. 11); and the enumeration of its prosperous cities, in his denunciation, indicates the populousness and richness of the country, to which the Israelites resorted when suffering from famine in their own most fruitful districts (Jos. i. 1), and which supplied the market of Tyea with grain. (Ezech. xxvii. 17.) [MNMVT.] The country is described by Josephus as fertile, and capable of supporting a number of men on its produce. (Ant. iv. 5. § 1.) This account both of its populousness and fertility is remarkably confirmed by modern travellers, and the existing monuments of its numerous cities. Thus Irby and M'Kean describe it as "a level portion of country, deeply intersected by canals, with verdant groves and rich meadows," and "a country of downs, with verdure so close as to appear almost like turf, and with cornfields at intervals." They passed many ruined sites, the names of several of which they obtained; "in short," they add, "the whole of the fine plains in this quarter are covered with sites of towns, on every eminence or spot convenient for the construction of one; and an attempt to describe their present state can be little doubt that this country, now so deserted, once presented a continued picture of plenty and fertility" (Travels, p. 371, compare under June 5, p. 456); and it is to this quarter that the Arabs referred, when they reported to Volney "that there are to the SE. of the lake Asphalis, within three days' journey, plains under a gentle slope, covered with woods of the most various kinds, absolutely deserted; several have large edifices with columns." (ib. p. 510.) He indeed assigns the country to "the Nabathaens, the most potent of the Arabs and of the Idumaeans;" but the ruins are more probably to be referred to the earlier inhabitants of the country, who, we know, lived in settled habitations, while the Nabathaen were a Bedawi tribe, living for the most part in tents. In any case the present aspect of the country furnishes a striking commentary on Jeremiah xlviii., e. g. "Joy and gladness is taken from the plentiful field, and from the land of Moab; and I have caused wine to fail from the wine-presses; none shall tread with shouting; their shouting shall be no shouting." [G.W.W.]}

MODICIA, or MODICUS, a fort in the north western part of Cappadocia, which the Emperor Justinian, at the time when he divided the country into three provinces, raised to the rank of the capital of Cappadocia III. On that occasion the place was considerably enlarged, and its name was changed into Justinianopolis. (Procop. de Aed. v. 4.; Hieroc. p. 701, where it is miswritten Pvey-ironis, for Peyer-ironis; Const. Porphy. de Them. 1. 2; Steph. B. a. M. Malouarios; Const. Const. ii. p. 96.) It modern name is Kir Sheher. [L. S.] MODICIA (MOONITA), a city of Cisalpine Gaul, situated on the river Lambrus, about 12 miles N. of Milae, the name of which is not found during the period of the Roman Empire, and it was probably in
MODICUS LACUS

MOERIS LACUS (Μῶρης Λάκων, Ptol. vii. 1. § 83), a town mentioned by Ptolemy, on the western side of Hindostan. It is probably the present Moghull, at no great distance from Callianáy. [V.]

MODOMÁSTICE (Μοδώμαστις, Ptol. vi. 6. § 2), one of the four divisions into which Ptolemy divides the province of Carmania (now Kirman). [V.]

MODRA (Μοδρά), a small town, which, according to Strabo (xii. p. 543), was situated in Phrygia Epictetus, at the sources of the river Gallus; but as this river flows down from the northern slope of mount Olympus, which forms the boundary between Phrygia and Bithynia, Strabo must be mistaken, and Modra probably belonged to the south-west of Bithynia, and was situated at or near the modern Aineas Grole. (Paul. Lucas, Soc. Voy. i. 14.) As Strabo's expression is in Modrā, some have supposed that Modra was no town at all, but only a name of a district; but it is known from Constantine Porphyrogenitus (de Them. vi.) that the district about Modra was called Modrene. [I. S.]

MODUBAE (Plin. vi. 18. s. 22), one of several ancient Roman unknown tribes, which, according to Strabo, settled the Ganges, in that part of India which was anxiously called India extra Ganges. [V.]

MODURĀ (Μοδούρα, Ptol. vii. 1. § 89). There are two places of this name mentioned in the accounts of ancient India: one described by Ptolemy (l.c.) as Μοδουρας Πλησι, the Palace of King Pandion; and the other as Μοδουρας των Ιωνων, the Sacred Modura (vii. 1. § 50). The former of these towns was in the southern part of Hindostan, and is most probably the present ruined city, Madura; the second was in the land of the Caspeiraei in the NW. part of India, either on the frontier or in the Pasjáb. Its exact position cannot now be determined. [V.]

MODUTTI (Μοδοττιον, Plin. xi. 4. § 7), a port in the island of Taprobane or Ceylon, mentioned by Ptolemy. The strong resemblance of the name makes it extremely probable that it is the same with the present Mantottu, where there are still the remains of a great city, and where a great number of Roman coins of the times of the Antonines have been dug up. It appears to have been situated at the northern end of the island. The latter name was called Mōdottitō. [V.]

MOENUS (the Main), a navigable river of Germany, which has its sources in the Sudet Monte, near the town of Menogenza, and after flowing in a western direction through the country of the Hermunduri and the Agr Decemvirs, empties itself into the Rhine, a little above Mognusiaum (Plin. lin. 17; Mela, iii. 3. § 3; Amm. Marc. xvii. 1; Tac. Germ. 26; Eunem. Papeg. Constant. 13.) [I. S.]

MOERIS LACUS (Μῶρης Λάκων, Herod. ii. 13, 148, seq.; Dio. l. 52: Μῶρος Λάκων, Strab. xviii. p. 810; Ptol. iv. 5. §§ 30, 36; Moeris Lacus, Mela, 1. 9. § 5; Moeris, Plin. v. 9. s. 9), was the most extensive and remarkable of all the Egyptian lakes. It formed the western boundary of the province of Aribone (어라비카) in Middle Aegypt, and was connected with the Nile by the canal of Joseph (Bahr-Jusef). A portion of its ancient bed is represented by the modern Birket-el-Kerun. Of all the remarkable objects in a land so replete with wonders, natural and artificial, as Aegypt, the lake of Moeris was the most enigmatical to the ancients. Herodotus (ii. 149), who is followed by Pliny (v. 9. s. 9), regarded it as the work of man, and ascribes it to a...
king of the same name. This supposition is incredible, and runs counter both to local tradition and actual observation. "Nothing," says a modern traveller (Brown, *Travels in Egypt*, p. 169), "can present a more remarkable contrast to the ruined monuments of the Nilotic world than the desert near the mouth of the Nile." On the NE. and S. is a rocky ridge, in every appearance primeval; and Strabo (xvii. p. 112) observes upon the marine conformation of its shores and the billowy colour and motion of its waters. So far as it has been hitherto surveyed, indeed, Moeris is known to have been inclosed by elevations, and in early times the bed of the Nile was too low to admit of its waters flowing into the basin of the lake, even if there had been a natural communication between the river and Moeris. Strabo believed it to be altogether a natural reservoir, and that the canal which connected it with the Nile was alone the work of human art. His opinion is doubtless the correct one, but admits perhaps of some modification. The whole of the Arsinote nome was indebted to human enterprise for much of its extent and fertility. Geologically speaking, it was, in remote periods, a vast limestone valley, the reservoir of waters descending from the encompassing hills, and probably, if connected with the Nile at all, the communication was subterranean. As the sands and gravel of the desert gradually subsided, the summits and sides of the higher ground were cultivated. The richness of the soil—a deposit of clay and marl and lime, like that of the *Oases*—would induce its occupiers in every age to rescue the land from the lake, and to run dams and embankments into the water. In the dry season, therefore, Moeris would exhibit these junctions of a body of water intersected by peninsulas, and broken by islands, while, at the period of inundation, it would wear the aspect of a vast bay. Accordingly, the accounts of eye-witnesses, such as Strabo and Herodotus, would vary according to the season of the year in which they inspected it. Moreover, the climate of the Nilotic valley is such as to allow the *Oasis* to grow grapes, olives, oil-plants, and other vines. But the canal itself, the source of all this industry, was singularly fertile, and suited to various crops, corn, vegetables, and fruit. If then we distinguish, as Strabo did, the canal from the lake (Aful), the ancient narratives may be easily reconciled with one another and with modern surveys. Even the words of Herodotus (Skt. 46 *χρυσοφόρος* *δεσι καὶ βρόχες*) may apply to the canal, which was of considerable extent, beginning at Hermopolis (Ashmunen), and running 4 leagues W., and then turning from N. to S. for 3 leagues more, until it reaches the lake. Modern writers frequently reproach the ancients with assigning an incredible extent to the lake; and some of them surmise that Herodotus and Strabo do not speak of the same waters. But the moderns have mostly restricted themselves to the canal, and have either not explored Moeris itself, the NW shores of which are scarcely known, or have not made allowance for its diminution by the encroaching sands and the drifts of fallen embankments.

We infer, therefore, that the lake Moeris is a natural lake, about the size of that of Genera, and was originally a depression of the limestone plateau, which intersects in this latitude the valley of the Nile. It is certain that the surface of the waters did extend at least 30 miles long, and 7 broad. Its direction is from SW. to NE., with a considerable curve or elbow to the E. The present level of its surface is nearly the same with that of the Mediterranean, with which indeed, according to a tradition mentioned by Herodotus, it was connected by a subterranean canal. Erosion in its dimensions of these lakes, however, discharges any portion of its waters into the sea, it must have been in pre-historic times. The waters of Moeris are impregnated with the alkaline salts of the neighbouring desert, and with the depositions—muriate of lime—of the surrounding hills. But, although brackish, they are not so saline as to be noxious to fish or to the crocodile, which in ancient times were kept in preserves and tamed by the priests of the Arsinote nome. (Strab. xvii. p. 112; Aelian, *Hist. A. x. 24.4*) The fisheries of the lake, especially at the point where the sluices regulated the influx of the *Bahr-Jusef*, were very productive. The revenue derived from them was, in the Pharaonic era, applied to the purchase of provisions for the Persian kings they yielded, during the season of inundation, when the canal fed the lake, a talent of silver daily to the royal treasury (150l.) During the rest of the year, when the waters ebbed towards the Nile, the rent was 36 minae, or 601. daily. In modern times the right of fishing in the *Birket-i-Kerim* belongs to the lord of Injib, whom the Persian kings they yielded, during the season of inundation, when the canal fed the lake, a talent of silver daily to the royal treasury (150l.) During the rest of the year, when the waters ebbed towards the Nile, the rent was 36 minae, or 601. daily. In modern times the right of fishing in the *Birket-mi-Kerim*, which belongs to the lord of Injib, was inalienable for ever. (Labobe, *Rapport d'Egypte*, 1869, p. 67.) It is probable, indeed, that a copious infusion of Nile water is required to render that of Moeris palatable to man, or salutary for fish. To Thoutmosis III. the Egyptians were probably indebted for the canal which connected the lake of Moeris with the Nile. It may have been, in part, a natural channel, but its dykes and embankments were constructed and kept in repair by man. There is, indeed, some difficulty respecting the influx and reflux of the water, since the level of the *Bahr-Jusef* is much higher than that of the Arsinote nome and the lake; and Herodotus seems to say (v. 152) that the waters returned by the same channel by which they entered. But no mention is made, however, of sluices at their point of juncture, it is possible that a series of floodgates retained or impelled the water. The main dyke ran between the Memphite and Arsinote nomes. Belzoni found remains of ancient cities on the western side of Moeris, and is disposed to place the Great Labyrinth in that quarter. But if we may trust the accounts of the best ancient writers, it certainly was not on that side of the lake. Its shores and islands were, however, covered with buildings. Of the ruins of Arsinote mention has been made already. But Herodotus tells an extraordinary story of pyramids seated in the lake itself (i.e. mounds above the middle of it, and more than 300 feet above the water). The parts that is under the water is just the same height. On the top of each is a colossal stone seated in a chair." This account is singular, as implying that pyramidal buildings were sometimes employed as the bases of statues. But it is impossible to reconcile this statement with the ascertained depth of the *Birket-i-Kerim*, which on an average does
MOESIA.

not exceed 12 feet, and even where it is deepest is only 28. We may indeed admit, that, so long as the fisheries were a royal monopoly, a larger body of water was admitted from the Nile, and the ordinary depth of the lake may thus have been greater than at present. It is also possible that much of the surrounding country was then covered with water, and may, formerly, during the inundation, have been entirely submerged, and therefore that the pyramids which Herodotus saw, the sides of which even now bear traces of submersion (VYSE, On the Pyramids, vol. iii. p. 84), may have been the truncated pyramids of Bidaena, now beyond the reach of the Dirkest-Kosia, but within the range of the ancient Moesia. Herodotus, if, as is probable, he visited the Amnionite nome in the wet season, may have been struck with the elevation of these monuments above the lake, and exaggerated their proportions as well above as below its surface. Pococke (Travels, vol. i. p. 63) tells us that he saw on its western extremity, 'a head of land setting out into the lake, in a semicircular figure, with white cliffs and a height above,' which he thought might be the lower part of the two pyramids described by Herodotus. And Pére Lucas (Voyages en Egypte, vol. ii. p. 48) observed an island in the middle of the lake, a good league in circumference. He was assured by his guides that it contained the ruins of several temples and tombs, two of which were loftier and broader than the others.

The region of Moesia awaits more accurate survey. The best accounts of it, as examined by modern travellers, will be found in Belzoni, Travels; Champlinon, l'Egypte, vol. i. p. 329; Jomard, Description de l'Egypte, vol. i. p. 79; Kitter, Erdkunde, vol. i. p. 803. [W. B. D.]

For a Roman province in this region, was bounded on the S. by M. Haemus, which separated it from Thrace, and M. Orbulus and Scordus, which separated it from Macedonia, on the W. by M. Scordus and the rivers Drinus and Savus, which separated it from Illyricum and Pannonia, on the N. by the Danube, which separated it from Dacia, and on the E. by the Pontus Euxinus, thus corresponding to the borders of the Roman Empire.

The Greeks called it Myisia (Moesia), and the inhabitants Myssians (Moesii), and sometimes European Moesia (Moesia ἐπὶ Ἑλλάδαν, Dion Cass. xlix. 36; Appian, Ill. 6), to distinguish it from Myisia in Asia.

The original inhabitants of Moesia were, according to Strabo, a tribe of Thracians, and were the ancestors of the Myssians of Asia (vii. p. 298). Of the early history of the country, little or nothing is known. In b. C. 277, a large body of Gaulish invaders entered Moesia, after the defeat and death of their leader Brennus, and settled there under the name of the Scordisci. The Romans first entered Moesia in b. C. 75, when C. Scipio Curio, proc. consul of Macedonia, penetrated as far as the Danube, and gained a victory over the Moessians. (S. Raf. Brev. 7; Jornand. de Regm. Succ. 50; Estrop. vi. 2.) But the permanent subjugation of Moesia was probably effected by M. Licinius Crassus, the grandson of the triumvir, who was proc. consul of Macedonia in b. C. 29. (Liv. Ep. 154, 155; Dion Cass. 64; Flor. iv. 125.) This is also be inferred from the statement of Dion Cassius (III. 7), who represents Augustus two years afterwards (b. C. 27) speaking of the subjugation of Gallia, Mysea, and Aegypt. Further, in a. D. 6, Dion Cassius mentions the governor of Mysea (v. 29), and in a. D. 14 Tacitus speaks of the legatus Moesiae (Ann. i. 79); so that there can be no doubt that it was reduced into the form of a province in the reign of Augustus, and that the statement of Appian is incorrect, that it did not become a Roman province till the reign of Tiberius. (VIII. 90.) In the reign of Tiberius, Moesia was laid waste by the Dacians and Sarmatians, being then without a garrison, contrary to the usual Roman practice, for a legion was generally stationed there. (Suet. Tiber. 41, Vesp. 6; Tacit. Ann. xvi. 6.) As a frontier province of the empire, it was strengthened by a line of stations and forresses along the south bank of the Danube. A Roman wall was built from Axioopolis to Tseli, in defense against the Sarmatians and Scythians, who inhabited the delta of the Danube. Moesia was originally only one province, but was divided into two provinces, called Moesia Superior and Inferior, probably at the commencement of Trajan's reign. (Marquardt, in Becker's Romische Alterth. vol. iii. p. 106.) Each province was governed by a provincial governor and a consular legatus, and was divided into smaller districts (regiones et vicis). Moesia Superior was the western, and Moesia Inferior the eastern half of the country; they were separated from each other by the river Cebra or Cibra, a tributary of the Danube. (Ptol. iii. 9, 10.) They contained several Roman colonies, of which two, Batariaria and Oescus, were made colonies by Trajan and Vespasianus by Gordian III. (Marquardt, L. c.) The conquest of Dacia, by Trajan, removed the frontiers of the empire farther north, beyond the Danube. The emperor Hadrian visited Moesia, as we are informed by his medals, in his general progress through the empire, and games in his honor were celebrated at Pincum. In a. D. 250 the Goths invaded Moesia. Decius, who was then emperor, marched against them, but was defeated and killed in a battle with them in 251. What the value of Decius could not effect, his successor, Trebonianus Gallus, obtained by bribery; and the Goths withdrew to the Dniester. When Aurelius gave up Dacia to the Goths, and withdrew his troops and part of the inhabitants to the lower Danube, set up a settlement in the heart of Moesia, which was named from him Dacia Aureliana. [Dacia, Vol. i. p. 745.] In 385 the Ostrogoths, being hard pressed by the Huns, requested permission of the Romans to pass the Danube, and settle in Moesia. The request was acceded to by Valens, who was then emperor, and a large number took advantage of the privilege. They soon, however, quarrelled with the Roman authorities, and killed Valens, who marched to oppose them. The Goths, who settled in Moesia, are sometimes called Moesio-Goths, and it was for their use that Ulpianus translated the Scriptures into Gothic about the middle of the fourth century. In the seventh century the Slavonians entered Moesia, and the Bulgarians the same district, and founded the kingdoms of Bulgaria and Servia.

Moesia was occupied by various populations; the following are enumerated by Ptolomy and Pliny (Ptol. iii. 9; Plin. iii. 26): the Dardani, Celgeri, Triballi, Timarchi, Moesi, Thraces, Scythae, Triceressi, Fenicii, Trogodytes, and Pusini, to which may be added the Scordisci. (Livy xlii. 57.) The relative situations of these tribes were as follows: the Dardani, said to be a colony from Dardania in Asia, dwelt on the borders of Macedonia. The Triballi dwelt near the river Cibra; the
MOGETIANA.

Timachi by the river Timachus. The Triconi, who derived their name from Triconum, were on the confines of Dalmatia. The Pecnici inhabited the island of Peuce, at the mouth of the Danube. The Tribares were near their own country; the Scordisci, between the Dardani and Dalmatia. The Moesi, or Mysi, proper, inhabited the heart of the country to which they gave their name, on the banks of the river Cibaras. [A. L.]

MOGETIANA or MOGENTIANA, a place in Lower Pannonia, on the road from Sopianae to Sibaria. (It. Ant. pp. 263, 233.) Its exact site is uncertain. [L. S.]

MOCONTIACUM or MAGONTIACUM (Majencum), a city of Gallia, on the Rhine. On this spot was built a monument in honour of Drusus the father of Germanicus. (Resrep. v. 12. 13.) It is written in the text of Tacitus, is often mentioned in the history of the war of Civilla. (Tacit. Hist. iv. 15. 24. &c.) Ptolemy (i. 2. § 14) writes the name Massaganda, and that in the town in Germania Inferior. In Eutropius the form of the word is Mogontiacum (ed. Verbeeck); but the MSS. have also the forms Magnutia and Magnutia, whence is easily derived the French form Mangenue, and the German Mainz. The position of Mogontiacum at Mainz on the Rhine is determined by the Ilms, which place it 16 M.P. from Bingium (Bingen), also on the Mainz. It was an important post under the Roman empire, but no great events are connected with the name. Ammianus Marcellinus (xy. 11) calls it a Municipium, which means a town that had a Roman form of administration. [G. L.]

MOCGRUS (Mygros), a navigable river in Colchis, flowing into the Euxine between the Phasis in the north, and the Isus in the south; its mouth is just midway between the two, being 90 stadia distant from each. (Arrian, Peripl. Pont. Eu. p. 7; Plin. vi. 4.) As an ancient reading in Pliny is Nogrus, and the Table has Nigrus, it is possible that the real name of the river may have been Nogrus, and that in Arrrian also we must read Nigrus. [L. S.]

MOLADA (Meladás), a town of Illyria, reckoned among the uttermost cities of the tribe of Judah toward the coast of Edom southward (Jos. xvi. 21. 26), and indeed in that part which fell to the tribe of Simeon, "whose inheritance was within the inheritance of the children of Judah." (1 Chron. iv. 26. 26.) Beland remarks, "Viditur esse adem saepe Melada" (Palaeot. s. v. p. 901.), which Melada is mentioned by Josephus as a castle of Idumaean, which Agrippa, the son of Aristobulus and son-in-law of Herod the Great, retired in his distress after his return from Rome, and where he committed suicide. (Ant. vii. 7. § 2.) It is mentioned also by Eusebius and Jerome as on M. P. distant from Arad ('Arad), which they designate as an ancient city of the Amorites, situated in the wilderness of Kadesh ('Kadshiy), xxi. M.P. from Hebron, on the road to Aila. (Onomast. s. vv. 'Arad, 'Aram, 'Aram sa'id; Beland, Palaeotina, s. v. Malatha, pp. 885, 886.) The site of Arad is still marked by a ruin of the same name, at the required distance S. of Hebron; near to which are wells and ruins which Dr. Robinson "was disposed to regard as marking the site of the ancient Moladah of the Old Testament, the Malath of the Greeks and Romans." (Bib. Res. vol. ii. p. 62.) [G. W.]

MOLINDAE (Plin. vi. 19. a. 22), a people mentioned by Pliny, who lived in the eastern part of India extra Gangam. It seems probable that they are the same as those noticed by Ptolemy with the name Marindas (Marindai, vii. 2. § 14). [V.]

MOLOCATE. [MULCIHA.]

MOLOHES. [Pland.] MOLINE. [Pland.]

MOLONIS, MOLIOSSA. [SMRKA.]

MOLURUS. [MOLURUS, Vol. II. p. 517. &c.]

MOLYCREUM, MOLYCREIA, or MOLYCRIA (Molykriou, Thuc. ii. 84; Molykria, Strab. x. p. 451, et alii; Molykria, Polib. v. 94; Panu. ix. 31. § 6; Eth. Molykros, more rarely Molykriou, Molykrius, fem. Molykriosa, Molykria), a town of Aetolia, situated near the sea-coast, and at a short distance from the promontory Antiirimus, which was hence called Πλοιο τον Μολυκρίο (Thuc. ii. 86), or Molykros Πλοιο (Strab. viii. p. 336.) Some writers call it a Locrian town. It is said by Strabo to have been built after the return of the Hellenes into Peloponnesus. It was colonised by the Corinthians, but was subjected to the Athenians in the early part of the Peloponnesian War. It was taken by the Spartan commander Eurylochus, with the assistance of the Aetolians, a. c. 426. It was considered sacred to Poseidon. (Strab. x. pp. 451, 460; Scyl. p. 14; Thuc. ii. 84, iii. 102; Diod. xii. 60; Polib., v. 52, vii. 2. a. 3; Polyb., 11. 53. § 3; Steph. Byz. s. v. Molec.)

MOMENPHIS (Moimenphos, Strab. xvii. p. 503; Diodor. i. 66, 97; Steph. B. a. v.), the capital of the nome Mo-Menphitis, in the Delta. It was seated in lat. 31°25'N., on the eastern shore of the lake Mareotis, N. of the Natron Lakes. Both its ancient and its modern appellation—Menoufiey—indicates its position as the Lower Memphis, or Memphis in the marshes, but still in trouble which, at a short distance from the Delta, had some strength, owing to the difficulties of its approaches. It was chiefly remarkable for its exportation of mineralalkales from the neighbouring Natron Lakes. Athbr or Aphrodite, under the form of a cow, was worshipped at Menemphis. [W. B. D.]

MONA (Moira, Pol. iii. 2. § 13; Moros, Dion. Cass. xiv. 51). An island in Britain, off the coast of the Orkneys, the Isle of Anglesey. Caesar describes Mona as situated in the middle of the passage from Britain to Ireland (B. G. v. 13), but by Mona in this passage he must mean the Isle of Man, which Pliny calls Mona, (v. 16. a. 80); and Ptolemy that of Monarina or Monarida (Monaunia, Monaunus).

The Isle of Anglesey was first invaded by Sesto-nius Paulinus, governor of Britain under Nero, A. D. 61. Previous to the appointment of Sesto-nius Paulinus, the Romans had met with some reverses in the west of Britain. From the vigorous measures adopted by Paulinus on entering upon the government of Britain, it may be inferred that the Druids of Mona had counselled the Silures to rise in rebellion; or had assisted them; probably both. Tacitus states that Mona was a receptacle for fugitives. The island was well populated, and there the priests of the Druidical religion had established themselves in great strength. Paulinus was recalled from the conquest of Anglesea by the revolt of the Britons under Boadicea, and its subjugation was not completed till A. D. 78 by Agricola. (Tac. Agric. pp. 15, 18, Ann. xiv. 32.) [C. R. S.]

MONAPIA. [Mon.] MONDA. [Munda.]

MONESI, one of the many peoples of Aquitania...
Mnotes of MONTEIUM, enumerated by Pliny, who places them below the Saltus Pyrenaicus (iv. 19). The name seems to be preserved in that of Monoeis, which is between Posa and Nauarexia, where it is said that there are traces of Roman camps. Monoeis is in the department of Basses Pyrénées.

MONETIUM (Μονετιον), a town of the Lapodae in Illyria. (Strab. iv. p. 207, vii. p. 314.)

MONEOCI (Μονοεκι) PORTUS HERCULIS MONOECHI (Plin. iii. 5. § 7; Tac. Hist. iii. 42), sometimes also PORTUS HERCULIS alone (Val. Max. i. 6. § 7: Monaco), a port and town on the coast of Liguria, at the foot of the Maritime Alps, distant rather more than 200 stadia from Antipolis. (Strab. iv. p. 202.) Its name was obviously derived from the existence there of a temple of Hercules; and the Greek form of the epithet by which it was characterised, at once shows that it must have owed its foundation to the Greeks of Massalia. But Strabo, who derives the same inference from the name, had evidently no account of its origin or foundation, which were naturally connected by later writers with the temple of Hercules, suggested by the name of Ammian, ascribes the foundation of "the citadel and port" of Monoeis to Hercules himself. (Amm. Marcell. x. 10. § 9.) The port is well described by Strabo (l. c.) as of small size, so as not to admit many vessels, but well sheltered. Lucan, however, who gives a somewhat detailed notice of it, says it was exposed to the wind called by the Gauls Lutus (the Vent du Dées) which rendered it at times an unsafe station for ships (Luecan. i. 405-408); and Silius Italicus dwells strongly on the manner in which the whole of this part of the coast of Liguria was swept by the same wind, which he designates under the more general name of Boreas. (Sil. Italic. l. 586-593.) The port was formed by a projecting rocky point or headland, on which stands the modern town of Monaco, and which was doubtless occupied in like manner in ancient times, at first by the temple of Hercules, afterwards by the town or castle of Monoeis (ara Monoeici, Ammian. l. c.) The town, however, does not seem to have ever been a place of much importance; the advantage of its port for commercial purposes being great, and the port was only a port of communication with the interior. It was, however, frequently resorted to by the Roman fleets and ships, on their way along the coast of Liguria into Spain; and hence was a point of importance in a naval point of view. (Val. Max. i. 6. § 7; Tac. Hist. iii. 42.) The headland of Monoeis itself is of comparatively small height, and lies immediately under a great mountain promontory, formed by one of the spur projecting ridges of the Maritime Alps; and which was regarded by many writers as the natural termination of the great chain of the Alps. (*Alpes, p. 107.*) The passage of this mountain must always have been one of the principal difficulties in the way of constructing a high road along the coast of Liguria; this was achieved for the first time by Augustus, and on the highest point of the passage (called in the Itineraries "in Alpe summa" and "in Alpe maritima." "Itin. Ant. p. 296; Tab. Pent.) he erected a trophy or monument to commemorate the complete subjugation of the different nations inhabiting the Alps. The inscription of this monument has been preserved to us by Pliny (iii. 20. a. 54), and is one of our chief authorities for the geography of the Alpine tribes. The ruins of the monument itself, which was of a very massive character, still remain, and rise like a great tower above the village of Turbie, the name of which is evidently a mere corruption of "Tropare Augusti" (Trentius Zellauvii, Ptol. iii. 1. § 92), or "Tropara Alpium," as it is termed by Pliny (l. c.).

The line of the Roman road, cut in the face of the mountain, may be traced for some distance on each side of Turbie, and several ancient milestones have been found, which commemorate the construction of the road by Augustus, and its repair by Hadrian. (Millin. Voy. en Piémont, vol. ii. pp. 135, 138; Durante, Choregraafia du Comitè de Nice, pp. 23-30.)

The port of Monoeis seems to have been the extreme limit towards the E. of the settlements of Massalia, and hence both Pliny and Ptolemy regard it as the point from whence the Ligurian coast, in the most strict sense of the term, began. (Ptol. iii. 1. § 93; Ammian. 32, 5.) A strange mistake in separating the Ports Herculis and Portus Monoeis, as if they were two distinct places.

MONS AUREUS (Χρύσος χώρος). 1. A mountain in Moesia Superior, which the emperor Probus planted with vines. (Eustrop. ix. 17, 20; It. Ant. p. 132; H. H. p. 564.)

2. A town on the Danube, at the foot of the mountain, 23 miles from Singidnun. (Tab. Pent.)

MONS BALBUS, a mountain fastness of N. Africa, to which Masinissa retired. (Liv. xxxix. 31.) Shaw (Trans. p. 184) places the range in the district of Dukbaâ, E. of Tunis; perhaps Sobaesit-sed Schakâ. (E. B. J.)

MONS BRISIACUS. This is one of the positions in the Roman Itins. along the Rhine. They place it between Helvetum and Heuselhus [Helcebrus] and Urunci. There is no doubt that is Vieux-Brisach or Albrisach, as the Germans call it. All the positions of the Itins. on the Rhine are on the west or Gallic side of the river, but Vieux-Brisach or Albrisach on the East side of the Rhine has changed its bed in several parts, and this is one of the places where there has been a change. "Briach is described by Luitprand of Pavia (quoted by D'Avurville), as being in the tenth century surrounded by the Rhine "in modum insulae." It may have been on an island in the Roman period. The hill (mons) of Albrisach is a well marked position, and was once crowned by a citadel. Albrisach is now in the duchy of Baden, and opposite to Neubreisach on the French side of the Rhine.

MONS MARIORUM, a town in Hispania Baetica, on the Mons Marianus, and on the road leading from the mouth of the Ana to Emerita, now Maine, in the Sierra Morena. (It. Ant. p. 442; Inscr. ap. Curo, Ant. l. 20; Spon. Miscell. p. 191; Florus. Esp. Top. ap. p. 23.)

MONS SACER (Θεσπορος), Ptol. iii. 17. § 4), a mountain range on the SE. coast of Crete, near Hierapytta, identified with the Pityna (Πίτυνα) of Strabo (x. p. 472; comp. Grockard, ad loc.; Höck, Kreta, vol. i. p. 16.)

MONS SELEUCUS, in Gallia Narbonensis, is placed in the Antoine Itin. next to Vipaxcum (Cep.), on a road from Vipaxcum to Vienna (Vienne).
MOPSIMUM.

It is 24 M. P. from Vapincum to Mona Selenus, and 26 M. P. from Mona Selenus to Luncia (Lusca). The Jerusalem Itin. has two Mutations (Ad Fines, and Davinum) between Vapincum and the Manasio Mona Selenus, and the whole distance is 31 M. P. The distances would not settle the position of Mona Selenus, but the name is preserved in Salerno. The Bética Mont-Saléon is only an abbreviation of the Beática Montia Selenêi, a name that appears in some of the old documents of Dusapente. Many remains exist of old art at Mona Selenus; certain evidence that there was a Roman town here.

Mungentius was defeated A. D. 353 by Constantius at Mona Selenus. (Tillemont, Histoire des Empereurs, vol. iv. p. 383.) The memory of the battle is preserved in several local names, as La Champ Impérieux, and Le Champ Batailhier. (Ukert, Gallien, p. 448.)

MOPSIMUM (Μόπσιμον: Ech. Mópsion, Steph. B., Mópsion, a dialectic form of Móspion), a town of Pelasgitia in Thessaly, situated upon a hill of the same name, which, according to Livy, was situated midway between Larissa and Tempe. Its ruins are still conspicuous in the situation mentioned by Livy, near the northern end of the lake Kérkyra or Kérkyra, as Ech. Mópsion (ix. pp. 441, 443; Liv. xiii. 61, 67; Leake, Northern Greece, vol. iii. p. 377.)

MOPSOPHIA. [Pampelitza.]

MOPSOPHIA (Μόπσόφια), an ancient name of Attica, derived from the hero Mopsopus or Mopsopa. (Strab. iv. p. 397; Lycoorh. 1359; Steph. B. s. v.)

MOPSOCRINSE (Μόπσοκρηνος), a town in the eastern part of Cilicia, on the river Cydnus, and not far from the frontier of Catoonia to which Ptolemy (v. 7 § 7), in fact, assigns it. Its site was on the southern slopes of Mount Taurus, and in the neighbourhood of the mountain pass leading from Cilicia into Cappadoceia, twelve miles north of Tarsus. It is celebrated in history as the place where the emperor Constantius died, A. D. 361. (Soson. v. 1; Philostorg. v. s. v.; Evron. s. v.; Amm. Marc. xxii. 39; Ibs. Ant. p. 145, where it is called Namaronome; It. Hieroc. p. 579, where its name is mutilated into Manaverine.)

MOPSUSKIA (Μόπσουσκια or Μοπσουσια: Ech. Mópsosíα), a considerable town in the extreme east of Cilicia, on the river Pyramus, and on the road from Tarsus to Isauria. In the earlier writers the town is not mentioned, though it traced its origin to the ancient soothsayer Mopsus; but Pliny (v. 23), who calls it Mopso, states that in his time it was a free town. (Comp. Strab. xiv. p. 675; Oec. ad Fam. iii. 8; Steph. B. s. v.; Procop. de Aed. v. 5; Amm. Marc. xiv. 8; Phot. Cod. 176; Phot. v. 8 § 7; It. Ant. p. 705; Hieroc. p. 705; It. Hieroc. p. 669, where it is called Mopsista.) A splendid bridge across the Pyramus was built at Mopsesia by the emperor Constantius. (Malal. Chron. xiii.) It was situated only 12 miles from the coast, in a fertile plain, called 'Μόπσουσκιανή μέδα. (Arrian, Anab. ii. 5; Eustath. ad Dionys.)

Per. 872.) In the middle ages the name of the place was corrupted into Mamsia; its present name is Mezis or Menias. Ancient remains are not mentioned, and travellers describe Menias as a dirty and uninteresting place. (Leake, Asia Minor, p. 217; Otter's Reisen, i. c. 8.)

MORBUM, in Britain, is mentioned in the Notitia as the quarters of a body of horse Cataphractarii ("praefectus equitum Cataphractariorum Morbio"). We are justified by an inscription in placing Morbium at Monkeydon or Whitehorne, while the remains of a Roman camp are yet to be traced. The inscription, preserved in a MS. of Dr. Stukeley, but not read by him, is upon a monument to the memory of a soldier of the Cataphractarii, which was found within the precincts of the Camp. (C.R.S.)

MORDULAMNE (Μορδουλάμνη, Phot. vii. § 5), a port on the eastern coast of Tephrana (Cephas). The name is probably a corruption of the MS., and ought to be Μορδουλαμνος or Μορδουλαμνα μην. It is, perhaps, represented by the present Kortogams, where there are still extensive ruins. (Ritter, Kleine, vi. p. 22; Davy, Account of Ceylon, p. 420.)

MORGANTIA, MUGBON'TIA, or MORGANTIUM (Morgantrio, Strab.; Morgantrion, Diod.: Ech. Morgantrion). The name is variously written by Latin writers Morgania, Murgentia, and Morgan; the inhabitants are called by Cicero and Pliny, Murgentini, a city of Sicily, in the interior of the island, to the SW. of Catana. It was a city of the Siculi, though Strabo assigns its foundation to the Morges, whom he supposes to have crossed over from a part of Italy near Naples (v. 11 § 27), and after a siege of 27 years (ib. v. 7 § 7). But this was probably a mere inference from the resemblance of name; Stephanus of Byzantium (s. v.), who is evidently alluding to the same tradition, calls Morganetia, or Murgentia (as he writes the name), a city of Italy, but no such place is known. [Morgentia.] Strabo is the only author who notices the existence of the Morges in Sicily; and it is certain that when Morganium first appears in history it is as a Sicilian town. It is first mentioned by Diodorus in B.C. 459, when he calls it a considerable city (βασιλεία μεγαλά, Diod. xi. 78): it was at this time taken by Duceitus, who is said to have added greatly to his power and fame by the conquest; but after the fall of that leader, it became again independent. We next hear of it in B.C. 424, when, according to Thucydides, it was stipulated, at the peace concluded by Hermocrates, that Morgania (or Murgentia, as he writes the name) should belong to the Carthaginians, they paying for it a fixed sum to the Syracusans. (Thuc. iv. 65.) It is impossible to understand this arrangement between two cities at such a distance from one another, and there is probably some mistake in the names. It is certain that in B.C. 396, Morgania again appears as an independent city of the Siculi, and was one of those which fell under the arms of Dionysius of Syracuse, at the same time with Agrigentum, Menapeutum, and other places. (Diod. xiv. 70.) At a later period it afforded a refuge to Agathocles, when driven into exile from Syracuse.

* It has been suggested that we should read Kerasolos for Καρασολως: but the error is more probably in the other and less-known name. Perhaps we should read Murtarnps for Μορταρνπσ, the district of Motya immediately adjoining that of Canarina.
MORGANTIA

and it was in great part by the assistance of a body of mercenary troops from Morgantia and other towns of the interior, that that tyrant succeeded in establishing his despotic power at Syracuse, B.C. 317. (Justin. xxii. 5; Diod. xix. 6.) Morgantia is repeatedly mentioned during the Second Punic War. During the siege of Syracuse by Marcellus it was occupied by a Roman garrison, and great magazines of corn collected there; but the place was betrayed by the inhabitants to the Carthaginian general Hamilco, and was for some time occupied by the Syracusan leader Hippocrates, who from thence watched the proceedings of the siege. (Liv. xxiv. 36, 39.) It was ultimately recovered by the Roman general, but revolted again after the departure of Marcellus from Sicily, B.C. 211; and being taken by the praetor M. Cornelius, both the town and its territory were assigned to a body of Spanish mercenaries, who had deserted to the Romans under Mercurius. (Id. xxvi. 21.)

Morgantia appears to have still continued to be a considerable town in the Roman dominion. In the great Sertile insurrection of B.C. 109 it was besieged by the leaders of the insurgents, Tryphon and Aethoenus; but being a strong place and well fortified, offered a vigorous resistance; and it is not clear whether it ultimately fell into their hands or not. (Diod. xxxvi. 4, 7. Exc. Phot. pp. 533, 534.) Cicero repeatedly mentions its territory as one fertile in corn and well cultivated, though it suffered severely from the exactions of Verres. (Cic. Verri. iii. 18. 45.) It was therefore in his time still a municipal town, and we find it again mentioned as such by Pliny (iii. 8. a. 14); so that it must be an error on the part of Strabo, that he speaks of Morgantia as a city that no longer existed. (Strab. vi. p. 280.) It may, however, very probably have been in a state of great decay, as the notice of Pliny is the only subsequent mention of its name, and from this time all trace of it is lost.

The position of Morgantia is a subject of great uncertainty, and it is impossible to reconcile the conflicting statements of ancient writers. Most authorities, however, concur in associating it with the Sicilian town of the interior, that border on the valleys of the Syracusae and its tributaries, Memasium, Agrigum, Aserosus, &c. (Diod. xi. 78, xiv. 78; Cic. Verri. l. c.; Sil. Ital. xiv. 265); and a more precise testimony to the same effect is found in the statement that the Carthaginian general Hasdrubal, King of the territory of Agrigum, by the river Motina, on the road leading to Morgantia. (Diod. xiv. 93.) The account of its siege during the Sertile War also indicates it as a place of natural strength, built on a lofty hill. (Diod. xxxvi. l. c.) Hence it is very strange that Livy in one passage speaks of the Roman fleet as lying at Morgantia, as if it were a place on the sea-coast; a statement wholly at variance with all other accounts of its position, and in which there must probably be some mistake. (Liv. xxiv. 27.) On the whole we may safely place Morgantia somewhat on the borders of the fertile tract of plain that extends from Catania inland along the Simeto and its tributaries; and probably on the hills between the Ditesta and the Gumna Longa, two of the principal Sicilian tributaries; but any attempt at a nearer determination must be purely conjectural.

There exist coins of Morgantia, which have the name of the city at full, MOPANTINION; this is unfortunately effaced on the one figured in the preceding column.

MORGETES (Mɔrɛtɛs), an ancient people of southern Italy, who had disappeared from the period of authentic history, but are noticed by several ancient writers among the earliest inhabitants of that part of the peninsula, in connection with the Oenotrians, Italics, and Siculi. Antichus of Syracuse (ap. Dioni. l. 12) represented the Siculi, Morgetes and Italiotes as all three of Oenotrian race; and derived their names, according to the favourite Greek custom, from three successive rulers of the Oenotrians, of whom Italus was the first, Morges the second, and Siculus the third. This last monarch broke up the nation into two, separating the Siculi from their parent stock; and it would seem that the Morgetes followed the fortunes of the younger branch; for Strabo, who also cites Antichus as his authority, says that the Siculi and Morgetes at first inhabited the extreme southern peninsula of Italy, until they were expelled from thence by the Oenotrians, when they crossed over into Sicily. (Strab. vi. p. 257.) The geographer also regards the name of Archimandrium in Sicily as an evidence of the existence of the Morgetes in that island. (Ibid. pp. 256, 270; but no other writer notices them there, and it is certain that in the time of Thucydides their name must have been effectually merged in that of the Siculi. In the Etymologicon Magnus, indeed, Morges is termed a king of Sicily: but it seems clear that a king of the Siculi is intended; for the fable there related, which calls Siris a daughter of Morges, evidently refers to the Italian Morgetes. (Strab. vi. p. 257.) The etymology that we can attempt to deduce from the legends above cited, is that there appears to have existed in the S. of Italy, at the time when the Greek colonists first became acquainted with it, a people or tribe bearing the name of Morgetes, whom they regarded as of kindred race with the Chones and other tribes, whom they included under the more general appellation of the Oenotrians. (OENOTR. Their particular place of abode cannot be fixed with certainty; but Strabo seems to place them in the southern peninsula of Brutum, adjoining Rhegium and Locri. (Strab. vi. p. 257.)

MORGINNUM, in Gallia Narbonensis, is placed by the Table on the road from Vienna (Venetia) to Alpis Cottia, and 14 M. P. short of Culor (Gremoble). The place is Moriana. (G. L.)

MORIÁH. [JERUSALEM.]

MORICAMBA (Mɔräkɑmba, Plut. ii. 3. § 3), an estuary of Britain, Morecambe Bay, on the coast of Lancashire. (C. R. S.)

MORIDUNUM, in Britain, placed between the Antonine Itin. and Geogr. Rav. near Lake of the Dumnonii (Exeter); it was one of the stations termed mansio and mutationes, probably the latter: its site has by no means been agreed upon by

COIN OF MORGANTIA.

MORIDUNUM. 871

E. H. B.]

MORGETES (Mɔrɛtɛs), an ancient people of southern Italy, who had disappeared from the period of authentic history, but are noticed by several ancient writers among the earliest inhabitants of that part of the peninsula, in connection with the Oenotrians, Italics, and Siculi. Antichus of Syracuse (ap. Dioni. l. 12) represented the Siculi, Morgetes and Italiotes as all three of Oenotrian race; and derived their names, according to the favourite Greek custom, from three successive rulers of the Oenotrians, of whom Italus was the first, Morges the second, and Siculus the third. This last monarch broke up the nation into two, separating the Siculi from their parent stock; and it would seem that the Morgetes followed the fortunes of the younger branch; for Strabo, who also cites Antichus as his authority, says that the Siculi and Morgetes at first inhabited the extreme southern peninsula of Italy, until they were expelled from thence by the Oenotrians, when they crossed over into Sicily. (Strab. vi. p. 257.) The geographer also regards the name of Archimandrium in Sicily as an evidence of the existence of the Morgetes in that island. (Ibid. pp. 256, 270; but no other writer notices them there, and it is certain that in the time of Thucydides their name must have been effectually merged in that of the Siculi. In the Etymologicon Magnus, indeed, Morges is termed a king of Sicily: but it seems clear that a king of the Siculi is intended; for the fable there related, which calls Siris a daughter of Morges, evidently refers to the Italian Morgetes. (Strab. vi. p. 257.) The etymology that we can attempt to deduce from the legends above cited, is that there appears to have existed in the S. of Italy, at the time when the Greek colonists first became acquainted with it, a people or tribe bearing the name of Morgetes, whom they regarded as of kindred race with the Chones and other tribes, whom they included under the more general appellation of the Oenotrians. (OENOTR. Their particular place of abode cannot be fixed with certainty; but Strabo seems to place them in the southern peninsula of Brutum, adjoining Rhegium and Locri. (Strab. vi. p. 257.)

MORGINNUM, in Gallia Narbonensis, is placed by the Table on the road from Vienna (Venetia) to Alpis Cottia, and 14 M. P. short of Culor (Gremoble). The place is Moriana. (G. L.)

MORIÁH. [JERUSALEM.]

MORICAMBA (Mɔräkɑmba, Plut. ii. 3. § 3), an estuary of Britain, Morecambe Bay, on the coast of Lancashire. (C. R. S.)

MORIDUNUM, in Britain, placed between the Antonine Itin. and Geogr. Rav. near Lake of the Dumnonii (Exeter); it was one of the stations termed mansio and mutationes, probably the latter: its site has by no means been agreed upon by

COIN OF MORGANTIA.
MORIMARUSA.

topographers, and three or four localities have been proposed. Of these, Seston and Hessburg, near Homilia, appear to have the best claims for consideration; but as the stations next to large towns were often merely establishments for relays of horses and other purposes connected with posting, they were the least likely to be constructed on a large or substantial scale; and thus we have often great difficulty in detecting even a vestige of them. [C. R. S.]

MORIMARUSA. (OECURUS Sertorius, Tullius C. F. G. N. v. 3.) The Romans regarded it as a part of Galatia, whence Ptolemy (v. 6) does not mention it among the districts of Cappadocia. [L. S.]

MORYRI, a nation of Belgica. Virgil is the authority for the quantity:—

"Extremique bonum in Orini." (Aen. viii. 727.)

It has been shown in the article MENAPIS that on the north the Morini were bounded by the Menapii. On the west the ocean was the boundary, and on the south the Ambiani and the Atrebates. The eastern boundary cannot be so easily determined. The element of Morini seems to be the word mo-r, the sea, which is a common Flemish word still, and also found in the Latin, the German, and the English languages.

The Morini generally speaks of the Morini with the Menapii, has fixed their position in general terms. When he first invaded Britannia he went into the country of the Morini, because the passage from thence to Britannia was the shortest (B. G. iv. 21). In the next expedition, a. c. 54, he sailed from Portus Iutus, having ascertained that the passage from this port to Britain was the most commodious. Portus Iutus is in the country of the Morini [ITTIUS PONTICUS]. Ptolemy (ii. 9. § 8) mentions two cities of the Morini, Grerosium and Bononia (Bolonye), and Tarunna (Taroneum), east of it, in the interior. If we add Castellum Morinorum (Cassul), in the interior, south of Dunkerque, "we see that, besides the diocese of Bolonye, the territory of the Morini contained the new dioceses of St. Omer and Arras, which succeeded to that of Towraun..." (D'Anville.) But if Cassul is not within the limits of the Morini, their territory will not be so extensive as D'Anville makes it. [MENAPII.]

Caesar's wars with the Morini were more successful than with the Menapii. A large part of the territory of the Morini did not offer such natural obstacles as the land of the Menapii. The marches of the Morini would be between Calais and Dunkerque. The force which the Morini were supposed to be able to send to the Belgic confederation in a. c. 57 was estimated at 25,000 men. Though most of the Morini were subdued by Caesar, they rose again, in the time of Augustus, and were put down by C. Caesar (Dion Cassius, li. 21). When Bononia was made a Roman port, and Tarunna a Roman town, the country of the Morini would become Romanised, and Roman usages and the Roman language would prevail. There were Roman roads which terminated at Bononia and Castellum.

An inscription mentions the Decumani of the Caesar Morinorum, but it is unknown what place it is.

MOSCHA PORTUS.

MORIUS. (BOBOLLA, Vol. i. p. 412. b.)

MORON. (Móres), a town of Lusitania upon the Tagus, which Brutus Callinicus made his headquarters in his campaign against the Lusitanians. (Strab. iii. p. 152.) Its exact site is unknown.

MORONTABARA (ræ Morontábarra, Arrian, Indic. c. 22), a place on the coast of Grediosa, at no great distance W. of the mouth of the Indus, noticed by Arrian in his account of Nearchus' expedition with Alexander. It does not appear to have been satisfactorily identified with any modern place.

MOROSGI, a town of the Vanduli in Hispania Tarraconensis, identified by Ukert with St. Sebastian, which, however, more probably represents Menasca. (Plin. iv. 20. a. 34; Ukert, li. 1. p. 446; Forbiger, iii. p. 80.)

MORTUM MARE. [PALAZZETTI.]

MORTUM MARE. [SEFTONTRIALIS OCEANUS.]

MORYLUS. [MYODONIA.]

MOSA in Gallia is placed by the Antonine Itin. between Andonatusum (Langrea) and Tullium (Toulu). It is 18 M. E. from Andonatusum to Mosa, which supposed to be Móso, situated at a passage over the Mosas, and in the line of an old Roman road. [G. L.]

MOSA (Mósa), a river of Gallia, which Caesar supposed to rise in the Voextus (Voiges) within the limits of the Lignones. (B. G. iv. 10.) This passage of Caesar, in which he speaks of the Mosas in the lower part of its course receiving a part of the Rhine, called Valahis (Waal), is very obscure. This matter is discussed in the article BATAVIA. Dion Cassius writes the word in the form Móras (xiv. 49); and Ptolemy (ii. 9. § 8) has the form Mósa in the genitive.

Caesar (B. G. vii. 33) says that the Scalids (Scheldec) flows into the Mosas; a mistake that might easily be made with such knowledge of the coast of Belgium and Holland as he possessed. The only branch of the Mosa which Caesar mentions is the Saia (Somme), which joins the Mosas on the left bank at Charleroi in Belgium.

The Mosas, called Mësses by the French, rises about 48° N. lat. in the Fauclilles, which unite the Côte d'Or and the Voiges. The general course of the Mosas is from west to north, but in its middle reaches it is divided into two streams before it reaches Lësga in Belgium, from which its course is north as far as Grave, where it turns to the west, and for 80 miles flows nearly parallel to the Waad. The Mosas joins the Waal at Gorcum, and, retaining its name, flows past Rotterdam into the North Sea. The whole length of the Mosas is above 500 miles. [G. L.]

MOSEAEUS (Móseraus, Ptol. vi. 3. § 3), a small stream, placed by Ptolemy between the Eneaus and the Tigias. It is probably the same as that called by Marcius (p. 17) the Mënmias. It was, no doubt, one of the streams which together form the mouths of the Tigias, and may not impossibly be the same which Pliny names the Aduna (vi. 27, 31), and which he appears to have considered as a branch of the Eneaus. [V.]

MOSCHA PORTUS (Móyska láthyr). 1. A harbour on the S. coast of Arabia, near the extreme east of the Adramitai, or more properly of the Ascitas, since the next named place is "Syagros ex tremena." (Móyskos láthyr), and the Ascitas extended from Syagros more to the sea. (Ptol. vi. 7. p. 153, comp. p. 154.) Mr. Forster thinks there is no diffi-
2. A second harbour of this name is mentioned by the author of the Periplus, on the east of the Syagro Promontorium, in the large bay named by Ptolemy Sachtal Sinus (Σαχτάλινος λιμήν), and east of the small one named Omantos (Ομαντός), by the author of the Periplus, who places this Moschus Portus 1100 stadia east of Syagros. He calls it a port appointed for the landing of the Sachtalian incense (δώρα απὸ σαχταλίνων τοῦ Σαχταλίνου λίθου πρὸς μυδυλάριν), frequented by ships from Carae, and a wintering-place for large vessels from Limyrae and Barygaia, where they bartered fine linen, corn, and oil for the native produce of this coast. Mr. Forster furnishes an ingenious etymological explanation of the recurrence of this name on the coast of the Sachtalian Sinus. "The Arabic Moscha, like the Greek κωτός, signifies a hide, or skin, or a bag of skin or leather blown up like a bladder. Now, Ptolemy informs us that the pearl divers who frequented the coast near the site of Arrian's Moscha Portus, were noted for the practice of swimming, or floating on the bay, supported by inflated hides or skins. What more natural than that the persons engaged in this practice should be named from this practice? . . . And hence, too, the name of the Aschatas of Ptolemy ('floaters on skins'), the actual inhabitants of his Sinus. . . . It is a remarkable fact mentioned by modern travellers, that this practice still prevails among the fishermen on this coast; for "as the natives have but few canoes, they generally substitute a single inflated skin, or two of these having a flat board across them. On this frail contrivance the fisherman seats himself, and either with his own strength or with the help of his companions, pulls out his nets from the bottom." (Lindsay, Walled, Travels in Arabia, vol. i. pp. 79, 80, cited by Forster, Arabia, vol. ii. p. 175, note.*) The identification of Arrian's Moscha with the modern Assara, is complete. Arrian reckons 600 stadia across Syagros the bay which he names Omans. This measurement tallies exactly with that of the bay of Seger, in Commodore Owen's chart of this coast; and from the eastern extremity of this bay to Moscha Portus, Arrian assigns a distance of 500 stadia, which measures nearly with equal exactness the distance to Ras-el-Sine (the Assara of Ptolemy), situated about 60 Roman miles to the east of the preceding headland. The identity of the Moscha Portus of Arrian with the Assara of Ptolemy is thus further corroborated. "Arrian states his Moscha Portus to have been the emporium of the incense trade; and Pliny proves Assara to have been a chief emporium of this trade, by his notice of the fact that one particular kind of incense bore the name of Assaritius." (Plini. xii. 35; Forster, l.c. pp. 176, 177.)

MOSELLA (Μόσελλα), a river of Gallia, which joins the Rhine at Coblesium (Complontium). In the narrative of his war with Masius and Tencobri Caesar (B. G. iv. 15) speaks of driving them into the water "ad conuenementem Mosae et Rhemi." One of the latest and best editors of Caesar, who however is singularly ignorant of geography, supposes this confluence of the Mosse and the Rhinus to be the junction of the Mosse and a part of the Rhinus which is mentioned by Caesar as the place of the Mosse (B. G. iv. 10; Mosau.) But this is impossible, as D'Anville had shown, who observes that the Uispetes [Menapiti] had crossed the Rhine in the lower part of its course, and landed on the territory of the Menapiti. Having eaten them up, the invaders entered the country of the Ebrones, which we know to be between the Rhine and the Mosse, and higher up than the country of the Menapiti. From the Ebrones the Germans advanced into the Condruai in the latitude of Libia; and they were here before Caesar set out after them. (B. G. iv. 6.) Caesar's narrative shows that the German invaders were not thinking of a retreat: their design was to penetrate further into Gallia, where they had been invited by some of the Gallic princes, with the hope of taking off the Roman yoke. After the defeat of the Germans on the river, Caesar built his wooden bridge over the Rhine, the position of which was certainly somewhere between Coblesium and Andernach. The conclusion is certain that this confluence of the Rhenus and the Mosse is the confluence of the Rhinus and the Moselle at Coblesium; and we must explain Caesar's

MOCHI (Μόχιος, Recat. Fr. 188, ap. Steph. B. c. s.), a Colchian tribe, have been identified with the Mespares of the prophet Ezekiel (xxvii. 13; Rosemulliner, Bibl. Alterthumae, vol. i. pt. i. p. 248). Along with the Tibriani, Mosyanea, Macronnes, and Mardae, they formed the 19th satrapy of the Persian empire, extending along the SE. of the Euxine, and bounded on the S. by the lofty chain of the Armenian mountains. (Herod. iii. 94, vii. 78.) In the time of Strabo (xi. pp. 497 — 499) Moschea [Μόσχεα] — in which was a temple of Lenoochea, once famous for its wealth, but plundered by Pharmacides and Mithridates — was divided between the Colchians, Albanians, and Iberians (comp. Mela, iii. 5. § 4; Plin. vi. 4). Procopius (B. G. iv. 2), who calls them Μοσχαί, says that they were subject to the Iberians, and had embraced Christianity, the religion of their masters. Afterwards their districts became the appannage of the Byzantine Lepidites, the name of the town being changed to Iberia (i. p. 770); Le Beau, Bas Empire, vol. xiv. p. 355; St. Martin, Mémoires sur l'Armenie, vol. ii. p. 222.)

E. B. J.

MOCCHICHI MONTES (MACCHICHA HPRO, Strab. i. p. 61, xi. pp. 499, 497, 521, 527, xii. p. 548; Plut. Pomp. 34; Mela, i. 19. § 15; Ptol. v. 6. § 15; Moschici M., Plin. vi. 27), the name applied, with that of Parysades, and others, to the mountain chain which connects the range of Anti-Taurus with the Caucasus. Although it is obviously impossible to fix the precise elevation to which the ancients assigned this name, it may be generally described as the chain of limestone mountains, with volcanic rocks, and some granite, which, branching from the Caucasus, with the E. Euphrates, and afterwards, under the name of the Persepolis Taph, runs nearly SW. along the deep valley of Arzak in the district of Tashkér; from whence it turns towards the S., and again to the W., along the valley of the Acanopsia, to the W. of which, bearing the name of the Kop Taph, it enters Lesser Asia. (Ritter, Erdkunde, vol. x. p. 816; Cherny, Exped. Explorat. vol. ii. p. 592.)

MOG in Gallia appears in the Table on a road from Durocorottum (Romea) to Medistantum. (Mediantum.) The place appears to be Monsos on the Mosse. D'Anville says that the place is called Mosmacara in the oldest middle age records. (G.L.)

MOSELLA (Mosei, Moselle), a river of Gallia, which joins the Rhone at Coblesium (Complontium). In the narrative of his war with Masius and Tencobri Caesar (B. G. iv. 15) speaks of driving them into the water "ad conuenementem Mosae et Rhemi." One of the latest and best editors of Caesar, who however is singularly ignorant of geography, supposes this confluence of the Mosse and the Rhinus to be the junction of the Mosse and a part of the Rhinus which is mentioned by Caesar as the place of the Mosse (B. G. iv. 10; Mosau.) But this is impossible, as D'Anville had shown, who observes that the Uispetes [Menapiti] had crossed the Rhine in the lower part of its course, and landed on the territory of the Menapiti. Having eaten them up, the invaders entered the country of the Ebrones, which we know to be between the Rhine and the Mosse, and higher up than the country of the Menapiti. From the Ebrones the Germans advanced into the Condruai in the latitude of Libia; and they were here before Caesar set out after them. (B. G. iv. 6.) Caesar's narrative shows that the German invaders were not thinking of a retreat: their design was to penetrate further into Gallia, where they had been invited by some of the Gallic princes, with the hope of taking off the Roman yoke. After the defeat of the Germans on the river, Caesar built his wooden bridge over the Rhine, the position of which was certainly somewhere between Coblesium and Andernach. The conclusion is certain that this confluence of the Rhenus and the Mosse is the confluence of the Rhinus and the Moselle at Coblesium; and we must explain Caesar's
mistes as well as we can. It is possible that both rivers were called Mos; and Musella or Musela, as Florus has it, seems to be a diminutive of Mos, but that reading is somewhat doubtful. (Florus, iii. 10. ed. Duk.) There is no variation in Caesar's text in the passage where he speaks of the confines of the plains and the Mos. (Caesar, ed. Schneider.) Several of the affluents of the Mosel are mentioned in the ancient writers, and chiefly by Ausonius; the Sura (Sour), Prunae (Prum), Nemoa (Nume), Gelidia (Kied), Erubrus (Ruer), Leura (Lesser), Draconus (Drone), Sarvus (Sauer), and Salmona (Suls). The Mosella is celebrated in one of the older poems of Ausonius, who wrote in the 4th century A.D. The vine at that time clothed the slopes of the hills and the cliffs which bound this deep and picturesque river valley in its course below Trier: "Qua sublimis apex longo super arcus tractu, Et rupes et aprica jugi, flexuose sinuasse 
Vitibus adscendunt naturalique theatro." (v. 154.) There is a Germanmetrical translation of this poem by Böcking with notes. The Mosel rises on the western face of the Voges, and its upper course is in the hill country, formed by the offsets of the mountains. It then enters the plain of Lorraine, and after passing Tullum (Toul), it is joined by the Meurthe on the right bank. From the junction of the Meurthe it is navigable, and has a general north course past Divodurum (Metz), and Thionville, to Augusta Trevirorum (Trier or Trèves). From Trier its general course is about NNE with many great bends, and in a bed deep sunk below the adjacent country, to its junction with the Rhine at Koblenz. The whole course of the river is somewhat less than 300 miles. It is navigable for steamboats in some seasons as far as Metz. A Roman governor in Gallia proposed to unite the Mosella and the Arar (Saône) by a canal, and thus to effect a navigation from the Mediterranean to the North Sea [GALLIA TRANSALPINA, Vol. I. p. 907.] [G. L.] MOSTENI. [Morsev.] MOSTENI (Morsev), a town of Lydias in the Hyrcanian plain, south-east of Thyatis, and on the road between this latter town and Sardis. In a.d. 17, Mosteni and many other towns of that country were visited by a fearful earthquake. (Ptol. v. 2. § 16; Thuc. Ann. i. 17; Hieroc. p. 671, where it is erroneously called MUOGRIN or MOIGN; Coscul. Chalc. p. 240, where it bears the name Mowev.) Its exact site is unknown. (Comp. Rasse, Lex. Num. iii. 1. p. 869, &c.) [L. S.] MOSCHLUS. [Lemnos.] MOSYNOECI, MOSYNOECI, MOSYNI, MOSSYNI (Мосьные, Mosýnoei, Mosýnnoei, Mosýnni, Mosýwnoei), a tribe on the coast of Pontus, occupying the district between the Tibarini and Macresus, and containing the towns of Cerasus and Pissanka. The Mosynoeci were a brave and warlike people, but are at the same time said to have been the rudest and most uncivilised among all the tribes of Asia Minor. Many of their peculiar customs are noticed by the Greeks, who planted colonies in their districts. They are said to have lived on trees and in towers. (Strab. xii. p. 58.) Their kings, it is said, were elected by the people, and dwelt in an isolated tower rising somewhat above the houses of his subjects, who watched his proceedings closely, and provided him with all that was necessary; but when he did anything that displeased them, they stopped his supplies, and left him to die of starvation. (Xen. Anab. v. 4. § 26; Apollon. Rhod. ii. 1027; Diod. xiv. 30; Scymnus, Fragm. 166.) They used to cut off the heads of the enemies they had slain, and carry them about with dances and songs. (Xen. Anab. iv. 4. § 17; v. 4. § 15.) It is also noted that they knew nothing of marriage (Xen. Anab. v. 4. § 33; Diod. l. c.), and that they generally tattooed their bodies. Eating and drinking was their greatest happiness, whence the children of the wealthy among them were regularly fattened with salt dolphins and chestnuts, until they were as thick as they were tall (Xen. Anab. v. 4. § 32). Their arms consisted of heavy spears, six cubits in length, with round or globular handles; large shields of wicker-work covered with ox-hides; and leather or wooden helmets, the top of which was adorned with a crest of hair. (Xen. l. c., v. 4. § 12; Herod. vii. 78.) The fourth chapter of the fifth book of Xenophon's Anabasis is full of curious information about this singular people. (Comp. also Strab. xi. p. 528; Hecat. Fragm. 193; Steph. B. s. v.; Herod. iii. 94; Sclav. p. 33; Amm. Marc. xxii. 8; Orph. Argon. 740; Mel. i. 19; Tibull. iv. 1. 146; Curtius, vi. 4, 17; Plin. iv. 4; Val. Flacc. v. 152; Dionys. Per. 763.) MOYNE. [Oxen.] MOYNYA (Moynya, Eby. Mowmьo,: S. Pontoalo), a city on the W. coast of Sicily, between Drepanum and Lilybaeum. It was situated on a small island, about three quarters of a mile (six stadia) from the mainland, to which it was joined by an artificial causeway. (Diod. xiv. 48.) It was originally a colony of the Phoenicians, who were fond of choosing similar sites, and probably in the first instance merely a commercial station or emporium, but gradually rose to be a flourishing and important town. The Greeks, however, according to their custom, assigned it a legendary origin, and derived its name from a woman named Motya, whom they connected with the fables concerning Hercules. (Steph. B. s. v.) It passed, in common with the other Phoenician settlements in Sicily, at a later period under the government of Carthage, where it was called a Carthaginian colony; but it is probable that this is not strictly correct. (Thuc. vi. 2; Diod. xiv. 47.) As the Greek colonies in Sicily increased in numbers and importance the Phoenicians gradually abandoned their settlements in the immediate neighbourhood of the new comers, and concentrated themselves in the three principal colonies of Selinus, Panormus, and Motya. (Thuc. l. c.) The last of these, from its proximity to Carthage and its opportunity situation for communication with Africa, as well as the natural strength of its position, became one of the chief strongholds of the Carthaginians, as well as one of the most important of their commercial cities in the island. (Diod. xiv. 47.) It appears to have held, in both these respects, the same position which it was attained at a later period by Lilybaeum. [Lilybaeum.] Notwithstanding these accounts of its early importance and flourishing condition, the name of Motya is rarely mentioned in history until just before the period of its memorable siege. It is first mentioned by Hecataeus (Hesych. Thes. 543), who says it was taken by Dionysius with the chief colonies of the Phoenicians in Sicily, which still subsisted at the period of the Athenian expedition, B.C. 415. (Thuc. vi. 2.) A few years later (B.C. 409) when the Carthaginian army under
MOTYA.

Hamilcar landed at the promontory of Lilybaenum, that general laid up his fleet for security in the gulf around Motya, while he advanced with his land forces along the coast to attack Selinus. (Diod. xiii. 54, 61.) After the fall of the latter city, we are told that Hermocrates, the Syracusan exile, who had established himself on its ruins with a numerous band of followers, laid waste the territories of Motya and Panormus (Id. xiii. 63); and again during the second expedition of the Carthaginians under Hamilcar (n. c. 407), these two cities became the permanent station of the Carthaginian fleet. (Id. xiii. 88.)

It was the important position to which Motya had thus attained that led Dionysius of Syracuse to direct his principal efforts to its reduction, when in n. c. 397 he in his turn invaded the Carthaginian territory in Sicily. The citizens on the other hand, relying on succour from Carthage, made preparations for a vigorous resistance; and by cutting off the casonway which united them to the mainland, compelled Dionysius to have recourse to the tedious and laborious process of constructing a mound or mole of earth and water to reach the intervening territory. Even when this was accomplished, and the military engines of Dionysius (among which the formidable catapult on this occasion made its appearance for the first time) were brought up to the walls, the Motyans continued a desperate resistance; and after the walls and towers were carried by the overwhelming forces of the enemy, still maintaining the defensive farm street to farm street and from house to house. This obstinate struggle only increased the previous exasperation of the Sicilian Greeks against the Carthaginians; and when at length the troops of Dionysius made themselves masters of the city, they put the whole surviving population, men, women, and children, to the sword. (Diod. xiv. 47-53.) After this the Syracusan despot placed it in charge of a garrison under an officer named Biton; while his brother Leptines made it the station of his fleet. But the next spring (n. c. 396) Himilcon, the Carthaginian general, having landed at Panormus with a very large force, recovered possession of Motya with comparatively little difficulty. (Id. id. 55.) That city, however, was not recovered to its former importance. Himilcon, being too fully occupied with the superior advantages of Lilybaenum, founded a new city on the promontory of that name, to which he transferred the few remaining inhabitants of Motya. (Diod. xxii. 10. p. 498.) From this period the latter altogether disappears from history; and the little islet on which it was built, has probably ever since been inhabited only by a few fishermen.

The site of Motya, on which earlier geographers were in much doubt, has been clearly identified and described by Captain Smyth. Between the promontory of Lilybaenum (Capo Bode) and that of Aegikhallus (S. Teodore), the coast forms a deep bight, in front of which lies a long group of low rocky islets, called the Stagiones. Within these, and considerably nearer to the mainland, lies the small island called S. Pantaleo, on which the remains of an ancient city may still be distinctly traced. Fragments of the walls, with those of two gateways, still exist, and coins as well as pieces of ancient brick and pottery—the never failing indications of an ancient site—are found scattered throughout the island. The circuit of the latter does not exceed a mile and a half, and it is inhabited only by a few fishermen; but is not devoid of fertility. (Smyth's Sicily, pp. 255, 256.) The confined space on which the city was built agrees with the description of Diodorus that the houses were lofty and of solid construction, with narrow streets (orovexa) between them, which facilitated the desperate defence of the inhabitants. (Diod. xiv. 48, 51.)

It is a singular fact that, though we have no account of Motya having received any Greek population, or fallen into the hands of the Greeks before its conquest by Dionysius, there exist coins of the city with the Greek legend MOTTAYON. They are, however, of great rarity, and are apparently imitated from those of the neighbouring city of Segesta. (Eckhel, vol. i. p. 225.) [E. H. B.]

MOLOEINE.

MOYTA, or MUTYCA (Mórovoua, Ptol.: Eub. Mutycenaia, Cic. et Plin.: Modico), an inland town in the SE. of Sicily, between Syracuse and Camarina. It was probably from an early period a dependency of Syracuse; and hence we meet with no mention of its name until after the Roman conquest of Sicily, when it became an independent municipality, and apparently a place of some consequence. Cicero tells us that previous to the exactions of Verres, its territory (the "ager Mutycenaia") supported 187 farmers, whence it would appear to have been at once extensive and fertile. (Cic. Ferr. iii. 43, 51.) Motyca is also mentioned among the inland towns of the island both by Pliny and Plolem; and though its name is not found in the Itineraries, it is again mentioned by the Geographer of Ravenna. (Plin. iii. 8 § 14; Ptol. iii. 4 § 14; Geogr. Rav. v. 23.) Silius Italicus also includes it in his list of Sicilian cities, and immediately associates it with Notom, with which it was clearly in the same neighborhood. (Sil. Ital. x. 288.)

There can be no doubt that it is represented by the modern city of Modica, one of the largest and most populous places in the Val di Noto. It is situated in a deep valley, surrounded by bare limestone mountains, about 10 miles from the sea.

Pтолемей mentions also a river to which he gives the name of Motytanaus (Mórovóyns peroróys), which he places on the S. coast, and must evidently derive its name from the city. It is either the trifling stream now known as the Fiuma di Scili, which rises very near Modica; or perhaps the more considerable one, now known as Fiuma di Ragusa, which flows within a few miles of the same city. [E. H. B.]

MOTUM (Mórovos), a small town or fortress of Sicily, in the territory of Agrigentum. It was besieged in n. c. 451 by the Sicilian chief Ducetius, and fell into his hands after a battle in which he defeated the Agrigentines and their allies; but was recovered by the Agrigentines in the course of the following summer. (Diod. xi. 91.) No other mention of it is found, and its site is wholly unknown. [E. H. B.]

MOXORPE, one of the five provinces beyond the Tigris, ceded by Narses to Galerius and the Romans, and which Sapor afterwards recovered.
MUCHERESIS.

from Jovian. (Amm. Marc. xxv. 7. § 9, comp. xxiii. 3. § 5; Le Beau, Bas Empire, vol. i. p. 380, vol. iii. p. 161; Gibbon, ec. xiii. xxiv.). Its exact position cannot be made out, though it must have been near Kurkaduk (Ritter, Erdkunde, vol. x. p. 816.)

MUCHERESIS (Μυχερέσις ab. Mυχερέσις), Procop. B. G. iv. 2, 15, 16, a canton of Lazica, populous and fertile; the vine, which does not grow in the rest of Colchis, was found here. It was watered by the river Mikron (Μίκρον). Archaeopolis, its chief town, was the capital of Colchis, and a place of great importance is located by the remains of ancient walls and towers lying between Martos, Aikawela, Espero, and Bana. At all events this site agrees better with the statement of Strabo, that Mundia is 1400 stadia from Cartela, for the distance from the modern Mondo to the latter place is only 400 stadia; and it is also more in accordance with Pliny, who places Mundia between Attibii and Ursus. (Ptochiger, vol. iii. p. 61.)

2. A town of the Celibei in Hispania Tarraconensis, probably near the frontiers of the Carnutes. (Liv. xl. 47.)

3. A river on the W. coast of Lusitania, falling into the sea between the Tagus and Duria, now the Mundo. (Ptol. iv. 21. a. 33; Modestus, Scriab. i. p. 152; Ptochiger, vol. iv. p. 96; Pliny, ii. 1. § 7; Mundefriga, Modestus, Marc. p. 43.)

MUNDOBRIGA. (Mundefriga.)

MUNIMENTUM CORBULONIS. (Corbulo- nos munimentum.)

MUNIMENTUM TRAJANI, a fort in the country of the Matiaci. (Amm. Marc. xvii. 1.) Its site is not certain, though it is generally believed that the Roman remains near Hecate are the ruins of this fort. (Wilhelm, Germanien, p. 148.)

MUNYCHA. (Athen. p. 306.)

MURA'NUM (Morano), a town of the interior of Lucania, the name of which is not found in any ancient author; but its existence is proved by the Itinerary of Antoninus, which places a station Summum, evidently a corruption of Sub Murano, on the road from Cuma to Cartela; and this is confirmed by the inscription found at La Polla (Forum Popilia), which gives the distance from that place to Murano at 74 M. P. It is, therefore, evident that Murano must have occupied the same site as the modern town of Morano, on a considerable hill, at the foot of which still runs the high road from Naples to Reggio, and where was situated the station noticed in the Itinerary. Now it is the sources of the river Cocele, the ancient Sybaris. (Itin. Ant. pp. 105, 110; Orell. Inscr. 3308; Romanelli, vol. i. p. 387.)

MURROBOG (Murochobos, Ptol. ii. 6. § 52), a people in Hispania Tarraconensis, the southern neighbours of the Cantabri, are the same as the people called Nuvagobos by Ptolemaeus (iii. 3. a. 4) and Dionysius (xiv. 21). This may be inferred from the fact that Ptolemaeus calls Segismar a town of the Turmodigi, and Ptolemy calls Deobrigula a town of the Murrobi; while in the Antonine Itinerary (p. 449) these two towns are only 15 miles apart. (Foriger, vol. iii. p. 105.)

MURGANTIA. 1. A city of Samnium, mentioned only by Livy, who calls it "a strong city" (vilidam urbem, x. 17), notwithstanding which it was taken by assault, by the Roman consul P. Decius, in a single day, a. c. 296. Its position is fixed by Romanelli at Basilica, a considerable town near the sources of the Furtore (Fronto), in the territory of
MURGIS.  

the Hirpin, about 20 miles W. of Luceria. An inscription found here would seem to attest that Murgantia existed as a municipal town as late as the reign of Severus; but considerable doubts have been raised of its authenticity. (Romanelli, vol. ii. p. 481; Monumenti, Topografia degli Ipponi, pp. 4, 5; in Bull. dell’Inst. Arch. 1848.) The coins, with an Oscan legend, which have been generally attributed to Murgantia, in reality belong to Tasta. (Friedländers Ostkuste, vol. i. p. 49.)

2. A city of Sicily, the name of which is variously written Murgantia, Mungantia, and Murgantia. [Murgantia.]

MURGIS (Μουργίς), a town of Hispania Baetica, near the frontiers of Tarraconensis, and on the road from Castulo to Malaca, probably near Pausa de la Guardia vieja. (Ptol. ii. 4. § 11; Plin. iii. 3. s. 4; Isid. Ant. p. 405; Ukarth, ii. i. p. 332; Forberg, iii. p. 56.)

MURIANE (Μουριάνη), one of the four districts of Catania in Cappadocia, on the west of Laviannina, and south-west of Melitene. It is mentioned only by Ptolemy (v. 7. § 8), and must not be confused with Moriumine. [L. S.]

MURUS (Μουρός), a tributary of the Same (Σάμην), which is mentioned only in the Penting. Table, though the antiquity of the name is un- doubted, and attested by the station "in Mario," it was on the road leading from Augusta Vindelicorum through Noricum. (Muehl, Norico, i. p. 380.)

MURICAINTA, an imperial villa in Pannonia, where Valentinian II. was residing with his brother Justinian, when he was proclaimed emperor. (Amm. Marc. xxx. 10.)

MURSA or MURSIA (Μουρσα, Μουρσία), also called Murza Major, to distinguish it from Murusa (Mersella) or Muria Minor, was an important Roman colony, founded by Hadrian in Lower Pannonia, and had the surname Asida. It was the residence of the governor of the country, on the Drava, and there the roads met leading from Aquincum, Celise, and Postovio. In its neighbourhood, Gallienus gained a victory over ingebus; and Constantine the Great made the town the seat of a bishop, a. D. 338. Its modern name is Esceh, the capital of Slovonia. (Ptol. ii. 16. § 8, vili. 7. § 6; Aurel. Vict. de Caesar. 33; Zonim. ii. 43; Steph. Byz. s. v. Mursa, Isid. Ant. Hier. ib. v. 424. 265, 267. 331; It. Hieroc. p. 562; Orelli, Inscriptiones. Nos. 3066, 3291.)

The Lesser Mursa (Mursa Minor or Mersella) was likewise situated in Lower Pannonia, ten miles to the west of Murza Major, on the road from this latter place to Postovio, near the modern village of Petrovecia, on the right bank of the Danube. (Ptol. ii. 16. § 7; Geogr. Bav. iv. 19; It. Hieroc. p. 562; Tier. Pag.)

MURSELLA. [Mursa.]

MURUS CÆSARIS. [Helvetti. vol. i. p. 1042.]

MUSAGORES (Μουσαγόρες, Pomp. Mela. ii. 7. § 13), three islands lying off the E. coast of Crete, the position of which is described by Ptolemy (iv. 12. a. 20): "Circum aqua sermone Iouis, tres Musagores insulae." In Mr. Pashley's map they are represented by Eskaphonia. (Comp. Höck. Kreta, vol. i. p. 378.)

MUSARNIA (Μουσαρνία, Plut. vii. 21. § 6, vii. § 9; Marcan. Peripl. 39-83, ap. Geogr. Graec. Mss. ed. Müller, 1855), a spot on the shore of Grecina, as may be inferred from the comparison of the au-
thorities. Ptolemy mentions two places of the name, one in Grecina, and the other in Caramania; but there can be no doubt that the same place is int- tended. Arrian speaks of a place which he calls vâ Moraou, on the coast of Grecina, which was occu-

MUTINIA.  

pied by the Ichthyophagi (Indice. 26). Vincent, who has examined this geographical question with much care, thinks that this port must have been situated a little west of the modern cape Passo nes or Passo nes. (Voyages de Nauicier, vol. i. p. 243. [The infer-

ence of position in the ancient geographers may be accounted for by the fact that Musarna must have been on the boundary between Grecina and Caramania. Ptolemy speaks of a tribe, whom he calls Musarnesi (Μουσαρνησίς, vi. 21. § 4). There can be little doubt that they were the people who lived around Musarna.] [V.]

MUSONES (Amm. Marc. xxix. 5. § 27; Mau-

roou, Plut. iv. 3. § 24; Musini, Plin. v. 4.

s. 4; Munulni, Pest. Tab.), a Moorish tribe, who joined in the revolt of Firmus. (Amm. Marc. L.c.; comp. St. Martin, Le Beau, Bas Empire, vol. iii. p. 475.)

MUSTI (Μουστη), Plut. iv. 3. § 30, a town of Numidia, which the Antonine Itinerary places 24 M. P. (32 M. P. Pest. Tab.) from Sicca Veneris, 92 M. P. from Sefestula, 86 M. P. from Carthage, 119 M. P. (by Tipasa) to Cirta; all these distances (considering that the roads are indirect) agree with the position assigned to it by Shaw (Tunc. p. 179) and Barth (Wanderungen, p. 221) at 'Ild er-Rabbi, so called from the tomb of a "Marabout." According to Vibius Sequestor (de locis) it was near the river Bagradas; but Shaw (L.c.), who first discovered the site, by the remains of a triumphal arch, and a stone with an inscription bearing the ethnic name "Musticenius," speaks of it as being at some distance from the present course of the Ijerodah. [E. B. J.]

MUSULAM'IAI (Tuci. Am. ii. 65. iv. 24; Musul- 

naxau, Plut. iv. 3. § 30; Mismulnas, Pest. Tab.), a Moorish tribe, whom Ptolemy (L.c.) places to the S. of Cirta, at the foot of Audum. Tacitus (L.c.) gives them a more westerly position, and describes the defeat of this powerful tribe under Tacfarinas, their leader. [E. B. J.]

MUTE'NUM, a place in Upper Pannonia, on the road from Vindobona to Celise; probably occupy-
ing the same site as the modern Mura (It. 

Ant. pp. 233, 266; Cliver, Vindel. 5.) [L. S.]

MUTHUL, a river of Numidia, which, from its being in the division belonging to Aderbal, must be looked for towards the E. of that country. (Sall. Jug. 45.)

MUTINA (Murius, Strab. ; Murius, Pol.; 

Murius, Ptol. : Esd. Museum : Modern), an im-

portant city of Gallia Cispadana, situated on the Via Aemilia, between Parma and Bononia. It was 35 miles distant from the former, and 25 from the latter city. (Strab. v. p. 216; It. Ant. p. 127; It. Hier. p. 616. It appears to have certainly existed previous to the conquest of this part of Italy by the Romans; and was not improbably of Etruscan origin. Livy tells us, that the district or territory in which it was situated, was taken from the Boians, and had previously belonged to the Etruscans (Liv. xxxix. 55); but he does not mention the city. Nor do we know at what period the latter fell into the hands of the Romans, though it was probably during the Gaulish War (n.c. 225-223), as we find it in its undisturbed
possession shortly after, at the commencement of the
Second Punic War, n. c. 218. At that period
Mutina must have already been a considerable place
and well fortified; as we are told that, when the
sudden outbreak of the Gauls interrupted the pro-
cceedings of the triumvirs who were appointed to
found the new colony of Piacentina, and compelled
them to fly for safety, they took refuge within the
walls of Mutina, which afforded them an effectual
protection against the arms of the barbarians. (Liv.
xxi. 25, 26, xxvii. 21; Pol. iii. 40.) Polybius
calls it at this period a Roman colony; but it seems
probable that this is a mistake; for we have no ac-
count of its foundation as such, nor does Livy ever allude to Mutina as a colony, where he expressly
notices those of Cremona and Piacenza (xxvii. 10).
But whether it had been fortified by the Romans, or
was a regular walled city previously existing, (in
which case it must have been, like its neighbour
Bononia, of Etruscan origin,) we have no means of
determining, though the latter supposition is per-
haps the more probable. In any case it continued to
belong to the Romans not only during the Second
Punic War, but throughout the long wars which
followed with the Cisalpine Gauls and Ligurians.
(Liv. xxxiv. 4, 6.) It was not till after the final de-
fate of the Boians in n. c. 191, on which occasion they
were deprived of a large portion of their lands,
that the Romans determined to secure the newly
acquired territory, by planting there the two colonies
of Panna and Mutina, which were accordingly es-
established in n. c. 183. (Liv. xxxix. 55.) They
were both of them "coloniae civium;" so that their
inhabitants from the first enjoyed the full rights of
Roman citizens: 2000 settlers were planted in each,
and these received 5 jugera each for their portion.
(Liv. l. c.) The construction of the great military
high road of the Via Aemilia a few years before,
n. c. 187 (Liv. xxxix. 2), must have greatly facil-
itated the foundation of these new colonies, and
became the chief source of their prosperity.
But shortly after its foundation Mutina sustained
a severe disaster. The Ligurians, who still occu-
pied the heights and valleys of the Apennines bor-
dering on the Boian territory, in n. c. 177 made a
sudden and unexpected attack upon the newly
ravaged its territory, but actually made themselves
masters of the town itself. This was, however, re-
covered with little difficulty by the consuli C. Clau-
dius, 8000 of the Ligurians were put to the sword,
and the colonists re-established in the possession
of Mutina. (Liv. xlii. 14. 16.) For a considerable
period after this, we do not again meet with its
name in history; but it appears that it must have
risen rapidly to prosperity, and become one of the
most flourishing of the towns along the line of the
Via Aemilia. Hence it bears a conspicuous part in
the Civil War. When Lepidus, after the death of
Sulla, n. c. 78, raised an insurrection in Cisalpine
Gaul against the senate, Mutina was almost the
only place which was able to offer any resistance to
the arms of Pompeius, and was held against him by
Brutus for a considerable period. (Plut. Pomp. 16.)
But it was the siege which it sustained, and the
battles fought in its neighbourhood after the death
of Caesar, n. c. 44, that have rendered the name of
Mutina chiefly celebrated in history, and are referred to by Suetonius under the name of "Bello
Mutinensi." (Suet. Aug. 9.) On that occasion D. Brutus, to whom the province of Cisal-
pine Gaul had been decreed by the senate, threw
himself into Mutina with three legions and a large
body of auxiliary troops. Here he was besieged by
M. Antonius with a numerous army; but the senate
having declared against the latter, the two consuls,
Hirtius and Pansa, as well as the young Octavian,
were despatched to the relief and succour of Brutus.
(Jan. n. c. 43.) Antonius at this time occupied
Bononia, as well as the remainder of Belgium, with
his garrisons, while he himself, with the bulk of his
forces, maintained the siege, or rather blockade, of
Mutina. Hirtius on his arrival seised on Claterna,
while Octavian occupied Forum Cornelii (Imola).
From thence they advanced after considerable de-
lays, took possession of Bononia, and approached
Mutina itself, but were unable to open communica-
tions with Brutus. Meanwhile the other consul,
C. Pansa, was advancing with a force of 4 newly
raised legions to their support, when he was at-
taught by Antonius, at a place called Forum Gal-
lorum, about 8 miles from Mutina on the road to
Bononia. [FORUM GALLOREM.] A severe con-
test ensued, in which Pansa was mortally wounded;
but Brutus was so successful in driving Antonius'
army in the rear, completely defeated it, and
 compelled him to retire to his camp before Mutina.
A second battle took place some days afterwards
(April 27, n. c. 43), under the walls of that city, in
which Hirtius was slain; but the forces of Antonius
were again wasted, and that general found himself
compelled to abandon the siege (which had now
lasted for above four months) and retreat into
Italy, with a view of crossing the Alps. (Appian, B. C.
iii. 49—51, 61, 65—72; Dion Cass. xlv. 35—38;
Cic. ad Fam. x. 11, 14, 30, 33, Phil. v.—viii.;
Vell. Pat. ii. 61; Suet. Aug. 10.)
Mutina was evidently at this period a flourishing
and important town, as well as strongly fortified.
Cicero calls it "urbis et splendidissimam populi
Romani colonia" (Phil. v. 9); and these praises are
confirmed by Appian (B. C. iii. 49), who calls it
"a wealthy city," as well as by the fact, that it was
capable of supporting so large an army as that of
Brutus for so long a time. Mela, also, singles out
Mutina, together with Bononia and Patavium, as the
most opulent cities in this part of Italy. (Mela, ii.
4.) It was universally known and respected, and not only
from the circumstance, that it was at Mutina the
numerous body of senators who had accompanied
the emperor Otho from Rome, in A. D. 69, remained,
while Otho himself advanced to meet the generals
of Vitellius, and where they very nearly fell victims
to the animosity of the soldiery, on the first news of his
defeat and death. (Tac. Hist. ii. 53—54.) But
with this exception, we meet with scarcely any
mention of Mutina under the Roman empire until
some late period, though the still extant inscriptions
attest the fact of its continued prosperity. Some
of these give to the city the title of Colonie, as
do also Mela and Pliny. (Mela, l. c.; Plin. iii. 15.
s. 20; Cavodoni, Myrris Modiernae, pp. 120, 165.)
We learn also from Strabo that it was famous for the excellence of the wool produced in
its territory, as well as for its wine, and the
city itself possessed considerable manufactures of
carthenware, as well as woolen goods. (Strab. v.
p. 218; Plin. xiv. 3. 4, xxv. 12. 46; Colum.
viil. 2. § 3.)
In A. D. 191, Mutina was taken by Constantine
during his war with Maxentius, but appears to have
suffered but little on this occasion. (Nazar. Paneg.
27.) Before the close of the century, however, both
the city and its territory had begun to feel severely the calamities that were pressing upon the whole of this fertile and once flourishing tract of country. In A.D. 377, the remains of the conquered tribe of the Taifaiki were settled, by order of the emperor Gratianus, in the country around Mutina, Regionum, and Parma (Ann. Marc. xxxi. 9. § 4)—a plain indication that the population was already deficient; and St. Ambrose, writing not long after the same date, describes Mutina, Regionum, and the other cities along the Aeolian Way, as in a state of ruin and decay, while their territories were uncultivated and desolate. (Ambra. Ep. 39.) The same district again suffered severely in A.D. 452, from the ravages of Attilius, who laid waste all the cities of Aemilia with fire and sword. (Hist. Miscell. xvi. p. 549.) They, however, survived all these calamities, from which, nevertheless, Mutina appears to have suffered more severely than its neighbours. Under the Lombard kings, it became the frontier city of their dominions towards the Exarchate; and though taken by the Greek emperor Mauricius in 590, it was again annexed by Agilulfus to the Lombard kingdom of Italy. (Muratori, Antiq. Ital. vol. i. p. 65.) As the city declined, it fell into the hands of the Venetians. P. Diaconus, who mentions Bononia, Parma, and Regionum as wealthy and flourishing cities, does not even notice the name of Mutina (Hist. Lang. ii. 18); and a writer of the 10th century draws a lamentable picture of the condition to which it was reduced. The numerous streams which irrigated its territory, having been neglected, inundated the whole surrounding tracts; and the site of the city had become in great part a mere morass, in which the ruins that attested its ancient grandeur, were half buried in the mud and water. (Murat. Ant. vol. ii. pp. 154, 155.)

At a later period of the middle ages, Modena again rose to prosperity, and became, as it has ever since continued, a flourishing and opulent city. But the truth of the description above cited is confirmed by the fact, that the remains of the ancient city are wholly buried under the accumulations of alluvial soil on which the buildings of the modern city are founded, and are only brought to light from time to time by excavations. (Murat. L. c.) Large portions of the ruins were also employed at various periods for the foundations of churches and other edifices; and no remains of ancient buildings are now extant. But a valuable collection of sarcophagi and inscriptions, discovered at various periods on the site of the modern city, is preserved in the museum. These have been fully illustrated by Cavedoni in his Antichi Marmi Modenati (Svo. Modena, 1838), in which work the facts known concerning the ancient history of the city are well brought together.

Modena is situated between the river Secchio, which flows about 3 miles to the W. of the city, and the Panaro, about the same distance on the E. The latter is unquestionably the ancient Scultenusa, a name which it still retains in the upper part of its course. The Secchio is probably the Gabelius of Pliny; but seems to have been also known in ancient times as the Secia; for the Jerusalem Itinerary marks a station called Pons Seciei, 5 miles from Mutina, where the Aeolian Way crossed this river. (Itin. Hier. p. 616.) The Apennines begin to rise about 10 miles to the S. of the city; and the ancient territory of Mutina seems to have included a considerable extent of these mountains, as Pliny notices a prodigy which occurred "in agris Mutinae," when two mountains were dashed against one another with great violence, so that they appeared to recoil again from the shock. (Plin. ii. 83. s. 85.) This phenomenon, which occurred in B.c. 91, was doubtless the result of an earthquake, and not, as has sometimes been supposed, of a volcanic outburst.

[Edward H. B.]

MUTUSCAE. [TRIBUS MUTUSCA.] MUTOCA. [MOTICA.]

MUZA (Móga, Arias; Móra and Móga ãpul, PoL.), an important mercantile town on the Arabian coast of the Red Sea, not far north of the Straits of Bab-el-Mandeb, in the country of Eliasi; placed by Ptolemy in long. 74° 30', lat. 14° 30' west, and 30° north of Osiris (Omos ãpul) close to the straits. (Pol. vii. 15. p. 132.) He states that its longest day is 14½ hours, that it is 1° east of Alexandria, and within the tropics (viii. Tab. vi. Asiae, p. 241); Pliny (vi. 83) names Muma as the third port of Arabia Felix "quem Indica navigatio non petit, nec nisi turia odoromque Arabicorum mercatores." The author of the Peripæiae frequently alludes to it, and gives a full account of it and its trade. He describes it as a chief city with two thermal baths. It was a regular mart, inhabited altogether by Arab mariners and merchants, distant about 12,000 stadia from Berenice to the south, and 300 north of the straits. (Vincent, Peripæia, p. 296. n. 100; Gossellin, Récherches, ft. tome ii. pp. 265, 266.) It was not only an emporium of Indian merchandise—a market of ivory, wax, and other rich products; but it was itself a centre of manufacture, and its trade of this description already existed—but exported an export trade of its own. It was distant three days' journey from the city of Save (Zaïo), which was situated inland, in the country of Maphoritis. It had no proper harbour, but a good roadstead, and a sandy anchorage. Its principal import trade was in fine and common purple cloth; Arab dresses with sleeves—probably the fænsa—some plain and common, others embroidered with needlework and in gold: saffron; an aromatic plant, named cyperus (cynaros); fine linen; long robes—the abas; quilts; striped girdles; perfumes of a middling quality; specie in abundance; and small quantities of wine and grain, for the country grew but little wheat, and more vines. To the king and tyrants were given horses, pack-mules, vessels of all kinds, wine, and costly manufactures. Beside the above named articles of merchandize, which were chiefly supplied to its markets from Adula, on the opposite coast, the great emporium of African produce [Adulis], Musa exported a precious myrrh of native growth, an aromatic gum, which the author names osmylos déktrimmuia, and a white marble or alabaster (nýrros). (Arrian, Peripæia ap. Hudson. Geogr. Més. vol. i. pp. 13, 14.) Vessels from this port visited all the principal mercantile towns of the south coast of Arabia. Bochart's identification of this Musa with the Masha mentioned by Moses, as one extreme point of the Joktanite Arabs,-Sephar being the other (Gen. x. 30),—is thought by Mr. Forster to be untenable, on account of the narrow limits to which it would confine this large and important race; for the site of Sephar is clearly ascertained. (Maphoriatæ, Saphoriatæ.) (Geogr. of Arabia, vol. i. pp. 83, 94.) M. Gossellin (Récherches, ft. tome ii. p. 89) asserts that this once most celebrated and frequented port of Yemen is now more than six leagues from the sea, and is replaced as a port by Moka, the foundation of which dates back no more than 400 years (Niebuhr, Voyages en Arabie,
tome I. p. 349); as indeed he maintains, that some of the maritime towns of the coast of Hadjus and Yemyes date more than 400 or 500 years from their foundation, and that the towns whose walls were once washed by the waters of the gulf, and which owed their existence to their vicinity to the sea, have disappeared since its retirement, with the exception of those whose soil was sufficiently fertile to maintain their inhabitants. In a sandy and arid country these were necessarily few, so that there are not more than six or seven that can be clearly identified with ancient sites. Among these Musa still exists under its ancient name unchanged (ib. pp. 239, 284) at the required distance from the Straits of Bad-ul-Mandeb, viz. 350 stadia, reckoning 500 stadia at a degree. (ib. pp. 269, 270). Vincent makes it short of 40 miles. (Periplus, p. 319). In the middle ages when the sea had already retired from Musa, another town named Mosk or Maoukal was built as a seaport in its stead, which seems to have usurped the name of the more ancient town, and to have been mistaken for it by some geographers. This Mosk still exists, in its turn abandoned by the sea, but about 20 miles from the true position of Musa. (ib. p. 270). “The mart of Yemyes at the present day is Mokba. . . . Twenty miles inland from Mokba Niebuhr discovered a Musa still existing, which he with great probability supposes to be the ancient mart, now carried inland to this distance by the recession of the coast.” (Vincent, l. c. p. 315.)

There is a circumstance mentioned by Bruce on the roadstead of Mokba, which coincides with a statement cited from Arrian with regard to Musa. Bruce says that “the cables do not rub, because the bottom is sand, while it is coral in almost every other port.” (ib. p. 313. n. 143.)

Mokba itself Niebuhr found to be 6½ hours = 4½ German miles, due east of Mokba, at the commencement of the southern country, the intervening space being extremely dry and thinly peopled. It is an ordinary village, badly built, only recommended by its water, which is drunk by the wealthier inhabitants of Mokba. (Voyage en Arabie, tome i. pp. 296, 297; Description de l’Arabie, pp. 194, 195.)

MUZIRIS (Musafl., Periplus, M. Ehrh. c. 54, p. 267; Hom. Ill. iii. 1, l. 1; Paus. i. 24, 4; Greek. Mena, ed. Müller, 1855), a port on the west coast of Hindostan, situated between Tyndis and Nelycnda, and at a distance of 500 stadia from either, where, according to the author of the Periplus, ships came from Ariaca and Greece (that is, Alexandria). Ptolemy calls it an emporium (vii. 1. § 8), and places it in Lyrimara. It can be little doubt that it is the place which is now called Mangalore, and which is still a considerable port.

MYCALAE (Muskadi), the westernmost branch of Mt. Mesogia in Lydia; it forms a high ridge and terminates in a promontory called Tropylion, now called S. Maria. It runs out into the sea just opposite the island of Samos, from which it is separated only by a narrow channel seven stadia in breadth. It was in this channel, and on the mainland to the east of Mount Mycale, that the Persians were defeated, in n.c. 479. It is probable that at the foot of Mount Mycale there was a town called Mycale or Mycaleus, for Stephanus Byz. (x. v.) and Skylax (p. 37) speak of a town of Mycale in Caria or Lydia. The whole range of Mount Mycale now bears the name of Samos. (Hom. Il. ii. 869; Herod. i. 148, vii. 80, ix. 96; Thuc. i. 14, 89; viii. 79; Diod. ix. 34; Paus. v. 7. § 3, vii. 4. § 1; Strab. xii. pp. 621, 629; Ptol. v. 2. § 13; Agathem. p. 3.)

MYCELEUM: E. M. Mycaleus), an ancient town of Bocotia, mentioned by Homer. (Il. ii. 498, Hymn. Apoll. 224.) It was said to have been so called, because the cow, which was guiding Cadmus and his companions to Thebes, lowered (hysygero) in this place. (Paus. ix. 19. § 4.) In n.c. 413, some Thracians, whom the Athenians were sending home to their own country, were landed on the Euripus, and surprised Mycaleus. They not only sacked the town, but put all the inhabitants to the sword, not sparing even the women and children. Thucydides says that this was one of the greatest calamities that had ever befallen any city. (Thuc. vii. 29; Paus. i. 23. § 3.)

Syracuse (ix. p. 404) calls Mycaleus a village in the territory of Tanagra, and places it upon the road from Thebes to Chalcis. In the time of Pausanias it had ceased to exist; and this writer saw the ruins of Harma and Mycaleus on his road to Chalcis. (Paus. ix. 19. § 4.) Pausanias mentions a temple of Demeter Mycaleus, standing on the territory of the city upon the sea-coast, and situated to the right of the Euripus, by which he evidently meant south of the strait. The only other indication of the position of Mycaleus is the statement of Thucydides (I.c.), that it was 16 stadia distant from the Hermusaeum, which was on the sea-shore near the Euripus. It is evident from these accounts, that Mycaleus and the above-mentioned ruins are roughly placed, with great probability, upon the height immediately above the southern bay of Eryipos, where the ruined walls of an ancient city still remain. (Northern Greece, vol. ii. pp. 249, seq., 264.) It is true, as Leake remarks, that this position does not agree with the statement of Strabo, that Mycaleus was on the road from Thebes to Chalcis, since the above-mentioned ruins are nearly two miles to the right of that road; but Strabo writes loosely of places which he had never seen. Mycaleus is also mentioned in Strab. ix. pp. 405, 410; Paus. iv. 7. a. 12.

MYCENAE, a town in Crete, the foundation of which was attributed by an historian of the Augustan age (A.D. 17) to Pistoxenes.

Harduin (ad Plut. iv. 12) proposed to read Mycenae for Myrema, which is mentioned as a city of Crete in the text of Pliny (L. c.). Sieber (Reise, vol. ii. p. 280) believed that he had discovered the remains of this city at a place called Mosco or Mosti, on the river Armardo. (Höck, Krete, vol. i. p. 435.)

E. B. J.

MYCENAE, sometimes MYCENAE (Mycean), Myseum, Hom. Ill. iv. 59; Ech. Monowald, Myceamus, Mycenaeum: Kharade). one of the most ancient towns in Greece, and celebrated as the residence of Agamemnon. It is situated at the north-eastern extremity of the plain of Argos upon a rugged height, which is shut in by two commanding summits of the range of mountains which border this side of the Argive plain. From its retired position it is described by Homer (Od. iii. 265) as situated in a recess (psevkont) of the Argive land, which is supposed by some modern writers to be the origin of the name. The ancients, however, derived the name from an eponymous heroine Myceme, daughter of Inachus, or from the word μυκες, for which various reasons were assigned. (Paus. ii. 17. § 3; Stephan. B. G. iv. 1.) The position was one of great importance. In the first place it commanded the upper part of the great Ar-
geian plain, which spread out under its walls towards the west and south; and secondly the most important roads from the Corinthian gulf, the roads from Phlius, Nemea, Cleonea, and Corinth, unite in the mountains above Mycenae, and pass under the height upon which the city stands. It was said to have been built by Perseus (Strab. viii. p. 377; Paus. ii. 15. § 4, ii. 16. § 3), and its massive walls were believed to have been the work of the Cyclopes. Hence Euripides calls Mycenae ωλισμα Περσέως, Ἐνισέντας τόνον χρώμα (Iphig. in Aul. 1500). It was the favourite residence of the Pelopidæ, and under Argamemnon was regarded as the first city in Greece. Hence it is called ὕπωξίσωνes by Homer (Il. vii. 180, xi. 46), who also gives it the epithets of εἰφραῖνος (Il. iv. 52) and ἔπτηρησιον πτωλεία (II. ii. 569). Its greatness belongs only to the heroic age, and it ceased to be a place of importance after the return of the Heraclidæ and the settlement of the Dorians in Argos, which then became the first city in the plain. Mycenæ, however, maintained its independence, and sent some of its citizens to the assistance of the Greeks against the host of Xerxes, although the Argives kept aloof from the common cause. Eighty Mycenaenæ were present at Thermopylae (Herod. vii. 202), and 400 of their citizens and of the Tirynthians fought at Platææ (Herod. ix. 28). In n. c. 468, the Dorians of Argos, resolving to bring the whole district under their sway, laid siege to Mycenæ; but the massive walls resisted all their attacks, and they were obliged to have recourse to a blockade. Famine at length compelled the inhabitants to abandon the city; more than half of them took refuge in Macedonia, and the remainder in Cleonea and Ceryneia. (Diod. xi. 65; Strab. viii. pp. 372, 377; Paus. ii. 16. § 5, v. 23. § 3, vii. 25. § 5, viii. 27. § 1.) From this time Mycenæ remained uninhabited, for the Argives took care that this strong fortress should remain desolate. Strabo, however, committed a gross exaggeration in saying that there was not a vestige of Mycenæ extant in his time (vii. p. 372). The ruins were visited by Pausanias, who gives the following account of them (ii. 15, 16):—"Returning to the pass of the Tretus, and following the road to Argos, you have the ruins of Mycenæ on the left hand. Several parts of the enclosure remain, and among them is the gate upon which the lions stand. These also are said to be the work of the Cyclopes, who built the walls of Tiryns for Proetus. Among the ruins of the city there is a fountain named Pereia, and subterranean buildings (ἠργονία οἰκοδομαρία) of Atreus and his sons, in which their treasures were deposited. There are likewise the tombs of Atreus, of his charioteer Eurymenæ, of Electra, and a sepulchre in common of Teledamus and Pelops, who are said to have been twin sons of Cassandria. But Clytaemnestra and Agamemnon were buried at a little distance from the walls, being thought unworthy of burial where Agamemnon lay."

The ruins of Mycenæ are still very extensive, and, with the exception of those of Tiryns, are more ancient than those of any other city in Greece. They belong to a period long antecedent to all historical records, and may be regarded as the genuine relics of the heroic age.

**PLAN OF THE RUINS OF MYCENAE.**

cuit, with the exception of a small open space above the precipitous cliff on the southern side, which perhaps was never defended by a wall. The walls are more perfect than those of any other fortress in Greece; in some places they are 15 or 20 feet high. They are built of the dark-coloured limestone of the surrounding mountains. Some parts of the walls are built, like those of Tiryns, of huge blocks of stone of irregular shape, no attempt being made to fit them into one another, and the gaps being filled up with smaller stones. But the greater part of the walls consists of polygonal stones, skilfully hewn and fitted to one another, and their faces cut so as to give the masonry a smooth appearance. The walls also present, in a few parts, a third species of masonry, in which the stones are constructed of blocks of nearly quadrangular shape; this is the case in the approach to the Gate of Lions. This difference in the masonry of the walls has been held to prove that they were constructed at different ages; but more recent investigations amidst the ruins of Greece and Italy has shown that this difference in the style of masonry cannot be regarded as a decisive test of the comparative antiquity of walls; and Col. Mure has justly remarked that, as there can be no reasonable doubt that the approach to the Gate of Lions is of the same remote antiquity as the remainder of the fabric, it would appear to have been the custom with these primitive builders to pay a little more attention to symmetry and regularity in the more ornamental portions of their work.

The chief gate of the Acropolis is at the NW. angle of the wall. It stands at right angles to the adjoining wall of the fortress, and is approached by a passage 50 feet long and 30 wide, formed by that wall and by another wall exterior to it. The opening of the gateway widens from the top downwards; but at least two-thirds of its height are now buried in ruins. The width at the top of the door is 9½ feet. This door was formed of two massive uprights, covered with a third block, 15 feet long, 4 feet wide, and 6 feet 7 inches high in the middle, but diminishing at the two ends. Above this block is a triangular gap in the masonry of the wall, formed by an oblique approximation of the side courses of stone, continued from each extremity of the lintel to an apex above its centre. The vacant space is occupied by a block of stone, 10 feet high, 12 broad, and 2 thick, upon the face of which are sculptured two lions in low relief, standing on their hind-legs, upon either side of a covered pillar, upon which they rest their fore-feet. The column becomes broader towards the top, and is surmounted with a capital, formed of a row of four circles, enclosed between two parallel fillets. The heads of the animals are gone, together with the apex of the cone that surmounted the column. The block of stone, from which the lions are sculptured, is said by Leake and other accurate observers to be a kind of green basalt; but this appears to be a mistake. We learn from Mure (Tour in Greece, vol. ii. p. 324) that the block is of the same palomino, or dove-coloured limestone, of which the native rock mainly consists, and that the erroneous impression has been derived from the colour of the polished surface, which has received from time and the weather a blueish green hue. The column between the lions is the customary symbol of Apollo Agynus, the protector of doors and gates. (Müller, Dor. ii. 6. § 5.) This is also proved by the invocation of Apollo in the Agamemnon of Aeschylus (1078, 1083, 1271), and the Electra of Sophocles (1374), in both of which tragedies the scene is laid in front of this gate.

It has been well observed that this pair of lions stands to the art of Greece somewhat in the same relation as the Iliad and the Odyssey to her literature; the one, the only extant specimens of the plastic skill of her mythical era, the other, the only genuine memorials of its chivalry and its song. The best observers remark that the animals are in a style of art peculiar to themselves, and that they have little or nothing of that dry linear stiffness which characterises the earlier stages of the art of sculpture in almost every country, and present consequently as little resemblance to the Archaic style of the Hellenic works of a later period as to those of Egypt itself. "The special peculiarities of their execution are certain solidity and rotundity amounting to clumsiness in the limbs, as compared with the bodies. The hind-legs, indeed, are more like those of elephants than lions; the thighs, especially, are of immense bulk and thickness. This unfavourable feature, however, is compensated by much natural ease and dignity of attitude. The turning of the body and shoulders is admirable, combining
strength with elegance in the happiest proportions. The belles of both are slender in comparison with the rest of the figure, especially of the one on the right of the beholder. The muscles, sinews, and joints, though little detailed, are indicated with much spirit. The finish, both in a mechanical and artistic point of view, is excellent; and in passing the hand over the surface, one is struck with the smooth and easy blending of the masses in every portion of the figure." (Mure, vol. ii. p. 171.)

Besides the great Gate of Lions, there was a smaller gate or postern on the northern side of the Acropolis, the approach to which was fortified in the same manner as that leading to the great gate. It is constructed of three great stones, and is 5 feet 4 inches wide at the top.

Near the Gate of Lions the wall of the lower city may be traced, extending from N. to S. In the lower town are four subterranean buildings, which are evidently the same as those described by Pausanias, in which the Athenians deposited their treasures. Of these the largest, called by the learned the "Treasury of Atreus," and by the Greek ciceroni the "Grave of Agamemnon," is situated under the aqueduct which now conveys the water from the stream on the northern side of the Acropolis to the village of Kharvédik. (See Plan, C.) This building in the plan of the Heesch, Phot. et Arch., is 21 feet 9 inches long; it is approached by a passage now in ruins, and contains two chambers. The passage leads into a large chamber of a conical form, about 50 feet in width and 40 feet in height; and in this chamber there is a doorway leading into a small interior apartment. The ground-plan and a section of the building are figured in the Dict. of Antiq. p. 1127. The doorway terminating the passage, which leads into the large chamber, is 3 feet 6 inches wide at the top, widening a little from thence to the bottom. On the outside before each door-post stood a semi-column, having a base and capital not unlike the Tuscan order in profile, but enriched with a very elegant sculptured ornament, chiefly in a zigzag form, which was continued in vertical compartments over the whole. These ornaments have the smallest resemblance to anything else found in Greece, but they have some similitude to the Persepolitan style of sculpture. (Leake, Moreus, vol. ii. p. 374.) There are remains of a second subterranean building near the Gate of Lions (Plan, D); and those of the two others are lower down the hill towards the west.

There has been considerable discussion among modern scholars respecting the purpose of these subterranean buildings. The statement of Pausanias, that they were the treasuries of the Areiadae, was generally accepted, till Mure published an essay in the Rheinisches Museum for 1839 (vol. vi. p. 240), in which he endeavoured to establish that all such buildings were the family vaults of the ancient heroes by whom they were constructed. In the great edifice at Mycenae he supposes the inner apartment to have been the burial-place, and the outer vault the heroon or sanctuary of the deceased. This opinion has been adopted by most modern scholars, but has been combated by Leake, who adheres to the ancient doctrine. (Peloponnissiaci, p. 236.) The two opinions may, however, be somewhat reconciled by supposing that the inner chamber was the burial-place, and that the outer contained the arms, jewels, and other ornaments most prized by the deceased. It was the practice among the Greeks in all ages for the dead to carry with them to their tombs a portion of their property; and in the heroic ages the burial-places of the powerful rulers of Mycenae may have been adorned with such splendour that the name of Treasuries was given to their tombs. There is, indeed, good reason for believing, from the remains of bronze nails found in the large chamber of the "Treasury of Atreus," that the interior surface of the chamber was covered with bronze plates.

MYEONII [Μυηόνια].

MYCHUS. [Μυχός].

MYCONUS (Μύκωνος), an island in the Aegean sea, lying E. of Delos, and N. of Naxos. Pliny says (iv. 12, a. 22) that it is 15 miles from Delos, which is much greater than the real distance; but Scylax (p. 55) more correctly describes it as 40 stades from Rheneia, the island W. of Delos. Myconians is about 10 miles in length, and 6 in its greatest breadth. It is in most parts a barren rock, whence Orid gives it the epithet of humiliss (Met. vii. 463); and the inhabitants laid in antiquity a bad reputation on account of their avarice and meanness (Attnn. i. p. 7; hence the proverb Mvovnswv tivsws, Zenob. Pros. v. 21; Suidas, ii. 71); but the island is now cultivated, and the summit of the hills are strewn with immense blocks of this stone. This circumstance probably gave rise to the fable that the giants subdued by Hercules lay under Myconians; whence came the proverb, "to put all things under Myconians," applied to those who ranged under one class things naturally separate. (Strab. x. p. 467; Steph. B. s. v.) The tomb of the Lorciain Ajax was also shown at Myconians. (Testa. ad Lygophr. 401.) Of the history of the island we have no account, except the statement that it was colonised from Athens, by the N Ebdae Hipoccos. (Zenob. v. 17; Schol. ad Dionys. Pers. ap. Geogr. Min. vol. iv. p. 37, Hudon.) Myconus is mentioned incidentally by Herodotus (vi. 118) and Thucydides (iii. 29). Ancient writers relate, as one of the most marvellous of all the Greek cities, that the inhabitants lost their hair at an early age. (Strab. i. c.; Plin. xi. 37. a. 47; "Myceni calva omnis juventus," Donat. ad Ter. Hecyri. iii. 4. 18.) The highest mountain, which is in the northern part of the island, has a summit with two peaks, whence it is called Dimastes or Pliny (iv. 12. a. 22). The promontory of Phoritis (Phoritis, Plut. iil. 15. § 29) was probably on the eastern side of the island. Scylax mentions two cities (Mvovnws, aftv Nvths, p. 22). Of these one called Myconians occupied the site of the modern town, which presents, however, scarcely any ancient remains. The name and position of the other town are unknown. The coins of Myconians are rare; and in general very few remains of antiquity are found in any part of the island. (Ross, Reisen auf dem Griechischen Inseln, vol. ii. p. 28, seq.)

MYGDONES (Μυγδόνες), a tribe dwelling in Bithynia, about the river Odrysses and the coast of the Propontis, but extending into Myasia, where they occupied the district about Mount Olympus and lake Dascylitis. They had immigrated into Asia Minor from Thrace, but were afterwards subdued or expelled by the Bithynians. (Strab. vii. p. 295, xii. pp. 564, 575.) The district inhabited by them was called Mygdonia. (Strab. xii. pp. 550, 558, 576 Plin. iv. 41; Solin. 40. 42.)

[L. S.]
MYDGONIA. — MYDGONIA (Μυδόγνια; Euth. Mydgonis, Steph. B.), a district of Macedonia, which comprehended the plains Thessalonica, together with the valleys of Kikau and Besikta, extending towards the E. as far as the Axios [Herod. vii. 123], and including the Lake Bolbe to the E. (Thuc. i. 58.) To the N. it was joined by Crestonia, for the Echidna, which flowed into the gulf near the marshes of the Axios, had its sources in Crestonia (Herod. vii. 124), while to the S. it extended to Arbeus, which was probably the boundary of Mydgonia towards Bisaltis. The maritime part of Mydgonia formed a district called Amphaxitis, a distinction which first occurs in Polybius (v. 98), who divides all the great plain at the head of the Thermaic gulf into Amphaxitis and Botissa, and which is found three centuries later in Ptolemy (ii. 13. § 36). The latter introduces Amphaxitis twice under the subdivisions of Macedonia,—in one instance placing under that name the mouths of the Echidna and Axios, with Thessalonica as the only town, which agrees with Polybius, and particularly with Strabo (vii. p. 380). In the other place, Ptolemy includes Stagara and Arbeus in Amphaxitis, which, if it be correct, proves that the earlier mention of Amphaxitis, very distant from the Axios, was separated from the remainder by a part of Mydgonia; but as this is improbable, the word is perhaps an error in the text. The original inhabitants, the Mydgonians, were a tribe belonging to the great Thracian race, and were powerful enough to becastheir name to it, even after the Macedonian conquest. (Thuc. ii. 8.) The cities of this district were Thessalonica, Sendrus, Chalassetra, Altus, Strepsi, Cissus, Millsius, Heracleaustus. Besides these, the following obscure towns occur in Ptolemy (L. c.):—Chaetas, Moryllas, Antigoneia, Calindusa, Boerus, Physca, Trepilius, Carabia, Xylopolis, Assoros, Leute, Phileria. As to the towns which occupied the fertile plain between Mt. Cusus and the Axios, their population was no doubt absorbed by Thessalonica, on its foundation by Cassander, and remains of them are not likely to be found; nor are the ancient references sufficient to indicate their sites. One of these would seem, from ancient inscriptions which were found at Khases, to have stood in that position, and others probably occupied similar positions on the last falls of the heights which extend near the Axios to the Axios. One in particular is indicated by some large "lumuli" or barrows, situated at two-third of that distance. (Leake, North. Greece, vol. iii. p. 448.)

[EB. J.]

MYDGONIA (Μυδόγνια, Plut. Lucull. c. 32; Polyb. v. 31), a district in the NE. part of Meso- tamia, adjoining the country now called the Singur. According to Strabo, people who were named Mydgones came originally from Macedonia, and occupied the district extending from Zeugma to Thapsus (xvi. p. 747); as, however, he states in the same place that Nisibis was called by the Macedonia "Antiocheia in Mydgonia," and places it in the immediate neighbourhood of M. Masius, he would appear to have thought that it was on the eastern side of Mesopotamia. Plutarch relates the same story of the Greek name of Nisibis (Lucull. c. 32). In Stephanus Byz. the name is written Mydgonas, which is probably an error. In many of the earlier editions of Xenophon, a people are spoken of who are called Murgiani; the later and better editions read, however, Magdones, which is more probable (Amb. iv. 5. § 4).

[V.]

MYGDONIUS (Μυδόγονιος, Julian. Orat. p. 27), the river which flows by the town of Nissia (now Nisibis). It takes its rise, together with the Khabur and one or two other streams, in the M. Masius (now Kirja Baghlar). Its present name is the Hermas or Nahor-al-Husai. [V.]

MYLAE. — MYLA (Μυλαί; Euth. Melaian, Steph. B.; Mus. Dio; Melaio, Diod. ii. 164), a city on the N. coast of Sicily, about 30 miles from Cape Pelorus, and 20 from Tyr- durias, though as it is about 20 miles from each of these points. (Strab. vi. p. 266.) It was situated on the narrow neck or isthmus of a projecting peninular headland, about 5 miles in length, the furthest point of which is only about 15 miles from the island of Hiera or Vulcano, the nearest to Sicily of the Lopoly islands. Mylae was undoubtedly a Greek colony founded by the Zancleans, and appears to have long continued subject to, or dependent on its parent city of Zancle. (Strab. vi. p. 272; Scym. Ch. 288.) Hence Thucydides speaks of Himera as in his time the only Greek city on the N. coast of the island, omitting Mylae, because it was not an independent city or state. (Thuc. vi. 62.) The period of its foundation is wholly uncertain. Siegfried would identify the Greek city with the ancient Mylae of Poly- bius, the foundation of which that author assigns to a period as early as n. c. 716, but the identification is very questionable. (Euseb. Chron. ad Ol. 161; Siegfried, Zymbae-Mysaeas, p. 4.) It is certain, however, that it was founded before Himera, n. c. 648, as, according to Strabo, the Zancleans at Mylae took part in the colonisation of the latter city. (Strab. vi. p. 279.) Mylae, however, does not appear to have ever risen to any great importance; and after the revolution which changed the name of Zancle to that of Messana, still continued in the same dependent relation to it as before. It was, however, a strong fortress, with a good port; and these advantages which it derived from its natural situation, rendered it a place of importance to the Messanians as securing their communications with the N. coast of the island. Scylax speaks of it as a Greek city and port (Scyl. p. 4. § 13), and its castle or fortress is mentioned by several ancient writers. The earliest historical notice of the city is found in n. c. 427, when the Athenian fleet under Laches which was stationed at Rhegium, made an attack upon Mylae. The city was seized and razed to the ground; but it was a strong garrison, was compelled to surrender to the Athenians and their allies, who thereupon marched against Messana itself. (Thuc. iii. 90; Dio- xii. 54.) After the destruction of Messana by the Carthaginian general Himilcon, Mylae appears to have for a time shaken off its dependence; and in n. c. 394, the Rhegians, becoming alarmed at the restoration of Messana by Dionysius, which they regarded as directed against themselves, proceeded to establish at Mylae the exiles from Naxos and Catana, with a view to create a countercheck to the rising power of Messana. The scheme, however, failed of effect; the Rhegians were defeated and the Messanians recovered possession of Mylae. (Diod. xiv. 87.) That city is again noticed during the war of Timoleon, in Sicily; and in n. c. 315 it was wrested by Agathocles, from the Messanians, though he was soon after compelled to restore it to them. (Id. xix. 65; Plut. Timol. 37.) It was in the immediate neighbourhood of Mylae also (νυν Μυλαι ἡ υπότη) that the forces of the Mamertines were defeated in a great battle, by Hieron of Syra- cuse, n. c. 270 (Poly. i. 9; Diod. xxi. 13); though
Mylaea. The river Longanus, on the banks of which the action was fought, cannot be identified with certainty. [LONGANUS] It is probable that, even after the Roman conquest of Sicily, Mylae continued to be a dependency of Messana, as long as that city enjoyed its privileged condition as a "fodera civitas;" hence no mention is found of its name in the Verrine orations of Cicero; but in the time of Pliny it had acquired the ordinary municipal privileges of the Sicilian towns. (Plin. iii. 8. s. 14; Varr. ii. 4. § 2.) It never, however, seems to have been a place of importance, and was at this period wholly eclipsed by the neighbouring colony of Tyndaris. But the strength of its position as a fortress caused it in the middle ages to be an object of attention to the Norman kings of Sicily, as well as to the emperor Frederic II; and though now much neglected, it is still a military position of importance. The modern city of Milazzo is a tolerably flourishing place, with about 900 inhabitants; it is built for the most part on a low sandy neck of land, connecting the peninsula, which is bold and rocky, with the mainland. But the old town, which probably occupied the same site with the ancient city, stood on a rocky hill, forming the first rise of the rocky ridge that constitutes the peninsula or headland of Milazzo. A hill of higher elevation, commanding both the upper and lower town, is probably the site of the ancient Acropolis. (Thuc. iii. 90; Smyth's Sicily, pp. 103, 104; Howse's *Classical Tour*, vol. ii. p. 215.)

The promontory of Mylae, stretching out abruptly into the sea, forms the western boundary of a bay of considerable extent, affording excellent anchorage. The bay was the scene of two great naval actions. The first of these was the victory obtained by the Roman fleet under C. Duilius, over that of the Carthaginians in the First Punic War, n. c. 260, in which the Roman consul, by means of the engines called Corvi (then used for the first time), totally defeated the enemy's fleet and drove it into the bay of Mylae. After their defeat they took refuge at the mouths of the numerous small rivers, or rather mountain torrents, which here descend into the sea. After this battle, Agrippa made himself master of Mylae as well as Tyndaris; and some time afterwards again defeated the fleet of Pompeius in a second and more decisive action, between Mylae and a place called Naxouchos. The latter name is otherwise unknown, but it seems to have been situated somewhere in the neighbourhood of Cape Rasculum, the Phaleraean promontory of Potency. (Appian, *B. C.* v. 195—109, 115—123; Dion Cass. xlix. 2—11; Vell. Pat. ii. 79; Suet. Aug. 18.)

In the account of this campaign Appian speaks of a small town named Aretumium, which is noticed also by Dion Cassius, and must have been situated on a hill near the town of Mylae, but is not mentioned by any of the geographers. (Appian, *B. C.* 116; Dorn Cass. xlix. 8.) It is, however, obviously the same place alluded to by Silius Italicus as the "sedes Facelinia Diana." (Sil. Ital. xiv. 260), and called by Lucullus, in a fragment of his satires, "Facelina templo Diana." (Lucil. Sat. iii. 13.)
MYOYUS.

MYONUS.

MYDUS. (Μύδος; Eth. Μύδος), a Dorian colony of Troezen, on the coast of Caria, situated on the northernmost of the three Doric peninsulae, a few miles to the northwest of Halicarnassus. It was protected by strong walls, and had a good harbour. (Paus ii. 28. 3; Steph. Byz. s. v.; Arrian, Anab. i. 20. ii. 5.) But otherwise the place is not of much importance in ancient history. Both Pliny (v. 29) and Stephanus Byz. (s. v.) mention Pala-myndus as a place close by Mydon; and this Pala-myndus seems to have been the ancient place of the Carians which became deserted after the establishment of the Athenian colony. (Strab. xvi. 2. 1; p. 611.) Melas (1. 16) and Pliny (L.c.) also speak of a place called Neapolis in the same peninsula; and as no other authors mention such a place in that part of the country, it has been supposed that Mydon (the Dorian colony) and Neapolis were the same place. But it ought to be remembered that Pliny mentions both Mydonus and Neapolis as two different towns. Mydian ships are mentioned in the expedition of Anaxagoras against Naxos. (Herod. v. 33.) At a later time, when Alexander besieged Halicarnassus, he was anxious first to make himself master of Mydonus before he attacked Caria. To take it by surprise, the Myidian seamen, with the aid of reinforcement from Halicarnassus repulsed him with some loss. (Arrian, L. c.; comp. Hecat. Proseum. 229; Polb. xvi. 15, 31; Strab. p. 38; Ptol. v. 2. § 9; Liv. xxxvii. 15; Hierod. p. 687.) Atheneaus (I. 32) states that the wine grown in the district of Mydus was good for digestion. It is generally believed that Mentiona or Mentiona marks the site of Mydonus; but Col. Leake (Asia Minor, p. 228) identifies Mydonus with the small sheltered port of Guntishk, where Captain Beaufort remarked the remains of an ancient pier at the entrance of the port, and some ruins at the head of the bay. (Comp. Rasehe, Lez. Num. iii. 1. p. 1072. &c.; Eckel, Docet. Num. vi. 1. p. 148.)

Potemky (v. 2. § 30) mentions a small island called Mydonus in the Icarian Sea.

[1. S.]

COIN OF MYDONUS.

MYONIA or MYON (Μυωνία; Paus. ; Min. Steph. B. Eth. Muonioe, Paus. Thuc.). A town of the Locri Oenotae, situated on the most difficult of the passes leading from Aetolia into Locris. (Thuc. iii. 101.) Pausanius describes it as a small town (πομήνα) situated upon a hill 30 stadia from Amphissa inland, containing a grove and an altar of the gods called Megillh, and above the town a temple of Poseidon. (Paus. xii. 58. § 3, comp. vi. 19. § 4.) Leake (N. G. Greece, vol. ii. p. 585) places Myonia in the mountains towards the north of Magnesia, and states that it was a thriving place in the Roman period.

MYONIA or Myon (Μυωνία; Paus. ; Min. Steph. B. Eth. Muonioe, Paus. Thuc.). A town of the Locri Oenotae, situated on the most difficult of the passes leading from Aetolia into Locris. (Thuc. iii. 101.) Pausanius describes it as a small town (πομήνα) situated upon a hill 30 stadia from Amphissa inland, containing a grove and an altar of the gods called Megillh, and above the town a temple of Poseidon. (Paus. xii. 58. § 3, comp. vi. 19. § 4.) Leake (N. G. Greece, vol. ii. p. 585) places Myonia in the mountains towards the north of Magnesia, and states that it was a thriving place in the Roman period.
MYONEUS.

The rocks of Myoneus are now called Hypseli-

boumoss.

Pliny (H. N. v. 37) mentions a small island of
the name of Myoneus near Ephesus, which, together
with two others, Athisinae and Diartheusae, formed
a group called Pisistrati Insulae.

[LS.]

MYONEUS (Modernos: Eth. Moonevouos),
as a small island lying off the coast of Phthiotis in
Thessaly, in the bay between Larissa Crenaste and
Antrim. (Strab. iv. p. 455; Steph. B. l. c.)

The Greek name shows some similarity to that of
Hormos, built for the use of travellers; and wells were
found in later times for the collection of rain water;
although the supply of the latter must have been scanty and precarious, since rain in
that latitude seldom falls.

The prosperity of Myos-Hormos as an emporium,
however, seems to have been fluctuating, and it was
finally supplanted as a depot at least by Berenice,
which, being lower down the Red Sea, was yet more
convenient for the southern trade. That it was fluct-
uating may be inferred from the mention of it by the
geographers. Agatharchides, who composed his work
in the reign of Philometer (s. c. 180-145), in his
account of the Indian trade, makes no mention of
Berenice. Diodorus, who wrote in the age of Augustus,
Speaks of Myos Hormos, in the reign of Augustus.
Strabo, who was nearly contemporary with Diodorus,
says that Berenice was merely a roadstead, where the
Indian vessels took in their cargo, but that they lay
in port at Myos-Hormos. Pliny, on the other hand,
in his description of the voyage to India does not
notice Myos-Hormos at all, and speaks of it inci-
didentally only in his account of the W. coast of the
Red Sea. Accordingly, in the reign of the patrons of
Greek and Roman enterprise, Myos-Hormos after the
time of the Emperor Trajan must have been on the decline.

There is one difficulty in the relations between
these harbours—the distance from each other.
According to the Periplus, Berenice was 1800 stadia,
or 225 miles, from Myos-Hormos, and even this is
under the mark, if Cape Ras-el-anf be the
Lepte Promontory of Pliny. It is evident that for foundering either city was the superior convenience of each, as compared with Arisinoi (Suez), for the
Indian trade, it seems strange that the ships should
have been kept at Myos-Hormos, but the ladings
taken in at Berenice. It is more reasonable to
suppose that the latter became the principal empor-
ium of the Indian traffic, and as that is the case in
importance, the port where it was principally carried
on became the more frequented and opulent place of
the two.

It is uncertain whether the ruins at the village of
Abuseebur represent the site of the ancient Myos-

Hormos. [W. B. D.]

MYRA (v. Μυρα or Μύρα : Eth. Μυραίos), one of
the most important towns of Lycia, situated on
the river Andracus, partly on a hill and partly on
the slope of it, at a distance of 20 stadia from the
sea. (Strab. xiv. p. 666; Steph. B. s. e.; Plin.
xxii. 8; Plut. v. 6. § 3, xiv. 17. § 23.) The small
town of Andricus formed its port. It is remarkable
in history as the place where the apostle Paul landed
(Acct. xxv. 5), and in later times the protecting
the place was recognised in the fact that the em-
peror Theodosius II. raised it to the rank of the
capital of all Lycia (Hieroc. p. 684.) The town
still exists, and bears its ancient name Myra, though
the Turks call it Dembre, and is remarkable for its
fine remains of antiquity. Leake (Asia Minor, p. 184) mentions the ruins of a theatre 355 feet in dia-

G O 2
MYRINUS. meter, several public buildings, and numerous inscribed sepulchres, some of which have inscriptions in the LYcian character. But the place and its splendid ruins have since been minutely described by Sir C. F. FELLOWS (Discov. fac. L., p. 196, &c.), and in Texier's work (Description de l'Asie Mineure), where the ruins are figured in 22 plates. The theatre at MYR, says Sir CHARLES, is among the largest and the best built in Asia Minor: much of its fine coridor and orniced prosenium remains. The number of tombs cut in the rock is not large, but they are generally very spacious, and consist of several chambers communicating with one another. Their external ornaments are enriched by sculptured statues in the rocks around; but they are mostly without inscriptions (see the plate of one in Sir C. F. FELLOWS'S Discov. facing p. 199, and numerous others in a plate facing p. 200). On the whole, the ruins of MYR, are among the most beautiful in Lycia. (Comp. Spratt and FORBES, Travels in Lycia, vol. i. p. 151, &c.)

MYRICUS (Μυρίκοι), Step. B., Μυρίκων, Tzet. Chil. iii. 96; E. Mυρίκων), a place belonging to the Edeni, on the left bank of the Smyrnon, which was selected by Hesistius of Miletus for his settlement. It offered great advantages to sea, as it contained an abundant supply of timber for shipbuilding, as well as silver mines. (Herod. vii. 23.) Aristarctaus retired to this place, and, soon after landing, perished before some Thracian town which he was besieging. (Herod. v. 126; Thuc. iv. 102.) Afterwards, it had fallen into the hands of the Edeni; but on the murder of Pittacus, chief of the people, it surrendered to Brasidas. (Thuc. iv. 102.) The position of MYRINUS was in the interior, to the N. of M. Pangaeus, not far from Ampipolis. (Leake, North. Greece, vol. iii. p. 181.)

MYRIANDRUS. [Iscus.] MYRICUS (Μυρίκοι), a town on the coast of Tray, "opposite," as Steph. Byz. (z. u.) says, "to Tenea and Lesbos," whence it is impossible to give its situation. It is not mentioned by any other writer. (L. S.)

MYRNA (Μυρίνα : Eth. Mυρίνας), one of the Aeolian cities on the western coast of Myrina, about 40 stadia to the south-west of Gryneum. (Herod. i. 149.) It is said to have been founded by one MYRINUS before the other Aeolian cities (Meta. i. 18), or by the Amazon MYRINUS (Strab. xi. p. 505, xii. p. 573, xiii. p. 623; DIOD. iii. 54). Artaxerxes gave Gryneum and MYRINUS to GONGYLOS, an Eretrian, who had been banished from his native City for favouring the interests of Persia. (Xenoph. Hellen. iii. 1. § 4.)

MYRNA was a very strong place (Liv. xxxii. 30), though not very large, and had a good harbour. (Strab. viii. p. 36; AGATH. Priv. p. 256 ed. ROM.) PIRYX (v. 32) mentions that it bore the surname of Sebastopolis; while, according to Syncellus, it was also called Smyrna. For some time MYRINUS was occupied by Philip of Macedon; but the Romans compelled him to evacuate it, and declared the place free. (Liv. i. 5; Polyb. xviii. 27.) It was twice visited by POSTUMUS, the first time in the reign of Tiberius (Ann. A. D. 47), on which occasion it received a remission of duties on account of the loss it had sustained; and a second time in the reign of Trajan (Oros. vii. 12). The town was restored each time, and continued to exist until a late period. (Steph. Byz. x. v. Ptol. v. 2. § 6; APOLLON. Rhod. i. 604: Hieroc. p. 661; Geogr. Rav. v. 9, where it is called Myrrina, while in the Pent. Tab. it bears the name Marina.) Its site is believed to be occupied by the modern Sandalik. [L. S.]

MYRNA. [LEMNOS.]

MYRNA. [MYCENAE, No. 1.]

MYRLEA. [APAMEA, No. 4.]

MYRECIUM (Μυρηκίου), PONT. xi. p. 494; POMP. Mela, ii. 1. § 3; Plin. v. 26; ANON. Peripl. p. 4; Steph. B. J. J. 5., a Milesian colony on the Cimmerian Bosporus, 20 stadia N. of Pancratapaeum. (Strab. vii. 310.) Near the town was a promontory of the same name. (Ptol. iii. 6. § 4; Leo Dia. ix. 6.) It is the modern FESIKAL or JENIKA, where many ancient remains have been found. (CLARK,Resume, vol. ii. pp. 98, 102; Dubuis de Montreux, Voyages auComose, vol. v. p. 231.)

MYREMEX (Μυρημέξ, Ptol. iv. 4. § 15), an island off the coast of Cymeia, which is identified with the ARIOSA (Ariydes) of HECASAEUS (Fr. 300), where the chart is shown in a sheet, between Polemon and Muryxus. [E. B. J.]

MYRINDONES [ARGIVA.]

MYRHRINUS. [ATTICA, p. 332, No. 95.]

MYRISINUS. [MYRTINTION.]

MYRTILIS, surrounded JULIA (Isula Muryfilm, Ptol. ii. 5. § 5), a town of the Turdetani in Lusitania, on the Anas, which had the Jus Latii; now MORTOLA (Ptol. iv. 21. s. 35; Mela, iii. 1; It. MURTO, p. 11; M. M. S. p. 8; MUNN. S. p. 8; FLO. ESPE. Ouv. xi. 208, 238; FORB. p. 36.)

MYRTIUM or MYRTENUM (Μυρτιόν, Murytno), a place in THRACE mentioned by DEMOSTHENES along with Serrihum, but otherwise unknown (de Cor. p. 334. 3; STEPH. B. v. 3; ARGAEU MARE.]

MYRTON MARE. [ARGAEU MARE.]

MYRTINTION (Μυρτίντιον), called MYRINTINUS (Μυριντιόν) by Homer, who mentions it among the towns of the Epeii. It was a town of ELIS, and is described by Strabo as situated on the road from the city of ELIS to Dyne in Achalia, at the distance of 70 stadia from the former place and near the sea. Leake remarks that the last part of the description must be incorrect, since no part of the road from ELIS to Dyne could have passed by the sea; but CURTIS observes that MYRTINTION would at one time have been near the sea-coast, supposing that the lagoon of KOTZI was originally a gulf of the sea. The ruins near KABLITZOS probably represent this place. (Hom. Ill. 516; Strab. viii. p. 341; STEPH. B. v. 3; MURTIOS; Leake, Morea, vol. ii. p. 169; BOBY. S. E. S. p. 120; CURTIS, Peloponnese, vol. ii. p. 36.)

MYSARI (Μυσάρι: Eth. Muysaros, Myusan), the name
of a province in the north-west of Asia Minor, which according to Strabo (xii. p. 572) was derived from the many bee-ch trees which grew about Mount Olympus. Some of the beeches were called by the Lydians korynt. Others more plainly connect the name with the Celtic moose, a marsh or swamp, according to which Mycia would signify a marshy country. This supposition is supported by the notion prevalent among the ancients that the Mycians had immigrated into Asia Minor from the marshy countries about the Lower Issus; but the lower Issus, which the Mycians would be only dialectic varieties of the same name. Hence, also, the Mycians are sometimes mentioned with the distinctive attribute of the "Aeolic," to distinguish them from the European Mycians, or Moesians. (Enstath. ad Dion. Per. 309; Schol. ad Apollon. Rhod. i. 1115.)

The Asiatic province of Mycia was bounded in the north by the Propontis and the Hellespont, in the west by the Aegean, and in the south by Mount Taurus and Lydia. In the east the limits are not accurately defined by the ancients, though it was bounded by Bithynia and Phrygia, and we may assume the river Rhynadus and Mount Olympus to have, on the whole, formed the boundary line. (Strab. xii. p. 570.) The southern boundary of the country bearing the name of Mycia, was divided into five parts: — 1. MYCIA MINOR (Μυκία ἡ μικρὰ), that is, the northern coast-district on the Hellespont and Propontis, as far as Mount Olympus; it also bore the name of Mycia Hellespontica, or simply Hellespontus, and its inhabitants were called Hellespontii (Ptol. v. 17. § 11; Strab. xii. p. 570). 2. MYCIA MAJOR (Μυκία ἡ μεγάλη), forming the southern part of the interior of the country, including a tract of country extending between Troad and Aeolis as far as the bay of Adrianopoli. The principal city of this part was Pergamum, from which the country is also called Mycia Pergamene (Μυκία ἡ Περγαμηνή; Strab. l.c.; Ptol. v. 2. §§ 5, 14). 3. THYATRIA (Θύατρια), the territory of ancient Troy, that is, the northern part of the western coast, from Sigium to the bay of Adschoy. 4. ACHAIA (Ἀχαΐα), the western coast, especially that between the rivers Calius and Hermus. 5. TETHRYCHIA (Τὴθρυκχία), or the district on the southern frontier, where in ancient times Teuthras is said to have formed a Mycian kingdom. (Strab. xii. p. 551.)

These names and divisions, however, were not the same at all times. Under the Persian dominion, when Mycia formed a part of the second satrapy (Herod. iii. 90), the name Mycia was applied only to the north-eastern part of the country, that is, to Mycia Minor; while the western part of the coast of the Hellespont bore the name of Lesser Phrygia, and the district to the south of the latter that of Tross. (Scylax, p. 33.) In the latter times of the Roman Empire, that is, under the Christian emperors, the greater part of Mycia was contained in the province bearing the name of Hellespontus, while the southern districts as far as Tross belonged to the province of Asia. (Herod. p. 658.)

The greater part of Mycia is a mountainous country, being traversed by the north-western branches of Mount Taurus, which gradually slope down towards the Aegean, the main branches being Mount IDA and Mount TMTUS. The country is also rich in rivers, though most of them are small, and not navigable; but, notwithstanding its abundant supply of water in rivers and lakes, the country was in ancient times less productive than other provinces of Asia Minor, and many parts of it were covered with marshes and forests. Besides the ordinary products of Asia Minor, and the excellent wheat of Asenes (Strab. xv. p. 725), Mycia was celebrated for a kind of stone called lapis assius (σκυλακοπήρ), which the ancients supposed to have been formed by the human body, whence it was used for coffins (σαρκοφάγοι), and partly powdered and strewn over dead bodies. (Dioscorid. v. 141; Plin. ii. 98, xxxvi. 27; Steph. B. s. v. "Aeser.") Near the coast of the Hellespont there were excellent oyster beds. (Plin. xxxii. 21; Catoct. xvii. 4; Virg. Geor. l. 207; Lucan, ix. 959; comp. Theophrast. Hist. Plant. i. 6. 18.)

The country of Mycia was inhabited by several tribes, as Phrygians, Trojans, Aeolians, and Mycians; but we must here confine ourselves to the Mycians, from whom the country derived its name. Mycians are mentioned in the Iliad (ii. 838, x. 430, xii. 3), and seem to be conceived by the poet as dwelling in the neighbourhood of Troy (Herod. i. 17). It is possible that the tribe formed a Greek colonisation, and spoke a language akin to theirs. Strabo (vii. pp. 295, 303, xii. pp. 542, 564, &c.) regards them as a tribe that had immigrated into Asia from Europe. It is difficult to see how these two statements are to be reconciled, or to decide which of them is more entitled to belief. As no traces of the Mycian language have come down to us, we cannot pronounce a positive opinion, though the evidence so far as it can be gathered, seems to be in favour of Strabo's view, especially if we bear in mind the alleged identity of Moesians and Mycians. It is, moreover, not quite certain as to whether the Mycians in Homer are to be conceived as Asiacs or as Europeans. If this view be correct, the Mycians must have crossed the Hellespont at some period before the Trojan War, and must have come from Greece, and have been joined soon after the Trojan War. Being afterwards pressed by other immigrants, they advanced farther into the country, extending in the south-west as far as Persia, and in the east as far as the Caiaca and Upper Asia. About the time of the Aeolian migration, they founded, under Teuthras, the kingdom of Teuthria, which was soon destroyed, but gave the district in which it had existed its permanent name. The people which most pressed upon them in the north and east seem to have been the Bithynians.

In regard to their history, the Mycians shared the fate of all the nations in the west of Asia Minor. In b.c. 190, when Antiochus was driven from Western Asia, they became incorporated with the kingdom of Persia and of Media. After having been defeated by the Romans, they were carried over to Rome, they formed a part of the province of Asia. Respecting their national character and institutions we possess scarcely any information; but if we may apply to them that which Pausanias (in Strab. vii. p. 296) states of the European Moesians, they were a pious and peaceable nomadic people, who lived in a very simple manner on the produce of their flocks, and had not made great advances in...
civilisation. Their language was, according to Strabo (xii. p. 572), a mixture of Lydian and Phrygian, that is, perhaps, a dialect akin to both of them. Their comparatively low state of civilisation seems also to be indicated by the armour attributed to them by Herodotus (vii. 74), which consisted of a common helmet, a small shield, and a javelin, the point of which was hardened by fire. At a later time, the infancy of the Greeks by which they were surrounded seems to have done away with everything that was peculiar to them as a nation, and to have drawn them into the sphere of Greek civilisation. (Comp. Forbiger, *Handbuch der alten Geographie*, vol. ii. p. 110, &c.; Cramer, *Asia Minor*, i. p. 30, &c.; Niebuhr, *Lect. on Anc. Hist.* vol. i. p. 83, &c.)

[S. L.]

MYSIUS (Μυσίους), a tributary of the Caicus, on the frontiers of Mysia, having its sources on Mount Tennes, and joining the Caicus in the neighbourhood of Pergamum. (Strab. xiii. p. 616.) According to Ovid (*Met.* xxv. 277) Mysiis was only another name for Caicus, whence some have inferred that the upper part of the Caicus was actually called Mysia. In general Mysiis is believed to be the same as the modern *Borgama*.

[S. L.]

MYSOCARAS (Μυσοκάρας, Plut. iv. i. § 3), a harbour on the W. coast of Mauretania, near the Phuth, probably the same as the *Caricus Murus* (Καρίκεως τάκερας) of Hanno (p. 3, ed. Hudson; comp. Ephor. ap. Steph. B. s. e.), now Agbou, near the Wadi Tamia, where Renou's map of *Marocco* indicates it. (Græc. Hist. vol. i. p. 4, n. 4, Müller, Paris, 1855.)

[S. E. J.]

MYSOCARUS (Μυσοκάρος), a tribe of the Mysienses, probably occupying the district about the sources of the small river Mysia. (Plut. v. 2. § 15; Plin. v. 31.) In the time of the Romans this tribe belonged to the conventus of Ephesus; but further particulars are not given of them.

[S. L.]

MYSTIA (Μυστία; *Eth. Mystiōn; Monastercis*), a town of Bruttium, which seems to have been situated on the E. coast of that province, between Scylacium and the Zephyrian promontory, apparently not far from Cape Cocinthus (Cape di Sisto). (Mela, ii. 4, § 6; Plin. x. 16, s. 15.) Stephanus of Byzantium and Philistus call it a city of the Samnites, by which he must evidently mean their Lucanian or Bruttian descendants. (Steph. B. s. e.) Its position cannot be more exactly determined, but it is placed conjecturally at Monasteraces, near the Cape di Sisto. (Cluver. Ital. p. 1005; Romanelli, vol. i. p. 175.)

[S. E. B.]

MYTHOPOLIS (Μύθωπολις, Μυθόπολις), a town of Bithynia, of uncertain site, though it was probably situated on the north-west side of the Lucus Ascania. It is said that during the winter all the artificial wells of the place were completely drained of water, but that in summer they became filled again to the brim. (Aristot. *M. A. R. V.* 55; Anth. Pal. 186.) Stephanus of Byz. (s. v. *Pythopolis*) and Pliny (v. 45) mention a town of the name of Pythopolis in Mysia, which may possibly be the same as Mythopolis.

[S. L.]

MYTYLENE (Μητύληνη, Μήτυληνη; *Eth. Metilēnios* or *Metilēnios*), the most important city in the island of Lesbos. There is some uncertainty about the orthography of the name. Coins are unanimous in favour of *Metilēnē*. Inscriptions vary. Greek manuscripts have generally *Metilēnē*, but not universally, *Metilēnē*. Latin manuscripts have generally Mytilene; but Vellius Paterculus, Pomponius Mela, and sometimes Pliny, have Mytilene. In some cases we find the Latin plural form *Mitiennae*. (Suet. Caes. 2, Tit. 10; Liv. Epit. 89.) Tacitus has the adjective *Mytileneus* (*Ann.* xiv. 63). It is generally agreed now that the word ought to be written Mytilene; but it does not seem necessary to alter those passages where the evidence of MSS. corresponds in one way, and in another way. A full discussion of this subject may be seen in Plein (*Lesbienorum Liber*). The modern city is called *Mytiglia*, and sometimes *Castro*.

The chief interest of the history of Lesbos is concentrated in Mytilene. Its eminence is evident from its long series of coins, not only in the autonomous period, when they often bore the legend *ΣΗΡΟΣ ΑΡΧΟΝΤΟΣ ΜΥΤΙΛΗΝΗ*, but in the imperial period down to the reign of Gallienus. Lesbos, from the earliest to the latest times, has been the most distinguished city of the island, whether we consider the history of poetry or politics, or the annals of naval warfare and commercial enterprises.

One reason of the continued pre-eminence of Mytilene is to be found in this situation, which is in common with that of *Methymna* was favourable to the coasting trade. Its harbours, too, appear to have been excellent. Originally it was built upon a small island; and thus (whether the small island was united to the main island by a causeway or not) two harbours were formed, one on the north and the other on the south. The former of these was the finer for the ships of war, and was afterwards being closed, and of containing fifty triremes, the latter was the mercantile harbour, and was larger and deeper, and defended by a mole. (Strab. xiii. p. 617; *Paus.* viii. 50.) The best elucidation of its situation in reference to the sea will be found in the narratives contained in the 3rd book of Thucydides and the 1st book of Xenophon's *Hell. Hist.*

The northern harbour seems to have been called *Makane* (Μάκας). This harmonises with what we find in Thucydides, and with what Aristotle says concerning the action of the AE. wind (*καστίας*) on Mytilene. The statements of Xenophon are far from clear, unless, with Mr. Grote (*Hist. of Greece*, vol. iii. p. 290), we suppose the *Euryphas* of Mytilene to be the sea-gulf mentioned in the article *Lesbos*, under the name of *Portus Hieraenus*, which runs up into the interior of the island, to the very neighbourhood of Mytilene. A rude plan is given by Tournefort; but for accurate information the English Admiralty charts must be consulted. The beauty of the ancient city, and the strength of its fortifications, are celebrated both by Greek and Roman writers. (See especially Cic. *Off. R.* ii. 16.) Plutarch mentions a theatre (*Pomp.* 42), and Athenaeus a Prytanium (*x.* p. 425). Vitruvius says (i. 6) that the winds were very troublesome in the harbour and in the streets, and that the changes of weather were injurious to health. The products of the soil near Mytilene do not seem to have been distinguished by any very remarkable peculiarities. Theophrastus and Pliny make mention of its mushroom rooms: Galen says that its wine was inferior to that of Methymna. In illustration of the appearance of Mytilene, as seen from the sea, we may refer to a view in Choiseul-Gouffier; and to another, which shows the fine forms of the mountains immediately behind, in Conway's *Cat. of Egyptian, Syrian, and Assyrian Antiquities in the Brit. Mus.* of *St. Paul.*
MYTILENE.

The first passage in which the history of Mytilene comes prominently into view is in the struggle between the Aeolians and Athenians for Sigeum (n.c. 605), at the N.W. corner of Asia Minor. The place and the time are both remarkable, as illustrating the early vigour with which Mytilene was exercising its maritime and political power. We find it already grasping considerable possessions on the mainland. It was in this conflict, too, that Pittacus, the sage and lawgiver of Mytilene, acted so noble a part, and that Alcaeus, her great poet, lost his shield. The mention of these two names reminds us that this time of rivalry with Athens coincides with the famous internal contests of the nobles and democrats in Mytilene. For the history and results of this struggle, see the lives of Alcaeus, Pittacus, and Sappho, in the Dict. of Biography.

It may be difficult to disentangle the history of the Mytileneans from that of the Aeolians in general, during the period of the Persian ascendancy on these coasts. But we have a proof of their merchant enterprise and the fact that they alone of the Aeolians took part in the building of the Hellenium at Naxos (Heron. ii. 178); and we find them taking a prominent part in the invasion of Egypt by Cambyses. (Ib. iii. 13, 14.) They supplied a contingent to Darites in his Scythian expedition (Ib. iv. 97). They were closely connected with the affairs of the Persians, and doubtless through such agents and are not separately mentioned, they were the best portion of those Aeolians who supplied sixty ships to Xerxes in his invasion of Greece. (Ib. vii. 95.)

The period of the Athenian supremacy and the Peloponnesian War is full of the fame of Mytilene. The alliance of its citizens with those of Athens began soon after the final repulse of Pericles; it held a very distinguished position among the allies which formed the Athenian confederacy; but their revolt from Athens in the fourth year of the Peloponnesian War brought upon them the most terrible ruin. Though the first dreadful decision of the Athenian assembly was overruled (Thucyd. iii. 36), the walls of Mytilene were pulled down, and her fleet given up; her city was taken, and her chief towns, though not separately mentioned, were the best portion of those who supplied sixty ships to Xerxes in his invasion of Greece. (Ib. vii. 95.)

Towards the close of the Peloponnesian War, Conon was defeated by Calliscritas off Mytilene, and blockaded in the harbour. (Xen. Hell. i. 6.) We pass now to the period of Alexander, with whose campaigns this city was conspicuously connected. The Lesbian made a treaty with Macedonia. Memnon reduced the other cities of the island; and his death, which inflicted the last blow on the Persian power in the Aegean, took place in the moment of victory against Mytilene. It was retaken by Hegesileucus, in the course of his general reduction of the islands, and received a large accession of territory. To Mytileneans, Laomedon and Eryxius, the sons of Larichus, were distinguished members of Alexander's staff. The latter fell in action against the Bactrians; the former was governor of Syria even after Alexander's death.

The first experience of the Roman power in the Aegean was diastrous to Mytilene. Having espoused the cause of Mithridates, and being kept cut to the last, it was sacked by M. Thermus, on which occasion J. Caesar honourably distinguished himself. Pompey's friendship with Thales led to the recognition of Mytilene as a free city. (Plin. v. 31.) After the defeat of Pharsalia, Pompey touched there for the last time to take Cornelius on board. His son Sextus met with a friendly reception there, after his defeat at sea, by Agrippa. (Dion. Cass. xlix. 17; App. B. C. v. 133.) Agrippa himself resided there for some time in retirement, ostensibly on account of his health, but really through mortification caused by the power he had lost. (Tac. Ann. v. 53; Suet. Aug. 66, Tit. 10); and this residence is commemorated by an inscription still extant. (See Pococke.) The last event which we need mention in the imperial period is the crossing over of Germanicus with Agrippina from Euboea to Lesbos, and the birth of Julia. (Tac. Ann. ii. 54.) This event, also, was commemorated by coins and inscriptions. (See Eckel and Pococke.) It appears that the privilege of freedom was taken away by Vespasian, but restored by Hadrian. (Plehn, Lesbic. p. 83.)

Mytilene is one of the few cities of the Aegean, which have continued without interruption to flourish till the present day. In the course of the middle ages it gradually gave its name to the whole island. Thus, in the Synodecanus of Hierocles, Μύτιλη and Μύθιλη are both mentioned under the Province of the Islands; but in the later Byzantine division, Mytilene is spoken of as an island, like Lemnos and Chios, in the Theme of the Aegean Sea. (Const. Porphyrog. de Thes. i. pp. 42, 43, ed. Bonn.) The fortunes of the island are best seen in the history of the Mahomedans in the Levant, and during the ascendancy of the Venetians at a later period, are noticed in Finlay's History of the Byzantine and Greek Empires, vol. ii. pp. 72, 171, 223. The island of Lesbos was not actually part of the Mahomedan empire till nearly ten years after the fall of Constantinople. With the exception of the early struggles of the time of Alcaeus and Pittacus, there is little to be said of the internal constitutional history of Mytilene. It shared, with all Greek cities, the results of the struggles of the oligarchical and democratic parties. We find a commonality (Εὔδομα) and a council (Δῆμοι) mentioned on coins of the period of Alexander; and the title of Mahommedan tribe from 1900 to 1905; the other making a singular provision for the punishment of faithlessness in tributary allies, by depriving them of the privilege of educating their children. (Aelian, Vor. Hist. vii. 15.)

[J. S. H.]

MYTISTRATUS (Μύτιστρατος, Steph. B., Diod.; Μύτιστρατος, Zonar.; τὸ Μύτιστρατος, Pol.: Eth. Mutustratinus, Plin.), a town in the interior of Sicily, the position of which is wholly uncertain.

COIN OF MYTILENE.
tain. It was probably but a small town, though strongly fortified, whereas Philistia (op. Steph. B. a. e.) called it "a fortress of Sicily." It is conspicuously mentioned during the First Punic War, when it was in the hands of the Carthaginians, and was besieged by the Romans, but for some time without success, on account of the great strength of its position; it was at length taken by the consul A. Atilius Calatinus in B.C. 258. The inhabitants were pushed forward to the north, and to the Navea, and the town itself entirely destroyed. (Pol. i. 24; Diod. xxiii. 9, Exc. Hossack. p. 505; Zonar. vii.) It was, however, again inhabited at a later period, as we find the Mutustratini mentioned by Pliny among the municipal towns of the interior of Sicily. (Plin. iii. 8. s. 14.) But no notice of its name occurs in the internal, and Cluverius (who has been followed by many modern geographers) would, therefore, identify Mystrataus with Amestratus; an assumption for which there are certainly no sufficient grounds, both names being perfectly well attested. [AMESTRATAUS.] (Cluver. Sicil. p. 383.) [E. H. B.]

MYUS (Móvos: Μιδιτορές), an Ionian town in Caria, on an eastern fork of the river, at a distance of 30 stadia from the mouth of that river. Its foundation was ascribed to Cydresus, a natural son of Codrus. (Strab. xiv. p. 633.) It was the smallest among the twelve Ionian cities, and in the days of Strabo (xiv. p. 636) the population was so reduced that they did not form a political community, but became incorporated with Miletus, whither they emigrated and thus surrendered their own town altogether. This last event happened, according to Pausanius (vi. 2. § 7), on account of the great number of slaves which annoyed the inhabitants; but it was more probably on account of the frequent inundations to which the place was exposed. (Vitr. iv. 1.) Myus was one of the three towns given to the Corinthians by the Persian king (Thucyd. i. 136; Diod. Sic. xi. 57; Pint. Them. 29; Athen. i. p. 39; Nep. Them. 10.) During the Peloponnesian War the Athenians experienced a check near this place from the Carians. (Thucyd. iii. 19.) Philip of Macedonia, who had obtained possession of Myus, ceded it to the Magnesians. Athen. iii. p. 78.) The only edifice remains of Myus is the temple of Dionysus, built of white marble. (Paus. L.) The immense quantity of deposits carried down by the Maeander have considerably removed the coast-line, so that even in Strabo's time the distance between Myus and the sea was increased to 40 stadia (xiv. p. 579), while originally the town had no doubt been built on the coast itself. There still are some ruins of Myus, which most travellers, forgetting the changes wrought by the Maeander, have mistaken for those of Miletus, while those of Heraclea have been mistaken for those of Myus. (Comp. Leake, Asia Minor, p. 239, etc.) The mistake is repeated by Sir C. Fellow (Journal of a Tour in Asia Min. p. 263), though it had been pointed out long before his time. [L. S.]

NAARADA (Nádhora, Potl. v. 18. § 7; Steph. B. a. e.; Nédora, Joseph. Ant. a. 111. § 12), a small place in Mesopotamia near Siniphta. It is probably of the same name as that called in the Peutinger Table Naharra. Josephus speaks (I. c.) of Néara as a place in Nabataea, possessing an extensive range of territory and defended from hostile attack by the Emphites which flows round it. When Tiberius overthrew the Jews in the East, the remnant of that people took refuge in Naarda and Nisibis; and the former city long remained a place of refuge for the Jews. In the immediate records of the Christian East we find occasional notices of this place, under the titles of Nabarde and Beth-Nudhara. Thus, in the mid. 6th century, according to a MS. of the Assem. Bibl. Orient. iii. p. 364); in a. D. 755, Jonas is bishop of Beth-Nudhara (Assem. ii. p. 111); and as late as a. D. 1285, another person is recorded as "Episcopus Nuhadrensis." (Assem. ii. p. 249.) During all this period Naarda is included within the episcopal province of Mousil. Lastly, in the Travels of Benjamin of Tudela, which took place towards the end of the 12th century, the traveller mentions going to "Juba, which is Pumbeditha, in Nethodes, containing about two thousand Jews," (P. 92, Ascher's edit.); from which it appears that, at that period, Naarda was considered to comprehend a district with other towns in it. Pumbeditha and Surra were two other Nabatene towns situated on the route to another, at no great distance from Baghdad. [V.]

NAARMALCHA. [BABYLONIA, Vol. l. p. 362.] a. e.]

NABAUEUS (Naboras, Potl. ii. 3. § 1), a river in the extreme north of Britannia Barbara or Caledonia, probably the Narvan river, east of C. Wreath.

NABALIA, in the text of Tacitus (Hist. v. 26), is a river in the north of Britain, the headwaters of which, however, there was a bridge. During the war between Civilis and the Romans, there was a conference between Civilis and Cerialis on this bridge, which had been cut away for safety's sake, each party at the conference keeping on his own side of the river. It is uncertain if the name Nabalia is right; the site of the bridge is not known. It must, however, be some stream about the lower part of the Rhine; and Walckenaer (Geog. f. c. vo. i. p. 296) conjectures that it is the Tassel or eastern branch of the Rhine which flows into the Zeyder Zee. Potlermy (ii. 11. § 28) has a place Navaia (Nauaia) in Great Germania, the position of which, if we can trust the numbers, is on or near the north coast of the Rhine. Another branch of the Rhine or eastern branch may be. [O. L.]

NABATAEI (Nabatoroi, 'Avaratvoi, Potl. vi. 7. § 21; Nabatros, Suid. a. e.; Nabaratovoi, LXX; Nabateth, Sen. Herc. Oct. 160: the country, Nabatros, Strab.; Nabatplos, Joseph.), a numerous and important people of Arabia Petraea, celebrated in the classical geographers. Josephus describes the country as comprehending all from the Euphrates to the Red Sea, i.e. the whole of the northern part of the Arabian peninsula; and inhabited by the descendants of the 12 sons of Iahmael, from the eldest of whom, Nabatian, this territory is supposed to have derived its name. This is confirmed by the authority of S. Jerome, three centuries later, who writes, "Nabathoe omnia regit a Euphrate usque ad Mare Rubrum Nabatheos usque bodie dictur, quae pars Arabiae est." (Joseph. Ant. i. 13. § 4; Hieron. Comment. in Genes. xxv. 13.) The only allusion to this people in the canonical Scriptures, supposing them identical, is by their patriarchal designation; and the mention of the "rama of Nebatthe," in connection with the "rama of Nebaioth" (Gen. xi. 20), intimates that they existed as a distinct pastoral tribe. But they occur frequently in history after
NABATAEL was glad to withdraw his army on receiving such gifts as were most esteemed among them. (Diod. xix. 44—48, comp. ii. 48.) In the geographical section of his work the author places them on the Laiantis Sinus, a bay of the Aelianic gulf, and describes them as possessing many villages, both on the coast and in the interior. Their territory was most populous, and incredibly rich in cattle; but their national character had degenerated when he wrote (c. r. c. 8). They had formerly lived honestly, content with the means of livelihood which their flocks supplied; but from the time that the kings of Alexandria had rendered the gulf navigable for merchant vessels, they not only practised violence as wreckers, but made piratical attacks from their coasts on the merchants in the passage through the gulf, imitating in ferocity and lawlessness the Taurs in Pontus. Ships of war were sent against them, and the pirates were captured and punished. (Ib. iii. 42, comp. Strabo, xvi. p. 777.)

The decrease of their transport trade and profits, by the new channel opened through Egypt, was one of the real causes of this degeneracy. The trade, however, was not entirely diverted; later writers still mention Petra of the Nabataeans as the great entrepôt of the Arabian commerce (Arrian, Periplus, p. 11, ap. Hudson, vol. i.), both of the Gerrhaei of the west, and of the Mineae of the south of that peninsula. (Suidas, s. v.) The town was destroyed by Strabo agrees in its main features with the earlier record of Diodorus Siculus; and he records at length the deception practised on his friend Aelius Gallus by Sylla, the procurator (Agrippa) of the Nabataeans, under the king Obodas; a false friend of the Romans, through whose territory he first led them on leaving Lacedaemon, where they had landed. The policy of Sylla illustrates the remark of Strabo (xvi. p. 783), that the Nabataeans are prudent and acquisitive; so much so, that those who wasted their property were punished, and those who increased it rewarded by the state. They had few slaves among them; so they either waited on themselves, or practised mutual servitude in families, even in the more wealthy and worldly classes, which were much addicted to feasting, and their domestic manners marked considerable progress in luxury and refinement, from the rude simplicity of the primitive times described by the more ancient author (p. 783, seq.). He mentions that they were fire-worshippers, and sacrificed daily to the sun on their house-tops. Their government may be styled a limited monarchy, as the king was subject to be publicly called to account, and to have to defend himself before the people. Their cities were walled, and their country fruitful in every thing but the olive. The limits of their country are not clearly defined; Strabo places them above the Syrians, with the Sabaeis, in Arabia Felix (xvi. p. 778); but this must be a corruption of Aelius Gallus, consistent with his other notices of them. Thus he speaks of the promontory near Seal Island — the peninsula of Mount Sinai — as extending to Petra of the Arabs called Nabatae (p. 778), which he describes as situated in a desert region, particularly towards Judea, and only three or four days' journey from the Red Sea (p. 779), and thence to Egypt from the east, towards Phoenix and Judea, was difficult by way of Pelusium, but from Arabia Nabatae it was easy. All these and similar notices serve to show that, from the age of Antigonus to this period, the Nabataeans had in-
habited the land of Endom, commonly known as Idumaæa, and intimate that there was no connection whatever between the Idumaæans of Petra in the Augustine period, and the children of Esau; they were, in fact, Nabataeans, and therefore, according to Josephus and other ancient authorities, Idumaæite Arabs. Now when they had dispersed, e. g. the Edomites does not appear in history, nor what had become of the remnant of the Edomites. (Robinson, Bib. Res. tom. ii. pp. 558, 559.) But while Judas Maccabeus was on terms of friendship with the Nabataeans, he was carrying on a war of extermination against the Edomites. (Joseph. Ant. xii. 6 § 1; I Macc. v. 3.) It is worthy of remark, however, that the Nabataeans (Ant. xiv. 2 § 3, § 3 xvi. 4), whose alliance was refused by Pompey, on account of their inaptitude for war. And this identity is further proved by Strabo, who writes that the Idumaæans and Arabs (Asphaltenes) occupy the extreme west of the coast of Judæa: "— These Idumaæans are Nabataeans; but being expelled thence in a sedition, they withdrew to the Jews and embraced their customs." (xvi. p. 760.) This recognition of the Nabataean origin of the later Idumaæans, proves that the name is to be regarded as a geographical, rather than a genealogical designation. Pliny (v. 27) states that there was a light upon this subject, this being merely making the Nabataeans contiguous to the Sceletæ Arabs, with whom they were more probably identical, and stating that the ancients had placed the Thimæaeans next to them (i. e. on the E.). In the place of whom he names several other tribes, as the Tavunci, Suselleni, Arraceni, &c. (ibid.) But the statement of Josephus that the Thymæaeans were not in alliance with the Nabataeans from the Euphrates to the Red Sea, is confirmed by the fact that the name is still to be found in both those regions. Thus the name Nabat is applied to a marshy district, described by Gulius as part of the "palustris Chaldeæa," between Wasth and Baræa, which was called "paludes Nabathæorum," (Gulius, cited by Forster, Geog. of Arabia, vol. i. p. 146.) The name Nabathæorum is found in other authorities. (Gulius) of the Arab origin of the Nabataeans, given to a town two days beyond (i. e. south) of El-Hasra in the Hedjæs, by an Arabian geographer (Sicouti, cited by Quatremère, Memoires sur les Nabataéens, p. 38), near where Jobel Nibhît is marked in modern maps. The existence of this name in this locality is regarded by M. Quatremère as an additional argument for the identity of El-Hasra with Leonce Come, proving that the country of the Nabataeans did actually extend so far south. The fact of the origin of the Nabataeans from Nebaioth the son of Ishmael, resting as it does on the respectable authority of Josephus, followed as he is by S. Jerome (Quastet. Hebr. in Genes. tom. ii. p. 550), and all subsequent writers, and even called in question by M. Quatremère in the Memoirs he referred to; who maintains that they are in no sense Idumæites, nor connected by race with any of the Arab families, but were Aramaeans, and identical with the Chaldeans. He cites a host of ancient and most respectable native Arabic authors in proof of this theory; according to whose statements the name Nabsa or Nabataea designated the primitive and indigenous population of Chaldaea and the neighbouring provinces, probably those whom Eusebius designates Babylonians in contradistinction from the Chaldaeans. They occupied the whole of that country afterwards called Irak-Arab, in the most extended sense of that name, even comprehending several provinces beyond the Tigris; and it is worthy of remark, that Masoudi mentions a remnant of the Babylonians and Chaldaes existing in his day in the very place which is designated the marshes of the Nabataeans. In the villages situated in the swampy ground between Wasth and Baræa. (Ib. p. 66.) Other authors mention Nabataeans near Jathribi or Medina, which would account for the Jobel Nibhit in that vicinity; and another section of them in Bahrein, on the eastern coast of the peninsula, who had become Arabs, as the Arab inhabitants of the province of Omans are said to have become Nabataean according to Pline. (xvi. p. 80.) This settlement of Nabataeans in the Persian Gulf may be alluded to by Strabo, who relates that the Chaldaes, banished from their country, settled themselves in the town of Gerha, on the coast of Arabia (xvi. p. 766); which fact would account for the commercial intercourse between the merchants of Gerha and those of Petra above referred to; the Nabataeans of Petra being a branch of some family also from Babylon and perhaps driven from their country by the same political revolution that despoiled the fugitives of Gerha. However this may have been, it must be admitted that the very ingenious and forcible arguments of M. Quatremère leave little doubt that this remarkable people, which appears so sudden and so6 early on the stage of Arabian history, to disappear as suddenly after a brief and brilliant career of mercantile activity and success, were not natives of the soil, but aliens of another race and family into which they were subsequently merged, again to reappear in the annals of their own original seats. (ib. pp. 88-90.) Reland gives a vivid account of the inundation of the scene of the two quarters. (Palestina, p. 94.) [C. W. G.] NABATHRAE. [AḤMĀLTAS.] NABIA'NĪ (Nabia'w), a tribe of the Caucæus, whom Strabo (xi. p. 508) couples with the Panzani (Nebia'w), about the Palus Haæsæa. [E. B. J.] NABLIS, a river of Germany, flowing into the Danube from the north, and probably identical with the Nippon, the name of the river which is found in the Rav. iv. 26, who call it Nabus or Nabara [N. L. S.] NABRISSA or NERBISSA (Nabira, Nerba, Nebris, Nebris), Strab. iii. pp. 140, 143; Ptol. ii. 4 § 12; Nebrissa, in old editt. of Plin. iii. 1 a. 3, but Sillig reads Nabrisa; Nebris, Sil. iii. 393), surnamed Veneria, a town of the Turdetani in Hispania Baetica, situated upon the estuary of the river Basset. Among the tribes of Silius (l. c.) it was celebrated for the worship of Dionysus, Nov Læbria. (Fl ores, Esp. Supr. xii. p. 60.) NABRUM, a river of Gestrosia, mentioned by Pliny (vi. 23 a. 26). It must have been situated near the mouth of the Arbas, between this river and the Indus; but its exact position cannot be determined. It is not represented on the map of voyages of Nearchus. [V.] NACMUSUL. [MADIRIN ANTA.] NACOLEIA, NACOLEIA, NACOLEIA (Nakoleia, Nakoleia), a town in Phrygia Epictetus, between Doryæanum and Cotyæum, on the upper course of the river Thymbra. (Strab. xii. p. 576; Steph. B. s. v.; Ptol. v. 2 § 32.) In the earlier times, the towns does not seem to have been a place of much consequence, but later writers have mentioned it. It has acquired some celebrity from the fact that the emperor Valens there defeated the usurper Procopius. (Amm. Marc. xxvii. 57; comp. Zosim. iv. 8; Socrat. Hist. Ecol. iv. 5; Soccom. iv. 8.) In the reign of
**NACONA.**

Arcadius, Nacoilea was occupied by a Gothic garrison, which revolted against the emperor. (Philostorg. xi. 8; comp. Hieroc. p. 678; Conc. Chalced. p. 573.) The Peuting. Table places it 20 miles south of Dorylaeum, and Col. Leake (Asia Minor, p. 24) is inclined to identify the place with Pismach Kales, near Doganay, where he saw some very remarkable, apparently sepulchral, monuments. But the monuments alluded to by Leake seem to have belonged to a more important place than Nacoilea, and Tzeltar (Description de l'Asie Min. vol. I.) asserts that it is proved by coins that Nacoilea was situated on the site of the modern Siahkhoj, on the north-west of Doganay. [L. S.]

**NACO'NA (Nacocia, Steph. B.: Edh. Nacocia), a town of Sicily mentioned only by Stephanus of Byzantium, who cites Philistus as his authority. The accuracy of the name is, however, confirmed by coins, the earliest of which bear the legend NAKOAION, while those of later date have NAKO'NAIN. From one of the latter the town had been occupied by the Campanians, apparently at the same period with Aetna and Entella. (Millingen, Ancient Coins, pp. 33-35; Sestini, Lett. Num. vol. vii. p. 1.) There is no clue to its position. [E. H. B.]

**NA-CRASA (Naepara), a town in the north of Lydia, on the road from Thyatira to Pergamum. (Poll. v. 2. § 16; Hieroc. p. 670, where it is called 'Aepara.) Chishull (Ant. Asiat. p. 146) has identified the place by means of coins with Bakhir, or Babir, somewhat to the north-east of Somna. (Comp. Arundel, Seven Churches, p. 276.) [L. S.]

**COIN OF NAGARASA.**

**NAEBIS or NEBIS, [GALLIAECA, Vol. I. p. 933; MÊNIA.]**

**NAELUS (Ndlos, Ptol. ii. 6. § 5), a river on the north coast of Hispania Tarraconensis, in the territory of the Paessii, a tribe of the Astures. Now the Nalon.**

**NAUGABA (Neryeia, Ptol. vii. 4. § 7; Eth. Neryeia, Ptol. vii. 4. § 9), a town in the NE. corner of the island of Taphron or Ceylon, at no great distance from the capital Anogrammmum. Potemly gives the same name to one of a group of islands which, he states, surrounded Ceylon. (Vill. 4. § 13.) The name may be a corruption of the Sanscrit Nagadeepa, which would mean Island of Snakes. [V.]

**NAVARA (Nýgava), a city in the NW. part of India intra Gangem, distinguished in Potemly by the title saul Anwesnedav (vill. 1. § 43). It is no doubt the present Nagar, between the Kédal river and the Indus. From the second name which Potemly has preserved, we are led to believe that this is the same place as Nysa or Nyasa, which was spared from plunder and destruction by Alexander because the inhabitants asserted that it had been founded by Bacchus or Dionysus, when he conquered the Indians. (Arrian, Asab. v. 1; Curt. viii. 10. § 7.) A mountain called Meron was said to overhang the city, which was also connected with the legend of Bacchus having been reared in the thigh of Zeus. [V.]

**NA'GARA. [MARIYABAR.]**

**NAEGERI (Ndýravos or Nýyavos, Ptol. vii. 4. § 9), one of the two most southern tribes of Taphron or Ceylon. They appear to have lived in the immediate neighbourhood of what Porphyry calls, and what are still, "the Elephant Pastures," and to have had a town called the city of Dionysus (Διονύσου παρακλήσια), which is probably represented now by the ruins of Naigremon (Dagha, Account of Ceylon, p. 420; Ritter, Erdkunde, vi. p. 29); if these are not, as some have supposed, the remains of Moridumana. [V.]

**NA'GIDUS (Ndýrados: Eth. Ndýrados), a town of Cilicia on the coast, said to have been colonised by the Samians. Stephanus B. mentions an island named Nagidus, which corresponds to a little rock about 200 feet long, close to the castle of Anamour. (Strab. xiv. p. 670; Mela, i. 13. § 5; Scylax, p. 40; Steph. B. s. v.; Besenfert, Karavanatse, p. 206; Graumer, Asia Minor, vol. ii. p. 526.)**

**COIN OF NA'GIDUS.**

**NAGNATA (Ndýgavos, Ptol. ii. 2. § 4, in the old edit. Ndýrvos), an important town (ναύς οίκι- σματος) on the west coast of Ireland, in the territory of the Nagnatas (Ndýsava, Ptol. ii. 2. § 5), probably situated upon Shigo Bay.**

**NAHALAL (Na hdfa, LXX.), a city of the tribe of Zabulon, mentioned only in Joshua (xix. 15). Eusebius identifies it with a village named Nila (Na hàda), in Bataana; but Bolland justly remarks, that this is without the territory of the tribe of Zabulon. (Palaestinia, s. v. p. 904.) [G. W.]

**NAHARYALI, one of the most powerful tribes of the Lygii, in the north-east of Germany. Tacitus (Germ. 43) relates that the country inhabited by them (probably about the Vistula) contained an ancient and much revered grove, presided over by a priest in female attire. It was sacred to twin gods called Alcis, whom Tacitus identifies with Castor and Pollux. (Latham on Tac. Germ. i. c.; Spengev. Ertaler, zu Tac. Germ. p. 140.) [L. S.]

**NAIN (Ndbs), a village of Palestine, mentioned by St. Luke as the scene of the raising of the widow's son (vii. 11). Eusebius places it two miles S. of Mount Tabor, near Enhor, in the district of Scythopolis (Onomast. s. v. Hâdab and Naube), where a poor village of the same name is found at the present day, on the northern slope of Little Hermon, and a short distance to the W. of 'Ain-dor. (Robinson, Bib. Res. vol. iii. p. 226.) [G. W.]

**NAIOTH (NdJakev Pâaus, LXX. in 1 Sem. xix. 18, 19, 22, 23). [RAMA.]**

**NAISSUS (Ndlos, Steph. B. s. v. Ndlos, Ptol. iii. 9. § 6; Ndlos, Zonem. iii. 11; Ndlos, Hieroc. p. 654), an important town in Upper Moesia, situated in the district Dardania, upon an eastern tributary of the river Marus, and upon the military road running through this country. It was in the neighbourhood of Naisius that Claudius II. gained
his victory over the Goths in A.D. 269 (Zeuxis, i. 45); but the town is chiefly memorable as the birthplace of Constantine the Great. (Steph. B. s. v.; Const. Forph. de Them. ii. 9, p. 56, ed. Bonn.) It was destroyed by the Huns under Attila (Priscus, p. 171, ed. Bonn.), but was restored by Justinian (Procop. iv. 1, where it is called Naisopolis). It still exists under the name of Nissa, upon the river Nissos, an affluent of the Morava.

NARATI. [Dalmatia.]

NAMADUS (Namabuor, or Namaodors, Ptol. vi. 1, §§ 5, 31, 62, 65), a great river in Western India, which runs westward from the M. Vindhis (Vindhyas Mountains), falls into the S. Barygazenus (Gulf of Cambay), not far from the town of Berochas. In the Peripl. M. Eryth. (Geogr. Graec. vol. i. p. 291, ed. Muller) the river is called Namnades (Namadors). The present name is Nerudva, which, like the Greek form, is doubtless derived from the Sanscr. Namaddr, "pleasant." (Forbes, Orient. Mem. ii. pp. 8, 104-112.) [V.]

NAMNETES, NANNETES (Namnitra, Ptol. ii. 8. § 9), for there is authority for both forms, were a Gallic people on the north side of the Liger (Loire), and on the sea. The river separated them from the Pictones or Pictavi. (Strab. iv. p. 190). Their chief town was Conduvium (Namnete). When Caesar was lying on his back in the camp, the Veneti, who had occupied the Venetia, these maritime Galli called in to their aid the Osismi, Nannetes, and other neighbouring people. (Casu. B. G. iii. 9.) The Brivates Portus of Ptolemy is the present name. The Nantianus exceeded the limits of the territory of the Nannetes. [G. L.]

NANZOIRI. [NAZOIRI.]

NANTUATES, a people who bordered on the Allobroges, who in Caesar's time were included within the limits of the Provincia. Caesar (B. G. iii. 1) at the close of the campaign of B.C. 57 sent Servius Galba with some troops into the country of the Nantuates, Veragri and Seduni, who extend from the borders of the Allobroges, the Lucus Lemnanaus and the river Rhone to the summits of the Alps. The position of the Seduni in the valley of the Rhone about Sitten or Sion, and of the Veragri lower down at Martigny or Martinach, being ascertained, we must place the Nantuates in the Chablais, on the south side of the Leman lake, a position which is conformable to Caesar's text. Strabo (iv. p. 204) who probably got his information from Caesar, speaks of the Veragri, Nantuates, and the Leman lake; from which we might infer that the Nantuates were near the lake. An inscription in honour of Augustus, which according to Guichenon's testimony was found at Monthey, which is in the Valesia lower down than Martigny, contains the words "Nantuates patrono"; and it belongs to the time when it is found, it is some evidence that the Nantuates were in the lower part of the Valais. But if the Nantuates were neighbours of the Allobroges, they must have extended westward along the south bank of the lake into the Chablais. The Chablais is that part of Savoy which lies along the Leman lake between the Arve and the Valais. It is not certain how far the Allobroges extended along the Leman lake east of Geneva, which town was in their territory. It has been observed that the word Nant in the Celtic language signifies "running water;" and it is said that in the dialect of Savoy, every little mountain stream is called Nant, and that there are many streams of this name. Nant is also a Welsh word for stream.

There is another passage in Caesar, where the name Nantuates occurs in the common texts (B. G. iv. 10), which has caused great difficulty. He says that "Nantuates in the country of the Veranici who occupy the Alps, and that it flows by a long distance (longo spatial) through the country of the Nantuates, Helveti, and others. Walckensers affirms (Geogr. gec. vol. i. p. 558) that the best and the greater part of the Miss. of Caeser have Vatiumatum; but this is not true. The readings in this passage are Nantavatium, Nantavatium, Vatiumatum, Manthavatium, and some other varieties. (Caesar, ed. Schneider.) Strabo (iv. p. 192) says that the Actuatiae (Alvovedas) inhabit the first part of the course of the Rhine, and that the sources of the river are in their country near Mount Adula. Casaubon changed Actuatiae into Nantuates to make it agree with Caesar's text, and Oliver changed it into Helveti. Lumby changes it to the modern Helveti, and疫于 his translation, and a minor change is the substitution of the modern Helveti for the Venetia. The name of Caesar's text is not certain, and in Strabo it may be wrong, but nothing is plainer than that these people, whatever is their name, are in the valley of the Rhine. Oberlin in his edition of Caesar has put the name "Serunium" in place of "Nantavatium;" but the Sarum is in the valley of the river turning to the east. Grokardi (Transl. Strab. vol. i. p. 192) has adopted the alteration "Helveti" in his translation; and very injudiciously, for the Helveti were not in the high Alps. Ukert (Gallia, p. 349) would also alter Strabo's Actuatiae into Nantuates to fit the common text of Caesar; and he gives his explanation of the position of the Nantuates, which is a very bad explanation. These Nantuates occur among the Alpine peoples who are mentioned in the Trophy of Augustus (Pilat. iii. 211), and they are placed thus: "Leponiti, Ubri, Nantuates, Seduni, Veragri," from which, if we can conclude anything, we may conclude that these Nantuates are the Nantuates of the Lower Valais. [G. L.]

NAPIARI (Taurica Cherbonensi).

NAPARIS (Naparis, Herod. iv. 48), an affluent of the Ister, identified by Schafarik (Slavische Alterthümer, vol. i. p. 506) with the Arpus of the Peutinger Table. It is one of the rivers which take their source in the Trascanovum Alps, probably the Ardachich. [E. B. J.]

NAPATA (Napata, Strab. xvii. p. 820; Ptol. iv. 16. § 8; Narsaw, Stor. i. 136, 272; Aen. iv. 436), was the capital of an Aethiopian kingdom, north of the insular region of Meroe, and in about lat. 19° N. There is, however, great difficulty in determining the true position of Napata, as Strabo (i. c.) places it much farther N. than Pliny, and there is reason for supposing that it is a designation of a royal residence, which might be movable, rather than of a fixed locality. Ritter (Erkundlungen, vol. i. p. 591) brings Napata as far north as Primis (Ibrin), and the ruins at Ipseambel, while Manner, Ukert, and other geographers believe it to have been Morowes, on the furthest northern point of the region of Meroe. It is, how.
NAPATA.

over, generally placed at the E. extremity of that
great bend of the Nile, which skirts the desert of Be-
khoras [Nubia], and near Mount Birkel [Gebel-"al-
Birkel], a site which answers nearly to the descrip-
tion of Napata, in Pliny (L. c.). Napata was the
furthest point S. beyond Egypt, whither the arms of
Rome penetrated, and it was taken and plundered by
Petronius, the lieutenant of Augustus, in B. C. 32.
(Dion Cass. 4, iv. 5.) Nor does Napata seem ever to
have been hereafter of any importance; for no sur-
veyors found only an inconsiderable town there, and
afterwards all traces of this city vanish. The govern-
ment of Napata, like that of Meroe, was often com-
mittted to the hands of women, who bore the title of
1; Tastez, Chald. iii. 885); and in the kingdom of Schedy, Burekhards found in the present century a similar regimen. Napata, if not a colony, was probably at one time among the dependencies of Meroe. The government and religion were the same in both; and from the monuments discovered in either, both seem to have been in a similar state of civilization. If Meroe, indeed, represent the ancient Napata, it seems to follow that the latter was a colony of the second capital of the Mesopotamian
region of Meroe.

Napata owed much of its wealth and importance
to its being the terminus of two considerable car-
van routes:— (1) One crossing the desert of Bahi-
cuda; and (2) The other further to the N. running from
the city to the island Gagnadis in the Nile (Plin.
vii. 72). The modern shore passes near the site of
Napata, although Napata was succeeded by
Nomade bords. Its proper population was probably
as civilized as that of Meroe, at least its wealth pre-
supposes settlement and security. Its commerce
consisted in an interchange of the products of Lybia
and Arabia, and it was near enough to the marshes of
the Nile to enjoy a share in the profitable trade
in ivory and hides which were obtained from the
class of the hippopotamus and elephant. If the ruins
which are found near Mount Birkel represent
Napata, the city has been second only to the
golden city of the Aethiopians, Meroe itself. (Dio-
dor. 3. 6.) On the western bank of the Nile are
found two temples and a considerable necropolis.
The former were dedicated to Osiris and Ammon;
and the latter was the temple of the merchant and
Osrian worship, is inferior in execution and design
to none of the Nubian monuments. Avenues of
sphinxes lead up to the Ammonion, which exhibits in
its ruins the plan of the great temples of Aegypt.
On the walls of the Osrian temple, which Calli-
and (L'Isle de Meroe) calls a Typhonion, are re-
presented Ammon-Be and his usual attendants.
The images exhibit Ammon or Osiris receiving
gifts of fruit, cattle, and other articles, or offering
sacrifice; strings of captives taken in war are
kneeling before their conqueror. On the gateway
leading to the court of the necropolis, Osiris was
carved in the act of receiving gifts as lord of the
lower world. The pyramids themselves are of
sizable magnitude; but having been built of the
sandstone of Mount Birkel, have suffered greatly
from the periodical rains, and have been still more
injured by man.

Among the ruins, which probably cover the site
of the ancient Napata are two lions of red granite,
one being the name of Amenophis III. the other of
Ammon-rech. They were brought to England by
Lord Frelisee, and now stand at the entrance to the

NARAGGERA. 397

Gallery of Antiquities in the British Museum.
The style and execution of these figures belong to
the most perfect period of Aegyptian art, the xvith
dynasty of the Pharaohs. Whether these lions once
marked the southern limit of the dominions of
Aegypt, or whether they were trophies brought
from Aegypt, by its Aethiopian conquerors, cannot
be determined. (Hoseins. Trudges, pp. 161. 288;
Olliel. L'Isle de Meroe; Transact. of Royal Soc.
L. 2nd Ser. 1845, p. 64. NAPETINUS SINUS (δ Ναπετίνυς κωλος)
was the name given by some writers to the gulf on
the W. coast of Brittum more commonly known as
the Terinæus Sinus, and now called the Gulf of St.
Eynarnus. We have no account of the origin of
the name, which is cited from Antoicus of Synnæca
both by Strabo and Dionysius. (Strab. vi. p. 255;
Dionys. i. 35.) Aristotle calls the same gulf the
Lametine Gulf (δ Λαμετυνυς κωλος, Arist. Pol.
vii. 10), from a town of the name of Lametium or
Lametini; and in like manner it has been generally
assumed that there was a town of the name of Nape-
tium, situated on its shores. But we have no other
evidence of this; an inscription, which has been
frequently cited in support of the supposition, is of
the name as late as the time of Trajan, is almost
App. No. 936) [E. H. B.]

NAPHTALI. [PAlAETHTH.] SAPFOCA. [Dacia, Vol. i. p. 744, b.]
NAB (δ Nabo, Strab.: Vera), a considerable river
of Central India, and of the tributaries of the Tiber.
It rises in the lofty group of the Apenines known as
the Monti della Sibilla (the Mons Fossellus of Pliny),
on the confines of Umbria and Picenum, from whence it has a course of
about 60 miles to its confluence with the Tiber,
which it enters 5 miles above Oriconium, after
flowing under the walls of Interamna and Narnia.
(Strab. v. pp. 227, 235; Plin. iii. 5. s. 9; Lucan.
i. 475; Vib. Seq. p. 15.) About 5 miles above the
former city, it receives the tributary stream of the
Velium; a river as large as itself, and which brings
down the accumulated waters of the Lacus Velini,
with those of the valleys that open out at
Beate. The Nar and Velini together thus drain the
whole western division of Central Italy. Their streams
flow through a space of above 60 miles. The Nar
is remarkable for its white and sulphurous waters,
which are allotted by Ennius and Virgil as well
as Pliny. (Ennius, Ann. vii. Fr. 19; Virg. Aen.
vii. 517; Plin. iii. 12. s. 17.) It is singular that
the last writer has confounded the Nar with the
Velinus, and speaks of the former as draining the
Lacus Velini, into which it falls near Beate. Both
Ciceron and Tacitus, on the contrary, correctly re-
sent the waters of the lake as carried off into the
Nar, which is now effected by an artificial cut
forming the celebrated Casusde of the Velino, or
Falla of Terme. This channel was first opened by
M. Curitis, about n. c. 272, but there must always have been some outlet for the waters of the
Velino. (Plin. i. c.; Cic. ad Att. iv. 15; Tac.
Ann. i. 78.) The Nar was reckoned in ancient
times navigable for small vessels; and Tacitus
speaks of Piso, the murderer of Germanicus, as
embarking at Narnia, and descending from thence
by the Nar and the Tiber to Rome. (Tac. Ann.
iii. 9; Strab. xii. 227.) [E. H. B.]
NARBASORUM FORUM.

NARBO MARTIUS (ἡ Nābō, Εἰρήνη, Ναβώτινα, Ναβώνος, Ναβώνη, Ital. Naborone; Lat. Narbonensis: Narbonne), a town of the Provincia of Gallia Narbonensis. Polybius (i. 10. 2) enumerates it among the inland towns of the Volcae Tectosages, whereas Strabo (i. 11. 1) speaks of another colony, called Gallicum, near Narbo. He places it five minutes south of the latitude of Massalia (Martellium), and in 45° N. lat. It is, however, some minutes north of 45° N. lat., and more than five minutes south of Massilia. Hipparchus places Narbo and Massilia nearly in the same latitude. (Strab. ii. p. 106.)

The position of Narbo at Narbonne is distinctly placed Narbo in the territory of the Volcae Aremocimi, but he adds that Nemausus was their chief city. It seems, indeed, more probable that the Volcae Aremocimi possessed the coast about Narbo, for the chief city of the Tectosages was Tolosa (Toulouse), in the basin of the Garonne. Mela (i. 5) calls Narbo a colony of the Atacini (Atax) and the Decumani. Ausonius (De Claris Urbibus, Narbo) does not say, as some have supposed, that Narbo was in the territory of the Tectosages, but that the Tectosages formed the western part of Narbonensis, which is true. The conclusion from Caesar (B. G. vii. 6) that Narbo was a Roman colony in the country of the Narbites, and that the Narbites did not trouble himself about such matters.

The name Narbon (ἡ Nābō) was also one name of the river Atax, for Polybius calls the river Narbonon. (Atax.) The form Narbona occurs in inscriptions, and there is authority for the form also in the MSS. of Caesar. (B. G. iii. 30, ed. Sch., and viii. 46.) According to Stephanius (n. s.), Marcianus calls it Narbonia; but this is clearly an adjective form. Hecataeus, who is the author for the Ethnics name Nābō, must have supposed a name Narba or Narbe. The origin of the name Martius is not certain. The Roman colony of Narbo was settled, n. c. 118, in the consulship of Q. Marcius Rex and M. Porcius Cato; but the founder of the colony was L. Licinius Crassus. (Cic. Brut. c. 43.) It has been conjectured that the name Martius was given to the place because of the war-like natives of the country against whom this is not probable. Others, again, have conjectured that its name is derived from the Latin Martia (Vell. Pater. ii. 5, ed. Burmann); and the orthography Martia is defended by an inscription, Narbo Mart. (Gruter, p. 563, ed. Cursiv.). To this it is objected, by a writer quoted by Uberti (Gallium, p. 410), that the Legio Martia was first formed by Augustus, and that Cicero mentions the title Martius. (A. D. Pomp. x. 83.) Foppler copies Uberti. It appears that neither of them looked at Cicero's letter, in which he speaks, not of Narbo Martius or Marcianus, but of the Legio Martia, which existed before the time of Augustus. Cicero, however, does speak of Narbo Marcianus, as it stands in POLLAN's text. (Pro Fonte c. 1.) The Latin MSS. write the word both Marcianus and Martius; and the same variation occurs in many other words of the same termination. The most probable conclusion is, that the name Martius or Marcianus is the name of the consul Marcianus (s. c. 118). We know that a colony was near Narbo, and that the Narbites were a war-like people, named Stemni. The name may have been written Narbo Marcianus in Cicero's time, and afterwards corrupted.

Narbo was an old town, placed in a good position on the road into Spain and into the basin of the Garonne; a commercial place, we may certainly assume, from the earliest time of its existence. The Roman colony, however, of Narbo, near Narbonne, was once occupied by Bebrycians. (Dion Cass. Frag. Vales. vi. ed. Beim., and the reference to Zoarar.) The earliest writer who mentions Narbo is Hecataeus, quoted by Stephanius; and, accordingly, we conclude that Narbo was well known to the Greeks in the fifth century before the Christian era. The Roman settlement in South Gallia was Aquae Sextiae (Alae), on the east side of the Rhone. The second was Narbo Martius, by which the Romans secured the road into Spain. Cicero calls Narbo "a colony of Roman citizens, a watch tower of the Roman people, and a bulwark opposed and placed in front of the nations in those parts." During Caesar's wars in Gallia, this Roman colony maintained the position; but when P. Claudius invaded Aquitania (n. c. 56) he got help from Tolosa, Carcassone, and Narbo, at all which places there was a muster-roll of the fighting men. (B. G. iii. 20.) In the great rising of the Galli (n. c. 52), Narbo was threatened by Lucterius, but Caesar came to its relief. (B. G. vii. 7.) A second colony was settled at Narbo, or the old one rather strengthened by a supplementum under the dictator Caesar (Sueton. Tiber. c. 4) by Tiberius Claudius Nero, the father of the emperor Tiberius. Some of the tenth legion, Caesar's favourite legion, were settled here, as we may infer from the name Decumanorum Colonia. (Plin. iii. 4.) The name Julia Paterna, which appears on inscriptions and is derived from the dictator Caesar. The establishment of Narbo was the cause of the decline of Massalia. Strabo, who wrote in the time of Augustus and Tiberius, says (iv. p. 186): "that Narbo is the port of the Volcae Aremocimi, but it might more properly be called the port of the rest of Celicia; so much does it surpass other towns in trade." The latter part of Strabo's text is corrupt here. The site of the north-west part of the Spanish peninsula and of Britain passed by way of Narbo, as
it did also to Massilia. (Diod. v. 38.) There was at Narnia a great variety of dress and of people, who were attracted by the commercial advantages of the city. It was adorned with public buildings, after the fashion of Roman towns. (Martial, viii. 72; Auson. Narno; Sidon. Apollin. Carm. 23.) A temple of Parian marble, probably some political exag- geration, is spoken of by Ausonius; and Sidonius enumerates, in half a dozen miserable lines, the glories of ancient Narnia, its gates, porticoes, forum, basilica, and the temple of a mint, and a bridge over the Aaax. The coast of Narnia was and is famed for oysters.

Not a single Roman monument is standing at Narnia, but the sites of many buildings are ascer- tained. Numerous architectural fragments, friezes, bas-reliefs, tombs, and inscriptions, still remain. Some inscriptions are or were preserved in the courts and on the great staircase of the episcopal palace. There is a museum of antiquities at Narnia, which contains fragments of mosaic, busts, heads, cinerary urns, and a great number of inscrip- tions. [G. L.]

NARDINIO (Naples), Plut. ii. 6 § 54), a town of the Satii, a tribe of the Gaetuli, near the Hunsia Tarracenna, probably near Villalondolo on the Esula. (Sestini, p. 172.)

NARISCIO, a German tribe of the Suevi, occupying the country in the west of the Gabreta Silva, and east of the Hermunduri. They extended in the north as far as the Sudeti Montes, and in the south as far as the Danube. In the reign of M. Aurelius, 168., their king Balaonus was defeated by the Roman general Hanes, governor of the province. (Dion Cass. lix. 21, where they are called Napes; after the Marcomannian war, they completely disappear from history, and the country once occupied by them is inhabited, in the Pentling. Table, by a tribe called Armalausi. (Tac. Germ. 42; J. Capitol. M. Aug. 22.) Ptolemy (ii. 11. § 29) calls it Napocis, which is possibly the more genuine form of the name, since in the middle ages a portion of the country once inhabited by them bore the name of Provincia Var- iscam. [L. S.]

NARNAIA (Naples, Strab., Plut. Ead. NarENNIAE Narnia), one of the most important cities of Umbria, situated on the left bank of the river Nar, about 6 miles from the sea. It stood on the line of the Via Flaminia, by which it was distant 56 miles from Rome. (Itin. Ant. p. 125; Itin. Hier. p. 618; Westphal, Rom. Komp. p. 145.) It appears to have been an ancient and important city of the Umbrians, and previous to the Roman conquest bore the name of Naquinum. (Plin. iii. 14. 4; Liv. x. 9; Steph. Byz. notes the name Nabos.) In a. c. 500, it was besieged by the Roman consul Appu- leius; but its natural strength enabled it to defy his arms, and the siege was protracted till the next year, when it was at length surprised and taken by the consul M. Fulvia, a. c. 299. (Liv. x. 9, 10.) Ful- via was in consequence honoured with a triumph "deSemitibus Nequiritibusaque" (Pest. Carp.) and the city was granted to secure the new conquest by thither sending thither a colony, which assumed the name of Narnia from its position on the banks of the Nar. (Liv. x. 10.) It is strange that all men- tion of this colony is omitted by Velleius Paterculus; but its name again occurs in Livy, in the list of the thirty Latin colonies during the Second Punic War. On that occasion (a. c. 209), it was one of those which professed themselves exhausted and unable any longer to bear the burdens of the war; for which it was subsequently punished by the imposition of a double contingent and increased contribution in money. (Liv. xxvii. 9; xxix. 15.) Yet the complaint seems, in the case of Narnia at least, to have been well founded; for a few years afterwards (a. c. 199), the colorisitas again represented their depressed condition to the senate, and obtained the appointment of tri- umvirs, who recruited their numbers with a fresh body of settlers. (Id. xxix. 2.) During the unsettled Punic War, Narnia was destroyed; but at which, in a. c. 207, an army was posted to oppose the threatened advance of Hasdrubal upon Rome; and hence it was some Narnian horsemen who were the first to bring to the capital the tidings of the great victory at the Metaurus. (Liv. xxvii. 43. 50.) These are the only notices we find of Narnia under the republic, but it seems to have risen into a flourishing municipal town, and was one of the chief places in this part ofUm- bria. (Strab. p. 297; Plin. iii. 14. a. 19; Plut. iii. 1. § 54.) It probably owed its prosperity to its position on the great Flaminian highway, as well as to the great fertility of the subjacent plain. In the civil war between Vitellius and Vespasian, Narnia bore an important part, having the temple of the goddess, the goddess of the former a stronghold, where they resolved to check the advance of the army of Vespasian; but the increasing disaffection towards Vitellius caused the troops at Narnia to lay down their arms without resistance. (Tac. Hist. iii. 58—63, 67, 78.) The natural strength of Narnia, and its position as command- ing the Flaminian Way, also rendered it a for- tress of the utmost importance, and the remains of Belisarius and Narses. (Procop. B. G. i. 16, 17; ii. 11; iv. 33.) It became an episcopal see at an early period, and continued throughout the middle ages to be a considerable town.

The position of Narnia on a lofty hill, precipitous on more than one side, and half encircled by the waters of the Nar, is through a deep and picturesque wooded valley immediately below the town, is alluded to by many ancient writers, and described with great truthfulness and accuracy by Claudian, as well as by the historian Procopius. (Claudian, de V. Cons. Hon. 515—519; Sil. Ital. viii. 458; Mart. vi. 93; Procop. B. G. i. 17.) It was across this ravine, as well as the river Nar itself, that the army of Trajan crossed the river, constructed by Augustus, and which was considered to surpass all other structures of the kind in bold- ness and elevation. Its ruins are still regarded with admiration by all travellers to Rome. It consisted originally of three arches, built of massive blocks of white marble; of these the one on the left bank is still entire, and has a height of above sixty feet; the other two have fallen in, apparently from the foundations of the central pier giving way; but all the piers remain, and the imposing style of the whole structure justifies the admiration which it appears to have excited in ancient as well as modern times. Martial alludes to the bridge of Narnia as, even in his day, the great pride of the place. (Martial. vii. 93; 8; Plut. iii. 636; Eustace's Italy, vol. i. p. 339.) The em- peror Nerva was a native of Narnia, though his father would seem to have been of foreign extraction. (Vic. Epit. 11; Caes. 12.) [E. H. B.]

NARO (Napier), Plut. ii. 16. § 5; Plin. iii. 26; Nar. Pomp. Mela, ii. 3. § 13; Narnium, Geogr. Rev. iv. 16; Novario), a river of Illyria, which Scylax (pp. 8, 9) describes as navigable from its
mouth, for a distance of 80 stadia up to its "emporium" now Fort Opea, where there are some vestiges of Roman buildings. The Mani occupied this district. In the interior was a vast lake, extending to the Autariaeit. A fertile island of 180 stadia in circuit was in the lake (Paludo Uomo, or Popovo). From this lake the river flowed, at a distance of one day's sail from the river Alexus ("Apaeur, Scylax, i. c.: Orpaeus; comp. Fonquerville, Venet. Itin. de S. M. 507). This river formed the S. boundary of Dalmatia, and its banks were occupied by the Daoriz, Ardisaei and Parnel. (Strab. vii. pp. 315, 317.) These banks were famous in former times among the professors of pharmacy, who are advised by Nicander (Theriacus, v. 607) to gather the "Iris" there. (Plin. iii. 22, xxi. 15; Theophr. op. Athen. xvi. p. 281.) Strabo (vii. p. 317) rejects the statement of Theopompus that the potters' clay of Chios and Thasos was found in the bed of the river. For the valley of the Narenta, see Wilkinson, Dalmatia and Montenegro, vol. ii. pp. 1-93. [E. B. J.]

NARONNA (Nároynna, a mistake for Nāropi), Ptol. ii. 17. § 12, vii. 7. § 8), a town in Dalmatia, and a Roman colony, elevated by letters of P. Valerius to Ciusor (ad Fiss. v. 9, 10), dated Naronia, that the Romans made it their head-quarters during their conquest of Dalmatia. (Comp. Pomp. Mela, iii. 3. § 13; Itin. Anton.; Pest. Tab.; Geogr. Tax. iv. 16.) Naronia was a "conventus," at which, according to M. Varro (ap Pline. iii. 26) 89 cities assembled; in the time of Pline (i. c.) this number had diminished, but he speaks of an Naronia as 540 "decures" submitting to its jurisdiction.

The ancient city stood upon a hill now occupied by the village of Vido, and extended probably to the marsh below; from the very numerous inscriptions that have been found there, it appears that there was a temple to Liber and Libera, as well as other buildings dedicated to Jupiter and Diana. (Lanza, sopra l'antica città di Naronna, Bologna, 1842; Neugebauer, Die Sul-Strates, pp. 116, 122.) A coin of Titus has been found with the epigraph Col. Narona. (Golts, Theaerius, p. 241; Raschi, vol. iii. pt. 1. p. 1048.)

When the Serbs or Wallachs occupied this country in the reign of Emperor Constantine, as it was called in the former "banatu" into which the Servians were divided. The Narentine pirates, who for three centuries had been the terror of Dalmatia and the Venetian traders, were in A.D. 997 entirely crushed by the fleet of Venice, commanded by the Doge in person. (Schaufair, Stor. Ad. vol. ii. p. 266.) [E. B. J.]

NARTHACIUM (Náropiexi, Náropiexi), the name of a city and mountain of Phthiotis in Thessaly, in the neighbourhood of which Agesilaus, on his return from Asia in B.C. 394, gained a victory over the Thessalian cavalry. The Thessalians, after their defeat, took refuge on Mount Narthachium, between which and a place named Pras, Agesilaus set up a trophy. On the following day he crossed the mountains of the Achaean Phthiotis. (Xen. Hell. iv. 3. §§ 3-9; Ages. 2. §§ 3-5; Plut. Apol. p. 211; Diod. xiv. 82.) Narthacium is accordingly placed by Leka and Kiempt south of Pharsalus in the valley of the Epienus; and the mountain of this name is probably the one which rises immediately to the southward of Pherusa. Leka supposes the town of Narthacium to have been on the mountain not far from upper

Tjesterli, and Pras near lower Tjesterli. (Northern Greece, vol. iv. p. 471, seq.) The town Narthacium is mentioned by Ptolemy (iii. 13. § 46), and should probably be restored in a passage of Strabo (ix. p. 434), where in the MS. there is only the termination . . . . . . . ov. (See Grskurd and Kramer, ad loc.)

NARTHUCE (Náropiexi), a small island in the east of Samos in the strait between Mount Mycale and Mount Kheros. (Strab. x. p. 587; Steph. B. s. v.; Suid. s. e. Náropiexi.) [L. S.]

NARYX or NARYCIUM (Náropioci, Strab. ix. p. 425; Náropi, Steph. B. s. v.; Naryciun, Plin. iv. 7. § 12; in Diod. xiv. 82 and xvi. 38, "Ar'nea, and "Arpaas are false readings for Náropioci: Edh. Náropioci), a town of the Oupantia Locrians, the reputed birthplace of Ajax, son of Oileus (Strab. Steph. B. s. Il. e. c.), who is hence called by Ovid (Met. xiv. 468) Narycius heros. In B.C. 395, Imonnias, a Boeotian commander, undertook an expedition against Phocis, and defeated the Phocians near Naryx of Locria, whence we may conclude with Leka that Naryx was near the frontier of Phocis (Diod. xiv. 82). In 322 Naryx was taken by the Macedonians, and the victor sent letters of praise to Juba and Diana. (Lanza, sopra l'antica città di Naronna, Bologna, 1842; Neugebauer, Die Sul-Strates, pp. 116, 122.) A coin of Titus has been found with the epigraph Col. Narona. (Golts, Theaerius, p. 241; Raschi, vol. iii. pt. 1. p. 1048.)

When the Serbs or Wallachs occupied this country in the reign of Emperor Constantine, as it was called in the former "banatu" into which the Servians were divided. The Narentine pirates, who for three centuries had been the terror of Dalmatia and the Venetian traders, were in A.D. 997 entirely crushed by the fleet of Venice, commanded by the Doge in person. (Schaufair, Stor. Ad. vol. ii. p. 266.) [E. B. J.]

NASSAMONES (Nassoimones, Herod. ii. 32, iv. 172; Ptol. iv. 5. §§ 21. 30; Plin. xxxvii. 10. § 64; Dionys. Periegetes, v. 209; Scylax, p. 47; Steph. B. s. v.) were, according to Herodotus, the most powerful of the Nomadic tribes on the northern coast of Libya. There is some discrepancy in his account of their situation, as well as in that of other ancient writers. (Comp. ii. 32, iv. 172.) They appear, however, to have occupied at one time part of Cyrenaica and the Syrtis. Strabo (xviii. p. 857) places them at the Greater Syrtis, and beyond them the Pfyli, whose territory, according to both Herodotus and Strabo, they appropriated to themselves. Pliney (v. 5. § 5) says that the Nassamones were originally natives of Cyrenaica, and that they were driven by the Greeks, both to the west of the Syrtis and between two quicksands—the Syrtis. Ptolemy (iv. 5. § 21) and Diodorus (iii. 3) again remove them to the inland region of Aquilia; and all these descriptions may, at the time they were written, have been near the truth; since not only were the Nassamones, as Nomades, a wandering race, but they were also pressed upon by the Greeks of Cyrena, on the one side, and by the Carthaginians, on the other. For when, at a later period, the boundaries of Carthage and the Regio Cyrenaica touched at the Philennia Altars, which were situated in the most recesses of the Syrtis, it is evident that the Nassamones must have been displaced from a tract which at one time belonged to them. When at its greatest extent, their territory, including the lands of the Pfyli and the oasis of Aquilia, must have reached inland and along the shore of the Mediterranean about 400 geographical miles from E. to W.

So long as they had access to the sea, the Nassamones had the evil reputation of wrecker, making up for the general barrenness of their lands by the plunder of vessels stranded on the Syrtis. (Lucan. Pharsal. x. 443; Quintus Curt.
NASAVA.

iv. 7.) Their modern representatives are equally inhospitable, as the traveller Bruce, who was shipwrecked on their coast, experienced. (Bruce, Travels, ii. p. 131.) The Nasamones, however, were breeders of cattle, since Herodotus informs us (iv. 179) that in the summer season, "they leave their herds on the coast and go up to Anglia to gather the date harvest."—the palms of that Oasis being numerous, large, and fruitful. And here, again, in existing races we find corresponding traditions: and in the Nasamones, according to modern travellers, the people who dwell on the coast of Derna, gather the dates in the plain of Gefubbi, five days' journey from Angilia. (Proceedings of Afric. Association, 1790, ch. x.)

Herodotus describes the Nasamones as practising a kind of hero-worship, sacrificing at the graves of their ancestors; and swearing by their masses. They were great sailors, and on the widest scale, or rather held their women in common; and their principal diet, besides dates, was dried locusts reduced to powder and kneaded with milk into kind of cake—polesias. Their land produced also a precious stone called by Pliny (xxxvii. 10. a. 64) and Solinus (c. 27) Nasamonia; it was of a blood red hue with black veining. This is the chalcedony of this tribe, with a remarkable story relating to the knowledge possessed by the ancestors of the sources of the Nile. He says (ii. 32) that certain Nasamones came from the neighbourhood of Cyrene, and made an expedition into the interior of Libya; and that they explored the continent as far as the kingdom of Timbuscutio, was reserved probably for the east of their tribe. For, after passing through the inhabited region, they came to that which was infested by wild beasts; next their course was westward through the desert (Sahara), and finally they were taken prisoners by black men of diminutive stature, and carried to a city washed by a great river flowing from W. to E. and abounding in crocodiles. This river, which the historian remarks as the largest of the Nile, was more probably the Niger. The origin of the story perhaps lies in the fact that the Nasamones, a wandering race, acted as guides to the caravans which annually crossed the Libyan continent from the territories of Carthage to Astiophia, Meros, and the ports of the Red Sea. [W. B. D.]

NAVA. [Navia (Naunias, n. l. 1409, 2. § 9), a river of Mauretania Censoriana, the mouth of which is to the E. of Sadaca. This river of Borjeqajg, is made by a number of rivulets which fall into it from different directions, and, as the banks are rocky and mountainous, occasion inundations in the winter. (Shaw, Trans. p. 90.)

NAVABUR [Navabur, Montere.]

NASCUS (Naucus, m. M. Ptolemy, iv. 11.), an inland city of Arabia Felix, in long. 81° 15', lat. 20° 40' of Ptolemy. (Ptol. vi. 7. § 85.) Mr. Forster takes it to be Nessus of Pliny, the chief town of the Amathai, who inhabited the present district of Yeombeh. (Geography of Arabia, vol. ii. pp. 266, 267.)

NANASAR [Caphyars.]

NA'SHUM (Na'shura), in Gallia. Ptolemy names two cities of the Lenci, Tullum (Teil) and Nasium, which he places 20 minutes further south than Tullum, and as many minutes east. Both these indications are false, as the Issa, show, for Nasium is on a road from Dyorcorrhoeus (Reseize) to Tullum; and is a frequented point west of Teil, and it is not south. An old chronicle places Nasium on the Oroses or Ormos, a branch of the Mea; and its name exists in Nais or Nais, above Ligury. The Anteone Itam makes it 16 leagues from Nasium to Tullum. The Table places Ad Fines between Nasium and Tullum 14 leagues from Nasium and 54 from Tullum. [As to Ad Fines, see FINES, No. 14.]

NAUSIC. [Noseil.]

NAUCRATIS (Naucratia, Herod. ii. 179; Strab. xvii. p. 801; Ptol. iv. 5. § 9; Gallimach. Epigr. 41; Ptol. v. 10. a. 11; Steph. B. s. v. a. Zim. Naucrativos or Naucratortyos), was originally an emporium for trade, founded by colonists from Misia, in the Sagittio nome of the Delta. It stood upon the eastern bank of the Canopic arm of the Nile, which, from the subsequent importance of Naucratis, was sometimes called the Ostium Naucrataticum. (Ptol. vii. 10. a. 11.) There was, doubtless, on the same site an older Egyptian town, the name of which has been lost in that of the Greek dockyard and haven. Naucratis first attained its civil and colonial importance in the reign of Amasis (c. 550) who rendered it, as regarded the Greeks, the Comos of Asyry. From the date of his reign until the Persian invasion, or perhaps even the founding of Alexandria, Naucratis possessed a monopoly of the Mediterranean commerce, for it was the only Delian harbour into which foreign vessels were permitted to enter; and if accident or stress of weather had driven them

D D
NAUCRATIS.

into any other port or month of the Nile, they were compelled either to sail round to Macedon or to transmit their cargoes thither in the country boats. Besides these commercial privileges, the Greeks of Naucratis received from Amasis many civil and religious immunities. They appointed their own magistrates and officers for the regulation of their trade, customs, and harbour dues, and were permitted the free exercise of their religious worship. Besides its docks, wharves, and other features of an Hellenic city, Naucratis contained four celebrated temples: — (1) That of Zeus, founded by colonists from Aegina; (2) of Hera, built by the Samians in honour of their tutelary goddess; (3) of Apollo, erected by the Milesians; and (4) the most ancient and sumptuous of them all, the federal temple entitled the Hellemion, which was the common property of the Ionians of Chios, Teos, Phocaea, and Clazomenae; of the Dorians of Rhodes, Cnidus, and Halicarnassus; and of the Astolians of Mytilene. They also observed the Dionysiac festivals; and were, according to Athenaeus (xiii. p. 596, xv. p. 676), devout worshippers of Aphrodite. A famous sanctuary of Naucratis were that of porcelain and wreathes of flowers. The former received from the silicious matter abounding in the earth of the neighbourhood a high glaze; and the potteries were important enough to give names to the Potter's Gate and the Potter's Street, where such wares were exposed for sale. (Ib. xi. p. 480.)

The garlands were, according to Athenaeus (xvi. p. 671), made of myrtle, or, as was sometimes said, of flowers optimized with the filaments of the papyrus. Either these garlands must have been artificial, or the makers of them possessed some secret for preserving the natural flowers, since they were exported to Italy, and held in high esteem by the Roman ladies. (Boeoticher, Sabini, vol. i. pp. 229, seq.) A particular dish, known as the corn dates, of flowers optimized with the filaments of the papyrus, appeared at the Pythian dinners of the Naucratites, as well as of their general disposition to luxurious living. Some of their feasts appear to have been of the kind called "σώματα," where the city provided a banquet-room and wine, but the feasts brought their provisions. At wedding entertainments it was the custom either to serve or to heap sweetened honey. Naucratis was the birthplace of Athenaeus (ii. p. 73, vili. p. 301); of Julius Pollux, the antiquary and grammarian; and of certain obscure historians, cited by Athenaeus, e.g. Lyceas, Phylarchus, Psycharchus, Herostratus, &c. Heliodorus (Athiophi, vi. p. 229) absurdly says that Aristophanes, the comic poet, was born there. Naucratis, however, was the native city of a person much more conspicuous in his day than any of the above mentioned, viz., of Cleonnes, commissioner-general of finances to Alexander the Great, after his conquest of Egypt. But neither the city nor Aegypt in general had much reason to be proud of him; for he was a purblind spendthrift in his administration, and having excelled in the Delta a general feeling of discontent against the Macedonians, he was put to death by Ptolemy Lagna. (Arrian, Exp. Alex. iii. 5, vili. 23; Diodor. xviii. 14; Psomed. Aristot. Oeconom. ii. 34. s. 40.)

Herodotus probably landed at Naucratis, on his entrance into Aegypt; but he did not remain there. It was, however, for some time the residence of the legislator Solon, who there exchanged his Attic oil and honey for Egyptian millet; and is said to have taken sundry hints for his code of laws from the statues of the Pharaohs. (Plutarch, Solon, 26.)

Naucratis, like so many others of the Deltaic cities, began to decline after the foundation of Alexandria. Situated nearly 30 miles from the sea, it could not compete with the most extensive and commodious haven then in the world; and with the Macedonian invasion its monopoly of the Mediterranean traffic came to an end. Its site is now submerged, but is supposed to correspond nearly with that of the modern hamlet of Salhadechar, where considerable heaps of ruin are extant. (Niebuhr, Travels in Arabia, p. 97.)

The coins of Naucratis are of the age of Trajan, and represent on their obverse a laureated head of the emperor, and on their reverse the figure of Asia, or a female holding a spear. (Ehre, Lexic. R. Numm. ii. 6: 4.)

A river on the N. coast of Hispania Tarraconensis, now Nauia.

NAULOCUSH, an island, or rather reef, off the Sammonian promontory, in Crete (Plin. iv. 12), the soil of which, according to Strabo (xvi. p. 677, 8); Paus. (xvii. p. 13, &c.) is of great fertility, and was occupied by Mylas and Capsa Pelorss. It is known only from the great sea-fight in which Sextus Pompeius was defeated by Agrrippa, n. c. 36, and which was fought between Mylas and Naucrathus. (Sest. Asp. 16; Appian, B. C. ii. 182.) Mr. H. E. B. D'Arcy, M. F. G. W., supposed that Pompeius himself during the battle had been encamped with his land forces at Naucrathus (Appian, B. C. ii. 121), and after his victory, Octavian, in his turn, took up his station there, while Agrippa and Lepidus advanced to attack Massena. (Ib. 122.) It is clear from its name that Naucrathus was a place where there was a good roadstead or anchorage for shipping; but it is probable that there was no town of the name, though Silius Italicus includes it in his list of Sicilian cities. (Sili. Ital. xiv. 264.) From the description in Appian it is clear that it was situated between Mylas and Capsa Roscoalum (the Phalacrian Promontory of Ptolemy), and probably was the site of the defended point to which nothing is left, but which would require nothing to fix its site more definitely. (W. E. B. D')

NAULOCUSH (Naolacho), a small port on the coast of Thrace, belonging to Messenia, called by Pliny Tetranaucathus. (Strabo. viii. p. 319, iv. 440; Plin. iv. 11. s. 18.)

NAUMACHOS. [Naucrathus, No. 1.]

NAUPACTUS (Naupactos: Ebd. Naupactos: Neapolis by the Greeks, Neapoleto by the Italians), an important town of the Locri Oesane, and the best harbour on the northern coast of the Corinthian gulf, was situated just within the entrance of this gulf, a little east of the promontory Antirrhum. It is said to have derived its name from the Hercules having here built the fleet with which he sailed to the east; but others say it is derived from Naupactus, a river. (Strabo. vii. 286; Paus. xix. 38. § 10; Apollod. ii. 8. § 9.) Though Naupactus was indebted for its historical importance to its harbour at the entrance of the Corinthian gulf, it was probably originally chosen as a site for a city on account of its strong hill, fertile plains, and copious supply of running water. (Leake. N. Greece, vol. ii. p. 608.) After the Persian wars it was given to the power of the Athenians, who settled there the Messenians, who had been compelled to leave their country at the end of the
NAUPLIA.

Greek War, n. c. 455; and during the Peloponnesian War it was the head-quarters of the Athenians in all their operations in Western Greece. (Paus. iv. 24. § 7; Thuc. i. 105, ii. 83, seq.) After the battle of Aegospotami the Messenians were expelled from Naupactus, and the Locrians regained possession of the town. (Thuc. iv. 30. § 10.) It afterwards passed into hands of the Athenians, from whom, however, it was wrested by Epaminondas. (Diod. xv. 75.) Philip gave it to the Astolians (Strab. ix. p. 427; Dem. Phil. ii. p. 120, and hence it is frequently called a town of Astolia. (Sicyon, p. 14; Maia, ii. 3; Plin. iv. 2. a. 3.) The Astolians vigorously defended Naupactus against the Romans the summer and the sea, 493, gates of excommunication, 30, seq.; Polyb. i. 103.) Ptolemy (iii. 15. § 3) calls it a town of the Locri Ozoalae, to whom it must therefore have been assigned by the Romans after Pliny's time.

Pausanias saw at Naupactus a temple of Poseidon near the sea, a temple of Artemis, a cave sacred to Aphrodite, and they also went to the temple of Athene. (z. 38. §§ 12, 13.) Naupactus is mentioned by Hierocles (p. 643); but it was destroyed by an earthquake in the reign of Justinian. (Procop. B. Goth. iv. 25.) The situation and present appearance of the town are thus described by Leake:—"The fortress and town occupy the south-eastern and southern slopes of a hill, which is one of the roots of Mount Erymanth. The place is fortified in the manner which was common among the ancients in positions similar to that of Epirus;—that is to say, it occupies a triangular slope with a citadel at the apex, and one or more crenels on the slope, dividing it into subordinate enclosures. At Epirus there are not less than five enclosures extending up the slope, and reaching down to the sea. The present town occupies only the lowest enclosure; in the middle of which is the small harbour which made so great a figure in ancient history; it is now choked with rubbish, and incapable of receiving even the larger sort of boats which navigate the gulf." (Northern Greece, vol. ii. p. 608.)

NAUPLIA (Ναυπλία), a rock above Delphi. (Delph. p. 764, a.)

NAUPLIA (Ναυπλία; Ναυπλίων), the port of Argos, was situated upon a rocky peninsula, connected with the mainland by a narrow isthmus. It was a very ancient place, and is said to have derived its name from Nauplius, the son of Poseidon and Amynde, and the father of Palamedes, though in another story observed, to its harbour (κατ’ τοῖς συγγεγορομενοῖς, Strab. viii. p. 368; Paus. iii. 38. § 3.) Pausanias tells us that the Nauplians were Egyptians belonging to the colony which Danaus brought to Argos (iv. 32. § 2); and from the position of their city upon a promontory running out into the sea, which is quite different from the position of the Greek cities, it is not improbable that it was originally a settlement made by strangers from the East. Nauplia was at first independent of Argos, and as a member of the maritime confederacy which held its meetings in the island of Celaenaria. (Strab. viii. p. 374.) About the time of the Second Messenian War, it was conquered by the Argives; and the Laconians gave to its expelled citizens the town of Methone in Messenia, where they continued to reside even after the restoration of the Messenian state by Epaminondas. (Paus. iv. 24. § 4, iv. 27. § 6, v. 55. § 2.) Argos took the place of Nauplia in the Confédération; and from this time Nauplia appears in history only as the seaport of Argos (Ναυπλία λίμενς, Eurip. Orest. 767; Λιμήν Ναυπλίων, Elect. 451.) As such it is mentioned by Strabo (iv. c.), but in the time of Pausanias the place was deserted. Pausanias noticed the ruins of the walls of a temple of Poseidon, certain forts, and a Greek temple named Acraeus, by which, in which Hera was said to have renewed her virginity every year. (Paus. ii. 38. § 2.) In the middle ages Nauplia was called τὸ Ναυβάλια, τὸ Αντωνελά, or τὸ Αναπλία, but has now resumed its ancient name. It became a place of considerable importance in the middle ages, and has continued so down to the present day. In the closing years of the Crosses it first emerges from obscurity. In 1025 it was taken by the Franks, and became the capital of a small duchy, which commanded the plain of Argos. Towards the end of the 14th century it came into the hands of the Venetians, who regarded it as one of their most important places in the Levant, and who successfully defended it both against Mahomet II. and Bosnia. Venice, in 1516, gave the Turks in 1540, but wrested it from them again in 1686, when they constructed the strong fortifications on Mt. Palamidi. This fortress, although reckoned impregnable, was stormed by the Turks in 1715, in whose hands it remained till the outbreak of the war of Greek independence. It then became the seat of the Greek government, and continued as such, till the king of Greece removed his residence to Athens in 1834.

The modern town is described by a recent observer as having more the air of a real town than any place now existing in Greece under that title; having continuous lines of houses and streets, and offering, upon the whole, much the appearance of a second-rate Italian town. It is built on the peninsula; and some remains of the Hellenic fortifications may be seen in the site of the walls of Fort Zakynthos, which is the lower citadel of the town, and occupies the site of the ancient Acropolis. The upper citadel, called Palamidi (Παλαμίδι), is situated upon a steep and lofty mountain, and is one of the strongest fortresses in Europe. Although the name is not mentioned by any ancient writer, there can be little doubt, from the connection of Palamides with the ancient town, that this was the appellation of the hill in ancient times. (Leake, Morea, vol. ii. p. 356, Palomponemusa, p. 253; Mura, Tour in Greece, vol. ii. p. 187; Belcher, Lichenes, &c. p. 50; Curtius, Palamidas.)

NAUPORTUS (Ναυπορτος). 1. (Logobach), a small but navigable river in the south-west of Pannonia, flowing by the town of Nauportus, and emptying itself into the Savus a little below Asmona. (Strab. iv. p. 207, comp. vii. p. 314, where some read Ναυπαρτος; Plin. iii. 23.)

2. A town on the south coast of Samonia, on the small river of the same name, was an ancient and once flourishing commercial town of the Taurisci, which carried on considerable commerce with Aquileia. (Strab. vii. p. 814; Tac. Ann. i. 10; Plin. iii. 22; Val. Pater. ii. 110.) But after the
NAUSTALO.

foundation of Aemona, at a distance of only 15 miles from Naupactus, the latter place lost its former importance and decayed. During the insurrection of the Pannonian legionaries after the death of Augustus, the town was plundered and destroyed. (Tac. i. c.) The place is now called Ober-Langbach; its Roman name Naupactus (from navis and porto) was connected with the story of the Argonauts, who were believed on their return to have sailed up the river to this place, and thence to have carried their ships on their shoulders across the Axios to Aegina. [L. S.]

NAUSTALO, a place on the south coast of Gallia, west of the Rhodanus, mentioned in the Ora Maritima of Avienus (v. 615) —

"Tum Manas vicus, oppidumque Naustalo
Et urbs."

The name Naustalo looks like Greek, and if it is genuine, it may be the name of some Greek settlement along this coast. Nothing can be determined as to the site of Naustalo further than what Ukert says (Gallien, p. 419): it is somewhere between Cottia and the Rhone. [G. L.]

NAUSTATHMUS (Naustrathmus), a port-town on the Euxine, in the western part of Pontus, on a salt lake connected with the sea, and 90 stadia to the east of the river Halya. (Arrian, Perip. p. 16; M. Curtius, Rer. Germ. Antiq. VII. 74. 14. 3. See p. 9 Tab. Pont., where it is erroneously called Nautagmus.) The Peripus of the Anonymous places it only 40 stadia east of the mouth of the Halya. Comp. Hamilton (Researches, i. p. 295), who has identified the salt lake with the modern Hamamli Ghioas; but no remains of Naustathmus have been found.

NAUSTATHMUS (Naustrathmus), an anchorage on the coast of Corenusca, 100 stadia from Apollonia. (Scylax, p. 45; Stadiasmus, § 56; Strab. xviii. p. 838; Ptol. iv. § 5; Pomp. Mela, i. 8. § 2.) It is identified with El-Rahl, which Beecher (Exped. to the N. Coast of Africa, p. 479) describes as a point forming a bay in which large ships might find shelter. The remains of ancient walls found there indicate an ancient site. (Comp. Paoco, Voyage, p. 144; Barth, Wanderungen, pp. 461, 495; Thirige, Reis Coremens. p. 103.) [E. B. J.]

NAUTACA (Nautsca, Arrian, Anat. ii. 28, iv. 18), a town of Sagudiana, in the neighbourhood of the Ouxos (Huboes), on its eastern bank. It has been conjectured by Professor Wilson that it may be the same as Naukab. (Arrian, i. 165.) [V.]

NAXOS or NAXUS (Nádes: Esth. Ndgris: Copo di Schio), an ancient city of Sicily, on the E. coast of the island between Catana and Messana. It was situated on a low point of land at the mouth of the river Acusines (Alcantar), and at the foot of the hill on which was afterwards built the city of Tauromenion. The ancient writers agree that Naxos was the most ancient of all the Greek colonies in Sicily; it was founded the year before Syracuse, or B.C. 735, by a body of colonists from Chalcis in Euboea, with whom there was mingled, according to Ephorus, a certain number of Ionians. The same writer represented Thucles, the leader of the ancient settlers of the city, as being, as an Athenian by birth; but Thucydidus notes no notice of this, and describes the city as a purely Chalcide colony; and it seems certain that in later times it was generally so regarded. (Thuc. vi. 3; Ephor. ap. Strab. vi. p. 267; Scyl. Ch. 270—277; Diod. xiv. 88. Concerning the date of its founda-

NAXOS.

tion see Clinton, F. H. vol. i. p. 184; Euseb. Chron. ad Ol. 11. 1.) The memory of Naxos as the earliest of all the Greek settlements in Sicily was preserved by the dedication of an altar outside the town to Apollo Archagetae, the divine patron under whose authority the colony had sailed; and it was a custom (still retained long after the destruction of Naxos itself) that all the Teury or envoys proceeding on sacred missions to Greece, or returning from thence to Sicily, should offer sacrifice on this altar. (Thuc. i. c.; Appian, B. C. v. 109.) It is singular that none of the writers above cited allude to the origin of Naxos; but there can be no little doubt that this was derived, as stated by Hellenicus (ap. Steph. B. s. v. Naxis), from the presence among the original settlers of a body of colonists from the island of that name.

The new colony must have been speedily joined by fresh settlers from Greece, as within six years after its first establishment the Chalcidians at Naxos were able to send out a fresh colony, which founded the city of Leontini, n. c. 750; and this was speedily followed by that of Catana. Thebes himself became the Oekist, or recognised founder, of the former, and Eurachus, probably a Chalcidian citizen, of the latter. (Thuc. v. c.; Scyll. Cn. 283—286; Strab. vi. p. 268.) Strabo and Scyllus both reproduce a story of the origin of Naxos; but the above statement to this is found in Thucydides. But, as it was certainly a Chalcidian colony, it is probable that some settlers from Naxos joined those from the parent country. (Strab. vi. p. 268; Scyll. Cn. 283; Thuc. vi. 4.) Callipolis also, a city of uncertain site, and which ceased to exist at an early period, was a colony from Naxos. (Strab. vi. p. 272.) But notwithstanding these evidences of its early prosperity, we have very little information as to the early history of Naxos; and the first facts transmitted to us concerning it relate to disasters that it sustained. Thus Herodotus tells us that it was one of the cities which was besieged and taken by Hippocrates, despot of Gela, about n. c. 480. (Herod. iv. 164.) And it is added that a remnant of Naxians would have been left in Naxos, but that it was reduced by him under permanent subjection. It appears to have afterwards successively passed under the authority of Gelon of Syracuse, and his brother Hieron, as we find it subject to the latter in n. c. 476. At that time Hieron, with a view to strengthen his own power, removed the inhabitants of Naxos at the same time with those of Catana, and settled them together at Leontini, while he repeopled the two cities with fresh colonists from other quarters (Diod. xi. 49). The name of Naxos is not specifically mentioned during the revolutions that ensued in Sicily after the death of Hieron; but there seems no doubt that the city was restored to the old Chalcidian citizens at the same time as these were restored to Catana, n. c. 461. (Id. xi. 76.) But the original city having disappeared, thence we find, during the ensuing period, the three Chalcidian cities, Naxos, Leontini, and Catana, generally united by the bonds of amity, and maintaining a close alliance, as opposed to Syracuse and the other Doric cities of Sicily. (Id. xii. 58, xiv. 14; Thuc. iii. 86, iv. 25.) Thus, in n. c. 427, when the Leontini were hard pressed by the city, neighbour to Syracuse, their Chalcidian brethren afforded them all the assistance in their power (Thuc. iii. 86); and when the first Athenian expedition arrived in Sicily under Laches and Charocades, the Naxians immediately joined their alliance. With them, as well as with the Rhegians on the opposite side of the straits, it is
in the war between Octavian and Sextus Pompey in Sicily, n. c. 36. (Appian, R. C. v. 109.)

There are no remains of the ancient city now extant, but the site is clearly marked. It occupied a low but rocky headland, now called the Capo di Schito, formed by an ancient stream of lava, immediately to the N. of the Alcoves, one of the most considerable streams in this part of Sicily. A small bay to the N. affords good anchorage, and separates it from the foot of the bold and lofty hill, still occupied by the town of Taormina; but the situation was not one which enjoyed any peculiar natural advantages.

The coins of Naxos, which are of fine workmanship, may almost all be referred to the period from n. c. 460 to n. c. 403, which was probably the most flourishing in the history of the city. [E. H. B.]

COIN OF NAXOS IN SICILY.

NAXOS or NAXUS (Nàgos, Suid. s. v.), a town of Crete, according to the Scholiast (ad Pind. Isth. vi. 107) celebrated by masters of poetry. H. W. (Kreisa, vol. i. p. 417) considers the existence of this city very problematical. The islands Crete and Naxos were famed for their wheat-ears (Plin. xxxvi. 22; comp. xviii. 28), and hence the confusion. In Mr. Pashley's map the site of Naxos is marked near Spina Longa. [E. B. J.]

NAXOS or NAXUS (Nàgos, Ech. Nàgos; Naxos), the largest and most fertile of the Cyclades, situated in the middle of the Aegean sea, about halfway between the coasts of Greece and those of Asia Minor. It lies east of Paros, from which it is separated by a channel about six miles wide. It is described by Pliny (iv. 12. a. 29) as 75 Roman miles in circumference. It is about 19 miles in length, and 15 in breadth in its widest part. It has several other names in ancient times. It was called Strongyle (Στρογγυλον) from its round shape, Dionysia (Διονυσιάς) from its excellent wine and its consequent connection with the worship of Dionysus, and the Smaller Sicily (μικρὰ Σικύλια) from the fertility of its soil (Fin. iv. 12. a. 23; Diod. iv. 59—52); but the poets frequently give it the name of Dia (Δία; comp. Ov. Met. ii. 690, viii. 174). It is said to have been originally inhabited by Thracians, and then by Carrians, and to have derived its name from Naxos, the Carian chief: (Diod. v. 50, 51; Steph. B. s. v. Nàgos.) In the historical ages it was colonised by lonians from Attica (Herod. viii. 46), and in consequence of its position, size, and fertility, it became the most powerful of the Cyclades. The government of Naxos was originally an oligarchy, but was overthrown by Lygdamis, who made himself tyrant of the island. (Aristot. ap. Ath. viii. p. 348.) Lygdamis, however, appears not to have retained his power long, for we find him assisting Peisistratus in his third restoration to Athens, and the latter in return subduing Naxos and confirmimg the tyranny to Lygdamis. (Herod. i. 61, 64; comp. Aristot. Pol. v. 5.) But new revolutions followed. The
aristocratical party appear to have again got the upper hand; but they were after a short time expelled by the people, and applied for assistance to Aristagoras of Miletus. The Persians, at the persuasion of Aristagoras, sent a large force in b.c. 501 to subdue Naxos; the expedition proved a failure; and after a short progress the greater part of the Persian fleet, persuaded the Ionians to revolt from the great king. (Herod. v. 30—34.) At this period the Naxians had 8000 hoplites, many ships of war, and numerous slaves. (Herod. v. 30, 31.) From the 8000 hoplites we may conclude that the free population amounted to 50,000 souls, to which number we may add at least as many slaves. (I. c. 490 the Persians under Datis and Artaphernes landed upon the island, and in revenge for their former failure laid it waste with fire and sword. Most of the inhabitants took refuge in the mountains, but those who remained were reduced to slavery, and their city set on fire. (Herod. vi. 96.) Naxos became a dependency of Persia; but their four ships, which were sent to the Persian fleet, deserted the latter and fought on the side of Grecian independence at the battle of Salamis. (Herod. vii. 46.) They also took part in the battle of Platea. (Diod. v. 59.) After the Persian wars Naxos became a member of the confederacy of Delos under the headship of Athens; but about b.c. 471 it revolted, and was again reduced to the condition of a subject, and established 500 Athenian cleruchs in the island. (Thuc. i. 98, 137; Plut. Peric. 11; Paus. i. 27. § 6.) From this time Naxos is seldom mentioned in ancient history. It was off Naxos that Chabrias gained a signal victory over the Lacedaemonian fleet in b.c. 376, which returned to Athens the same year at sea. (Xen. Hell. v. 4. § 60 seq.; Diod. xv. 34.) During the civil wars of Rome Naxos was for a short time subject to the Rhodians. (Appian, B. C. v. 7.) After the capture of Constantinople by the Latins in 1204, the Aegaean sea fell to the lot of the Venetians; and Marco Sanudo, in 1207, took possession of Naxos, and founded there a powerful state under the name of the Duchy of the Aegaean Sea (Iam Aegaei Polaçi). He built the large castle above the town, now in ruins, and fortified it with 12 towers. His dynasty ruled over the greater part of the Cyclades for 360 years, and was at length overthrown by the Turks in 1566. (Finlay, Medieval Greeks, p. 330 seq.) Naxos now belongs to the new kingdom of Greece. Its population does not exceed 12,000, and of these 300 or 400 are Latin, the descendants of the Venetian settlers, many of whom bear the names of the noblest families of Venice.

The ancient capital of the island, also called Naxos, was situated upon the NW. coast. Its site is occupied by the modern capital. On a small detached rock, called Psaltis, about 30 yards in front of the harbour, are the ruins of a temple, which tradition calls a temple of Dionysus. The western portal still remains, consisting of three huge marble slabs, two perpendicular and one laid across, and is of elegant, though simple workmanship. A drawing of it is given by Tomnefort. Stephanus B. mentions another town in Naxos called Tragia or Tragasia (A. T. 23. a.), but G. Maniates believes to be the small island Mikræs, between Naxos and Donousa. Aristotle also (ap. Athen. viii. p. 348) mentions a place, named Lestadai (Apordáðai), of which nothing further is known.

In the centre of the island a mountain, now called Zio, rises to the height of 3000 feet. From its summit 22 islands may be counted; and in the distance may be seen the outline of the mountains of Asia Minor. This mountain appears to have been called Drusi (Δροσί) in antiquity (Diod. v. 51); its modern name is probably derived from the ancient name of the latter, Hellenic tower; and near the bottom, on the road towards Philoi, an inscription, ὅπος δῆμος Μακρασίων. Another mountain is called Kýronos (Κυρώνος), which is evidently an ancient name, and reminds one of the Naxian nymph Coronis, who brought up the young Dionysus (Diod. v. 52). The mountains of Naxos consist partly of granite and partly of marble, the latter being scarcely inferior to that of Paros. Good whetstones were also obtained from Naxos. (Hesych. s. v. Ναξιάς Ἀιδώς; Plln. xxxvi. 6. s. 9.) There are several streams in the island, one of which in ancient times was called Békëlis (Bekilos, Steph. B. z. v. Βεκλίως).

The fertility of Naxos has been equally celebrated in ancient and modern times. Herodotus says that it excelled all other islands in prosperity (v. 58). It produces in abundance corn, oil, wine, and fruit of the finest description. In consequence of the excellence of its wine Naxos was celebrated in the legends of Dionysus, particularly those relating to Ariadne. (See Dict. of Biog. art. ΑΡΙΑΔΝΗ.) It was inhabited by the Molossians, who were reduced by the Naxians to the condition of subjects, and established 500 Athenian cleruchs in the island. The vineyards of Naxos were famous in antiquity. (Suid. s. v. Χυώς.) The richest wine of Naxos is now produced at a place called Aperdikes. It is a superior white wine, and is celebrated in the islands of the Aegean under the name of Boucles-Wine.

The plant which produces ladadmus is found at Naxos; and in Thessaly it was collected from the beards of goats, in the manner described by Herodotus (iii. 112). Emery is also found there, particularly in the southern part of the island, and forms an article of export. The goats of Naxos were celebrated in antiquity. (Athn. xii. p. 540.)

One of the most remarkable curiosities in the island is an unfinished colossal statue, still lying in an ancient marble quarry near the northern extremity of the island. It is about 34 feet in length, and has always been called by the inhabitants a figure of Apollo. On the side of the hill, at the distance of five minutes from the statue, we still find the inscription, ὅτι χαρων οἰκείοις ΑΡΙΑΔΝΗΣ. Ross conjectures that the statue may have been intended as a dedicatory offering to Delos. (Thiernot, Travels, p. 103, Engl. transl. ; Tournefort, Voyage, vol. i. p. 163, Engl. transl. ; Leake, Northern Greece, vol. iii. p. 93; Ross, Reisen auf den Griech. Inseln, vol. i. p. 23, seq.; Girtner, De Naxo Insula, Hal. 1833 • Curtius, Naxos, Berl. 1846.)

COIN OF THE ISLAND OF NAXOS.

NAXUANA (Naγoνδο, Ptol. v. 13. § 12), a city on the N. bank of the river Araxes, now Nach- džděrds, a city of some importance in Armenian his-
NAZARETH.  

NEAR PATRAE. [ΗΠΑΤΑ.]

NEAETHUS (Νεαθός, Strab.; Νέαθος, Theocr.; Νεαθός, Lycophr.), a river on the E. coast of Brutium, falling into the gulf of Tar, 10 miles N. of Crotona, still called the Neto or Neto. Strabo derives its name from the circumstance that it was here that the Trojan women who were conducted as captives by a Greek fleet, set fire to the ships of the victors, and thus compelled them to settle in this part of Italy. (Strab. vi. p. 262; Plin. iii. 11. s. 15.) It is well known that the same legend is related of two other rivers, by many different localities, and appears to have been one of those which gradually travelled along the coast of Italy, in the same manner as the myths relating to Aeneas. The form of the name Νεαθός employed by Lycophron (Alex. 921) points evidently to the same fanciful derivation (from ναύς and άθος). Theoriceus alludes to the rich and varied herbage which grew on its banks (Ibid. iv. 24), and for which, according to a modern traveller, it is still remarkable. (Swinburne, Travels, vol. i. p. 313.)

NEANDREIA, NEANDRIUM, NEANDRUS (Νεάνδρεια, Νεάνδριον, Νεάνδρος : Eik. Νεάνδρειος or Νεάνδρος), a town in Troas, probably founded by Arcadians; in its name Strabo has confused it with its inhabitants, together with those of other neighbour- ing places, having removed to Alexandria. (Strab. xiiii. pp. 604, 606.) According to Sclavus (p. 36) and Stephanus Byz. (a. v.), Neandreia was a maritime town on the Hellespont; and Strabo might perhaps be supposed to be mistaken in placing it in the interior among the Hamathae, but he is so explicit in his description, marking its distance from New Ilim at 130 stadia, that it is scarcely possible to conceive him to be in the wrong. Hence Leake (Asia Minor, p. 274), adopting him as his guide, seeks the site of Neandreia in the lower valley of the Scamander, near the modern town of Nea. (L. E.)

NEANDRIA. [Νεάνδρια.]

NEANISSUS (Νέανισσος or Νεάνισσα), a town in Armenia Minor, on the south-east of Phrisea, and between this latter town and Dioceassaraea. (Ptol. v. 6. § 14.) No further particulars are known about the place.

NEAPOLIS, i. e. "the New City." In Europe. 1. (Νεάπολις; Eik. Νεάπολις) a town, and city, of Athens, and of Byzantium; and of Steph. B.; but coins have Νεάπολις, Neapolitanus: Napoli; in French and English Naples), one of the most considerable cities of Campania, situated on the northern shore of the gulf called the Cret or Sinus Cumanus, which now derives from it the name of Bay of Naples. All ancient writers agree in representing it as a Greek city, and a colony of the neighbouring Cumans; but the circumstances of its foundation are very obscurely related. Scymnus Chius tells us it was founded in pureness of an oracle; and Strabo calls it a Cumaean colony, but adds that it subsequently received an additional body of Chalcide and Athenian colonists, with some of the settlers from the neighbouring islands of the Pithacusae, and on this account was called Neapoli or the New City. (Strab. v. p. 246; Scymn. Ch. 253; Vell. Pat. i. 4.) Its Chalcide or Etonian origin is repeatedly alluded to by Statius, who was himself a native of the city (Silv. i. 2. 263, ii. 2. 94, iii. 5. 12); but these expressions probably refer to its being a colony from the Chalcide city of Cyme. The name itself sufficiently points to the fact that it was

ΝΕΑΘΟΣ (Να统计局), a small island near Lemnos, in which Philoctetes, according to some accounts, was bitten by a water-snake. (Steph. B. s. v.; comp. Ant. Caryt. Mirac. e. 9.) Piny places it between Lemnos and the Hellespont (ii. 87. s. 89). It is called in the charts Stratis, and by the modern Greeks Αγίος στραταρχής, the holy warrior, that is, St. Michael. (Walpole, Travels, f. p. 55.)
NEAPOLIS.

a more recent settlement than some one previously existing in the same neighbourhood; and that this did not refer merely to the parent city of Cumae, is proved by the fact that we find mention (though only at a comparatively late period) of a place called Palaeopolis, or " the Old City." (Liv. viii. 29.)

But the relations between the two are very obscure. No Greek author mentions Palaeopolis, of the existence of which we should be ignorant were it not for Livy, who tells us that it was not far from the site of Neapolis. From the passage of Strabo above cited, it seems clear that this was the original settlement of the Lucanians; and that the name of Neapolis was given to the later colony of Chalcidians and others who established themselves on a site at no great distance from the former one. A different version of its history, but of much more dubious authority, is cited by Philargyrus from the historian Latalius, according to which the Cumaeans abandoned their first colony from an apprehension lest it should eclipse the parent city, and that the name of Neapolis was given to the later colony by the Chalcidians and others who established themselves on a site at no great distance from the former one. A different version of its history, but of much more dubious authority, is cited by Philargyrus from the historian Latalius, according to which the Cumaeans abandoned their first colony from an apprehension lest it should eclipse the parent city, and that the name of Neapolis was given to the later colony by the Chalcidians and others who established themselves on a site at no great distance from the former one.

(Philargyr. ad Georg. iv. 56.)

The original name of Palaeopolis (which obviously could not be so designated until after the foundation of the new city) appears to have been Partenope (Plin. iii. 5. a. 2; Philargyr. ad Georg. iv. 564; Ovid, Met. xv. 711, &c.) Stephanus of Byzantium notices Partenope as a city of Cicoria (the ancient designation of Campania); but it is singular enough that both he and Strabo call it a colony of the Rhodians, without mentioning either the Chalcidians or Cumaeans. (Steph. B. c. v. Strab. xiv. p. 634.) On the other hand, Lycothron alludes to the place where the Siren Partenope was cast on shore, by the name of Falerum (Φαλήρου τύρας, Lycoth. Alex. 717); and Stephanus also says that Falerum was a city of Cicoria, the same which was afterwards called Neapolis. (Steph. B. c. v. Φαλήρου.) The name of Palaeopolis, or " the Old City", was adopted by the Lucanians, and it is not improbable, as suggested by Abeken (Mittel Italiens, p. 110), that there was originally a Tyrrhenian settlement on the spot. The legendary connection of the Siren Partenope with the site or neighbourhood of Neapolis was well established, and universally received; hence Dionysius designates the city as the abode of Partenope; and Strabo tells us that even in his time her tomb was still shown there, and games celebrated in her honour. (Strab. v. p. 246; Dionys. Per. 358; Enestath. ad loc.; Plin. iii. 5. a. 9.)

The site of the original settlement, or Old City (Palaeopolis), is nowhere indicated, but it seems most probable that it stood on the hill of Posillipo or Pausilius, and that the latter, which separates the bay of Posillipo from Baiae, that of Naples itself. The new town, on the contrary, adjoined the river Sebeto, a small stream still called the Sabato, and must, therefore, have occupied the same site with the more easterly portion of the modern city of Naples. (Abeken, Mittel Italiens, p. 111; Niebuhr, vol. iii. p. 179.) The latter city seems rapidly to have risen to great prosperity, and, in great measure, eclipsed the older settlement; but it is clear from Livy that Palaeopolis continued to subsist by the side of the new colony, until they both fell under the dominion of the Samnites. It does not appear that either the old or the new city was reduced by force of arms by the Campanian conquerors; they seem rather to have entered into a compromise with them, and admitted a body of the Campanians to the rights of citizenship, as well as to a share of the government. (Strab. v. p. 246.) But notwithstanding this, the Government was still greatly pro- dominated; and both Palaeopolis and Neapolis were, according to Livy, completely Greek cities at the time when they first came into contact with Rome, nearly a century after the conquest of Campania by the Samnites. (Livy. viii. 22.)

On that occasion the Palaeopolitans, who had had the temerity to provoke the hostility of Rome by invading upon the neighbouring Campanians, armed at the declaration of war which followed (a.c. 328), admitted within their walls a garrison of 2000 troops from Nola, and 4000 Samnites; and were thus enabled to withstand the arms of the consul Publius Philo, who occupied a post between the two cities so as to prevent all communication between them, while he laid regular siege to Palaeopolis. This was protracted for the following year; but at length the Palaeopolitans became weary of their Samnite allies, and the city was betrayed into the hands of the Romans by Charlians and Nymphus, two of the chief citizens. (Livy. vii. 22, 23, 25, 26.) The Palaeopolitans would appear to have followed their example and surrendered to the Romans by the Roman consul, whose circumstances may explain the fact that while Publius celebrated a triumph over the Palaeopolitans (Livy. vii. 26; Fast. Capit.), the Palaeopolitans were admitted to peace on favourable terms, and their liberties secured by a treaty (foedus Neapolitanum, Liv. l.c.).

From this time all mention of Palaeopolis disappears from history. Livy tells us that the chief authority, which the Palaeopolitans were permitted, was that of the elder, and that the city of the younger, was now transferred to Neapolis; and it is probable that the former town sank gradually into insignificance, while the community or "populus" was merged in that of Neapolis. So completely was this the case, that Dionysius, in relating the commencement of this very war, speaks only of the Neapolitans (Neapolitanus, ibid.), and Livy, evidently following the language of the older annalists, distinguishes them from the Palaeopolitans, though he expressly tells us that they formed only one community ("duabus urbis populos idem habitabit.", Liv. viii. 22.)

From this time Neapolis became, in fact, a mere dependency of Rome, though retaining the honorable title of an allied state (foedera civitas), and enjoying the protection of the powerful republic, with but a small share of the burdens usually thrown upon its dependent allies. So favourable, indeed, was the condition of the Palaeopolitans under their treaty that, at a later period, when all the cities of Italy obtained the Roman franchise, they, as well as the city of the younger, were rewarded with the privilege of professed boon. (Cic. pro Bult. 8, 24.) Hence it is no wonder that they continued throughout faithful to the Roman alliance, though more than once threatened by hostile armies. In B.C. 280, Pyrrhus approached the walls of Neapolis, with the view of making himself master of the city, but withdrew without accomplishing his purpose (Zonar. viii. 4); and in the Second Punic War, Hannibal, though he repeatedly ravaged its territory, was deterred by the strength of its fortifications from assailing the city itself. (Livy. xxiil. 1, 14, 15, xxv. 13.) Like the other maritime allies of Rome, the Neapolitans continued to furnish ships and sailors for the Roman
NEAPOLIS.

NAPLES.

siers throughout the long wars of the Republic. (Pol. i. 20; Liv. xxxv. 16.)

Though Neapolis thus passed gradually into the condition of a mere provincial town of the Roman state, and, after the passing of the Lex Julia, became an ordinary municipal town (Cic. pro Balb. 8, ad Fam. xiii. 30), it continued to be a flourishing and populous place far greater extent than any other city in this part of Italy, its Greek culture and institutions; while its population was still almost exclusively Greek. Thus Strabo tells us that, in his time, though they had become Roman citizens, they still had their gymnasia and quinquennal games, with contests of music and gymnastic exercises after the Greek fashion; and retained the division into Phratries, a circumstance attested also by inscriptions still extant. (Strab. v. p. 246; Varr. L. L. v. 85; Boeckh, C. I. vol. iii. p. 713.)

Before the close of the Republic, the increasing love of Greek manners and literature led many of the upper classes among the Romans to resort to Neapolis for education, or cultivation of these pursuits; while moreover the city had an agreeable and luxurious climate or the surpassing beauty of the scenery. It possessed also hot springs, similar to those of Baiae, though inferior in number (Strab. l. c.), and all these causes combined to render it one of the favourite resorts of the Roman nobility. Its prosperity received a rude shock, in B.c. 62, during the Civil War of Marcus and Sulla, when a body of the people deserted the city, having been admittance by treachery into the city, made a general massacre of the inhabitants (Appian, B. C. i. 89); but it seems to have quickly recovered this blow, as it was certainly a flourishing city in the time of Cicero, and continued such throughout the period of the Roman Empire. It is not improbable that it received a body of fresh colonists under Sulla, but certainly did not then assume the title of a Colonia, as it is repeatedly alluded to by Cicero as a Municipium. (Cic. ad Fam. xiii. 30, ad Att. x. 13.) Under the Empire we find it in inscriptions bearing the title of a Colonia (Gruter, Insocr. p. 110. 8, p. 373. 2); but there is much doubt as to the period when it obtained that rank. It is, however, noticed as such in the 1st century B.C., by Cicero, and was then possessed of a colony under Claudius, in which subsequent additions were made under Titus and the Antonines. (Liv. Colos. p. 235; Zumpt, de Colon. pp. 259, 384; Petron. Satyr. 44, 76; Boeckh, C. I. vol. iii. pp. 717, 718.)

Besides its immediate territory, Neapolis had formerly possessed the two important islands of Caprae and Asinaria (Ischia), but the latter had been wrested from it by force of arms, probably at the period of its first war with Rome. Caprea, on the other hand, continued subject to Neapolis without interruption till the time of Augustus, who, having taken a fancy to the island, annexed it to the imperial domain, giving up to the Neapolitans the more important island of Asinaria. (Suet. Aug. 92; Dion Cass. lii. 43.)

The same attractions which had rendered Neapolis a favourite residence of wealthy Romans under the Republic operated with still increased force under the Empire. Its gymnasia and public games continued to be still celebrated, and the emperors themselves contributed to promote them. (Suet. Aug. 98, Nov. 40; Vell. Pat. i. 123; Dion Cass. lxxvi. 26.) Its strong tincture of Greek manners, which caused it to be frequently distinguished as "the Greek city," attracted thither many grammarians and others; so that it came to acquire a reputation for learning, and is called by Martial and Columella "docta Parthenope" (Martial, v. 78. 14; Colum. x. 134); while its soft and luxurious climate rendered it the favourite resort of the indolent and effeminate. Hence Horace terms it "oleta Neapolis," and Ovid, "still more sweetly, oleta Neapoleania" (Hor. Epod. 5. 45; Ovid, Met. x. 711; Stat. Silv. iii. 78—88; Sil. Ital. xii. 31.) The coasts on both sides of it were lined with villas, among which the most celebrated was that of Vedius Pollio, on the ridge of hill between Neapolis and Puteoli, to which he had given the name of Papalypus (Papalypus); an appellation afterwards extended to the whole hill on which it stood, and which retains to the present day the name of Monte Posilippo. (Dion Cass. liv. 23; Plin. ix. 53. s. 78.)

Neapolis was a favourite residence of the emperor Nero, as well as of his predecessor Claudius; and it was in the theatre there that the former made his first appearance on the stage, before he ventured to do so publicly at Rome. (Tac. Ann. xii. 53.) It is well known also that it was for a considerable period the residence of Virgil, who composed, or at least finished, his Georgics there. (Virg. Georg. iv. 564.) Thither, also, his remains were transferred after his death; and his tomb was still extant there in the time of the poets Statius and Silius Italicus, who paid to it a visit, and expressed their reverence. The last-named poet himself died at Neapolis; he had a villa, which was his favourite place of residence, as it was also that of Statius, who, in several passages, appears to allude to it as the place of his birth. (Donat. Vit. Verg.; Plin. Ep. iii. 7; Martial, xi. 49; Stat. Silv. iii. 5. 13, iv. 4. 51—55.)

It is clear that Neapolis was at this period a provincial city of the first class; and though we meet with little historical mention of it during the later ages of the Empire, inscriptions sufficiently prove that it retained its consideration and importance. It appears to have escaped the ravages of the Goths and Vandals, which inflicted such severe blows upon the prosperity both of Capua and Nola (Hist. Macell. p. 522), and even under the Gothic king Theodoric, Cassiodorus speaks of it as still possessing a numerous population, and abounding in every kind of delight, both by sea and land. (Cassiod. Var. vi. 23.) In the Gothic wars which followed, it was taken by Belisarius, after a long siege, and a great part of the inhabitants put to the sword. A.D. 555. (Procop. B. G. i. 8—10.) It was retaken by Totila in A.D. 542 (Th. iii. 6—8), but again recovered by Narses soon after, and continued from this time subject to the supremacy of the Byzantine Empire, as a dependency of the exarchate of Ravenna, but under the government of its own duke. In the eighth century Paulus Diaconus still speaks of it as one of the "opulentissimas urbes" of Campania. (Hist. Langob. 17.) It was about this period that it threw off the yoke of the Byzantine emperors, and continued to enjoy a state of virtual independence, until it was conquered in A.D. 1140 by the Normans, and became the capital of the kingdom of Naples.

It is certain that the ancient city of Neapolis did not occupy nearly so great a space as the modern Naples, which is the largest and most populous city in Italy, and contains above 400,000 inhabitants. It appears to have extended on the E. as far as the river Seleucus, a small stream still called the Scela,
NEAPOLIS.

though more commonly known as the Fiume della Maddalena, which still forms the extreme limit of the suburbs of Naples on the E. side; from thence it probably extended as far as the mole and old castle, which bound the port on the W. Pliny speaks of the small island which he calls Megaris, and which can be no other than the rock now occupied by the Castel dell'Ovo, as situated between the uppermost houses of the town of Neapolis (Plin. iii. 6. s. 19); it is therefore clear that the city did not extend so far as this point. Immediately above the ancient portion of the city rises a steep hill, now crowned by the Castle of St. Elmo; and from thence there runs a narrow volcanic ridge, of no great elevation, but steep and abrupt, which continues without interruption in a SW. direction, till it ends in a headland immediately opposite to the island of Nisida or Nisida. It is the western portion of this ridge which was known in ancient times as the Mons Pausilypus, and is still called the Hill of Posilipo. It formed a marked barrier between the immediate environs of Neapolis and those of Puteoli and Baiae, and must have been a great obstacle to the free communication between the two cities; hence a tunnel was opened through the hill for the passage of the high-road, which has served that purpose ever since. This passage, called in ancient times the Crypta Neapolitana, and now known as the Grotta di Posilippo, is a remarkable work of its kind, and has been described by many modern travelers. It is 2244 feet long, and 21 feet high. The bottom of the tunnel is unequal, towards the entrance, is not less than 70 feet. It is probable, however, that the work has been much enlarged in later times. Seneca, in one of his letters, gives a greatly exaggerated view of its fancied horrors, arising from the darkness and dust. (Sen. Ep. 57.) Strabo assigns its construction to Cœcocius, probably the M. Cœcocius Nerva, who was superintendent of aqueducts under Tibérius, and who constructed a similar tunnel from the lake Avvenus to Cumaean (Strab. v. p. 245); and there is no reason to doubt this statement, though many Italian antiquarians have maintained that the work must be much more ancient. On the hill immediately above the E. entrance of the grotto is an ancient sepulchre designated by the name of Virgin Martyrium, and though brought into popular tradition is a very unsafe guide in such cases, there seems in this instance no sufficient reason to reject its testimony. We know, from the precise statement of Donatus, that the poet was buried on the road to Puteoli, within less than two miles from Naples ("via Puteolana intra lapidem secundum," Donat. Vit. Virg.; Hieron. Chron. ad Ol. 190), which agrees well with the site in question, especially if (as is probable) the high-road at that time passed over the hill, and not through the grotto beneath. The argument of Cluverius, who inferred, from the description of Statius (Silv. iv. 4. 50—55), that the tomb of Virgil was situated at the foot of Mount Vesuvius, is certainly untenable. (Cluver. Tomii i. 1133; Estuard's Classical Tour, vol. ii. pp. 370—880; Jorio, Guida de Posilippo, pp. 118, &c.)

Near the Capo di Posilippo, as the headland opposite to Nisida is now called, are the extensive ruins of a Roman villa, which are supposed to be those of the celebrated villa of Vedius Pollio, which gave name to the whole hill, and which he bequeathed by his will to Augustus. (Dion Cass. liv. 23; Plin. ix. 53. s. 78.) Immediately opposite to the headland, between it and the island of Nisida (Nesis), lies two small islets, or rather rocks, one of which now serves for the Lazzaretto,—the other, which is uninhabited, is called La Gagola; these are supposed to be the islands called by Statius Limon and Ulpiao. (Stat. Silv. ii. 2. 79, iii. 1. 149.) From their trifling size it is no wonder that they are not noticed by any other author. Recent excavations on the supposed site of the villa of Pollio have brought to light far more extensive remains than were previously known to exist, and which afford a strong illustration of the magnificent scale on which those edifices were constructed. Among the ruins thus brought to light are those of a theatre, the seats of which are cut out of the tufo rock; an Odeon, or theatre for music; a Basilica; besides numerous porticoes and other edifices, and extensive reservoirs for water. But the most remarkable work connected with these remains is a tunnel or gallery pierced through the promontory, which is actually longer than the Grotta di Posilippo. This work appears from an inscription to have been restored by the emperor Honorius; the period of its construction is wholly uncertain. (Baillet. d. Inst. Arch. 1841, p. 147—160; Avelling, Bullitt. Archéol. Napol. 1843, Nos. 4—6.) Many writers have assigned the extensive ruins visible on the hill of Posilippo to a villa of Lucullus; and it is certain that that statesman had a Neapolitan villa distinct from that at Misenum (Cic. Acad. ii. 3), but its site is nowhere indicated; and the supposition that it was taken by the Irish after it was passed into the hands of Vedius Pollio is not warranted by any ancient authority.

Though the neighbourhhood of Naples abounds on all sides in ancient remains, those which are still extant in the city itself are inconsiderable. Two arches of a Roman theatre in the street called Aristogipia, a fragment of an aqueduct known by the name of the Basilica Rosea, and the foundations of a temple dedicated to Castor and Pollux, incorporated into the church of St. Paolo, are all the ancient ruins now visible. But the inscriptions which have been discovered on the site, and are for the most part preserved in the museum, are numerous and interesting. They fully confirm the account given by ancient writers of the city, and the rise of Virgil, and through his influence became the poetic inspiration of the city, and notice its division into Phratries, which must have continued at least as late as the reign of Hadrian, since we find one of them named after his favourite Antonia. Others bore the names of Eumenides, Eunostides, &c., the origin of which may probably be traced back to the first foundation of the Cumaean colony. From some of these inscriptions we learn that the Greek language continued to be used there, even in public documents, as late as the second century after the Christian era. (Boeckh, C. I. vol. iii. pp. 714—750; Mommsen, Inscrip. Regna. Napol. pp. 127—131.)

CORinth of NeapolIs in Campania.

2. (Napoli), a city of Sardinia, and apparently one of the most considerable places in that island, was situated on the W. coast, at the southern extremity of
NEAPOLIS.
The gulf of Oristeno. The Itineraries place it 60 miles from Sulci, and 18 from Othoca (Oristeno). (Itin. Ant. p. 84.) The name would clearly seem to point to a Greek origin, but we have no account of its foundation or history. It is noticed by Pliny as one of the most important towns in Sardinia; and its name is found also in Ptolemy and the Itineraries. (Plin. iii. 7. a. 18; Pol. iii. 3. § 2; Itin. Ant. l. c.; Tab. Peut.; Geogr. Rav. v. 26.) Its ruins are still visible at the mouth of the river Patillona, where that stream forms a great estuary or lagoon, called the Sogno di Marcoedi, and present considerable remains of ancient buildings as well as the vestiges of a Roman road and aqueduct. The spot is marked by an ancient church called Sto Maria di Nadiu. (De la Marmor, Voy. de Sar- daigne, vol. ii. p. 357.)

The AQUA NEAPOLITANAR, mentioned by Ptolemy as well as in the Itineraries, which places them at a considerable distance inland, on the road from Othoca to Caralis, are certainly the mineral sources now known as the Bagni di Sardara, on the high-road from Cagliari to Oristeno. (Itin. Ant. p. 83; Pol. iii. 3. § 7; Geogr. Rav. v. 26; De la Marmor, l. c. p. 406.)

Apulia, of Apulis, not mentioned by any ancient writer, but the existence of which is attested by its coins. There seems good reason to place it at Poggiavano, between Barium and Egna, where numerous relics of antiquity have been discovered. (Romanelli, vol. ii. pp. 146—152; Millingen, Numism. de l’Italie, p. 147.)

4. A town on the isthmus of Palaestra, on the E. coast, between Aphytis and Aegae. (Herod. vii. 123.) In Leake’s map it is represented by the modern Polykastro.

5. A town of Macedonia, and the haven of Philippi, from which it was distant 10 M. P. (Strab. vii. p. 330; Pol. iii. 13. § 9; Sceym. 688; Plin. iv. 11; Herode.; Procop. Acad. iv. 4; Itin. Hierosol.) It may truly have been the same place as Tatumum (Adrales) famous for its gold-mines (Herod. ix. 75; comp. Böckh, Pub. Ecom. of Athens, pp. 8,228, trans.), and a seaport, as Strabo (v. 331) intimates: whence the proverb which celebrates Datum for its “good things.” (Zenob. Proe. Grae. Cent. inst. 71; Harpocr. s. v. Adrales.) Scylax (p. 27) does, indeed, say that Scylax believed thatDatumum was an Athenian colony; but he adds that he had not been true of his original Datum, his text is, perhaps, corrupt in this place, as in so many others, and his real meaning may have been that Neapolis was a colony which the Athenians had established at Datum. Zenobius (l. c.) and Eustathius (ad Dionys. Perieig. 517) both assert that Datum was a colony of Thassos; which is highly probable, as the Thasians had several colonies on this coast. If Neapolis was a settlement of Athens, its foundation was, it may be inferred, later than that of Amphipolis. At the great struggle at Philippi the galleys of Brutus and Cassius were moored off Neapolis. (Appian, B. C. iv. 106; Dion Cass. 39. 7; Paus. 3. 8.) In a small Turkish village of Kanael (Leaks, North. Greece, vol. iii. p. 180, comp. pp. 217, 224), that Paul (Acts, xvi. 11) landed. The shore of the mainland in this part is low, but the mountains rise to a considerable height behind. To the W. of the channel which separates it from Thasos, the coast recedes and forms a bay, within which, on a promontory with a port on each side, the town was situated. (Conybeare and Howson, 1149.)

NEAPOLIS.

Life and Epit. of St. Paul, i. p. 308.) Traces of paved military roads are still found, as well as remains of a great aqueduct on two tiers of Roman arches, and Latin inscriptions. (Clarke, Trav. vol. viii. p. 49.) For coins of Neapolis, see Eckhel, vol. ii. p. 72; Baschi, vol. iii. p. 1 p. 1149.

COIN OF NEAPOLIS IN MACEDONIA.

NEAPOLIS. II. In Asia. 1. An important city of Palaeastina, commonly supposed to be identical with the Sichem or Shechem, of the Old Testament. Thus Ephraim mentions them together. (by Ζυγονοι, τουν Ισραηλ κατ’ ζυγον Ναυσολας, add. Haseees, lib. iii. tom. l. p. 1055, comp. 1068.) Sebeusins and St. Jerome, however, place Sichem (Ζυγονοι, ζυγον, ζυγον) in the suburbs of Neapolis (Onomast. s. v. Terebinthus, Sichem); and Luz is placed near to, and, according to the former, viii. M. P., according to the latter, iii. M. P., from Neapolis (s. v. Luz), which would imply a considerable interval between the ancient and the modern city. In order to reconcile this discrepancy, Böckh suggests that, while the ancient city gradually decayed, the new city was extended by gradual accretion in the opposite direction, so as to widen the interval; and he cites in illustration the parallel case of Ueireth and Fakcles. (Palaeastina, vol. ii. p. 1004, 1005.) Another ancient name of this city occurs only in one passage of St. John’s Gospel (iv. 5), where it is called Sichar (Σιχαρ); for although St. Jerome maintains this to be a corrupt reading for Schem (Epiphan. Palaest., Ep. ixi. iv. tom. iv. p. 676, Quast. in Genes. c. xiv. ver. 22, tom ii. p. 545), his correction of that is still in use; and as he adds, even in his age, has no authority in any known codex or version. Another of its ancient names which has exercised the ingenuity of the learned, occurs in Pliny, who reckons among the cities of Samaria, “Neapolis quod antea Mamorba dicebatur” (v. 13), evidently a mistake for Mabortha, which Josephus gives for the native name of Neapolis (B. J. iv. 8 § 2); unless, as Böckh expresses, both readings are to be corrected from coins, which he shrewdly remarks are less liable to corruption than MSS., and which read Mopsia (Mopsia), which that learned writer takes to be the classical form of the Hebrew word Moreh, which was associated with Sichem, both in the Old Testament and the Rabbinical commentators. (Gen. Chonos, 3. s. v. 80; Böckh, Discor. i. p. 138—140.) The same writer explains the name Sichar, in St. John, as a name of reproach, contemptuously assigned to the city by the Jews as the seat of error (the Hebrew מופל signifying mendacium, falsum), and borrowed from the prophet Habakkuk, where the two words Moreh Shaker (مول) occur in convenient
proximity, translated in our version, "a teacher of
lies" (ii. 18). The time when it assumed its new
name, which it still retains almost uncorrupted in
Nabda, is marked by the authors above cited and
below. Pleraika, dating in the reign of Titus,
under whom Josephus wrote, and the earliest coins
bearing the inscription ΦΑΑΟΤ, NEAPIOA. ΖΑΜΑΠ,
are of the same reign.

Sichem is an exceedingly ancient town, and is
frequently mentioned in the history of the earliest
patriarchs. It was the first place of Abraham's
sojourn when entering into the land of Canaan, and there
he built an altar to the Lord. (Gen. xiii. 6.) The
connection of Jacob with the place is marked by the
traditional well still called by his name, and referred to
as an undoubtedly authentic tradition, eighteen
centuries ago—that is, at the expiration of about half
the period that has elapsed since the time of the
patriarch (Gen. xxxii. 16, xxxiv.; St. John's, iv. 5, 6, 12); nor need the authority of the other local
tradition of Joseph's tomb be questioned, as he was
certainly deposited there on the coming of the
Israelites, and the reverence paid by them to their
fathers' sepulchres forbids us to suppose that it
could fall into oblivion. (Gen. i. 25; Josh. xxxiv.
32.) That tomb was probably situated in the
"city of the mountains" where Jacob spread his tent,
which he had bought of the children of Hamor, the
Shechemites' father, for a hundred pieces of money, but
which the patriarch himself represents as taken
(probably recovered) "from the Amorites with his
sword and with his bow" (Gen. xlvii. 22), and which
he retained as pasture-ground for his cattle solely
from the vicinity (Gen. xxxv. 12—14). In the division
of the land, it fell to the tribe of Ephraim, and is described as situated in Mount Ephraim; it was a Levitical city, and one of the three cities of refuge on the west of Jordan. (Josh. xx. 7, xx. 20, 31.) There it was that Joshua
assembled the national convention shortly before his
death (xxiv. 1, 25); at which time he "took a great
stone, and set it up there under an oak, that was by
the sanctuary of the Lord" (ver. 26), proving that the
tabernacle was then at Shechem, probably in the
identical place, the memory of which the Samaritan
tradition has perpetuated to this day. [Ebal; Gerizim.] The pillar erected by Joshua continued
to be held in veneration throughout the time of the
Judges; there the Shechemites "made Abimelech
king, by the plain (ξβακ) of the pillar that was in
Shechem,"—his own birthplace, and the scene of his
father Gideon's victory over the Midianites (Judges,
vii. 1, viii. 31, ix. 6); and there it was that the
Israelites assembled to make Rehoboam king. (1 Kings,
xii. 1; 2 Chron. x. 1.) The remainder of its story is
so identified with that of its sacred Mount Gerizim that it has been anticipated under that
article. There can be little doubt that this is the
city of Samaria mentioned in the Acts of the Apostles,
where Philip preached with such success, and which
furnished to the Church one of its earliest and most
dangerous adversaries, and its first and most
distinguished polemic. Not that Simon Magus was a native of Neapolis, but a village of Samaria
named Giton (Γετών, Just. Mart. Apol. i. 36; comp. Euseb. H. E., ii. 13), but Neapolis was the
principal theatre of his sorceries. Justin Martyr
was a native of the city, according to Eusebius (τέως
Φαλαινας ναός καλείται Ἰωνία τῆς Παλαιστίνης, Hist.
Eccl. ii. 18). Sichem is placed by Eusebius and St. Jerome, a. M. P. from Shiloh, which agrees well with
the interval between Silas and Nabda. (Onomast. a. s. Zos. 6. 3.) But it must be observed, that these
authors distinguish between the Synchem of Ephraim,
and the Synchem of Joseph,—which, having been
destroyed and early with salt by Abimelech, was
restored by Jeroboam (comp. Judges, ix. 45, with 1 Kings, xii. 25), who, Josephus says, built his palace there (Ant. viii. 8. § 4)—and the city of refuge in
Mount Ephraim, which they assign to Manasseh,
and, with strange inconsistency, immediately identify
with the preceding by the fact that Joseph's bones
were buried there. (Onomast. a. s. Jory 4.) The
author of the Jerusalem Itinerary places it xi. M. P.
from Jerusalem.

The modern town of Nabda is situated in a valley
lying between Mount Ebal on the N., and Mount
Gerizim on the S., giving to the valley a direction from E. to W. On the E., the Nabda valley opens
into a much wider valley, about 3 miles from the
town; this valley is called Erd-Makkah. Where the
Nabda valley meets the Erd-Makkah, at the NE.
base of Mount Gerizim, is Jacob's well, and, hard by
the well, is the traditional site of Joseph's tomb,
both of them close to the Moabite village of Askar,
situated at the SE. base of Mount Ebal. Possibly
this Askar may mark the site of ancient Sychar, the
village on whose northern slope an Israelite spread
his tent, which he had bought of the children of Hamor,
Shechem's father, for a hundred pieces of money, but
which the patriarch himself represents as taken
(probably recovered) "from the Amorites with his
sword and with his bow" (Gen. xlvii. 22), and which
he retained as pasture-ground for his cattle solely
from the vicinity (Gen. xxxv. 12—14). In the division
of the land, it fell to the tribe of Ephraim, and is described as situated in Mount Ephraim; it was a Levitical city, and one of the three cities of refuge on the west of Jordan. (Josh.
xx. 7, xx. 20, 31.) There it was that Joshua
assembled the national convention shortly before his
death (xxiv. 1, 25); at which time he "took a great
stone, and set it up there under an oak, that was by
the sanctuary of the Lord" (ver. 26), proving that the
tabernacle was then at Shechem, probably in the
identical place, the memory of which the Samaritan
tradition has perpetuated to this day. [Ebal; Gerizim.] The pillar erected by Joshua continued
to be held in veneration throughout the time of the
Judges; there the Shechemites "made Abimelech
king, by the plain (ξβακ) of the pillar that was in
Shechem,"—his own birthplace, and the scene of his
father Gideon's victory over the Midianites (Judges,
vii. 1, viii. 31, ix. 6); and there it was that the
Israelites assembled to make Rehoboam king. (1 Kings,
xii. 1; 2 Chron. x. 1.) The remainder of its story is
so identified with that of its sacred Mount Gerizim that it has been anticipated under that
article. There can be little doubt that this is the
city of Samaria mentioned in the Acts of the Apostles,
where Philip preached with such success, and which
furnished to the Church one of its earliest and most
dangerous adversaries, and its first and most
distinguished polemic. Not that Simon Magus was a native of Neapolis, but a village of Samaria
named Giton (Γετών, Just. Mart. Apol. i. 36; comp. Euseb. H. E., ii. 13), but Neapolis was the
principal theatre of his sorceries. Justin Martyr
was a native of the city, according to Eusebius (τέως
Φαλαινας ναός καλείται Ἰωνία τῆς Παλαιστίνης, Hist.
Eccl. ii. 18). Sichem is placed by Eusebius and St. Jerome, a. M. P. from Shiloh, which agrees well with

NEAPOLIS.

NEAPOLIS.

NEAPOLIS IN PALESTINE.
NEAPOLIS.

the name of the city written among its branches.

(Eckhel, vol. iii. pp. 433—435; see GERRIZEN, Vol. I. p. 992. a.)

[G. W.]

2. A town of Colchis, south of Dioscurias, and north of Phasis, on the river Chobos or Cherson. (Struc. p. 27; Plut. v. 10. § 2.)

3. A town on the coast of Ionia, south of Ephesus, on the road between Assae and Marathus. It was a small place which at first belonged to the Ephesians, and afterwards to the Samians, who received it in exchange for Marathus. (Strab. xiv. p. 639.)

4. A town in Caria, between Orthosia and Aphrodisias, at the foot of Mount Cnemus, in the neighbourhood of Harpasus. (Plut. v. 2 § 19; Hieroc. p. 688.)

5. A town in Phocis, a few miles south of Antioch. (Plut. v. 4 § 11; Hieroc. p. 672.)

6. Small a place situated on the Ephrathas, at the distance of 14 schoeni (about 40 miles) below Bessuchana. Ritter has tried, but unsuccessfully (if the present names be correct) to identify it with Modisa. (Lust. Mon. Top. 1. 12, ed. Müller, 1855.)

NEBRODES MONS.

3. A town of the Cyrenaics, which Polteny (iv. § 11) places in 31° 10' lat. and 46° long. The town of Masubi or Mabbi, with which it has been identified, and which appears to be a corruption of the old name, with no other change than what might be expected from the Arabic pronunciation, does not quite agree with the position assigned by Polteny to Neapolis. (Beechey, Explo. to the N. Coast of Africa, p. 350; Barth, Wanderungen, pp. 391. 405.)

[LEIPZIG MAGNA]

4. A town of Umbriani, upon a harbour (Scylax, p. 47; Stoaidemus, § 107), the same as the Marcum, the same as the Marcum, Plut. v. 3 § 11; a "municipium," as it appears from the Antonine Itinerary ("Marcum Manures," Pest. Tab.; Geog. Rav. iii. 5); this latter name indicates a Phoenician origin. (Moerssen, Phoenix. Alterth. vol. ii. p. 494.)

5. A town of the Carthaginians, upon the Sinus Neapolitanus, from which it was the shortest distance to Sicily—a voyage of two days and a night. (Thuc. vi. 50; Scylax, p. 47; Stoaidemus, § 107; Strab. xvii. p. 834.)

It was taken by Agathocles in his African campaign. (Diodor. xx. 17.) Under the earlier emperors it was a "liberum oppidum" (Plin. iv. 3), afterwards under Hadrian a "colonia." (Plin. iv. 3 § 14; Stat. Anton.: Pest. Tab.; Geog. Rav. v. 5.)

The old name is retained in the modern Nebre, where Barth (Wandelungen, comp. Trav. 141) comp. Trav. 161) found some remains of antiquity. [E. B. J.]

NEBRODES. (Gallarca, Vol. I. p. 933. a.)

NEBO. 1. (Nabu, LXX.), the mountain from which the patriarch Moses was permitted to view the Promised Land. Its situation is thus described:

"Get thee up into this mountain Abarim, unto the mount Nebo, that is over against Jericho." (Deut. xxxii. 49.)

2. Moses went up from the plains of Moab unto the mountain of Nebo, to the top of Pisgah, that is over against Jericho. We have here three names of the mount, of which, however, Abarim may designate the range or mountain region rising from the high table-land of Moab (comp. Numbers, xxvii. 12, xxxii. 47; while Pisgah is the most appropriate for a hill, as it is rendered in our margin, wherever the name occurs in the text (Numbers xxxii. 20; Deut. iii. 27, xxxiv. 1), and in several oriental versions (Lex. et al. MDCC.), Nebo the proper name of some one particular peak. This name is regarded by M. Quatremère as of Arabic origin, identical with that of the celebrated Chaldean divinity (Isis, xlv. 1) so frequently compounded with the names of their most eminent sages. See more especially for names of like origin in the same parts. (Mémories sur les Nabatanies, p. 87.)

It is placed by Eusebii and St. Jerome 6 miles west of Ebusus (Hebron), over against Jericho, on the road from Livias to Ebusus, near to Mount Phogor (Pnon): it was still called by its ancient name (Onomast. s. w. Nabou, Abarum). Dr. Robinson has truly remarked that over against Jericho, "there is no peak or point perceptible higher than the rest; but all is apparently one level line of summit, without peaks or papas." ... "Seetzen, Burckhardt, and also Irby and Mangles, have all found Mount Nebo in Jebel 'Atâd, a high mountain south of the Zarka Mâsin" (Arnon). This, however, is far south of the latitude of Jericho. (Dr. Robinson, Bd. Res. vol. ii. p. 307, n. 1, vol. iii. appendix, p. 170.)

2. A town of the tribe of Reuben, mentioned with Hebron, Elealeh, and others (Numbers xxxii. 38); doubtless the site now marked by Nebro in the Be'la, south of Es-Salt (Robinson, Bd. Res. vol. ii. p. 307, n. 1, vol. iii. appendix, p. 170), i. e. in the same district with Hebron and ElÂ‘âd, the modern representatives of Hebron and Elealeh. Whether this town was connected with the synonymous mountain is very uncertain.

3. A town in Judah. (Euseb. ii. 29; Vechem. vii. 33.)

NEBRISSA. (Nabriina.)

NEBRODES MONS (ναβροδιός, Strab.: Mons di Montis, or, because in the most considerable ranges of mountains in Sicily. The name is evidently applied to a part of the range which commences near Capo Pelorius, and extends along the northern side of the island, the whole way to the neighbourhood of Panormus. Though broken into various mountain groups, there is no real interruption in the chain throughout this extent, and the names applied to different parts of it seem to have been employed (as usual in such cases) with much vagueness. The part of the chain nearest to Cape Pelorius, was called Mons Neptunius, and therefore the Mons Nebrodes must have been further to the
West. Strabo speaks of it as rising opposite to Asta, so that he would seem to apply the name to the mountains between that peak and the northern coast, which are still covered with the extensive forests of Carisia. Silina Italicorum, on the other hand, tells us that it was in the Mons Nebrodos the two rivers of the name of Himera had their sources, which can refer only to the more westerly group of the Monti di Madonie, the most lofty range in Sicily after Asta, and this indentification is generally adopted. But, as already observed, there is no reason to suppose that the two names are the same. Silina Italicorum also speaks of the Mons Nebrodos as covered with forests, and Solinus derives its name from the number of fawns that wandered through them; an etymology, however, only fictitious. (Strab. vi. p. 274; Solin. 5. §§ 11, 12; Sil. Ital. xiv. 236; Guer. Sicili. p. 254; Pauw. de Reb. Sic. x. 2. p. 414.)

NECUBERES. [Mauritania.] NEBA (Nabae), now Naib, a river of Peloponnesus, rises in Mt. Ceraunus, a branch of Mt. Lycaeus in Arcadia, and flows with many windings in a westerly direction past Phigalia, first forming the boundary between Arcadia and Messenia, and afterwards between Elis and Messenia. It falls into the Ionian sea, and near its mouth is navigable for small boats. (Paus. xxii. 3. § 2, 3; Lyc. 3. viii. 41. §§ 1, 2; Strab. viii. pp. 344, 348; Leake, Morea, vol. i. pp. 66, 485; Ross, Reisen im Peloponnes, p. 84; Curtius, Peloponnesos, vol. ii. pp. 153, 185.)

NEDAD, a river of Pannonia, mentioned only by Jornandes (de Reb. Got. 50), so as the river on the banks of which the Huns were defeated by the Gepids. The name is in some MSS. Nedao, and the river believed to be the modern Nyégra. [L. S.]

NEDINUM (Nédonum, Ptol. ii. 16. § 10; Geog. Rav. iv. 16; Neditea, Orelli, fasc. 3452), a town of the Liburni, on the road from Scicia to Iadera (Psaut. Tab.), identified with the ruins near Nada. Orelli (i. c.) refers the inscription to Novediad. (Wilkinson, Dalmatia and Montenegro, vol. i. p. 93.) [E. B. J.]

NEDON. [Mesenken, p. 342, b.]

NEGRA. [Mahnya, pp. 284, 285.]

NELCYnda (ya Néulcyn, Peripl. §§ 53, 54, ed. Müller, 1855), a port on the W. coast of India, in the province called Limyrica, without doubt the same as that now called Nilasera. It is in lat. 11° 10'. It is mentioned in various authorities under names slightly modified one from the other: thus, it is the Melicyn of Potomay (vii. 1. § 9), in the country of the Aii; the portus gentis Nebcyclon of Pinia (vi. 26. a. 104), which was also called Bacara or Baraco; the Nicylda of the Pentingerian Table; and Niconys of the Geogr. Rav. (ii. 1). The name is certainly of Indian origin, and may be derived, as suggested by Bircher (v. p. 515) from Nilakhanda, the blue country. Other derivations, however, have been proposed for it. (Vincent, Periplus, ii. p. 445; Bennell, Mem. Hibern. xii. 48; Gosselin, iii. p. 227.) [V.]

NELEUS. [Europa, Vol. i. p. 372, a.]

NELTA (Néla), a town of Magnesia in Thess., formerly called Alae, and mentioned in various authorities. Leake identifies it with the remains of a small Hellenic town above Lekbonia. (Strab. ixi. p. 436; Leake, Northern Greece, vol. iv. p. 379.)

NELO, a small river of Hispania Tarraconensis, in the territory of the Astures, and on the N. coast of Spain; probably the Río de la Puente. (Plin. iv. 20. 94; Ubert, vol. ii. p. 299.) [T. H. D.]

NEMALONI, an Alpine people. In the Trophy of the Alps the name of the Nemaloni occurs between the Brodizium and Edonate. (Plin. iii. 30.) The site of this people is uncertain. It is a mere guess that they are some of those at Mecina in the valley of Barceloneta. [G. L.]

NEMAUSSUS (Niauowos; Eöd. Niauowos, Nemauzsus; Nimas), a city of Gallia Narbonensis on the road from Arlate (Arles) through Narbo (Narbonne) into Spain. Ptolemy (i. 10. § 10) calls it Nemausus Colonia, but he places it in the same latitude as a Colonia Tingitana, ten degrees north of Arlate; which are great blunders. Nemausus was the chief place of the Voceis Aracoenciai; "with respect to numbers of foreigners and those engaged in trade (says Strab. iv. p. 186) much inferior to Narbo, but with respect to its population much superior; for it has subject to it twenty-four villages of people of the same stock, populous villages which are contributory to Nemausus, which are in the same way called the Laurian (Jus Lati or Latinitas). By virtue of this right those who have obtained the honour of an sedileia and quasestoration in Nemausus become Roman citizens; and for this reason this people is not under the orders of the governors from Rome. Now the city is situated on the road from Narbo to Spain, is easy travelling, and in the winter and spring is muddy and washed by streams. Some of these streams are passed by boats, and others by bridges of wood or stone. The wintry torrents are the cause of the trouble from the water, for these torrents sometimes as late as the summer descend from the Alpes, washing the country."

Strabo fixes the site of Nemausus about 100 stadia from the Rhone, at a point opposite to Tarascon, and 720 stadia from Narbo. In another place (iv. p. 178) Strabo estimates the distance from Narbo to Nemausus at 88 M. P. One of the Itin. routes makes it 91 M. P. from Narbo to Nemausus. Strabo's two distances do not agree, for 720 stadia are 90 M. P. The site of this place is certain. Tisch's middle age documents the name is written Nemes (D'Auvilure). There seems to be no authority for writing the modern name Nimes; and yet Nimes, as it is now properly written, supposes a prior form Nimos. Nimes is the present capital of the arrondissement of Gard, the richest in Roman remains of all the districts of the country.

The twenty-four smaller places that were attached (attribuia) to Nemausus are mentioned by Pliny (iii. 4). The territory of Nemausus produced good cheese, which was carried to Rome (Plin. xi. 42). This cheese was made on the Cerensium, and Pliny appears to include Mons Lucrinus in the territory of Nemausus. Latera (Laticera) on the Lédus (Lac) west of Nemausus was in the territory, which probably extended through Ugentum eastward to the Rhone. Nemausus was an old Gallic town. The name is the same that Strabo gives with a slight variation (Nemesos) to Augustonemetum or Clermonont in Avergont. The element Nemas appears in the name of several Gallic towns. Nemausus was most likely in Corinthian territory, which he gave gates and walls to the colony. There is a bronze medal of Nemasus in the Museum of Arvensium, the so-called Pied de Biche, on one side of which is the legend Col. Mem. with a crocodile chained to a palm-
tree, which may probably commemorate the conquest of Egypt; on the other are two heads, supposed to be Augustus and Agrippa, with the inscription IMP. P. F. DIVI. F. This medal has also been found in other places. It is figured below.

COIN OF NEMAUSUS.

Nimes contains many memorials of its Roman splendour. The amphitheatre, which is in good preservation, is larger than that of Verona in Italy; and it is estimated that it would contain 17,000 persons. It stands in an open space, cleared of all buildings and obstructions. It has the massive and imposing appearance of the amphitheatre of Arles; but it is more complete. A man may make the circuit on the flat which runs round the upper story, except for about one-sixth of the circuit, where the cornice and the flat are broken down.

The greater diameter is about 437 English feet, which includes the thickness of the walls. The exterior height on the outside is nearly 70 English feet. The exterior face of the building consists of a ground story, and a story above, which is crowned by an attic. There are sixty well proportioned arches in the ground story, all of the same size except four entrances, larger than the rest, which correspond to the four cardinal points. These arches open on a gallery, which runs all round the interior of the building. The story above has also sixty arches. All along the circumference of the attic there are consoles, placed at equal distances, two and two, and pierced in the middle by round holes. These holes received the poles which supported an awning to shelter the spectators from the sun and rain. When it was complete, there were thirty rows of seats in the interior. At present there are only seventeen. The stones of the upper seats are of enormous dimensions, some of them 12 feet long, and 2 feet in width.

The temple now called the Maison Carrée is a parallelogram on the plan, about 76 English feet long, and 40 wide. It is what is called pseudo-peripteral, with thirty Corinthian fluted pillars, all of which are engaged in the walls, except six on the face and two on each side of the front portico, ten in all. The portico has, consequently, a considerable depth compared with the width. The columns are ten diameters and a quarter in height. The temple is highly enriched in a good style. Séguier (1758) attempted to prove that this temple was dedicated to C. and L. Curtes, a family of Agrippa by Julia, the daughter of Augustus. But M. Auguste Pélet has within the present century shown that it was dedicated to M. Aurelius and L. Verus. The excavations which have been made round the Maison Carrée since 1821 show that it was once surrounded by a colonnade, which seems to have been the boundary of a forum, within which the temple was placed. The Maison Carrée, after having passed through many hands, and been applied to many purposes, is now a museum of painting and antiquities. Arthur Young (Travels in France, 2nd ed. vol. i. p. 48) says “that the Maison Carrée is beyond comparison the most light, elegant, and pleasing building I ever beheld.” Nobody will contradict this.

The famous fountain of Nemausus, which Ausonius mentions (Ordo Nob. Urb., Burdigalae)—

"Non Aponus potu, vitrea non iuso Nemausus Purior"—

still exists; and there are some traces of the ancient construction, though the whole is a modern restoration. But the great supply of water to Nemausus was by the aqueduct now called the Pont du Gard, and it is said that this aqueduct terminated by a subterranean passage in the side of the rock of the fountain. A building called the Temple of Diana, and a large edifice called Torus Magna (Turris Magna), which appears to have been a sepulchral monument, the gate of Augustus, and the gate called of France, are the chief remaining monuments of Nemausus.

The noblest Roman monument in France is the aqueduct called the Pont du Gard, which is between three and four leagues from Nîmes. Over this aque-
duct the waters of the springs of the Euro and Aescus
near Usis, were brought to Nemazuus. The river Gar-
don, the ancient Vardon, is deep just above the aque-
duct. The channel is sunk between rugged rocks, on
which scattered shrubs grow. The river rises in the
Cevennes, and is subject to floods, which would have
destroyed a less solid structure than this Roman bridge.
The bridge is built where the valley is contracted by the
rocks, and in its ordinary state all the water passes under
one arch. The best view of the bridge is from the side
above it. The other side is disfigured by a modern structure of
the same dimensions as the lower range of arches; it is a
bridge attached to the lower arches of the Roman
bridge, and is used for the passage of carts and
horses over the Gardon.

There are three tiers of arches. The lowest tier
consists of six arches; that under which the water
flows is the largest. The width of this arch is said
to be about 50 English feet, and the height from
the surface of the water is about 65 feet. The
second tier contains eleven arches, six of which cor-
respond to those below, but they appear to be wider,
and the piers are not so thick as those of the lowest
tier. The height of the second tier is said to be
about 64 feet; but some of these dimensions may
not be very accurate. The third tier has thirty-five
arches, or thereabouts, making a length, as it is
said, of about 870 English feet. It is also
feet high to the top of the great slab of stone
which cover it. These slabs lie across the channel
in which the water was conveyed over the bridge
and they project a little so as to form a sort of
parapet.
The whole height of the three tiers, if the
dimensions are correctly given, is about 155
feet. It is generally said that the bridge is
built of stones, without mortar or cement.

The stones of the two lower tiers are without cement,
but the arches of the highest tier, which are
in which the water was conveyed over the
bridge, are cemented. At
the north end of the aqueduct the highest tier of
arches and the water channel are higher than the
level of the channel. There is no trace of the
ditch having been pierced; and an inte-
man, who lives near the bridge, says that
the aqueduct was carried round the hill, and that
it was pierced another hill further on, where the
bridge still exists.

The stone of this bridge is a yellowish colour.
It is visible under the sun from the west side, the bridge
has a bright yellow tint, with patches of dark
colour, owing to the weather. The stone in the
highest tier is a concretion of shells and sand, and
that in the lower tiers appears to be the same. In
the stones in the highest tier there are halves of a
bivalve shell completely preserved. The stone also
contains kristalline bits of rough quartz rock, and many
small rounded pebbles. In the floods the Gardon
rises 30 feet above its ordinary level, and the
water will then pass under all the arches of the
lowest tier. The piers of this tier show some marks
of being worn by the water. But the bridge is still
solid and strong, a magnificent monument of the
grandeur of Roman conceptions, and of the boldness
of their execution.

There are many works which treat of the an-
tiquities of Nemea. Some are quoted and extracts
from them are printed in the Guide du Voya-
[LG.]
ger, par Richard and E. Hocquart.

NE MEA. (Νεμέα, Ιον. Νεμέαν; Adj. Νεμεαῖος,
Νεμεάνων, Nemeaean, Nemean), the name of a valley in the
territory of Cleonae, where Hercules slew the Ne-
mean lion, and where the Nemean games were
celebrated every other year. It is described by
Strabo as situated between Cleonae and Phlius
(viii. p. 377). The valley lies in a direction
nearly north and south, and is about two or three
miles long, and from half to three quarters of a mile
in breadth. It is shut in on every side by moun-
tains, and is hence called by Pindar a deep
(Bedêros, Nem. 18.). There is a remote
mountain on the NE, called in ancient
Apessas (Ἀπεσᾶς), now Faula, nearly 3000
high, with a flat summit, which is visible from
Neméa and Corinth. On this mountain Perseus is said
to have first sacrificed to Zeus Apessantis. (Paus. 15.
§ 3; Steph. B. a. v. Ἀπέσας; Stat. Theb. 460, seq.) Thucydides gives Nemea the epithet
"well-watered." (τεθάλασσα Νεμέης νήπιος,
Thuc. ii. 189.) Several rivulets descend from the
rounding mountains, which collect in the plain,
form a river, which flows northward through
ridges of Apessas, and falls into the Corinthian
sea in the lower part of its source the source
between the territories of Sicyon and Corinth.

The river also bore the name of Nemea (Strab.
p. 382; Diod. xiv. 83; Liv. xxxiii. 15) but it
was dependent for its supply of water upon the
season of the year, it was sometimes called the
mean Charadra. (Aesch. de Fars. Log. § 162;
Bekker; Ἀρχαῦα, Xen. Hell. iv. 2. § 15.) The
mountains, which enclose the valley, have several
natural caverns, one of which, at the distance of
stades from the sacred grove of Nemea and on
road named Tre tus, from the latter place to Myrene
was pointed out as the cave of the Nemeaean
(Paus. ii. 15. § 2.) The name of Nemea was strictly applied to
the sacred grove in which the games were celebrated
Like Olympia and the sanctuary at the Corinthian
NEMENTURI.

Isthmus, it was not a town. The sacred grove contained only the temple, theatre, stadium, and other monuments. There was a village in the neighbourhood called Bembina (Bambina), of which, however, the exact site is unknown. (Strab. viii. p. 377; Steph. B. s. e.) The haunts of the Nemetons were supposed to have been near Bembina. (Theoc. xxv. 202.)

The chief building in the sacred grove was the temple of Zeus Nemestos, the patron god of the place. When visited by Pananias the roof had fallen, and the staine no longer remained (G. 15. § 3). Three columns of the temple are still standing, amidst a vast heap of ruins. "Two of these columns belong to the pronao; and were placed as usual between antae; they are 4 feet 7 inches in diameter at the base, and still support their architrave. The third column, which belonged to the outer range, is 5 feet 3 inches in diameter at the base, and about 34 feet high, including a capital of 2 feet. Its distance from the corresponding column of the pronao is 18 feet. The total height of the three members of the entablature was 8 feet 2 inches. The general intercolumniation of the peristyle was 7 feet; at the angles, 5 feet 10 inches. From the front of the pronao to the extremity of the cell within, the length was 95 feet; the breadth of the cell within, 31 feet; the thickness of the walls, 3 feet. The temple owned a heraestyle, of about 65 feet in breadth, on the upper step of the stylobate, which consisted of three steps: the number of columns on the sides, and consequently the length of the temple, I could not ascertain." (Leake.) Though of the Doric order, the columns are as slender as some of the specimens of the Ionic, and are so different from the older Doric examples, that we ought perhaps to ascribe to the temple a date subsequent to the Persian wars.

Among the other monuments in the sacred grove were the tombs of Opheltes, and of his father Lycurgus. The former was surrounded with a stone enclosure, and contained certain altars; the latter was a mound of earth. (Paus. ii. 15. § 8.) Pausanias mentions a Herma of Opheltes in Ierapetra. The latter is, doubtless, the source of water near the Turkish fountain, which is now without water. At the foot of the mountain, to the left of this spot, are the remains of the stadium. Between the stadium and the temple of Zeus, on the left of the path, are some Hellenic foundations, and two fragments of Doric columns. Near the temple are the ruins of a small church, which contains some Doric fragments. (Leake, Morea, vol. iii. p. 327, seq.; Curtius, Peloponnesius, vol. ii. p. 505, seq.)

For an account of the Nemean festival, see Dict. of Antiq., e. v.

NEMENTURI, one of the several Alpine peoples enumerated by Pline (iii. c. 20) among the names inscribed on the Trophy of the Alps. Their position is unknown.

G. L.

NEMESIA, a river of Gallia mentioned by Au- sonius (Mosella, v. 353), is the Noses, which joins the Prenae (Prens). The united streams flow into the Sura (Sower), and the Sura into the Mo-

NEMETOCENNA or NEMETOCENNA (Arros), the chief town of the Atrebates, a Belgic people. Caesar (B. G. viii. 46) spent a winter at Nemetocenna at the close of his Gallic campaigns. In the inscription of Towern there is a route from Castellum (Casell) to Nemetocenna, which is the same place as

VOL. II.

NEMETOCENNA. The distance from Cassel through Béthune to Arros is 43 M. P. The distance according to the Antonine Itin. from Cassel through Minardiacum (Minariaca) is 35 M. P. There is also a route from Tarunna (Thérouanne) of 33 M. P. to Nemetocenna. There is no place where these roads can be compared. The earliest part of Ptolemy's texts of Ptolemy (ii. 9. § 7) the capital of the Atrebates is Origiacum (Opriaeac); but it is said that the Palatine MS. has Metacum, and all the early editions of Ptolemy have Metacum. It seems possible, then, that Ptolemy's Metacum represents Nemetocenna. But Ptolemy inaccurately places the Atrebates on the Scine; he also places partly their territory on the sea-coast, where it probably intervenes; but it is supposed to be Oricka, between the Scine and Doucæ. The town Nemetocenna afterwards took the name of the people Atrebates or Atrebati, and the name was finally corrugated into Arros. [Atre- BATES.]

The traces of the Roman roads from Arros to Thérouanne and to Combris are said to exist. It is also said that some remains of a temple of Jupiter have been discovered at Arros, on the Place du Clou; and that there was a temple of Isis on the site of the États-Diens. (D'Anville, Notice, f. c.; Walckenaer, Géog. f. c. vol. i. p. 431.) [G. L.]

NEMETES (Nemethes). This name appears in Caesar (B. G. i. 51), who speaks of the Nemeta as one of the Germanic tribes in the army of Aricio-

Gaius. In another passage (B. G. vi. 25) he describes the Hercynia Silva as commencing on the west at the borders of the Halvetii, the Nemeta, and the Bourisci; and as he does not mention the Nemetas as one of the nations on the left bank of the Rhine (B. G. iv. 10), we may probably infer that in his time they were on the east or German side of the Rhine. The Vangiones and Nemetas were afterwards transplanted to the west side of the Rhine. (Tac. Germ. c. 28.) Ptolemy makes Nio-

vianus (Speyer) the capital of the Nemetas, but he incorrectly places them north of the Vangiones, whose capital was at Borborâs (P. Gall. v. 17). (Iv. 17) mentions the Nemetas, Tribocci, and Vangiones in this order; but Tacitus mentions them just in the inverse order, Vangiones, Tribocci and Nemetas. From none of these writers could we determine the relative positions of these peoples; but the fact that Niovianus (Niedersayyer) is mentioned by Ptolemy as the chief town of the Nemeta and that Niovianus is proved to be Speyer by the Itineraries along the west bank of the Rhine, determine the position of the Nemetas.

In Ammianus Marcellinus (xv. 11) and the Not. Imp., Niovianus appears under the name of the people Nemetae or Nemetas. Ammianus calls it a municipality, but it is probably mentioned as a Roman town. In the Notitia of the Gallic provine, Civitas Nemetum belongs to Germania Prima. In some later writings the expression occurs “civitas Nemetum id est Spira." The name of Speyer is from the Speyersbach, which flows into the Rhine at Speyer. (D'Anville, Notice, f. c.; Walckenaer, Géog. f. c. vol. ii. p. 292.) [G. L.]

NEMETORIGA (Nemedorigae), a town of the Tiburi in Asturia, on the road from Braccara to Asturicau, now Menegua, in the district of Tribia. (Ptol. ii. 6. § 37; Itin. Ant. p. 428.) [T. H. D.]

NEMETOCENNA [Nemetacum].
NEOMORENSIS LACUS. [ARICLA.]
NEOMOSSUS. [Augustometum.]
NEMUS DIANAE. [ARICLA.]
NEMUS QVA. [Dacia. Vol. I. p. 774. b.]
NEOCASABELLA (Neacasarabela: Eth. Neacas-
arapost) 1. A town in Pontus Polemoicus, which, on account of its late origin, is not mentioned by any writer before the time of Pliny, was situated on the eastern bank of the river Lycus, 63 miles to the east of Amasia. (Plin. vi. 3; Tab. Peascing.) It was the capital of the district, and celebrated for its site and its history, and as a place of great importance on account of the ecclesiastical council held there in A. D. 314. We possess no information about the date of its foundation; but the earliest coins we have of it bear the image of the emperor Tiberius; whence it is probable that Neocasabella was founded, or at least received that name, in the reign of Tiberius, when St. Peter was already composed his work. It must have rapidly risen in extent and prosperity, as in the time of Gregorius Thaumaturgus, who was a native of the place, it was the most considerable town in Pontus. (Greg. Neocasae. Epist. p. 577; Amm. Marcell. xxxvii. 12; Hieroc. p. 709; Basil, Epist. 210; Acts Euthych. c. 7.) It was described by Bishop Eusebius. (Pall. v. 6. § 10.) According to Paulus Diaconus (Hist. Misc. ii. 18), the town was once destroyed by an earthquake; and from Stephanus Byz. it seems that at one time it was called Adrianopolis. The town still exists under a corrupt form of its ancient name, Nicar or Nicara, at a distance of two days’ journey north of Tobat. As to the supposed identity of Cibara and Neocasabula, the town was carefully fortitied towards the W. and NW., and was sufficiently protected towards the NE. and E. by the precipitous banks of the Cacles, and towards the S. by the steep sides of Mt. Parrnassus. The walls are almost 9 feet broad. The Cacles, which now bears the name of Kakoreumsa, or the evil tower, flows in a ravine below the village, and thus illustrates the statement of Pausanias, that the inhabitants descended to it in order to obtain water. Behind Velitza, ascending the Cacles, there is a cavern on the steep side of the rock, which, during the last war of independence, received a great number of fugitives. It is very spacious, is supplied with excellent water, and is quite impregnable. It is situated in the ravine where the inhabitants of Neom and the surrounding places took refuge in the Persian invasion, as the Delphians did in the Corycian cave [see Vol. I. p. 766], more especially as the height immediately above Velitza is not adapted for such a purpose. A difficult mule path leads at present through the ravine of the Cacles across the mountains to Delphi, but formerly it was again described in the ravine of the Paeon, and the inhabitants of Pausanias there were two roads from Tithorea across the mountain to Delphi, one direct, the other longer, but practicable for carriages. Pausanias assigns 80 stadia as the length of the shorter road; but this number cannot be correct, as Leake observes, since the direct distance is hardly less than 12 geographical miles.

Most modern writers have followed Pausanias in identifying Tithorea with Neom and Urania; but Ulrichs, for the reasons which have been already stated, supposes them to have been different cities, and places Neom at the Hellican ruins on the CEphiseus, called Paused Fioe, distant 14 hour, or 35 English miles, from Fe-

NEONTEICHOS (Nioo ceo), an AEolian town not far from the coast of Myias, situated between the Hermus and the town of Larissa, from which its distance was only 30 stadia. It is said to have been founded by the Aeolians, as a temporary fort for their first arrival in Asia. According to Strabo (vii. p. 351), the name was more ancient than the Cyme; but according to a statement in the Vita
Homer (c. 10), it was built eight years later, as a protection against the Pelasgians of Larissa. (Plin. v. 33; Herod. i. 149; Scyl. p. 28; Steph. B. a. v.) Remains of this town, says Cramer, ought to be sought for on the right bank of the river, opposite the little town of Missorium, on the road from Smyrna to Bergama. [L.S.]

NEONTCHIOS (Νεόντοχος), a fortress on the coast of Thrace, mentioned by Scylax (p. 28) and by Xenophon (Anab. vii. 5 § 8), supposed to be the modern Amas amph. [T. H. D.]

NEOPTOLEMİ TURRIS (Νεόπτολεμών τός, Στήριος), a fortress near the N.W. of the modern town of Examine, 190 stadia from the river Tyzas, and the same distance from Cremnissis (Anon. Peripl. p. 9), now Akharnes. [E. B. J.]

NYPETE (Νύπητα Πτώλ.; Νύπητιο, Στρ. Εδ. Νεπέσσα: Νέπες), a city of Etruria, situated in the southern part of that province, at a distance of 30 miles from Rome and 3 miles E. of Sutrium. There is no doubt that it was an ancient Etruscan town, though certainly not a city of the first rank, and was probably a dependency of Veii. Hence we meet with no mention of the name, any more than of its neighbour Sutrium, until after the fall of Veii; but from that period these two cities became places of much importance as the frontier fortresses of the Roman dominions, as revolted to Etruria (Liv. vi. 9). The name of Nepete is first mentioned in n.c. 386, when it was in alliance with Rome, and being attacked by the Etruscans, sent to sue for assistance from the Romans. But before the military tribunes Valerius and Purius could arrive to support their city, the town had surrendered to the Etruscan arms, and was occupied with its entire population. The Etruscans had already set the place on fire in the year 392, and taken, and the leaders of the party who had been instrumental in bringing about the surrender were executed (Liv. vi. 9, 10). A few years later a more effectual step was taken to secure its possession by sending thither a Roman colony. The establishment of this is fixed by Livy in n.c. 383, while Velleius Paterculus would date it 1.10. E. 1.7. after the capture of the town by the Gauls (Liv. vi. 21; Vell. Pat. i. 14). It was a Latin colony like most of those established at this period. In n.c. 297, Nepete is again mentioned as one of the frontier towns on this side against the Etruscans (Liv. x. 14); but with this exception we hear no more of it during the wars of the Roman in Etruria. In the Roman Civil War it was one of the twelve Latin colonies which declared themselves exhausted by the burdens of the war, and unable to furnish any further supplies: for which it was punished, before the end of the war, by the imposition of double contributions (Liv. xxvii. 9, xxxiv. 15). From this time Nepete seems to have sunk into the condition of a subordinate provincial town. Like the other Latin colonies, it obtained the Roman franchise by the Lex Julia, in a. 90, and became from thenceforth a municipium; which rank it appears to have retained under the Empire, though it is said in the Liber Colonariorum to have received a colony at the same time with that sent to Falerii (Fest. s. v. Municipia, p. 127; Gruter, Iasus. p. 308. 2, 3; De Floro, Hist. 1127; Suet. Aug. Hist. vi. 39; Mommsen, p. 337). Its existence as a municipal town throughout the period of the Roman Empire is proved by inscriptions as well as by Pliny, Polybius, and the Tabula (Strab. v. p. 226; Plin. iii. 5. 8; Plut. iii. 1. § 50; Tab. Peut. ; Iasus. 879, 3991); but no mention occurs of it in history till after the fall of the Western Empire, when it figures in the Gothic

wars as a place of some importance from its strength as a fortress, and was one of the last strongholds maintained by the Goths against Nareses (Procop. B. G. iv. 34). It early became an episcopal see, a dignity which it has retained without intermission till the present time, though perhaps out of an insignificant town with about 1500 inhabitants.

The only remains of antiquity now visible at Nepē are some ancient sepulchres hewn in the rock, and some portions of the ancient walls, much resembling in their construction those of Sutrium and Falerii. These are considered by Dennis as belonging to the ancient Etruscan city; but it is more probable that they date only from the Roman colony. (Dennis's Eturia, vol. i. p. 111; Nibby, Dintorni, vol. ii. p. 398.) [E. B. J.]

NEPHELIS (Νεφελίς), a small town on the coast of Cilicia, situated, according to Ptolemy (v. 8 § 1), between Antioc and Anemurium; but if, as some suppose, it be the same place as the Zephyrons mentioned in the Stadiasmus Maria Magni (§§ 181, 182), it ought to be looked for between Selinus and Celenderia. Near the place was a promontory of the same name, where, according to Livy (xxiii. 20), the fleet of Antiocbus the Great was stationed, when, after reducing the towns of Cilicia as far as Selinus, he was engaged in the siege of Corusaeum, and where he received the presents of the same name from Agesilaus, who was in the service of the Persians. (Comp. Leake, Asia Minor, p. 119.) [L. S.]

NEPHERIS (Νεφερής), a natural fortress situated on a rock, 180 stadia from the town of Carthage. (Strab. xvii. p. 834.) [E. B. J.]

NEPTUNIUS MONS; PELORUS.

NEQUINUM. [NINIA.]

NERAE; a tribe, mentioned with several others, who are equally unknown, by Pliny, and placed by him in the neighbourhood of the Insula Pattalene, the modern Soutrakhtin (vi. 20. 23). [V.]

NERETUM, or NERITUM (Νήρητος, Ptol. Είδ. Νερεινα, Νερόδη), a city of the Sallentini, in the ancient Calabria, mentioned both by Ptolemy and Pliny among the island towns of those people. Its name is also found in the Tabula, which fixes its position 29 M. from Manduria on the road to Uzement (UAMENTO), and 20 M. from the latter city. These data enable us to identify it with certainty with the modern town of Nardò, a considerable place about 9 miles N. of Gallipoli. It is clear from Pliny that it was a town of municipal rank, and the same thing is confirmed by the inscriptions; but there are no ancient remains at Nardò. (Plin. iii. 11. a. 16; Ptol. iii. 1. § 76; Tab. Peut.; Iasus. 3108. Other inscriptions, with the name of NERITUM, NERIT. published by Muratori, vol. ii. pp. 1113, 1120, and by Bomanelli, vol. ii. pp. 49, 50, are probably spurious. See Orelli, 138.) [B. E. B.]

NERICUS. [LEUCAR.] NERIGOS. Pliny (iv. 16. 30), in speaking of the islands in the north of Britain, says that, according to some, Nerigos was the largest, and that from it people used to sail to Thule. As besides this passage we have no other information, it is impossible to decide whether it is to be sought for in the Island of Antrim in Ireland, or on the island of Nornøy in Norway; but as Norway is in Danish still called Norgé, and in Swedish Norrøg, it is now generally assumed that Nerigos is the modern Norway; the southwestern headland of which, projecting into the sea, might easily lead the ancients to the belief that it was an island. In the same passage Pliny mentions the island of Bergi, which may possibly be only the
north-western coast of Norvegia, the most important commercial town in that part still bearing the name of Bergen. The island of Duma lastly, which is mentioned along with those spoken of above, has been called by Pliny, "Dumna in the district of Drometium. But all this is very doubtful, as Pliny, besides being very vague, may have blundered here as in other parts of his work; for, according to some, Bergen seems to have been an ancient name of Hibernia or Ireland (P. Mel. ii. § 4); and Duma is distinctly called by Ptolemy (ii. 3. § 31, vii. 3. § 10), an island off the north of Britain. [Com. Orn. 23. 25.]

NERIS. [Gynhria.]
NERITUS. [Ithaca.]
NERIUM. [Artabrii.]
NERPONIA. [Artaxasta.]
NERTEBRANES (Neptopteranes), a small German tribe, which is mentioned at a late period in the country once over the Chatti, or the rest of Mons Abona (Ptol. ii. § 11. § 2.) [L. S.]

NERTOBRIGA (Nepotobriga). 1. A town of Hispania Baetica (Ptol. ii. 4. § 19), also called by Ptolemy (iii. 1. § 3) Concordia Julia, the modern Valera la vieja. It is named "Ephorobriga" in the copies of Polybius (XXXV. 2), by an omission of the N. of the Ptol. i. p. 391.

2. A town of the Celtiberi in Hispania Tarraconensis, on the road from Emerita to Caesar Augusta. It is called by Appian Nepotobriga (Hist. 60), and by Suidas Nepotobrigos: now Almina (Ptol. ii. 6. § 38; Florus, ii. 17; Ant. Itam. 437; Ubert, vol. ii. pt. i. p. 460.) [T. H. D.]

In the same region, to the south, in the N. of Hispania Tarraconensis, in the territory of the Antigoens; according to Ubert (vol. ii. pt. i. p. 300), the modern Ordovena, near Bilbao; though by other writers it is variously identified with the Blanes and the Nervion. [T. H. D.]

NERVICANUS TRACTUS, is mentioned in the Not. Imp. as a continuation of the Armiaciana Tractus. There is also a middle age authority for the expression "Nervici litora tractus." A port on this coast, named Portus Aesapticum, was guarded by some Nervian troops according to the Notitia. D'Anville concludes that the Nervii extended from their inland position to the coast, and had part of it between the Morini and the mouth of the Schelda; a country which there is little evidence, and a good deal against it. [Membr. Morin. [G. L.]

NERVI (Nepadon, Nipeon), a nation of Belgica, whose capital according to Ptolemy (ii. 9. § 11) was Bagacum (Baton). When Caesar was preparing (c. 57) to march against the Belgian confederates, he was informed that the Nervii had promised to supply 5000 men for the general defence, and that they were considered the most savage of all the confederates. (B. G. ii. 4.) The neighbours of the Nervii on the south were the Ambiani. (B. G. ii. 15.) In Caesar's time the Nervii had not allowed "merceres" to come into their country; they would not let wine be imported and other things which were regarded as luxury. When the Nervii had marched for three days through their territory, he learned that he was not more than 10 Roman miles from the Sabis (Sambre), and the Nervii were waiting for him on the other side with the Atrebates and Veromandui, their border people. Thus we ascertain that the Atrebates, whose chief town is Armorium, and the Veromandui, whose chief place was St. Quentin, were also neighbours of the Nervii.

NERVI (St. Quintin). The Nervii had no cavalry, and their country was made almost impenetrable to any attack from the cavalry of their neighbours by quickest hedges which a man could not get through, and indeed hardly move through. "On the banks of the Sambre Caesar had a desperate fight with the Nervii, commanded by Bodognatus. During this invasion the old men, the women, and children of the Nervii, were removed to the seastuaries and marshes, somewhere near the coast. The Nervii lost a great number of men in this battle: "the Nervii were destroyed" (B. G. vi. 27.). Their "senatones" as Caesar calls them, their chief men, were reduced from 600 to three, and out of the 60,000 who were in the battle there were said to be only 500 left capable of bearing arms. After this terrible slaughter the Nervii rose again in arms against Caesar (c. 54), when they joined the Eburones and others in the attack on the Nervii. (B. G. vi. 27.) Some of the commentators have found a difficulty about the appearance of the Nervii again in c. 54, after having been nearly destroyed in c. 57. We must suppose that Caesar wrote of the events as they occurred, and that he did not alter what he had written. In c. 57 he supposed that he had defeated the Nervii; but in c. 54 he found that he was mistaken. In c. 53 the Nervii were again preparing to give trouble to the Roman governor; but he entered their country in the winter season, and before they had time to rally or to escape, he took many prisoners, drove off many head of cattle, and ravaged their land, and so compelled them to come to the battle. When the meeting of the Gallic states in c. 52 was settling the forces that each nation should send to the relief of Alesia, the contingent of the Nervii was 5000 men. (B. G. vii. 75.)

Some of the nations between the Seine, the sea, and the Rhine, were Germans in Caesar's time, but these Germans were invasions. The Nervii (Tac. Annales, c. 38) claimed the origin of the Galliace; but there is no evidence which can settle the question. Appian (de Bell. Gall. i. 4) speaks of the Nervii as descendants of the Teutones and Cimbri; but this is worth very little. Appian had probably no authority except Caesar, whom he used carelessly; and he may have applied the name of the Nervii what Caesar says of the origin of the Aduatuci. (B. G. ii. 29.) Strabo (p. 194) also says that the Nervii were a Germanic nation, but he does not even know the position of the Nervii, and he misplaces them.

Cesar mentions some smaller tribes as dependent on the Nervii (B. G. v. 39); these tribes were Gentii, Levacii, Pleunmoxii, Geiduni, of all whom we know nothing.

Pliney (iv. 17) mentions in Belgica as inland people, the Castoli (apparently a corrupted name), Atrebates, Nervii liberi, Veromandui; an order of enumeration which corresponds with the position of the Nervii between the Atrebates and Veromandui: for the chief place of the Atrebates is Avario, of the Nervii Bataio, and of the Veromandui St. Quemion. [Augusta Verombatiorum.] As Pliney calls the Nervii liberi, we must suppose that in his time they were exempt from the payment of taxes to the Romans, and retained their own internal government; probably in Pliney's time the Romans had not yet fully reduced their country.
NERULUM. The territory of the Nervii did not extend beyond the limits of the old diocese of Cambrai, which was, however, very large. The capital of the Nervii was Bagacum (Bonac), but Cambrai was also a town of the Nervii. [Camaracum.]

NERULUM, a town in the interior of Lucania, mentioned by Livy during the wars of the Romans in Sicily, and taken by the consul Asinius Barbula, r. c. 317 (Liv. ix. 20). The only other notice of it is found in the Itineraries, from which we learn that it was situated on the high-road from Capua to Rhegium, at the point of junction with another line of road which led from Venusia by Potentia and Grumentum towards the frontier of Bruttium (Itam. Ant. pp. 105, 106). The names and distances in this part of the Tabula are too corrupt and confused to be of any service; the Itinerary of Antoninus places it 14 miles (or according to another passage 16 miles) N. of Murusum, the site of which is clearly ascertained. If the former distance be adopted as correct, it must have been a station on the thriving highway of La Rotonda, near the source of the river Lea (Hol-ten. Not. ad Clev. p. 393; Romanelli, vol. i. p. 389). [E. H. B.]

NERUSHI (Nerushai). This name of a people occurs in the Trophy of the Alps (Plin. iii. 20. a. 24), between the Oratelli and Velcioni. Ptolemy (iii. 1. § 41) places them within his Italy among the Maritime Alps. Their chief town was Vintium, which is Veneos, on the west side of the Var, and not far from Nicaea (Nissa). [G. L.]

NESACTIUM (Neaderov, Ptol.). A town of Istri, situated to the E. of Pola, on the Plautianus Sinus, and not far from the river Arsia, which was the boundary of Istri on this side. Hence Ptolemy calls it Neaderov, its site has been determined by Livy as a city of the Istrians before the conquest of Rome, and a strong fortress, so that it stood a long siege, and was only taken by the Roman consul C. Claudius Pulcher, by cutting off its supply of water (Livy. xii. 11). It afterwards appears both in Pliny and Ptolemy as a municipal town of Istri under the Roman dominion, and had a thriving neighbourhood of Western Empire, but the period of its destruction is unknown (Plin. iii. 19. a. 33; Ptol. iii. 1. § 27; Tab. Peut.; Anon. Rav. iv. 31). The fact of its proximity to the Arsia (Arsae), combined with Livy's mention of a river flowing by the walls, render it probable that it was situated immediately on the right bank of the Arsia; but its exact site has not been determined. [E. H. B.]

NESCAEA (Nescaea), a district mentioned in two places in Strabo, with slightly differing descriptions: 1. as a country belonging to Hyrcania, and watered by the Oucus, now Tadjen (xi. p. 509); 2. as a distinct and independent land (xi. p. 511). The geographer probably meant to imply a narrow strip of territory, Hyrcania, which in the time of Strabo was Ariana, and Parthia respectively, and corresponding with the present Khordesan. It may be identified with the existing Nissa, a small town to the N. of the Alger chain of mountains, between Astabadi and Mesked. (Wilson, Arabia, pp. 142—148.)

Nissa. The same district answers to the "regio Nissaeae Parthenes nobilis" in Pliny (vi. 25. a. 39). [V.]

NESEANIA, a municipal town in Hispasia Baetica, stood on the site of the modern village El Valle de Aldehuela, 3 leagues W. from Antequera. It is still famed for its mineral springs, the existence of which in ancient times was confirmed by Ciceronian (Uckert. vol. ii. pt. i. p. 362). [T. H. D.]

NESIO (Neso), a district of Asiac Satania, formed by the windings of the river Rha, and occupied by the Arabi, Mutei, and Phthirerophoul. [E. B. J.]

NESS (Nissea), a small island on the coast of Campania, between Puteoli and Nuceria; and directly opposite to the extremity of the ridge called Mons Pausiasius (Seneca, Ep. 55). It may be considered as forming the eastern headland of the bay of Baiae or Puteoli, of which Cape Minenum is the western limit. The island is of small extent, but considerable elevation, and undoubtedly constituted in ancient times a station on the side of the crater of a volcano. This must, however, have been entirely removed by the period of historical memory; but it appears that even in the days of Statius and Lucan it emitted sulphureous and noxious vapours, which has long ceased to be the case (Stat. Silv. ii. 2. 78; Lucan, vi. 90). It was nevertheless, like the adjoining hill of Pausiasius, a pleasant place of residence. Brutus had a villa there, where he was visited by Cicero shortly after the death of Caesar, and where they conferred, together with Cassius and Libo, upon their future plans (Cic. ad Att. xvi. 1—4). Pline tells us that it was famous for its asparagus, a celebrity which it still retains (Pline. xix. 8. a. 49); but the wood which crowned it in the days of Statius (Silv. iii. 1. 149), has long since disappeared. [E. H. B.]

NESS (Nessus, Arrian Peripl. p. 18), a small river, 60 stadia from the Borgys, which discharges itself into the Euxine by the Prom. Herculis, Cape Constamionianus (Cape Adler of Gauntier's map), where there is now a river called Menowion. [E. B. J.]

NESSON. [E. H. B.]

NESSOUS (Nessous, Lewis), a lake of Pelasgia in Tesalii, lying east of La-issae, now called Karajsh or Napialim. In summer it is only a marsh, and contains very little water, but in winter it is filled by the overflowing of the Peneus. When the basin is filled, its superfuous waters are conducted by a channel into the lake Boebesa, now called Kerka. (Strab. ix. p. 440; Leake, Northern Greece, vol. i. p. 445, vol. iv. p. 403.) Strabo regarded the lakes Nessous and Boebea as the remains of the great lake which covered Tesalii, before the waters found an outlet through the vale of Tempe to the sea; but he is mistaken in saying that Nessus is larger than Boebea. (Strab. ix. p. 430.) Nessous received the name from a town Ness, which is mentioned only by Stephanus B. (v. Nissa.)

NETSEBA. [E. B. J.]

NESTANE. [E. B. J.]

NETSEBA (Netseba, Silicy. p. 8; Ne-tesos, Eratosthenes, ap. Schol. Apollon. Rhod. iv. 1396), a people of Illyricum, with the same name, near the river Nestus (Netseba, Silicyz, l. c.; Artemidorus, ap. Steph. B. a. v.), which has been identified with the Kerka. [E. B. J.]

NETSEI or NESSUS (Netseba, Silicy. pp. 8, 39; Seyam. 672; Pomp. Mela, ii. 2. §§ 2, 9; Plin. N.E. 3]
NESULUM.

iv. 11, viii. 16; Nicetas, Hist. Theog. 341; Ptol. iii. 12. § 2, ii. 13. § 7; Miezos, Zonar. ix. 28: Nisto, Turkish Karasu, the river which constituted the boundary of Thrace and Macedonia in the time of Philip and Alexander, which the Romans continued on their conquest of the latter country. (Strab. vii. p. 331; Lív. xiv. 29.) Thucydides (iv. 96) states that it took its rise in Mt. Scomius, whence the Hebrus descended; being, in fact, that cluster of great summits between Glauss- tenosyll and Siby, which sends tributaries to all the great rivers of the New Europe. It flows into the Strymon or Tiver. In the expedition of Dareius, they had been obliged to quit their original seats, on account of a quantity of serpents with which it was infested, and had taken refuge with the Budini in the district about the Strymon, which had till then belonged to that people. Though not of the same origin, in customs they resembled the Scythians, and bore the reputation of being enslavers (τερετήρες), like the "Schemas" among the Siberian Nomads of the present day. Once a year—so the Scythians and the Greeks of Olbia told Herodotus—each of them for a few days; a few years; but which still lingers among the people of Volgian and White Russia. Pomp–

etum Mela (ii. 1. § 7, 15) repeats this story from the Herodotus. (Dompag. i. 1. § 7, 15, vol. ii. p. 131.) The Sarmatian Navari of Polteniy (Nicopolis, iii. 5. § 25) are the same as the Neuri, the name appearing in a Grecized form; but there is some difficulty in harmonising his statements, as well as those of Esopo (esp. Ann. Pont. v. 45; Suda, Sc. p. 2) and of the Memorables. (Lom. v. ii. 131, and the more trustworthy accounts of Herodotus. Schafarik (Slav. Alt. vol. i. pp. 194—199) refers the Neuri to the Wendish or Servian stock. [E. B. J.]

NETUM or NEETUM (Νητειος), a town of Judah, mentioned by Ezera (i. 68) and Nemehia (vii. 26), between Bethlehem and Anathoth, if anything can be concluded from the order in which the names occur, which is so questionable, that Beit-netfil may be, perhaps, safely regarded as its modern representative. It is situated on the highest point of a lofty ridge, south of the NW. of the ancient tribe of Judah. (Robinson, Bib. Res. vol. ii. pp. 341—

347; Reland, Palaestina, pp. 650, 909.) [G. W.]

NETUM or NEETUM (Νητειος), Ptol. iii. 4.

§ 13; Netum, Cie., Sil. Ital.: Ech. Nitenu, Cie., Phin.: Noto Vecchio), a considerable town in the S. of Italy, near the sources of the little river Assenio (Aesernus), and about 20 miles SW. of Syracuse. We find no mention of it in early times, but it was probably subject to Syracuse; and it is in accordance with this, that, by the treaty con–

cluded in B. C. 263 between the Romans and Hieron king of Syracuse, Netum was noticed as one of the cities left in subjection to that monarch. (Diod. xxiii. Exe. H. p. 502.) We have no account of the circumstances which subsequently earned for the Netini the peculiarly privileged position in which we afterwards find them: but in the days of Cicero Netum enjoyed the rights of a "foderata civitas" like Messana and Taurocinenum; while, in Pliny's time, it still retained the rank of a Latin town (civitatis libera), a favour then enjoyed only by three cities in the island. (Cic. Fam. iv.

26, v. 22, 51; Phin. iii. 8. s. 14; Ptol. L. C.; Sil. Ital. xiv. 268.) Poteney is the last ancient writer that mentions the name; but there is no doubt that it continued to exist throughout the middle ages; and under the Norman kings rose to be a place of great importance, and the capital of the southern province of Sicily, to which it gave the name of Vol di Noto. But having suffered repeatedly from earthquakes, the inhabitants were induced to emigrate to a site nearer the sea, where they founded the modern city of Noto, in 1703. The old site, which is now known as Noto Vecchio, was on the summit of a lofty hill about 8 miles from the modern town, and about 3 miles from the sea; some re–

mains of the ancient amphitheatre, and of a building called a gymnasium, are still visible, and a Greek inscription, which belongs to the time of Hieron II. (Fazell. de Reb. Sic. iv. 2; Castell. Inscri. Sicil. p. 101.) [E. H. B.]

NEUDRUS (Ναυδρος, Arrian, Indic. c. 4), a small stream of the Psoihe, which flowed into the Hydrosotes (Rosi or Rosade) from the country of the

Attaceni. It has not been identified with any modern river.

NEVIRNUM [Νοβιονόμιον].

NEUBI (Νευβί), a nomad people of the N. of Greece, in the Roman Empire, which still occupies places in the centre of the region which now comprises Poland and Lithuania, about the river-basin of the Bug. They occupied the district (γραμμή Νευβία της) which lay to the NW. of the lake out of which the Tyrras rises, and which still bears the name in Slavonic of Neraukumjs, with its chief town of Neubet. It seems that the expedition of Dareius, they had been obliged to quit their original seats, on account of a quantity of serpents with which it was infested, and had taken refuge with the Budini in the district about the Bug, which had till then belonged to that people. Though not of the same origin, in customs they resembled the Scythians, and bore the reputation of being enslavers (τερετήρες), like the "Schemas" among the Siberian Nomads of the present day. Once a year—so the Scythians and the Greeks of Olbia told Herodotus—each of them for a few days; a few years; but which still lingers among the people of Volgian and White Russia. Pomp–
etum Mela (ii. 1. § 7, 15) repeats this story from the Herodotus. (Dompag. i. 1. § 7, 15, vol. ii. p. 131.) The Sarmatian Navari of Polteniy (Nicopolis, iii. 5. § 25) are the same as the Neuri, the name appearing in a Grecized form; but there is some difficulty in harmonising his statements, as well as those of Esopo (esp. Ann. Pont. v. 45; Suda, Sc. p. 2) and of the Memorables. (Lom. v. ii. 131, and the more trustworthy accounts of Herodotus. Schafarik (Slav. Alt. vol. i. pp. 194—199) refers the Neuri to the Wendish or Servian stock. [E. B. J.]

NIA (Nia), a river of Interior Libya, discharging itself into the Hesperian bay, in 13° 30' E. long. and 90° 30' N. lat. (Ptol. iv. 6. § 7). Colonel Leake (Journ. Geog. Soc. vol. iii. p. 16) has identified it with the Rio Grande, which takes its rise on the border of the highland of Senegambia, according to Mollien's map (Trav. in the Interior of Africa, 1820), in 15° 30' N. lat. and 13° 30' W. long. [E. B. J.]

NICAEA, NICE (Nicea), or NICAEA (Nicaea), a town of Thrace, not far from Adrianople, the scene of the battle between the emperor Valens by the Goths in A.D. 378. (Arnold, Histoire, etc., xxxi. 134; Cedren. ii. p. 183; Sozonov. iv. 19; Theoph. p. 772.) It has been variously identified with Kuseli and Kulalen. [T. H. D.]

NICAEA. I. In Asia. I. (Nicaea; Eth. Nicaeuth or Nicaeus: Νικαία), one of the most important towns of Bithynia, of which Strabo (xii. p. 565) even calls it the metropolis, was situated on the eastern shore of lake Ascania or Ascanius, in a wide and fertile plain, which, however, was somewhat unhealthy in summer. The place is said to have been colonised by Bottsurians, and to have originally borne the name of Ancor (Steph. B. s. e.) or Bellicore (Geogr. Myn. p. 40; ed. Hudson); but it was subsequently destroyed by Alexander the Great, who called it, after himself, Antigoeia. (Steph. B. L. c.; Eunasth. ed. Hom. ii. ii. 863.) Not long after Lyasmacus, having made himself master of a great part of Asia Minor, changed the name of Antigoeia into Nicaea, in honour of his wife Nicaea, a daughter of Antipater. (Steph. B. Eunasth. Strab. II. cc.)
NICAEA.

According to another account (Mennan, ap. Phot. Cod. 224, p. 235, ed. Bekker), Niccaea was founded by the Thracians, Thraciaei, who had served in the army of Alexander the Great. The town was built with great regularity, in the form of a square, measuring 16 stadia in circumference; it had four gates, and all its streets intersected one another at right angles, so that from a monument in the centre all the four gates could be seen. (Strab. x. p. 535. Lib. viii. Cap. vii. Tom. vii. n. 6197. O. P. 111. 110. 11.) The gymnasium, which was destroyed by fire, but was restored with increased magnificence by the younger Pliny (Epist. x. 48), when he was governor of Bithynia.

Soon after the time of Lysimachus, Niccaea became a city of great importance, and the kings of Bithynia, whose era begins in B.C. 268 with Zipoetes, often resided at Niccaea. It has already been mentioned that in the time of Strabo it is called the metropolis of Bithynia; an honour which is also assigned to it on some coins, though in later times it was enjoyed by Nicomedia. The two cities, in fact, kept up a long and vehement dispute about the precedence, and the 38th oration of Dion Chrysostomus was written on the subject. From this oration, it appears that Nicomedia alone had a right to the title of metropolis, but both were the first cities of the country. The younger Pliny makes frequent mention of Niccaea and its public buildings, which he undertook to restore when governor of Bithynia. (Epist. x. 40, 46, &c.) It was the birthplace of the astronomer Hipparchus and the historian Dion Cassius. (Suid. s. v. Tropaeum.) The numerous coins of Niccaea which still exist attest the interest taken in the city by the emperors, as well as its attachment to the rulers; many of them commemorate great festivals celebrated there in honour of gods and emperors, as Olympia, Istmia, Dioysis, Pythia, Commoda, Severia, Philadelphia, &c. The importance of the city and the empire remained an important place; for its situation was particularly favourable, being only 25 miles distant from Prusa (Plin. v. 82), and 44 from Constantinople. (It. Anim. p. 141.) When the last mentioned city became the capital of the Eastern Empire, Niccaea did not lose in importance; for its present walls, which were erected during the last period of the Empire, enclose a much greater space than that ascribed to the place in the time of Strabo. In the reign of Constantine, A.D. 325, the celebrated Council of Niccaea was held there against the Arian heresy, and the prelates there assembled drew up the creed called the Nicene. Some travellers have believed that the council was held in a church still existing; but it has been shown by Prokoop (Eriserungen, iii. p. 234) that that church was built at a later period, and that the council was probably held in the now ruined mosque of Orchan. In the course of the same century, Niccaea suffered much from an earthquake; but it was restored in A.D. 368 by the emperor Valens. During the middle ages it was for a time the capital of the Greek emperors against the Turks, who did not conquer it until the year 1078. During the first crusade, in 1097, it was recovered from them by the Christians, but in the peace which was afterwards concluded it was ceded to the Turks. In the 13th century, when Constantinople was the capital of the Latin emperors, Niccaea belonged to Theodore, the Grand Khan of the Tartars of Western Asia; in the end, however, it was finally conquered and incorporated with the Ottoman empire by Orchan. Many of its public buildings were then destroyed, and the materials used by the conquerors in erecting their mosques and other edifices. The modern Imazir is a very poor place, of scarcely more than 100 houses, while in Pococke's time, there still existed about 300. The ancient walls, with their towers and gates, are in tolerably good preservation; their circumference is 14,800 feet, being at the base from 18 to 20 feet in thickness, and from 30 to 40 feet in height; they contain four large and two small gates. In most places they are seen. On the south, an alternate course of Roman tiles and large square stones, joined by a cement of great thickness. In some places have been inserted columns and other architectural fragments, the ruins of more ancient edifices. These walls seem, like those of Constantinople, to have been built in the fourth century of our era. Some of the towers have Greek inscriptions. The ruins of mosques, baths, and houses, dispersed among the gardens and cornfields, which now occupy a great part of the space within the Greek fortifications, show that the Turkish town, though now so considerably, was once a place of importance; but it never was so large as the Greek town. On the north of the city, a little below the church of St. Andrew, are the foundations of the remains of the Greek Niccaea, the walls of the ruined mosques and baths being full of the fragments of Greek temples and churches. On the north-western parts of the town, two moles extend into the lake and form a harbour; but the lake in this part has much retreated, and left a marshy plain. Outside the wall, remnants of ancient aqueducts are seen. (Conyers Minor, pp. 10, foll.; von Prokoop-Osten, Eriserungen, iii. pp. 321, foll.; Pococke, Journey in Asia Minor, pp. 181, foll.; Walpole, Turkey, ii. pp. 146; Eckel, Doct. Num. i. pp. 433, foll.; Rasche, Lexic. Rei Num. iii. p. 1374, foll.)

L. S.]

COIN OF NICAEA IN BITHYNA.

2. (Niccaea, Ariatia, v. 19; Strab. x. p. 698; Curt. ix. 3. 23), a city in the Panjib, on the banks of the Hydaspe (or Jhelam), built by Alexander the Great to commemorate his victory over Porus, who ruled the flat country intermediate between that river and the Araxes. It was at Niccaea or Bucephalia, which appears to have been on the opposite bank, that Alexander (according to Strabo, l.c.) built the fleet which Nearchus subsequently commanded; the country in the immediate neighbourhood having abundance of wood fit for ship-building. No town now exists which can with any probability be identified with it.

NICAEA. II. In Europa. 1. (Niccaea: Ekh Nickaei: Nizza, in French Nice), a city on the coast of Liguria, situated at the foot of the Maritime Alps, near the frontier of Gallia Narbonensia. On this account, and because it was a colony of Massilia, it was in early times commonly reckoned as belonging to Gaul. It is situated on the east of the town of Diani, and still followed by Mea (v. 5. § 3): but from that time, Nicaea, which was situated about 4 miles

K E 4
to the E. of that river, was naturally included in Italy, and is accordingly so described by Strabo, Pliny, and Ptolemy. (Strab. iv. p. 184; Plin. iii. 5. a. 7; Pol. iii. 1. § 5.) We have no account of its being a colony of Massilia, and appears to have continued always in a state of dependency upon that city. (Strab. iv. pp. 180, 184; Plin. l. c.; Steph. B. s. v.) It was situated on the borders of the Ligurian tribes of the Oxybi and Decidates; and, as well as its neighbour Autelepsis, was continually harassed by the Yuebi and by the Suebi. To the Ttisci, both cities were actually besieged by the Ligurians, and the Massilians, finding themselves unable to repulse the assailants, applied to Rome for assistance; the consul Q. Oppius, who was despatched with an army to their succour, quickly compelled the Ligurians to lay down their arms, and deprived them of a considerable part of their territory, which was annexed to the dependency of Massilia. (Pol. xxxiii. 4. 7; Liv. Epit. xlvii.) From this time, nothing more is heard in history of Nicaea, which continued to belong to the jurisdiction of Massilia, and, even after it came to be subject to the Romans, and included geographically in Italy, was still for municipal purposes dependent upon its parent city. (Strab. iv. p. 184.) At a later period, the new division of the provinces again transferred to Gaul the towns of Nicaea and Cismenium, together with the whole district of the Maritime Alps, westward of the Tropae Augusti. Hence, we find Nicaea described by Ammianus (xv. 11. § 15) as belonging to Gaul; and during the decline of the Empire, after it had become barren, the names of its bishops are found among the Gaulish prelates. It does not appear to have ever been a town of much importance under the Roman Empire; and was apparently eclipsed by the city of Cismenium (Climia), in its immediate neighbourhood. But it had a good port, which must always have secured it some share of prosperity; and after the fall of Cismenium, it rose to be the most important city in this part of Gaul, and became the capital of an independent district called the Comitato di Nissa (County of Nicae). This eventually fell into the hands of the House of Savoy, and now forms part of the dominions of the king of Sardinia. Nicaea itself is a flourishing place, with about 30,000 inhabitants, but it remains still the capital of antiquity. The ancient city probably occupied the height, now the site of the castle, and the immediate neighbourhood of the port, which though small, is secure. Nicaea is situated at the mouth of the river Paglione, a considerable mountain torrent, evidently the stream called Paulo by Pliny and Mela. (Gell. l. c.; Mela. ii. 4. § 5.)

About 2 miles E. of Nicaea is a deep bay or inlet between two rocky promontories, forming a spacious natural, harbour now known as the Gulf of Villafranca, from a town of that name, which has however existed only since the 13th century. This is probably the Portus Olyvula of the Maritime Itinerary (p. 504). The Anao Portus of the same Itinerary places a smaller and well-sheltered harbour for small vessels on the E. side of the headland, called Capo di S. Ceppino, which forms the eastern boundary of the Gulf of Villafranca. A similar cove a few miles further E. on the same line, is probably the Avinio Portus of the same writer, but the distance given between these points is greatly overstated.

[F. H. B.]

2. (Nicaea: Ekk. Nicaeeis), a fortress of the Locri Epizephiri, situated upon the sea, and close to the pass of Thermopylae. It is described by Arrianus as one of the places which commanded the pass. (De Fidei Leg. p. 45, ed. Steph.) It was the first Locrian town after Alpenos, the latter being at the very entrance of the pass. The surrender of Nicaea by Phalaxius to Philip, in b. c. 346, made the Macedonian king master of Thermopylae, and brought the Sacred War to an end. (Diod. xvi. 59.) Philip kept possession of it for some time, but submitted it to the alliance of the Greeks, to the Thebans, and to the Amphictyonic League. (Mann. Dem. i. p. 153, ed. Reiske; Aesch. c. Cleop. p. 73, ed. Steph.) But in b. c. 340 we again find Nicaea in the possession of Philip. (Dem. in Phil. Ep. p. 153.) According to Memnon (Ep. Phol. p. 234, ed. Bekker; c. 41; ed. Orelli) Nicaea was destroyed by the Phocians, and its inhabitants founded the Bithynian Nicaea. But even if this is true, the town must have been rebuilt soon afterwards, since we find it in the hands of the Aetolians during the Roman wars in Greece. (Polyl. x. 42, xvii. 1; Liv. xxxvi. ix. 32.) Subsequently the town is only mentioned by Strabo (ix. p. 426). Leake identifies Nicaea with the castle of Parnassus, where there are some Helicean remains. (M. E. of Greece, vol. ii. p. 136.)

3. In Illiria. (Carth. Vol. l. p. 565. a.)

4. In Thrace. (Nicae.)

NICAMA (Nicaea), a place on the SW. coast of Asia Minor, called a metropolis by Ptolemy (vi. 1. § 12). It was in the district of the Bati, within the territory of king Pandion. It was very probably on the site of the present Cottupotamus. [V.]

NICASIA (Nizaris), a small island near Naxos. (Steph. B. s. v.)

NICEPHORIUM (Nexofhois, Strab. xvi. p. 747; Pol. vi. 18. § 6; Steph. B. s. v.), a place of considerable importance in Mesoepotamia, on the river Euphrates. According to Isidorus (Mema. Pirkh. 1. ed. Müller) and Pliny (v. 24. a. 21, vi. 26. a. 30), it owed its foundation to Alexander the Great; according, however, to Appian, to Seleucus I, which is much more likely (Syriaco c. 57). It is mentioned by Dion Cassius (xii. 13) and by Tacitus (Anna. vi. 40), but simply as one of many towns founded by the Macedonians. Strabo calls it a town of the Myrmidons in Mesoepotamia (xvi. p. 747). Nothing is known of its intermediate history, but Justinian erected a fortress here (Procop. de Aedif. ii. 7); and the emperor Leo, who probably added several new works to it, is said to have changed its name to Leontopolis. (Hieroclor. p. 715; and Chron. Eos. ap. Airport. i. p. 408.)

NICEPHORIUS, an afflent of the Tigres, which washed the walls of Tigranocerta (Tac. Ann. iii. 4.), now the Bulus-chai, which rises at Basf Ksain, on the S. of Jebel Nimrud, and W. of Lake Van. (Chesney, Explo. Euphrat. vol. i. p. 18; Ritter, Erdkunde, vol. x. p. 88.) Kiepert's map identifies it with the Jammoukh Sat. [E. B. J.]

NICEPHORUS (the Neck) and tributary of the Rhine, has its Sources not far from those of the Durance, and discharging itself into the Rhine in the northwestern corner of the Niederheim. Its course forms a sort of semicircle, as it first flows in a north-eastern and afterwards in a north-western direction. The Nicer is not mentioned until a late period of the Roman Empire. In a. d. 918, the emperor Valentinian had to make great efforts in turning some part of the
Nícia.

river into a new channel for the purpose of protecting the walls of a fort erected on its banks from being undermined and washed away by its waters. (Amm. Marc. xxviii. 2; Vopiscus. Prob. 13, where it is called Nicer; Auson. Moselid. 423; Sidon. Apollin. Paneg. ad Arc. 293; Eusebi. Paneg. Const. 13; Symmach. Lett. in Valer. ii. 9, 10.) The remains of Roman antiquities on the banks of the Nicer are very numerous, and a few of its tributaries, such as the Armia (Irma) and Murra (Murr), are mentioned in inscriptions found in the country. [L. S.]

Nicia. [Cap. A., Vol. i. p. 562, a.]

Nicoium or Niciu (Nicovs. aepfelos, Ptol. iv. 5. § 9 a.; Strab. xi. p. 563; Paus. xi. 12. 5.) The name of Lower Egypt, lay just above Memphis and nearly midway between Memphis and Alexandria. It was one of the military stations on the main road between those cities which ran nearly parallel with the Canopic arm of the Nile. [Prosob.]

[N. B. D.]

Nicomedea (Nicównëúa; Eta. Niconemédos; Ιτανιμεώι or Ιταμι); the capital of Bithynia, situated on the north-eastern coast of the Sinus Astacenus, a part of the Propontis. The town of Astacus, a little to the south-east of Nicomedea, was destroyed, or greatly damaged, by Lysimachus; and some time after, B.C. 264, Nicomedes I. built the town of Nicomedea, to which the inhabitants of Astacus were transferred (Steph. B. s. v.; Strab. xii. p. 563; Paus. xi. 12. 5.; Euseb. Chron. Ol. 129. 1.). The founder of the new city made it the capital of his kingdom, and in a short time it became one of the largest and most flourishing cities, and continued to prosper for more than sixty centuries. Pliny, in his letters to the emperor Trajan, mentions several public buildings of the city, such as the Colosseum, a temple of Cybele, &c., and speaks of a great fire, during which the place suffered much (Epist. x. 42, 46). Respecting its rivalry with Nicæa, see Nicæa. According to Pliny (v. 43), Nicomedea was 621 miles to the south-east of Chalcedon, while according to others it was only 60 or 61 miles distant (1 Ant. pp. 134, 160; E. Hieros. p. 572; Tab. Peut. Under the Empire it was often the residence of the emperors, such as Diocletian and Constantine, especially when they were engaged in war against the Parthians or Persians. (Ancre. Vict. de Caes. 39; Niceph. viii. in fin.) The city often suffered from earthquakes, but owing to the munificence of the emperors it was always restored (Amm. Marc. xvii. 7; Philostog. iv. p. 506.) It also suffered much from an invasion of the Scythians (Amm. Marc. xxii. 9, 12, 13.) The orator Libanius (Orat. 62, tom. iii. p. 537, ed. Reiske) mourns the loss of its terrae, basilicas, temples, gymnasia, schools, public gardens, &c., some of which were afterwards restored by Justinian (Procop. de Aed. v. 1; comp. Ptol. v. 1. § 3, viii. 17. § 4; Hieroc. p. 691.) From inscriptions we learn that in the later period of the empire Nicomedea enjoyed the honour of a Roman colony (Orelli, Inscript. No. 1060). The city is also remarkable as being the native place of Arrian, the historian of Alexander the Great, and as the place where Hannibal put an end to his chequered life. Constantine breathed his last at his summer residence of Nicomedea (Constant. Chron. Cest. Philost. ii. p. 484.) The modern Immid still contains many interesting remains of antiquity, respecting which see Pococke, vol. iii. p. 143, &c.; Description de l'Afrique Mineure, tom. i.; comp. Basche, Lexic. Rom. Num. iii. i. p. 1433, &c.

Nicoisius Dromus (Nicowiovs òpós, Ptol. iv. 7. § 11; Nic., Ptol. i. 17. § 12), one of the "Rans of Azania, on the E. coast of Africa, seven (days' stations) in all. Passing the Noti Cornu of Ptolemys (El-Khaff), the voyager arrived at the "Stranda" (ήγυμαλ), the Little and the Great, extending six days according to the Periplus, eight according to Ptolemy's authorities, though he would reduce the distance to four natural days. The Little Strand, which occurs first, is doubtless the Self Tawil, or "Long Sword," of the Arab pilots, so called from its curvature. The Great Strand is probably the district now called Merut, or "Dry Desert." These have an extent of 300 miles. Next comes the people shore where Ptolemy (i. 17. § 11) places 3 towns, Ergysara (Ergysara), the "Parodonta" (permsnegos òpom), and Tomic or Nici, the Nicon of the Periplus. These towns must be placed in the Bara Somalui, or the land of the Somalui, or Shipimli, a mild people of pastoral habits, confined to the coast, which they occupy from the Red Sea to the river Juba. The Port of Samburger, commonly called the Happy Bay, which, according to the "Run of Nicon" agrees with the point called Terra in Owen's map. (Narrative of Voyages to explore the Shores of Africa, Arabia, and Madagascar, performed in H. M. ships Leven and Barracouta, London, 1853; comp. Cooley, Claudius Ptolemy and the Nile, p. 64.)

[N. B. J.]

Nicorium (Nikowión, Scylas. p. 29), a city of the European Sarmatians, which Strabo (vii. 2) places at 160 stadia from the mouth of the Tyras, while the anonymous Coast-describer (p. 9) fixes it at 300 stadia from the Issiacorum Portus, and 30 stadia from the Tyras on the coast. Stephanus of Byzantium (s. v.) states that it was at the mouth of the Ister, but for "Iowps, Tiopos should probably be read. Ptolemy (iii. 10. § 16) has removed it from the coast, and placed it too far to the N. Its position must be looked for near Ovidiopolis. (E. B. J.)

Nicopolis (Νικόπολις: Eta. Νικωπόλις), i.e. the "City of Victory." I. in Asia. 1. A town of Bithynia, on the coast of the Bosporus, a few miles north of Chalcedon. (Plin. v. 43; Steph. B. s. v.) 2. A town in Cappadocia or Armenia Minor, founded by Pompey on the spot where he had gained his first decisive victory over Mithridates. (Strab. xii. p. 555; Appian, Mithrid. 101, 105; Dion Cass. xxxv. 33; Caes. Bell. Alex. 36; Plin. vi. 10.) It was situated in a valley of the river Lycus, a tributary of the Iris (Aeta Martys. tom. iii. Jul. p. 48), at a distance of 300 miles to the north-east of Pella, and 98 to the north-east of Sebastia. It was a populous town as early as the time of Strabo; but during the last period of the Empire it appears to have suffered much, and its decayed walls were restored by Justinian. (Procop. de Aed. iii. 4; comp. Ptol. v. 7, 27.)
426

NICOPLIS.

§ 3; Ith. Ant. p. 183, 207, 215; Hieroc. p. 703; Steph. B. s.v.). Most travellers and antiquaries are agreed, that Nicipolis is represented by the modern Turkish town of Derveli; but as this place is situated on a tributary of the Esphrates, the opinion is opposed to the statements of our authorities, especially the "Acta Martyrum." Others are inclined to regard Kavara, Gavaro, on the Lycus, as marking the site of Nicipolis; but still the routes indicated in the Itineraries are in favour of Derveli; whence D'Anville remarks, that Nicipolis was sacred to Bacchus, and that the altar lies with the author of the "Acta Martyrum," who expressly places Nicipolis on the river Lycus.

3. An episcopal see of uncertain site, in Lydia or Ionia, mentioned by Hierocles (p. 660). [L. S.]

4. A town in Cilicia. [Ith.]

5. A town in Palestine. [Euseb., No. 2.]

NICOPLIS. II. In Africa. A town in Aegypt, founded by Augustus Caesar, in a. c. 24, on the field where he defeated, for the last time, M. Antonius, and in commemoration of the surrender of Alexandria. (Strab. xvii. p. 795; Joseph. B. Jud. iv. 11; Dion Cass. li. 18; Steph. B. s.v.) The conqueror was at the moment highly incensed with the Alexandrians, and, by the order of a Roman town in their immediate neighbourhood, sought to inflict a permanent blow on their political and commercial supremacy. Nicipolis was built a little W. of the Delta proper, on the banks of the canal which connected Canopus with the capital, and about three and a half miles from its eastern gate. The site of the town was chosen for the city which was the first rampart from Oxyrhynchus and the games. (Manett. Julius. 9.) At the beginning of the fifth century it was plundered by the Goths. (Procop. B. Goth. iv. 22.) It was again restored by Justinian (de Aedif. iv. 2), and was still in the sixth century the capital of Epirus. (Hieroc. p. 651, ed. Wessel.) In the middle ages Nicipolis sank into insignificance, and the town of Bracara, built at the extremity of the promontory, at length absorbed all its inhabitants, and was doubtless, as in similar cases, chiefly constructed out of the ruins of the ancient city.

The ruins of Nicipolis are still very considerable. They stretch across the narrowest part of the isthmus already described. Strabo (vii. p. 324) describes it as an extraordinary spot. Strabo alone saw the fish alone (vi. 23. a. 26), seated on the same canal, and about the same distance (20—50 stades) from Alexandria. Epirus is a fairly Nicipolis (see Mannert, vol. ii. p. 626). [W. B. D.]

NICOPLIS. III. In Europe. 1. A city of Epirus, erected by Augustus, in commemoration of the victory of Actium, a. c. 31. It was situated near the entrance of the Ambracian gulf, on the promontory of Epirus, which is immediately opposite that of Actium in Acarnania. The extremity of the Epeion promontory is now occupied by the town of Prieneia; and Nicipolis lay 3 miles to the N. of this town, on a low isthmus separating the Ionian sea from the Ambracian gulf. It was upon this isthmus that Augustus was exalted as the son of Actium. His own tent was pitched upon a height immediately above the isthmus, from whence he could see both the outer sea towards Parni, and the Ambracian gulf, as well as the parts towards Nicipolis. He fortified the camp, and connected it by walls with the outer part, called Comarum. (Dion Cass. i. 12.) After the battle he surrounded with stones the place where his own tent had been pitched, adorned it with naval trophies, and built within the enclosure a sanctuary of Neptune open to the sky. (Dion Cass. ii. 12.) But, according to Sustoninus (a. d. 18), he dedicated this place to Neptune and Mars. The city was peopled by inhabitants taken from Ambraecia, Anactorium, Thyrium, Argos Amphibolichum, and Calydon. (Dion Cass. ii. 1; Suet. Aug. ii. 12; Strab. vii. pp. 324, 325; Paus. x. 23. § 8, vii. 18. § 8, x. 38. § 4.) Augustus instituted at Nicipolis a quinquennial festival, called Actia, in commemoration of his victory. The festival was in the month of Mars, and was celebrated with music and gymnastic games, horse-racing and sea-fights. It was probably the revival of an old festival, since there was an ancient temple of Apollo on the promontory of Actium, which is mentioned by Thucydides (i. 39), and was enlarged by Augustus. The festival was declared by Augustus to be a sacred contest, by which it was made equal to the four great Grecian games; it was placed under the superintendence of the Macedonians. (Dion Cass., Suet., Strab., ii. c.) Augustus caused Nicipolis to be admitted into the Amphictyonic council (Paus. x. 38. § 3), and made it a Roman colony. (Plin. iv. 1. s. 2; Tac. Ann. v. 10.) A Christian church appears to have been founded at Nicipolis. (See Note.) It is related as the life of Titus from Nicipolis of Macedonia, which was most probably the colony of Augustus, and not the town in Thrace, as some have supposed. Nicipolis continued to be the chief city in Western Greece for a long time, but it had already fallen into decay in the reign of Julian, since we hear of its ruin in the first century of our era. (Paus. x. 38. § 3, ed. Morel.) Once the city of the Thracians, a strong tower stands on the site of the ancient city, and the ruins of its walls still remain. (Manett. Julius. 9.) At the beginning of the fifth century it was plundered by the Goths. (Procop. B. Goth. iv. 22.) It was again restored by Justinian (de Aedif. iv. 2), and was still in the sixth century the capital of Epirus. (Hieroc. p. 651, ed. Wessel.) In the middle ages Nicipolis sank into insignificance, and the town of Bracara, built at the extremity of the promontory, at length absorbed all its inhabitants, and was doubtless, as in similar cases, chiefly constructed out of the ruins of the ancient city.

The ruins of Nicipolis are still very considerable. They stretch across the narrowest part of the isthmus already described. Strabo (vii. p. 324) describes it as an extraordinary spot. Strabo alone saw the fish alone (vi. 23. a. 26), seated on the same canal, and about the same distance (20—50 stades) from Alexandria. Epirus is a fairly Nicipolis (see Mannert, vol. ii. p. 626).
NICOPOLIS.

the outer port; and there can be little doubt that the second harbour, intended by Strabo, was the port of Vlady within the gulf, the distance of which from Nicopolis corresponds to the 12 stadia of Strabo, and where there are some Roman ruins a little within and on the eastern shore of the creek. The port of Comana was doubtless at Mytila, but the name of Gomaro is now given to the wide bay north of Mytila.

The ruins of Nicopolis are now called Paleokéfes. On approaching them from Prosko, the traveller first comes to some small arched buildings of brick, which were probably sepulchres, beyond which are the remains of a strong wall, probably the southern enclosure of the city. Near the southwestern extremity of the lagoon Mákona, is the Paleokástro or castle. It is an irregular pentagonal enclosure, surrounded with walls and with square towers at intervals, about 25 feet in height. On the western side, the walls are most perfect, and here too is the principal gate. The extent of the enclosure is about a quarter of a mile. The variety of marble fragments and even the remains of inscriptions of the time of the Roman Empire, inserted in the masonry, prove the whole to have been a repair, though perhaps upon the site of the original acro- polis, and restored so as to have been sufficiently large to receive the diminished population of the place. It may have been, as Leake conjectures, the work of Justinian, who restored Nicopolis.

Three hundred yards westward of the Paleokástro are the remains of a small theatre but little dilapidated. Col. Leake says that it appears to be about 200 feet in diameter; but Liet. Wolfe describes it as only 60 feet in diameter. Being built upon level ground, the back or highest part is entirely supported upon an arched corridor. Between this

theatre and the shore, are the ruins of a quadrangular building of brick, which was perhaps a palace, as it has numerous apartments, with many niches in the walls for statues, and some remains of a stone pavement. It stands just within an aqueduct, supported upon arches, which entered Nicopolis on the north, and was 30 miles in length. Considerable remains of it are met with in different parts of Epeirus.

Further north, at the foot of a range of hills, are the remains of the great theatre, which is the most conspicuous object among the ruins. It is one of the best preserved Roman theatres in existence. The total diameter is about 300 feet. The scene is 120 feet long, and 50 in depth. There are 27 rows of seats in three divisions. From the back of the theatre rises the hill of Mikhalitsa, which was undoubtedly the site of the tent of Augustus before the battle of Actium. Close to the theatre are the ruins of the stadium, which was circular at both ends, unlike all the other stadia of Greece, but similar to several in Asia Minor, which have been constructed or repaired by the Romans. Below the stadium are some ruins, which are perhaps those of the gymnasion, since we know from Strabo (vii. p. 323) that the gymnasion was near the stadium. The accompanying map is taken from Liet. Wolfe's survey. (Leake, Northern Greece, vol. i. p. 185, seq.; Wolfe, in Journal of Geogr. Soc. vol. iii. p. 92, seq.)

NIDUM. 427

CINCI MIOCOPOLIS IN EPIEURUS.

2. A town of Thrace, not far from the mouth of the Nestus, and therefore called by Ptolemy (iii. 11. § 13) Νικόπολις ἡ πέρι Νήσου. It appears to have been founded by Trajan, as it is surnamed Ulpia upon coins. The Scholiast upon Ptolemy says that it was subsequently named Christopolis; but it is still called Nicopolis by Socrates (H. E. viii. 36) and Hierocles (p. 635).

3. A town of Thrace, at the foot of Mt. Haemus. (Ptol. iii. 11. § 11.)

4. A town of Thrace, situated at the place where the Istrus flies into the Danube, and erected by Trajan in memory of his victory over the Dacians. (Amm. Marc. xxxi. 5; Jornand. de Reb. Get. c. 18; Hieroc. p. 636.)

NICOTERA (Nicotera), a town of Brutium, known only from the Antonine Itinerary (p. 106, 111), which places it 18 M. P. south of Vibo Valentia, on the road to Rhegium. It is repeatedly mentioned in the middle ages, and still exists under its ancient name as a considerable town and an episcopal see. [E.H.B.]

NIDUM or NIDUS, a town of Britain, situated according to the Itinerary (p. 484), on the road from Isca Dumnoniorum to Isca Silurum, and consequently in the territory of the Belgae. This site, however, is in all probability false; and it appears rather to have been a town of the Silures, the modern Neath, on the river of that name in Glamorganshire. (Carmen, p. 785.)

[T. H. D.]
NIE.

NIE (Nef, Sidor. Pach. 16, ed. Müller), a small place in Ariana, probably the present Neh, in Koskiaton. [V.]

NIGEIR or NIGIR (Nīyp, Ptol. iv. 6 § 14; Nīys, Agathem. ii. 10; Niger, gen. Nigirs, Plin. v. 4, 8, viii. 32), a great river of interior Libya, flowing from W. to E. It has long been a moot point in the geographies whether the Nigeir of the ancients should be identified with the river now known as the Djiobid or Quora, which, after taking its course through the vast plains or lowlands of Central Africa, turns southwards towards the Bight of Benin, where it enters the sea. For instance, Gesselin (Géographie des Anciens, vol. i. pp. 125–136) came to the conclusion that the ancients possessed no knowledge of NW. Africa to the S. of the river Num. Walckenaer (Bibliothèques Géographiques sur l’Intérieur de l’Afrique Septentrionale, Paris, 1821) also, who has carefully discussed this point, sums up the result of his inquiries by asserting that none of Poleni’s rivers can be the same as the Djiobid or any other stream of the Bileshu-Liddun, as that region was quite unknown to antiquity, and was, in reality, discovered by the Arabs. Following in the same track, Mr. Cooley (Clavellinae Polymi and the Nile, London, 1854) regards the Nigeir as a hypothetical river, representing collectively the waters of the Bileshu-Leriki. On the other hand, Colonel Leake (Journ. Geog. Soc. vol. ii. pp. 24–28), whose views are adopted in the present article, considers that Poleni’s information on the Djiobid or Quora, although extremely imperfect, was real. There seems, indeed, to be reason for believing that its discovery may be placed at a much earlier period, and that its banks were reached by the young Nasamonos. [Naramono.] Poleni’s statements (i.e.) are annexed, from which it will be seen that the arguments in favour of the identity of his Nigeir with the Qu ora are very strong. He believed that the earth was spherical; he divided the great circle into 360°; of these degrees he placed the same number in the breadth of N. Africa, that modern observations confirm; in the length of the same country he erred only one-tenth in longitude of the interior; in the latitude of the W. coast, where his positions approximate to modern geography, he placed a great river, flowing from W. to E., exactly in the latitude where the Quora flows in that direction.*

In considering the exact meaning of this passage,

*The Geir unites Mount Usargasa with the Garamanc Pharanx. A river diverges from it at
And makes the lake Chelonedis, of which the middle is in
This river is said to be lost underground, and to reappear, forming another river, of which the W. end is at
The E. part of the river forms the lake Nuba, of which the position is
The Niger joins the mountains Mandrus and Thala, and forms the lake Nigrites, of which the position is
The Niger has two north-east divergent to the mountains Sagasia and Nigrita; to the E. one divergent to the lake Lipy, the position of which is
And to the S. one divergent to the river Daras, at two positions -
And -
In the Latin -
It should be remembered that the word divergent, translated "diergent," simply indicates the point of junction of two streams, without any reference to the course of their waters. At present, our acquaintance with the Quora is too limited to identify any of its divergents; and even were there data, by which to institute a comparison, the imperfection of Poleni’s information will probably make the task of the geographer in those particulars in obscurity. After having stated that the Geir and Nigeir are the two principal rivers of the interior, he describes the one, as yoking together (tuveri) the Garamanc Pharanx with Mt. Usargasa; and the latter, as uniting in the same way Mt. Mandrus with Mt. Thala. It is plain that he considers them to be rivers beginning and ending in the interior, without any connection with the sea. If two opposite branches of a river, rising in two very distant mountains, flow to a common receptacle, the whole may be described as joining the two mountains. Of the general direction of the current of the Nigeir there can be no doubt, as the latitudes and longitudes of the towns on its banks (§§ 24–28) prove a general bearing of E. and W.; and from its not being named among the rivers of the W. coast (§ 7), it must have been supposed to flow from W. to E. The lake Libye, to which there was an E. divergent, though its position falls 300 geográfic miles to the NW. of Lake Tschad, may be presumed to represent this, the principal lake of the interior; and as we do not find the lake Polomi, like many of those moderns, should have been misinform ed as to its position, and communication of the river with the lake. It is now, indeed, known that the river does not communicate with Lake Tschad, and that it is not a river of the interior in Poleni’s sense; that its sources are, in a very different latitude from that which he gave, and its course, at least in its later parts, is considerably from the enormous extent of direction to the E., which results from his position of the towns on its banks. But recent investigations have shown that the difference of longitude between its source of the river and the W. coastal track is the same as that given by modern observations, — that Thamondiaca (Scopusa, § 20), one of his towns on the Nigeir, is really Sharia (Chala), the language of which the author is from Cassil — that the length of the course of the river is nearly equal to that of the Quora, as far as the mountain of Konyg, with the addition of the Shadda or Sharfy of Fanda, — while Mt. Thala is very near that in which it may be supposed that the Shadda has its origin. In the imperfect state of our information upon the countries between Bormés and Darfër, it would be hazardous to identify the lakes Chelonedis and Nuba. In comparing Poleni’s description of the central country between the Nile and Nigeir, there are reasons for concluding that he had acquired an obscure knowledge of it, similar to that which had reached Europe before the discoveries of Denham, Clapperton, and Lanier. The other great river, the Geir or Gimm (Telg. § 13), is the same as the river called Missulad by Browne, and Oumm Tebman, in Arabic, by Burckhardt; while the indigenous name Djar recalls that of Polomi, and which takes a general course from S.E. to NW. Burckhardt adds, that this country produces ebony, which agrees with what is stated by Claudian (Idyl. xii. 19), who, as an African, ought to be an authority, though, like an African, he confounds all the rivers of his country with the Nile; but, in another passage (I. Conrad. Stichic. i. 258), he represents the Gir as a separate river, rivalling the
NIGERIA.  

the Nile in size. Claudian could not have intended by this river, the Gna of Pliny (v. 1), at the foot of Mt. Atlas, and a desert of black sand and burnt rocks (Nūs P.), at which Paullinus arrived in a few days' journey from the maritime part of Mauretania; though it is probable that he may have intended, not the Gna of Poenue, but the Niger. The termination Gna is a Semitic word, applied to all rivers and waters in N. Africa, as well as to the prefix Ni; both were probably derived from the Semitic, and came through the Phoenicians to the Greeks. By a not unnatural error, the word became connected with the epithet "Niger," and thus the name Nigerinae or Nigeretus was synonymous with Sèdès (the Blacks); the real etymology of the name tends to explain the common belief of the Africans, that all the waters of their country flow to the Nile. It is from this notion of the identity of all the waters of N. Africa that Pliny received the absurd account of the Nile and Niger, from the second Juba of Numidia. He reported that the Nile had its origin in a mountain of Lower Mauretania named Monagan or the thirty, a place called Nilis; that it flowed from thence through sandy deserts, in which it was concealed for several days; that it reappeared in a great lake in Mauretania Caesariensis; that it was again hidden for twenty days in deserts; and that it rose again in the sources of the Niger, which river, after having separated Africa from Barbary, and then flowed through the middle of Aethiopia, at length became the branch of the Nile called Astapious. The same fable, though without the Niger being mentioned, is alluded to by Strabo (xiv. p. 826; comp. Vitruv. viii. 2. § 16); while Mela (iii. 9. § 8) adds that the river at its source was also called Dara, so that the river which now bears the name El-Dkares would seem to be the stream which was the reputed commencement of the Nile. The Niger of Pliny was obviously a different river, both in its nature and position, from the Ger of the same author. It was situated to the S. of the great desert on the line separating Africa from Aethiopia; and its magnitude and productions, such as the hippopotamus and crocodile, contrasted well with the small and billowy rivers of the Atlas. Neither do these swell at the same season as the Nile, being fed, not by tropical rain, falling in greatest quantity near the summer solstice, but by the waters of the maritime ridges, which are most abundant in winter. The Niger is not mentioned by the Geographer of Ravenna, nor the Arabes, until the work of Joannes Leo Africanus — a Spanish Moor — which was written at Rome, and published in Latin, A. D. 1556. Though his work is most valuable, in being the only account extant of the foundation of the Negro empire of Sèdès, yet he is in error upon this point, as though he had sailed on the river near Timbuktu; he declares that the stream does not flow to the E., as it is known to do, but to the W. It was led the Italians, and led Europeans to look for its estuary in the Senegal, Gambia, and Rio Grande. The true course of the river, which has now been traced to its mouth, confirms the statements of the ancients as to the great river which they uniformly describe as flowing from W. to E. [E. B. J.]

NIGERIA [NIGERIA].

NIGER-PULLUS, Nigropellum, or Nigropullus, in North Gallia, is placed by the Theodosian Table on a road from Lugdunum Batavorum (Leiden) to Noviomagus (Nimegenum). The distance is marked 11 from Albiniana (Alfons), ascending the Rhine. Uertk (Gallius, p. 333) quotes a Dutch author, who says that there is a village near Woerden still called Zwaarte Kalkenhout. (D'Anville, Notices, 40.)

G. L.

NIGRITAE, NIGRETES (Nigripaes, Strab. ii. p. 131, xvii. p. 826; Ptol. iv. 6. § 16; Agath. L. 5; Mela, iii. 9. § 8; Plin. ii. 42. § 2; Nigripaces, Strab. xvii. p. 828; Dionys. v. 215; Steph. B.) an African tribe who with the Pharnaii were said to have destroyed the Tyrian settlements on the coast of the Atlantic, and though adjacent to the W. Aethiopians, were distant only thirty journeys from Lixus or Lixana (El-Atraa). Strabo, as it appears, had no knowledge of, or at least, placed no confidence in, any information which may have reached him as to the countries more to the S. than Fazón. But if he was so ignorant of Libya, and particularly of the position of the W. Aethiopians (comp. p. 839), no great weight can be attached to his testimony, that the Nigerita and Pharnaii, whom he expressly states to have been near those Aethiopians, were on the borders of the Lixus, particularly when he accompanies the remark with the doubtful word ψαιρι, and with his marvellous stories about the productions of Mauretania. Poenule (I. c.) places them on the N. of the river Niger, from which they took their name. It may be inferred, therefore, that they are to be sought in the interior between the Chorsaw or Djebbeh and the Shahor in the Bichaou-Sèdès. Their chief town was called NIGERIA (Nīgepa μεγάλης, Ptol. iv. 6. § 27): the NIGERIA LACUS (Nīgerīnī λαγός, § 14) may be identified with the lake Dibba to the SW. of Timbuktu. [E. B. J.]

NIGRINIANA. [CANDIANIA.]

NIGRITIS LACUS. [NIGRITAE.]

NIGRIS. [MOORUS.]

NILI PALUDES (al τῶν Νεάνας λαμυς, Ptol. iv. § 3; Strab. xvii. p. 786) were described by the ancient geographers as two immense lagoons, which received the first floods of the periodical rains that from May to September fall upon the Abyssinian highlands, and swell all the rivers flowing northward from that tract of land. From these lagoons the Astapous (Bahr-el-Atrash, Blue Nile) and the Bahr-el-Abiad, or White River, respectively derived their waters; and since they were the principal tributaries of the Nile, the lakes which fed them were termed the Nilotic Marshes. The ancients placed the Nili Paludes vaguely at the foot of the Lunes Monte, and the exploring party, sent by the emperor Nero, described them to Seneca the philosopher as of boundless extent, covered with floating weeds, and containing black and slimy water, impassable either by boats or by wading. There is, however, some probability that this exploring party saw only the series of lagoons produced by the level and sluggish stream of the White River, since the descriptions of the traveler in that region accord closely with Seneca's narrative (Nero Nat. vi. 8). The White River itself, indeed, resembles an immense lagoon. It is often from five to seven miles in width, and its banks are so low as to be covered at times with slime to a distance of two or three miles from the real channel. This river, as less remote than the Abyssinian highlands from the ordinary road between Suez and the S. of Arabia (Sommar), is more likely to have fallen under the notice of Nero's explorers; and the extent of slimy water overspread with aquatic plants, corresponds
NILUPOS.

with Seneca's description of the Nile Paludes as "immensas quorum exitus nec incolae noravit nec sperare quisquam potest." [NILUS] [W. B. D.]

NILUPOS (Νιλοποσις, Ptol. v. 5 § 57; Steph. B. s. v.; Neaλωπος), was a city of Middle Aegypt situated on an island in the Nile, in the Hermopolite nome, and about eight miles NE. of Hermopolite Magna. Nilopolis is sometimes called simply Nilus, and appears to be the town mentioned under the latter name by Hecataeus (Fragment 277). It was existing as late as the 5th century A. D., since it is mentioned in the Acts of the Council of Nitria (566). NILUS (Νιλος), the river Nile in Egypt. Of all the more important rivers of the globe known to the Greek and Roman writers, the Nile was that which from the remotest periods arrested their liveliest curiosity and attention. It ranked with them as next in magnitude to the Ganges and the Indus, and as surpassing the Danube in the length of its course and the volume of its waters. (Strab. xvi. p. 702.) Its physical phenomena and the peculiar civilisation of the races inhabiting its banks attracted alike the historian, the mathematician, the satirist, and the romance-writer; Herodotus and Diodorus, Eratosthenes and Strabo, Lucian and Heliodorus, expatiated on its marvels; and as Aegypt was the receptacle of the manufactures of Greece in general, the Nile was more accurately surveyed and described than any other river of the earth.

The word Nilus, if it were not indigenous, was of Semitic origin, and probably transmitted to the Greeks by the Phenicians. Its epithets in various languages—e.g. the Hebrew Sihhar (Sisrah, xxiii. 3; Jerem. ii. 15), the Egyptian Chemi, and the Greek μυκης (Servius, ad Virgil. Georg. iv. 291)—point to the same peculiarity of its waters, the hue imparted by their dark slime. The Hebrews entitled the Nile Nahal-Misraim, or river of Aegypt; but the natives called it simply i-piero (whence probably the Nubian iero) or the river (i.e. of rivers). Lydus (de Mensibus, c. 8) says that it was sometimes called i-piero; and Pliny (v. 9 comp. Dionys. Perieq. v. 213) observes, somewhat vaguely, that in Aethiopia the river was called Siris, and did not acquire the appellation of Nilus before it reached Syene. With few exceptions, however, the Greeks recognised the name of Nilus as far south as Meroe; and above that mesopotamian region they merely doubted to which of its tributaries they should assign the principal name. Homer, indeed (Od. iii. 300, iv. 477, &c.), calls the river Aegyptus, from the appellation of the land which it intersects. But Hesiod (Thog. 338) and Hecataeus (Fragment 279—280), and succeeding poets and historians uniformly designate the river of Aegypt as the Nile. It is unnecessary to dwell on a theory at one time received, but generally discarded, by the ablest of the ancient geographers—that the Nile rose in Lower Meroëtanis, not far from the Western Ocean (Juba, op. Plin. v. 9 s. 10; Dion Cass. xixv. 13; Solin. c. 35); that it flowed in an easterly direction; was engulfed by the sands of the Sw.edra; reappeared as the Nigur; again sunk in the earth, and finally re-appeared near the Great Lakes of Dubysa as the proper Nile.

Historically, the Nile derives its principal importance from the civilisation, to which it contributed so materially, of the races inhabiting its shores, from the S. of Meroe northwards to the Mediterranean. But for geographical purposes it is necessary to ex-

amine its course, in the first instance, through less known regions, and to ascertain, if possible, which of its feeders above Meroe was regarded by the ancients as the true Nile. The course of the stream may be divided into three heads:—(1) the river S. of the Nile divided in be Nile, in the Hermopolite nome, and about eight miles NE. of Hermopolite Magna. Nilopolis is sometimes called simply Nilus, and appears to be the town mentioned under the latter name by Hecataeus (Fragment 277). It was existing as late as the 5th century A. D., since it is mentioned in the Acts of the Council of Nitria (566). NILUS (Νιλος), the river Nile in Egypt. Of all the more important rivers of the globe known to the Greek and Roman writers, the Nile was that which from the remotest periods arrested their liveliest curiosity and attention. It ranked with them as next in magnitude to the Ganges and the Indus, and as surpassing the Danube in the length of its course and the volume of its waters. (Strab. xvi. p. 702.) Its physical phenomena and the peculiar civilisation of the races inhabiting its banks attracted alike the historian, the mathematician, the satirist, and the romance-writer; Herodotus and Diodorus, Eratosthenes and Strabo, Lucian and Heliodorus, expatiated on its marvels; and as Aegypt was the receptacle of the manufactures of Greece in general, the Nile was more accurately surveyed and described than any other river of the earth.

The word Nilus, if it were not indigenous, was of Semitic origin, and probably transmitted to the Greeks by the Phenicians. Its epithets in various languages—e.g. the Hebrew Sihhar (Sisrah, xxiii. 3; Jerem. ii. 15), the Egyptian Chemi, and the Greek μυκης (Servius, ad Virgil. Georg. iv. 291)—point to the same peculiarity of its waters, the hue imparted by their dark slime. The Hebrews entitled the Nile Nahal-Misraim, or river of Aegypt; but the natives called it simply i-piero (whence probably the Nubian iero) or the river (i.e. of rivers). Lydus (de Mensibus, c. 8) says that it was sometimes called i-piero; and Pliny (v. 9 comp. Dionys. Perieq. v. 213) observes, somewhat vaguely, that in Aethiopia the river was called Siris, and did not acquire the appellation of Nilus before it reached Syene. With few exceptions, however, the Greeks recognised the name of Nilus as far south as Meroe; and above that mesopotamian region they merely doubted to which of its tributaries they should assign the principal name. Homer, indeed (Od. iii. 300, iv. 477, &c.), calls the river Aegyptus, from the appellation of the land which it intersects. But Hesiod (Thog. 338) and Hecataeus (Fragment 279—280), and succeeding poets and historians uniformly designate the river of Aegypt as the Nile. It is unnecessary to dwell on a theory at one time received, but generally discarded, by the ablest of the ancient geographers—that the Nile rose in Lower Meroëtanis, not far from the Western Ocean (Juba, op. Plin. v. 9 s. 10; Dion Cass. xixv. 13; Solin. c. 35); that it flowed in an easterly direction; was engulfed by the sands of the Sw.edra; reappeared as the Nigur; again sunk in the earth, and finally re-appeared near the Great Lakes of Dubysa as the proper Nile.

Historically, the Nile derives its principal importance from the civilisation, to which it contributed so materially, of the races inhabiting its shores, from the S. of Meroe northwards to the Mediterranean. But for geographical purposes it is necessary to ex-

amine its course, in the first instance, through less known regions, and to ascertain, if possible, which of its feeders above Meroe was regarded by the ancients as the true Nile. The course of the stream may be divided into three heads:—(1) the river S. of the Nile divided in be Nile, in the Hermopolite nome, and about eight miles NE. of Hermopolite Magna. Nilopolis is sometimes called simply Nilus, and appears to be the town mentioned under the latter name by Hecataeus (Fragment 277). It was existing as late as the 5th century A. D., since it is mentioned in the Acts of the Council of Nitria (566). NILUS (Νιλος), the river Nile in Egypt. Of all the more important rivers of the globe known to the Greek and Roman writers, the Nile was that which from the remotest periods arrested their liveliest curiosity and attention. It ranked with them as next in magnitude to the Ganges and the Indus, and as surpassing the Danube in the length of its course and the volume of its waters. (Strab. xvi. p. 702.) Its physical phenomena and the peculiar civilisation of the races inhabiting its banks attracted alike the historian, the mathematician, the satirist, and the romance-writer; Herodotus and Diodorus, Eratosthenes and Strabo, Lucian and Heliodorus, expatiated on its marvels; and as Aegypt was the receptacle of the manufactures of Greece in general, the Nile was more accurately surveyed and described than any other river of the earth.

The word Nilus, if it were not indigenous, was of Semitic origin, and probably transmitted to the Greeks by the Phenicians. Its epithets in various languages—e.g. the Hebrew Sihhar (Sisrah, xxiii. 3; Jerem. ii. 15), the Egyptian Chemi, and the Greek μυκης (Servius, ad Virgil. Georg. iv. 291)—point to the same peculiarity of its waters, the hue imparted by their dark slime. The Hebrews entitled the Nile Nahal-Misraim, or river of Aegypt; but the natives called it simply i-piero (whence probably the Nubian iero) or the river (i.e. of rivers). Lydus (de Mensibus, c. 8) says that it was sometimes called i-piero; and Pliny (v. 9 comp. Dionys. Perieq. v. 213) observes, somewhat vaguely, that in Aethiopia the river was called Siris, and did not acquire the appellation of Nilus before it reached Syene. With few exceptions, however, the Greeks recognised the name of Nilus as far south as Meroe; and above that mesopotamian region they merely doubted to which of its tributaries they should assign the principal name. Homer, indeed (Od. iii. 300, iv. 477, &c.), calls the river Aegyptus, from the appellation of the land which it intersects. But Hesiod (Thog. 338) and Hecataeus (Fragment 279—280), and succeeding poets and historians uniformly designate the river of Aegypt as the Nile. It is unnecessary to dwell on a theory at one time received, but generally discarded, by the ablest of the ancient geographers—that the Nile rose in Lower Meroëtanis, not far from the Western Ocean (Juba, op. Plin. v. 9 s. 10; Dion Cass. xixv. 13; Solin. c. 35); that it flowed in an easterly direction; was engulfed by the sands of the Sw.edra; reappeared as the Nigur; again sunk in the earth, and finally re-appeared near the Great Lakes of Dubysa as the proper Nile.

Historically, the Nile derives its principal importance from the civilisation, to which it contributed so materially, of the races inhabiting its shores, from the S. of Meroe northwards to the Mediterranean. But for geographical purposes it is necessary to ex-
NILUS.

The river nearly resembles in its natural features and the cultivation of its banks the acknowledged Nile below the junction lower down. The current is swift and regular; the banks are firm and well defined: populous villages stand in the midst of clumps of date-trees or fields of millet (dioweyr), and both the land and the water attest the activity of human enterprise.

A difference corresponding to these features is observable also in the respective currents of these rivers. The White River moves sluggishly along, without rapids or cataracts: the Blue River runs strongly at all seasons, and after the periodical rains with the force and speed of a torrent. The diversity is seen also on the arrival of their waters at the point of junction. Although the White River is fed by early rains near the equator, its floods ordinarily reach Khartum three weeks later than those of the Blue River. And at their place of meeting the superior strength of the latter is apparent. For while the stronger flood discharges itself through a broad channel, free from sand and shoals, the White River is contracted at its mouth, and the more rapid current of its rival has thrown up a line of sand across its influx. Actual measurement, too, has proved the breadth of the Blue River at the point of junction to be 768 yards, while that of the White is only 485, and the body of water poured down through the mouth of the Blue is diminished by the latter. From all these circumstances it is probable that to the Bahir-el-Asrek rather than to the Bahir-el-Abiad belongs the name of the "true Nile," and this supposition accords with an ancient tradition among the people of Seammar who hold the Blue River in peculiar veneration as the Father of the Waters that run into the Great Sea.

The knowledge possessed by the ancients of the upper portions and tributaries of the Nile was not altogether in a direct proportion to the date of their intercourse with those regions. Indeed, the earlier track of commerce was more favourable to acquaintance and yet their later channels. The overland route declined after the Ptolemies embraced the seapath the rivers took across the desert to Asxume, Adulis, Berenice, and the ports of the Red Sea. Eratosthenes and other geographers, who wrote while Aethiopia still flourished, had thus better means of information than their successors in Roman times, Strabo, Ptolemy, &c. Dio- dorus (l. 30), for example, says that a voyage up the Nile to Meroca was a costly and hazardous undertaking; and Necho's explorers (Plin. v. 9. s. 10; Senec. N. Q. vi. 8) seem to have found in that once populous and fertile kingdom only solitude and decay.

At the close of the third century a.d. the Romans abandoned every station on the Nile above Philae, as not worth the cost and care of defence,—a proof that the river-traffic, beyond Aegypt, must have dwindled, if not entirely suspended, between Arabia and Taprobane (Ceylon) by sea developed itself, that with Libya would become of less importance; and in proportion as the Red Sea was better known, the branches and sources of the Nile were obscured.

(2.) The Nile below the point of junction.—The two streams flow in a common bed for several miles N. of Kirthum, and blend into one broad channel. The Bahir-el-Abiad retains its white sandy hue, both in the dry season and during the inundations, while the Bahir-el-Asrek is distinguished by its dark colour. For 12 or 15 miles below the point of junction the Nile traverses a narrow and gloomy defile, until it emerges among the immense plains of herbage in the mesopotamian district of Meroca. Beyond Meroca, already described [MEROK], the Nile receives its last considerable affluent, the Astabors or Tacazem; the only other accessions to its stream in its course northward being the torrents oredis that, in the rainy season, descend from the Arabian hills. From the N. of Meroca to Syene, a distance of about 700 miles, the river enters upon the region of Cataracts, concerning which the ancients invented or credited so many marvels.

(Cic. Sos. Scip. 5; Senec. N. Q. iv. 2.)

These rapids are seven in number, and are simply dams or weirs of granite or porous clay rising through the sandstone, by which the river is compelled to make the attrition of the water, resist its action, divide its stream, and render its fall per mile double of the average fall below Philae. So far, however, from the river descending lofty precipices with a deafening noise, even the steepest of the rapids may be shot, though not without some danger, at high water; and the great Cataract has an entire descent in a space of 5 miles is only 80 feet. [PHILAE.] Increased by the stream of the Astabors, the Nile, from lat. 17° 45' N., flows in a northerly direction for 150 miles, through the land of the Berbers. Then comes its great SW. elbow or bend, commencing at the rocky island of Meqreb (lat. 19° 30' N.), and running nearly to the most northern point of Meroca. During this lateral deflection the Nile is bounded W. by the desert of Bahiawi, the region of the ancient Nubas, and E. by the Arabian Desert, inhabited, or rather traversed, by the nomads Blemmyes and Megabari. [MACRORB.] Throughout this portion of its course the navigation of the river is greatly impeded by rapids, so that the canoes leave its banks, and regain them by a road crossing the eastern desert at Derr or Syene, between the first and second Cataracts. No monuments connect this region with either Meroca or Aegypt. It must always, indeed, have been thinly peopled, since the only cultivable soil consists of strips or patches of land extending about 2 miles at furthest beyond either bank of the Nile.

While skirting or intersecting the kingdom of Meroca, the river flowed by city and necropolis, which, according to some writers, imparted their forms and civilisation to Aegypt, according to others derived both art and polity from it. The desert of Bahiawi serves the chain of monuments, which, however, is resumed below the fourth Cata- ract at Nouri, Gebel-el-Birkel, and Meromos. (Lat. 20° N.) Of thirty-five pyramids at Nouri, on the left bank of the river, about half are in good preservation; but the purpose which they served is uncertain, since no ruins of any cities point to them as a necropolis, and they are without sculptures or inscriptions. On the western side of Gebel-el-Birkel, about 8 miles lower down, and on the right bank, are found not only pyramids, but also the remains of several temples and the vestiges of a city, probably Napata, the capital of Can- date, the Aethiopian queen. [NAPATA.] (Cailliaud, It. de Meroca, vol. iii. p. 197; Hoekins, Trans., p. 150, 144.) About the 18th degree of N. Latitude the Nile resumes its northerly direc- tion, which it observes generally until it approaches the second Cataract. In resuming its direct course to N., it enters the kingdom of Dongola, and most of the features which marked its channel through the
desert now disappear. The rocky banks sink down; the inundation fertilises the borders to a considerable distance; and for patches of arable soil fine pastures abound, whence both Arabia and Asyrgy imported a breed of excellent horses. (Rassegger, Kortu von Nubien.) But after quitting Napea (?) no remains of antiquity are found before we arrive at the Gagandes insula of Pliny (vi. 29. s. 35), lat. 19° 35', the modern Argro, a little above the third Cataract.

The quarters of this island, which is about 12 miles in length, and causes a considerable eddy in the river, were worked both by Aethiopians and Asyrgyans. A little to N. of this island, and below the third Cataract, the Nile makes a considerable bend to the E., passing on its right bank the ruins of Sagh, or Sashch. On its left bank are found the remains of the temple of Soleb, equally remarkable for the beauty of its architecture, and for its picturesque site upon the verge of the rich land, "the river's gift," and an illuminating plain of sand stretching to the horizon. (Caillou, l'île de Maroc, vol. i. p. 375.) Hoskins, Travels, p. 245. The Nile is once again divided by an island called Saias, and a little lower down is contracted by a wall of granite on either side, so that it is hardly a stone's throw across. At this point, and for a space of several miles, navigation is practicable only at the season of the highest floods.

Below Saias are found the ruins of the small temple of Amara, and at Semsa those of two temples which, from their opposite eminences on the right and left banks of the river, probably served as fortresses also at this narrow pass of the Nile. That a city of great strength once existed here is the more probable, because at or near Semsa was the frontier between Aethiopia and Asyrgy. We have now arrived at the termination of the porphyry and granite rocks; henceforward, from about lat. 21° N., the river-banks are composed of sandstone, and acquire a less rugged aspect. The next remarkable feature is the Cataract of Wadi-Halafa, the Great Cataract of the ancient geographers. (Strab. xvii. p. 786.)

Remote anti-historic periods a bar of primitive rock, piercing the sandstone,probably spanned the Nile at this point (lat. 29° N.) from shore to shore. But the original barrier has been broken by some natural agency, and a series of islands now divides the stream which rushes and dashes between them. It is indeed less a single fall or shoal of water than a succession of rapids, and may be ascended, as Belzoni did, during the inundation. (Travels in Nubia, p. 85.) The roar of the waters may be heard at the distance of half a league, and the depth of the fall is greater than that of the first Cataract at Syene. On the left bank of the river a city once stood in the immediate neighbourhood of the rapids; and three temples, each dedicated to the name of Pharaoh Thothmes III., and Amenophis II. have been partially surveyed here. Indeed, with the second Cataract, we may be said to enter the propylaeum of Asyrgy itself. For thenceforward to Syene—a distance of 220 miles—either bank of the Nile presents a succession of temples, either excavated in the sandstone or separate structures, of various arts and styles of architecture. Of these the most remarkable and the most thoroughly explored is that of Abuosimbol or Ipsambul, the ancient Ibechah, on the left bank, and two days' journey below the Cataract. This temple was first cleared of the inundation sand by Belzoni (Researches, vol. i. p. 316), and afterwards more completely explored, and identified with the reign of Rameses III., by Champollion and Rossellini. Primis (Jorin) is one day's journey down the stream; and below it the sandstone hills compress the river limestone for about 2 miles within a mural escarpment, so that the current now seems to force itself rather than to flow through this barrier.

(3.) The Nile below Syene. — At Syene (Assuan), 24° 5' 23' N. lat., the Nile enters Asyrgy Proper; and from this point, with occasional curves to the E. or NW., preserves generally a due northerly direction as far as its bifurcation at the apex of the Delta. Its bed presents but a slight declivity, the fall being only from 500 to 600 feet from Syene to the Mediterranean. The width of the valley, however, through which it flows varies considerably, and the geological character of its banks undergoes several changes. At a short distance below Syene begins a range of sandstone rocks, which pass into limestone below Latopolis, lat. 25° 30' N.; and this formation continues without any resumption of the sandstone, until both the Libyan and the Arabian hills diverge finally at Cercasorum. The river thus flows beneath the principal quarters out of which the great structures of the Nile valley were built, and the main road by which the blocks were conveyed to Thebes and Apollonopolis, to Saias and Bubastis, to the Great Lake, and thence in the north to the Asyrene nome, to the Pyramids and Memphis, and, finally, to the Greek and Roman architects of Alexandria and Antinopolis. Again, from Syene to Latopolis, the shores of the river are sterile and dreary, since the inundation is checked by the rock-walls E. and W. of the stream. But at Apollonopolis Magna, lat. 25°, and at Latopolis, 25° 30', the rocks leave a broader verge for the terracing deposit, and the Nile flows through richly cultivated tracts. At Thebes, for the first time, the banks expand into a broad plain, which is again closed in at the N. end by the hills of Cernw-shak. Here the river is divided by small islands, and is a mile and a quarter in breadth. It has hitherto followed the course of the direction; but at Cernw-shak it leaves the road connected with the ports of the Red Sea [Berenice], it bends to the NW., and follows this inclination for some distance. At Panopolis, however, it resumes its general N. bearing, and retains its expanse to the fork of the Delta.

Near Disopolis Parva (Howe), on the left bank, and opposite Chenoboscinum, on the right, begins the canal, or, perhaps, an ancient branch of the Nile, called the Canal of Joseph (Bohr-Jemaf). This lateral stream flows in a direction nearly parallel to the main one, through the Asyrene nome (El-Fayoom). From this point the Nile itself presents no remarkable feature until it reaches Speos-Artemidos, or the grotto of Banikaskos, where the eastern branch, running parallel to the Nile, departs from its inundation, and consequently also the cultivable land. In lat. 29° N. the Libyan banks, for a space, recede, and curving at first NW., but soon resuming a SE. direction, embrace the Asyrene nome. Lastly, a little below Memphis, and after passing the hills of Gebel-el-Mokiatma, both the eastern and western chains of rocks finally diverge, and the river expands upon the great alluvial plain of the Delta.

At Cercasorum, where the bifurcation of the river begins, or, perhaps, at a remoter period, still nearer Memphis, the Nile probably met the Mediterranean, or at least an estuary, which its annual deposits of
aline have, in the course of ages, converted into Lower Egypt. In all historical periods, however, the river has discharged itself into the sea by two main arms, forming the sides of an isosceles triangle, the boundaries of the Delta proper, and by a number of branches, some of which ran down to the sea, while others discharged themselves into the main stream through the canal arms of the main stream. The Delta is, indeed, a net-work of rivers, primary and secondary; and is further intersected by numerous canals. The primary canals were usually accompanied by the ancients seven in number (Herod. ii. 17; Soz. p. 43; Strab. xvii. p. 801, seq.; Diod. i. 33; Ptol. iv. 5. §§ 10, 11; Ammian. xxii. 16, 17; Wilkinson, M. C. C., Mod. Egypt and Thebes, &c.), and may be taken in the order following. They are denominated from some principal city seated on their banks, and are enumerated from E. to W.

1. Beginning from the E., was the Pelusian arm (see Peltusae στέμα, Strab. xvii. p. 801; Ostium Pelasianum, Plin. v. 9. s. 9). This has now become dry; and even when Strabo wrote a little before the first century B.C., Pelusium, which stood on its banks, and from which it derived its name, was nearly 24 miles from the sea (xvii. p. 806). The remains of the city are now more than four times that distance. Upon the banks of the Pelusian arm stood the city of Pelusium, near the eastern side, and near the apex of the Delta, Heliopolis, the Os of Scripture; and 20 miles lower down, Bubastis (Tel Basta).

2. The Tanitic arm (see Taurocton στέμα, or Ταυροκτόνων, Herod. ii. 17; comp. Strab. xviii. p. 803; Mela, i. 9. § 9; Catapuzynum). The present canal of the Tanitic branch: Plin. v. 9. lides. Nearly with the Tanitic branch; which, however, together with the Ostium Bucolicum, has been absorbed in the lower portion of its course by the lake Menesaleh. It derived its name from Tanis, the Zoan of Scripture, the modern Hesh, in lat. 31°, one of the oldest cities of the Delta.

3. The Mendesian arm (see Μενδεια τάφος, Strab. ii. 53) was a channel running from the Sebennytic Nile-arm. It is now lost in the lake Menesaleh.

4. The Phaenician or Pathmetic arm (see Φηνικικόν στέμα, Strab.; Φηνικίων, Diod. i. 33; Φανικομεθ, Ptol. iv. 5. §§ 10, 40; Pathmeticum, Mela, i. 9. § 9.) This was the Βουκολικόν στέμα of Herodotus (ii. 17); but it seems doubtful whether its mouth was ever a canal or a branch, and not rather a canal. It corresponds with the lower portion of the present Damasciana branch of the Nile.

5. The Sebennytic arm (see Σεβεηνησιανος στέμα) derived its name from the city of Sebennytus, the present Memphis. As far as this city the Damasciana branch represents the ancient Sebennytic; but now the mouth of the canal is lost in the marshes or sands, which separate the present Delta from the Mediterranean; and its mouth, which was nearly due N of Memphis, is now covered by the lake of Bousios. The Sebennytic arm, continuing in the direction of the Nile before its division, i.e. running nearly in a straight course from N to S, is the most western commerce, however, the Sebennytic one of the diverging branches as the main stream itself. This channel, together with the most easterly, the Pelusian, and the most westerly, the Canopic, were the three main arms of the Nile, and carried down to the sea by far the greater volume of water.

6. The Bolbitic or Bolbitine arm (see Βολβιτικόν στέμα, Strab. xvii. p. 803; Sol. p. 43; or Βολβιτικόν, Herod. ii. 17; Diodor. i. 33; Bolbitius, Ptol. iv. 5. §§ 10, 43; Bolbiticum, Mela, i. 9. § 9; Ammian. xxii. 16, 17), was, like the Phaenician, originally an artificial canal, and seems in the time of Herodotus to have been a branch or a connexion with the Nile branching from the Canopic channel (ii. 17), having, however, an outlet of its own, probably as a backwater during the inundation, to the Mediterranean. The Bolbitic arm is now represented by so much of the Rosetta branch of the Nile as runs between the sea and the ancient course of the Ostium Canopicum.

7. The Canopic arm (see Κανωπικόν στέμα, Strab. i. c.; comp. Aristot. Meteorol. i. 14; Ostium Canopicum, Mela, i. 9. § 9; Plin. v. 10. a. 11) was also termed the Nauicratian arm of the Nile, Ostium Nauicratianum (Plin. i. c.), from the city of Nauicratia, which was seated on its left bank. This was the most westerly, and one of the greatest branches of the Nile (see Pelusian, Sebennytic). In the first division of its descent from the point of the Delta the Canopic arm skirted the Libyan desert. At the city of Terenthusia (TeresΦης), a road, about 38 miles in length, through the calcareous ridge of hills, connected it with the Natron Lakes. On its right bank, below this point, stood the ancient city of Sais, and a few miles lower down, Nauicratia. From its vicinity, at first, to this city, the Canton of Aegypt, and afterwards, by means of the canal which connected it with the lake Marisot on the one hand, and Alexandria on the other, the Canopic branch retained its importance; and its embankments were the care of the government of Aegypt long after its rival branches, the Sebennytic and Pelusian, were neglected or had been suffered to flow uselessly into the marashes. It is now represented in the upper portion of its course by the branch of the Rosetta branch of the Nile. But they diverge from each other at lat. 31°, where the elder arm turned off to the W., and discharged itself into the Mediterranean near the present bay and foreland of Alexandria. Its mouth is now covered by a shallow lagoon, intersected by strips of sand and alluvial deposit, called the lake of Modich. The Canopic arm of the Nile, although not actually the western boundary of Aegypt, was, at least, in the Pharaonic era, the limit of its commerce on the NW. base of the Delta, since beyond it, until the building of Alexandria, there was no town or townlets of any note near the mouth. The canals which were derived from the Nile for the convenience of local intercourse and irrigation, were very numerous; and the prosperity of Aegypt, especially on the Arabian side of the river, depended in great measure upon their being kept in good repair, and conveying to the arid waste a sufficient supply of water. Hence the condition of the canals was almost symbolic with the good or bad administration of Aegypt; and we find that among the first cares of Augustus, after adding this kingdom to his provinces, in b.c. 24, was to repair and rehabilitate the canals, which had fallen into decay under the misrules of the latter Ptolemies. (Suet. Aug. 16; Dio. ii. 68; Aurel. Vict. Epit. i. 5.) For national commerce, however, the Canopic arm was only covered by artificial channels upon a large scale between Syene and the sea. (1.) The canal called, in different ages, the river of Potomé (Ποταμός πωτομάς), Diodor. i. 33; Plin. v. 29. a. 33), and the river of Trajan (Ποταμός πωτομάς, Ptol. iv. 5. § 54). This had been commenced by Ptolemy Necho II. (b.c. 460), was
NILUS. continued by Darius Hystaspis (a. c. 520—527), but only completed by Ptolemy Philadelphus (a. c. 274). It began in the Pelusiac branch of the Nile, a little above the city of Bubastis (Tel-Basto), and passing by the city of Thomai or Patumma, was carried by the Persians as far as the Bitter Lakes, Nub. of the delta. Here, however, it was near Addis. The work of this deposit corresponds generally to the slope of the banks and the distance from the river. In Lower Nubia and Upper Aegypt alluvial cliffs are formed to the height of 40 feet; in Middle Aegypt they sink to 30; at the point of the Delta to about fifteen. The earthy matter is deposited in a convex form; only in the case of the Lower Aegypt is the stream, smaller at the verge of the inundation. As a consequence of this fall from the banks towards the desert, the limit to which the inundation reaches is slowly extending itself; but as the Nile raises its own bed as well as its banks, their relative proportion is preserved. The deposit of the Nile is found to consist of (1) silt and sand; (2) water; (3) carbonates of lime; (4) carbonates of magnesia, besides portions of alluvia and oxides of iron. These form a compost so rich, that the land on which they are permanently deposited requires no other manures, and produces without further renovation successive harvests of corn. (Athen. ii. 41, 42; Ptolemy, ii. 52, c. 91.)

(2) The quality of its waters. — The water itself is not less important to Aegypt than the ingredients which it precipitates or holds in solution. Except some short streams in the Arabian hills, torrents at one season and dry at another, the Nile is the only river in Aegypt. Natural springs do not exist in the upper country, and the wells of the Delta afford only a sweet and brackish water. The stream, accordingly the single resource of the inhabitants; and the frequent abatements enjoined by their religion rendered a copious supply of water more than ordinarily important to them. Between its highest and lowest periods, the water of the Nile is clear. When lowest, it is feculent (Athen. ii. 42); and at the lowest time the inundation is covered with Spanish vegetable matter, that is said to cause eruptive disease. But even when most turbid, it is not unwholesome, and is always capable of filtration. The water in its medium state was pure and delicious to the taste. The Persian kings, after the conquest of Aegypt, imported it for their own drink, and it is said that when the emperor Pescennius Niger replied to his soldiers' demand for wine, "Have you not the water of the Nile." (Spartian, ap. August. Hist. Scriput. Pescenn. Niger. c. 7.) These changes in the hue and quality of the water were ascribed to the overflowing of the Nubian lakes, or to the passage of the stream over various strata of rock until the channel of the White and Blue Rivers have been explored to their sources, we must be content to remain ignorant of the real causes of these phenomena.

(3) Its periodical inundations. — The causes of the inundation early attracted the curiosity of ancient observers; and various theories were devised to account for them. It was believed to arise from the melting of the snow on the Caucasian mountains (Schol. ad Apoll. Rhod. iv. 869; Eurip. Helen. init.); and Herodotus rejects this supposition, because, as he conceived, although erroneously, that snow was unknown in Aethiopia (ii. 23). It was ascribed to the Eteocan winds, which, blowing from the N. in summer, force back the waters
from the mouth of the river upon the plain of the Delta. (Diodor. i. 38—40.) This, however, though partially true, will not account for the inundation of Upper Aegypt, or for the periodical rising of the Nile, N. of the Delta. The cultivation of the water Gates to the confluence of the Nile with the great Southern Ocean, whose waters, from long exposure to the sun, were deprived, was thought of their saline ingredients in their course through the Nile-valley. (Diodor. i. 40.) By Euporbones (ed. Marz. p. 28) it was derived from exhalation through the sands; while Herodotus (de i. 44) supposes that the sun in winter reduced the waters of Southern Libya to the lowest ebb. But this hypothesis kept out of sight their overflow in summer. Agatharchides of Cnidia, who wrote in the second century B.C., was the first to divine the true cause of the inundation. The rains which fell in May upon Aethiopia occasion the rise of the river that flows northward from it. As the sun in his progress from the equator to the tropic of Cancer becomes successively vertical over points N. of the equator, the air is heated and rarified, and the cold currents set in from the Mediterranean to restore the equilibrium. They pass over the heated plains of Aegypt; but as soon as they reach the lofty mountains of Africa, they encounter the descending air from the rain. Shortest water fall unexpectedly from their northern slope upon the grand tableland, from the grand tableland upon the plains which contain the sources of the White and Blue Rivers, and through their channels and confluentes pass into the Nile. In the last days of June, or at the beginning of July, the river is visible in Aegypt; about the middle of August, the swallows are seen circling over the town on the opposite bank. The river for ages has been navigable, and even in the Delta its waters are nearly stagnant. In the time of Hierocles (i. 13) the height of a good Nile was 15 or 16 cubits; and about the statue of the Nile, which was raised by Vespasian brought from Aegypt and set up in the Temple of Peace, were gathered six thousand diminutive figures emblematic of these measures. (Pline. xxxvi. 10.) The Nile was, as Herodotus carelessly noted on the Nilo-navigators at Prima (Thorius), Elephanta, and Memphis; and the progress or decline of the inundation was reported by letters to different parts of Aegypt, in order that the farmers might calculate on the time when sowing might commence. A flood of the height of 30 feet is rainless,—undermining houses, sweeping away cattle, and destroying the produce of the fields. Under this hand, also, is rendered too spunky for the ensuing seed-time; the labours of tillage are delayed; and epidemic diseases arise from the lingering and stagnant waters. On the other hand, if the waters do not rise 24 feet, the harvest is scanty; and if they are below 18, terrible famines are the consequence, such as that of which Diodorus speaks (i. 8). These facts are more recent times (Voyage, Voyages en Syrie et en Egypte, vol. i. ch. 11; Abdalalath's Hist. of Egypt, p. 197; White's edit.), during which the starving population have been driven to feed on human flesh.

Upper and Middle Egypt during the inundation present the appearance of a vast inland lake, bounded by mountains. But the usual means of intercourse are not interrupted, since the immediate banks of the river are seldom under water, which is discharged through the frequent apertures of the dykes, at first upon the verge of the desert, and afterwards upon the land nearer the flood. The Delta, however, being long deprived of hills, lies comparatively flat and is highly cultivated, totally under water, and the only means of communication between the towns and villages are boats and rafts. Herodotus (ii. 97) compares the appearance of Lower Aegypt at this season to the Aegean sea, studded by the Spoeras and Cycloades.

As the direct highway between the Mediterranean and Memphite Nile, a voyage by land during the prosperous ages of Aegypt, presented a busy and animated spectacle. The Egyptians, who ashamed the sea as the element of the destroy- ing Typhon, regarded their river with affection and reverence, as the gift and emblem of the creating and preserving Osiris. Its broad and spacious bosom was taken during the season of the flood, with river-craft, from the raft of reeds to the stately Baris or Nile barges. Up the Nile to the markets of Diospolis passed the grain and fruits of the Delta; and down the stream came the quarried limestones of the Thebaid to the quays of Saos and Canopus. No bridge spanned the river during its course of 1500 miles and the ferrying from bank to bank was incessant. The fishermen and fisherwomen of the Nile diversified the scene. Respecting the qualities of the fish there is considerable discrepancy among ancient writers — some describing it as coarse or insipid, others as highly nutritious and delicate in its flavour. (Athana. vii. p. 312.) Fifty-two species of fish are said to be found in the Nile. (Bunsen, Reise, vol. i. p. 300.) Of these the genus Silurus was the most abundant. Fish diet is well suited to the languid appetites of a hot climate; and the Israelites, when wandering in the desert, regretted the fish as well as the vegetables of Aegypt. (Numaev. xl. 5.) They were caught in greatest abundance in the lakes and pools in their boats or among the waves. In the marshy districts of the Delta, whar grain, owing to the spongy and bilious character of the soil, could not be raised, the inhabitants lived principally upon fish dried in the sun; and, in later times at least, they were salted, and exported in great quantities to the markets of Greece and Syria. The mode of dressing these fish, which is shown in the paintings, and were the line, the net, and the prog. (See Abdallatiph, op. Rossellini, M. C. vol. i. p. 230.) The great extent of marsh land in Aegypt, and the long continuance of the inundation, caused it beyond all other countries to abound in water-fowl. The fowlers are represented in the paintings as spreading nets, or as rowing in their boats along the aquatic plants, in which the birds nested, and knocking them down with sticks. The use of decoy-birds was not unknown; and smoked or salted wild-fowl were an article of export. The edible water-fowl are mostly of the geese and duck (anatæ) tribe; the quall also is mentioned by Herodotus (ii. 77) as among the species that were dried in the sun and slightly salted for home consumption and export.

The Fauna of the Nile were the hippopotamus and the crocodile, with many lesser species of the saurian genus. In the more remote ages both were found through the whole course of the river (Diodor. i. 38), although at present the hippopota- mus rarely descends below the second cataract, or the crocodile below 27° N. lat. The chase of the
The Nile, as represented on the monuments, exhibits a great variety of size and form. There were the canoe, made of one or more large papyrus reeds, plaited close together, the shallop of papyrus, rendered water-tight by bitumen; and there were even vessels constructed of light earthware. (Juvén. Sat. xv. 129.)

The boats of the Nile, as represented on the monuments, exhibit a great variety of size and form. There were the canoe, made of one or more large papyrus reeds, plaited close together, the shallop of papyrus, rendered water-tight by bitumen; and there were even vessels constructed of light earthware. (Juvén. Sat. xv. 129.)

The Nile was also frequently the stage on which the great religious festivals or paeangyrias were celebrated. As such solemnities the population of entire nomes poured themselves forth. On the day of the feast at Antinoe, the principal deity of the town, the statue of the goddess was carried in procession to the main stream, while thousands descended from the middle country and the Thebaid to be present at the ceremonies. The decks of the Baris were crowded with devotees of either sex, and the loud music of the pipes and cymbals was accompanied by songs and hymns, and clapping of hands. At the Nile—"as Oceanus, or the watery element—along shore and recruited their numbers with fresh votaries. As many as 700,000 persons, exclusive of children, were sometimes assembled at Bubastis, or at the equally popular festival of Isis at Bubastis. Numerous sacrifices were offered in the temples of the goddesses, and, whether in litanies or in religious, more than any member of the second Ogodon, or the visible objects of adoration. (Heliod. Ath. Kaip. ix. 9; Schol. ad Pind. Pyth. iv. 99.) It had its own hieratic emblem on the monuments, sometimes as the ocean embracing the earth, sometimes, as in the temple of Osiris at Philae, as the assistant of Ptolemy in the creation of Osiris. The wild crocodile was an emblem of Osiris (Plin. Ep. 131), but the tamed crocodile was the symbol of the gently swelling, beneficent Nile. (Euseb. Praep. Evang. iii. 11.) Osiris is sometimes, but incorrectly, said (Tibull. Eleg. i. 7, 27) to be the Nile itself (Plut. Is. et Osir. c. 33): there is no doubt, however, that it was personified and received divine honours. A festival called Nile was celebrated at the time of the first rise of the waters, i.e. about the summer solstice, at which the priests were accustomed to drop pieces of coin, and the Roman prefect of the Thebaid golden ornaments, into the river near Philæ (Seneque. Nat. Quaest. iv. 3, 7); indeed there must have been a priesthood specially dedicated to the health of the river, since, according to Herodotus (II. 101), none but a priest of the Nile could bury the corpse of a person drowned in its waters. Temples were rarely appropriated to the Nile alone; yet Hecataeus (op. Steph. e. e. Nsos) speaks of one, in the town of Neisis, which stood in the Heracleopolite nome, near the entrance of the Fucous. In the quarries at Sallinia several stelae are inscribed with acts of adoration to the river, who is joined with Pure and Pthah. Its symbol in hieroglyphics is read Mous, and is the last in the group of the characters composing it, is a symbol of water. According
to Lucian, indeed (Jupiter Tragedy, § 42), the Egyptians sacrificed to the element of water, not locally, but universally. Pictorially, the Nile was represented under a round and plump figure, of a blue colour, and sometimes with female breasts, indica-
ing the characteristic feminine sound of the name. On the base of the throne of Amenophis-Memon, at Thebes, two figures represent the Nile, similar in all other respects, except that one is crowned with lotus to denote the upper courses of the river, the other with papyrus to designate the lower. NINUS. [Asyriam.

NINIVE. [Nluru.]

NINNITACL. [Minatcum.]}

NINUS (C. Novor or Niver, Herod. i. 193, ii. 150; Ptol. vi. 1, § 3; Nirur or Nivur, Ptol. vii. 21.
§ 3; Nyrus, Joseph. Ant. Jud. ix. 10, § 2; Ninus, Tacit. Ann. xiii. 13; Ninive, Amm. Mar. xvii. 7, xvi. 21, 22, Nyrus, s. u. s.), a great city, and for many centuries the capital of ancient Assy-
ria. It will be convenient to notice here such ac-
ccounts as we have from the Bible and ancient his-
torians, and then to state succinctly the curious results of the recent discoveries of Mr. Layard, Colonel Rawlinson, and other modern travellers.

In the Old Testament it is stated to have been among the eight principal cities in Genesis (x.11), and is there stated to have been founded either by Ninrom himself, or, according to another reading, by his lieutenant, Assur, the Asoruphas of Joseph. Ant. Jud. i. 6, § 4, and the Eponyms of Assyria. The latter view is the most agreeable to the construction of the word, which signifies “founder” and may mean the founder of it in Holy Scripture for more than a thousand
years; and when it is noticed again, on Jonah being
sent thither to preach repentance, it is described as a “city of three days’ journey” (Jonah, iii. 3), and as “that great city wherein are six score thousand persons, that cannot discern between their right hand and their left hand.” (Joseph, iv. 11.) Sub-
sequently to this time, it is not referred to by name, except in 2 Kings, xix. 37, and Isaiah, xxxvi. 37, as the residence of Semachib, after his return from the invasion of Judea; in the prophets Nahum and Zephaniah, who predict its speedy downfall; and in the apocryphal books of Tobit and Judith, the former of whom lived in it seven years. When it is mentioned in the New Testament (a dialectical change of name for Assyria), beyond the Lycan (or Great Zeb) with reference to Arbela (xvi. p. 737). Pisky places it on the east bank of the Tigris “ad solis occasum spectans” (vi. 13, a. 16); Ptolemy, along the Tigris, but without accurate definition of its position (vi. 1.
§ 3). The same may be said of the notices in Tacit.
urum, ii. 13; and Strabo, who call it a vast city of Asiaeana. On the other hand, Dio-
dorus, professing to copy Ctesias, places it on the Euphrates (ii. 3, § 7), which is the more remarkable, as a fragment of Nicolaus Damascenus, who has preserved a portion of Ctesias, is still extant, in which Ninveh occupies its correct position on the Tigris. (Prog. Hist. Graec. vol. iii. p. 356, ed.

Muller.) It may be remarked that in much later times the name appears to have been applied to more
than one town. Thus Ammianus in one passage seems to think that Hierapolis was the “vetus Ninua” (xiv. 5). Ptolomaeus (Vit. Apoll. Tym. i. 19) speaks of a Ninua, and the Euphra-
tes; and Enckebus, in his Chronicle, asserts, that in his time it was called Naibis. No doubt much of the obscurity in the minds of ancient writers, both as to its position and the real history of the empire of which it was the capital, arises from the circum-
stances that its entire overthrow preceded the ear-
est of the Greek historians by nearly 300 years, and that it does not appear to have been rebuilt at any period of the classical ages. So complete was its destruction, that, though Xenophon marched within a few miles of it, he was not aware of its ex-
tistence, though, in his allusion to the “Median city of Mesπa,” he doubtless is describing one of the
great outworks of the Assyrian capital (Aesch. iii. 4, § 10); while, with the help of Arrian, nearly all the historians of the campaigns of Alexander, who, like Xenophon, must have passed it on his way to
fight the battle of Arbela, allude to it. That the ancients generally believed in its entire destruction, is clear from the accounts; classes it with Messene, Thebes, and other ruined cities (viii. 33, § 2); and from Lucian, who says of it that it was “founded by the kings of Egypt” (xvi. p. 737). The last, indeed, has an argument that Homer, who mentions Thebes in Egypt, and the wealth of Phoenicia, could not have omitted Babylon, Niniveh, and Ecbatana, had he ever heard of them (xv. p. 735). But though so early a ruin, the ancients generally had a correct idea of the
mass of the city, and this is occasionally recovered from scattered through the classical writers, giving a manifest proof of this belief of the people. Thus Strabo himself, as we have seen, considered Niniveh greater than Babylon (xvi. p. 737); while Diodorus has a long and exaggerated narrative of the vast extent of Ninua’s capital (which, as we stated be-
fore, he places incorrectly on the Euphrates, i. p. 7). Some curious incidental facts are preserved.
Thus, the vast mound Semiramis erected as a tomb for her husband Ninua, by the river-side, is almost certainly the Pyramid at Niniveh, though the re-
sults of Mr. Layard’s last excavations have not proved that this structure was a tomb. (Diod. ii. 7; comp. with Layard, Niniveh and Babylon, ii. 163.) Again, Amyntas (as quoted by Athenaeus) states, that at the town of Ninua was a high mound, which was thrown down by Cyrus when he attacked the city, that this was traditionally the tomb of Sardas-
nepalpus, and had a stile on it inscribed with Chal-
dian (i.e. Assyrian) letters. (Amynt. Fragm. p. 136, ed. Muller; cf. also Polyb. vii. 32.) Nor must we omit the presence of what has been held by all numismatists to be a traditional representation of this celebrated tomb on the Tetradrachms of Antio-
chus VIII, king of Syria, which were struck at Tarsus, and on the imperial coins of Antiochus (both places connected with the name of Sardas-
nepalpus). Again we have the legend of Astyages, that the Assyrians used to make resistance to the Trojans against the Greeks (ii. 23; cf. Plat. Leg. p. 296, ed. Bakker), — the “basta Nini” of Ovid (Me-
tem. iv. 88), though referred by him wrongly to Babylon,—and the occurrence, in several of the poets, of the name of Assarace (now known through the
Colonel Rawlinson’s interpretation) to be the geographical form of the genuine Assyrian Assarac, the ‘Asarac
or 'Esdapx of the LXX., Rawlinson, As. Journ. 1850), as in Ηεδο, xx. 252; Post. Hebr. iii. 140; Virg. Aen. v. 137; Juven. Sat. x. 259, &c. It is therefore, perhaps, less remarkable, that though Nis\nriver had long since disappeared, because he or she is thought to have been associated with any importance, the tradition of its former existence should remain in its own country till a comparatively recent period. Thus, Ibn Athir (quoting from Salakhir, in the annals of those years) speaks of the forts of Nis\nthe east, and of Mosul to the west, of the Tigris, in the campaigns of Abd-allah Ibn Mou\netermer, A. H. 16 (A. D. 687), and of Othleh Ibn Farakat, A. H. 20 (A. D. 641). (Rawlinson, As. Journ. 1850.) Again, Benjamin of Tudela, in the twelfth century, speaks of it as opposite to Mosul (Casals, ib. p. 31). In Abraham ben \nleaves in the Mish. Dinym. (pp. 404, 441) under the name of Nisn (cf. also his Chronicle, p. 464).
Lastly, Assennari, in his account of the mission of Salakhir, the patriarch of the Chaldeans, to Rome, in A. D. 1555, when describing Mosul, says of it, "a qua ex altera ripa parte ad Nisnbe mille \npress in the metropolis of Mosul, and subsequently under the bishop of Assyria and Adiabene (Bibl. Orient. vol. ii. p. 459, vol. iii. pp. 104, 369, 344, &c.).

We have already noticed under Assyria the chief points recorded in the Bible and in the classical historians relative to the history of Nineveh, and have stated that it is impossible entirely to reconcile the various conflicting statements of ancient authors. It only remains to mention here, as briefly as possible, the general results of the remarkable discoveries which, within the last few years, have thrown a flood of light upon this most obscure chapter of Assyrian history, and have, at the same time, afforded the most complete and satisfactory confirmation of those notices of Assyrian history which have been preserved in the Bible. The names of all the Assyrian kings mentioned in the Bible, with the exception, perhaps, of Shalmaneser, who, however, occurs under his name in Isaiah, Sargon, are now clearly read upon the Assyrian records, besides a great many others whose titles have not as yet been identified with those in the lists preserved by the Greek and Roman chronicists.

III. It is well known that in the neighborhood of Mosul, who were, however, occurs under his name in Isaiah, Sargon, are now clearly read upon the Assyrian records, besides a great many others whose titles have not as yet been identified with those in the lists preserved by the Greek and Roman chronicists.

In 1845, Mr. Layard began to dig into the still greater mound of Nisrud, about 17 miles E. of Mosul; and was soon rewarded by the extensive and valuable collection now in the British Mu\nriver had long since disappeared, because he or she is thought to have been associated with any importance, the tradition of its former existence should remain in its own country till a comparatively recent period. Thus, Ibn Athir (quoting from Salakhir, in the annals of those years) speaks of the forts of Nis\nthe east, and of Mosul to the west, of the Tigris, in the campaigns of Abd-allah Ibn Mou\netermer, A. H. 16 (A. D. 687), and of Othleh Ibn Farakat, A. H. 20 (A. D. 641). (Rawlinson, As. Journ. 1850.) Again, Benjamin of Tudela, in the twelfth century, speaks of it as opposite to Mosul (Casals, ib. p. 31). In Abraham \nleaves in the Mish. Dinym. (pp. 404, 441) under the name of Nisn (cf. also his Chronicle, p. 464).
Lastly, Assennari, in his account of the mission of Salakhir, the patriarch of the Chaldeans, to Rome, in A. fairly presumed to have been, in an especial sense, the city of Nineveh) comprehends about 1800 English acres, and is in form an irregular trapezium, about 7½ miles round. The two mounds occupy respectively 100, and 40 acres of this space, and were doubtless the palaces and citadels of the place. Capt. Jones calculates that, allowing 50 square yards to each inhabitant, the population may have amounted to about 174,000 souls.

From an elaborate examination of the inscriptions preserved on slabs, on cylinders, and on tablets, Colonel Rawlinson has arrived at the following general conclusions and identifications in the history of the Babylonian and Assyrian empires.

He considers that the historical dates preserved by Baruch, and substantiated by Callisthenes (who sent to Aristotle the astronomical observations he had found at Babylon, extending as far back as 1903 years before the time of Alexander, i. e. to B.C. 2533), are, in the main, correct; and hence that about twenty-three centuries B.C. elapsed before the twenty-third century B.C. The Chaldaean monarchy, which followed was established in B.C. 1763, and continued to B.C. 1518; and to this interval of 455 years we must assign the building of all the great cities of Babylonia, in the ruins of which we now find bricks stamped with the names of the Chaldaean founders. About this time about twenty monarchs have been recovered from the bricks found at Sippar, Niffer, Warka, Sin-karris, and Nineveh (Ur), belonging to the one genuine Chaldaean dynasty of Baruch, which reigned from B.C. 1763-1518. Among the Scriptural or historical names in this series, may be noticed those of Amurru-azzur, Arich, Deles, and Hormuz, and the time when the Pharaohs of the First Dynasty of Egypt, which it is known, were contemporaneous with the Babylonian empire.

The Assyrian empire of the second, third, and fourth centuries before Christ, is the subject hereafter to be treated of; the whole period of the nine thousand years extending from the close of the Chaldaean dynasty to the end of the Persian monarchy being more than adequately occupied by other subjects.

Ninus. 439

NIPHA'TES. 429

been the actual taker of Nineveh. From this period the names on the Assyrian inscriptions are coincident with those in the Bible, though, naturally, many additional particulars are noticed on them, which are not recorded in Sacred History. Some of the individual facts the inscriptions describe are worthy of notice; thus, the campaigns with the kings of Babylonia (Hoabs) and with a son of Resin, king of Syria, are mentioned in those published by the British Museum (pp. 66-73); the names of Jeshu and of Hassel have been read (independently) by Colonel Rawlinson and Dr. Hincks on the black obelisk from Ninevah, the date of which, therefore, must be early in the ninth century B.C.; and the last scholar has detected in other monuments the names of Masehen and Masseh, kings respectively of Israel and Judah. Lastly, the same students have discovered in the Annals of Sennacherib (which are preserved partly on slabs and partly on cylinders) an account of the celebrated campaign against Hanishah (described in 2 Kings xvii. 5), in which the inscriptions state that he took from the Jewish king "30 talents of gold," the precise amount mentioned in Scripture, besides much other treasure and spoil.

There is still considerable doubt as to the exact year of the final destruction of Nineveh, and as to the name of the monarch then on the throne. From the narratives in the Targums, Talmud, and the Assyro-Babylonian inscriptions, it can be allowed to have any historical value, combined with a prophecy in Jeremiah written in the first year of the Jewish captivity, B.C. 605 (Jerem. xxvi. 18-26), it might be inferred that Ninevah was still standing in B.C. 609, but had fallen in B.C. 605. Colonel Rawlinson, however, now thinks (and his view is confirmed by the opinion of many of the elder chronologists) that it was overthrown in the month of Nisan, and that the Assyrian sovereignty being from that time merged in the empire of Babylon, and the Canon of Ptolemy giving the exact dates of the various succeeding Babylonian kings down to its capture by Cyrus in B.C. 536, in conformity with what we now know from the inscriptions. We may add, in conclusion, that among the seven routes of the Assyrian, that of Rawlinson is the undisputed identification of the name of Belshazzar as the son of Nabonidus, the last king of Babylon; and the finding of the names of the Greek kings Selenus and Anichos written in the cuneiform character on tablets procured by Mr. Lobius from Warka. (Rawlinson, 2d Journ. 1850, pp. 152, 155, 1855, 1277, 1858; Hincks, Roy. Soc. of Liter. vol. iv.; Trau, Ray. Irish Acad. 1850, 1855, 1855; Layard, Nineveh and Babylon, and, for an entirely new view of the Assyrian chronology, Bauqquet, Sacred and Profane Chronology, Lond. 1853.)

NINUS river. [DARDALA.]

NIPHA'TES (Egypt.) Strab. xi. pp. 592, 523, 527, 592; Ptol. v. 13. § 4, vi. 1. § 1; Mela, i. 15. § 2; Plin. v. 27; Amm. Marc. xxii. § 6. § 15; Virg. Georg. iii. 30; Horat. Carm. ii. 9. 20; the last Roman poet, by a curious mistake, made Niphates a river; comp. Lucan, iii. 345; Sil. Ital. xiii. 775; Juven. vi. 409, the "snowy range" of Armenia, called by the native writers Nebud or Nabudogos. St. Martin, Histoire de l'Egypte, 1832, 2°. 2; 119 Tauris, stretching E. of Commagene (Abis Teis) separates Sophene (Kharpuz Dourouz), which is contained between Taurus and Anti-Taurus (Strab. xi. p. 581), from Osroene (Uefak), and then divides itself into three portions. The most northerly, and highest, are the Niphates (Ais Kivr) in Acicenes.
NISA.

The structure of this elevated chain, consisting of the lofty groups of Sir Serak, the peaked glacier of Mut Khân, the Ali Tağh, Sapda, Nisârid, and Darâsh, Tağh, which are probably the highest range of Taurus, rising above the line of perpetual snow (10,000 feet?), remains yet undetermined. Limestone and gypsum prevail, with basalt and other volcanic rocks. Deep valleys separate the parallel ridges, which in some instances pass from the N. to the S. sides. (Ainsworth, Assyria, Babylonia, and Chaldaea, p. 18; Chenevix, Expul. Euphrat. vol. i. p. 69; Bitter, Erdkunde, vol. x. p. 911.)

NISA. [ISUR.]
NISA. [NIRA.]
NISABA. [NISHABA.]
NISABA. [NISABA.]
NISAE. [NISABA.]
NISAEI CAMPI, plains of considerable extent in the mountain district of Media, which were famous for the production of a celebrated breed of horses. According to Strabo, they were on the road of those who travelled from Persia and Babylon in the direction of the Caspian Gates (xi. p. 529), and fed 500 horses on the plain of the same name. A sanctum, or holy place, the same geographer states that the Nissainian horses were reared in the plains of Armenia (xi. p. 530), from which we infer that the plains themselves extended from Armenia southward through Media. Again, in the Epitome of Strabo (iii. p. 536, ed. Kramer), the Nissain plain is stated to be near the Caspian Gates, which lead into Parthia. The fact is, the district was not accurately defined. Herodotus states that the place, from which the best white horses (which were reserved for the use of the king) came, was a great plain in Media (vii. 40). And the same view is taken by Eustathius in his Commentary on Dionysius (v. 1017), and confirmed by the notice in Arrian's account of Alexander's march (vii. 15). Ammianus, on the other hand, states that the Nissain horses were reared in the plains S. of M. Coronus (now Demascend). It appears to have been the custom on the most solemn occasions to sacrifice these horses to the sun (Philost. Vit. Apoll. i. 20); and it may be inferred from Herodotus that they were also used to draw the chariots of the Sun (vii. 40). (Cf. also Steph. B. s. v.; Synes. Epist. 40; Themist. Orat. v. p. 72; Heliodor. Aethiop. ix. p. 437; Suid. s. v. Nisos.)

Colonel Rawlinson has examined the whole of this geographical question, which is much perplexed by the ignorance of the ancient writers, with his usual ability; and has concluded that the statements of Strabo are, on the whole, the most trustworthy, while they are, in a great degree, borne out by the existing character of the country. He states that in the rich and extensive plains of Allah khor and Khoshâk he recognizes the Nissain plains, which were visited by Alexander on his way from Baghistan to Susa and Babylon. He further states that the Nissain horses came originally from the Nissae of Khordasua, which is still famous for its Turkaman horses. Colonel Rawlinson further believes that Herodotus, who was imperfectly acquainted with Median geography, transferred the name Nisae from Khordasua to Media, and hence was the cause of much of the confusion which has arisen. Strabo, on the other hand, describes correctly the great horse pastures as extending along the whole line of Media, from the road which led from Babylon to the Caspian Gates to that conducting from Babylon into Persia. The whole of this long district, under the names of Khodasua, Allahkhor, Hurka, Sîlahkhor, Barâbâr, Jâpešk, and Forikân, is still famous for its excellent grazing and abundance of horses. Colonel Rawlinson, indeed, thinks that Strabo's epithet, iswâdâvâs, is a translation of Sîlahkhor, which means "a full manger." It was from this plain that Python brought his supply of beasts of burden to the camp of the Persians, which was then at the entrance of the peninsula of the Greeks across the mountains of the Cossaeans. (Rawlinson, Royal Geog. Journ. vol. ix. p. 100.)

NISIBIS (Nisibis). 1. A small place in Ariana, mentioned by Ptolemy (v. 18. § 11) and Ammianus (xxii. 6). It would appear to have been at the court of the Persian Parthians, and there are some grounds for supposing it the same place as the Nil of Laidorus [Nil], and that the latter has undergone a contraction similar to that of Bitâbâz into Bis.

2. The chief city of Mygdonia, a small district in the NE. end of Mesopotamia, about 300 miles S. of Tigranocerta; it was situated in a very rich and fruitful country, and was long the centre of a very extensive trade. It was the scene of a battle between the Parthians for the merchandise of the E. and W. It was situated on the small stream Mygdonius (Julian, Orat. i. p. 87; Justin. Excerpt. e. Legat. p. 173), and was distant about two days' journey from the Tigria. (Procop. Bell. Pers. i. 11.) It was a town of such great antiquity as to have been thought by some to have been the scene of the reception of the fragments of the Theban statues by some of the Seleucid princes. (Strab. xvi. p. 747; Plut. Lucull. c. 38; Plin. vi. 13. a. 16.) It is first mentioned in history (under its name of Antiocheia) in the march of Antiochus against the satrap Molon (Polyb. v. 51); in the later wars between the Romans and Parthians it was constantly taken and retaken. Thus it was taken by the Parthians under the brother of Artabazus after a long siege, which lasted the whole summer (Dion Cass. xxxv. 6, 7), but, according to Plutarch, towards the close of the autumn, without much resistance from the enemy. (Plut. i. c.) Again it was taken by the Romans under Trajan, and was the cause of the title of "Parthicus," which the senate decreed to that emperor. (Dion Cass. lxvi. 25.) Subsequently to this it appears to have been besieged by the Ctesiphon and other tribes who had revolted, but who were subdued by the arms of Sept. Severus. Nisibis became on this occasion the head-quarters of Severus. (Dion Cass. lxxii. 2, 3.) From this period it appears to have remained in the possession of the Romans, although the Nissaians had the upper hand against the East, till it was surrendered by the Persians on the treaty which was made with that people by Jovian, after the death of Julian. (Zosim. iii. 33; Amm. Marc. xxi. 9.) Its present name is Nisibis, in the neighbourhood of which are still extensive ruins of the ancient city. (Niebuhr, vol. ii. 259.)

NISYRUS (Nisyrus), a rocky island opposite to Cnidus, between Coss in the north and Telos in the south, about 124 Roman miles distant from Cape Triopion in Caria. (Plin. v. 66; Strab. xiv. p. 656.)
NITAZI (It. Ant. p. 144), NITAZO (Geogr. Rav. ii. 17; Tab. Peut.), or Nitalis (It. Hieros. p. 576), a town in Cappadocia, on the road between Moesicus and Archelaus, but its site is uncertain. [L. S.]

NITIBRIO is mentioned by the old Greeks among the people of Aegyptus. In Pliny (iv. 19) the name Antroboges occurs: "rusurus Narbonenses provinciae contermini Ruteni, Cadurci, Antroboges, Tarneque amne discreti a Tolosanis Petcorii." There is no doubt that Antroboges is an error, and that the true reading is Nitobriges or Nitobriges. The termination briges appears to be the same as that of the Nitobriges. The chief town of the Nitobriges, Aginnum (Agmon), is mentioned by Polemy (ii. 7. § 4), who places them next to the Petcorii on one side, and to the Vassuti on the other. Strabo enumerates them between the Cadurci and the Petcorii (Strab. iv. p. 190): "the Petcorii, and next to them the Nitobriges, and Cadurci, and the Bituriges, who are named Cabi." The extent of the territory is determined by these facts and by the site of Aginnum, to be on the Garonne, west of the Cadurci and south of the Petcorii. D'Anville makes their territory extend beyond the then limits of the diocese of Agum, and into the diocese of Condus.

When Caesar (B. G. vii. 48) surprised the Galli in their encampment on the bank of the Rhone, he met with the platean of Gergovia, Teutates king of the Nitobriges narrowly escaped being made prisoner. The element Test in this king's name is the name of a Gallic deity, whom some authorities suppose to be the Gallic Mercurius (Lactant. Dei falsa Relig. l. 21); and the Schol. on Lucrius, i. 445, ed. Ouden. Others, at a later period, it is the same element as Test in the Teutonic language, and as Dís, from whom the Galli pretended to spring (Pelloutier, Hist. des Celtes, Liv. i. c. 14). The Nitobriges sent 5000 men to the relief of Alesia when it was blockaded by Caesar (B. G. vii. 75). [G. L.]

NITRA (Nitra), a place which Polemy calls an Esquio in the province of Illyricum, in the south of Greece, in the province of Lycia, and in all probability, as is usual in the same name, and in the neighbourhood of which hot vapours are constantly issuing from a chasm in the rock.

As regards the history of Nitra, it is saidoriginally inhabited by Carians, until Themis, a son of Hæneas, occupied the island with his Doriani, who were governed by the kings of Cos. (Diod. v. 54; Hom. II. ii. 676.) It is possible that after Agamemnon's return from Troy, Argives settled on the island, as they did in Calymmus, which would account for the name of Argos occurring in both islands; Herodotus (vii. 199), moreover, calls the inhabitants of Nitra Epidaeonarians. Subsequently the island lost most of its inhabitants during repeated earthquakes, but the population was restored by inhabitants from Cos and Rhodes settling in it. During the Persian War, Nitra, together with Cos and Calymmus, was governed by queen Artemisia (Herod. L. 7). In the time of the Peloponnesian War it be-longed to the tributary allies of Athens, to which it had to pay 100 drachmas every month; subsequently it joined the victorious Lacedaemonians; but after the victory of Cnidus, c. 394, Conon induced it to revolt from Sparta. (Diod. xiv. 84.) At a later period it was for a time probably governed by the Polymes of Egypt. Throughout the historical period the name of Nitia is spelt Doria; a fact which is attested by the inscriptions found in the island, all of which are composed in the Doric dialect. An excellent account of Nitra, which still bears its ancient name Nito topos or Nito, is found in L. Rous, Reisen auf den Griech. Inseln, vol. ii. pp. 67-81. [L. S.]

NITRYUS, a town in the island of Carpathynus.
the bleachers and glazemakers of Aegypt. Parallel with the Naxos Lakes, and separated from them by a narrow ridge, is the Bahr-el-Ma, or Waterless River, which runs from the Araba to other hollows which have the appearance of having once been channels for water. It has been surmised that the lake Moeris (Bahr-el-Keroum) may have been connected with the Mediterranean at some remote period by this outlet. The Bahr-el-Ma contains squashed wood. (Wilkinson, Mod. Egyp and Thebes, vol. ii. p. 28.)

The valley in which the Naxos Lakes are contained, was denominated the Nitria nome (νησοί Νετρίας of Νεφράντιας, Strab. xvii. p. 803; Steph. B. s. v. Nerpaion). It was, according to Strabo, a principal seat of the worship of Serapis, and the only nome of Aegypt in which sheep were sacrificed. (Comp. Macrobi. Satir. i. 7.) The Serapeum worship, indeed, seems to have prevailed on the western side of the Nile long before the Sinoopic deity of that name (Zeus Sinopeus) was introduced from Pontus by Ptolemys Soter, since there was a very ancient temple dedicated to him at Rhabodis, the site of Alexandria (Tab. Eryth. iv. 83), and another still more celebrated outside the walls of Hermopolis. The sanctuaries of the Nitria nome were notorious for their rigorous asceticism. They were many of them strong-built and well-guarded strongholds, and offered a successful resistance to the recruiting sergeants of Valens, when they attempted to enforce the imperial script (Cod. Theodosii. xii. tit. 1. lex. 63), which decreed that monastic vows should be voided from serving as soldiers. (Photius, p. 81, ed. Bakker; Dionys. Perieges. v. 255; Exstath. ad loc; Pausan. i. 18; Strab. xvii. p. 807; Clem. Alex. Strom. i. p. 43.)

NIVARIA INS. [FORTUNATEINS INS. Vol. I. P. 2106, b.]

NOAE (Noda, Steph. B.; Erd. Nodos, Nosan; Noova), a city of Sicily, the name of which is not mentioned in history, but is found in Stephanus of Byzantium (s. e.), who cites it from Apolloveros, and in Pliny, who enumerates the Nosae among the communities of the interior of Sicily (Plllin. iii. 8. s. a. 14.). It is uncertain from what reason, or circumstance, the resemblance of name renders it probable that it is presented by the modern village of Noova, on the N. slope of the Pentanian mountains, about 10 miles from the sea and 13 from Tyndaris. (Clover. Sicil. p. 333.)

NOUANUS (Noumes), a river of Pannonia, into which, according to Strabo (vii. 1814), the Dravus emptied itself in the district of Scythise, which thence flowed into the Danube, after having received the waters of another tributary called the Colapis. (Comp. Steph. B., Strab. p. 357, 552.)

NOECA (Noyca), a small city of the Astures, in Hispanic Tarracoensis. It was seated on the coast, not far from the river Melus, and from an estuary which formed the boundary between the Astures and the Cantabri, in the neighborhood of the present Ojo. Hence Ptolemy (ii. 6. § 6), who gives it the additional name of Uecia (Naecosewres), places it in the territory of the Cantabri. (Strab. iii. p. 167; Mela, i. 1; Plin. iv. 30. a. 54.)

NOLLA, a town of the Capitoi in Hispanic Tarracoensis, first mentioned by Ptolemy, as being 50 miles N. of Tubero (Strab. vii. 1800. a. 54; Uebert, vol. ii. pt. 1. p. 438.)

NOEODUNUM (Nodaevum), was the chief city of the Diablintes [Dianbintres], or of the Anlicrivi Diablintes, as the name appears in the Greek texts of Ptolemy (i. 8. § 7). There is no doubt that the old Gallic name of the town was exchanged for that of the Roman name in the later epoch, with which name an old Gallic document, referred to by D'Arvill, is written Jubaclntus, and hence comes the corrupted name Jubaclnt, a small place a few leagues from Mogissac. There are said to be some Roman remains at Jubaclnt.

A name Nudismum occurs in the Theodosian Table between Aragenna and Subdeninn (Meme), and it is marked as a capital town. It appears to be the Nudismum of the Diablintes. [G. L.]

NOEMAGUS (Noumages), a town of Galia Lugdunensis, and the capital of the Vadissaei (Prot. l. 8. § 16). The site is uncertain. D'Arvill supposed that it may be Ves, a name apparently derived from the Volissaei. The site supposes it to be near the river, but it is not likely that it becomes Nebelus, a name of the same as Noemagus.

NOE (Nouo, Herbiv. iv. 49) or NOAS (Valer. Plac. vi. 100), a river which takes its source in Mount Haemus, in the territory of the Corbaci, and flows into the Danube. It has not been satisfactorily identified. [T. E. D.]

NOELEX, a place in the territory of the Helvetii, which is shown by inscriptions to be Vieraz Chatel, near Nyonchatel. Foundations of old buildings, pillars and coins have been found there. One of the inscriptions cited by Uebert (Gallica, p. 494) is: 

[O. L.]

NOEGDUNUM. [COLOMNA EQUESTRA NOEGDUNUM.]

NOLÁ (Nola: Etcd. Nolais, Nolana: Nola), an ancient and important city of Campania, situated in the interior of that province, in the plain between Mt. Vesuvius and the foot of the Apennines. It was distant 21 miles from Capus and 16 from Nuceris (Istorn. Ant. p. 108). Its early history is very obscure. Its original, or more ancient, position, though it may be in some degree reconciled by a due regard to the successive populations that occupied this part of Italy. Hecataeus, the earliest author by whom it is mentioned, appears to have called it a city of the Amneses, whom he regarded as the earliest inhabitants of this part of Italy. (Herod. ap. Steph. Byz. s. e.) On the other hand, it must have received a Greek colony from Cnossus, if we can trust to the authority of Justin, who calls both Nola and the neighbouring Abella Chalcidic colonies (Justin. xx. 1); and this is confirmed by Julius Italicus (Chalcideon Nolam, xii. 161.) Other authors assigned it a Tyrrhenian or Etruscan origin, though they differed widely in regard to its date and origin. Strabo gives it, together with that of Capua, to a date as early as B. C. 800, while Cato brought them both down to a period as late as B. C. 471. (Vell. Pat. i. 7. This question is more fully discussed under the article CAPUA.) But whatever is the date assigned to the establishment of the Etruscan in Campania, there seems no doubt that Nola was one of the cities which they then occupied, in the same manner as the
neighbouring Capua (Pol. ii. 17); though it is most probable that the city already existed from an earlier period. The statement of Solinus that it was founded by the Tyrians is clearly erroneous: perhaps, as suggested by Niebuhr, we should read “a Tyrtennia” for “a Tyriana.” (Solin. 2. § 16; Niebuhr, vol. i. p. 74, note 323.) We have no account of the manner in which the colony was established or the name given to the Samnites; but there can be little doubt that it speedily followed in this respect the fate of Capua: 

[CAPUA]; and it is certain that it was, at the time of the first wars of the Romans in this part of Italy, a Campanian city, occupied by an Ocean people, in close alliance with the Samnites. (Liv. viii. 23.) Dionysius, just before the beginning of the Second Samnite War, states that the colonists were not at this period, like the Neapolitans, a Greek people, though he tells us that they were much attached to the Greeks and their institutions. (Dion. Fr. xv. 5. p. 2315. R.)

We may possibly infer from the above statements, that Nola was originally an Aonian or Ocean town, and subsequently occupied by the Etruscans, in whose name it appears, with the Samnites, until it was conquered by the Samnites, who subsequently assumed the name of Campanian colonies, about B.C. 440. The evidence in favour of its having ever received a Greek colony is very slight, and is certainly outweighed by the contrary testimony of Hecataeus, as well as by the silence of all other Greek writers. The circumstances which alone suggest a colonisation (some of which are of early date) have uniformly Greek incriptions (as in the one figured below), may be sufficiently accounted for by that attachment to the Greeks, which is mentioned by Dionysius as characterising the inhabitants. (Dion. L. c.)

The first mention of Nola in history occurs in B.C. 328, just before the beginning of the Second Samnite War, when the Greek cities of Paleopolis and Neapolis having rashly provoked the hostility of Rome, the Nolans sent to their assistance a body of 2000 troops, at the same time that the Samnites furnished an auxiliary force of twice that amount. (Liv. viii. 28.) But their efforts were frustrated by dissension among the Neapolitans; and the Nolans retired from the city on finding it betrayed into the hands of the Romans. (Id. 25, 26.) Notwithstanding the provocation thus given, it was long before the Romans were at leisure to avenge themselves on Nola; and it was not till A.D. 313 that they laid siege to that city, which fell into their hands after a short resistance. (Id. ix. 24.) It appears certain that it continued from this period virtually (subject to Rome, though enjoying, it would seem, the privileged condition of an allied city (Liv. xxii. 44; Festus, s. v. Afronsineus, p. 127); but we do not meet with any subsequent notice of it in history till the Second Punic War, when it was distinguished for its fidelity to the Roman cause, and for its successful resistance to the Carthaginians. General, after making himself master of Capua in B.C. 216, hoped to reduce Nola in like manner by the cooperation of a party within the walls. But though the lower people in the city were ready to invite the Carthaginian general, the senate and nobles were faithful to the alliance of Rome, and sent in all haste to the town to reassert their authority, which the city with a considerable force. Hannibal in consequence withdrew from before the walls; but shortly after, having taken Nuceria, he renewed the attempt upon Nola, and continued to threaten the city for some time, until Marcellus, by a sudden sally, inflicted upon him considerable loss, and led him to abandon the enterprise (Liv. xxii. 45—17; Plut. Mar. 10, 11; Eutrop. iii. 12; Flor. ii. 6. § 29.) The advantage thus obtained, though incommodious in itself, was of importance in restoring the spirits of the Romans, which had been almost crushed by repeated disasters, and was in consequence magnified in the Senate of the next year (Livy, v. 18. § 280). The next year (A.D. 215) Hannibal again attempted to make himself master of Nola, to which he was encouraged by fresh outbreaks from the democratic party within the city; but he was again anticipated by the vigilance of Marcellus, and, having escaped in the neighbourhhood of the town, with a view to a more regular passage into a great war in Italy (Liv. xiii. 39, 40—46; Plut. Mar. 10.) A third attempt, in the following year, was not more successful; and by these successive successes the city earned the praise bestowed on it by Silius Italicus, who calls it "Peno non pervia Nola." (Sili. Ital. vii. 534.)

Nola again bears a conspicuous part in the social war. At the commencement of the conflict, it was protected, as a place of importance from its proximity to the Samnite frontier, by a Roman garrison of 2000 men, under the command of the proctor L. Postumius, but was betrayed into the hands of the Samnite leader C. Papirius, and became from thenceforth one of the chief strongholds of the Samnites and their allies in this part of Italy. (Liv. Epit. lxxix.; Appian, R. C. l. 42.) Thus we find it in the following year (A.D. 216) affording shelter to the scattered remains of the army of L. Cluentius, after its defeat by Sulla (Appian, l. c. 50); and even after the greater part of the allied nations had made peace with Rome, Nola still held out; and a Roman army was still occupied in the siege of the city, till the civil war first broke out between Marius and Sulla. (Vell. Pat. ii. 17, 18; Diod. xxxv. 4. Exc. Phot. p. 540.) The new turn thus given to affairs for a while retarded its fall: the Samnites who were defending Nola joined the party of Marius and Cinna; and it was not till after the final triumph of Sulla, and the total destruction of the Samnite power, that the dictator was able to make himself master of the refractory city. (Liv. Epit. lxxix.) We cannot doubt that it was severely punished: we learn that its fertile territory was divided by Sulla among his victorious soldiers (Lib. Col. p. 236), and the old inhabitants probably altogether expelled. It is remarkable that it is termed a Colonie before the outbreak of this war (Liv. Epit. lxxxii.); but this is probably a mistake. No other author mentions it as such, and its existence as a municipium, retaining its own institutions and the use of the Ocean language, is distinctly attested at a period long subsequent to the Second Punic War, by a remarkable inscription still extant. (Almenas, Under. Ital. Dial. p. 125.) It afterwards received a second under Sulla, and a third under Vespasian; hence Pliny enumerates it among the Coloniae of Campania, and we find it in inscriptions as late as the time of Dioecletian, bearing the titles of "Colonia Felix Augusta Nolana." (Lib. Col. l. c.; Plin. iii. 9. 9; Zosimus, Col. pp. 264, 350; Gruter, Insocr. p. 473. 5, p. 1083. 14.) It was at this time a town of some importance from Beneventum, whither it had accompanied Tiberius, A. D. 14; and from thence to Bovillae its funeral procession was attended by the senators of the cities through which it passed. (Suet. Aug. 99; Dion Cass. lvi. 29, 31; Tac. Ann. i. 5; Vell. Pat. l.
NOMENTUM

The territory of Nola, in common with all the Campanian plain, was one of great natural fertility. According to a well-known anecdote related by Aulus Gallius (vii. 20), it was originally mentioned with great praise by Virgil in the Georgics (ii. 225) but the people of Nola having given offence to the poet, he afterwards struck out the name of their city, and left the line as it now stands. [E. H. B.]

COIN OF NOLA.

NOLIBA or NOBILI, a town of the Oretani in Hispania Tarraconensis, probably situated between the Anas and Tagus; but its site cannot be satisfactorily determined. It is mentioned only by Livy (xxxv. 22).

T. H. D.

SILICES. [NUMIDIA.]

NOMAB (Nōma), a town of Sicily, mentioned only by Diodorus (xi. 91) as the place where Duciæs was defeated by the Syracusans in b.c. 451. Its site is wholly uncertain. Some authors identify it with Nosa [NOAS]; but there is no authority for this.

E. H. B.

NOMENTUM (Nōmēntum: Etr. Nāmēntum, Steph. B.; Nomenotti: Mentana), an ancient city of Latium, situated on the Sabine frontier, about 4 miles distant from the Tiber, and 14½ from Rome, by the road which passed from it the name of Via Nomentana. It was included in the territory of the Sabines, according to the extension given to that district in later times, and hence it is frequently reckoned a Sabine town; but the authorities for its Latin origin are decisive. Virgil enumerates it among the colonies of Alba (Aen. vi. 773); and Dionysius also calls it a colony of that city, founded at the same time with Crustumerium and Fidenae, both of which are frequently, but erroneously, called Sabine cities. (Dion. ii. 53.) Still more decisive is the circumstance that its name occurs among the cities of the Prisci Latini which were reduced by the elder Tarquin (Liv. i. 38; Dionys. iii. 50), and is found in the list given by Dionysius (v. 61) of the cities which concluded the league against Rome in b.c. 493. There is, therefore, no doubt that Nomentum was, at this period, one of the 39 states of the Latin League (Niesbuh, vol. ii. p. 17, note); nor does it appear to have ever fallen into the hands of the Sabines. It is again mentioned more than once during the wars of the Romans with the Fidenates and their Etruscan allies; and a victory was gained under its walls by the dictator Servilius Priscus, b.c. 435 (Livy, viii. 37, 38). The existence of a Greek colony here, as already stated there exists no sufficient authority. (Kramer, über den Styl. u. die Herkunft Griechischen Thongesch. pp. 145—159; Abeken, Mitt. Italien, pp. 333—339.)

Nola is celebrated in ecclesiastical history as the see of St. Paulinus in the 5th century; and also as the place where, according to tradition, the use of bells was first introduced in churches; whence were derived the names of "nola" and "campana," usually applied to such bells in the middle ages. (Du Cange, Glossar. s. c.)
find it retaining its municipal privileges down to a late period. Its territory was fertile, and produced excellent wine; which is celebrated by several writers for its quality as well as its abundance. (Plin. iv. 4. a. 5; Colum. R. R. iii. 8; Athen. i. p. 27, b; Martial, x. 43. 18.) Seneca had a country house or villa among the Sabines, which was given by his friends Q. Ovidius and Nepos, so that it seems to have been a place of some resort as a country retirement for people of quiet habits. Martial contrasts it in this respect with the splendour and luxury of Baiae and other fashionable watering-places; and Cornelius Nepos, in like manner, terms the villa of Atticus, at Nomentum, "Rusticum Episcopium," (Ep. 104; Martial, vi. 27, 43, x. 44, xii. 57; Nep. Att. 14.)

Even under the Roman Empire there is much discrepancy between our authorities as to whether Nomentum was to be reckoned a Latian or a Sabine town. Strabo ascribes it to the latter people, whose territory he describes as extending from the Tiber and Nomentum to the confines of the Vestini (v. p. 228). Pliney, who appears to have considered the Sabines as bounded by the Anio, naturally includes the Nomentani and Fidenates among them (ii. 12. a. 17); though he elsewhere enumerates the former among the still existing towns of Latium, and the latter among those that were extinct. In like manner Vergil, in enumerating the Sabine followers of Aeneas (Aen. vii. 712), includes "the city of Nomentum," though he had elsewhere expressly assigned its foundation to a colony from Alba. Polienly (iii. 1. § 62) distinctly assigns Nomentum as well as Fidenae to Latium. Architectural fragments and other existing remains prove the continued prosperity of Nomentum. Of the famous Equestrian statue found in the Tabula, and which we learn that it became a bishop's see in the third century, and retained this dignity down to the tenth. The site is now occupied by a village, which bears the name of La Mentana or Lamentana, a corruption of Civitas Nomentana, the appellation by which it was known in the middle ages. This is an extinct small town, somewhat steep and difficult of access, a little to the right of the Via Nomentana, and probably occupies the same situation as the ancient Sabine town; the Roman one appears to have extended itself at the foot of the hill, along the high road, which seems to have passed through the midst of it. The road leading from Rome to Nomentum was known in ancient times as the Via Nomentana. (Orell. Inscr. 306; Tab. Pest.) It issued from the Porta Collina, where it separated from the Via Salaria, crossed the Anio by a bridge (known as the Pons Nomentanus, and still called Ponte Lamentana) immediately below the celebrated Mons Sacer, and from thence led almost in a direct line to Nomentum, a distance of 18 miles, from whence it had previously derived the name of Via Ficulnea. (Strab. v. p. 228; Liv. iii. 52.) The remains of the ancient pavement, or other unquestionable marks, trace its course with accuracy throughout this distance. From Nomentum it continued in a straight line to Etruria, where it rejoined the old road. This is on a small hill, somewhat below the distance of Nomentum from Rome at xiv. M. P.; the real distance, according to Nibby, is half a mile more. (Nibby, Distorti, vol. ii. p. 409, vol. iii. p. 635.) [E. H. B.]

NOMIA. [LYCAURUS.]

NOMISSERTUM (Νομισσηρτος), a town in the country of the Marcomanni (Bokhara), not far from the banks of the Albitis; but its site cannot be determined. (Ptol. ii. 11. § 29; Wilhelm, Germaniae, p. 339.) [L. S.]

NORA/C/CRIS (Νοραθρίας: Eub. Narastrhria, Narastrhri). 1. A town of Arcadia, in the district of Pheneus, and near the seacoast of the island, on a promontory, now to have derived its name from Noreia, the wife of Lycaon. From a lofty rock above the town descended the waters of the river Styx. [Sty.) Pline speaks of a mountain of the same name. The place was in ruins in the time of Pausanias, and there is no trace of it at the present day. Leake conjectures that it may have occupied the spot of Meleagris. (Geog. vi. 74; Paus. viii. 17. § 6; Steph. B. e. s.; Plin. iv. 6. a. 10; Sen. Q. N. iv. 95; Leake, Morea, vol. iii. pp. 165, 169.) From this place Hermes is called Noracrites (Narastrhri, Steph. B. s. v.), Evander Noracris (Or. Fast. v. 97), Atalanta Noreia (Or. Mot. viii. 438), and Callisto Noreus (Or. Mot. iv. 409) in the general sense of Arcadian.

2. A town of Arcadia in the territory of Orchomenus, which formed, together with Callia and Dippaena, a Tripolis. (Paus. viii. 27. § 4.)

NOSADA. [NERADA.]

NORA (Νορᾶ: Eub. Norastrhri, Steph. B.; Noroasia: Capo di Falco), a city of Sardinia, situated on the S. coast of the island, on a promontory, now called the Capo di Falco, about 20 miles S. of Castiaria. According to Pausanias (x. 17. § 5) it was the most ancient city in the island, having been founded by an Iberian colony under a leader named Norax, who was a grandson of Geryon. Without attaching much value to this statement, it seems clear that Nora was occupied by the natives, a very ancient city, as well as one of the most considerable in later times. Pline notices the Norasenses among the most important towns of the island; and their name occurs repeatedly in the fragments of Ciceron's oration in defence of M. Aemilius Scarrus. (Cic. proc. Scarr. 1. 2.) Ed. Orell.; Plin. iii. 7. a. 15; Ptol. iii. 3. § 3.) The position of Nora is exactly given by Pliney, but his authority had been discarded, without any reason, by several modern writers; but the site has been clearly established by the recent researches of the Conde de la Marmora: its ruins are still extant on a small promontory near the village of Palau, marked by an ancient church of St. Eustace, which, as we learn from ecclesiastical records, was erected on the ruins of Nora. The remains of a theatre, an aqueduct, and the ancient quays on the port, are still visible, and confirm the notion that it was a place of importance under the Roman government. Several Latin inscriptions with the name of the city and people have also been found; and others in the Phoenix, the Cornicentum, which must belong to the period of the Carthaginian occupation of Sardinia. (De la Marmora, Voyage en Sardaigne, vol. ii. p. 355.)

The Antonine Itinerary (pp. 84, 84), in which the name is written Nura, gives the distance from Caralis as 32 M. P., for which we should certainly read 39; in like manner the distance from Nora to the sea (p. 411) is 59 (instead of 69) miles, which agrees with the true distance, if we allow for the windings of the coast. (De la Marmora, ib. p. 441.) [E. H. B.]

NORA (νεόπη), a mountain fortress of Cappa- docia, on the frontiers of Lycaonia, at the foot of the Ioum Taurus, in which Eumenes was for a whole
though Pliny mentions the Norbani among the existing "populi" of Latiniae, in another passage he reinstates Norba among the cities that in his time belonged to those populi (III. 5. 9. §§ 64, 65). The absence of all subsequent notice of it is confirmed by the evidence of the existing remains, which belong exclusively to a very early age, without any traces of buildings that can be referred to the period of the Roman Empire.

The existing ruins of Norba are celebrated as one of those rare instances remaining in Italy of the style of construction commonly known as Cyclopean. Great part of the circuit of the walls is still entire, composed of very massive polygonal or rude square blocks of solid limestone, without regular towers, though the principal gate is flanked by a rude projecting mass which serves the purpose of one; and on the E. side there is a crenelated tower or bastion projecting considerably in advance of the general line of the walls. The position is one of great natural strength, and the defences have been skilfully adapted to the natural outlines of the hill, so as to take the fullest advantage of the ground. On the side towards the Pontine Marakes the hill is at the very greatest distance from the magazines of a cliff on the opposite; on the other sides the excitement is less considerable, but still enough to render the hill in great measure detached from the adjoining Volsician mountains. The only remains within the circuit of the ancient walls are some foundations and substructions, in the same massive style of construction as the walls themselves; these probably served to support temples and the public buildings; but all traces of the structures themselves have disappeared. The site of the ancient city is wholly uninhabited, the modern village of Norma (a very poor place) being situated about half a mile to the S. on a detached hill. In the middle ages there arose, in the plain at the foot of the hill, a small town which took the name of Norma, from the sources of the river, the same name (the Nympheus of Pliny), close to which it was situated; but this was destroyed in the 13th century, and is now wholly in ruins. The remains of Norba are described and illustrated in detail in the first century of the Annali dell'Istituto di Corrispondenza Archeologica (Rome, 1829); and those of the walls, gates, etc., are well exhibited in Dodwell's Peloponnesian Relics (fol. Lond. 1834, pl. 72—80).

Norba Caesariana or CaesarÃ‘a (Nymphæa or Norma), ancient city on the left bank of the Tagus, lying NW. of Emerita Augusta, and mentioned by Pliny (iv. 20. s. 35) as the seat of Nor- beia Caesariana. It is the modern Alcastor, and still exhibits some Roman remains especially a bridge of six arches over the Tagus, built by Trajan. This structure is 600 feet long by 28 broad, and 345 feet above the usual level of the river. One of the arches was blown up in 1809 by Col. Mayne, to prevent the French from passing; but it was repaired by the Col. of the 2nd Dragoons. It is a striking monument of Roman magnificence. The architect, Cains Julius Lacer, was buried near the bridge; and at its entrance a chapel still exists containing an inscription to his memory. (Ford, Handbook of Spain, p. 272; Gruter, Inscr. p. 163; Muratori, Nov. Thes. Inscr. 1064. 6; Ukerton, vol. ii. pt. i. p. 394; and also omits all notice of it, where he mentions all the other towns that bordered the Pontine Marakes (v. p. 237); and,
NORICUM.

The inhabitants of Noricum, called by the general name Norici (Nespei), Plin. ill. 32; Polyb. xxxiv. 10; Strab. iv. pp. 306, 308), were a Celtic race (Strab. vii. pp. 293, 296), whose ancient name was Taurisci (Plin. ill. 34.). The Celtic character of the people is sufficiently attested also by the names of several Norican tribes and towns. At the end of the 5th c. 58, the Boi, a kindred race, emigrated from Bohemunum and settled in the northern part of Noricum (Caes. B. G. i. 5). Strabo (v. p. 213) describes these Boi as having come from the north of Italy. They had resisted the Cimbri and Teutones, but were afterwards completely annihilated by the Getes, and their country became a desert. Polteny does not mention them at all in the Boi, but enumerates several smaller tribes, such as the Scenaces (Scenaces) in the west, the Alani or Halani (Helani) in the south, and the Ambiontii (Ambiontii), the inhabitants of the banks of the Isenta. In the east the same authority mentions the Norici (Nespei) together with two other small tribes, the Ambiontii (Ambiontii) and the Scenaces (Scenaces), or dwellers about the Luca or Lichias, or Lech. It must be observed that, in this enumeration of Polteny, the Norici, instead of forming the great body of the population, were only one of the six smaller tribes.

As to the history of Noricum and its inhabitants, we know that at first, and for a long time, they were governed by kings (Caes. B. C. i. 18; Strab. vii. pp. 304, 318); and some writers speak of a regnum Noricum even after the country had been incorporated with the Roman Empire. (Vell. Pat. ii. 39, 109; Suet. Tib. 16.) From early times, the Noricans had carried on considerable commerce with Aquileia (Strab. iv. p. 307, v. p. 314); and the Romans, under the command of Tiberius and Drusus, made themselves masters of the adjoining countries south of the Danube, especially after the conquest of Bætica, Noricum also was subdued; and about a.c. 15, the country, after desperate struggles of its inhabitants with the Romans, was conquered. The Noricans appear to have been incorporated in the course of one summer. (Strab. iv. p. 206; Dion Cass. liv. 20.) The country was then changed into a Roman province, probably an imperial one, and was accordingly governed by a procurator. (Tac. Hist. i. 19, Ann. ii. 63.) Partly to keep Noricum in subjection, and partly to protect it against foreign invasions, a strong body of troops (the legion T. Italica) was stationed at Lauracenum, and three fleets were kept on the Danube, viz. the classis Cornuginesia, the cl. Ariapensis, and the cl. Lauracensi. Roads were made through the country, several Roman colonies were founded, as at Lauracenum and Ovilabs, and fortresses were built. In the time of Probus the province of Noricum was not yet divided; but in the subsequent division of the whole empire into smaller provinces Noricum was cut into two parts, Noricum Ripense (the northern part, along the Danube) and Noricum Mediterraneum (embracing the southern and more mountainous part), each of which was governed by a praeses, the whole forming part of the diocese of Illyricum. (Not. Imp. Occiei. i. 5, and Orient. p. 5.)

The more important rivers of Noricum, the Savus, Drauvus, Murus, Araape, Iassus, Joyatus or Iaconta, are described under their respective heads. The ancient capital of the country was Noria; but, besides this, the country under the Roman
Empire, contained a great many towns of more or less importance, as Bohidurum, Joviacum, Osculato, Lepitia, Laurocicum, Areleate or Amalape, Namare, Fluitum, Bedauza, Juvavum, Virium, Caesaris, Aquintum, Longium, and Taurina.

An excellent work on Noricum in the time of the Romans is Muchar, Das Römische Noricum, in two vol. Grafia, 182; compare also Zenes, Die Donauvölker, p. 59. [L. S.]

**Norobes.** [Norosus.]

**Norobes.** [Norosus.]

**Norosus** (Norsev apoe, Ptol. vi. 14. §§ 5, 11), a mountain of Scythia intra Imaiana, near which were the tribes of **Norobes** (Norsev Oeni) Norobes (Norsev) and Cychaga (Cycha). It must be referred to the portion of the great meridian chain of the **Oral.** [E. B. J.]

**Nosaleine** (Nosalina), a town of Armenia Minor, on the northern slope of Mount Amassan, in the district called Lianesine. (Ptol. vii. § 10.)

**Norocoruno** (Norsev ðos, Strab. xvi. p. 774, Ptol. vii. § 11), or South Hon, was a promontory on the eastern coast of Africa. Phoenicia was the first to name this headland Aroamata. [W. B. D.]

**Notocoruno** (Norsev ðos, Hanno, ap. Geogr. Graec. M. p. 13, ed. Müller; Ptol. iv. § 6), a promontory on the W. coast of Libya. The Greek version of the voyage of Hanno gives the following statement: "On the third day after our departure from the Chariot of the Gods (Svar &ktum), having sailed by those streams of fire (previously described), we arrived at a bay called the Southern Horn, at the bottom of which lay an island like the former, having a lake, and in this lake another island, full of savage people, the greater part of whom were women, whose bodies were covered with gold, and which they brought with them as shields. We on this occasion manned our ship, and we could not seize any of them; but all fled from us, escaping over the precipices, and defending themselves with stones. Three women were, however, taken; but they attacked their conductors with their teeth and hands, and could not be prevailed upon to accompany us. We burned their ship, and brought their skins with us to Carthage. We did not sail further on, our provisions failing us." A similar story is told by Eudoxus of Cyzicus, as quoted by Mela (iii. 9; comp. Ptol. v. 1.) These fires do not prove volcanic action, as it must be re-collected that the common custom in those countries —as, for instance, among the **Mandingos**, as reported by Munro Park—of setting fire at certain seasons to the forests and dry grass, might have given rise to the statements of the Carthaginian navigator. In our own times, the island of Amsterdam was set down as volcanic from the same mistake. (Daubeney, Volcanoes, p. 440.) The "Chariot of the Gods" has been identified with Sagres; the distance of the place from Carthage was also assigned to the S. of Sierra Leone, while Hanno's island coincided with that called Macauclay in the charts, the peculiarity of which is, that it has on its S. shore, or sea face, a lake of pure fresh water of considerable extent, just within high-water mark; and inside of, and close to it, another still larger, salt. (G. Dr. p. 593.) The name **Mandingos** is, no doubt, belonged to the family of the anthropoid apes; the **Mandingos** still call the "Orange-Outan" by the name "Toorills," which, as Kluge (ap. Müller, loc.), the latest editor of Hanno, observes, might easily assume the form it bears in the Greek text. [E. B. J.]

**Novium** (Norsev ðos, Ptol. ii. § 5), the SW. cape of Ireland, now **Mizen Head.** (Cameren, p. 1336.)

**Novium.** [Calystra.]

**Novium.** [Colophon.]

**Nova Iustissa** (Norosovorov, or Norsev Atria, Ptol. iii. § 56), a town of the **Arvuci** in *Hispânia Tarraconensis*, the site of which cannot be identified. (Ptol. iii. 3. a. 4.) [T. H. D.]

**Novia** (Norsev, Ptol. iii. 10. § 10; called Novis by Procop. de Aedif. iv. 11. p. 308, and Hieroc. p. 636; and Novinavis by Cels. lib. 427, a town of Lower Moesia on the Danube, and that is said to be the site of the Novesaront (Ptol. iii. 3. 1.) and the Nat. Imp. (c. 29), the station of the legio i. Italica. It is identified either with Novograd or Novoseli. At a later period it obtained the name of Estustium. (Jornald. Get. 18.) [T. H. D.]

**Novana** (Ptol. iv. 13), a town of Picenum, mentioned only by Pliny (iii. 13. a. 18), who appears to place it in the mountains of Campania, and added that it was probably represented by *Monat de Nove*, about 8 miles N. of Ascoli. (Cicero, Istat. p. 741.) [E. B. H.]

**Novantia** (Norosevra, Ptol. ii. § 37), a tribe in the SW. of Britannia Barba, or Caledonia, occupying Wigmouth. Their chief town was Luedocifilia and Resigontium. [T. H. D.]

**Novantivus** (Ptol. ii. § 3. 1), the most N. point of the peninsula of the Novantias in Britannia Barbara, now Corseil Point, in Wigmouth. (Marcian, p. 59, Hudson.) [T. H. D.]

**Novanus**, a small river of the Vestini, mentioned only by Pliny (ii. 103. a. 106), who places it in the territory of Pidum, and notices it for the possibility of the river being of the highest Apenines) seems to identify it with the stream flowing from a source called the *Laghetto del Vetù*, in the north of the town of Vellum. (Romanelli, vol. iii. p. 281.) [E. B. H.]

**Novaria** (Novas, Ptol.; Novaros), a con- sidewalk of the north road from Mediolanum to Vercellae, at the distance of 38 miles from the former city. (Hab. Ant. p. 344, 350.) It was in the territory of the Insubres (Ptol. iii. 1. § 33); but its foundation is ascribed to Pliny by a people whom he calls Vertacomaci, who were of the tribe of the Voonuitt, a Gaulish race, according to Pliny, and not, as asserted by Cato, a Ligurian one. (Ptol. iii. 17. a. 21.) No mention is found in his- tory of Novaria previous to the Roman conquest; but it seems to have been in the days of the Empire a considerable municipal town. It is reckoned by Tacitus (Hist. i. 70) among the "firmissima Transpadanae regionis municipia" which declared in favour of Vitalina, A. D. 69; and was the native place of the Roman knight *Scherbo*, mentioned by *Turzio*, in the edification of the encircled municipal functions there. (Suet. Rev. 6.)

Its municipal rank is confirmed also by inscriptions (Gruter, Inscr. p. 393. 8, &c); and we learn from Pliny that it territory was fertile in vines (vit. xxii. 23. a. 35). After the fall of the Western Empire Novaria is again mentioned as a fortified town of some im- portance (Procop. B.G. i. 19, F. Disc. Hist. Lang. vi. 18.) The modern city of *Novara* is a flourishing place, with about 16,000 inhabitants, but has no ancient remains. [E. B. H.]

NOVAS, AD.

NOVAS, AD, a fortress of Upper Moesia, situated on the Danube, and on the road from Viminacium to Nicomedia. (Itin. Am. p. 218.) It lay about 48 miles E. of the former of those towns. It is identified with *Kolomba*, where there are still traces of ancient fortifications. [T. E. B. J. ii. p. 193.]

NOVAS, AD, a station in Ilyricum (Acta Itin.), which has been identified with *Romerich* in the *Imoicht*, where several Latin inscriptions have been found, principally dedications to Jupiter, from soldiers of the 1st and 13th legions, who were quartered there. (Wilkinson, *Dalmatia and Montenegro*, vol. ii. p. 182.) He was imprudent in leaving such great stores in the power of treacherous allies. But he was in straits during this year, and probably he could not do otherwise than he did.

NOVEM CRARIS, in South Gallia, is placed by the Jerusalem Itin. between Lectovs [Lectoces] and Ascomum, supposed to be *Ascorius* on the Rhone. [G. L.]

NOVEM PAGI is the name given by Pliny (iii. 5. a. S.) to a "population" or community of Etruria, the site of which is very uncertain. They are generally supposed to have been real earls of the neighbourhood of Forum Clodi. (Dennis's *Etruria*, vol. i. p. 273.)

NOVE'SIUM, a fortified place on the Gallic side of the Rhine, which is often mentioned by Tacitus (Hist. iv. 26, 33, 35, &c. v. 22). It is also mentioned in the Antonine Itin. and in the Table. There is no difference of opinion that it is a place called *Noveus*, between Colonia Agrippina (Côtes) and Gelduba (Gelle). *Gelduba*. Novesium fell into ruins, and was repaired by Julian, A.D. 359. (Amm. Marc. xviii. 2.)

NOVIMAGUS, in Gallia, is placed in the Table after Moso (Moesia). Moso is placed by the Antonine Itin. as a stronghold of the Romans, and Tullum (Tout). Novimagus is *Neufchâtel*, on the same side of the river Moso as Mœve, but the distance in the Table is not correct. [G. L.]

NOVIODUNUM (Noviodunum). 1. A town of the Bituriges, in Gallia. Caesar, after the capture of Genalum (Orientis), a.c. 52, crossed the Loire, to relieve the Boii, who were attacked by Vercingetorix. The position of the Boii is not now known. [Boiti.] On his march Caesar came to Noviodunum of the Bituriges (B. G. vii. 19), which surrendered. But on the approach of the cavalry of Vercingetorix, the townspeople shut their gates, and manned the walls. There was a cavalry fight between the Romans and Vercingetorix before the town, and Caesar gained a victory by the help of Novimagus, a German horse. Upon this the town again surrendered, and Caesar marched on to Avaricum (Bourges).

There is nothing in this narrative which will determine the site of Noviodunum. D'Anville thinks that Caesar must have passed Avaricum, leaving it on his right; and so he supposes that Novimagus, a name common to Noviodunum, may be a confusion. De Valois places Noviodunum at *Near-sur-Beaujolais*, where it is said there are remains; but this proves nothing.

2. A town of the Aedni on the Loire. The place was afterwards called Newrimum, as the name appears in the Antonine Itin. In the Table it is corrupted into *Nœverinum*. It is possible that Newrimum is *Nœveria*, which has its name from the little river *Nivroux*, which flows into the Loire.

In a.c. 52 Caesar had made Novimadum, which he describes as in a convenient position on the banks of the Loire, a depth (B. G. vii. 55). He had his hostages there, corn, his military chest, with the money it allowed him from home, for the war, his own and his army's baggage, and a great number of horses which had been bought for him in Spain and Italy. After his failure before Gergovia, the Aedni at Noviodunum massacred those who were there to look after stores, the negotiatores, and the travellers who were in the place. They divided the money among them and the horses, carried off in boats all the corn that they could, and burnt the rest or threw it into the river. Thinking they could not hold the town, they burnt it. It was a regular Gallic outbreak, performed in its true national style. This was a great loss to Caesar; and it may seem strange that he was imprudent in leaving such great stores in the power of treacherous allies. But he was in straits during this year, and probably he could not do otherwise than he did.

Dion Cassius (xl. 38) tells the story of Caesar of the affair of Noviodunum. He states incorrectly what Caesar did on the occasion, and he shows that he neither understood his original, nor knew what he was writing about.

NOVIODUNUM (Noviodunum). 1. A place in Pannonia Superior, on the great road leading from Aemona to Siscia, on the southern bank of the Savus. (Ptol. ii. 15; Itin. Am. p. 269; Geogr. Rav. iv. 19, where it is called Novindum.) Its modern name is *Novigrad*.

2. A town and fortress in Lower Moesia, a little above the point where the Danube divides itself into several arms. (Ptol. iii. 10. § 11.) Near this town the emperor Valens constructed a bridge over the Danube for his expedition against the Greuthungi. (Amm. Marc. xxvii. 1.) Some writers have supposed, without any good reason, that Noviodunum is the place at which Darius ordered a bridge to be built when he set out on his expedition against the Sicythians. The town, as its name indicates, was of Celtic origin. According to the Antonine Itinerary (p. 326) Noviodum was the station of the Romans on the right bank of the Alaric River, while according to the *Notitia Imperii* it had the legio i. Jovis for its garrison. During the later period of the Western Empire, the fortifications of the place had been destroyed, but they were restored by Justinian (Procop. de Aed. iv. 11; comp. Hierol. p. 657; and Constant. Porph. de Thesm. ii. 1, where the place is called Neufchâtel and Novioborunum). The Civitas Nova in Jornandes (Get. 5) is probably the same as Noviodunum; and it is generally believed that its site is occupied by the modern *Isca*.

NOVIOMAGUS (Novimadum). 1. A town in Gallia, which afterwards had the name Lexovii (Lexo- vior), which was that of a people of Galicia. In the Greek text of Ptolemy, § 3, the word is not present printed, the word Linum (λινος) is put after the name Noviomagus. But this is not true, for Noviomagus is *Linum*, which is not on the sea, though the territory of the Lexovi extended to the sea.

2. Afterwards *Nemetei*, in Gallia, the capital of the Nemetes or Nemetae [Nemeter]. The name

NOVIOMAGUS.
is Neomagus in Ptolemy (L. 9. § 17). In Ammianus Marcellinus (xv. 11, xvi. 2) and the Notitia Imp. it occurs under the name of the people, Nemetes or Nemetae, mentioned under the small stream called Speierbach, which flows into the Rhine. In some of the late Notitiæ we read " civitas Nemetum, id est, Spira. " (D'Anville, Notice, &c.)

3. A town of the Batavi, is the Dutch town of Nijmegen, on the Vaalbe (Waal). It is marked in the Table as a chief town. D'Anville observes that the position of Dusodermum (DRECOURT.) is placed by the Table on a Roman road, and next to Noviomagus; and that this shows that Noviomagus had a territory, for capital places used to reckon the distances from their city to the limits of their territory.

4. A town of the Bituriges Vivisii. (Ptol. ii. 7. § 8.) (Bero) Pilius Vivisii, near the Moselle. In the Table it is v.s. but as v.s. is far from the truth, D'Anville supposes that the v. in the Table should be x. The river bends a good deal below Vivisii, and in one of the elbows which it forms is Neumagen, the representative of Noviomagus. It is mentioned in Ammianus's poem (Moselle, v. 11):—

"Novimagum divi castra inlita Constantini."

It is said that many Roman remains have been found at Neumagen.

5. A town of the Veromandii. In the Antonine Itin. this place is fixed at 27 M. P. from Soissons, and 34 M. P. from Amiens. But their distances, as D'Anville says, are not exact, for Noviomagus is Noyon, which is further from Amiens and nearer to Soissons than the Itin. fixes it. The alteration of the name Noviomagus to Noyon is made clearer when we know that in a middle age document the name is Noviomum, from which to Noyon the change is easy. [G. L.]

NOVIOMAGUS (Noviosiurum, Ptol. ii. 3. § 28), capital of the Bregni in Britannia Prima, marked in the Itin. (p. 472) as the first station on the road from London to Durovernum, and as 10 miles distant from the former town. It has been variously placed at Woodcote in Surrey, and Holywood Hill in Kent. Camden, who adopts the former site in his description of Surrey (p. 122), seems in his description of Kent (p. 219) to prefer the latter; where on the little river Rawmarshower, there still remain traces of ramparts and ditches of a vast extent. This site would also agree better with the distances in the Itinerary. [T. H. D.]

NOVIREGUM, in Gallia, is placed by the Antonine Itin. on a road from Burdigala (Bordeaux) to Mediolanum Santorum (Sociates); and between Tamusum (Talmon or Talmonon) and Mediolanum. D'Anville supposes Novioregum to be Rojen on the north side of the Gironde; but this place is quite out of the direct road to Sociates, as D'Anville admits. He has to correct the distance also in the Itin. of the Roman road from Noviomum to make it agree with the distance between Talmon and Rojen. [G. L.]

NOVIUM (Naessae, Ptol. ii. 6. § 23), a town of the Artabri in Hispania Tarraconensis, identified by some with Porto Mover, by others with Nogaro. [T. H. D.]

NOVIUS (Neosseis, Ptol. ii. 3. § 28), a town on the W. coast of Britannia Barbara, or Caledonia, flowing into the estuary Ituna (or Solway Firth), now the Nith. [T. H. D.]

NOVUM COMUM. [COMUM.]

NUAESIUM (Neorasitum), a town of Germany, mentioned only by Ptolemy (i. 11. § 29). It was probably situated 30 miles S. of Marcella and in the neighbourhood of Frisia, though others identify its site with that of castle Niamhus in Westphalia, near Nekesius. (Wilhelm, Germanies, p. 188.) [L.S.]

NUBA LACUS. [NGREE.]

NUBAE (Nocceu, Strab. xvi. pp. 786, 819; Ptol. iv. 7. § 30; Steph. B. a. s. e.; also Nocceus and Imp. are unknown to vi. 80. a. 84), were a negro race, situated S. of Marse on the western side of the Nile, and when they first appeared in history were composed of independent clans governed by their several chiefstains. From the Nubae is derived the modern appellation of Nubia, a region which properly does not belong to ancient geography; yet the Nubaeales are clear in many respects, both in the extent of their country and their national character, from the modern Nubians.

Their name is Egyptian, and came from the Nile-valley to Europe. From remote periods Aegypt and Aethiopia imported from the regions S. of Marse ivory, ebony, and gold; and gold, in the language of Aegypt, was Noub; and thus the gold-producing districts S. of Sennaeus (Sennaei), and in Kordofus, were designated by the merchants trading with them as the land of Noub. Even in the present day the Copts who live on the lower Nile call the inhabitants of the country above Aeusseus (Syene) Nubas,—a name indeed disposed by those to whom it is given, and of which the origin and import are unknown. They are divided into districts S. of Sennaeus (Sennaei), and in Kordofus, separated from Aegypt by a desert which can be easily crossed, and containing no obstructing population of settled and warlike tribes, lay almost within view of Aethiopia and the country N. of it; and the Nubas, though of a different race, were familiarly known by all who drank of the waters of the Nile. The occupations of the Nubas brought them into immediate contact with the mercantile classes of their more civilised neighbours. They were the water-carriers and caravan-guides. They were employed also in the trade of Libya Inferior, and, until the Arabian conquest of Eastern Africa, were generally known to the ancients as a nomad people, who passed over the wastes between the S. of Marse and the shores of the Red Sea. Nor, indeed, were they without settled habitations: the country immediately N. of Kordofus is not entirely barren, but lies within the limit of the periodical rains, and the hamlets of the Nubas were scattered over the meadow tracts that divide the upper branches of the Nile. The independence of the tribes was probably owing to their dispersive habitations. In the third century A.D. they seem to have become more compact and civilised; for when the Romans, in the reign of Diocletian, A. D. 285—305, withdrew from the Nile-valley above Philae, they placed in it and in the stations up the river the colonies of Noviae (Nousses, Nowodierh) from the western desert. These settlements may be considered as the germ of the present Nubia. Supported by the Romans who needed them as a barrier against
the Elymneys, and reinforced by their kindred from SW., civilised also in some measure by the introduction of Christianity among them, these wandering negroes became an agricultural race, maintained themselves against the ruling tribes of the eastern deserts, and in the sixth century A.D. were firmly established as far S. perhaps as the Second Cataract. (Procop. Bell. Persic. i. c. 15.) In the following century the Nubae were for a time overwhelmed by the Arabs, and their growing civilisation was checked. Their employment as caravan-guides was diminished by the introduction of the camel, and their commerce was ruined by the Christian traders of the slave-trade; since the Arabians invaded these stunted and docile negroes a marketable commodity on the opposite shore of the Red Sea. But within a century and a half the Nubae again appear as the predominant race on the Upper Nile and its tributaries. The entire valley of the Nile, from Dongola inclusive down to the frontier of Aegypt, is in their hands, and the name Nubia appears for the first time in geography.

The more ancient Nubae were settled in the hills of Kordofan, SW. of Meroe. (Rittei, Reisen in Nubien, p. 32.) The language of the Nubians of the Nile at this day is radically the same with that of northern Kordofan; and their numbers were increased in the 1st century B.C. by the Greeks, who were acquainted with these tribes only as wanderers northward in quest of service with the caravans from Coptos and Philae to the harbours of the Red Sea. The ancient geographers, indeed, mention the Nubae as a scattered race. Pliny, Strabo, and Ptolemy each assign to them a different position. Ptolemy (iv. 6. § 18) dismisses them from the Nile, doubtless erroneously, and places them W. of the Abyssinian mountains, near the river Giri and in close connect with the Garamantes. Strabo (xvii. p. 819) speaks of them as a great nation of Lybia, dwelling in numerous independent communities between the latitudes of Meroe and the great bend of the Nile,—i.e. in Dongola. Lastly, Pliny (vi. 30. 84) places them in the country W. of the 26th parallel (Semnæum). All these accounts, however, may be reconciled by assuming Kordofan to have been the original home of the Nubae, whence they stretched themselves W. and W. according as they found room for tillage, caravan routes, or weaker tribes of nomades.

The Pharaohs made many settlements in Nubia, and a considerable Aegyptian population was introduced among the native Aegyptian tribes as far S. as the island of Gogandens (Arpo), or even Gebel-el-Birkel. (Lat. 18° 25' N.) It is not certain whether any of the present races of Nubia can be regarded as descendants of these colonists. Their presence, however, is attested by a series of monuments which the Aegyptian towns were left by the colonists. These monuments represent three eras in architectural history. (1) The first comprehends the temples cut in the sides of the mountains; (2) the second, the temples which are detached from the rocks, but emulate in their massive proportions their original types; (3) the third comprises those large buildings in the form of vast temples, such as those of Gortasne and Demosne, which the whole solid masses of the first style are wholly laid aside. Of these structures, however, though seated in their land, the Nubae were not the authors; and they must be regarded either as the works of a race cognate with the Aegyptians, who spread their civilisation northward through the Nile-valley, or of colonists from the Thebaid, who carved upon the walls of Ipompul, Semneh, and Selaq the titles and victories of Rameses the Great. [W. B. D.]

NUCERIA. (Noucria: Νοῦκρα, Νοῦκρας ου Νοῦρία: Νωκρία.) 1. Bordered ALFALSITRUM (Noucea dell' Ospitale), a considerable city in Samnian, situated 16 miles S. from Nola, on the banks of the river Sarnus, about 9 miles from its mouth. (Strab. v. p. 247; Plin. iii. 5. s. 9; (itn. Ant. p. 109.)

The origin of its distinctive appellation is unknown; the analogous cases of Tannum Silicium and others would lead us to suppose that the Alfarsini were a tribe or people of which Nuceria was the chief town; but no mention is found of them as such. Pliny, however, notices the Alfarsini among the "populi" of Campania, apart from Nuceria (Plin. iii. 5. s. 9); and we learn from their coins that the inhabitants themselves, who were of Osian race, used the designation of Nucerni Alfarsini ("Nufkimium Alfarsirmum"), which we find applied to them by Greek and Roman writers (Noucria ή ΑΛΦΑΙΣΤΡΗΜΟ ΚΑΛΟΜΗΡΟΥ, Diod. xii. 65; Nuceria Alfarsina, Liv. ix. 41; Friedlander, Acad. Mus., p. 21). The first mention of Nuceria in history occurs in a.c. 315, during the Second Samnite War, when its citizens, who were at this time on friendly terms with the Romans, were induced to abandon their alliance, and make common cause with the Samnites (Diod. xii. 65). In a.c. 308 they were punished for their defection by the consul Fabius, who invaded their territory, and laid siege to their city, till he compelled them to an unconditional submission. (Liv. iv. 41.)

No subsequent notice of it occurs till the Second Punic War, when, in a.c. 216, Hannibal, having been defeated by Scipio at the battle of Germa (which was fought near Nuceria, and with much better success; for though the citizens at first offered a vigorous resistance, they were soon compelled by famine to surrender: the city was given up to plunder and totally destroyed, while the surviving inhabitants took refuge in the other cities of Campania. (Liv. xxvii. 15; Appian, Anm. 49.) How Nuceria itself was repopulated we are not informed, but it is certain that it again became a flourishing municipal town, with a territory extending down to the sea-coast (Pol. iii. 91), and is mentioned by Cicero as in his day one of the important towns of Campania. (Cic. de Leg. Agr. ii. 31.) Its territory was ravaged by C. Papirius in the Social War, a.c. 90 (Appian, B. C. i. 42); and if we may trust the statement of Florus, the town was taken and burnt by Pericles in the same war. (Flor. iii. 18. § 11.) It again suffered a similar calamity in a.c. 73, at the hands of Spartacus (Id. iii. 20. § 5); and, according to Appian, it was one of the towns which the Triumvirs assigned to their veterans for their occupation (Appian, B. C. iv. 3); but from the Liber Coloniarum it appears that the town was taken and destroyed, and was not settled there until after the establishment of the Empire under Augustus. (Lüb. Colom. p. 255.) It is there termed Nuceria Constantia, an epitaph found also in the itineraries. (Itin. Ant. p. 129.) Ptolemy also attests its colonial rank (Pol. iii. 1. § 69); and we learn from Tacitus o 2
NUCERIA.

that it received a fresh accession of veteran soldiers as colonists under Nero. (Tac. Ann. xiii. 31.) It was not long after this new settlement that a violent quarrel broke out between the colonists of Pompeii and Nuceria, which ended in a serious tumult, not without bloodshed (id. xiv. 17). This is the last mention of Nuceria that we find in history under the Roman Empire; but its name appears in the Itineraries, and is incidentally mentioned byProcopius. The decisive battle between Nares and Tetas, which put an end to the Gothic monarchy in Italy, a.p. 533, was fought in its neighbourhood, on the banks of the Sarnus, called byProcopius the Draco. (Procop. B. G. iv. 35.) We learn also that it was an episocal see in the early ages of Christianity, a dignity that it has retained without interruption down to the present day. Its modern appellation of Nocera dei Pagani is derived from the circumstance, that in the 15th century a body of Saracens were established there by the emperor Frederic II. There are no remains of antiquity at Nocera, except a very old church, which is supposed to have been originally an ancient temple. (Romanelli, vol. iii. p. 469.)

It was at Nuceria that the great line of high-road, which, quitting the Appian Way at Capua, proceeded directly S. to Rhegium, began to ascend the range of hills that separate the Bay of Naples from that of Salerno, or the Psicanion gulf, as it was called by the ancients. Strabo reckons the distance from Pompeii, through Nuceria to Marcina, on the latter bay, at 120 stadia (15 Roman miles) (Strab. v. p. 251), which is less than the truth: Nuceria being, in fact, 7 geographical miles, or 70 stadia, from Pompeii, and the same distance from the sea near Salerno. The journey at Pola (Forum Popilli) gives the distance from thence to Nuceria at 51 M. P.; while it reckons only 33 from thence to Capua. The Itinerary gives 16 from Nuceria to Nola, and 21 from Nola to Capua. (Orell. Inscr. 3308; Mommsen, Inscr. R. N. 6276; Itin. Ant. p. 109).

COIN OF NUCERIA IN CAMPAIMIA.

2. (Nocera), a town of Umbria, situated on the Flaminian Way, between Forum Flaminii and the actual pass of the Apennines. It is mentioned by Strabo as a town of considerable population, owing to its situation on so frequented a line of road, as well as to a manufacture of wooden vessels for household utensils. Pliny designates the inhabitants as " Nucerae,", in a dictionary of Flavian times; but the original of both appellations is quite unknown. Ptolemy terms it a Colony, but it is not mentioned as such by any other writer. If this is not a mistake, it must have been one of those settled by Trajan or Hadrian. (Zumpt, de Coloni. p. 401.) The modern city of Nocera, a small place, though an episocal see on its site, is not the ancient site. It was situated 12 miles from Forum Flaminii and 15 from Fulginiun (Poligno). (Strab. v. p. 227; Plin. iii. 14. a. 19; Ptol. iii. 1. § 53; Itin. Ant. p. 311; Itin. Hier. p. 614.)

3. A town of Cispadane Gaul, mentioned only by Ptolemy (iii. 1. § 46), from whom we learn that it was situated in the neighbourhood of Bogenium La- pidum and Mutina; but was not on the line of the Via Aemilia. It is probably represented by the village of Lamonza, near Casalpata, on the right bank of the Po. (Cluer. Ital. p. 281.)

COIN OF NUCERIA IN BRUTTIMUM.

NUDIONNUM, in the Table, is probably the same place as Nusodunum of the Diablistes. [NOSEODUNUM.] (G. L.)

NUBIUM (Nusovia), a town founded by the Romans in the Minyae, in Triphyla in Elis, but which was destroyed by the Eleians in the time of Herodotus (iv. 148).

NUITHONES, a German tribe, mentioned by Tacitus (Germ. 40) as inhabiting the banks of the Alba (Eubea), to the SW. of the Longobardi. They in common with other neighbouring tribes worshipped Zetna, that is, the Earth. In some editions the name is written Nuthones; so that nothing definite can be said either in regard to the import of their name or to the exact locality they inhabited. [L. S.]

NUIUS (Nusovia Isolai), Ptol. iv. § 6; in the Latin translation, "Numi ostia."

N. M.] It is a river of interior Libya, which discharges itself into the sea to the S. of Mauretania Tingitana. It has been identified with that which is called in the Shin-journal of Hanno, Expedition (Alg. Geog. Comm. Min. p. 5, ed. Müller), and by Scolys of Carystus (if the present text be correct), Xion (Hierz. p. 53), and by Polybius (ap. Plin. x. 1), CONERNUS. The Libyan river must not be confounded with the Mauretanian river, and town of the same name, mentioned by Scolys (L. c.; comp. Artem. 94, op. Strab. xvi. p. 829; Steph. B. s. v. Alpyt; Alcy, Hist. Fis. 326; Alg. Ptol. iv. 1. §§ 2, 13; Fomp. Melis M. 10, § 6; Plin. x. 1), and which is now represented by the river called by the Arabs Wady-al-Khaw, falling into the sea at El-Arteh, where Barth (Wanderungen, pp. 29-31) found ruins of the ancient Lixus. The Lixus which appears on the maps of Senefelder near the modern town of Qasr Dra (Wady-Dra), which the S. declivity of the Atlas of Morocco sends to the Sahara in lat. 33°; a river which fills the greater part of the year nearly dry, and which Reben (Explor. de l'Aig. Hist. et Geogr. vol. viii. pp. 65-78) considers to be a sixth longer than the Rhone. It flows at first from N. to S., until, in N. lat. 29° and W., long. 5°, it turns almost at right
NUMANIA. It angles to its former course, runs to the W., and after passing through the great fresh-water lakes of Deseobis, enters the sea at Cape Naus. The name of this cape, so celebrated in the Portuguese discoveries of the 15th century, appears to have a much older origin than has been supposed, and goes back to the time of Pliny. Edrisi speaks of a town, Naula or Wadi Numa, (mentioned by Pliny) on the coast of Numa, in the interior: Leo Africansus calls it Bolado de Nam. (Humboldt, Aspects of Nature, vol. i. pp. 116—120, trans.)

E. B. J.

NUMANIA (Nóuana: Etn. Numanas: Umana), a town of Picenum, situated on the sea-coast of that province, 8 miles S. of Ancona, at the southern extremity of the mountain promontory called Monte Camerino. (Plin. iii. 18. a. 18; Pol. iii. 1. § 91; Mel. ii. 4. § 6; Itin. Ant. p. 312.) Its foundation is ascribed by Pliny to the Sicilians; but it is doubtful whether this is not a mistake; and it seems probable that Numana as well as Ancona was colonised by Sicilians Greeks, as late as the time of Dionysius of Syracuse. No inhabitant remains of it is found in his time; but Silius Italicus enumerates it among the towns of Picenum in the Second Punic War; and we learn from inscriptions that it was a municipal town, and apparently one of some consideration, as its name is associated with the important cities of Asis and Auxinum. (Sil. Ital. viii. 451; Gruter, Iac. p. 446. 1; 2; Orell. Inscr. 3629, 3900.) The town was situated about 2 miles from Ancona and 10 from Potenza. (Itin. Ant. p. 312; Tac. Hist.) It was in early ages an episcopal see, but this was afterwards united with that of Ancona. The ancient city was destroyed by the Lombards in the eighth century; and the modern Umana is a poor place.

E. B. J.

NUMANTIA (Nóumantia, Pol. vi. 36; Nuaética, Steph. B. s. v.), the capital of the Araucans in Hispania Tarraconensis, and the most famous city in all Celtiberia, according to Strabo (iii. p. 162) and Mela (ii. 6). Pliny however (iii. 3. a. 4), places it in the territory of the Pelendones, which also agrees with the Itin. Ant. (p. 442). It is represented as an ancient city of repute height, but steep approachable only on one side, which was defended by ditches and intrenchments. (Flor. ii. 18; Oros. v. 7; Appian, B. Hist. 76, 91.) The Durium flowed near it, and also another small river, whose name is not mentioned. (Appian, B. Hist. 76; Dion Cass. Fr. 82, ed. Fabr. i. 35.) It was on the road from Asturias to Caesaraugusta (Itin. Ant. L. i.), and had a circumference of 74 stadia (Appian, B. Hist. 90; Oros. L. c.), but was not surround with walls. (Florus, L. c.) Its memorable siege and destruction by Scipio Africansus, n. s. 134, are related by Appian (48—95), Eutropius (iv. 17), Cicero (De Off. I. 11), Strabo (L. c.), &c. The ruins at Jaramona, now Guadarrama, probably mark the site of this once famous city. (Aldrete, Ant. Hist. L. 6; Flor. Ep. S. vii. p. 276; D'Availle, Mémo de l'Acad. des Inscr. vol. xi. p. 770, cited by Ukert, vol. ii. pt. 1. p. 455.)

T. H. D.

NUMENIUM (Novēnium, Stadiom. 298), a small island with a spring of fresh water, 55 stadia from Paphos; at the same time it was also called by Pliny ("centra Neamphamh Hieraepia," v. 98). Strabo (xtr. pp. 683, 664) has an inland town Hieroepia.

E. B. J.

NUMICIS (Novadus; Río Torte), a small river of Latium, flowing into the sea between Lavinium and Ardea. It is mentioned almost exclusively in reference to the legendary history of Aeneas, who, according to the poetical tradition, adopted also by the Roman historians, was buried on its banks, where he was worshipped under the name of Jupiter Indiges, and had a sacred grove and Heromn. (Liv. i. 2; Dionys. l. 64; Vict. Ovog. Gest. Rom. 14; Ovid. Met. iv. 298—306; 300—304.) The temple adjoining the grove of Jupiter Indiges was one of Anna Perenna, originally a Roman divinity, and probably the tutelary nymph of the river, but who was brought also into connection with Aeneas by the legends of later times, which represented her as the sister of Dilos, queen of Carthage. The fables connected with her are related at full by Ovid (Fast. iii. 545—564), and by Silius Italicus (viii. 28—201). Both of these poets speak of the Numicius as a small stream, with stagnant waters and reedy banks: but they afford no clue to its situation, beyond the general intimation that it was in the Laurentine territory, an appellation which in some times by Hirtius poets especially, with the vague latitude. But Pliny, in enumerating the principal rivers of the coast of Latium, mentions the river Numicius between Laurentum and Ardea; and from the narrative of Dionysius it would seem that he certainly conceived the battle in which Aeneas was slain to have been fought between Lavinium and Ardea, but nearer the former city. Hence the Río Torte, a small river with a sluggish and winding stream, which forms a considerable marsh near its outlet, may fairly be regarded as the ancient Numicius. It would seem from Pliny that the Lucas Jovis Indigetis was situated on its right bank. (Plin. iii. 5. a. 9; Dionys. l. 64; Nibby, Dintorni, vol. ii. p. 418.)

E. B. J.

NUMIDIA, the central tract of country in the N. coast of Africa, which forms the largest portion of the country now occupied by the French, and called Algeria or Algérie.

I. Name, Limits, and Inhabitants. The continuous system of highlands, which extends along the coast of the Mediterranean in the earliest period occupied by a race of people consisting of many tribes, of whom, the Berbers of the Algerine territories, or the Kabyles or Quaboals, as they are called by the inhabitants of the cities, are the representative. These peoples, speaking a language which was once spoken from the Fortunate Islands in the W. to the Cataracts of the Nile, and which still explains many names in ancient African topography, and embracing tribes of quite different characters, whites as well as blacks (though not negroes), were called by the Romans NUMIDAE, not a proper name, but a common denomination from the Greek form νομίδαι. (Strab. ii. p. 131, xvii. pp. 833, 837.) Afterwards NUMIDIA and NUMIDAE (Novamica et Novadis) or Nauadiæ or Novadiæ, Pol. iv. 3; Pomp. Mela, i. 6; Plin. v. 2, vi. 39) became the name of the nation and the country. Sometimes they were called MAURUSI NUMIDAE (Mampsoi Novades, Appian, B.C. ii. 44), while the later writers always speak of them under the general name of MAURI (Amm. Mar. xix. 5; Procop. B. V. ii. 4) The most powerful among these were SEMNIDES or MAURYLI (Mauridae, Polb. iii. 44; Strab. ii. p. 131, xvii. p. 899; Dionys. 187; Mauadis, Polb. vii. 19; Mauayli, Sil. Ital. xvi. 170; Massilia gena, Liv. xxiv. 49), whose territories extended from the river Ampesga to Tretum Prom. (Seba Ria); and the MASSASCULI (Mas-
NUMIDIA.

NUMIDIA.

sarda, Polyb. iii. 38; Strab. ii. p. 131, xvii. pp. 827, 829, 833; Dionys. 167; Scal. Jug. 92; Plin. v. 1; Massenius, Liv. xxviii. 17), occupying the country to the W. as far as the river Mulucha. Nomad life, under the Punic, the Carthaginians, and the Roman emperors, presents in one uniform type, the "armamentarius" of Virgil (Georg. iii. 344), and Sallust (Jug. 18), who, as governor of Numidia, had opportunity for observation, may be recognized in the modern Kabyle. These live in huts made of the branches of trees and covered with clay, which resemble the "magals" of the old Numidians, spread in little colonies over the sides of the mountains, and store away their grain in holes in the ground. Numidia, a nation of horsemen, supplied the Carthaginians with the wild cavalry, who, without saddle and bridle, secured the country, as if horse and rider were one creature. Masinissa, who, till the age of ninety, could spring upon his horse's back (Appian, Pum. 107), reproduced the Numidian; faithful, merciless, unscrupulous, he is a man of barbaric race, acquiring the tastes and the polish of civilization without any deeper reformation. Agriculture and the arts of life were introduced under Masinissa, and still more by Mucipae. After the fall of Carthage, the Romans presented the Numidian kings with its library, but Punic influence must have been strong at least (Polyb. iii. 10), and it is true that, of the inhabitants of both Mauretania and Numidia, that they used the Phoenician language in his time; but it is extremely improbable that they ever used Punic, nor can it be supposed that Procopius possessed the information requisite for ascertaining the fact. They used a language of languages, the ancestors of the Greeks and Romans, who, according to it was in Punic, while there can be little doubt that it was the idioms which they spoke before the arrival of the Phoenician colonists, and which continued to be their vernacular dialect long after the Carthaginians and Romans had ceased to be known among them, even by name. Latin would be the language of the cities, and must have been very generally intelligible, as the Christian teachers never appear to have used or to have thought it necessary to learn any other language.

II. Physical Geography.

Recent investigation has shown that the distinction between what was called the "Greater and the Lesser Atlas" must be abandoned. There is only one Atlas, formerly called in the native language "Dyris;" and this name is to be applied to the foldings, or succession of crests, which form the division between the waters flowing to the Mediterranean and those which flow toward the Sahara lowland. The E. prolongation of the snow-covered W. summit of the Atlas, has a direction or strike from E. to W. Numerous projections from this chain run out into the sea, and form abrupt promontories: the first of these in a direction from E. to W. was Hippo PROX, ("Iperi Iepos, Polt. iv. 3. § 5: C. de Garde, or Rda-el-Hamraul; then Strophorum (Strofephor, Pol. l. a. C. de Fer, Rda Riddel); Rubidiana; Collops Magna; or True PROX, or the cave at Seba Rha, the Sinus Numidianus (Neomiiicis okinos, Polt. iv. 3. § 3), into which the rivers Ampscape, Audus, and Sisar discharged themselves, with the headland Igoliola (Dochidual) and Saldares (C. Carbon, Bourg, Bourg, Bouchik); after passing Rrincum, and C. Matriti (Tobatia), the bold shores of the Bay of Aqipa, to which the ancients gave no name, success. The chief rivers were the Tuba, the boundary between Numidia and the Roman province, the Rubricatus or Usur, and the Ambraeo. The S. boundaries, towards the widely extended plains of Menbessa, as low as the S. coast of Tunisia, presents but little variation. From the researches of M. Fournel, Renou, and Carette, it appears that the Sakara is composed of several detached basins, and that the number and the population of the fertile valleys is much greater than had been imagined. Of larger wild animals, only gazelles, wild asses, and oraschi are to be met with within the desert, "captive in imagination, as that animal naturally seeks spots where food and water can be found. The camel, the "ship of the desert," was unknown to the ancient horsemen of Numidia; its diffusion must be attributed to the period of the Ptolemies, who employed it for commercial operations in the valley of the Nile, whence it spread through Cyrene to the whole of the N. W. of Africa, where it was first brought into military use in the train of armies in the times of the Caesars. The later introduction of this carrier of the desert, so important to the nomadic life of nations, and the patriarchal stage of development, belongs to the Mohammedan epoch of the conquering Arabs. The maritime tract of this country proceeds nearly the same vegetable forms as the coasts of Andalusia and Valencia. The olive, the oranges-tree, the arborescent ricius, the Cha-Cauros eumilia, and the date-tree flourish on both sides of the Mediterranean; and when the warmer sun of N. Africa produces different species, they are generally belonging to the same families as the European. The Ras el-Azoun or "House of the antioch," golden yellow, with reddish veins, was the most highly prized at Rome for its colour. (Plin. xxxv. 1, xxxvi. 8.) The pavement of the Comitium at Rome consisted of slabs of this beautiful material. (Niebuhr, Lect. on Anc. Geog. vol. ii. p. 80.)

III. History and Political Geography.

The Romans became acquainted with these tribes in the First Punic War, when they served as the Carthaginian cavalry. After the great victory of Benebas, the Numidians threw off the yoke of Carthage. (Polyb. i. 31: Dioct. Freg. vol. xiv. 4.) The wild array of their horsemen was the most formidable to the Romans, and with the help of the Mauretanians' 20,000 horsemen, they were able to hold their own against the Carthaginian cavalry. When the Roman army was defeated at the river Trebia, the Carthaginians captured the city, destroyed the city, and surrounded the small strip allowed to Carthage on the W. (Appian, Pum. 106). When Masinissa died he left his kingdom to his three sons, Guluma, Mucipae, and Mastanabal. Guluma and Mastanabal died; the latter left no legitimate children, but a grandson, Jughurtha and Gonda, sons by a concubine; and thus the vast dominions of Numidia fell into the hands of Mucipae, the Philhellenes. He had two sons, Adherbal and Hiempsal, with whom he associated Jughurtha in the throne. The latter, spurning a divided empire, murdered Hiempsal, and compelled Adherbal to fly to Rome. He appointed his son, who was supposed to be the successor of his marriage. The
NUMIDIA NOVA. 455

NUMISTRO [Nunrospor, Ptol.; Nunrospor Pnt.: Eud. Numestranae], a town of Lucania, apparently near the frontiers of Apulia, near which a battle was fought between Hannibal and Marcellus, in B.C. 210, without any decisive result (Liv. xxvii. 3; Plut. Mar. 24). From the narrative of Livy, which is copied by Plutarch, it is clear that Numistre was situated in the northern part of Lucania, as Marcellus marched out of Samnium thatibere, and Hannibal after the battle drove off his forces, and withdrew towards Apulia, but was overtaken by Marcellus near Venusia. Pliny also enumerates the towns of Nunmoresti. Nunnostrani (Brockelmann), Municipal towns of Lucania, and places them in the neighborhood of the Valentinii. Hence it is certain a mistake on the part of Ptolemy that he transfers Numistre to the interior of Bruttium, unless there were two towns of the name, which is scarcely probable. Cluverius, however, follows Ptolemy, and identifies the city of Scopus in (Xer. labris), but this is certainly erroneous (Pli. iii. 11. a. 15; Ptol. iii. 1. § 74; Oliver. Ital. p. 1819). The site conjecturally assigned to it by Romanelli, near the modern Mezio, about 30 miles NW. from Potenza, is plausible enough, and agrees well with Pliny's statement that it was united for municipal purposes with Venusia, and with Volusii (Brockelmann), which is also about 30 miles from Mezio. (Romanelli, vol. i. p. 434.) Some ancient remains and inscriptions have been found on the spot.

[E. H. B.]

NURIA. [BaUkoks, p. 374, a.]

NURSIA (Neapoli: Eta. Nuraxim: Norcia), a city of the Sabines, situated in the upper part of the valley of the Nena, at the foot of the lofty group of the Apennines, now known as the Monte della Sibilla. The coldness of its climate, resulting from its position in the midst of high mountains, is celebrated by Virgil and Silius Italicus. (Virg. Aen. vii. 716; Sil. Ital. viii. 417.) The first mention of it is history is in the Second Punic War (a. c. 205), when it was one of the cities which came forward with voluntary alliance to the Romans under Aemilius. As on this occasion the only three cities of the Sabines mentioned by name are Nuria, Reste, and Amiternum, it is probable that Nuria was, as well as the other two, one of the most considerable places among the Sabines. It was a municipal town under the Roman government (Orell. Inscr. ital. 3946; Pouv. disc. 132), and we learn that its inhabitants were punished by Octavian for their secession adherence to the republican party, and the support they afforded to L. Antonius in the Perusine War. (Suet. Aug. 12; Dion Cass. xvn. 15.) It was the birthplace of Vespasia Polia, the mother of the emperor Vespasian; and the monuments of her family existed in the time of Suetonius at a place called Vespasia, 6 miles from Nuria on the road to Spoleto. (Suet. Vesp. 1.) The "ager Nurisin." is mentioned more than once in the Liber Coloniiarum (pp. 227, 257), but it does not appear that it ever received a regular colony.

We learn from Columella and Pliny that it was celebrated for its trubis, which are also alluded to by Martial (Colum. x. 491; Plin. xviii. 18. a. 54; Martial, xii. 26.) From its secluded position Nuria is not mentioned in the Itineraries, but there is no doubt that it continued to exist throughout the period of the Roman Empire. It became an episcopal see at an early period, and is celebrated in ecclesiastical history as the birthplace of St. Benedict, the founder of the first great monastic order.

It is said that remains of the ancient walls still exist at Norcia, in the same massive polygonal style as those near Reste and Amiernum (Petit-Radet, Am. d. Inst. Arch. 1839, p. 51), but they have never been described in detail. [E. H. B.]
NYCBIH. [SYRTICA.]
NYGBENI. [SYRTICA.]

NYMPHAEUM, NYMPHAEUM. 1. (Nympheia, Selyx, p. 29; Nympheum, Strab. vii. p. 509; Appian, B. Att. ii. 100; Ptol. iii. 5, § 8; Anon. Peripl. p. 5; Plin. iv. 26; Craterus, op. Harpocr. s. e.; Nympheus, Geogr. Rav. v. 9), a Milesian colony of the Tauric Chersonese, with a good harbour. (Strab. i. c.) The ruins of this town are to be found on the S. point of the gulf now called the Lake of Thoer.-

Burm. 2. The harbour of Lisias in Illiricum, and 3 M. P. from that town (Cesar, B. C. iii. 26), on a promontory of the same name. (Plin. iii. 26.) [E.B.J.] NYMPHAEUM (Nilufa), a small island off the coast of Ionia, is mentioned only by Pliny (v. 37). Respecting Nympheaea as a name of Coe, see Coe. [L. S.]

NYMPHEUM (Nýmφeion), Strab. vii. p. 330; Ptol. iii. 13, § 11), the promontory to the S. of the peninsula of Acte, from whence Mt. Athos rises above the sea. This promontory is now called Kíra Hágioi Xiúróghi. (Leake, North Greece, vol. iii. pp. 114, 149.)

[NYMPHAEUM (Nilufa).] 1. A place on the eastern coast of Bithynia, at a distance of 30 stadia west of the mouth of the Órinôs (Arrian, Peripl. Pont. Ór. n. 14), or, according to the Peripitus of Pontus (Steph. B. a. e. 43), 45 stadia from Thryanes. 2. A place in Cilicia, between Celenderis and Soli, is mentioned only by Pliny (v. 22.) [L. S.]

[NYMPHAEUS (Nilufa), a small river of Latium, mentioned only by Pliny (iii. 5. a. 9), who describes it as flowing into the sea between Astura and Circell. There is some doubt about the site of its mouth, but it is usually situated at the one still called the Nilufa, though this does not now flow into the sea at all, but within a few miles of its source (which is at the foot of the Velician mountains, immediately below the site of Norba, forming a pool or small lake of beautifully clear water) stagnates, and loses itself in the Pontine Marshes. A town called Nilufa arose, in the middle ages, close to its source, but this is now in ruins. We have no account of any ancient town on the site. [E.B.J.]

NYMPHAS. [MEGAOLPOPIS, p. 309, b.]

NYMPHASIA. [METHYDRIUM.]

NYSA or NYSSA (Níosa u. Níosa), is said to have been the name of the place in which the god Dionysius was born, where he was transferred to a great many towns in all parts of the world, which were distinguished for the cultivation of the vine. 1. In Asia. 1. A town in Caria, on the southern slope of mount Messogis, on the north of the Maendar, and about midway between Traile and Antioch. The mound, here called Pyndon, a tributary of the Maeandry, flows through the middle of the town by a deep

rvine spanned by a bridge, connecting the two parts of the town. (Strab. xiv. p. 650; Hom. Hymn. iv. 17; Ptol. v. 99; Ptol. v. § 18; Hieroc. p. 659; Steph. Byz. a. e.) Tradition assigned the foundation of the place to three of the brothers, Athymbrus, Athym-

brinus, and Hydralus, who emigrated from Sparta, and founded three towns on the north of the Ma-

ander; but in the course of time Nysa absorbed them all; the Nysiota, however, recognise more especially Athymbrus as their founder. (Steph. B. e. a. e. Athymbea; Strab. i. c.) The town derived its name of Nysa from Nysa, one of the wives of Antiochus, the son of Seleucus (Steph. B. e. a. e. Athymbea), and having previously been called Athymbrus (Steph. B.

b. e. a. e. Athymbea) and Pythopolis (Steph. B. e. a. e. Pytho-

col). Nysa appears to have been distinguished for its cultivation of literature, for Strabo mentions several eminent philosophers and rhetoricians; and the geographer himself, when a youth, attended the lectures of Aristodemus, a disciple of Panassus; another Aristodemus of Nysa, a cousin of the former, had been the instructor of Pompey. (Strab. i. c.; Cic. ad Fam. xiii. 64.) Hierocles classes Nysa among the seas of Asia, and its bishops are mentioned in the Councils of Ephesus and Constantinople. The city of Nysa, like others of the same name, is the scene of a regular festival, called the Nysia, and exhibits a series of Roman emperors from Augustus to Gallienus. The site of Nysa has been recognised by Chandler and other travellers at Sultan-hisar, above the plain of the Maendar, on a spot much resembling that described by Strabo; who also mentions a theatre, a forum, a gymnasion for youths, and another for men. Remains of a theatre, with many rows of seats almost entire, as well as of an amphitheatre, gymnasium, &c., were seen by Chandler. (Leake, Asia Minor, p. 248; Fellows, Discoveries, pp. 22, 11; Hamilton, Researches, p. 534.) The country round Nysa is described as bearing evidence of the existence of subterraneous fires, either by exhalations and vapours, or by its hot mineral springs.

COURT OF NYSA IN CARIA.

2. A place in the district of Mylas in Phliadia,

situated on the river Xanthus, on the south of Podaleira. (Ptol. v. 3. § 7; Hieroc. p. 654, where the name is misspelt Mira.)

3. A town in Cappadocia, in the district called Muriana, not far from the river Halis, on the road from Ancrya to Caesarea. (Ptol. v. 7. § 8; It. Ant. pp. 505, 669; Hieroc. p. 669; Nicephor. xi. 44.) Its site is now occupied by a village bearing the name of Nise and Niso (Hamilton, Researches ii. 44.)

[NYSA (Níosa).] 1. In Europe. 1. A village in Boeotia on Mt. Helicon. (Strab. ix. p. 405; Steph. B. e. a. Níosa.)

2. A town in Thrace, in the district between the rivers Syrrmon and Nestus, which subsequently formed part of Macedonia. It is called Nysa by Pliny. (Steph. B. e. a.; Plin. iv. 10. s. 17.)
2. In Euboee, where the vine was said to put forth leaves and bear fruit the same day. (Steph. B. c.)
3. In the island of Naxos. (Steph. B. s. c.) NYSSOS. [Ntra, in Europe, No. 2.]

O.

OAEUNEUM, a town of the Penestae, situated on a road leading into the country of the Labaeates, which overlooked a narrow pass, formed by a mountain and the river Aciatum. It was taken by Perseus in the campaign of B. c. 169. (Liv. xliii. 19.)

OAEONES (Mel. iii. 6. § 8; Solin. 19. § 6) or OONAE (Plin. iv. 13. s. 27), islands in the Baltic off the coast of Sarmatia, the inhabitants of which were said to live on the eggs of birds and wild oats.

OANUS ("Aanes, Pind. Ol. v. 25; Frascolari), a small river on the S. coast of Sicily, flowing beneath the walls of Camarina. [Camarina.] [E. B. B.]

OARUS ("Oaros, CT.]

OARUS. [Rha.]

OASES ("Oasis or Abdares, Strab. ii. p. 130, xviii. pp. 790—791; "Abda, πάλαι Ἀδύτον, was the general appellation among ancient writers given to spots of habitable and cultivable land lying in the midst of sandy deserts; but it was more especially applied to those verdant and well-watered tracts of the Libyan desert which connect like stepping-stones Eastern with Western and Southern Africa. The word Oasis is derived from the Coptic Ausch (masnus), a resting-place. (Peyron, Lexic. Ling. Capt. s. v.) Kant, indeed (Phys. Geogr. vol. ii. pt. 1. p. 349), traces it, with less probability, to the Arabic Ḥasāa, a habitation, and ḥā or ḥa a wilderness (comp. the Hebrew Seth). Their physical circumstances, rather than their form, size, or position, constitute an oasis; and the term is applied indifferently to kingdome like Angola and Phazania (Fessas) and to petty slips of pasture, such as the Oasis of El-Gerwa, which is only four or five miles in circumference. The ancient worship of the god Ares (Eris,) is found in the midst of the ocean of sand, and by their elevation escaping from being buried by it with the rest of the cultivable soil. Herodotus, for example (iv. 182), calls them κοιλαρια.

But, so far from rising above the level of the desert, the Oases are actually depressions of its surface, dints and hollows in the general bed of limestone which forms its base. The bottom of the Oases is of sandstone, on which rests a stratum of clay or marble, and these retain the water, which either percolates to them through the surrounding sand, or descends from the edges of the limestone rim that encircles these isolated spots, like a battlement. Within these moist hollows springs a vegetation presenting the most striking contrast to the general barrenness of the encircling wildness. Timber, of various kinds and considerable girth, wheat, millet, date and fruit trees, flourish in the Oases, and combined with their verdant pastures to gain them the appellation of "the Islands of the Blест. (Heron. ii. 26.) Both commercially valuable, it is of great importance to Aethiopia and Aegypt, which they supplied with gold and jewelry, and with the active traffic of Carthage in the west. Yet, although these kingdome lost no opportunity of pushing their empires or colonies eastward towards the Red Sea and the Regio Aethiopum, there is no positive monumental proof of their having occupied the Oases, at least while under their native rulers. Perhaps the difficulty of crossing the desert before the camel was introduced into Aegypt—and the camel never appears on the Pharaonic monuments — may have been responsible for appropriating these outposts. The Punic war, a hundred years after the conquest of Aegypt in B. c. 523, were the first permanent occupants of the Oases. Cambyses, indeed, failed in his attempt to reach Ammonium (Sisac); but his successor Dareius Hystaspis established his authority securely in many of them. At the time when Herodotus visited Aegypt, the Oases were already military or commercial stations, of the Libyans from the Red Sea to the Atlantic Ocean. The Ptolemies and the Caesars, they were garrisoned by the Greeks and Romans, and were the seats of a numerous fixed population, as well as the halting-places of the caravans; under the persecutions of the Pagan emperors, they afforded shelter to fugitives from the persecutions of the Pagan emperors; and when the church became supreme, they shielded heretics from their orthodox opponents.

The natural productions of these desert-islands will be enumerated under their particular names. One article of commerce, indeed, was common to them. Their alun was imported by the Aegyptians, as essential to the various manufactures. Amasis, according to Herodotus (ii. 180), commanded 10,000 talents of alun towards the rebuilding of the temple at Delphi; and the alun of El-Khairekh (Oasis Maghna) still attracts and rewards modern speculators. Herodotus describes the Oases as a chain extending from E. to W. through the Libyan Desert. He indeed comprehended under this term all the habitable spots of the Sidaretes, and names that they were in general ten days' journey apart from one another (iv. 181). But it is more usual to consider the following only as Oases proper. They are, with reference to Aegypt, five in number; although, indeed, Strabo (xvii. p. 1168) speaks of only three, the Great, the Lesser, and that of Ammon.

1. AMMON. (El-Khairykh, Oasis Oase.) Is the farthest and the most remote from the Nile. There seem to have been two roads to it from Lower Aegypt: for when Alexander the Great visited the oracle of Ammon, he followed the coast as far as Paraetanion in Libya, and then proceeded inland almost in a direct northerly line. (Arrian, Anab. iii. 4; Quint. Curt. iv. 83.) He also returned, to have returned to the neighbourhood of Memphis by the more usual route, viz. a WSW. road, which passes the Natron Lakes [Nitrah] and runs to Termeineck, on the Rosetta branch of the Nile. (Mintoff, Journey to the Temple of Jupiter Ammon.) There is some difficulty in understanding Herodotus's account of the distance between Thesebe and Ammonium. He says that they are separated by 300 stadia, and that a journey of Upper Aegypt has been dropped out of the text of Herodotus, or he must intend another Oasis, or El-Sisac is not the ancient Ammonium. If we bear in mind, however, that the Greater Oasis (EL
OASES.

Kharga) and the Lesser (El-Dakhla) were both accounted nomes of Aegypt, we may fairly infer that the ten days' journey to Ammonium is computed from one of them, i.e. from a point considerable distance from the Ghorana. Now, not only does the road from Thebes to Ammonium lie through or beside the Greater and Lesser Oasis, but their respective distances from the extremities of the journey will give nearly the number of days required. For El-Kharga, the Great Oasis, is seven days' journey from Thebes; and thirty hours, or (15 x 2) nearly two days, from Kharga; so that, for the camel caravans, a passage from whence to Ammonium is a journey of eight days, which, allowing two days for passing through the Oases themselves, gives just the twenty days requisite for performing the distance. There were two roads which led from Thebes to Oasis Magna. The shorter one bearing N. by Abydos, the other bearing S. by Latopolis. For the former forty-two hours, for the latter fifty-two, were required, to reach the Great Oasis. (Cailliaud, Voyages à l'Oasis de Thèbes, 1813.) The Oasis of Ammonium is about six miles in length, and three in breadth. The soil is strongly impregnated with salt of a fine quality, which was anciently in great request, both for religious purposes and the tables of the Persian kings, Achemenides, etc. (Harr. VIII, 26.) But by withdrawing its saline ingredients, the ground is abundantly irrigated by water-springs, of one of which, "the Fountain of the Sun," attracted the wonder of Herodotus, and ancient travellers generally. (Iv. 181; comp. Wilkinson, Med. Egypt and Thebes, vol. ii. p. 355.) It rises in a grove of sycamores, of the Temple of Ammon, and was probably one of the tepid springs, found in all Oases also, the high temperature of which is not observed during the heat of the day, but which, by night, are perceptibly warmer than the surrounding atmosphere. A small brook running from this fountain flows soon into another spring, also arising in the date-grove; and their united waters run towards the temple, and, probably because their ancient outlets are blocked up, end in a swamp. The vicinity of these brooks confirm the statement of Herodotus, that in Ammonium are many wells of fresh water (Iv. 181).

The early and high cultivation of this Oasis is still attested by the abundance of its dates, pomegranates, and other fruits. The dates are obtained in vast quantities, and are sold in Alexandria. In summer favourable seasons the whole area of Ammonium is covered with this fruit, and the annual produce amounts to from 5000 to 9000 camel-loads of 300 pounds each. Ozen and sheep are bred in considerable numbers; but the camel does not thrive in Ammonium, probably because of the dampness of the soil. The inhabitants accordingly do not export their own harvests, but get the caravans which convey them to Aegypt and the Mediterranean ports. (Minutoli, pp. 89, 90, 91, 174, 175, &c.) The present population of this Oasis is about 8000; but anciently, when it was at once the seat of an oracle, the centre of attraction to innumerable pilgrims, and one of the principal stations of the Libyan land-trains, its population must have been much more considerable. The ruins of the Temple of Ammon are found at Ummebeba, sometimes called Biréh,—the Ummanseir of Hormann (Travel., vol. i. p. 106), about 2 miles from the principal village and castle. Its style and arrangement bespeak its Aegyptian origin and its appropriation to the worship of Amun, the ramheaded god of Thebes; yet the buildings (the oracle itself was much older) are probably not earlier than the Persian era of Aegypt. The remains of the Ammonium consist of two parts—a palace and a sepulchre, or sanctuary. The walls are entirely composed of bewn stones, obtained from quarries about 2 miles off. The surface of the temple, both within and without, was covered with hieroglyphics emblematic of the story and transfigurations of Zeus-Ammon. The plain surface of the walls was highly coloured; and though many of the sculptures are much defaced, the temple itself was of moderate size, and the curtilage or enclosure of the whole is not more than 70 paces in length and 66 in breadth.

The population of this Oasis was, in the time of Herodotus (II. 53), partly Aegyptian and partly Asiatic,—both nations agreeing in their devotion to Zeus- Ammon. The Greeks, indeed, who must have become acquainted with Ammonium soon after their colonisation of Cyrene in the seventh century B.C. put in their claims to a share, at least, in its foundation. According to one tradition, Danaus led a colony thither (Diodor. xvii. 50); according to another, its oracle was established contemporaneously with that at Dodona, the most ancient oracle of the Greeks (Herod. II. 5). The same to the kindred Eteocyrus, mentioned by Herodotus in his story of the Nasaonnes, if the form be correctly given, has also a Greek aspect. (Herod. ii. 53.) There can be no doubt, however, that Ammonium was peopled from the East, and not by colonists from Europe and the North.

And on the present day El-Siekh contains four or five towns, of which the principal is Kobre; and about 2 miles from Kobre is an ancient fortress named Sharqah, old enough to have been occupied by a Roman garrison. (Minutoli, pp. 165—167.) It is governed by its own chiefs or shiekhs, who pay a small annual tribute to the viceroy of Aegypt. This Oasis, though known to Arabian writers of the thirteenth century a.d., was first reopened to Europeans by the travels of Browne and Hormann in the last century.

2. Proceeding in a S.W. direction, and approaching nearer to Aegypt, we come to the Oasis now called El-Faragkeh, but of which the ancient name is not recorded. It lay nearly N. of Oasis Minor, at a distance of about 50 miles and served as an intermediate station both to Ammonium and Oasis Magna. 

3. Oasis Minor (Oasis mabou, Ptol. iv. 5, § 37; § 164; Ptolemy, cr. xvi. p. 813; O. Minor, Not. Inv. Or. c. 143; the modern El-Dakhla), was situated S.E. of Ammonium, and nearly due W. of the city of Oxyrhynchus and the Arabeic nome (El-Fayoum). lat. 29° 10' N. Like El-Siekh, the Lesser Oasis contains warm springs and is well irrigated. Under the Romans it was celebrated for its wheat; but now its chief productions are dates, olives, pomegranates, and other fruits. It has a temple and tombs of the Ptolemaic era. The Lesser Oasis is separated from the Greater by a high calcareous ridge, and the station between them was probably at the little village of El-Bahariya, now known as Minutoli. Oasis Minor seems to be the same with that entitled by some Christian writers (e.g. Palladins, Vl. Chrysost., p. 193) § xwpou oivi tois Mxamm, and "Oasis, ubi gues sat Mastorum" (Joann, in Vl. Pasca, c. 12), the Maycel of the Negus Marmarica being the people indicated.

4. Oasis Thumtthingos, or the Oasis of El-Ba-
Oases.

OBERG.

Ober-isk, is the nearest of these desert-islands to the frontiers of Assyry, and nearly due N. from Assiya Magna. It is at the head of the bay Hermopolis in Middle Assyry. There is a road to it from Figalla, and its principal village is named Zabouli. The soil is favourable to fruit; but there are no traces of its permanent occupation either by the Assyrians or the Persians; and its earliest monuments are a Roman triumphal arch, and the ruins of a modern church, the latter containing a large copashti. In this oasis was made the discovery of some ancient arsentic wells.

The description of the wonders of the Oases by an historian of the fifth century A. D. (Olympiodorus. ep. Phot. Bibb. p. 61, ed. Becker) leaves no doubt of the existence of such artificial springs; but as their construction was unknown to the Greeks and Romans no less than to the Assyrians, the secret of it was probably imported from the East, like the silkworm, at some period anterior to A. D. 400. Several of these wells have recently been discovered and reopened (Rasaegeg, Reiss, vol. ii. pp. 284, 299); and the depth disclosed does not materially differ from that mentioned by Olympiodorus (op. supra), viz., from 500 to 1000 cubits, as has been proved by the discovery of an ordinary well; and the spontaneous rise of the water in a rushing stream shows that no pump, siphon, or machinery was employed in raising it to the surface. In this oasis, also, alumb abounds. (Kenrick, Anc. Egypt. vol. i. p. 74.)

5. OASIS MAGNA (Ozées andydar, Ptol. iv. 5. § 26; Strab. xvii. p. 813; § 82, Olymp. ep. Phot. Bibb. p. 512, ed. Becker), the Great Oasis, sometimes denominated the Oasis of Thebes, as its centre lies nearly opposite to that city, is called EL-Khargah by the Arabs, from the name of its principal town. This, also, is the "basysis Ozées and rivous massipoue of Herodotus (iii. 26), and is meant when the "Oase of Thebes" is spoken of in the Inscriptions. From by Josephus (c. Apion. ii. 2). In the hieroglyphics its name is Heb, and in the Notitia Imperii Orient. (c. 143) its capital is termed Hiba. The Oasis Magna is distant about 6 days' journey from Thebes, and 7 from Abydos, being about 90 miles from the western bank of the Nile. It is 80 miles in length, and from 6 to 10 in breadth, stretching north and south. The temperature is 45° N., the snow falls in winter. Abydos, 28° 6' N. Anciently, indeed, owing to more extensive and regular irrigation, the cultivated land reached further N. The high calcareous ridge, which separates it from the Lesser Oasis, here becomes precipitous, and girds the Oasis with a steep wall of rock, at the base of which the acacias of Egypt and the dahut form thick woods. The Great Oasis must have received a Greek colony at an early period, since Herodotus (iii. 26) says that the "city Oasis" was occupied by Samians of the Achaenidian tribe, who had probably settled there in consequence of their alliance with the Greek colonists of Cyrinn (Iod. iv. 158). Yet none of the numerous inscriptions which belong to this early period tell us why. It was garrisoned by the Persians; for the names of Dareius and Myartas are inscribed on its ruins (Wilkinson, Mod. Egypt and Thebes, vol. ii. p. 367); but the principal buildings which remain belong to the Macedonian, if not indeed to the Roman era. Its great temple, 468 feet in length, was dedicated to the Virgin. The general aspect and architecture resembles that of the temples at Hermopolis and Apollinopolis Magna. Like other similar spots in the Libyan Desert, the Great Oasis was a place of

banishment for political offenders (Dig. xlviii. tit. 22, l. 7. § 4), and for Christian fugitives from the Pagan emperors. (See Abydos.) In later periods it was abounded with monasteries and churches. The Greater and the Lesser Oasis were reckoned as forming together a single nome, but by the Roman emperors were annexed to the prefecture of the Thebaï. (Pline. v. 9. § 9, du Ptoleme; Ptol. iv. 5. § 6, et qui nusqu'm uniorunt assi il sed Oasis; und der der schlep. Histor. Gesch. der Griechen und Römer, Angel. Mon. sur les Oasis; Biter, Evagrius, vol. i. p. 964.)

Oaxes, oxus. [Auzur.]

OBSIL (Ostos, Ptol. ii. 5. § 9), a town of the Vettini in Hispiana Tarraconensis, the site of which is difficult to determine, but is supposed to be the modern Avila. (Hieron de Ver. Ill. c. 121, and Flores, Esp. S. xiv. 9,5, vol. ii. p. 431.) Reischard, however, identifies it with Oisus.

T. H. D.

Oibilae. [Marimaria.]

Oblum, a place in Gallia Narbonensis, written Obluna in the Table, on a road which passes through the Monts-Blanc to the pass of the Alpis Graiae, or Little St. Bernard. The site is lost, but the distance is marked ill. from Ad Publicanum. [Publicanos, ad.]

Oblivionis Flumen, called also Limius, Limia, Limais, &c. [Galligus, Vol. i. p. 933.]

O'boca (Oxenea, Ptol. ii. 5. § 6), a river on the W. coast of Ireland, now the Boyne. [T. H. D.]

Obrims, an ancient town in the territory of the Masaeus, had its sources, according to Livy (xxxvii. 15), on the eastern side of Mount Cadmus, near the town of Amorines, and flowed in the neighbourhood of Amaenus Cibotus (Pline. v. 29). This is all the direct information we possess about it; but from Livy's account of the expedition of Manlius, who had pitched his camp there, when he was visited by Seleneus from Amaenus, we gather some further particulars, which enable us to identify the Obrims with the Sandaki Chai. Manlius had marched direct from Sagalassus, and must have led his army through the plains of Dombai, passing in the rear of Amaenus. Thus Seleneus would easily hear of the consular being in his neighbourhood, and, running away in his deserts, was overtaken after him and overtaken him the next day (postero die). Manlius, moreover, at the sources of the Obrims required guides, because he found himself hemmed in by mountains and unable to find his way to the plain of Metropoly. All this agrees perfectly well with the supposition that the ancients Obrims was the modern Sandaki Chai (Hamilton, Researches, ii. p. 172, &c.). Franz (Fund. Inscriptiones, p. 87), on the other hand, supposes the Kodiha Chai to correspond with the Obrims. Arndell (Dioce, in Asia Min. i. p. 821), again, believes that Livy has confounded the sources of the Maryus and Masaeus with those of the Obrims.

OBRINGA. Obriga, Obriga Magna, Ptolemy (ii. 17) makes the Obringa river the boundary between Lower and Upper Germany. The most southern place in Lower Germany according to his map is Moguntiacum (Mainz), Maina. He places in the following order the cities of Upper Germany, which are south of the Obrigas:--Nocemagnum (Coburg), Sorbotecumagnum (Worms), Argentoratum (Strasbourg), and so on. Wroth (in this table) gives the name of Speyer; and the relative position of these two places is therefore wrong in Ptolemy. He has also placed
OBUCULA.

Mogontiacum in Lower Germany, but it was the chief place of Upper Germany. Ptolemy has not mentioned the Mosella (Mosel), and some geographers have assumed that it is the Otragen; but if this is so, the position of Mosella is wrong in Ptolemy, for Mosella is south of the Mosel. In便利观察 that, according to the Notit. Imp., the district of the general who resided at Mainz comprehended Antinacum or Andernach, on the Rhine, which is below the junction of the Mosel and the Rhine. If Andernach was always in the Upper German, and if the boundary between the Lower and the Upper German was fixed by the Mosel, it seems likely that the Rhine was no longer a river by which they could have been crossed, and that the two rivers were separate, as they are now, the one flowing north, the other south. The Rhine was not so likely to have been selected as the rugged valley of the Ahr, which lies between Bonn and Andernach, and separates the Netherlands or lowlands on the north from the hilly country on the south.

[O.L.]

OBUCELA (OBUCELA, Ptol. ii. 4. § 4), called by Pliny (iii. 1. s. 3) Obulica, and by Appian (Hist. 42), Obulicus, a town of the Bataves, on the road from Hispalis to Emerita and Corduba (Ital. Ant. pp. 413, 414), now Monclova. Some ruins are still visible (Carr, Ant. Hist. i. 19; Flores, Exp. S. xii. p. 362. [T. H. D.]

OBULCO (OBUULCOS, Strab. iii. pp. 141, 160; OBUULCOS, Ptol. ii. 4. § 11; OBUULCOS, Steph. B. c.v.), called by Pliny (iii. 1. s. 3) Obulo Pontificum, a Roman municipium of Hispania Baetica, in the jurisdiction of Corduba, from which it was distant about 300 stadia according to Strabo (p. 160). It had the privilege of a mint (Flores, Med. ii. p. 496, iii. p. 101; Monnet, Suppl. i. p. 11; Sestini, p. 71; Gruter, Inscr. pp. 105, 458; Marsroti, p. 1032, 4). It is commonly identified with Forclaz. [T. H. D.]

COIN OF OBULCO.

OBULENSIS (OBYLENSIS, Ptol. iii. 10. § 9), a people of Mosella Inferior, on the S. side of the mouth of the Danube. [T. H. D.]

OCALEA or OCALELIA ( Videi, Videia; Ptol. 'OCALEA, 'OCALELIA; Ptol. 'OCALEA), an ancient city of Bocotia, mentioned by Homer, situated upon a small stream of the same name, at an equal distance from Haliartus and Alalcomenes. It lay in the middle of a long narrow plain, bounded on the east by the mountain, on the west by the mountain Tifhsoemius, on the south by a range of low hills, and on the north by the lake Copais. This town was dependent upon Haliartus. The name is probably only a dialectic form of Ocaleia. Its site is indicated by several square blocks on the right bank of the stream. (Hom. II. ii. 501. Epip. Apoll. Apoll. Strab. iv. p. 410; Apollod. ii. § 11; Plin. iv. 7. s. 19; Steph. B. c. v.; Leake, Northern Greece, vol. ii. p. 205, seq.; Forchhammer, Hellensia, p. 184.)

OCEANUS SEPTENTRIONALIS.

1. The name and divisions. — According to a fragment of Phavorus the word "Oceanus is not Greek, but one borrowed from the barbarians (Sophon, de Nicophor. Blemis. Geogr. Lips. 1815, p. 23); but there seems reason for believing it to be con

2. Progress of discovery. — The enterprise of the Phoenician navigators brought them into contact with those countries, in the N. of Europe, from whence tin was brought; but it was the trade in amber which must have been most effectual in opening up a knowledge of these coasts. This trade was carried on by sea, from first by the W. W. coast, and reached the Mediterranean chiefly by sea, being brought across the intervening countries by means of barter. The Massilians, who under Pytheas followed the Phoenicians, hardly went beyond the mouth of the Weser and the Elbe. The amber islands (Gessaria or Australia) are placed by Pliny (vi. 20) in the Dutch and in the Germanic promontory in the German Ocean; and the connection with the expedition of Germanicus sufficiently shows that an island in the Baltic is not meant. Moreover the effects of the ebb and flow tides in the estuaries which throw up amber, where, according to the expression of Servius, "Mare vicio tin accedit tunc recedit," suits the coast.
between the Halder and the Climbrian peninsula; but does not suit the Baltic, in which Timaenus places the island Baltia. (Plin. xxxvii. 11.) Abilus, a day's journey from an "aeastuarium," cannot therefore be the Mors Praetoria. Pythius probably sailed to the W. shores of Jutland. Tacitus (Germ. 45), not Pliny, is the first writer acquainted with the "gissum" of the Baltic shores, in the land of the Aestuans and the Venedi. The more active, direct communication with the Samland coast of the Baltic, and with the Aestuans by means of which, through Further Russia, Pythius reached, which was opened by a Roman knight under Nero (Plin. l. c.), appears to have belonged to the later times of the Roman Caesars. The relation between the Prussian coast, and the Milian colonies on the Exzine, are shown by the evidence of fine coins, probably struck more than 400 years B.C., which have been found in the Nots district. (Humboldt, Cosmos, vol. ii. note 171, trans.) A curious story is related by Cornelius Nepos (Fragm. vii. 1, ed. Van Staveren; comp. Mela, iii. 5. § 8; Plin. ii. 67) of a king of the Boii, others say of the Suevi, having given some shipsprecked dark-coloured men to Q. Metellus Celer when he was Proconsul of Gaul. These men, who were sold Indomitus to the emperor Augustus, is to be given to the story, most probably natives of Labrador or of Greenland, who had been driven on these coasts by the effect of currents such as are known now in these seas, and violent NW. winds. [E. B. J.]

OCELIS ('Oxélaç, 'Oxélaç), a port of Arabia Felix, placed by Pliny (i. 7, § 4, l. 15. § 11, vi. 7, viii. 90. § 7) a little to the northeast of the straits of the Red Sea (Bah-el-Mandeb). Its geographical position, according to his system, was as follows: Its longest day was 14h4 hours. It was 1° east of Alexandria, between the tropics, 93° 30' removed from the summer tropic. It is placed by the author of the Periplus 300 stadia from Massa, and is identical with the modern Qal'in or Zella, which has a bay immediately within the straits, the entrance to which is two miles wide, and its depth little short of three. (Vincent, Periplus, p. 238; Forster, Arabia, vol. ii. p. 148.) Ocelis, according to the Periplus, was not so much a port as an anchorage and watering-place. It belonged to the Elisari, and was called Ocelis. (Geog. a. e. tom. i. p. 14; Procop. vi. 7. § 7.) The same author places it 1300 stadia from Arabia Felix (Aden); but the distance is two short. (Geaselin, Récherches, tom. iii. p. 9.)

OCELLODURUM, a town of the Vescacii in Hispania Tarraconensis, on the road from Emerita to Caesaraugusta (Ant. It. pp. 454, 459); variously identified with Zamares, Toro, and Formosa. [T. H. D.]

OCELUM (Οξελομ), a town of Cisalpine Gaul, mentioned by Caesar as the last place in that province ("criteria provinciae extremum," Cass. B.G. i. 10) from whence he had to fight his way through the independent tribes which held the passes of the Alps. It is generally placed, with some reason, in the town of the kingdom of Cottius towards the province of Cisalpine Gaul (Strab. iv. p. 179); and it was from thence that a much frequented road led over the pass of the Mont Genèvre by Scionomagus (Seneumus), Brigantium (Brixiassas), and Ebroodunum (Embrazas), to the territory of the Vosctui. D'Anville has clearly shown that Ocelum was at Zuma, a village in the valley of Fonseralles, and not, as supposed by previous writers, at Oaks in the valley of the Dora. (D'Anville, Notice de la Gaule, p. 500.) [E. H. B.]

OCELUM (Oxelas, Ptol. ii. 5. § 9). 1. A town of the Vettoni in Lusitania, whose name is called by Pliny (iv. 22. a. 35) Ocelenses and Luscienses. Identified by some with Calabria, by others with Formosella or Ciudad Rodrigo. (Ueltz, vol. ii. pt. 1. p. 431.) 2. A town of the Callatuci Lucenses in Gallaecia (Ptol. ii. 6. § 25.) 3. (Ocelon, Ptol. ii. 3. § 6), a promontory on the NE. coast of Britannia Romania, and of the mouth of the river Abus or Humbrum; probably Spura Head. [T. H. D.]

OCHE. [Ovho.] OCHOSBANES (Οχοσβανης or Ochthomanes), a small river of Paphlagonia, falling into the bay of Armeon, a little to the north of Sinope. (Marcian. Hist. p. 72; Anonym. Peripol. Paus. ii. 7. p. 7.) This is probably the same river which Sclavos (p. 33) calls Ochermanes. [L. S.]

OCHRAS, a place in Cappadocia. (It. Ant. p. 202.) Pliny (v. 6. § 12) mentions a place Otorga or Odoga, in the district of Chassamnisset in Cappadocia, between the river Haly and Mount Argeaus, which is probably the same name of the Antonine Itinerary. [L. S.]

OCHUS (Οξυς, Strab. xi. p. 509; Ptol. vii. §§ 3, 4; Amm. Marc. xxiii. 6), a river of Central Asia, which has been attributed to the provinces of Hyrcania and Bactriana by Strabo and Ptolemy respectively, as flowing through them. It took its rise in the NW. of the NW. of the Oxus (or Hindu-Kush), and flowed in a NW. direction through part of Bactriana towards the Caspian Sea, and parallel with the Oxus. Pliny makes it a river of Bactriana, and states that it and the Oxus flow from opposite sides of the same mountain (vi. 16. § 18). There can be no reason for doubting that it is represented by the present Tadschik, which is clear that in this part of Asia all Ptolemy's places are thrown too much to the east by an error in longitude. (Wilson, Ariano, p. 145.) [V.]

OCHUS MONS (Οξυς, Arrian, Indic. c. 38.), a mountain in Persis, mentioned by Arrian, supposed by Forbiger to be that now called Nakshila. [V.]

OCILE (Οκιλη, Appian, B. Hisp. 75), a town of Hispania Baetica, probably near Ilipa or Ilipe, besieged by the Lusitanienses, and relieved by Mumius, (Ueltz, vol. ii. pt. 1. p. 372.) [T. H. D.]

OCELIS (Οξέλης, Appian, B. Hisp. c. 47, sqq.), a town of the Celtiberi, which served the Romans as a magazine in the time of the Celtiberian war. It was probably in the SE. part of Celtiberia, and Rechard identifies it with Zamares. [T. H. D.]

OCINARUS (Οκιναρος), a river on the W. coast of Bruttium, mentioned only by Lycochroon (Ales. 732, 1009), who tells us that it flowed by the city of Terrina. It is generally supposed to be the same with the Sabatus of the Itineraries (the modern Scuseno); but its identification depends upon that of the site of Terrina, which is variously given. [T. H. B.]

OCITI (Οκιτης, Ptol. ii. 3. § 81), an island on the N. coast of Britain, and NE. from the Orkneys, probably Ronalds. [T. H. D.]

OCEA MONS (Οξας, is the name given by Strabo to the lowest part of the Julian or Carnic Alps, over which was the pass leading from the colline Aenos (Lagobac), and from thence into Panonia
and the countries on the Danube. (Strab. iv. p. 207, vii. p. 314.) The mountain meant is evidently that between Acelberg and Lagybach, which must in all ages have been the principal line of communication from the Danube and the valley of the Tisza westward into Italy.}

**Ocricum** (of *Ocrusulcia* Strab.; *Ocrusula*, Steph. B.; *Ocrusula*, Ptol.; *Ocriculum* and Ocriconianus: *Otriciulci*), a considerable town of Umbria, situated on the Via Flaminia, near the left bank of the Tiber. It was the southernmost town of Umbria and the Tiber valley 44 miles only from Rome. (*Itin. Hier. p. 613; Westphal, *Röm. Komp.* p. 145.) We learn from Livy that Ocricum was a native Umbrian city, and in B.C. 306 it appears to have separated from some of the cities of the confederacy, and concluded an alliance with Rome. (Livy ix. 41.) This is the only notice that we find of it prior to the conquest of Umbria by the Romans; but after that period it figures repeatedly in history as a munici- pal town of some importance. It was here that in B.C. 217 Fabius Maximus took the command of the army of Servilius, after the battle of the lake Trasimenum. (Id. xxii. 11.) In the Social War Ocricum suffered severely; and, according to Florus, was laid waste with fire and sword (Flor. iii. ix. § 11). In 89 B.C. it seems to have been re- covered, and in Strabo's time was a considerable and flourishing town. It is mentioned in Tacitus as the place where the army of Vespasian halted after the surrender of the Vitellian legions at Narmin (Tac. Hist. iii. 78). From its position on the Flaminian Way it is repeatedly mentioned incidentally under the name of Mithridatia. (*Itin. Hier.* Mar. xvi. 10. § 4, xxviii. 1. § 22); and it is evident that it was indebted to the same circumstance for its continued prosperity. The name is found in Pliny and Ptolemy, as well as in the Itineraries; and its municipal importance down to a late period is attested also by inscriptions, in some of which it bears the title of *splendidissima civitas Ocrici- lana*. From these combined, with the still extant remains, it is evident that it was a more considerable town than we could have inferred from the accounts of ancient writers (Plin. iii. 5. a. 9, 14 a. 19; Ptol. iii. i. § 54; *Itin. Ant.* pp. 125, 311; Gruter, *Itin. Hier.* p. 423, 8, 9; Orell. *Itin. Hier.* 3552, 3587; Marcellus, *De Rerum Arvalium* col. ii. p. 383). The site of the ancient city is distant about 2 miles from the modern village of Otricoli, in the plain nearer the Tiber. The ruins of ancient edifices are, in their present state, of but little interest; but exca- vations which were carried on upon the spot in 1780 brought to light the remains of several public buildings on a splendid scale, the plan and arrangement of which could be traced with little difficulty; among these were a Basilica, a theatre, an amphitheatre, Thermae, and several temples, be- sides other buildings, of which the purpose could not be determined. The beauty of some of the architectural decorations and works of art discovered on this occasion (especially the celebrated mosaic floor of the so-called temple of Jupiter in the same museum) prove that Ocricum must have been a municipal town of no ordinary splendour. (Westphal, *Römische Kompagnie* p. 144; Guattani, *Monumenti Inediti*, 1784, where the results of the excavation are described in detail and accompanied with a plan of the ancient remains.) Its prosperity in the Roman period caused it to be re- sorted to by wealthy nobles from the city; and as early as the time of Cicero we learn that Milo had a villa there. (*Cic. pro Mil. 24.*) The period of the destruction of the ancient city is uncertain. In A.D. 415 it witnessed a great defeat of Herulians, and the city was occupied by them for a considerable time (Hist. Franc. 3. 30, 32), and it is mentioned as an episcopal see after the fall of the Western Empire. But the circumstances that led the inhabitants to migrate to the modern village of Otricoli, on a hill overlooking the Tiber, are not recorded. The corruption of the name appears to have commenced at an early date, and the name Otricoli or Otriculci has been misapplied in many MSS. of the classical authors. (E. H. B.)

**Ocrinum** (of *Dannonum*). O**crutopitarum** (*Ocrutopitarum Episcopii*, Ptol. ii. 3. § 3), a very prominent headland above the estuary of the Sabrina, or Severa, on the W. coast of Britain, now St. David's Head. (T. H. D.)

**Octodurus** (Martinsach, or Martinsburg, as the French call it), is in the Swiss canton of Wallis or Walser, on the left bank of the Rhone, near the bend where the river takes a northern course to the lake of Geneva. *The Druses*, one branch of which rises at the foot of the Great St. Bernard, joins the left bank of the Rhone at Martinsburg. The road over the Alps from Martinsburg ascends the valley of the Rhone to the Ammon, and the valley of the Alpse Pennina, or Great St. Bernard. This pass has been used from a time older than any historical records. When Caesar was in Gallia (B.C. 57—56) he sent Servius Galba with the twelfth legion and some cavalry into the country of the Nantuates, Verargi, and Seduni. His purpose in sending this force was to cut down the king of the Nantuates, pass of the Great St. Bernard, “by which road the mer- cenaries had been used to travel at great risk, and with the payment of great tolls.” (B. G. iii. 1.) The people of the Alps allowed the Italian merchants to pass, because if they plundered them the merchants would not come; but they got as much out of them as they could. Galba, after taking many strong places, and receiving the submission of the people, sent off two cohorts into the country of the Nantuates, and with the remaining cohorts de- termined to winter “in a town of the Verargi named Octodurus, which town being situated in a valley with no great extent of level ground near it, is con- fined on all sides by lofty mountains. There is at some level ground at Martinsburg, and the valley of the Rhone at this part is not very narrow. Caesar says that the town of Octodurus was divided into parts by a river, but he does not mention the river's name. It is the Druses. Galba gave one part of the town to the Galli to winter in, and assigned the other to his troops. He fortified himself with a ditch and rampart, and thought he was safe. He was, however, suddenly attacked by the Galli before his defences were complete or all his supplies were brought into the camp. The Romans obstinately defended themselves in a six hours' flight; when, seeing that they could no longer keep the enemy out, they made a sortie, which was successful. The men of the 10th cohort, of the 10,000, and Caesar says that more than a third part were destroyed. The slaughter of the enemy was pro- digious, which has been made an objection to Cae- sar's veracity, or to Galba's, who made his report to the commander. It has also been objected that the valley is not wide enough at Martinsburg to hold the 30,000 men. There may be error in the number that attacked, and also in the number who perished.
TOGES.

But it is not difficult to answer some of the objections made to Caesar's narrative of this fight. Rosch has answered the criticism of General Warnery, who, like many other Caesar's critics, began his work by misunderstanding the author. (Rosch, Commentarii die Caesaris, p. 120, Halle, 1783.) After this escape Galba prudently withdrew his troops, and marching through the country of the Nantuates reached the land of the Allobroges, where he wintered.

The position of Octodurus is determined by Caesar's narrative and by the Antonine Itin. and the Table. Pliny (iii. c. 30) says that the Octodurenses received the Latins (Latii donati). In the Notit. Prov. the place is called "Civitas Vallesianum Octodurum." The modern names Wallis and Valais are formed from the word Vallesium. At a later period it was called Forum Claudii Vallesianum Octodurum, as an inscription shows. One of the remarkable inscriptions in the same district is at Martyngul. Many coins, and other memorials of the Roman time, have been found about the place.

The name Octodur is manifestly Celtic. The second part of the name is Dur, "water." The first part, probably some corrupt form, is not explained.

The distances on the Roman road from Augusta Praetoria (Aosta) in Italy to Octodurum are stated in Vol. i. p. 110.

G. L.

OCTOGESA, a town of the Dergetae, in Hispinae Tarraconensium, seated on the river Iberus (Caes. B. C. L II. 61). It is identified by some with Mosessianus; but Uberti (vol. ii. pt. 1. p. 453) seeks it to the S. of the Scoris (or Seria), in the neighborhood of Grossis (Givry). (Grunzewicz, 1832.)

OCTOPOOLUS. 1. A place belonging to the Lyncestae, in Macedonia, to which the consul Sulpicius moved his camp in the campaign of B. C. 200, against king Philip. (Lit. xxxi. 36; comp. Cartha, Vol. i. p. 562, a.)

2. A place in Parnassus, from which Persius has been universally supposed, but which was afterwards occupied by the conuls Q. Marcus Philippus, in his daring march over the mountain ridge of Olympus, B.C. 169. (Lit. xiv. 3.) It was probably near the place of the Titaneia or Elassonomiako, from Mt. Olympus into the valley of Elassonos. (Leake, Northern Greece, vol. iii. pp. 208, 310, 417.)

[E. B. J.]

ODOMUS. [ODEMSA.]

ODOMANTIS (O'odemus), Herod. vii. 112; Thuc. ii. 101, v. 6; Steph. B. s. v.; Odomantes, Plin. iv. 18), a Paonian tribe, who occupied the district, called after them, ODOMANTICUS (O'odemus, Thuc. iii. 13. § 31; Liv. xiv. 4; "Oodemus, Steph. B.") This tribe were settled upon the whole of the great mountain of Oodesmos, extending along the NE. of the lower Stryanic plain, from about Molaios and Demeterias to Zithuna inclusive, where they bordered on Pangaen, the gold and silver mines of which they worked with the Piers and Saimos. (Herod. v. c.) Secure in their inaccessible position, they defied Megabazus. (Herod. v. 16.) The NW. portion of their territory lay to the north of Sitalos as he crossed Mt. Cercine; and their general situation agrees with the description of Thucydes (ii. 101), according to whom they dwelt beyond the Stryan to the N., that is to say, to the N. of the Lower Stryan, where, alone, the river takes such a course to the E. as to justify the expression. Cleom invaded Polles, their chieftain, to join him with as many Thracian mercenaries as could be levied. (Thuc. v. 6; Aristoph. Acharn. 156, 164; Suid. s. a. e. wofesplaet: Leake, Northern Greece, vol. iii. pp. 210, 306, 465.)

ODOMANTIS. [SOPHREN.]

ODEMSA (O'démsa), a people seated on both banks of the Articus, a river of Thracia, which discharges itself into the Hellespont. (Herod. iv. 92.) Their territory, however, must undoubtedly have extended considerably to the W. of the Articus; since Pliny (iv. 18) informs us that the Hebrus had its source in their country; a fact that is corroborated by Ammianus Marcellinus (xvi. 4, 10). They appear to have belonged to that northern swarm of barbarians who invaded Greece after the Trojan War; and their names are often found interwoven in the ancient myths. Thus the Thracian singer Thamyris is said to have been an Odrysian (Paus. iii. 33. § 4); and Orpheus is represented as their king. (Conon, ap. Phot. p. 140.)

A rude and barbarous people like the Odrysians.
cannot be expected to have had many towns; and in fact we find none mentioned either by Thucydides or Xenophon. The first of their towns recorded is Philipopolis, founded by Philip II. of Macedon, as there will be occasion to relate in the sequel; and it may be presumed that all their towns of any importance were built after they had lost their independence.

The name of the O dysae first occurs in history in connection with the expedition of Darius Hystaspis against the Scythsians. (Herod. i. c.) With the Persians, the southern parts of Thrace, the O dysaeans, protected by their mountainous situation, retained their independence; and the strength which they thus acquired enabled Teres to incorporate many Thracian tribes with his subjects. He extended his kingdom to the Euxine in spite of a signal defeat which he sustained in that quarter from the Thyni (Xen. Anal. vii. 2. § 52); and the dominion of his son Sitakos embraced the greater part of Thrace; having been bounded on the N. by the Danube, and extending from Abdera on the W. to the Euxine on the E. (Thucyd. ii. 96—98.) Indeed, so powerful was this monarch that his alliance was eagerly courted both by the Athenians and Lacedaemonians at the breaking out of the Persian war. (Thucyd. i. 137; Aristoph. Acharn. 136—150.) The expulsion which he undertook in B.C. 429, at the instance of the Athenians, and of Amyntas, pretender to the throne of Macedonia, against Perdiccas II., the reigning sovereign of that country, is also a striking proof of the power of the O dysaeans at that period; as the army which Sitakos assembled on that occasion, consisted, according to the most liberal estimate, of 150,000 men, of which one-third were cavalry. (Thuc. ii. 98; Diod. xii. 50.) For the latter force, indeed, the O dysaeans were renowned, and the extensive plains of the Hebrus afforded pasture for an excellent breed of horses. (Thuc. i. c.; Polyb. xxiv. 6; Liv. xiv. 42.) With this army Sitakos overthrew Amyntas, and Macedonia, but the non-appearance of the Athenian contingent, coupled with the approach of winter, obliged him hastily to retire after a month's campaign. In B.C. 424 Sitakos fell in an engagement with the Triballii, and was succeeded by his nephew Seuthes I. Under his reign the O dysaeans attained the highest pitch of their power and prosperity. Their yearly revenue amounted to 400 talents, besides an equal sum in the shape of presents and contributions. (Thuc. ii. 97, iv. 101.) But from this period the power of the O dysaeans began sensibly to wane. After the death of Seuthes we find his dominions divided among three sovereigns. Medocus, or Amadocus, who was most probably his son, ruled the ancient seat of the monarchy; Masesades, brother of Medocus, reigned over the Thyrii, Melanditae, and Tranipae; whilst the region above Byzantium called the Delta was governed by Teres. (Xen. Anal. vii. 2. § 32, viii. 5. § 1.) It was in the reign of Medocus that Xenophon and the Ten Thousand passed through Thrace on their return from Asia, and Scopas, the Lacedaemonian, and helped to restore Seuthes, son of the exiled Masesades, to his dominions. We gather from this writer that Seuthes exercised only a subordinate power under Medocus, with the title of Archon, or governor, of the Coast (vii. 3. § 16). Subsequently, however, he appears to have asserted his claim to an independent sovereignty, and to have waged open war with Medocus, till they were reconciled and gained over to the Athenian alliance by Thrasybulus. (Xen. Hell. iv. 8. § 25; Diod. xiv. 94.) When we next hear of the O dysaeans, we find them engaged in hostilities with the Athenians respecting the Thracian Chersonese. This was under their king Cotys I., who reigned from B.C. 382 to 353. It was in the reign of the same monarch (B.C. 376) that the Triballii invaded their territories, and penetrated as far as Abdera. (Diod. xvi. 36.) When Cersebiotes, the son and successor of Cotys, ascended the throne, the O dysaeans appear to have still retained possessions in the country as far as the coast of the Euxine. But a civil war soon broke out between that monarch and Berisades and Amadocus, who were probably his brothers, and to whom Cotys had left some portions of his kingdom. The Athenians availed themselves of these dissensions to gain possession of the Chersonese, which appears to have been finally ceded to them in B.C. 357. (Diod. xvi. 34.) But a much more fatal blow to the power of the O dysaeans was struck by Philip II. of Macedonia. After nine or ten years of warfare, Philip at last succeeded (B.C. 343) in conquering them, and reducing them to the condition of tributaries. (Diod. xvi. 71.; Dem. de Cher. p. 105.) The end of the war of the O dysaeans with the Athenians cannot be ascertained; but that their subjugation must have been complete appears from the fact of his having founded colonies in their territory, especially Philipopolis, on the right bank of the Hebrus, and in the very heart of their ancient seat. Their subjection is further shown by the circumstance of their cavalry being mentioned as serving in the campaign of 321 B.C. (Arrian, iii. 12. § 4.) But a still more decisive proof is, that after Alexander's lieutenant Zopyrophiadas had been defeated by the Getae, the O dysaeans were incited by their king, Seuthes III., to rebel against the Macedonians. (Curt. x. 1. § 45; Justin, xii. 1.) After the death of Alexander, Seuthes took the field against Lyaeus, to whom Thrace had devolved, with an army of 20,000 foot and 8000 horse,—a sad falling off from the forces formerly arrayed by Sitakos. (Diod. xviii. 14.; Paus. i. 9. § 6.) The struggle with Lyonsachus was carried on with varied success. Under Philip V. of Macedonia, the O dysaeans were still in a state of revolt. In B.C. 211 this monarch, having raised and equipped a large army, marched toward Byzantium, but in reality to overawe the insubordinate chieftains of Thrace. (Livy. xxxiv. 35.) In 183 we find Philip undertaking an expedition against the O dysaeans, Denteleetas, and Bessi. He succeeded in taking Philipopolis, which the inhabitants deserted at his approach, and where he established a garrison, which was expelled shortly after his departure. (Livy. xxxiv. 55.; Polyb. Ex. Leg. xlvii.) It may be assumed from Livy that on this occasion the O dysaeans were supported in their revolt by the Romans (xlii. 19, xlv. 42.) After the fall of the Macedonian kingdom, the O dysaeans appear to have been treated with consideration by the Romans, and engaged in an insurrection against the newly-conquered districts, as well as against the other Thracian tribes; amongst whom the Bessi had now raised themselves to some importance. After this period the history of the O dysaeans is for some time involved in obscurity, though they were doubtless gradually falling more and more under the Roman dominion. In the year
ODYSSEAE.

n. c. 42 their king Sadæs, who had no children, bequeathed his kingdom to the Romans, and possession was taken of it by Brutus. (Cas. B. C. iii. 4; Dion Cass. xlvii. 25; Lucan, v. 54.)

Augustus seems to have left the Odrysians the appearance of independence. In the year n. c. 29, in return for the friendly disposition which they had shown towards the Romans, they were presented by M. Aurélius with the right of exemption from the payment of Baccus, which he had conquered from the Bessi (Dion Cass. li. 25). In the year n. c. 20, Rohe-matalces, who was administering the kingdom as guardian of the three infant sons of the deposed monarch Cotys IV., succeeded, with the assistance of the Romans under M. Lollius, in reducing the Bessi (Iud. liv. 20). A few years afterwards, the Bessi again rose under their leader Volosegaes, a priest of Baccus, and drove Rohe-matalces into the Chersonese; they were, however, soon reduced to submission by Lucius Piso; Rohe-matalces was restored; and it would appear, from Tacitus, that under his reign the Odrysians acquired the dominion of all Thrace (Dion Cass. liv. 94; Tac. Ann. ii. 64). The Bessi were thus in an independent condition on the Romans, by whose influence they were governed. Thus, after the death of Rohe-matalces, we find Augustus dividing his kingdom between his son Cotys and his brother Rhac Esropia (Tac. L.; Vell. Pat. ii. 99): Again, after the murder of Cotys by Rhac Esropia, Tiburtius partitioned the kingdom between the children of Cotys and his brother; the title of Rhac Esropia, at the same time appointing a Roman, Trebellius Rufus, as guardian of the former, who were not of age (Tac. Ann. ii. 67, iii. 38). But, in spite of their subjection, the spirit of the Odrysians was not subdued. Two years after the event just recorded, they rose, in conjunction with the Comela, against the Romans, as well as against their own king Cotys, whom they besieged in Philippopolis. This rebellion, which was undertaken by leaders of little distinction, and conducted without concert, was soon quelled by P. Velleius (Tac. Ann. ii. 39). A more formidable one took place a.d. 26, which Tacitus ascribes to the unwillingness of the Thracian tribes to supply the Roman army with recruits, and to the interference of the people. It occasioned the Romans some trouble, and Poppaeus Sabinus was rewarded with the triumphal insignia for his services in suppressing it (I. a. iv. 46—51). At length, under the reign of Vespasian, the Odrysians were finally deprived of their independence, and incorporated with the other provinces of the Roman empire (Suet. Vesp. 8; Eutrop. vii. 19).

In the preceding sketch those circumstances only have been selected which illustrate the history of the Odrysians as a people, without entering into the personal history of their monarchs. The following is a list of the dynasty; an account of the different kings who compose it will be found in the Dict. of Biog. and Anat. under the several names. The names of the Odrysians partook of that wildness and ferocity which was common to all the Thracian tribes, and which made their name a by-word among the Greeks and Romans; but the horrible picture drawn of them by Ammianus Marcellinus (xxvii. 4. § 9) is probably overcharged. Like most other barbarous nations of the north, they were addicted to intoxication, and their long drinking bouts were enlivened by wild and barbarous music. (Xen. Anab. vii. 3, § 32.) Hence it is characteristic that it was considered a mark of the highest distinction to be the personal companion of the king; but whoever enjoyed this honour was expected not only to drink to the king, but also to make him a present (Ib. 16, seq.) Among such a people, we are not surprised to find that Dionysus seems to have been the deity most worshipped. They had a custom of buying their wives from their parents, which Herodotus (v. 6) represents as prevailing among all the Thracians.

[7. B. D.]

ODEYSUS. [HADRIANOPOLIS.]

ODYSSEIA (Ὀδύσσεια, Strab. iii. pp. 149, 157; Οδύσσεια, Steph. B. s. v.), a town of Haspa Baccoidea, lying N. of Abdera, and, according to tradition, built by Ulysses, together with a temple to Athena. By Solinus (c. 32) and others it has been absurdly identified with the ancient Odesa, but its situation, and even its existence, are altogether uncertain. [T. H. D.]

OEA (Pomp. Mela, i. 7 § 5; Oesiae civitates, Plin. v. 4; Tac. Hist. iv. 50; Solin. 27; Amm. Mar. xxvii. 6; Όηα, Ptol. iv. 3. § 12), a town in the district of the Syrtci, which, with Leptis Magna, and Sabrata, formed the African Tripolitania. Although the town had been a fine and flourishing Carthaginian factory here yet, from the silence of Scylax and Strabo, the foundation of the Roman colony ("Oea colonia," Ísia. Anton.) must be assigned to the middle of the first century after Christ. It flourished under the Romans until the fourth century, when it was greatly injured by the Libyan Ausariani. (Amm. Mar. L. c.) At the Saracen invasion it would seem they were carried up on the ruins of Oea, which assumed the Roman name of the districts—the modern Tripoli. Thribda, the Moors' name of the town, is merely the same word articulated through the medium of Arab pronunciation. At Tripoli there is a very perfect marble triumphal arch dedicated to M. Aurelius Antoninus and L. Aurelius Julianus, which could be found only by a very accurate figure in Captain Lyons' Travels in N. Africa, p. 18. Many other Roman remains have been found here, especially glass urns, some of which have been sent to England.

For some time it was thought that a coin of Antoninus, with the "epigraph" col. avx. oe. c., was to be referred to this town. (Eckhel, vol. iv. p. 131.) Its right to claim this is now contested. (Duchalais, Restitution à Obea de Périgord, à Jérusalem et aux Carth. Occ. de la Haute Air de trois Monnaies Colonies attribuées à Oea, Revue Numismatique, 1849, pp. 97—103; Beechey, Exped. to the Coast of Africa, pp. 24—32; Barth, Wanderungen, pp. 294, 295, 391.)

[6. E. V.]

OEA (Oea, Off. 1). A town in Aegina. [Vol. L. p. 34, sq.]

2. A town in Thrace. [THERA].

OEANTHEIA or OEANTHE (Οἰανθεία, Hel. lan. ap. Steph. B., Ptol. iv. 3. s. 4; Eobritis, Sev. Plut. 13. § 3; Eobritis: Galanákhi), an important town of the Locris, situated at the western entrance of the Crissaean gulf. Polybius says that it is opposite to Aegina in Achaea (iv. 57, comp. v. 17), which agrees with
the situation of Galaxidai. The Oesantiae (Olaxidai) are mentioned among the Locri Osolae by Thucydides (iii. 101). Scylax calls the town Eunaxthe; and since Strabo says (vi. p. 259) that Locri Epizephyrii in Italy was founded by the Locri Osolae, under a leader named Eunaxthe, it has been conjectured that Oesantia or Eunaxthia was the place where the emigrants embarked. Oesantia appears to have been a small town in the hinterland of Locri, remaining in the time of Pausanias, with the exception of Naupactus. The only objects at Oesantia mentioned by Pausanias were a temple of Aphrodite, and one of Artemis, situated in a grove above the town (a. 88. § 9). The town is mentioned in the Tab. Peut. as situated 30 miles from Naupactus and 13 from Ambyra. The remains of antiquity at Galaxidai are very few. There are some ruins of Hellenic walls; and an inscription of no importance has been discovered there. (Bückh, Inscr. No. 1764.) The modern town is inhabited by a active seafaring population, who possessed 180 ships when Ulrich visited the place in 1837. (G. R.)

OEASO. OESSO (Olaxidai, Strab. iii. p. 16; Olaxidai, Potl. ii. 6. § 10), erroneously written Olaros by Pliny (iii. 3. 4, iv. 20. 34), was a maritime town of the Vassones in Hispasia Tartaracena, near the prominence of the same name, and on the river Magvada (Melis, iii. 1), most probably Olympia or Vicina, near the island of Melos, which is now an Inscr. we find it written Oesanoa. (Grut. p. 718; Oeschnart, Not. Facc. ii. 8; Floros, Esp. 5. xxiv. pp. 15, 62, and xxvii. p. 147.) [T. H. D.]

OESSO (Olaxidai, Potl. ii. 6. § 10, ii. 7. § 2), a promontory of Hispania Tartaracena, in the territory of the Vassones, formed by the N. extremity of hispanacena, now by the mouth of the river Areus. [E. H. D.]

OECATHA (Olyxidai: Ekh. Olyxidai), the name of several ancient towns in Greece. 1. In Messenia, in the plain of Stenyeri, it was. In ruins in the time of Epaminondas (Paus. iv. 26. § 6), and its position was a matter of dispute in later times. Strabo identified it with Andania, the ancient Messinian town, and the Messenian king (vii. pp. 359, 350, 360, x. p. 448), and Pausanias, who visited it, states that it was only 8 stages distant from Andania, and upon the river Charadraus. (Paus. iv. 2. § 2, iv. 33. § 4.) Carnamou, in the time of Pausanias, was the name given to a grove of cypresses, in which were statues of Apollo Carneus, of Hermes Criophoros, and of Penepephos. It was here that the mystic rites of the great goddesses were celebrated, and that the urn was preserved containing the bones of Eurytus, the son of Melanias. (Paus. vi. 33. §§ 4, 5.)

2. In Ecuba, in the district of Etruria. (Hecat. ap. Paus. iv. 2. § 3; Soph. Trach. 74; Strab. x. p. 458, x. p. 448; Step. B. v. e.)

3. In Thessaly, on the Peneus, between Pelinna and Thessalos, not far from Ithome. (Strab. viii. pp. 359, 350, ix. p. 438, x. p. 448; Paus. iv. 2. § 3; Step. B. v. e.)

4. In the territory of Trachis. (Strab. viii. p. 339, x. p. 448; Step. B. v. e.)

5. In Aetolia. (Strab. x. p. 448.) Each of these cities was considered by the respective inhabitants as the birthplace of the celebrated Eurytus, who was conquered by Hercules, and the capture of whose city was the subject of an epic poem called Olyxidai, which was ascribed to Homer or Crexypheus. Hence among the early poets there was a difference of statement upon the subject. The Messenian Echeleana was called the city of Eurytus in the Iliad (ii. 596) and the Odyssey (xx. 13), and this statement was followed by Pherecrates (ap. Schol. ad Soph. Trach. 354) and Pausanias (iv. 2. § 3). The Eubeoan city was selected by the writer of the poem on the Capture of Oesantia (Schol. op. Soph. l. c.), by Hecataeus (ap. Paus. i. l. c.), and by Strabo (c. 448). The Thessalian city is mentioned in the middle residence of Eurytus in another passage of the Iliad (ii. 730); and K. O. Miller supposes that this was the city of the original fable. (Dorfani, vol. i. p. 426, seq., transl.)

OECHEARDES (Olyxidai, Potl. vi. 16. §§ 3, 4), a river of Seres, the sources of which Pтолemy (l. c.) places in the Aenacida, near Assiria, and sacred to the E. of Pamir, the structure of which has been inferred from the direction of its water-courses. The Oechardes may be considered to represent the river formed by the union of the streams of Khotan, Yarkand, Kaukchur, and Uski, and which flows close to the hills at the base of Thanes-Schanda. In Homer, Schamelaides (Olaxidai, Potl. vi. 16. § 4) deriving their name from the river must be assigned to this district. [S. W.]

OEDANES. [DTACANTHES.]

OENIZANDA. [OENAANDA.]

OENNEON (Olaxidai), a town of the Locri Osolae, near Naupactus, now near Apeiron, and a sacred enclosure of the Nemean Zeus, where Hesiod was said to have been killed. It was from this place that Demosthenes set out on his expedition into Aetolia, in n. c. 436, and to which he returned with the remnant of his forces. Leake supposes that the territory of Oenone was separated from that of Naupactus, by the river Moreo, and that Oenone perhaps stood at Moreo, or near the fountain of Moreomus. (Thuc. iii. 95. seq.; Step. B. v. e.; Leake, Northern Greece, vol. ii. p. 616.)

OENEUSS (Olaxidai), a river of Pamonia, a tributary of the Savus (Potl. ii. 17. § 2). In the Peuting. Table it is called Index, and now bears the name of places in the district of Trixy (l. c.)

OENIADAE 1. Olaxidai, Thuc. et alii; Olaxidai, Step. B. v. e.: Ekh. Olaxidai: Trixarbaide, a town in Acarnania, situated on the W. bank of the Achelous, about 10 miles from its mouth. It was one of the most important of the Acarnanian towns, being strongly fortified both by nature and by art, and commanding the whole of the south of Acarnania. It was to it the troops marched, many of them of great extent and depth, which rendered it im- accessible in the winter to an invading force. Its territory appears to have extended on both sides of the Achelous, and to have consisted of the district called Paracheloslis, which was very fertile. It seems to have derived its name from the mythical Oenus, the great Aetolian hero. The town is first mentioned about 1200 B.C. by the Messenians, who had been settled at Naupactus by the Athenians at the end of the Third Messenian War (455), shortly afterwards made an expedition against Oenian,
which they took; but after holding it for a year, they were attacked by the Arcadians and compelled to abandon the town. (Paus. iv. 25.) Oeniadas is represented at that time as an enemy of Athens, which is said to have been one of the reasons that induced the Messenians to attack the place. Twenty-three years before the Peloponnesian War (A.D. 454) Pericles laid siege to the town, but was unable to take it. (Thuc. i. 111; Diod. xii. 85.) In the Peloponnesian War, Oeniadas still continued opposed to Athens, and was held by the Arcadians in the town, with the exception of Astacus, which sided with the Lacedaemonians. In the third year of the war (429) Phormion made an expedition into Acarnania to secure the Athenian ascendency; but though he took Astacus, he did not continue to march against Oeniadas, because it was the winter, at which season the marshes secured the town from all attack. In the following year (428) his son Aesopus sailed up the Acheron, and ravaged the territory of Oeniadas; but it was not till 424 that Demosthenes, assisted by all the other Arcadians, compelled the town to join the Athenian alliance. (Thuc. ii. 102, iii. 7, iv. 77.) It continued to be of great importance during the Macedonian and Roman times. The name of the Acheron is more ancient than the Great, the Aeolians, who had extended their dominions on the W. bank of the Acheron, succeeded in obtaining possession of Oeniadas, and expelled its inhabitants in so cruel a manner that they were threatened with the vengeance of Alexander. (Diod. xvii. 8.) Oeniadas remained in the hands of the Aeolians till 219, when it was taken by Philip, king of Macedon, the successor of the King of the Molossians. The importance of the place, strongly fortified the citadel, and commenced uniting the harbour and the arsenal with the citadel by means of walls. (Polib. iv. 63.) In 211 Oeniadas, together with the adjacent Neare (Niese) or Naumae, was taken by the Romans, under M. Valerius Laevinus, and given to the Aeolians, who were the first to hold it; but in 209 it was restored to the Acarnanians by virtue of one of the conditions of the peace made between the Romans and Acarnians in that year. (Pol. ix. 39; Liv. xxvi. 24; Polib. xxii. 15; Liv. xxxviii. 11.) From this period Oeniadas disappears from history; but it continued to exist in the time of Strabo (a. p. 459).

The exact site of Oeniadas was at matter of dispute. Dodwell and Gell supposed the ruins on the eastern side of the Acheron to represent Oeniadas; but these ruins are those of Pleuron. [PLEBON.] The true position of Oeniadas has now been fixed with certainty by Leake, and his account has been confirmed by Mure, who has since visited the spot. Its ruins are found at the modern Tzichakidas, on the W. bank of the Acheron, and are surrounded by morasses on every side. To the N. these swamps deepen into a reedy marsh or lake, now called Lesmik or Kotokhi, and by the ancients Melite. In this lake is a small island, probably the same as the Nasoe mentioned above. Thucydides is not quite correct in his statement (II. 102) that the Acheron received the stream from the island near by the Acheron alone; he appears to take no notice of the lake of Melite, which afforded a much greater protection to the city than the Acheron, and which has no connection with this river. The city occupied an extensive inundated hill, from the southern extremity of which there stretches out a long slope in the direction of the Acheron, connecting the hill with the plain. The entire circuit of the fortifications still exists, and cannot be much less than three miles. The walls, which are chiefly of polygonal construction, are in an excellent state of preservation, often to a height of from 10 to 12 feet. Towards the N. the city was the port, communicating with the sea by a deep river or creek running up through the contiguous marsh to Petalos on the coast.

Leake discovered the ruins of a theatre, which stood near the middle of the city; but the most interesting remains in the place are its archd gateways or sallies and, as a larger archd gateway leading from the port to the city, the archd gateways appear to be of great antiquity, and prove that the arch was known in Greece at a much earlier period than is usually supposed. Drawings of several of these gateways are given by Mure. (Leake, Northern Greece, vol. iii. p. 556, seq.; Mure, Journal of a Tour in Greece, vol. i. p. 106, seq.; see also, respecting the arches at Oeniadas, Leake, Peloponnesica, p. 121.)

Strabo (x. p. 450) speaks of a town called Old Oeni (ἡ ολίγη Οινεία), which was deserted in his time, and which he describes as midway between Stratus and the sea. New Oeni (ἡ νεότερη Οινεία), which he places 70 stadia above the mouth of the Acheron, was destroyed by the Cymeans, who called it Old Oeni, the inhabitants of the place, strongly fortified the citadel, and commenced uniting the harbour and the arsenal with the citadel by means of walls. (Steph. B. s. v. Olenodras; Strab. x. p. 460; Leake, Northern Greece, vol. iii. p. 524, seq.)

2. A city of Thessaly, in the district Oetaca. (Strab. ix. p. 434; Steph. B. s. v.)

COIN OF OENIADAES.

OENIUS (Oineus), also called Oinoeid (Oinōn), Arrrian, Periplus Pont. Erc. p. 18, a small river of Pontus, emptying itself into the Evaxian, 30 stadia east of the mouth of the Theria. (Anonym. Periplus Pont. Erc. p. 11.)

OENOANDA (Oionandia), a town in the extreme west of Phialis, belonging to the territory of Cibyra, with which and Babura and Babun it formed a tetrapolis, a political confederacy in which each town had one vote, while Cibyra had two. (Strab. viii. p. 631; Steph. B. s. v.; Liv. xxxviii. 37; Piso. v. 28; comp. CIBYRA.) The town is mentioned as late, as the time of Hierocles, who, however (p. 685), calls it by the corrupt name of Enoanda. [L. S.]

* The MSS. of Strabo have Alawia, which Leake was the first to point out, and must be changed into Olenion. Kranz, the latest editor of Strabo, has inserted Leake's correction in the text.
OENOBARAS. (Oleodaphos or Olenodaphos), a river of the plain of Antioch, in Syria, at which, according to Strabo (xvi. p. 751), Polyxeni Philo-lemus, having conquered Alexander Balas in battle, died of his wounds. It has been identified with the Uppheus, modern Apheas, which, rising in the roots of Amannus Mons (Ammadosyges), runs southward through the plain of Cymhestica, until it falls into the small lake, which receives also the Lake of Bani which, their united waters run westward to join the Orontes coming from the south. The Oenoparas is the easternmost of the three streams. It is unquestionably the Afiras of Abulfeda. (Tabula Syr., Supplements, p. 152, ed. Kochler; Cheyne, Ex- peditions, vol. i. pp. 407, 423.)

OENOE (Oleos). 1. A small town on the north-west coast of the island of Sicily. (Strab. xiv. p. 639; Steph. B. s. v.; Athen. i. p. 80.) This town was probably situated in the fertile plain below the modern Messana. The name of the town seems to be derived from the wine grown in its neighbourhood on the slopes of Mount Frumus, though others believe that the Icarians Oeneus was a colony of the Aetolian town of the same name. (Comp. Ross, Reises auf den Griech. Inseln, ii. pp. 159, 162.)

2. A port-town on the coast of Pontus, at the mouth of the river Oeneus, which still bears its ancient name of Oenos under the corrupt form Uesik. (Arius, Perip. Pont. Exs. p. 16; Anonymus, Perip. p. 11; comp. Hamilton, Researches, i. p. 271.)

3. A very ancient name of the island of Sicily in general. (Sicelus.)

Or Eriki (Oreos, Steph. B. s. v.), a small town in the Argia, west of Argos, on the left bank of the river Charadrus, and on the southern (the Prius) of the two roads leading from Argos to Mantinea. Above the town was the mountain Artemision (Melioe), with a temple of Artemis on the summit, worshipped by the inhabitants of Oeneus under the name of Oeneia. The town was named by Dionysus after his grandfather Oeneus, who died here. In the neighbourhood of this town the Athenians and Argives gained a victory over the Lacedaemonians. (Paus. ii. 15 § 2, 15 § 10; Apollod. i. 8 § 6; Steph. B. s. v.) Leake originally placed Oenoe near the left bank of the Charadrus; but in his later work he has changed his opinion, and supposes it to have stood near the right bank of the Inachus. His original supposition, however, seems to be the correct one; since there can be little doubt that Ross has rightly described the course of the two roads leading from Argos to Mantinea. (Leake, Morea, vol. ii. p. 413; Polemon. p. 266; Ross, Reises in Pelopon. pp. 135.)

Or Bocnica, a town of Elis, near the Homeric Ephyra. (Strab. viii. p. 338.) [Vol. I. p. 839, b.]

OENOLADON (Oenolados, Statstum. § 96), a river in the district of the African Syrtes, near the town of Amara (Apameia, Stat. Syr. i. c), where there was a tower and a cove. Barth (Wanderweg, pp. 300, 389) refers it to the Wady Medf, where there is a valley with a stream of sweet water in the sandy waste; and Müller, in his map to illustrate the Oenol-Describer (Tab. de Geogr. Graec. Mixt. Par. 1855), places Amarae at Ras-al-Hamah, where Admiral Smyth (Mediterranea, p. 456) marks cove ruins, and Admiral Beechey (Exped. to N. Coast of Africa, p. 72) the ruins of several baths with tessellated pavements, to the W. of which there is a stream flowing from the Wady Medf. [E. B. J.] OENOLAIDIA or OENONYAIA. [ASSYRIA.]

OENOPHTYTA (Oenopteras) is a city of Boeotia, where the Athenians under Myronides gained a signal victory over the Boeotians in B.C. 456. As this victory was followed by the destruction of Tanagra, there can be little doubt that it was in the territory of the latter city, not far from the frontier of Attica. Its name, moreover, shows that it was the place where the wine was chiefly produced, for which the territory of Tanagra was celebrated. Leake therefore places it at Issa (written Oiba, perhaps a corruption of Oívofon), which stands in a commanding position near the left bank of the Asopus, between Tanagra and Oropus. (Thuc. i. 108, iv. 95; Leake, Northern Greece, vol. ii. p. 450.)

OEONITRIA (Oionotria), was the same name by the Greeks in very early times to the southernmost portion of Italy. That country was inhabited at the period when the Greeks first became acquainted with it, and began to colonise its shores, by a people whom they called Oenotri or Oenothri (Oionotri or Oívofon). Whether the appellation was a name given to the country even known to the ancient writers, or whether, as it seems to us, we have no means of judging; but the Greek writers mention several other tribes in the same part of Italy, by the names of Chones, Morgetes, and Itali, all of whom he regarded as of the same race with the Oenotrians; the two former being expressly called Oenotrian tribes, while the name of Italy, according to his account generally received, applied to the Oenotrians in general. Antiochus of Syracuse distinctly spoke of the Oenotri and Italy as the same people (op. cit. vi. p. 254), and defined the boundaries of Oenotria (under which name he included the country subsequently known as Lucania and Bruttium exclusive of Iapygia) as identical with those of Italy. It is therefore probable that the name of Oenotria adopted by Virgil, represented the Oenotrians as taking the name of Italians, from a chief or king of the name of Italus (Dionys. i. 12, 35; Virg. Aen. i. 533; Arist. Pol. vii. 10); but it seems probable that this is only one of the mythical tales so common among the Greeks: and whether the name of Italy was only the native appellation of the people whom the Greeks called Oenotrians, or was originally that of a particular tribe, like the Chones and Morgetes, which was gradually extended to the whole nation, it seems certain that, in the days of Antiochus, the names Oenotri and Italy, Oenotria and Italia, were regarded as identical in signification. The former names, however, had not yet fully ousted the latter; at least Herodotus gives the name of Oenotria, as one familiar to his readers, to designate the country in which the Phoccean colony of Velia was founded. (Herod. i. 167.) But the gradual extension of the name of Italia, as well as the conquest of the Oenotrian territory by the Sabelian races of the Lucanians and Bruttians, natur-
ONEOTRITES INSILAE.

Habits of the people, and does not prove that the name was still in current use in his time. Scymnus Chius uses the name Oenotria in a different sense, as distinguished from Italia, and confines it to a part only of Lucania; but this seems to be certainly opposed to the facts, and probably arises from some misconception. (Scymn. Ch. 244, 300.)

There seems no doubt that the Oenotrians were a Pelasgic race, akin to the population of Epirus and the adjoining tract on the E. of the Adriatic. This was evidently the opinion of those Greek writers who represented Oenotrus as one of the sons of Lycon, the ancestor of all the peoples who made up the Messenians at a very early period. (Pherecydes, op. Dionys. i. 13; Paus. viii. 3. § 5.) The statement of Pausanias, that this was the most ancient migration of which he had any knowledge, shows that the Oenotrians were considered by the Greeks as the earliest inhabitants of the Italian peninsula. But a more conclusive testimony is the fact noted in Stephanus of Byzantium, that the Greeks in Southern Italy called the native population, whom they had reduced to a state of servitude like the Penestae in Thessaly and the Helots in Lacotia, by the name of Pelastrai. (Steph. Byz. s. v. Xec.) These serfs could be no other than the Oenotrians. Other arguments for their Pelasgic origin may be deduced from the fact that part of the population of Italy was transported to Epirus, as the Chones and Chaeones, Panonia, and Acherson, &c. Aristotle also notices the custom of oswotwos, or feasting at public tables, as subsisting from a very early period among the Oenotrians as well as in Crete. (Arist. Pol. vii. 10.)

The relation of the Oenotrians to the other tribes of Southern Italy is not certain. They were the same as the Pelastrai of the second century B.C., and probably the same as the Saebelian race from the north, as they have already been given in the article ITALIA. [E. H. B.]

ONEOTRITES INSULAE (Oswutotwos epioros), were two small islands off the shore of Lucania, nearly opposite Velia. (Strab. vi. p. 232; Plin. iii. 7. a. 15.) Their individual names, according to Pliny, were Pontia and Iscia. Oilevros (Hdt. 2. 192) and Ailevros (of them as still existing under their ancient names; but they are mere rocks, too small to be marked on ordinary modern maps. [E. H. B.]

OENUS (Owos: Eik. Oioivos), a small town in Laconia, celebrated for its wine, from which the River Oenos, a tributary of the Eurotas, appears to have derived its name. From its being described by Athenaeus as near Pitane, one of the divisions of Sparta, it was probably situated near the junction of the Oenos and the Eurotas. (Steph. B. s. v.; Athen. i. p. 31.) The river Oenus, now called Kallinica, rises in the watershed of Mt. Paros, and, after flowing in a general south-western direction, falls into the Eurotas, at the distance of little more than a mile from the town. (Pompon. ii. 65, 66; Lit. xxxiv. 28.) The principal tributary of the Oenus was the Gallicus (Coryllos, Polyb. ii. 66), probably the river of Vetestan. (Leake, Polemopomies, p. 347.)

OENUSAE (Owosai, Oiowai). 1. A group of islands off the coast of Messenia. (Vol. II. p. 345, b.)

2. A group of islands between Chios and the Asiatic coast. (Herod. i. 165; Thuc. viii. 24; Steph. B. s. v.) They are five in number, now called Spalpea or Erpeae. Pliny (v. 31. a. 38) mentions only one island. [E. OEOE. [Platane.]]

OESCU. 1. (Ouows, Ptol. iii. 10. § 10, viii. 11. § 6), a town of the Triballi in Lower Moesia, seated near the mouth of the river of the same name, and on the road from Viminacium to Nicomedia, 12 miles E. from Valeria, and 14 miles W. from Utium. (Itin. Asiat. p. 290.) It was the station of the Legio V. Maced. Procipus, which calls the town 500 feet above the sea. (Itin. 1. 216.) In the 1st book of Justinian's Institutes (iv. 8), usually identified with Orescomis, though some hold it to be Glossa.

2. A river of Lower Moesia, called by Thucydides (ii. 96) Oinos, and by Herodotus (iv. 49) Xeios. Pliny (iii. 26. a. 29) places its source in Mount Rhodope; Thucydides (i. c.) in Mount Smoumis, which adjacently rises and thence descends to the sea, which is on the W. side of Haemus, whence it pursues its course to the Danube. It is now called the Jabar or Eaker. [T. H. D.]

OESTYME (Oswyma, Thuc. iv. 107; Scyl. p. 27 (the MS. incorrect: Scyl. § 287); Scymn. Ch. 555; Diod. Sic. xii. 68 (by an error of Mars. Scyl.); Ptol. iii. 13. § 9; Plin. iv. 18; Armen. op. Athen. p. 31; Eik. Oioivos; Steph. B.), a Thessalian colony in Piraeus, which, with Galepes, was taken by Brasidas, after the capture of Amphipolis. (Thuc. i. c.) Its position must be sought at some point on the coast between Nepsia and the mouth of the Bithynian Chersonesus. (Leake, Northern Greece, vol. iii. p. 179; Conybeare, Voyage dans le Macedoine, vol. ii. p. 69.) [E. B. J.]

OETA (Owos: Eik. Oioivos), a mountain in the south of Thessaly, which branches off from Mt. Pindus, runs in a south-easterly direction, and forms the northern barrier of Central Greece. The only entrance between these two ranges is through the narrow opening left between Mt. Oeta and the sea, celebrated as the pass of Thermopylae. [THERMOPYLAE.] Mt. Oeta is now called Kalamos, and its highest summit is 7071 feet. (Journal of Geogr. Soc. vol. vii. p. 94.) The mountain immediately above Thermopylae is called Callidromon both by Strabo and Livy. (Strab. ix. 402. § 4; Liv. xxxvi. 15.) The latter writer says that Callidromon is the highest summit of Mt. Oeta; and Strabo agrees with him in describing the summit nearest to Thermopylae as the highest part of the range; but in this opinion they were both mistaken, Mt. Patrikios, which lies more to the west, being considerably higher. Strabo describes the proper stadion in length. It is celebrated in mythology as the scene of the death of Hercules, whereas the Roman poets give to this hero the epithet of Oetaea. From this mountain the southern district of Thessaly was called Oetaea (Oioivos, Strab. ix. pp. 430, 432, 434), and its inhabitants Oetaei (Oioivos, Herod. vii. 217; Thuc. iii. 92; Strab. iv. 418). There was also a city, Oeta, said to have been founded by Amphione, son of Apollo and Dryope (Anton. Liberal. c. 32), which Stephanus B. (s. v.) describes as a city of the Malaeae. Leakes places it at the foot of Mt. Patrikios, and conjectures that it was the same as the city mentioned by Callimachus. (Hymn. in Del. 287.) [See Vol. II. p. 355. (Leake, Northern Greece, vol. iv. p. 4.)]

OETENSII (Oioivos, Ptol. iii. 10. § 9), a tribe in the eastern part of Moesia Inferior. [T. H. D.]

OETYLUS (Oioivos, Hom. Paus., Steph. B.; Beilus, Bockh, Inscr. n. 1233; Beilver, Ptol. iii. 16. § 22; Oioivos—καλείται ὑμῖν ἐναργώς Beilus, Strab. viii. p. 360, corrected in accordance with the inscription), a town of Laconia on the eastern side
of the Messenian gulf, represented by the modern town of Vírgilo, which has borrowed its name from it. Pausanias says that it was 50 stadia from Thalamae and 150 from Messa; the latter distance is too great, but there is no doubt of the identity of Oetylos and Vírgilo; and it appears that Pausanias made a mistake in the names, as the distance between Oetylos and Caenopolis is 150 stadia. Oetylos is mentioned by Homer, and was at a later time one of the Eleuthero-Laconian towns. It was still governed by its own citizens, with the Christians third in authority. Pausanias saw at Oetylos a temple of Sarapis, and a wooden statue of Apollo Carneius in the agora. Among the modern houses of Vírgilo there are remains of Hellenic walls, and in the church a beautiful flutedionic column supporting a beam at one end of the aisle, and three or four Ionic capitals in the wall of the church, probably the remains of the temple of Sarapis. (Hem. Il. ii. 555; Strab. viii. p. 360; Paus. iii. 21. § 7, 25. § 10, 26. § 1; Steph. B. s. V.; Ptol. L. c.; Böckh, L. c.; Murrít, in Walpole's Turkey, p. 54; Leake, Morea, vol. i. p. 313; Boibley, Recherches, loc. cit. p. 92; Curtius, Peloponnesus, vol. ii. p. 283.)

Gaium (Olów), a mountain fortress situated in eastern Locris, above Opus, and destroyed by an earthquake. (Strab. i. p. 60.) According to Gell its ruins are to be seen on a steep hill, 25 minutes above Liviontis. (Itin. p. 232.)

Oeum or Oum (Ołów, Olów, Ódros: Ech. Óldρύν, Στίρκα, the chief town of the district Sciritis in Laconia, commanded the pass through which was the road from Tarces to Sparta. It probably stood in the Kledna, or narrow pass through the watershed of the mountains forming the natural boundary between Laconia and Arcadia. When the Theban army under Epaminondas first invaded Laconia in four divisions, by four different passes, the only division which encountered any resistance was the one which marched through the pass defended by Oeum. But the Spartan Iceschous, who commanded a body of troops at this place, was overpowered by superior numbers; and the invading force thereupon proceeded to Sellasia, where they were joined by the other divisions of the army. (Xen. Hell. vi. 5, §§ 24—26.) In Xenophon the town is called Ídris and inhabited by Ídris; but the form Olów or Olów is probably more correct. It was probably at the borders of Oeum which, situated upon mountainous heights, are frequently called Oeum or Osea. (Comp. Hapcev. s. v. Olów.) Probably the Oeum in Sciritis is referred to in Stephanus under Olów: πολύτοιρον Πελατίς. Αἰγόπελος Μούρις: ol πολύτοιρα Olów.

Oeum is not mentioned subsequently, unless we suppose it to be the same place as Lasos ('Iáros), which Pausanias describes as situated within the frontiers of Laconia, but belonging to the Achaeanas. (Paus. vii. 13. § 7; comp. Suid. s. v. 'Iaros; Leake, Morea, vol. iii. p. 30; Ross, Reisen im Peloponnes, p. 179; Curtius, Peloponnesos, vol. ii. p. 264.)

OEUM CERAMEICUM. [Attica, p. 326, a.]

OEUM CYCLICUM. [Attica, p. 390, a.]

OGDAEMI [MARMARICA.]

OGLASA, a small island in the Tyrrhenian or Ligurian sea, between Corsica and the coast of Etruria. (Plin. iii. 6. s. 13.) It is now called Monte Cristo. [E. H. B.]

OYGÁLIA (Ωγγύλα) is the name given by Homer in the Odyssey to the island inhabited by the nymph Calypso. He describes it as the central point of navel of the sea (δομάτων Σαλάντην), far from all other lands; and the only clue to its position that he gives us is that Ulysses reached it after being borne at sea for eight days and nights after being escaped from Circe and Calypso; and that when he quitted it again he sailed for seventeen days and nights with a fair wind, having the Great Bear on his left hand (i.e. in an easterly direction), until he came in sight of the land of the Phaecians. (Hem. Odys. i. 50, 85, v. 55, 268—280, xii. 448.) It is hardly necessary to observe that the Homeric geography in regard to Greece and Italy is the result of the Christian writers to give us no information, altogether fabulous, and that it is impossible to attach any values to the distances above given. We are wholly at a loss to account for the localities assigned by the Greeks in later days to the scenes of the Odyssey; it is certain that nothing can less accord with the data (such as they are) supplied by Homer than the identifications they adopted. Thus the island of Calypso was by many fixed on the coast of Bruttium, near the Lacinar promontory, where there is nothing but a mere rock of very small size, and close to the shore. (Plin. iii. 10. s. 15; Swinburne's Travels, vol. i. p. 225.) Others, again, placed the abode of the goddess in the island of Gargileon, another Gargileus, an opinion apparently first advanced by Callimachus (Strab. i. p. 44, vii. 299), and which has at least some semblance of probability. But the identification of Phaecia with Corcyra, though more generally adopted in antiquity, has really no more foundation than that of Gargileos with Gargileus: so that the only thing approaching to a geographical statement fails on examination. It is a mere guess, as to the characters of the creations of poet's fancy a local habitation and tabi-ble reality, that could ever have led to the associating the scenes in the Odyssey with particular spots in Sicily and Italy; and the view of Erato- sthenes, that the geography of the voyage of Ulysses was wholly the creation of the poet's fancy, is cer- tainly the one most generally adopted. At the same time it cannot be denied that some of the fables there related were founded on vague rumours brought by voyagers, probably Phaecians, from these distant lands. Thus the account of Scylla and Charybdis, however ex-aggerated, was doubtless based on truth. But the very character of these marvels of the far west, and the tales concerning them, in itself excludes the idea that they are based on the vagaries of the ancients themselves were at variance as to whether the wanderings of Ulysses took place within the limits of the Mediterranean, or were ex- tended to the ocean beyond. (Strab. i. pp. 22—26.) The fact, in all probability, is that Homer had no conception of the distinction between the two worlds, at least very doubtful whether he was acquainted even with the existence of Italy; and the whole expanse of the sea beyond was undoubtedly to him a region of mystery and fable.

The various opinions put forth by ancient and modern writers concerning the Homeric geography are well reviewed by Ueberl (Geographie der Griechen u. Rómers, vol. i. part ii. pp. 310—319); but the information which may more truly be drawn from the lan- guage of the poet himself are clearly stated by him. (Ueb. part i. pp. 19—81.)

OYGRRIS (Ωγγύρις) is a small island, off the southern coast of Carmania about 2000 stadia, which was traditionally said to contain the tomb of King Erythras, from which the whole place was supposed to have derived its name. It was marked by a huge mound planted with wild palms. Strabo
states that he obtained this story from Nearchus and Orthagoras (or Pythagoras), who learnt it from Mithropetes, the son of a Phrygian satrap, to whom he had given a passage in his fleet to Persia. The same name is given to the island in many other geographers (as in Mel. iii. 8 § 6; Dionys. Per. 607; Plin. vi. 28. a. 32; Priscian, Periég. 605; Fast. Avien. 794; Steph. B. s. v.; Suidas, a. v.). The other editions of Strabo read Topjohnis and Topjonis, - a form which Vossius (in Melan. l. c.) has adopted. The account, however, preserved in Arrian's Voyage of Nearchus (indic. 37), differs much from the above. According to him, the fleet sailing westward passed a desert and rocky island called Organa; and, 300 stadia beyond it, came to anchor beside another island called Oaraectis; that there the tomb of Erythraus was said to exist, and the fleet obtained the aid of Maestaen, the chief of the island, who volunteered to accompany it, and pilot it to Susa. It seems generally admitted, that the Organa of Arrian and Ptolemy (vi. 7 § 46, who, placing it along the Arabian coast, has evidently adopted the distances of Strabo) is the modern Hormuz, which bears the same name on all the maps, and, however, thinks that it is the modern Arak, or L'Arak. (Voy. Nearchus, p. 348.) The distance in Strabo is, perhaps, confounded with the distance the fleet had sailed along the coast of Carmania. Again Nearchus places the tomb of Erythraus, not in Organa, but in Oaraectis; and Agatharchides mentions that the king reigned over a country, which applies to the latter, and not to the former. (Agatharch. p. 2, ed. Hudson. The same is true of what Pliny states of its size (l. c.). Curtius, without mentioning its name, evidently alludes to Ogyris (Ogirisa), which he places close to the continent (x. 2). Geographer of Ravenna has preserved a remembrance of all the places under the head of Aspera, to which he alludes. Ogyris, Oracula, Durwardak, Rachos, Orgina. Oaraectis is called in Strabo (l. c.) (Oaraeh), in Pliny, Oracula (vi. 28. a. 98); in Ptolemy, Opebos (vi. 8 § 15). The ancient name is said to be preserved in the modern Froot, or Broct. It also derives the name of Khidri from the quantity of grapes now found on it. Fries (Aegypt., p. 245) makes a conjecture (i. p. 364: cf. also Wellsted's Travels, vol. i. p. 62). The whole of this complicated piece of geography has been fully examined by Vincent, Voy. de Nearchus, vol. i. p. 548, &c.; Ritter, vol. xii. p. 435. [V.]

OYSPORIS (Olbeia). (Ptol. iv. 3 § 14; Orias, Paus. Tukh., 'Empor. Stadtkern. § 86), a town of the Greater Syria, which Barth (Wanderungen, pp. 365, 375) identifies with Limon Naum, where there is a sandy bay into which ships might send their boats, with almost all winds, for water, at three wells, situated near the beach. (Beechey, Exped. to N. Coast of Africa, p. 173.) The tower, of which the coast-describer speaks, must be the ruins at Rais El Kharab, E. of El Tanf. OLYSHA (Olbas). 1. A town in Cilicia Aspera, at the foot of Mount Taurus, on a tributary of the Calycadnus. (Ptol. v. 8 § 6.) Col. Leake (Asia Minor, p. 320) identifies the town of Olbas with the Olbe mentioned by Strabo (xiv. p. 673); but while in another passage (p. 117) he conjectures that Olbas may at a later period have changed its name into Olandropolis, with which accordingly he is inclined to identify it. The former supposition is possible, but not the latter, for Strabo places Olbe in the interior of Cilicia, between the rivers Lamus and Gydonus, that is, in the mountainous districts of the Taurus. According to tradition, Olbe had been built by Ajax, the son of Teucer; it contained a temple of Zeus, whose priest once ruled over all Cilicia Aspera. (Strab. l. c.) In later times it was regarded as belonging to Isauria, and was the seat of a bishop. (Hieroc. p. 709; Basil. Vit. Theod. ii. 2.) 2. We still see the town of Olandropolis, of which princes, Polemon and Ajax. (Eckhel, Doct. Num. vol. iii. p. 26, &c.) It should be observed that Stephanus Byz. (s. v. Olandea) calls Olbasa or Olbe Olbia. 3. A town in the Lycaonian district Antiociabians, in the south-west of Cylistra. (Ptol. v. 6 § 17; Hieroc. p. 709.) 4. A town in the northern part of Paphius, between Pedneliusus and Selga. (Ptol. v. 5 § 8; Hieroc. p. 680.) [L. S.] OLBE. [OLBARA, No. 1.] OLBIA ('Olbia), Strab. iv. p. 200, vii. p. 806; Sceumn. 806; Ptol. liii. 5 § 28; Arrian, Per. p. 20; Anon. Per. p. 8; Mela, ii. 1 § 6; Jornand. B.Get. 5; with the above, shows that the name Olbiana, in the Ionian form always 'Olbía, Pliny (iv. 26) says that it was anciently called Olimopolis, and Miletopolis; the former of these names does not occur elsewhere, and is derived probably from the ethnic name Olimopolis (Olimopolis, Herod. iv. 18; Suid. v. ('Olimoùs), which appears on coins as late as the 3rd century. (Curtius, Severus. (Kohler, Mém. de l'Acad. de St. Peterb. vol. iv. p. 106; Blaranumberg, Choix des Méd. Antiques d'Olibopiou ou d'Olibia, Paris, 1822; Monnet, Descri. des Méd. vol. i. p. 349.) Although the inhabitants always called their city Olbia, strangers were in the habit of calling it by the name of the chief river of Scythia, Borythesthenes (Borythesthenes, Borytheum), and the people of Olbia, Borythestiens. (Curtius s. v. Borythestria, Herod. l. c.; Dion Chrys. Orat. xxvi. vol. ii. p. 74; Lucian, Tousur. 61; Menand. op. Schol. ad Dionys. Periég. 511; Step. B. s. v.; Amm. Marc. xxii. 8 § 40; Macrobr. Sat. i. 10.) A Grecian colony in Scythia, on the right bank of the Byphasus, 240 stadia (Anon. l. c. 200 stadia, Strab. p. 200; 18 Miles from Micrus, Pliny, iv. 37); but the ruins of which are now found at a place on the W. bank of the Bug, called Stomouchi, not far from the village Himesko, about 12 Eng. miles below Nikolaev. This important settlement, which was situated among the Scythian tribes of the Callipidæ and Alazones, owed its origin to the Ionic Miletus in n. c. 655. (Anon. Periég. i. c.; Euseb. Chron.) At an early period it became a point of the highest importance for the inland trade, which, issuing from thence, was carried on in an easterly and northern direction as far as Central Asia. It was visited by Herodotus (iv. 17, 18, 53, 78), who obtained his valuable information about Scythia from the Greek traders of Olbia. From the important series of inscriptions in the city register (see below, p. 2096), it appears that this city, although at times dependent upon the Scythian or Sarmatian princes, enjoyed the privileges of a free government, with institutions framed upon the Ionic model. Among its eminent names occur those of Poseidonius (Suidas, s. v.), a sophist and historian, and Sphaerus the stoic, a disciple of Ciceron (see above, p. 2.) There has been much controversy as to the date of the famous inscription (Böck. No. 2058).
OLBIA.

which records the exploits of Protagenes, who, in the extreme distress of his native city, aided it both with his purse and person. This inscription, apparently belonging to the period B.C. 218—201, mentions the Galatians and Sciri (perhaps the same as those who are afterwards found united with the Heruli and Rugii) as the worst enemies of Olbia, a clear proof that in the third century B.C. Celtic tribes had already spread as far as the E. Euxine海岸.

Dios Chryseotom (Orat. xxxvi. p. 76), who came to Olbia when he escaped from Damiatan's edict, relates how it had been destroyed by the Getæ about 150 years before the date of his arrival, or about B.C. 50, but had been restored by the old inhabitants. From the inscriptions it appears that Augustus and Tibersias conferred favours on a certain Abābas of Olbia (No. 2060), who, in gratitude, erected a portico in their honour (No. 2087), while Antoninus Pius assisted them against the Tanro-Scythians. (Jul. Capit. Anton. 9.) The citizens erected statues to Caracalla and Geta (No. 2091). The city was in all probability destroyed in the invasion of the Goths a. D. 235, as the name does not occur henceforth in history. For coins of Olbia, besides the works already quoted, see Eckehl, vol. ii. p. 507; Clarke, Trans. vol. ii. p. 351; Murmunion Apostoli Reiss, p. 27; Böckh, Jasp. vol. ii. pp. 86—89; Niebuhr, Kleine Schriften, p. 352; Schafarik, Slav. Ant. vol. i. p. 397; Creuzer, Heddorilg, Jährbiich, 1822, p. 1235; Pähler, Eschius ad Herod. iv. 18) [E. B. J.]

OLBIANUS SINUS.

fleet. (Lit. xxvii. 6.) Under the reign of Himerius, Olbia is still mentioned by Claudian as one of the principal sea-ports of Sardinia; and the Itinerary gives more than one line of road proceeding from thence towards different parts of the island. (Claudian, B. Göld. 519; Itim. Ant. pp. 79, 80, 82.) The name is there written Oliba: in the middle ages it came to be known as Civitas, and obtained its modern appellation of Terrasini from the Spaniards.

Ptolemy distinguishes the port of Olbia (Ολβίας λιμήν, iii. 3 sq.) from the city itself: he probably applies this name to the whole of the spacious bay or inlet now known as the Gulf of Terrasini, and the position given is that of the entrance.

OLBIA (Ολβία): Eth. 'Ολβιοιωναρχις, and 'Ολβιώτας. Stephanus (s. e. 'Ολβία) speaks of one city of this name as a Ligurian city, by which he means the Olbia on the Ligurian coast of Gallia; for the name Olbia appears to be Greek. Mele (ii. 5), who proceeds from east to west in enumerating the cities on the coast of Inner Italy, calls the Olbia between Forum Julii (Fréjus) and Massilia (Marseilles). The order of place is this: Forum Julii, Athenopolis, Olbia, Tarasio, Cistharias, Massilia. Strabo (iv. 184), who proceeds from west to east in his enumeration of the cities of this coast, mentions Massilia, Tarasio, Olbia, Antipolis, and Nicaea. He adds that the port of Augustus, which they call 'Forum Julii, is between Olbia and Antipolis (Antibœ,). The Massaliots built Olbia, with the other places on this coast, as a defence against the Salies and the Ligures of the Alpes. (Strab. p. 180.) Ptolemy (ii. 10, § 8) places Olbia between the promontory of Cistharias (Cap Cicer) and the mouth of the river Argyros (Argens), west of Fréjus. There is nothing to show the site of Olbia with precision; and we must accept D'Anville's conjecture that Olbia was at a place now called Ecdese, between Cap Combé and Brégançon. Foriger accepts the conjecture that Olbia was at St. Tropes, which he supports by saying that Strabo places Olbia 60 stadia from Massalia; but Strabo places Forum Julii 60 stadia from Massalia. [G.L.] OLBIANUS SINUS (Ολβιανος κόλπος) is the bay called, after it, the Sinus Olbianus (commonly Sinus Astaecus), was in all probability only another name for Astacus [Acastus]. Pliny (v. 43) is probably mistaken in saying that Olbia was the ancient name for Nicaea in Bithynia; he seems to confound Nicaea with Astacus.

3. A town of Cilicia, mentioned only by Steph. Byz. (s. e.), who may possibly have been thinking of the Cilician Olbasa or Olba.

OLBIANUS SINUS.
OLCADES.  

OLCADES (Ολκάδες), a people of Hispánia Baetica, dwelling N. of Carthago Nova, on the upper course of the Anas, and in the E. part of the territory occupied at a later date by the Oretani. They are mentioned only in the wars of the Carthaginians with the Iберians, and after that period vanished entirely from history. Hannibal during his wars in Italy transplanted a colony of them into Africa. Their chief town was Althæa. (Polyb. iii. 14. 23, and 13. 5; Liv. xxii. 5; Steph. B. s. v.; Suidas, s. v.)

OLCINIIUM (Ολκινίων, Ptol. ii. 17. H. D.)

OLCHINUM (Ολκίθων, Ptol. iii. 26; Eub. Olcinitae), a town of some importance in Illyricum, which succeeded to the Romans at the commencement of hostilities with Géntis, and which, in consequence, received the privilege of freedom and immunity from taxation. (Liv. xiv. 26; Diodor. or Ulpius, as it is still called, is identified with this town. (Hahn, Alba- natheen Studien, p. 168.)

OLEARIUS. [E. B. J.]

OLEASTRUM (Ολέαστρος, Ptol. ii. 4. § 14). 1. A town in Hispánia Baetica, in the jurisdiction of Gades, with a grove of the same name near it. (Mela, iii. 1. § 4; Ptol. iii. i. 1. a. 3.)

2. A town of the Costani in Hispánia Tarconnaetica, on the S. coast of Tarracon (ib. vii. 399). Probably the same town mentioned by Strabo (iii. p. 159), but erroneously placed by him near Saguntum. It seems also to have given name to the lead mine by Pliny (xxxiv. 17. a. 49). Variously identifed with Balagnar, Miramar, and S. Lucas de Barramedea (Marco, Hist. ii. 11. p. 142; T. H. D.)

OLEASTRUM PROM. (Ολέαστρος Πρόμ, ib. iv. 1. § 6), a promontory of Mauretania, between Rusadir and Albyla, called in the Antonine Itinerary, BARRAKI PROM, now PUNTA DI MARI, in the bight of ELOUSI, or TEUTA.

[Ε. Β. Ι.]

OLENACUM, a fortress in the N. of Britannia Romana, and the station of the Ala Prima Hercules (Not. Eutr.). It lay close to the Sitea wall, and Camden thinks (p. 1028) that it occupied the site of Linstoc Castle in the barony of Crooby, not far from Carlisle. Horace, however (p. 112) tells us that it is Old Carlisle, near Wigton, where there are some conspicuous Roman remains. (T. H. D.)

OLENUS (Ολένος), a town in Galatia, in the valley of Ancyra, and belonging to the territory of the Tectosaga, is mentioned only by Polybius (v. 4. § 8).

[Ε. Β. Ι.]

OLENUS (Ολένος; Eub. 'Ολενος). 1. An ancient town in the S. of Aetolia, between the Achelous and the Eumenus, was named after a son of Zeus or Hephaestus, and is mentioned in the Homeric catalogue. It was situated near New Pleuron, at the foot of Mount Amydias, but its exact site is uncertain. It is said to have been destroyed by the Aetolians; and there were only a few traces of it in the time of Strabo. (Strab. x. 451, 460; Hom. Il. 5. 538; Apollod. i. 8. § 4; Hyg. Poith. Astron. 2. § 13; Stat. Theb. iv. 104; Steph. B. s. v.) The Roman poets use Olenus as equivalent to Aetolium; thus Tyderius of Colophon says Olenus is called Olenus Tydria. (Stat. Theb. i. 402.)

2. A town of Achaea, and originally one of the 12 Achaean cities, was situated on the coast, and on the left bank of the river Peiros, 40 stadia from Dyne, and 80 stadia from Patras. On the revival of the Achaean League in a. c. 280, it appears that Olenus was still in existence, as Strabo says that it did not join the league; but the inhabitants subsequently abandoned the town, and retired to the neighbouring villages of Peiros (Iepaia), and Euryteia (Eúropoia), and to Dyne. In the time of Polybius, however, Olenus had no longer inhabited, and in the time of Strabo it was in ruins, and its territory belonged to Dyne. There are some remains of the ancient city at Kato or Paleo-Aksia. (Herod. i. 145; Polyb. xii. 34, 386, 388; Paus. vii. 18. § 1, vii. 23. § 1; Plin. iv. 6, Olenum; Leake, Morea, vol. ii. p. 157, Peloponnesus, p. 208; Thirse, Hist. Greeciae, vol. viii. p. 82.)

OLEURUS (Ολεύρος, Xeniaca, syn. Stelai; Eub. 'Ολεύρος; Bökön, Inscr. vol. ii. No. 2555; Usat. ad Il. ii. p. 664), a town of Crete, situated on a hill, with a temple to Athena. In the struggle between Creesus and Lyctus, the people of Olerus sided with the latter. (Polyb. iv. 53, where the reading 'Oleuros appears to be a mistake.) In the Decriomachia, the city of Olerus is mentioned on the southern coast of the island, where Strabo (xii. 562) says the mountain was named by Porlinus (v. 4. § 4) under the name of Ligas, Gigas, or Oligas, probably the same as the Olgas, or Briggas of Strabo. It still bears its ancient name in the corrupt form of Ulis, and modern travellers state that some parts of the mountain are covered with snow nearly all the year.

[Ε. Β. Ι.]

OLEVARUS (Ολευράος, Olearus, Plin. Vign. 1. Αντάρπος) an island in the Aegean sea, one of the Cyclades, said by Heracleides to have been colonised by the Sidonians and to be 88 stadia from Pharos. (Heracles, a Steph. B. s. v.; Strab. x. p. 483; Plin. lo. 12. Cordia; Vign. 1538. i. 126.) It possesses a celebrated stalactitic cavern, which has been described by several modern travellers. (Tournefort, Voyage, cl. vol. i. p. 146, seq.; Eng. transl.; Leake, Northern Greece, vol. iii. p. 97, seq.; Fidler, Reise durch Griechenland, vol. ii. p. 191, seq.)

OLIBA (Ολίβα, Ptol. ii. 6. § 55), a town of the Benoes in the N. of Hispania Tarconnsaetica. Uskert (vol. ii. pt. 1. p. 458) calls it the same town as Oliba in Iberia, mentioned by Steph. B. (T. H. D.)

OLICANA (Ολίκανα, Ptol. ii. 3. § 16), a town of the Brignates in the N. of Britannia Romana; according to Camden (p. 867), Ilkeby, on the river Wharf in Yorkshire. (T. H. D.)

OLIGYTRUS (Ολίγυτρος, Polyb. iv. 11. 10; Oργύτρος, Plut. Chom. 26), a mountain and fortress situated in a pass between Styphalus and Caphya. Leake places it on a small advanced height of Mt. Skiptiæ, projecting into the Styphalian plain, on the crest of which are the foundations of a Heliconian wall, formed of large quadrangular stones. (Leake, Morea, vol. iii. p. 114; Sohby, Therecshca, cl. vol. i. p. 154; Curtius, Peloponnesus, vol. i. p. 217.)

OLINA. [Ε. Β. Ι.]

OLINAS (Ολίνα, νυμφώτος ήδονα), Polyleny (ii. S. c. 2) places the mouth of the Oinas river on the coast of Catookiai Latia in the country of the Veneti or Unelli; and the next place which
he mentions north of the mouth of the Olinas is
Noooroomuaga, or Noviomagus, of the Lexuvii or
Lexuvii. This is the Oras, which flows into the
Olinas. [See the Map, Vol. I. p. 411, where the
island lies SW. of No. 10.] (Paus. ix. 24. § 3;
Steph. B. s. a.; Forchhammer, Hellenica, p. 175.)

OLYMPIA.

O'LICKUS (?'Odikèpos, Hist. viii. 20.); a mountain near
Tyros, in Macedonia, represented by the last falls of the heights between
Agios and Efikia.

OLIOSSON ("Oioosss, Eth. Oioossoe),
OELOPHUS ("Odolophos, Herod. vii. 22 ;
Thuc. iv. 109; Scyl. p. 27; Strab. vii. 331;
Steph. B.), a town on the peninsula of Acte, the
town of which is probably represented by the
Arassos of
Ollioules, in the south-western part of the
Cape Leucos, the place of which is uncertain.
(Thuc. iii. 101.)

OLITIS, De Valois suggested, and D'Anville
adapts his opinion, that we ought to read Olis,
instead of Citis in the verse of Sidonius Apollinaris
(Prop. xvi. 1.)

"Citit, Elaria, Atax, Vacaia."

O'Ellus (O'Ellos), a river of Cisalpine Gaul, and
one of the most considerable of the northern tribu-
taries of the Rhone. It rises the north of Mont
Cenis, and flows the Val
Camonica (the district of the ancient Camuni),
and forms the extensive lake called by Pliny the
Lacus Sequinus, near the Lago d' Iseo. From thence it
has a course of about 80 miles to the Padus, recei-
ing on its way the tributary streams of the Mela
and Melo, and the Obisus or Oebus. [See the Map,
Vol. I. p. 413.] (Ptol. iii. 17. § 5; cf. Olovius; Stadtmus.
350; Eckhel, viii. 240; Orell. i. 249; Comp. Comp.
Mus. Elegy.) There is considerable difficulty in
making out the position of this town; but the
site may probably be represented by
Aschheim near Spineta Lago, where there are ruins.
Mr. Ashley's map erroneously identifies this with
Naxos. (Comp. Eckhel, viii. 139; Comp. Mus. Elegy.)

OLYMPEIEN ("Olympeion, a district of My-
ian, on the northern slope of Mount Olympus, from which

OLYM.PEINE.

OLYMPEIEN ("Olympeion, a district of My-
ian, on the northern slope of Mount Olympus, from which

OLYM.PEINE.
OLYMPIA.

the only remains are those of the temple of Zeus Olympia. Pausanias has devoted nearly two books, and one fifth of his whole work, to the description of Olympia; but he does not confine himself in their exact topographical order: owing to this circumstance, to the absence of ancient remains, and to the changes in the surface of the soil by the fluctuations in the course of the Alpheius, the topography of the plain must be to a great extent conjectural. The latest and most able attempt to elucidate this subject is that of von Delt in his Prehistorische Pflanzenraen, whose description is here chiefly followed.

Olympia lay partly within and partly outside of the Sacred Grove. This Sacred Grove bore from the most ancient times the name of Altis (Αλτίς), which is the Peloponnesian Asiol form of Άλτος. (Paus. v. 10. § 1.) It was adorned with trees, and in its centre there was a grove of plane trees. (Paus. v. 27. § 11.) Pindar likewise describes it as well wooded (Πάροις ἐστίνθρων ἡ 'Αλτίς Άλτος, Ol. viii. 19.). The space of the Altis was measured out by Hercules, and was surrounded by this here with a wall. (Pind. Ol. xi. 44.) On the west it ran along the Cadeaen; on the south its direction may be traced by a void space and the Altis and the Alpheius; on the east it was bounded by the stadium. There were several gates in the wall, but the principal one, through which all the processions passed, was situated in the middle of the western side, and was called the Pompic Entrances (Τη Πομπικ έστρω, Paus. v. 15. § 2). From this gate, a road called the Pompic Way led to the Altis. Here the stadium was entered the stadium by a gateway on the eastern side.

1. The Olymipicium, Olymposim, or temple of Zeus Olympia. An oracle of the Olympic god existed on this spot from the most ancient times (Strab. viii. p. 353), and from here a temple was doubtless built, even before the Olympic games became a Pan-Hellenic festival. But after the conquest of Pisa and the surrounding cities by the Eleians according to Eustathius (v. 272), the latter determined to devote the spoils of the conquered cities to the erection of a new and splendid temple of the Olympic god. (Paus. v. 10. §§ 2, 3.) The architect was Libon of Eila. The temple was not, however, finished till nearly a century afterwards, at the period when the Attic school of art was supreme. Of the temple now existing, the Athenian Acropolis had thrown into the shade all previous works of art. Shortly after the dedication of the Parthenon, the Eleians invited Pheidias and his school of artists to remove to Elia, and adorn the Olympic temple in a manner worthy of the king of the gods. Pheidias probably remained at Olympia for four or five years from about 457 to 433 or 432. The colossal statue of Zeus in the cela, and the figures in the pediments of the temple were executed by Pheidias and his associates. The pictorial embellishments were the work of his relative Panasenus. (Strab. viii. p. 354.)

[Comp. Dict. of Biogr. Vol. III. p. 248.] Pausanias has given a minute description of the temple (v. 10); and its site, plan, and dimensions have been ascertained by the excavations of the French Commission of the Morea. The foundations are now exposed to view; and several fine fragments of the sculptures, representing the labours of Hercules, are now in the museum of the Louvre. The temple stood in the south-western portion of the Altis, to the right hand of the Pompic entrance. It was built of the native limestone, which Pausanias called poros, and

OLYMPIA.
which was covered in the more finished parts by a surface of stucco, which gave it the appearance of marble. It was of the Doric order, and a peripteral hexastyle building. Accordingly it had six columns in the front and thirteen on the sides. The columns were fluted, and 7ft. 4in. in diameter, a size greater than that of any other existing columns of a Grecian temple. The length of the temple was 2530 Greek feet, the breadth 53, the height to the summit of the pediment 68. The roof was covered with slabs of Pentelic marble in the form of tiles. At each end of the pediment stood a gilded vase, and on the apex a gilded statue of Nike or Victory; below which was a golden shield with the head of Medusa in the middle, dedicated by the Lacedaemonians on account of their victory over the Athenians at Tanagra in c. 457. The two pediments were filled with figures. The eastern pediment had a statue of Zeus in the centre, with Oenomaus on his right and Pelops on his left, prepared to contend in the chariot-race; the figures on either side consisted of their attendants, and in the angles were the two rivers, Cladeus to the right of Zeus, and Alpheus to his left. In the western pediment was the contest of the Centaurs and the Lapithae, Piritithous occupying the central place. On the metopes over the doors at the eastern and western ends the labours of Heracles were represented. In its interior construction the temple resembled the Parthenon. The cells consisted of two chambers, of which the eastern contained the statue, and the western was called the Opisthodomus. The colossal statues of Zeus, the master-work of Pheidias, was made of ivory and gold. It stood at the end of the front chamber of the cells, directly facing the entrance, so that it at once showed itself in all its grandeur to a spectator entering the temple. The approach to it was between a double row of columns, supporting the roof. The god was seated on a magnificent throne adored with sculptures, a full description of which, as well as of the statue, has been given in another place. [Dict. of Biogr. Vol. III. p. 252.] Behind the Opisthodomus of the temple was the Callistepheus or wild olive tree, which furnished the garlands of the Olympic victors. (Paus. v. 15. § 3.)

GROUND PLAN OF THE OLYMPIUM.

2. The Pelopion stood opposite the temple of Zeus, on the other side of the Pompie way. Its position is defined by Pausanias, who says that it stood to the right of the entrance into the temple of Zeus and to the north of that building. It was an enclosure, containing trees and statues, having an opening to the west. (Paus. v. 13. § 1.)

3. The Heraeum was the most important temple in the Altis after that of Zeus. It was also a Doric peripteral building. Its dimensions are unknown. Pausanias says (v. 16. § 1) that it was 63 feet in length; but this is clearly a mistake, since no peripteral building was so small; and the numerous statues in the cells, described by Pausanias, clearly show that it must have been of considerable dimensions. The two most remarkable monuments in the Heraeum were the table, on which were placed the garlands prepared for the victors in the Olympic contests, and the celebrated chest of Cyprisus, covered with figures in relief, of which Pausanias has given an elaborate description (v. 17—19). We learn from a passage of Dion Chrysostom (Orat. xi. p. 163), cited by Leake, that this chest stood in the opisthodomus of the Heraeum; whence we may infer that the cells of the temple consisted of two apartments.

4. The Great Altar of Zeus is described by Pausanias as equidistant from the Pelopium and the Heraeum, and as being in front of them both. (Paus. v. 13. § 8.) Leake places the Heraeum near the Pompie entrance of the Stadium, and supposes that it faced eastward; accordingly he conjectures that the altar was opposite to the back fronts of the Pelopium and the Heraeum. The total height of the altar was 22 feet. It had two platforms, of which the upper was made of the cinders of the thighs sacrificed on this and other altars.

5. The Column of Oenomaus stood between the great altar and the temple of Zeus. It was said to have belonged to the house of Oenomaus, and to have been the only part of the building which escaped when it was burnt by lightning. (Paus. v. 20. § 6.)

6. The Metronion, or temple of the Mother of the Gods, was a large Doric building, situated within the Altis (Paus. v. 20. § 9.) It is placed by Leake to the left of the Pompie Way nearly opposite the Heraeum.

7. The Prytanisium is placed by Pausanias within the Altis, near the Gymnasium, which was outside the sacred enclosure (v. 15. § 8.)

8. The Bouleuterion, or Council-House, seems to have been near the Prytanisium. (Paus. v. 23. § 1, 24. § 1.)

9. The Philippiens, a circular building, erected by Philip after the battle of Chaeronea, was to the left in proceeding from the entrance of the Altis to the Prytanisium. (Paus. v. 17. § 4, v. 20. § 10.)
OLYMPIA.

10. The Theseion, a building belonging to the Ἑστέαδως or superintendents of the sacrifices (Paus. v. 15. § 8). Its position is uncertain.

13. The Hippodamia, named from Hippodamia, who was buried here, was within the Altis near the Pompic Way. (Paus. vi. 20. § 7.)

12. The temple of the Olympian Eileithyia (Lucina) appears to have stood on the neck of Mount Cronius. (Paus. vi. 20. § 2.)

13. The temple of the Olympian Aphrodite was near that of Eileithyia. (I.c. vi. 20. § 6.)

14. The Theosenai or Treasurers, ten in number, were, like those at Delphi, built by different cities, for the reception of their dedicatory offerings. They are described by Pananians as standing to the north of the Heraeum at the foot of Mount Cronius, upon a platform made of the stone poros (Paus. vi. 19. § 1).

15. Zanes, statues of Zeus, erected from the proceeds of fines levied upon athletes, who had violated the regulations of the games. They stood upon a stone platform at the foot of Mount Cronius, to the left of a person going from the Metraum to the Stadium. (Paus. vi. 21. § 2.)

16. The Studio of Pheidias, which was outside the Altis, and near the Pompic entrance. (Paus. v. 15. § 1.)

17. The Leonidaeum, built by Leonidas, a native, was near the Studio of Pheidias. Here the Roman magistrates were lodged in the time of Pananians (v. 15. §§ 1, 2).

18. The Gymnasium, also outside the Altis, and near the northern entrance into it. (Paus. vi. 21. § 2.) Near the Gymnasium was (19) the Paeonaeum. 20 and 21. The Stadium and the Hippodrome were two of the most important sites at Olympia, as together they formed the place of exhibition for all the Olympic contests. Their position cannot be determined with certainty; but as they appear to have formed a continued area from the circular end of the Stadium to the further extremity of the Hippodrome, it was suggested to them by Leake the most probable. He places the circular end of the Stadium at the foot of the heights to the NE. of the summit of Mount Cronius, and the further end of the Hippodrome on the bank of the Alpheius.

The Stadium is described by Pananians as a mound of earth, upon which there was a seat for the Hellanodicea, and over against it an altar of marble, on which sat the priestess of Demeter Chamyn to behold the games. There were two entrances into the Stadium, the Pompic and the Secret. The latter, through which the Hellanodicea and the agonistai entered, was near the Zanes; the former probably entered the area in front of the rectilinear extremity of the Stadium. (Paus. vi. 20. § 8, seq.) In proceeding towards the Hippodrome from that part of the Stadium where the Hellanodicea sat was the Hippaphesia or starting place of the horses (ἱππαφεσία τῶν ἀλεξίων). In form it resembled the prow of a ship, the embolus or beak being turned towards the racecourse. Its widest part adjoined the site of Aganippe. At the end of the embolus was a brazen dolphin standing upon a pillar. Either side of the Hippaphesia was more than 400 feet in length, and contained apartments, which those who were going to contend in the horse-races obtained by lot. Before the horses a cord was extended as a barrier. An arch was set in the middle of the prow, on which was an eagle with outstretched wings. The superintendent of the race elevated this eagle by means of machinery, so as to be seen by all the spectators, and at the same time the dolphin fell to the ground. Thereupon the first barriers on either side, near the site of Aganippe, were removed, and then the other barriers were withdrawn in like manner in succession, until all the horses were in line at the embolus.

One side of the Hippodrome was longer than the other, and was formed by a mound of earth. There was a passage through this side leading out of the Hippodrome; and near the passage was a kind of circular altar, called Tararipous (Ταρατρόως), or the terrifier of horses, because the horses are frequently seized with terror in passing it, so that cha-

the calm ether, it was believed that here was an opening into the vault of heaven, closed by a thick cloud, as a door. (It. v. 73.) [See Dict. of Biogr. Vol. III. p. 23; Liddell and Scott, Greek Lex. s. v.]

2. A mountain in Laconia, near Sallasia. [Sat-1]

3. A mountain above Olympia in Elis. [Olym-4]

OLYMPUS (Ολυμπος). 1. A mountain range of Myonia, extending eastward as far as the river Sangarius, and dividing Phrygia from Bithynia. To distinguish it from other mountains of the same name, it was called the Myonia Olympus. Its height rises towards the west, and that part which is of the greatest height, is the highest mountain in all Asia Minor. The country around this mountain was well peopled, but their heights were thickly clad with wood, and contained many safe retreats for robbers, bands of whom, under a regular leader, often rendered the country unsafe. (Strab. xii. p. 574; Herod. i. 36, vi. 74; Ptol. v. i. § 10; Steph. B. s. v.; Plin. v. 40, 43; Fosp. Malta. i. 19; Amm. Mar. xxvi. 9; Schol. ad Apollon. Rhod. i. 598.) The lower regions of this great mountain are still covered with extensive forests; but the summit is rocky, devoid of vegetation, and during the greater part of the year covered with snow. The Greek name of the summit is Azadok Dagh, though the western or highest parts also bear the name of Keshkik Dagh, that is, the Monk's Mountain, and the eastern Tsimandosi or Domon Dagh. The Byzantine historians mention several fortresses to defend the passes of Olympus, such as Pitheca (Niceph. Chron. p. 38; B. Cimann. p. 21), Arcuronum, and Lacinum, but nothing certain is known of the original town. (Plin. v. 40; Fosp. Malta. i. 535; Strabo. Anna Comm. p. 441; comp. Brown, in Walpole's Travels, tom. ii. pp. 109, foll.; Pococke, Travels, iii. p. 178.)

2. A mountain in the north of Galatia, which it separates from Bithynia. It is, properly speaking, only a continuation of the Myonica Olympus, and is remarkable in history for the battle fought there by Tullus above the River Osage, under Manlius. (Liv. xxxviii. 19, &c.; Polyb. xxii. 20, 21.) Its modern name is Ala Dagh.

3. A volcanic mountain in the east of Lycia, a little to the north-east of Corydalia. It also bore the name of Phoenicos, and near it was a large town, likewise bearing the name Olympus. (Strab. xiv. p. 666.) In another passage (Strab. xiv. p. 691) Strabo speaks of a mountain Olympus and a stronghold of the same name in Cilicia, from which the whole of Lycia, Pamphylia, and Pisidia could be surveyed, and which was in his time taken possession of by the Lessian robber Zenicetas. It is, however, generally supposed that this Cilician Olympus is no other than the Lycian, and that the geographer led into his mistake by the fact that the town of the name of Corycus existed both in Lycia and Cilicia. On the Lycian Olympus stood a temple of Hephaestus. (Comp. Stad. Mar. Magn. p. 205; Ptol. v. 3. § 3.) Scylax (99) does not mention Olympus, but his Siderus is evidently no other place. (Livy, Ann. Mar., p. 199; Ptol. Lycia, p. 212, foll.; Strabo: and Forsan, Provinc. in Lycia, i. p. 192.) Mount Olympus now bears the name Janur Dagh, and the town of Delikdash; in the latter place, which was first identified by Beaufort, some ancient remains still exist; but it does not appear ever to have been a large town, as Strabo calls it. [L. S.]

OLYMPUS (Ολυμπος), Strab. xiv. pp. 682, 683; [Ptol. v. 14, § 5], a mountain range in the lofty island of Cyprus. On one of its eminences—breast-shaped (μαυρώνθητι) — was a temple to Aphrodite "of the heights" (Ακραία), into which women were not permitted to enter. (Strab. 4. c.) This probably implies that all but the "hierodula" were excluded. (Comp. Claudian, Nupt. Hom. et Mar. 49—85; Achill. Tat. vii. 13.) According to Pococke (Proc. vol. ii. p. 212; comp. Mariti, Vingyri, vol. i. p. 206), this part of the chain is now called Hagios Iskrovos, or St. Croce, from a convent dedicated to the Cross. (Engel, Kypros, vol. i. pp. 305, 306, 307.)

OLYNTA INS. (Ολυντα, Syl. p. 8; Solentii, It. Antonio; Pent. Tab.; Solenta, Grev. Buv.), a small island off the coast of Dalmatia, which now bears the name of Soles, and is famous for its honey. (Wilkinson, Dalmatia and Montenegro, vol. i. p. 187.)

OLYNTICUS. [Olyntius.]

OLYNTUS (Ολυντος, Syl. p. 26; Strab. vii. p. 330; Stephan. B.; Pomp. Mela. ii. 2. § 9; Plin. iv. 17: Ed. 'Olyntws), a town which stood at the head of the Toronae Gulf, between the peninsula of Pal- lene and Sthenoa, and was surrounded by a fertile plain. Originally a Bottiaeian town, at the time of the Ionian revolt it was passed into the hands of the Chalcidic Greeks (Herod. i. 12. § 447), to whom, under Cribobulus of Torone, it was handed over, by the Persian Artabazus, after taking the town, and slaying all the inhabitants (Herod. viii. 127). Afterwards Perdiccas prevailed on many of the Chalcidic settlers to abandon the small towns on the sea-coast, and make Olynthus, which was se- cured from the Chalcidian town of Chalanion (Thuc. i. 58). After this period the Botticans seem to have been the humble dependents of the Chal- cidians, with whom they are found joined on two occa- sions (Thuc. i. 65, ii. 79). The expedition of Brasidas secured the independence of the Olynthians, which was distinctly recognised by treaty (Thuc. v. 13). The town, from its maritime situation, became a very large and important place, n. c. 393, from the weakness of Amyntas, the Macedonian king, they were enabled to take into their alliance the smaller towns of maritime Macedonia, and gradually ad- vanced so far as to include the larger cities in this region, including even Pella. The military force of the Olynthian confederacy had now become so power- ful from the just and generous principles upon which it was framed, including full liberty of inter- marriage, of commercial dealings, and landed proprie- torship, that Acanthus and Apollonia, jealous of Olym- thian supremacy, and menaced in their independence, applied to Sparta, then in the height of its power, n. c. 385, to solicit intervention. The Spartan Eu- damidas was at once sent against Olynthus with such force as could be got ready, to check the new power. Telatia, the brother of Agesilas, was after- wards sent there with a force of 10,000 men, which the Spartan assembly had previously voted, and was joined by Derdas, prince of Elimeia, with 400 Ma- cedonian horse. But the conquest of Olynthus was no easy enterprise; it was not without much to keep the Spartan infantry at bay. Telatia, at first successful, becoming over con- fident, sustained a terrible defeat under the walls of the city. But the Spartans, not disheartened, thought only of repairing their blushes by fresh exertions. Agesipolis, his king, was placed in command, and ordered to prosecute the war with vigour; the young
prince died of a fever, and was succeeded by Polya- 
biades as general, who put an end to the war, B.C. 379. The Olynthians were reduced to such straits, 
that they were obliged to sue for peace, and, 
breaking up their own federation, enrolled themselves 
as sworn members of the Macedonian confederacy 
under obligations of fealty to Sparta (Xen. Hell. v. 2, 
§ 12, 3, § 18; Diodor. xvi. 21—23; Dem. de Falsa 
Leg. c. 75. p. 425). The subjugation of Olynthus 
was disastrous to Greece, by removing the strongest 
hedge of security against the Persians; for this part of 
the coast was the first to crush the bright promise of the 
confederacy; but it was reserved for Athens to deal it 
the most deadly blow, by the seizure of Pydna. 
Matone, and Potidaea, with the region about the 
Thermic gulf, between B.C. 366—363, at the expense 
of Olynthus. The Olynthians, though humbled, 
were not subdued; alarmed at Philip's conquest of 
Amphipolis, B.C. 358, they sent to negotiate with 
Athens, where, through the intrigues of the Macedo- 
ianians, they were resisted. Irritated at their 
advances being rejected, they closed with Philip, and 
received at his hands the district of Anthemus, as 
well as the important Athenian possession of Poti- 
daean. The Sultan, learning this, was too near and dangerous a neighbour; and, by a change 
of policy, Olynthus concluded a peace with Athens 
B.C. 352. After some time, during which there was 
a feeling of reciprocal mistrust between the Olynthians 
and Philip, war broke out in the middle of B.C. 350. 
Overtures for an alliance had been previously made 
by Athens, with which the Olynthians felt it prudent 
to comply; but the Olynthians were told that Sermonia of Olynthus as an 
ally. Demosthenes delivered the earliest of his memo- 
rable harangues; two other Olynthian speeches fol- 
ed. For a period of 80 years Olynthus had 
been the enemy of Athens, but the eloquence and 
statesman-like sagacity of Demosthenes induced the 
people to send succours to their ancient foes; and 
yet they were not able to persuade them to assist Oly- 
thus with sufficient vigour. Still the fate of the city 
was delayed; and the Olynthians, had they been on 
their guard against treachery within, might perhaps 
have saved themselves. The detail of the capture is 
unknown, but the struggling city fell, in B.C. 347, 
have ions of the hands of Philip, "callidus emptor Olynthii" (Just. iv. 47), of Philip's 
triumph, Demosthenes and Euclides: its doom was that of one taken by 
Leg. p. 426; Dio. xvi. 53). All that survived 
— men, women, and children — were sold as slaves; 
the town itself was destroyed. The fall of Olynthus 
completed the conquest of the Greek cities from the 
Thessalian frontier as far as Thracia — in all 10 
Chalcidic cities. Demosthenes (Philipp. iii. p. 115; 
comp. Strab. ii. p. 121; Justinian. viii. 3), speaking of them about five years afterwards, says that they were so thoroughly destroyed, that it might be supposed 
that they had never been inhabited. The site of 
Olynthus at Aio Modon is, however, known, by its distance of 60 stadia from Potidaea, as well as by such traces as have been found by its lagoon, in which the site was swamped by the inhabitants. 
The name of this marsh was Bolus (βολύς λαμψην), Hegesander, op. Athen. p. 334). Two rivers, the 
Aithas (Αϊθας) and Olynthias (Ολυνθιας- 
κότα), flowed into this lagoon from Apollonia (Athen. 
I. c.). Methymna was its harbour; and there was 
a spot near it, called Olynthias (Ολυνθιας- 
kōtē), Strat. vii. p. 220; Plut. de Am. Trans. 
475. 45; Arist. Mird. Asuc. 129; Plin. xi. 34), so 
came because black beetles could not live there. 
Eckel (vol. ii. p. 72) speaks of only one extant 
coin of Olynthus — the "type" a head of Heracles, 
with the lion's skin; but Mr. Millingen has engraved 
one of those beautiful Chalcidian coins on which the 
"legend" OAINO surrounds the head of Apollo on 
the one side, and the word XACAIAEKON, his lyre, 
on the reverse. (Consinry, Voyage, vol. ii. p. 161; 
Vormel, de Olympo Sib. citat., potestas et exter- 
ciones, Francisci ad M. 1829; Winterich, Consolat. 
Dem. de Cor. p. 66, seq.)

[EMB.]

OMANAA (Ομανα, Peripl. Mar. Erythr. c. 27, 36; 
Marican, Peripl. c. 28, ed. Müller, 1855), 
ports of some importance on the coast of Carmania, 
which is noticed also by Pliny (vi. 28. a. 32). 
Its position was near the modern bay of 
Petras, on the coast of Carmania, which is noticed 
also by Pliny (vi. 28. a. 32). 
where Harmant has suggested, at Cape Zamaa (r. 2. p. 421). Vincent places it a little to the 
E of Cape Issak. In Ptolemy, the name has been 
corrupted into Commana (vi. 8. § 7).

[OMANAA (ομανα), a deep bay on the 
south coast of Arabia east of Syagros, 600 stadia in dia-
meter, according to the Periplus, bounded on the 
east by a long island, which is made out by 
Geog. Min. tom. i. p. 18, doublets identical with 
the Omanum emporium, which Petley places in 
long. 77° 40', lat. 19° 45', which must have belonged 
to the Omanians mentioned by the same geographer 
(vi. 15), separated only by the Cattabani from the 
Mutes Asabarum, doubtless the mountains 
mentioned in the Periplus. If Rome Fortis be cor- 
trectly taken as the name of the island 
Oman must have been far to the west of the 
district of Arabia now called by that name, 
and within the territory of Hadramaut. The modern 
Oman is the south-eastern extremity of the penin- 
sula, and gives its name to the sea outside the 
mouth of the Persian Gulf, which washes it on the 
east and south. (Barrow, E. Persia, pp. 32, 33; Vincent, 
iii. 16; Forster, Geogr. of 
Arabia, vol. ii. pp. 175, 180, note.)

[OMAN or OMANNI (Omanis αυτωριο or 
Omanol, a branch of the Lygii, in the NE. of 
Germany, between the Oder and the Vistula, to 
the S. of the Burgundosi, and to the N. of the Lygii 
Diduni (Ptol. vii. 11. § 18). Tacitus (Ger. 45) in 
enumerating the tribes of the Lygii, speaks of 
the Omani, but a tribe occurs in his list bearing the 
name of Manimi, which from its resemblance is 
generally regarded as identical with the Omani. 
But nothing certain can be said.

[L. S.]
of Hidgar-selekh. The more magnificent of the two stands upon the top of a sandy hill, and appears to have been a species of Pantheon, since, according to tradition, it was dedicated to Ares (Apollo) and the other deities of the Omphite name by the soldiers quartered there. The smaller temple to the NW. was sacred to Isis. Both, indeed, are of an imposing architecture, and still retain the brilliant colours with which their builders adorned them. They are, however, of the Poelenaic age, with the exception of the temple, built into a wall of brick. This was part of a temple built by Thothmes III. in honour of the crocodile-headed god Sevak. The monarch is represented on the door-jamb, holding the measuring reed and chisel, the emblems of construction, and in the act of dedicating the temple. The Poelenaic portions of the larger temple present an exception to an almost universal rule in Egyptian architecture. It has no propylon or dromos in front of it, and the portico has an uneven number of columns, in all fifteen, arranged in a triple row. Of these columns thirteen are still erect. As there are two principal entrances, the temple would seem to be two united in one, strengthening the supposition that it was the Pantheon of the Omphite name. In front of the doorway of one of the adyta is a Greek inscription, recording the erection, or perhaps the restoration of the seko by Ptolemy Philometor and his sister-wife Cleopatra, b.c. 180–145. The hill on which the Omphite temples stand has been considerably excavated at its base by the river, which has protracted the enclosure to the Arabian desert.

The crocodile was held in special honour by the people of Omph; and in the adjacent catacombs are occasionally found mummies of the sacred animal. Juvalen, in his 15th satire, has given a lively description of a fight, of which he was an eye-witness, between the Omphite and the inhabitants of Tenytra, who were hermits of the coenobite order. On this occasion the men of Omph had the worst of it; and one of their number, having stumbled in his flight, was caught and eaten by the Tenytrites. The satirist, however, has represented Omph as nearer to Tenytra than it actually is, these towns, in fact, being nearly 100 miles from each other. The Roman coins of the Omphite name exhibit the crocodile and the head of Neith, god of Sevak.

The modern hamlet of Kaoum-Ombos, or the hill of Ombos, covers part of the site of the ancient Omph. The ruins have excited the attention of many distinguished modern travellers. Descriptions of them will be found in the following works:—Frucotte, Travels, vol. iv. p. 156; Hamilton, Alex- tinium, p. 34; Champollion, l’Egypte, vol. i. p. 162; Denon, Description de l’Egypte, vol. i. ch. 4, p. 1, fol.; Burckhardt, Nubia, 4to. p. 106; Belzoni, Travels, vol. ii. p. 314. On the opposite side of the Nile was a suburb of Omph, called Contru-Ombos. [W.B.D.]

OMBROS INS. [FORTUNATAE INS.]

OMBIONES (Of Sophos, Ptol. iii. 5, § 21), a people of European Sarmatia, whose seat appears to have been on the banks of the Carpasus, about the sources of the Vistula. Schafarik (Slav. Ant. vol. i. pp. 389—391, 407) considers them to be a Celtic people, grounding his arguments mainly upon the identity of their name with that of the Celtic — as he considers them to be — Umbrians, or the most ancient inhabitants of the Italian peninsula. Recent inquiry has thrown considerable doubt upon the derivation of the Umbrians from a Gaulish stock. [Italia, Vol. II. p. 86, b.] This is one proof, among others, of the futility of the use of names of nations in historical investigations; but, as there can be no doubt that the Greek settlements beyond the Carpathians, names of these foreign hordes must still linger in the countries they had once occupied long after their return westward in consequence of the movement of nations from the East. [E. B. J.]

OMENNOKARA (Omnokarna), a town in the district of Arica, in the division of Immis, near Gangem. There is no reason to doubt that it is the present Ahmed-nagor, celebrated for its rock fortress. (Ptol. vii. 1. § 83; comp Pott. Egeon Forsch. p. 78.)

OMIRAS. [EPHRATIS.]

OMPHALIUM (Of Mahal), a plain in Creta, so named from the legend of the birth of the babe Zeus from Rhé. The scene of the incident is laid near Theseae, Oinosus, and the river Triton. (Callim. Hymn. ad Iov. 45; Dion. v. 70; Schol. ad Nicand. Alexipharm. 7; Steph. B. a. v.; H希k, Kretas, vol. i. pp. 11, 404; Pasibley, Trav. vol. i. p. 224.)

OMPHALIUM (Of Mahal), one of the most ancient cities of the Chamanus in Epirus. (Ptol. iii. 14. § 7.) Stephanus B. (a. v.) erroneously calls it a city of Theseae. Leake places it at Fremenidi, in the valley of the Vīsa (the Aous). (Norther Greek, vol. iv. p. 129.)

ON. [HELIOPOLESS].

ONCAE. [THRAEAE.]

ONCAEAE. (Of Oenae), a place in Arcadia upon the river Laden, near Thel Brian, and containing a temple of Demeter Erinys. (Paus. viii. 25. § 4; Steph. B. a. v.) The Laden, after leaving this temple, passed that of Apollo Oncaeates on the left, and that of the boy Asclepius on the right. (Paus. viii. 25. § 11.) The name is derived by Pausanias from Ocus, a son of Apollo, who reigned at this place. Leake supposes that Thel Brian, a remarkable site on the right bank of the Laden between Thel Brian and the Tuthos, is the site of the temple of Asclepius. (Morea, vol. ii. p. 103.) Other writers mention a small town OCAS (of Ocaus) in Arcadia, which is probably the same as Oneceum. (Ticin., ad Lyc. 1225; Eym. M. p. 619; Flarvton. a. v.) ONIESKHS (Of Hainiesk), also in Arcadia, was the place of the Chonias in Epirus, opposite the north-western point of Corcyra, and the next port upon the coast to the south of Panormus. (Strab. vii. p. 324; Ptol. iii. 14. § 2.) It seems to have been a place of importance in the time of Cicero, and one of the ordinary points of departure from Epirus to Italy, as Cicero calls the wind favourable for making that passage an Oechsenitis. (Cic. ad Att. vi. 9.) According to Dionysius of Halicarnassus (Ant. Rom. i. 51) the real name of the place was the Port of Aschias (Aschias lambros), named after Aschias, the father of Aeneas; and it was probably owing to this tradition that the name Oecsenus assumed the form of Achiannus under the Byzantine emperors. Its site is the village of the Forty Saints. (Leake, Northern Greece, vol. i. p. 11.)

ONCHESTUS. 1. (Oxystis: Edo, Oxystis), an ancient town of Boöcia in the territory of Haïartus, said to have been founded by Onchestus, a son of Poseidon. (Paus. ii. 26. § 5; Steph. B. a. v.) It possessed a celebrated temple and grove of Poseidon, which is mentioned by Homer (Oxystis Σ', 7roνε Ποσειδονα, άγλαις Ποσειδον, H.)
ONEILIA. [Corendana, Vol. I. p. 674.]

ONEUM (Ovosa, Plut. ii. 16, § 4; Festu. Tav. 5.) Gough. Ross, is known to have been identified with Almisia, at the mouth of the Cettina.

ONEISIA. [Aurinxi.]

ONPISIA, an island near Crete, on the E. side of the promontory Itanos. (Plin. iv. 12. s. 20.)

O'NOBA AESTRooria (Ovosa Airvenzos, Plut. ii. 4, § 5), called also Synaca (Strabo, iii. 8. § 5), is an island in the Ionian Sea, near Quim. A maritime town of the Tarentines in Hispania Baetica, between the rivers Anaus and Assax. It was seated on the estuary of the river Lyxus, and on the road from the mouth of the Anaus to Augusta Emerita. (Itin. Ast. p. 451.)

O'NOBA. It is commonly identified with Hislea, where there are still some Roman remains, especially of an aqueduct; the vestiges of which, however, are fast disappearing, owing to its being used as a quarry by the boorish agriculturists of the neighbourhood. (Murray's Handbook of Spain, p. 170.) Near it lay Herculea Insula, mentioned by Strabo (iii. 150), called 'Hedadania' by Steph. B. (s. v.), now Salize. O'noba had a mint; and many coins of it are frequently found there bearing the name of the town, with a slight alteration in the spelling.—Ounba. (Florus. Med. ii. pp. 610, 649; Monnet, i. p. 23, Suppl. p. 39; Sextini, Med. Isp. p. 75, ap. Ubert, vol. ii. pt. 1. p. 340.)

2. Another town of Baetica, near Corduba. (Plin. iii. 1. s. 3.) In an inscription in Oritus (p. 1040, 5) it is called Cybaris; and (vol. ii. p. 346) places it near villa Corvus, in T. H. D. ONOBALAS. [Acerinza, No. 1.]

ONOBISATRES, a people of Aquitania, as the name stands in the common texts of Pliny (iv. 19); who has "Onobirates, Belendi, Salatus Pyreneus."
OPHIONENSES.

OPIS.

potos, Ptol. iv. 5. § 77) was probably the same with Ophiodes, and answers to the present Zemargant. The isle of Karaka, opposite the headland of Ras-al-Ayn, is, indeed, by some geographers supposed to be the true Ophiodes Insula. (Castro, Hist. Gen. des Voyages, vol. i. p. 205.) [W.B.J.]

OPHIONENSES or OPHIENENSES. [AETOLIA, p. 65, a.]

Caesar (De Bello; Ophiis; Ophiis; Zephyr; Zephyr; Zephyr; Zephyr; Zephyr; Zephyr; 'Ophiis; 'Ophiis, LXX; Joseph, Ant. viii. 6. § 4), a district, the name of which first occurs in the ethnographic table of Genesis, x. 29. Solomon caused a fleet to be built in the Edomite ports of the Red Sea, and Hiram supplied him with Phoenician mariners well acquainted with navigation, and also Tyrian vessels, "ship of Tarshish." (1 Kings, ix. 28; 2 Chron. vili. 18.) The articles of merchandise which were brought back once in three years from Ophiir were gold, silver, precious stones, ivory, apes, "kophim," and peacocks. ("thktikon," 1 Kings, s. 24; Acts xiv. 21). The term of Ophiir was considered to be of the most precious quality. (Job, x. 11, 24, xvii. 16; Ps. xlv. 9; Isai. xiii. 12; Ecclus. vii. 18.) In Jer. v. 9, "the gold from Ophir," and in Dan. x. 5, "the fine gold of Ophir," is, by a slight change of pronunciation, the same as that of Ophir.

Inscriptions have been written upon the details of these voyages. The researches of Genesis (Theologiae Linguarum Hab. vol. i. p. 141; and in Ezech und Griecher's Erzähler art. Ophiir), Benfey (Indiens, pp. 30—32) and Lassen (Ind. Ant. vol. i. pp. 537—539) have made it extremely probable that the W. shores of the Indian peninsula were visited by the Phoenicians, who, by their colonies in the Persian Gulf, and by their intercourse with the Geryones, were early acquainted with the periodically blowing monsoons. In favour of this Indian hypothesis is the remarkable circumstance that the names by which the articles of merchandise are designated are not Hebrew but Sanscrit.

The peacock, too, is an exclusively Indian bird; although it is extant in other parts of the W. they were often called by the Greeks "Median and Persian birds." The Samians were supposed to have originally belonged to Samos, as the bird was reared at first in the sanctuary dedicated to Hera in that island. Silks, also, which are first mentioned in Proverbs, xxvi. 22, could alone have been brought from India. Quaternaire (Mem. de l'Acad. des Insocr. vol. xv. pt. ii. 1845, pp. 349—402) agrees with Heeren (Researches, vol. ii. pp. 73, 74, trans.), who places Ophiir on the E. coast of Africa, and explains "thukim" to mean not peacocks, but parrots or guineafowls. Potenoy (vi. 7. § 41) speaks of a Saphara (Zopharap) as a metropolis of Arabia, and again of a Saphara (Zopharap), 1. 6, 13. 22. It was on, or near, the borders of the Genuita, or Graecia of Cosmopolis, a name which in Sanscrit signifies "fair-aborne." (Lassen, Discorsi de Taprobana Ins. p. 18; comp. Ind. Ant. vol. i. p. 537.) Sopha, on the E. coast of Africa, opposite to the island of Madagascar (London Geogr. Journ. vol. iii. p. 207), is described by Edrisi (ed. Jaubert, vol. i. p. 67) as a small town, situated in going by the Portuguese, after Gama's voyage of discovery. The letters r and s so frequently interchanged makes the name of the African Saphara equivalent for that of Saphara, which is used in the Septuagint with several other forms for the Ophiir of Solomon's and Hiram's fleet. Potenoy, it has been seen, has a Saphara in Arabia and a Sopha in India. The significant Sanscrit names of the mother-country had been repeated or reflected on neighbouring or opposite coasts, as in the present day occurs in many instances in the English and Spanish Americas. The name of Ophiir extends to Ophiir in America; thus it may be extended over a wide space, just as a Phoenician voyage to Tartessus might include touching at Cyrène and Carthage, Gadeira and Carne. (Humboldt, Cosmos, vol. ii. pp. 132, 133, notes 179—182, trans.) [E.B.J.]

OPHIS ("Ophes"), a river of Pontus, the mouth of which lies 7 stadia to the east of Hymeus, and which separated Colchis from the country of the Thiansian. (Arrian, Perip. Pont. Evan. p. 6; Anonym. Perip. p. 14, where it is called "Ophesii." This river still bears the name of Ophes. [L.S.]

OPHIS. [MARTINII.]

OPHISA INS. [PYTUBAR.] OPHUSIA, OPHUSISA. I. [TYR.]

2. A sea-god of the island of Cretes (Plin. iv. 20), which is probably represented by Gortapoulo or Anti-Gortis, unless it is the same as the Ophiia Ins. ("Ophiia, Stadiara, 321,), the ancient unaccountable coast-describer places near Laren. [E.B.J.]

OPHIUSIA ("Ophiusia"), a small island in the Propontis, off the coast of Mysia, is mentioned only by Pausanias (xvi. 31) and Stephanus B. (xvi. 362), where it is called "Ophiouessa"; it still bears its ancient name under the corrupt form of Afasia. (Pococke, Travels, iii. p. 167.) [L.S.]

OPHILIMUS ("Ophiimus"), a branch of Mount Paryadros in the north-west of Pontus, enclosing with Mount Lithus, the extensive and fertile district called Pharaonos. (Strab. xii. p. 556.) According to Hamilton (Researches, i. 438), it now bears the name of Xenos Daph and Odus Daph. [L.S.]

OPHRADUS, a river mentioned by Pliny (vi. 23, a. 23) as belonging to the province of Drangiana. Forbiger conjectures that it may be a tributary of the Erumandus (In.euenum), now called the Ksak Rind, in Persia.

OPRHAH, a city of Benjamin, written "Ephaphath" by the LXX. (Joshua, xviii. 23) and "Gophath" (1 Sam. xiii. 17). It is placed by Eusebius and S. Jerome v. M.F. east of Bethul. (Onomast. s. a. Aphra.) Dr. Robinson says that this accords well with the position of Et-Tangakh, a village of Greek Christians, on a conical hill on a high ridge of sand, which would probably not have been left unoccupied in ancient times. (Bib. Res. vol. ii. pp. 123—125.)

2. Ophra of the Abirizites ("Ephrath wa†ad†ou tou !Esph., LXX.; Judges, vi. 11, 24, viii. 27; in ver. 32. Afi !Esph.), a town in the half-tribe of Manassah, west of Jordan, the native place of Gideon, where Absalom was born, or Gog of Cambel, a name which in Sanscrit signifies "fair-aborne." (Lassen, Dieser, De Taprobana Ins. p. 18; comp. Ind. Ant. vol. i. p. 537.) Sopha, on the E. coast of Africa, opposite to the island of Madagascar (London Geogr. Journ. vol. iii. p. 207), is described by Edrisi (ed. Jaubert, vol. i. p. 67) as a small town, situated in going by the Portuguese, after Gama's voyage of discovery. The letters r and s so frequently interchanged makes the name of the African Sopha equivalent for that of Sopha, which is used in the Septuagint with several other forms for the Ophiir of Solomon's and Hiram's fleet. Potenoy, it has been seen, has a Sopha in Arabia and a Sopha in India. The significant Sanscrit names of the mother-country had been repeated or reflected on neighbouring or opposite coasts, as in the present day occurs in many instances in the English and Spanish Americas. The name of Ophiir extends to Ophiir in America; thus it may be extended over a wide space, just as a Phoenician voyage to Tartessus might include touching at Cyrène and Carthage, Gadeira and Carne. (Humboldt, Cosmos, vol. ii. pp. 132, 133, notes 179—182, trans.) [E.B.J.]

OPHIS ("Ophi", Herod. i. 189), a city of Babylonia, mentioned first by Herodotus, who simply states that...
OPITHEGIUM.

the river Tigris flowed by it. Xenophon, in the
Retreat of the Ten Thousand, speaks of it as a large
city situated upon the Phrygus (now Adhem), and
apparently at some distance from its junction with the
Tigris. Arrian, describing the return of Alexander
from the East, states that he sailed up the Tigris to
Opis, destroying on his way the gates which (as was
said) the Persians had placed across the river to
prevent any naval force ascending the stream. At
Opis he is said to have held a great assembly of all
his troops, and to have sent home those who were
no longer fit to serve. (Arrah. vii. 7.) Strabo speaks
of it as in his time a small village, but places it, like
Herodotus and Arrian, upon the Tigris (S. p. 60,
xii. 222), just 6 stadia from Ctesiphon, which last
in his account of the Tigris between Bagdād and Sīmyr-
raš, considers that some extensive ruins be met with
near the angle formed by the Adhem and Tigris, and
the remains of the Nahr-aras canal, mark the site
of Opis. But the change in the course of the
Tigris there observable has led to the
deformation of great part of the ancient city (Lynch, Geogr.
Journ. x. p. 95.)

OPITHEGIUM (Oπιθηγίων; Ech. Opiterginus;
Odero), a city of Venetia, situated about 24
miles from the sea, midway along the river Plavis
(Fishe) and Liqentia (Lisseman), on a small stream
(now called the Prado) flowing into the latter. No
mention of it is found in the Roman or Byzantine con-
quests of Venetia; but it appears to have under its
rule become a considerable municipal town, and is
mentioned by Strabo as a flourishing place, though
not a city of the first class. (Strab. v. p. 214.) In
the Civil War between Caesar and Pompey a body
of troops furnished by the Opitergini is mentioned
as having crossed the Rubicon. It is also
memorable as an example of self-devotion, in a naval
battle between the fleets of the two parties. (Liv. Ep.
cx.; Flor. iv. 2. § 33; Lucan, iv. 462—571.)
Tacitus also notices it as one of the more consider-
able towns in this part of Italy which were occupied
by the generals of Vespasian, Primus, and Varus.
(Tac. Ann. iii. 43; iv. 32; ii. 9.) Its remains are
considerable, as well as in the Itineraries; and
though Ammianus tells us it was taken and destroyed
by an irruption of the Quadri and Marcornami in a d.
372, it certainly recovered this blow, and was still a
considerable town under the Lombards. (Plin. iii. 19.
23; Ptol. iii. 1. § 30; Itin. Ant. p. 380; Tab.
Pest.; Ammian. xxix. 6. § 1; F. Dict. iv. 40.)
In an inscription of the reign of Alexander Severus,
the Opitergini bear the title of a Colonia; as it is not
turned such either by Fliny or Tacitus, it probably
obtained that rank under Trajan. (Orell. Invoc. 73;
Zumpt, de Colom. p. 402.) It was destroyed by the
Lombard king Rothari in A. D. 641, and again, in
less than 50 years afterwards, by Grimauidus (F.
Dict. iv. 47; v. 2); both events are mentioned again
from its ruins in the middle ages, and is still a con-
siderable town and an episcopal see.

Opi'ter-gium itself stood quite in the plain; but its
territory, which must have been extensive, com-
prised a considerable range of the adjoining Alpes, as
Fliny speaks of the river Liqentia as rising "ex
montibus Opiterginiis" (Plin. iii. 16. a. 29). The
Itinerary gives a line of cross-roads which pro-
ceded from Opitergium by Feltira (Feltore) and the
Val Sagone to Tridentum (Trent). (Itin. Ant.
p. 280.)

OPI'US (Ornus), a small port-town on the coast
of Pontus, probably on or near the mouth of the river
Opis. (Ptol. v. 6. § 6; Tab. Peuting.) It is placed
120 stadia west of the river Euxine, although its
name seems to indicate that it was
situated further west, near the river Opis. (L. S.)

OP'ONE (Οπόνη; Οπόνη τη Βασανα; Ptol. iv. 7.
§ 11; Peripl. Mar. Erat. p. 9.), the modern Ras
Banah or Ras Banasa, the coast of Africa, immediately
N. of the region called Asania (Asanipis), lat. 9° N.
The author of the Periplus, in his account of this coast,
says that Opona stood at the commencement of the highland
called by the ancients Mount Elephas. He
further defines its position by adding that since
there was on this coast an earlier name for Emporium —
the cape Guardiafei or Jerdfeoform of modern charts —
ships in bad weather ran down to Tabae for shelter,—the promontory now known as
Ras Banah, where stood the town called by Ptolemy
(i. 17. § 8, iv. 7. § 11) Ναυσίς ήθινν, the Banah
of the Arabsians. From thence a voyage of 400
stadia round sharply curving peninsula terminated
at the emporium of Opona. Here ended to
the S. the Regio Ararum of the ancients.

Opona was evidently a place of some commercial
importance. The region in which it stood was from
remotest ages the seat of the spice trade of Libya.
Throughout the range of Mount Elephas the valleys
that slope seawards produce frankincense, while
inland the carvans or emigrations of the ancients
reached perfection. But the Greeks, until a com-
paratively late period, were unacquainted with this
coast, and derived from the Arabsians its distinctive
local appellations. Opona, which doubtless occu-
pied the site, probably, therefore, represents also
the Arab name of a town called Afun or Bafcon,
and is the point where the ancient coast of the
Emporion — the cape Guardiafei or Jerdfeoform of
modern charts — ships in bad weather ran down to
Tabae for shelter, the promontory now known as
Ras Banah, where stood the town called by Ptolemy
(iv. 7. § 11) places Opona too far S. of cape Jerdfeoform.
The author of the Periplus more correctly sets it a degree further N., six days' voyage from a river which runs at the southern base of
Wady Hasfe, or Mount Elephas. The characteris-
tics of the entire tract, of which Opona formed one
extremity, are those of an elevated ridge lying be-
tween two seas,—the Red Sea and the ocean,—and
which, from its elevation and exposure to the NE.
monsoon, is humid and fertile, affording a marked con-
trast to the generally sterile and arid shore above and
below the highland of Elephas. S. of Opona there
is no trace of ancient commerce. The articles of
export from it are corn, emporitum, dedicated to
the author of the Periplus, cinnamon, distinguished as
"native," aroma, fragrant gums generally, molu,
or cinnamon of inferior quality; slaves of a superior
kind (κυριάκην κελευθώρα), principally for the
Egyptian market; and tortoise-shell of a superior
quality and in great abundance. (See Vincent,
Commerces et Navigation of the Ancient Nations.
P. 158—157.)

OPPIDUM NOVUM (Οπίδουμ Νέον, Ptol. iv.
2. § 25), a town of Mauretania, colonised in
the reign of the emperor Claudius, by the veterans
(Plin. r. 1.), which Ptolemy (l. c.) places 16° to the E. of
OPPIDUM NOVUM.
Manilana, and the Antonine Itinerary 18 M. P. to the W.; Ptolemy's position agrees with the Sinanab of Shaw (Trans. p. 346), where that traveller found ruins of a town, in the W. bank of the Chaliph. The town of the itinerary corresponds with El Khidara, the "Chadra" of Edrisi (Geog. Nub. p. 81), situated on a rising ground, on the brink of the same river, where there are also ruins. [E. B. J.]

OPPIDUM NOVUM, of Aquitania in Gallia, is placed by the Antonine Itinn. on the road from Aquitania Territorialis (Toulouse) to Tomis (Tolosa), and between Beneharrum and Aquae Converanarum. [Beneharrum; AQUAE CONVERANA.] D'Anville has fixed Oppidum Novum at Nage, the chief reason for which is some resemblance of name. [G. L.]

OPICELIUM, a town mentioned only by Strabo (iii. p. 157), and said to have been founded by one of the companions of Antenor, in the territory of the Cantabri. [T. H. D.]

OPTATIANA. [Dacia, Vol. i. p. 744, b.]

OPUS ("Oroctos, contr. of Oroctae, II. ii. 531; Ek. "Oroctoarios."), the chief town of a tribe of the Locri, who were called from this place the Locri Opuntii. In 42 B.C. the head of the Opunti, ("Oroctio, opyios akles, Strab. ix. p. 425; Opuntius Sinus, Plin. iv. 7. s. 12; Meli, iii. 3. § 6), a little inland, being 15 stadia from the shore according to Strabo (l. c.), or only a mile according to Livy (xxxviii. 6), was believed to be one of the most ancient towns in Greece. It was said to have been founded by Opus, a son of Lycus and Protogeneia; and in its neighbourhood Duscullum and Pirytha were reported to have resided. (Pind. Od. ix. 62, 87; Schol. ad loc.) It was the native city of Procrisus. (Hom. Il. viii. 326), and it is mentioned in the Homeric catalogue as one of the Locris towns subject to Ajax, son of Oileus (II. ii. 531). During the flourishing period of Greek history, it was regarded as the chief city of the eastern Locrians, for the distinction between the Opuntii and Epicemidii is not made either by Herodotus, Thucydides, or Polybius. Even Strabo, from whom the distinction is chiefly derived, in one place describes Opus as the capital of the Epicemidii (ix. p. 416), and the same is confirmed by Pliny (iv. 7. s. 12) and Stephanus (s. v. Oroctae; from which the name of the town is derived). The Opuntii joined Leonidas with all their forces at Thermopylae, and sent seven ships to the Greek fleet at Artemision. (Heron. vil. 203, viii. 1.) Subsequently they belonged to the anti-Athenian party in Greece. Accordingly, after the conquest of Boeotia by the Athenians, which followed the battle of Oenophelium, n. c. 456, the Athenians carried off 100 of the richest Opuntii as hostages. (Thuc. i. 108.) In the Peloponnesian War the Opuntian privateers annoyed the Athenian trade, and it was in order to check them that the Athenians fortified the small island of Alatana off the Opuntian coast. (Thuc. ii. 32.) In the war between Antigonus and Cassander, Opus opposed the cause of the latter, and was therefore besieged by Ptolemy, the general of Antigonus. (Diod. xiv. 78.)

The position of Opus is a disputed point. Mele- tius has fallen into the error of identifying it with Pandomites, which is in the territory of the Epicemidii. Many modern writers place Opus at Tzidams, where are several Hellenic remains; but Leake observes that Tzidams is in the sea; it is much too great to correspond with the testimony of Strabo and Livy. Accordingly Leake places Opus at Kerdiskemitsa, a village situated an hour to the south-eastward of Tzidams, at a distance from the coast corresponding to the position of Opus in Strabo, and where exist the remains of an ancient city. (Northern Greece, vol. ii. p. 173, seq.)

2. A town in the mountainous district of Acoriea in Elis, taken by the Spartans, when they invaded Elis at the close of the Peloponnesian War. The Scholiast on Pindar mentions a river Opus in Elis. The town was supposed to be near the stades of Strabo, and Helenian ruins at Skidde, and the river Opus may be the stream which there flows from a small lake into the Peneius. (Diod. xv. 17; Steph. B. s. v.; Strab. iv. p. 425; Schol. ad Pind. Od. ix. 64; Leake, Peloponnesiacs, p. 230; Curtius, Peloponnesiacs, vol. i. p. 41.]

ORBA ("Orba", a place mentioned by Ptolemy (vi. 8. s. 14) in Carmania, but apparently on the confines of Gedrosia. It seems not improbable that he has confounded it with Oroas, or Orasa, which was certainly in the latter province. Strabo (xv. p. 723) and Arrian (vi. 24) both apparently quoting from the same authority, speak of a place of this name in Gedrosia,—the capital, probably, of the Orasa ("Orba", "Oroas", or "Oroasa"); in this opinion are generally the Garamanes, the Orasa ("Orba"); and the celebrated rock Aornos. [V.]

ORBAE ("Orba", Arrian, vii. 22, 28), the chief town, in all probability, of the people who are generally called Oritas, though their name is written in different ways. It was situated in Gedrosia, and is most likely the same as is called in the Periplus of the Erythraean Sea, the Ormites or Orasae (c. 87, ed. Miller). The neighbourhood was rich in cori, wine, barley, and dates. [V.]

ORATHA ("Oratha"), a city described by Stephanus B. (s. v.), as in the district of Mesene, on the Tigris. As he does not state in which Mesene he supposes it to have been, it is impossible now to identify it. Its situation is however, on the eastern bank of the Euphrates, and it is the same as "Ur of the Chaldees." It is, however, more likely that it is "Ur castellum Persarum" (Amm. Marc. xxv. 8), now believed to be represented by the ruins of Al-Hathur; or perhaps, the Ur of Pliny (v. 24, s. 21). [V.]

ORBELEUS ("Orbolos", Herod. v. 16; Strabo. viii. p. 320; Diodor. xx. 19; Arrian, Anab. i. 1. § 2; Ptol. iii. 3, 11; 11. 1. § 1; Pomp. Mela, ii. 2, § 2; Plin. iv. 17), the great mountain on the frontiers of Thrace and Macedonia, which, beginning at the Strymonian plain and lake, extends towards the sources of the Strymon, where it unites with the summits called Scornius, in which the river had its origin. The amphibious inhabitants of lake Prasiass pronounced the summit of the mountain high, and piled, on its east side, which constitutes the range from this mountain. (Herod. L. c.) Cassander, after having assisted Auleolus, king of Paroia, against the Illyrian Autaraiatae, and having conquered them, transported 20,000 men, women, and children to Mt. Orbeius. (Diodor. L. c.) The epitoliser of Strabo (l. c.), who lived not long before the commencement of the 1st century, applies this name to the ridge of Hasenius and Rhotopae; Gatterer (Comment. Soc. Got. vol. iv. p. 99, vol. vi,
ORCADES.

p. 33; comp. Poppe, Prolegom., in Thuc. pars i. vol. ii. p. 321), in consequence, was inclined to believe that there were two mountains of this name. Kiepert (Karte der Europ. Türkei) identifies Orbetus with Paris Dauph. The district called Orbelia (Orophe, Lex. vol. ii. § 31), with that of Anthaxauros, derived its name from the mountain. (Leake, Northern Greece, vol. iii. pp. 311, 465.) E. B. J."

ORCADES (Orpaeis, vol. ii. 3. § 31), a group of small islands lying off the northern extremity of Britannia Barbara. According to Ptolemy (l.c.) and Meis (iii. § 7) they were 30 in number; a list of them (iv. 18) reckons 30; Orbelaus (l.c. 2 in 30), of which 20 were inhabited and 13 uninhabited. This last account agrees very nearly with that of Jornandes (B. Get. 1), who makes them 34 in number. See also Tacitus (Agric. 10) and the Itinerary (p. 508). The modern Orinous and Skitolaikos islands. [T. H. D.]

ORCALIO (Orcaioi), a small district of Galatia, a city and town on the northern coast of Britannia Barbara, now Dumfries Shetland islands. [T. H. D.]

ORCA (Orcaios, vol. ii. § 1), a promontory on the N. coast of Britannia Barbara, now Dumfries Head. It should be remarked, however, that Ptolemy (l.c.) places it on the N. coast of Gaul, and gives it the additional name of Tarxendum (Taureuđ). [T. H. D.]

ORCELIS (Orcelis, vol. ii. § 61). I. A town of the Besiteai in Hispamica Terracumensi, sometimes, but erroneously, identified with Orcinua. (Mentius, Exp. s. a. p. 186; Uberti, vol. ii. pt. i. 46.)

2. An inland town of Thrace. (Ptol. iii. 2. § 11.) [T. H. D.]

ORCCHENI (Orchynai), a people of Arabia Deserta, placed by Ptolemy on the Persian Gulf, i.e. to the NE. of his Arabia Felix. (Ptol. v. § 2). They were perhaps the inhabitants of Orccho mentioned below. [G.W.]

ORCHISTENE (Orchystenes, Strab. xxi. 598), a canton of Armenia, which Strabo (l.c.) describes as abounding in horses, but does not mention its position. [E. B. J.]

ORCHO (Orcho), a city of southern Babylon, placed by Ptolemy among the marathae in the direction of Arabia Deserta (v. 20. § 7). There can be little doubt that it is to be identified with one of the great mounds lately excavated in those parts, and that the one now called Warka represents its position. It was supposed that another mound in the immediate neighbourhood, Mauziqer, was the same as the "Ur of the Chaldees;" and there is now good reason for identifying it as the site of that celebrated city. Upon this mound were found the remains of inscriptions discovered by Mr. Taylor, Hur or Hurtil, which is nearly the same with the 'Orchē of the LXX., and the 'Orchē of Ptolemy (l.c.). Moreover, Hur and Warka are constantly connected in the inscriptions, just as Erech and Accad are in the Bible. It is most probable that the Orchē (Orchēso) described in Strabo as an astronomical observatory of the Chaldaean, dwelling near Babylon (xxi. p. 739) in Ptolemy, as a people of Arabia, living near the Persian Gulf (v. 19. § 2); and in Pliny, as an agricultural population, who banked up the waters of the Euphrates and compelled them to flow into the Tigris (vi. 27. a 31), were really the inhabitants of Orccho and of the district surrounding it. We now know that this country was ruled in very early times by a Chaldean race, some of the kings of which Berosus has recorded. (Rawlinson, in Athenaeum, 1854, No. 1377; Euseb. Prosop., Evang. ix. 17.) It is worthy of notice that Eusebius has preserved an ancient fragment from Eupolemes, who speaks of a city of Babylonia, Carminari, "which some call Urie (Orchē)." As the Assyrian name of Warka is written with a monogram which signifies "the Moon," and as the name Carminari would naturally be descriptive from the Arabic Kasmar, "the Moon," there is an additional connection between the two names. (Euseb. l.c.) It is also clear from the traditions that the names of the two cities were constantly interchanged. [F.]

ORCHOMENUS.

1. (Orchomēnos; in ins. and coins, 'Orchoménoς; Euh. 'Orchoménous, 'Orchoméneus), usually called the MINTIAN ORCHOMENUS (Orchoménos Miniiuxis, Hom. Ili. 511; Thuc. iv. 78; Strab. ii. 458; v. 414; x. 421). In antiquity the MINTIAN ORCHOMENUS, called also the THESSALIAN ORCHOMENUS, (Pline. iv. 8. 15) was the chief town of Boeotia, and was the birthplace of Andrus, a son of the Thessalian river Peneus, from which the country was called Andrius. (Paus. xix. 34. § 6; ap' Orkhoménoς ἀνδρια τῆς Θησαλίας, Schol. ad Apoll. Rhod. ii. 1190.) Andrus assigned part of his territory to the Aeolian Athenas, who adopted two of the grandsons of his brother Syrapsh; they gave their names to Haliartus and Coronea. Andrus was succeeded in his other part of his territory by his son Eteocles, who was the first to worship the Charites (Graces) in Greece. Upon the death of Eteocles the sovereignty devolved upon the family of Halkus or Aulmus, a son of Syrapsh. (Paus. xix. 34. § 7—ix. 33.) Halkus had two daughters, Chrysse and Chryssogeina. Chrysse by the god Areus became the mother of Amyntas, who succeeded the childless Eteocles, and called the country Phlegraens after himself. He also gave his name to the fierce and sacrificial race of the Phlegraeans, who separated themselves from the other Orchomenians and attempted to plunder the temple of Delphi. They were however all destroyed by the god, with the exception of a few who fled into the sea, where they laid out children, and was succeeded by Chrysse, the son of Chryssogeina by the god Poseidon. Chrysse was the father of the wealthy Mynyas, who built the treasury, and who gave his name to the Mynyan race. Mynyas was succeeded by his son Orchomenus, after whom the country was named. (Paus. ix. 36. §§ 1—6.) Some modern scholars have supposed that the Mynyas were Aasanians (Thirlwall, Hist. of Greece, vol. i. p. 91); but as they disappeared before the historical period, it is impossible to predicate anything certain respecting them. There is, however, a concurrence of tradition to the fact, that Orchomenus was in the earliest times not only the chief city of Boeotia, but one of the most powerful and wealthy cities of Greece. It is also said that the seven sons of Orchomenus glitters with names which express the traditional opinion of his unbounded wealth (Chrysse, Chrysogeina). Homer even compares the treasures which flowed into the city to those of the Egyptian Thebes (II. 381; comp. Enlath. i. c.) It would seem that at an early period Orchomenus ruled over
the whole of Northern Boeotia; and that even Thebes was for a time compelled to pay tribute to Erginus, king of Orchomenus. From this tribute, however, the Thebans were delivered by Hercules, who made war upon Orchomenus, and greatly reduced its power. (Paus. ix. 37. § 2; Strab. x. p. 414; Diod. iv. 18.) In the Heraclea campaign the Orchomenians were among the revolters, but distinct from the other Boeotian towns, and as sending 30 ships to the Trojan War (Il. ii. 511). Sixty years after the Trojan War, according to the received chronology, the sovereignty of the Minyae seems to have been overthrown by the Boeotian immigrants from Thebes; and Orchomenus became a member of the Boeotian confederation, with Athens, but distinct from the other Boeotian towns, and as sending 30 ships to the Trojan War (Il. ii. 511). The city now ceased to be the Mycenaean and became the Boeotian Orchomenus (Thuc. iv. 76); but it still remained a powerful state, and throughout the whole historical period was second only to Thebes in the Boeotian confederacy. The town of Chaeronea appears to have been always one of its dependencies. (Cic. in Pomp. 5; Herod. iii. 8.) The Peloponnesian War, together with the other Boeotian towns, with the exception of Thebes and Plataea, deserted the cause of Grecian independence. Orchomenus possessed an aristocratical government, and continued on friendly terms with Thebes, as long as the aristocratical party in the latter city had the direction of public affairs. But when, after the close of the Peloponnesian War, a revolution placed the government of Thebes in the hands of the democracy, Orchomenus became opposed to Thebes. Accordingly, when war broke out between Sparta and Thebes, and Lycurgus invaded Boeotia in b. c. 395, Orchomenus revolted from Thebes, and sent troops to assist Lycurgus in his siege of Halicarnassus (Plut. Lyca. 28; Xen. Hell. iii. 5. § 6, seq.; Plut. Alex. 1.).) (Cic. in Pomp. Leg. iii. § 3.) In the following year (b. c. 394), when all the other Boeotians joined the Thebans and Athenians at the battle of Coronea, the Orchomenians fought in the army of Agesilaus, who arrayed them against the Thebans. (Xen. Hell. iv. 3. § 15, Ages. 2. § 9.) It was now the object of the Spartans to deprive Thebes of its old reputation in the Peloponnesian War. This they effected by the peace of Antalcidas, b. c. 387, by which Thebes was obliged to acknowledge the independence of Orchomenus and of the cities of Boeotia. (Xen. Hell. v. 1. § 31.) The battle of Leuctra (b. c. 371) changed the position of affairs, and made Thebes the undisputed master of Boeotia. Orchomenus was now at the mercy of the Thebans, who were anxious to destroy the city, and reduce the inhabitants to slavery. Epaminondas, however, dissuaded them from carrying their wishes into effect, and induced them to pardon Orchomenus, and re-admit it as a member of the Boeotian confederation. (Diod. xv. 57.) The Thebans appeared to have yielded with reluctance to the generous advice of Epaminondas; and they took advantage of his absence in Thessaly, in b. c. 368, to carry their original design into effect. The pretext was that the 300 knights at Orchomenus had entered into a conspiracy with some Theban exiles to overthrow the democratic constitution of Thebes. It is not improbable that the whole story was a fiction; but the Thebans eagerly listened to the revolution, the only safe castle of the orchomenians, and decreed that the city should be destroyed. A Theban army was immediately sent against it, which burnt it to the ground, put all the male inhabitants to the sword, and sold all the women and children into slavery. (Diod. xv. 79; Paus. ix. 15. § 3.)

This atrocious act of vengeance remained as an indelible stigma upon the Theban character (Dem. c. Lepiad. p. 490.).

Orchomenus remained a long time in ruins, though the Athenians were anxious for its restoration, for the purpose of humbling Thebes. (Dem. Megal. pp. 205, 298.) It appears to have been rebuilt during the Peloponnesian War, when the Phocians endeavored to expel the Thebans from the northern parts of Boeotia. In b. c. 353 we find the Phocian leader Onomarchus in possession of Orchomenus and Coronea (Diod. xvi. 33, 35); and in the following year Phryllus was defeated in the neighbourhood of these towns. (Diod. xvi. 37.) Orchomenus, Coronea, and Thebes, were three fortified places in Boeotia, which the Phocians had in their power (Diod. xvi. 58); and from which they made their devastating inroads into the other parts of Boeotia. On the conclusion of the Sacred War, b. c. 346, Orchomenus was given by Philip to its implacable enemy the Thebans, who, under Philip's eyes, destroyed the town and burned all its inhabitants as slaves. (Aesch. de Falsa Leg. p. 309; Dem. Phil. ii. p. 69, de Pace, p. 62, de Falso Leg. p. 375.) It did not, however, remain long in ruins; for after the defeat of the Thebans and Athenians at the battle of Chaeronea, b. c. 338, it was rebuilt by Philip's order (Paus. iv. 27. § 10, ix. 37. § 6; according to Polybius 9, it was rebuilt by Alexander the Great after the destruction of Thebes). From this time the name of Orchomenus is seldom mentioned in history. Under the Romans it shared the common fate of the Boeotian towns, all of which were, in Strabo's time, only ruins and names, with the exception of Thebes and Tanagra.

Orchomenus was famous for the worship of the Charites or Graces, and for the Spring Festival in their honour, celebrated with musical contests, in which poets and musicians from all parts of Greece took part. Hence Pindar calls Orchomenus the city of the Charites (Pyth. xii. 45), and Theocritus describes them as the goddesses who love the Mycenaean Orchomenus (xvi. 104). An ancient inscription records the visit of a king of the island of Crete to the Charites. (Miller, Orchom. p. 172, sqq.) Pindar's fourteenth Olympic ode, which was written to commemorate the victory of Asopus, an Orchomenian, is in reality a hymn in honour of these goddesses, and was probably sung in their temple. It was in the marathae in the neighbourhood of Orchomenus that the satyric or flute-musicians, who exercised an important influence upon the development of Greek music. [See Vol. I. p. 414, b.]

The ruins of Orchomenus are to be seen near the village of Skiopi. The city stood at the edge of the marshes of the Copais lake, and occupied the triangular face of a steep mountain. The Cephisus "winds like a serpent around the southern base of the mountain (ἐν τῷ ὄροσει ἀπέκτεινον ἄσπις οὐκέτα, Βιονδρέων ἐς, Ἰππολιτοῦ ἐς, Ἰππ. Strab. ix. p. 494). At its northern base are the sources of the river Melas. [See Vol. I. p. 413, a.] Looks observes that the "upper part of the hill, forming a very acute angle, was fortified differently from the customary modes. Instead of a considerable portion of it having been enclosed to form an acropolis, there is only a small castle on the summit, having a long narrow approach to it from the body of the town, between walls which, for the last 200 yards, are almost parallel, and not more than 20 or 30 yards asunder. Below this approach to the citadel the breadth of the hill gradually
widen, and in the lowest part of the town the enclosed space is nearly square. It is defended on the lowest side by a wall, which crossed the slope of the hill along the crest of a ledge of rock, which there forms a division in the slope. In this wall, which is at three-fourths of the distance from the castle to the monastery, there are some foundations of the gate which formed the lower entrance into the city; and on the outside are many large masses of wrought stone, the remains, apparently, of some temple or other public building. The southern wall of the city, which follows a line parallel to the Cephissus, is traceable, with scarcely any intermission, through a distance of three-quarters of a mile; and in many places several courses of masonry are still extant. The wall derives its flank defence from square towers, placed for the most part at long intervals, with an intermediate short flank or break, in the line of wall. In a few places the masonry is of a very early age, but in general it is of the third kind, or almost regular." The former belongs to the earlier Orchomenus, the latter to the later city, and dates from the time of its restoration either by Philip or the Phocians. Towards the middle of the northern side of the hill of Orchomenus was a precipitous, and here the walls are not traceable. The circumference of the whole was about 2 miles. The citadel occupies a rock about 40 yards in diameter, and seems to have been an irregular hexagon; but three sides only remain, no foundations being visible on the eastern half of the rock. At the northern angle are the ruins of a tower, and parallel to the north-western side there is a ditch cut in the rock, beyond which are some traces of an outwork. The hill is commanded by the neighbouring part of Mount Acontium, but not at such a distance as to have been of importance in ancient warfare. The access to the castle from the city was first by an oblique flight of 44 steps, 6 feet wide, an ascent out of the rock, and then by a direct flight of 50 steps of the same kind."

The monuments, which Pausanias noticed at Orchomenus, were temples of Dionysus and the Charites,—of which the latter was a very ancient building,—a fountain, to which there was a descent, the treasury of Minyas, tombs of Minyas and Theseus, and a brazen figure bound by a chain of iron to a rock, which was said to be the ghost of Actaeon. Seven stadia from the town, at the sources of the river Meles, was a temple of Hercules. The Treasury of Attalus, a circular building on the summit not very pointed, but terminating in a stone, which was said to hold together the entire building. (Paus. ix. 38.) Pausanias expresses his admiration of this building, and says there was nothing more wonderful either in Greece or in any other country. The remains of the treasury still exist at the eastern extremity of the hill towards the lake, in front of the monastery. It was a building similar to the Treasury of Atreus at Mycenae. It was a circular vault of massive masonry embedded in the hill, with an arched roof, surmounted probably by a tumulus. The whole of the stone-work of the vault has now disappeared, but its form is vouched for by the circular cavity of the ground and by the description of Pausanias. It had a side-door of entrance, which is still entire, though completely embedded in earth up to the base of the architrave. There were probably two great slabs in the architrave, as at Mycenae, though one only is left, which is of white marble, and of which the size, according to Leake, is 16 feet in its greatest length, 8 in its greatest breadth, and 3 feet 2½ inches in thickness. The diameter of the vault seems to have been about 41 feet. Respecting the origin and destination of this, and other buildings of the same class, some remarks are made under Mycenae. [Vol. II. p. 383.] Strabo remarks (ix. p. 416) that the Orchomenus of his time was supposed to stand on a different site from the more ancient city, the foundations of the lake having forced the inhabitants to retire from the plain towards Mt. Acontium. And Leake observes, that this seems to accord with the position of the treasury on the outside of the existing walls, since it can hardly have been placed there originally. The acropolis, however, must always have stood upon the hill; but it is probable, that the city in the height of its power extended to the Cephissus.

The monastery of Skripé, which stands about midway between the treasury and the river, probably occupies the site of the temple of the Nymphs; for the pedestal of a tripod was dedicated to the Charites, which is now in the church, was found in an excavation made upon the spot. Some very ancient inscriptions, of which two are now in the British Museum, were found in the church of the monastery. They are in the Orkhamenian-Aeolic dialect, in which the digamma was used. (Xen. Anab. vi. 8. 8.4; Scholkamp's Breslau, 1844, 2nd ed.; Dodwell, Classical Tour, vol. i. p. 227, seq.; Leake, Northern Greece, vol. ii. p. 144, seq.; Mure, Tour

---

**PLAN OF ORCHOMENUS.**
A. The Cephissus.
B. The Meles.
C. Mount Acontium.
D. Orchomenus.
1. The Acropolis.
2. Treasury of Minyas.
3. Tombs of Minyas and Theseus.
4. Village of Skripé.
a. Road from Livadeia.
b. Road to Tithorea.
2. An ancient city of Arcadia, called by Thucydides (vv. 61) the ARCADIAN (ἀρκαδιας), to distinguish it from the Boeotian town. It was situated in a plain surrounded on every side by mountains. This plain was bounded on the N. by a low range of hills, called Anchisias, which separated it from the territory of Mantinea; on the N. by a lofty chain, called Olymptus, through which the passes into the territories of Pheneus and Symphalai; and on the E. and W. by two parallel chains running from N. to S., which bore no specific name in antiquity; the eastern range is in one part 9400 feet high, and the western about 4000 feet. The plain is divided into two by hills projecting on either side from the eastern and western ranges, and which approach so close as to allow space for only a narrow ravine between them. The western hill, on account of its rough and rugged form, was called Trachchi (Τραχχαίς) in antiquity; upon the summit of the western mountain stood the acropolis of Orchomenus. The northern plain is lower than the southern; the waters of the latter ran through the ravine between Mount Trachchi and that upon which Orchomenus stands into the northern plain, where, as there is no outlet for the waters, they form a considerable lake. (Paus. viii. 13. 4.)

The acropolis of Orchomenus, stood upon a lofty, steep, and insulated hill, nearly 3000 feet high, resembling the strong fortress of the Messenian Ithome, and, like the latter, commanding two plains. [See Vol. II. p. 338.] From its situation and its legendary history, we may conclude that it was one of the most powerful cities of Arcadia in early times. Pausanias also gives a list of the kings of Orchomenus, whom he represents at the same time as kings of Arcadia. One of these kings, Aristocrates, the son of Aeacius, was stoned to death by his people for violating the virgin priestess of Artemis Hymnia. Aristocrates was succeeded by his son Hicetas, and Hicetas by his son Aristocrates II., who, having abandoned the Messenians at the battle of the Trench in the second war against Sparta, experienced the fate of his grandfather, being stoned to death by the Arcadians. He appears to have been the last king of Orchomenus, who reigned over Arcadia, but his family was not deprived of the kingdom of Orchomenus, as is stated in some authorities, since we find a poet of that name represented as the poet of Mantinea. (Paus. viii. 5; Polyb. iv. 3; Herod. Pont. I. c.) It would appear, indeed, that royalty continued to exist at Orchomenus long after its abolition in most other Grecian cities, since Theophrastus related that Peisistratus, king of Orchomenus, was put to death by the aristocracy in the Peloponnesian War. (Paus. viii. 39.)

Orchomenos is mentioned by Homer, who gives it the epithet of παλιόμηδας (I. ii. 605); and it is also called ἕρεμος by Ovid (Met. vi. 416), and ἀφεντικός by Apollonius Rhodius (iii. 512). In the Persian wars Orchomenos sent 120 men to Thermopylae (Herod. viii. 102), and 600 to Plataea (ix. 28). In the Peloponnesian War, the Lacedaemonians deposited in Orchomenus the hostages they had taken from the Arcadians; but the walls of the city were then in a dilapidated state; and accordingly, when the Athenians and their Peloponnesian allies advanced against the city in a. c. 416, the Orchomenians dared not come out of their city, which was surrounded by the hosts of the confederacy. (Thuc. v. 61.) At the time of the foundation of Megalopolis, we find the Orchomenians exercising supremacy over Thebes, Methydrium, and Tenthos; but the inhabitants of these cities were then transferred to Megalopolis, and their territories assigned to the latter. (Paus. viii. 27. § 4.) The Orchomenians, throughout their sway in the Mantinian state, refused to join the Arcadian confederacy, and made war upon the Mantinians. (Xen. Hell. vi. 5. § 11; Dio. xvi. 62.) Henceforth Orchomenus lost its political importance; but, from its commanding situation, its possession was frequently an object of the belligerent powers in later times. In the war between Cassander and Polyperchon, it fell into the power of the former, n. c. 313. (Diod. xii. 63.) It subsequently espoused the side of the Aetolians, was taken by Cleomenes (Polyb. ii. 46); and was afterwards retaken by Antigonus Doson, who placed there a Macedonian garrison. (Polyb. ii. 54, iv. 6; Plut. Alex. 5.) It was given back by Philip to the Achaean League. (Livy. xxxii. 5.) Sc haron mentions it among the Arcadian cities, which had either disappeared, or of which there were scarcely any traces left (vi. 338); but this appears from Pausanias to have been an exaggeration. When this writer visited the place, the old city upon the summit of the mountain was in ruins, and there were only some vestiges of the agora and the town walls; but at the foot of the mount, still stood the town of Mantinea, retaken by the Arcadians, and containing a small population. The upper town was probably deserted at a very early period; for such is the natural strength of its position, that we can hardly suppose that the Orchomenians were dwelling there in the Peloponnesian War, when they were unable to resist an invading force. Pausanias mentions, as the most remarkable objects in the place, a source of water and temples of Poseidon and Aphrodite, with statues of stone. Close to the city was a wooden statue of Artemis, enclosed in a great cedar tree, and hence called Cedrateia. Below the city were several heaps of stones, said to have been erected to some persons slain in battle. (Paus. viii. 13.)

The village of Kalpaki stands on the site of the lower Orchomenus. On approaching the place from the south the traveller sees, on his left, tumuli, chiefly composed of collections of stones, as described by Pausanias. Just above Kalpaki are several pieces of white marble columns, belonging to an ancient temple. There are also some remains of a temple at a ruined church below the village, near which the river Korinthos is formed from the springs of which it is said to be the source. These ruins are described by Pausanias. On the summit of the hill are some remains of the walls of the more ancient Orchomenus.

In the territory of Orchomenus, but adjoining that of Mantinea, consequently on the northern slope of Mt. Anchisia, was the temple of Artemis Hydraetis, which was held in high veneration by all the Arcadians in the most ancient times. (Paus. viii. 5. § 11.) Its site is probably indicated by a chapel of the Virgin Mary, which stands east of Lervòthi.

In the southern plain is an ancient canal, which conducts the waters from the surrounding mountains.
ORCISTUS.  

through the ravine into the lower or northern plain, which is "the other Orchenesian plain" of Pau-

sania (viii. 13. § 4). After passing the ravine, at the
distance of 3 stadia from Orchomenus, the road divides into two. One turns to the left along the
northern side of the Orchenesian acropolis to Ca-

physa, and the other to Pheneus. (Paus. viii. 13. § 4, seq.)
The above-mentioned fountains are visible just be-

yond Trechyl, and a little further are some Helenic

ruins, which are those of Amlius. (Dodwell, Clas-

sical Tour, vol. ii. p. 425, seq.; Leake, Morea,

vol. iii. p. 99, seq.; Boblaye, Récherches, &c.,
p. 149; Curtius, Peloponnesos, vol. i. p. 219, seq.)

3. A town in Thessaly. [See above, p. 487.]

p. 415.)

ORCISTUS, a town in the north-east of Phrygia,

near the borders of Galatia. It was the see of a

bishop (Geogr. Sac. p. 256; Concil. Chalced. Tab.

Pesting.). It is placed by Col. Leake (Asia Minor,
p. 71), on the authority of an inscription found there by

Pococke, at Alekium, and, perhaps more cor-

rectly, by Seidler the younger, near 4, but 43

passus or 3 or 4 miles to the south-east of the village

of Alekium, where considerable remains of antiquity are

found. [L. S.]

OREDESUS. [ISACORUM PORTUS.]

OREDESUS. [ODESSUS.]

OREDESUS (Odesos, Herod. iv. 48), an af-

filiate of the latter, which the commentators usually

identify with the Sereth. (Schaubart, Asia, &c.,

vol. i. p. 506.) [E. B. J.]

ORDOVICE (Opodecos, Ptol. ii. § 18), a

people on the W. coast of Britannia Romana, op-

posite to the island of Mona. They occupied the

NW. portion of Wales, or that lying between Car-

digan Bay and the river Dee, viz., Montgomery-

shire, Denbighshire, Caernarvonshire, Denbigh-

shire, and Flintshire. ( Camden, p. 777; Tatt.

Ann. xii. 33, Agr. 18.) [T. H. D.]

ORESCII (Ophsenos), a people of Macedonia or

Thrace, known only from their coins. These have

been by some writers referred to the Orcestae; but it is

more probable, as suggested by Leake, that they

were one of the Thracian tribes who worked the

silver mines of Pangaeum; a circumstance which

will account for our finding silver coins of large size

and in considerable numbers struck by a people so

obscure that their name is not mentioned by any

ancient author (Leake, Northern Greece, vol. iii.
p. 213, Numismata Hellenicca, p. 81.) The coins in

question, one of which is annexed, closely resemble

in style and fabric those of the Bisaltic and Edeni

in the same neighbourhood. [E. H. B.]

COIN OF ORESCII.

ORESTAE (Orestae, Hecat. ap. Steph. B. s. a.;

Thuc. ii. 80; Polyb. viii. 30; Strab. vii. p. 326,
ix. p. 434; Plin. iv. 17), a people who are shown
by Thucydides (l. c.) to have bordered upon the
Macedonian Parvaeni, and who partly, perhaps, as
having been originally an Epirete tribe (Steph. B.
iv. 15), or terms them a Molossian tribe, were united
with the other Epiretes, under their prince Antiochus,
in support of the expedition of Cnemon and the Am-

bracioti against Acarnania. Afterwards they were

incorporated in the Macedonian kingdom. In the

peace finally granted to Philip, B. c. 196, by the

Romans, the Orcestae were declared free, because

they had been the first to revolt. (Liv. xxxiii. 34.)

ORESTEA (Orestes, Ptol. iii. 13. §§ 22, 23; Steph.

B. s. v.; Liv. xxvii. 33, xxv. 40) or ORCASTES

(Orestes, Strab. vii. p. 326), was the name given to

the district which they occupied, which, though it

is not named by Livy and Diodorus among the

countries which entered into the composition of the

Fourth Macedon, was probably included in it, be-

cause the greater part, at least of Orcestae, was situ-

ated to the E. of Pindus. This subdivision of Upper

Macedonia is represented by the modern districts of

Strumitsa, Analitza, and Kastoria. (Leake, Nor-

124.) [E. B. J.]

ORESTHASIUM (Oresthous, Paus.; Oph胥

oros, Thuc., Orestoros, Her. Eur. v. 64), a

town on the south of Arcadia, in the district of Mea-

nalia, a little to the right of the road, leading from Megalopolis to

Pallantium and Tegae. Its inhabitants were re-

moved to Megalopolis on the foundation of the lat-

er city. Its territory is called Oresthiae by Thucy-

dides (iv. 154), and in it was situated Ladaonia, which

became a suburb of Megalopolis. [LADOCEIA.]

Leake places (Oresthasium at or near the town of

Tambour, and conjectures that it may have occu-

pied the site of the village of Marmara or Marmari,

a name often attached in Greece to places where

ancient wrought or sculptured stones have been

found. (Paus. vii. 44. § 2, comp. viii. 3. § 1, 27. §
3, 39. § 4; Herod. i. 11, Plut. Artus 10; Thuc. v.
39. § 44; Eriup. x. 154; Chrys. xvi. 154; Steph. B.
ii. s. v.; Leake, Peloponnesica, p. 247.)

ORESTHIS. [ORESTHASIUM.]

ORESTIS. [ORESTAE.]  

ORESTIAS. [HADRIMANPOLIS, No. 1.]

ORETANI (Oretare, Ptol. ii. 6. § 59), a

powerful people in the S. of Hispania Tarraconensis,

inhabiting the territory E. of Baetica, as far as the

Thago Nova, and spreading to the N. beyond the

river Anas. The Baetis flowed through their coun-

try in its earliest course. (Polyb. x. 38, xi.
30; Strab. iii. pp. 152, 156; Plin. iii. 3. s. 4; Liv.
xxxi. 11, xxv. 7.) Thus they inhabited the E. part of

Grauna, the whole of Mancha, and the W. part of

Murcia. Their chief city was Castulo, now Ca-

tolina.

ORETUM GERMANORUM (Oretoro Gemman-

orum, Ptol. ii. 6. § 59). Germani was another name

for the Oretani ("Oretani, qui et Germani nomi-

nantur," Plin. iii. 3. s. 4), and Oretum was one of

their towns; probably the Orisia of Artemidorus,

quoted by Steph. B. (s. v.), and the Oris of Strabo
(ii. p. 152). It is also identified with the place

named Anargo, a village near Almon, where there is a

hermitage still called De Otero, and close by several

ruins, a Roman bridge, &c. (Moraes, Ant p. 8, b., p. 76, s. a.;

p. 132.) [T. H. D.]
OREUS

OREUS (Ὀρεύς : Eth. Ὠρεύτης : the territory Ορέα, Strab. x. p. 445), formerly called HISTIAEAEA (Ἱστιαίαι, also Ἱστιαίαι : Eth. Ἱστιαῖος, a town in the north of Euboea, situated upon the river Callas, at the foot of Mt. Telephirium, and opposite Antron on the Thessalian coast. From this town the whole northeastern portion of Euboea was named Histiaeotis (Ἱστιαίωτης, Ion. Ἱστιαῖωτης, Herod. vii. 29). According to some it was a colony from the Attic demus of Histiaeas (Strab. x. p. 445); according to others it was founded by the Thessalian Parrhebii. (Sycyn. Ch. 578.) It was one of the most ancient and most important of the Euboean cities. It occurs in Homer, who gives it the epithet of υμεροῦδας (Ili. ii. 537); and Sicyon mentions it as one of the four cities of Euboea (p. 22). After the battle of Artemision, when the Grecian fleet sailed southwards, Histiaeas was occupied by the Persians. (Herod. vii. 23.) Upon the expulsion of the Persians from Greece, Histiaeas, with the other Euboean towns, became subject to Attica. In the revolt of Euboea from Athens (n. a. 455), we may conclude that Histiaeas took a prominent part, since Pericles, upon the return of the island, expelled the inhabitants from the city, and peopled it with 2000 Athenian colonists. The expelled Histiaeans were said by Theopompos to have withdrawn to Macedon. (Thuc. i. 114; Diod. xil. 7, 22; Plut. Per. 23; Theopom. ap. Strab. x. p. 445. From this time onwards the name of Euboea was changed to Orea, which was originally a demus dependent upon Histiaeas. (Strab. l. c.; Paus. vii. 26. § 4.) It is true that Thucydides upon one occasion subsequently calls the town by its ancient name (vii. 57); but he speaks of it as Orea, in relating the second revolt of Euboea in n. c. 411, where he says that it was the only town in Euboea not submitted to Athens. (Thuc. vii. 95.) At the end of the Peloponnesian War, Orea became subject to Sparta; the Athenian colonists were doubtless expelled, and a portion at least of its ancient inhabitants restored; and accordingly we read that this town remained faithful to Sparta and cherished a lasting hatred against Athens. (Dion. xiv. 30.) Neocles, sup- posed to be Jason of Pherae, made a spurious revolt of Orea for a time; but he was expelled by Thessapidas, the Lacedaemonian commander; and the Athenian Chabrias endeavoured in vain to obtain possession of the town. (Diod. l. c.) But shortly afterwards, before the battle of Leuctra, Orea revolted from Sparta. (Xen. Hell. v. 4, § 58.) In the subsequent war between the Athenians and the Athe- nians, a party in Orea was friendly to Philip; and by the aid of this monarch Philistides became tyrant of the city (Dem. Phil. iii. pp. 119, 127, de Cor. p. 248; Strab. l. c.); but the Athenians, at the in- stigation of Demostrhenes, sent an expedition against Orea, which expelled Philistides, and, according to Cicero (De leg. x. 33; De fin. iii. 29, Charax, ap. Steph. s. a. Ὀρεύς). In consequence of its geographical position and its fortifications, Orea became an important place in the subsequent wars. In the contest between Antigonus and Cassander it was besieged by the latter, who, however, obliged to retire upon the approach of Philomel, the general of Antigonus. (Dion. Cass. 75, 77.) In the first war between the Romans and Philip, it was betrayed to the former by the commander of the Macedonian garrison, n. c. 207. (Liv. xxviii. 6.) In the second war it was taken by the Romans by assault, n. c. 200. (Liv. xxxi. 46.) Soon afterwards, in

R. C. 196, it was declared free by T. Quinctius Flamininus along with the other Greek states. (Polyb. xxviii. 23, 30; Liv. xxxii. 31, 34.) Pliny mentions it among the cities of Euboea no longer existing in his time (Plin. iv. 21. s. 21), but it still occurs in the lists of Ptolemy, under the corrupt form of Άξίας (vii. 15. § 25). Strabo says that Orea was situated upon a lofty hill named Dymus (x. p. 445). Livy describes it as having two citadels, one overlooking the sea and the other in the middle of the city (xxvii. 6). There are still some remains of the ancient walls at the western end of the bay, which is still called the bay of Orea. (Stephani, Reise, ge. pp. 33, seq.; Less. De ret. v. 10. i. 18.)

ORGANYA. [Orynia.]

ORAGAS (Ὀραγάς), a little tributary of the Mar- ander in Phrygia, flowing into the main river on the south-east of Celaenae (Strab. x. p. 578; Plin. v. 29, where it is called Oraga). It is probably the stream crossed by Mr. Arundel (Diac. in As. Min. i. p. 185) between Phrygian and the bridge of the Mae- ander near Digeia; but its modern name is un- known. [L. S.]

ORGBUSUS, ORGBUSYS. [DASARISTAE, Vol. i. p. 746. a.]

ORGLA. [Lerongtes.]

ORGOCYNT. [Taurica Chersonesia.]

ORICUS, ORICUS (Ὀρεικός : Eth. Ὠρικός : the mountain Ορείς, Grec. Οριкоς, g.]

ORICUM, ORICUS (Ὀρικοῦ : Hecat. Fr. 75 ap. Steph. B. a. e.; Herod. ix. 92; Scyl. p. 10. Polyb. viii. 19; Sycyn. 440; Est. ad Dion. 331; Ὀρικός, Ptol. iii. 14. § 2; Pomp. Mela. ii. 3. § 20; Plin. iii. 26), a town and harbour of Illyricum, not far from Apollonia and the mouth of the Aoos. Legend ascribes its foundation to the Euboeans on their return from Troy (Sycyn. l. c.); and Apollonius (Argon. iv. 1216) speaks of the arrival of a party of Colchians at this port; and thus Pliny (l. c.) calls it a Colchian colony. Oricum is known in history as a haven frequented by the Romans in their communications with Greece, from its being very conveniently situated for the passage from the city of Brundisium to the island of the same name; it was taken by Philip V. of Macedon in 171 B.C. but afterwards fell into the hands of the Romans and M. Valerius Laevinus, who commanded at Brundisium, with a single legion and a small fleet. (Liv. xxiv. 40.) After the campaign of n. c. 167, Aemilius Paulus embarked his victorious troops from Oricum for Italy. (Plut. Aem. Pas. 29.) Caesar, after he had disembarked his troops at Palaestra (Lucan. iv. 460; comp. Cass. B. C. iii. 6, where the reading Pharsalus or Pharsalia, is a mistake or corruption of the MSS.), or the sheltered beach of Pallas, surrounded by the dangerous promontories of the Cerasian mountains, within one day of his landing marched to Oricum, where a squadron of ships (n. c. 167) compelled the enemy (Cass. B. C. iii. 11; Appian, B. C. ii. 54.). The Oricii declared their unwillingness to resist the Roman consul; and Torquatus, the governor, delivered up the keys of the fortress to Caesar. The small fleet in which he had brought his forces over was laid up at Oricum, where the harbour was blocked up by sinking a vessel at its mouth. Cnaeus, the son of Pompeius, made a spirited attack on its strong- hold, and, cutting out four of the vessels, burnt the rest. (Cass. B. C. iii. 40.) It continued as an important haven on the Adriatic. (Hor. Carm. iii. 7. 5; Propert. Eleg. i. 8, 20; Lucan. iii. 187.) The
name of its harbour was PARUMUS (Πάρομος, Strab. vii. p. 316), now Porta Ragusa; while the CHELDONIUS (Κηλευθός, Ptol. iii. 13. §§ 2, 5) is identified with the river of Dukkada. It would seem from Virgil (Aen. x. 158) that Orcicum was famous for its terebinthus, while Nicander (Thes. 516) al-
ludes to its boxwood. The town was restored by the munificence of Herodes Atticus. (Philost. Hér. Att. 5.) To the E. of the mouth of the river of Dukkada, is a succession of lagoons, in the midst of which lies Orcicum, on the desert site now called Erizako, occupied (in 1818) only by two or three huts among the vestiges of an aqueduct. (Smyth, Mediterranean, p. 46.) The present name Anna Conn. xiii. p. 389) is accented on the last syllable, as in the ancient word, and E substituted for O by a common dialectic change. (Pouqueville, Voyage, vol. i. p. 364; Leake, North. Greece, vol. i. pp. 36, 90.) A coin of Orcicum has for type a head of Apollo. (Eckhel, vol. ii. p. 167.) [L. B. J.]

ORIGENOMESCI [ORIGENOMESCI]

ORIGICAM (Οριγικάμ). Ptolemy (ii. 9. § 7) makes this town the chief place of the Atri-
bati or Atrabates in Balearia. There is nothing that fixes the position of Origica except its re-
ssemblance to the name Orchis, which Clever sugges-
ted. Orchies is between Donway and Tourneay, and appears to be beyond the limits of the At-
rabates, whose chief town in Caesar's time was Nem-
tacum (Arvias). [G. L.]

ORINGIS. [AUREMNA.]

ORIPPO, a town of Hispania Baetica, on the road from Gades to Hispallia. (Plin. iii. 1. a. 3; I. Vit. p. 410.) Commonly identified with Villa de los Hermaños, though some have men-
tioned Flores, Esp. Segr. i. p. 111, Med. ii. p. 512; Mironet, l. p. 23, Suppl. i. p. 39; Sewack, Med. p. 77.)

[TH. D. B.]

COIN OF ORIPPO.

ORITAE (Οριταῖ), a people inhabiting the sea-
coast of Gedeoia, with whom Alexander fell in on his march from the Indus to Persia. (Arrian, vi. 21, 23, 24, &c.) Their territory appears to have been bounded on the east by the Arimach, and on the west by a mountain spur which reached the sea at Cape Morea. (Vincent, Voy. of Neorochus, i. p. 217.) There is considerable variation in the manner in which their names are written in dif-
ferent authorities: thus they appear as Oritate in Arri-an (Indic. 23. Exped. Alex. vi. 22); Οριταῖ in Strabo (v. p. 720). Dionysius Perieget. (1. 1006), Piatarch (Alex. c. 66), and Stephanus B.; as Ori in Arri-an (vi. 28) and Pliny (vi. 23. § 26); and Horitae in Curtius (ix. 10. 6); yet there can be no doubt that they are one and the same people. Arrian and Strabo have described them at some

length. According to the former, they were an Indian nation (vi. 21; cf. Diod. xvii. 105), who wore the same arms and dress as those people, but differed from them in manners and institutions (Ind. c. 23). According to the latter they were a race living under their own laws (v. p. 720), and armed with javelins hardened at the point by fire and poisoned (v. p. 723). In another place Ar-
rian appears to have given the true Indians to the river Arbata (or Parvata), the eastern boundary of the Oritae (Indic. c. 22); and the same view is taken by Pliny (vii. 2). Pliny calls them "Ihebho-
paghi Oritae" (vii. 23. § 29); Curtius "Indi mari-
timius." (ix. 10. 8.) It is true that the true form of the name was Hortia, as the Nabian geo-
grapher places a town called Hora on the route to Piraius in Macedonia. (Comp. D'Anville, Eclair-
cissement, fo. p. 42; Edrisi, Geog. Nub. p. 58.)

ORIUNDUS. [BARRAMA.]

ORMENIUM (Ορμηνίου), a town of Themiscy,
a town in the Catalogue of Ships along with Hyperpie and Asterium as belonging to Euryyous (Horn. Il. ii. 734). It was said to have been founded by Ormenus, the grandson of Aesolus, and was the birthplace of Phoenix. (Demetr. Secpains, ap. Strab. i. p. 438, seq.) Strabo identifies this town with a place in Mysia called Ornimenion; which is at the foot of Mt. Pelion, at the distance of 27 stadia from Demetrius, on the road passing through Iolcaus, which was 7 stadia from Demetrius and 20 from Orniminium. (Strab. l. c.) Leake, however, observes that the Ormenium of Homer can hardly have been the same as the Orminium of Strabo, since it appears from the situation of Asterium that Euryyous ruled over the plains of Themiscy, which are watered by the Apidanus and Enipeus. (Leake, Northern Greece, vol. iv. p. 434, seq.)

ORMINUM (Ορμίνου μεσον), a mountain in the north-eastern part of Bithynia, terminating in Cape Podium (Ptol. v. i. §§ 10, 11). Alcinous sup-
poses it to be the same as the mountain now called Demne Jolok. [L.]

ONEREAE. [OPOLOEIS.] A town in the Argeia, mentioned in the IIiad (ii 571), which is said to have derived its name from Ornes, the son of Erechtheus. Ornes retained its ancient Cy-
 nirian inhabitants, when Argos was conquered by the Durians. It continued independent of Argos for a long time; but it was finally conquered by the Argives, who removed the Ornes to their own city. (Paus. ii. 25. § 6, viii. 27. § 1.) Thucy-
dides mentions (v. 67) the Ornetae and Cleonaei as allies (οἰκυμενοις) of the Argives in b. c. 418; and the same historian relates (vi. 7) that Ornes was destroyed by the Argives in b. c. 416. (Comp. Diod. xii. 81.) It might therefore be inferred that the destruction of Ornes by the Argives in b. c. 416 is the event referred to by Pausanias. But Müller concludes from a well-known passage of Hera-
dotus (vii. 73) that Ornes had been conquered by Argos long before, that its inhabitants were reduced to the condition of Perioeci; and that all the Perioeci in the Argeia were called Ornetae from this place. But the Ornetae mentioned by Thucydides (x. 67) had not been Perioeci, since they are called alli; and the passage of Herodotus does not require, and in fact hardly admits of, Müller's interpretation. "The Cynurians," says Herodotus (I. c.), "have become Doricized by the Argives and by time, being Ornetae and Perioeci." These words would seem
clearly to mean that, while the other Crurnished become Paroeci, the Orneae continued independent,—an interpretation which is in accordance with the account of Theophrastus. (Müller, *Aegyptica*, p. 48, note 151; *Aegyptus*, iii. 4, § 31: *Arsinoë*, ed. Th. v. c. 8.) With respect to the site of Orneae we learn from Pausanias (v. 25 § 5) that it was situated on the ruins of Phyllais and Sieyonia, at the distance of 120 stadia from Argos, being 60 stadia from Lyrcia, which was also 60 stadia from Argos. Strabo (viii. p. 382) says that Orneae was situated on a river, and that above the town of the Sieyoniae; for the other passage of Strabo (viii. p. 578), which states that Orneae lay between Corinth and Sieyonia, and that it was not mentioned by Homer, is probably an interpolation. (See Kramer's *Strabo*, vol. ii. p. 186.) Orneae stood on the northern of the two roads, which led from Argos to Mantinea. This northern road was called Climax, and followed the course of the Inachus. [An, following Pococke, p. 301.] Rosc supposes Orneae to have been situated on the river, which flows from the south by the village of Lione and which helps to form the western arm of the Asopos. Leake places it too far to the east on the direct road from Argos to Phlius. (Rosc, *Reisen im Peloponnes*, p. 133; comp. Leake, *Moeres*, vol. ii. p. 35; *O.R.*, 4.)

**ORNE.** (Ornae), a town of Thrace mentioned only by Hierocles (p. 632). [T. H. D.]

**ORNIAE.** (Ornionae, Ptol. ii. 6 § 38), a tribe of the Astures in Hispania Tarraconensis. Their chief town was Intercatia. [T. H. D.]

**ORNITON POLIS.** (Ornitonic polis), a city of the Sidonians, according to Sclavus (ap. Pausan., * loc.*). Rosc supposes that the town is exactly by Strabo between Tyre and Sidon (p. 768). Pliny mentions together "Sarepta et Ornitonia oppida et Sidon" (v. 19). Beland suggests that it may be "Tarnegovia superior," which the Talmud places above Caesarea; Tarnegolda in Hebrew being equivalent to the Gallus of Latin = Ἐφραί in Greek. Pococke conjectures that it may be represented by an ancient site on the shore of the Phoenician plain, where he noticed "the traces of a former site called 'Alūsā, consisting of confused heaps of stones, with several old wells." There are also "many sepulchral grooves, hewn out of the hard limestone rock," in the precipitous base of the projecting mountain which here approaches the coast,-furnishing clear indications of an ancient city in the vicinity. (Bib. *Rec.*, v. iii. p. 411, and note 2; Pococke, *Observations*, vol. ii. p. 84.)

**OBANDA.** A town in the mountains of Pisidia, near the south-western shore of lake Trogitis (Liv. xxxviii. 97. 99; *Plin. v. 26*). From this town the whole district derived the name of Oranienus tractus, the inhabitants of which, called Oranidenses or Orandici (Orandiscus or Orandanus), possessed, besides the chief town Oranda, also Mithassa and Pappas (Liv. xxxviii. 18. 19; *Polyb. xxii. 25, *Ptol. v. 4. § 12.3 Hamilton (Researches, i. p. 478) believes that the ruins he found on the slope of a hill near lake Oranda marked the site of Oranda; but it would seem that its remains must be looked for a little further east.

**OBOATIS.** [Arosma.]

**OBOIAE.** (Oboia), a town on the western coast of Enoes, between Aedepeus and Aegae, which possessed an oracle of Apollo Selinuntius. (Strab. p. 445 comp. *ib. ix. 405.*) The town was partly destroyed by an earthquake and an inundation of the sea in n. c. 426. (Thuc. iii. 89.) This town seems to be the one mentioned by Stephanus under the name of Oropae ('Oropo), who describes it as "the city of Apollo, near a very renowned temple of Apollo." (Steph. B. s. v. *Kopropo.*) There are some remains of the walls of Orbeae at Routis, which word is only a corruption of the ancient name. (Leake, *Northern Greece*, vol. ii. p. 178.)

**OBOS, or ORBIS.** (Orpos), a river of Narbonensis in Gallia. Ptolemy (iv. 10 § 2) places the river Oboeus between the mouth of the Aude and the Aradus (Hérault), which shows that it is the Orbe. In Strabo's text (iv. p. 182) it is written Oboia, which Grockard unnecessarily corrects, for Orbis and Obris were probably used indifferently, and it seems that Obris is the original reading in Mela (ii. 5, ed. J. Vossii, note). Mela says that the Orbe flows past Bastarres (Béziers), and that it also passes Basturas on the [G. L.]. In the Ora Maritima (v. 590) the name is Orobis. The Orbe rises in the Cévennes in the north-west part of the department of Hérault, and has a very winding course in the upper part. It is above 60 miles long.

**OBOLANUM, in the north part of Gallia, is placed by the Antonine Itineraries as a town in the province of Proconsularium (Reina) to Trier. It is placed halfway between Epomeum (Epomc) and Andanthes, which D'Anville supposes to be Epernach, by which he means Echternach: others place Andanthes about *Aveno*. The name Arden is clearly represented Oromanes, in which the last remains as it is said, have been found. Arden is in the diocese of Luxembourg.

**OROMASCI, a people of North Gallia, whose position is thus described by Pliny (iv. c. 17), who is proceeding in his description of the Scheldt southwards:—"Deinde Menapi, Morini, Oromanesiaci juncto pace qui Grossiarus vocatur." In Hadrian's text the name is written Oroninasmaciand, yet he says that the MSS. have Orinasmaci. The name is otherwise unknown. D'Anville supposes that the name Oromanesiaci is represented by the name of a tract of country between Calais and Gravelines, which is Mark or Merk, and borders on the Boulonnais, in which the pagus Grossiarus was. [Gros- *Solauchum.* This is mere guess, but it is all that we can do for him regarding Orominesiaci, the most renowned river of Syria, used by the poet Juvenal for the country, "in Tiberim defluxit Orontes." (Juv. iii.) Its original name, according to Strabo, was Typhon (Topyn), and his account both of its earlier and later names, follows his description of Antioch. The river Orontes flows near the city. This
ORONITES. (vi. 2. § 4). They derive their name from Ἐρυσέα, a pure old Persian root, which was usually Hellenized into Oropes or Oronites. (Rawlinson, Journ. of Geog. Soc. x. p. 73.)

OROPUS (Ὀρόπος, rarely Ὠρόπος, Pau. vii. 11. § 4; comp. Steph. B. s. v. Ὠρόπος, and according to Steph B. Ὠρόπος, a town on the borders of Attica and Boeotia, and the capital of a district, called after it Ὠροπία (Ὄροπία). This district is a maritime plain, through which the Asopus flows into the sea, and extends for 5 miles along the shore. It is separated from the plain of Eleusis by a long line of some hills, which are a continuation of the principal chain of the Diacarian mountains. Oropus was originally a town of Boeotia; and, from its position in the maritime plain of the Asopus, it naturally belonged to that country. (Paus. i. 34. § 1.) It was, however, a frequent subject of dispute between the Athenians and Boeotians; and the former people obtained possession of it long before the Peloponnesian War. It continued in their hands till n. c. 412, when the Boeotians recovered possession of it. (Thuc. viii. 60.) A few years afterwards (n. c. 402) the Boeotians, in consequence of a sedition of the Oropi, removed the town 7 stadia from the sea. (Diod. xiv. 17.) During the next 60 years the town was alternately in the hands of the Athenians and Boeotians. The town is a very strong one in its walls. (Hell. vii. 4. § 1, &c.), till at length Philip after the battle of Chaeronea gave it to the Athenians. (Paus. i. 34. § 1.) In n. c. 318 the Oropians recovered their liberty. (Diod. xviii. 56.) In n. c. 312 Cassander obtained possession of the city: but Ptolemaios, the general of Antigonus, soon afterwards expelled the Macedonian garrison and returned the city to the Boeotians (Diod. xiv. 77.) It has been concluded from a passage of Diodorus (p. 11, ed. Hudson) that Oropus continued to belong to Thebes in the next century; but the expression olesia Ὠρώπεων is corrupt, and no safe conclusion can therefore be drawn from the passage. Leake proposes to read ολείς Ωρώπεων, Wordsworth so Ωρώπεων, but C. Müller, the latest editor of Diodorus, reads ολείς Ωρώπεων. Diodorus calls the inhabitants Athenian Boeotians, an epithet which he also applies to the inhabitants of Plataea. Strabo also describes Oropus as a Boeotian town (Ge. p. 404); but Livy (alv. 27), Pausanias (i. c.), and Pliny (iv. 7, c. 11) place it in Attica. How long the Oropi inhabited the inland city is disputed. Pausanias, even supra, says that Oropus was upon the sea (τελ θάλασσα, i. 34. § 1); and the inhabitants had probably returned to their old town long before his time. Although Oropus was so frequently in the hands of the Athenians, its name is never found among the Athenian demes. Its territory, however, if not the town itself, appears to have been made an Attic deme under the name of Graea (Ὑρώπεα), but Homer Oropus does not occur, but Graes is mentioned among the Boeotian towns (II. ii. 498); and this ancient name appears to have been revived by the Athenians as the official title of Oropus. Aristotle says that Oropus was called Graes in his time (ap. Steph. B. s. ν. Ὠρόπος); and accordingly we find in an inscription, a name of Oropus (Ὅρο羊毛) mentioned as a deme of the tribe Pandionis (Boe. & Meir, Die Demen von Attika, p. 6, seq.) In the passage of Thucydides (ii. 23) παριστάτε Ὠρόπος τὴν γῆν Πειραιαῖαν καλομένην, ἢ κατα- μεταίχθη Ὑπέροποι Ἀθηναίων οἴκοις, ἐδώροισαν, all the existing MSS. have Πειραιάκε, but Stephanus, who quotes the passage, reads Πειραῖακε, which Poppo
ORTHAGORIS.

and other modern editors have received into the text.
It is, however, right to observe that the district of Oropus was frequently designated as the border country or country over the border (τῆς γείτονα γῆς, Thuc. iii. 91).

According to Dicaearchus (L. c.) the Oropians were notorious for their grasping exactations, levied upon travelers, which was their principle and distance from Athens to Oropus, and therefore it is concluded by Xenos, a comic poet:

Πῶς τοι έλεγες, ἱπποτής τεῦχος ἕρμης ἐστίν.
Κακὶς τοις γένεσι καὶ Οἰνοπέδες.

The position of Oropus is thus defined by Strabon.

"The beginning [of Boeotia] is Oropus, and the sacred Delphinion, opposite to which is old Eretria in Euboea, distant 60 stadia. After Delphinion is Oropus at the distance of 20 stadia, opposite to which is the present Eretria, distant 40 stadia. Then comes Delium."

(Strab. ix. p. 403.) The modern village of Oropó stands at the distance of nearly two miles from the sea, on the right bank of the Evrópí, ancient the river, through which is a fragment of the ancient buildings and sepulchral stones. There are also Hellenic remains at the Ξάκη or wharf upon the bay, from which persons usually embark for Euboea; this place is also called άνεπος γόλυς ἀνέστολος, from a ruined church dedicated to the "Holy Apostles." Leake originally placed Oropus at Oropós and Delphinion at Sámos; but in the second edition of his Demí he leaves the position of Oropus doubtful. It seems, however, most probable that Oropus originally stood upon the coast, and was removed inland only for a short time. In the Peloponnesian War Thucydides speaks of sailing to and anchoring at Oropus (iii. 91, viii. 95); and Pausanias, also, has a reference to the place. Doubtless, however, Oropus was upon the coast. Hence there can be little doubt that Skóla is the site of Oropus, and that Oropós is the inland site which the Oropians occupied only for a time. It is true that the distance of Oropó from the sea is more than double the 7 stadia assigned by Diodorus, but it is possible that he may have originally written 17 stadia. If Oropus and Delphinion were thus at Euboea, and Oropó was more to the eastward nearer the confines of Attica.

In the territory of Oropus was the celebrated temple of the hero Amphiarasus. According to Pausanias (i. 34. § 1) it was 12 stadia distant from Oropus. Strabo places it in the district of Psophia, which stood between Rhámmus and Oropus, and which was subsequently an Attic demus (i. 392). Livy calls it the temple of Amphícolos (xl. 27), who, we know from Pausanias, was worshipped conjointly with Amphiarasus. Livy further describes it as a place rendered agreeable by fountains and rivers; which leads one to look for it at one of two torrents which join the sea between Skóla and Kálamo, which is probably the ancient Psophia. The mouth of one of these torrents is distant about a mile and a half from Skóla; at half a mile from the mouth are some remains of antiquity. The other torrent is about three miles further to the eastward; on which, at a mile above the plain, are remains of ancient walls. This place, which is near Kálamo, is called Maervo-Dhláissi, the epithets Maervo (black) distinguishing it from another site of Deílium. The distance of the Hellenic remains on the first-mentioned torrent agree with the 12 stadia of Pausanias; but, on the other hand, inscriptions have been found at Maervo-Dhláissi and Kálamo, in which the name of Amphiarasus occurs. Dicaearchus (L. c.) describes the road from Athens to Oropus as leading through bay-trees (δέντα δασφυλών) and the temple of Amphiarasus. Wordsworth very ingeniously conjectures δέντα "Αφράδων instead of δέντα δασφυλών, observing that it is not probable that a topographer would have described a route of about nine miles, with the origin of Athens to Oropus, by telling his readers that it passed through "bay-trees and a temple." Although this reading has been rejected by Leake, it is admitted into the text of Dicaearchus by C. Müller. (Leake, Northern Greece, vol. ii. p. 444, seq., Demí of Attica, p. 112, seq.; Finlay, Remarks on the Topography of Oropus and Deílium, in Transactions of the Royal Society of Literature, 1839, p. 396, seq.; Wordsworth, Athens and Attica, p. 23, seq.)

OROSINES, a river of Thrace, flowing into the Euxine. (Plin. iv. 18.)

T. H. D.

OBOŠPEDA (Οπόςπεδα, Strab. iii. p. 161, seq.), called by Ptolemy Oroşpeda (Οπόρσπεδα, ii. 6. § 21), a mountain chain in Hispánia Tarraconensia, called by Pausanias Hispánia; [Aσκόρρας Monas. It is stated by the geographer in the sacred chain of Sierra de los Monos. It is the highest inland mountain of Spain (11,000 feet), at first very rugged and bald, but becoming wooded as it approaches the sea at Calpe. It abounds in silver mines, whence we find part of it called Mon Argentarius. [Aσκόρρας Monas. It is stated by the geographer in the sacred chain of Sierra de los Monos. It is the highest inland mountain of Spain (11,000 feet), at first very rugged and bald, but becoming wooded as it approaches the sea at Calpe. It abounds in silver mines, whence we find part of it called Mon Argentarius.

T. H. D.

OŘREA. 1. (Ορφέα, Ptol. ii. 3. § 14), a town of the Veneciæns, on the E. coast of Britannia Barba.- Parsley (Brit. Rom. p. 373) identifies it with Orrocks, on the little river Oros in Fife- shire.

T. H. D.

ORBOKA, a mountain with a bay, on the east coast of Arabia, without the straits of the Persian Gulf. (Plin. vi. 28. x. 32.) Mr. Forster explains the name to mean literally in Arabic "the transverse mountain." He adds: "Its position is effectually determined by the name of the town. Corbuxa, or Ecbua, which is the name of the town, where, about a third of a degree south of Daba, a great mountain, at right angles with the mountains of Lima, runs right down to the sea, while its base lies the port of Chorfaskan." (Geog. of Arabia, vol. ii. p. 228.)

G. W.

OBINSUS, a tributary of the Maeander, flowing in a north-western direction, and discharging itself into the main river a few miles below Antioch (Plin. v. 29). As some MSS. of Pliny have Moysynus, and as Hierocles (p. 665) and other ecclesiastical writers (Notit. Episc. Phryg. Poc. p. 27) speak of a town Moysna in those parts, the river was probably called Moysnym. Its modern name is said to be Hugnia, that is the river described by Col. Leake (Asia Minor, p. 249) as descending from Gheirou and Karjasan.

L. S.

ORTACEA, a small stream of Elymias, which Pliny states flowed into the Persian Gulf; its mouths were blocked up and rendered unfit for navigation by the mud it brought down (vi. 27. 31. a). [V.]

ORTAGBEA. [Μαονεκα]

ORTHAGORIS, a town of Macedonia, of which coins are extant. Pliny (iv. 11. a. 18) says that Ortagues was the ancient name of Mooneca; but we learn from an ancient geographer (Hudson, Geogr. Misc. vol. iv. p. 42) that Ortha-
ORTHE.

ORTHE (Ορθή), a town of Perrheadia in Thessaly, mentioned by Homer (II. ii. 739), was said by Strabo (i. p. 440) to have become the acropolis of Phalana. [Phalana.] It occurs, however, in the lists of Pliny (iv. 9. s. 16) as a distinct town from Phalana.

ORTHOSIA (Ορθοσία), a town of Syria mentioned by Strabo as Poliomy, near the river Eleutherus, the confluence of the Eleutherus and the Tripoli. (Strab. xvi. p. 735; Ptol. v. 15. § 4.) The former makes it the northern extremity of Phoenicia, Pelasgus being the southern (p. 756), a distance, according to Artemidorus, of 3650 stadia (p. 760). It was 1150 stadia south of the Orontes. (ib.) Poliomy places both Simyra and Orthosia south of the Eleutherus, but Strabo is right in both of it: "agreeable whereabouts," writes Shaw, "we still find, upon the northern banks of this river (Nahr-el-Bord), the ruins of a considerable city in a district named Ortosia. In P退役军人’s table, also, Orthosia is placed 30 miles south of Antarcus and 12 miles north of Tripoli. The situation of it is likewise illustrated by a medal of Antoninus Pius, struck at Orthosia, upon the reverse of which we have the goddess Astarte treading upon a river; for this city was built upon a rising ground, on the northern banks of the river, within half a furlong of the sea: and as the rugged eminences of Mount Libanus lie at a small distance, in a parallel with the shore, Orthosia must have been a place of the great road; it should have formed the entire command of the road (the only one there is) betwixt Phoenicia and the maritime parts of Syria." (Truesd. p. 270, 271.) The difficulties and discrepancies of ancient authors are well stated by Pococke. (Observations, vol. ii. pp. 204, 205, notes d. e.) He assumes the Nahr Kibar for the Eleutherus, and places Orthosia on the river Acon, between Nahr Kibar and El-Bord. (Manmadrell, Journey, March 8.)

ORTHOSIA (Ορθοσία), a town of Caria, not far from Alabanda, on the left bank of the Maeander, and apparently on or near a hill of the same name (Strab. xiv. p. 605; Plin. xxxvii. 23). Near this town the Phoenicians, it is said, once settled Carisba (Polych. xy. 5; Lív. xiv. 25; comp. Ptol. v. 2. § 19; Plin. v. 29, xxxvii. 9, 25; Hieroc. 688). The ancient remains near Kurpeli probably mark the site of Orthosia (Leake, Asia Minor, p. 234); though others, regarding them as belonging to Alabanda, identify it with Dakēs-shaw.[144] (Dakēs-shaw, Ptol. vii. 1. § 30; viii. 27. § 18), a town on the eastern side of the peninsula of Hindostan, described by Ptolemy as the Palace of Sornax. It was in the district of the Soretas, and has been identified, conjecturally, by Forbiger with the present Utshar or Uticara. [V.]

ORTOSIA (Ορτοσία). 1. An ancient city of Latam, situated on the confines of the Aeacian territory. It is twice mentioned during the wars of the Romans with the latter people: first, in n. c. 481, when we are distinctly told that it was a Latin city, which was besieged and taken by the Aeacians (Liv. ii. 48; Dionys. viii. 81); and again in n. c. 457, when the Acarnanians, under Orestades, took Corbin, and, after putting to the sword the Roman garrison there, made themselves masters of Ortosia also; but the consul Horatius engaged and defeated them on Mount Algidas, and after driving them from that position, recovered possession both of Corbin and Ortosia. (Liv. iii. 30; Dionys. x. 26.) From these accounts it is clear that Ortosia was situated somewhere in the neighbourhood of Corbin and Mount Algidas; but we have no more precise clue to its position. No mention of it is found in later times, and it probably ceased to exist. The name is much corrupted in both the passages of Dionysius; in the first of which it is written Ὀρτοσία, but the Vatican MS. has Ὀρτοσία for Ὀρπρεώς: in the second it is written Ὀρτοσία, and it is probable that the Hortenses, a people mentioned by Pliny (iii. 5. s. 9) among the populi Albanenses, are the inhabitants of Ortosia; and it is possible, as suggested by Niebuhr, that the Ὀρπρεώς (a name otherwise wholly unknown), who are found in Dionysius’s list of the thirty cities of the Latin League, may be also the same people. (Dio, c. 63; Niebuhr, vol. ii. p. 18, note.) The sites which have been assigned to Ortosia are wholly conjectural.

2. (Ortosia a Mare), a considerable town of the Frontani, situated on the coast of the Adriatic, about midway between the mouth of the Aternum (Pescura) and that of the Sagrus (Sagro). Strabo tells us that it was the capital of the Frontani (v. 243). He erroneously places it S. of the Sagrus; but the passage is evidently corrupt, as is one in which he speaks of Ortosia or Histionum (for the reading is uncertain) as a resort of pirates. (Strab. l.c., and Kramer ad loc.) Poliomy correctly places it between the Sagrus and the Aternum; though he erroneously assigns it to the Peligni. Pliny mentions it as one of the principal places possessed by that people. (Plin. iii. 12. 17; Plin. iii. 1. § 19.) Some inscriptions have been published in which it bears the title of a colony, but these are of dubious authenticity (see Zumpt, de Colon.: p. 356, note): it is not mentioned as such in the Liber Columarianus. The Itineraire places it on the road from the mouth of the Aternum to Anxanum (Lamia). The name is still retained by the modern town of Ortosia; and antiquities found on the spot leave no doubt that it occupies the same site with the ancient one. (Inst. Ant. p. 313; Tab. Feat. Rom., Plin. iii. p. 67.) [E. B. B.]

ORTOSPANA (Ορτοσπανία, Strab. xi. p. 514, xii. p. 733; epigrafei: § 36: Opis, Ptol. vi. 18. § 5; Amm. Marc. xxxiii. 6), an ancient city of Bactriana, which there is good reason for supposing is identical with the modern town of Xedul. The name is written variously in ancient authors Ortospana or Ortosparum; the latter is the form adopted by Pliny (vi. 17. s. 21). Three principal roads
leading through Baetica; and at this place; hence the notice in Strabo (l. c.) of the 3 in Ebrovad
τραίτες. Grekapur has (as appears to us), on no sufficient ground, identified Ortospesa with the present
Kandahar. If the reading of some of the MSS. of Ptolomy be correct, Kābiṣel may be a corruption of Eibāviya.

It is noteworthy, that in the earlier editions of Ptolomy (vi. 18. § 3) mention is made of a person
who he calls Kābiṣel; in the latest of Nobbe (Tauchnitz, 1848) the name is changed to Bahālī. It is not improbable that Ptolomy here is speaking of Kābiṣel, as Lasen has observed.

(Ibid. Alterth. vol. i. p. 29.) The three roads may be the pass of Bahālī. It is probable that the Sabellian
Kisik, and that from Anberdā to Khosar. [V.]

ORTOSPEDA. [OROTPENDA].

ORTYGI.A. [DELIO].

ORTYGI.A. [STRACUM].

ORUDIII († μητέρα δρακόντων, Ptol. viii. i. § 25, 36), a chain of mountains in India inta Gaugam, which were, according to Ptolomy, the sources of the river Pyrēs (Pyrēs). It is difficult now to identify them with certainty, but Forbiger conjectures that they may be represented by the present Nello-Molla.

OBZ. [ARCADIA, Vol. i. p. 193, a.]

OSQA. 1. (Osera, Ptol. ii. 6. § 66), a town of the Illyrians in the N. of Hispania Tarraconensis, on the road from Turaco and Beida to Ossac-
agnusta (Ibn. Am. pp. 391, 451), and under the jurisdiction of the last-mentioned city. Pliny alone (iii.
3. a. 4) places the Ossaces in Vescitania, a district mentioned nowhere else. It was a Roman colony, and had a mint. We learn from Pilutuma (Sert. c. 14) that it was a large town, and the place where the mint of the Ossaces was quinarian (Ossacum) by Strabo, in an apparently corrupt passage (iii. p. 181; v. Ubert, vol. ii. pt. i.
p. 451.) It seems to have possessed silver mines (LIV. xxiv. 10, 46, xl. 43), unless the "argentum
Ossaceum" here mentioned merely refers to the minted silver of the town. Florus, however (Med. ii. 520), has pointed out the impossibility of some writers not allowing such vast quantities of minted silver as we find recorded in ancient writers under the term "argentum Ossaceum," "signatum Ossaceum;" and is of opinion that Ossaceum in these phrases means Sponsiā, by a corruption from the national name, Suse-caru. (Cl. Cas. E. c. i. 60; Vell. Pat. ii. 26). In the Severan Forum, there are six coins, namely, of Florus, Med. ii. p. 513; Sestini, p. 176; Misanett, l. p. 46, Suppl. i. p. 92; Murray's Handbook of Spain, p. 448.

2. A town of the Turdetani in Hispania Baetica, which some have identified with Ussacor, but which Ubert (vol. ii. pt. i. p. 370) thinks must be sought to the W. of that place. (Ptol. ii. 4. § 13; Plin. ii. 1. a. 3.) The pretended coins of the Ussacores are not genuine. (Florus, Med. i. c.; Sestini, p. 73; Misanett, i. p. 48; Suppl. i. p. 40; Sestini, p. 78; Ubert, l. c.)

[TE. D.]

OSIRIA. [LEPPONTI].

OSCI. ORI or OPICI (in Greek always Oscoi; the original form of the name was Oeskra, which was still used by Ennius, op. Fest. s. v. p. 198), a nation of Central Italy, who at a very early period appear to have been spread over a considerable part of the peninsula. So far as we can ascertain they were the Osca or Osci, and that at the earliest time when they might have anything like a definite account, of the central part of Italy, from Campania and the borders of Latium to the Adriatic; while on the S. they adjoined the Osconians, whom there is good reason to regard as a Pelasgic tribe. Throughout this extent they were subsequently conquered and reduced to subject status by Latins, Sabines, and other peoples, and the land was virtually occupied by the Oscans. The relation between the Sabellians and the Oscans is very obscure; but it is probable that the former were comparatively few in number, and adopted the language of the conquered peoples, as we know that the language spoken by the Sabellians and Samnites in later times was Osco. (Liv. x. 29.) Whether it remained unmixed, or had been modified in any degree by the language of the Sabellians, which was probably a cognate dialect, we have no means of determining, as all our existing monuments of the language are of a date long subsequent to the Sabellian conquest. The political affinities of the Oscans, and their relations to the Sabellian and other races of Central Italy, have been already considered under the article ITALIA; it only remains to add a few words concerning what is known of the Osco language.

Niebuhr has justly remarked that "the Osco language is by no means an inexplicable mystery, like those of the Illyrians, Albanians, and other nations who have been lost to us. With the Sabellian and Oscan languages we can still work, we can compare them, and come to distinct conclusions concerning the general character and affinities of the language. The Oscans were closely connected with the Latin; not merely as the Latin was with the Greek and other branches of the great Indo-European family, as offshoots from the same original stock, but as cognate and nearly contiguous peoples. Charles F. N. B. Real, in his Recherches sur les formes latines dans les phrases Romaines (Flowers, Med. ii. p. 512; Sestini, p. 176; Misanett, l. p. 46, Suppl. i. p. 92; Murray's Handbook of Spain, p. 448.)
neighbourhood of Bantis, on the borders of Apulia and Lucania, and which refers to the municipal affairs of that town; 2. the Cippus Abellanus, so called from its having been found at Abella in Campania, and containing a treaty or agreement between the two neighbouring cities of Nola and Abella; and 3. a bronze tablet recently discovered in the neighbourhood of Aquania in Lucania, containing a dedication of various sacred offerings. It is remarkable that these three monuments have been found in nearly the most distant quarters of the Ocean territory. By the assistance of the numerous minor inscriptions, we may fix pretty clearly the limits within which the language was spoken. They include, besides Campania, the towns of Proper, the land of the Hirpini and Frentani, and the northern part of Apulia. No inscriptions in Ocean have been found in Lucania (except immediately on its borders) or Bruttium, though it is probable that in both of these countries the Sabellian conquerors introduced the Ocean language, or one closely connected with it, and which is distinctly told by Festus that the Bruttians spoke Greek and Ocean. (Fest. p. 35, M.) We learn also with certainty that not only the vernacular, but even the official, use of the Ocean language continued in Central Italy long after the Roman conquest. Indeed few, if any, of the extant inscriptions date from an early period. The coins issued under Titinius allude to it as a dialect still in common use in his time, about A.D. 170. (Fest. s. v. Opescus, p. 189.) The coins struck by the Samnites and their allies during the Social War (s. c. 90—88) have Ocean inscriptions; but it is probable that, after the close of that contest and the general admission of the Italians to the Roman franchise, Latin became universal as the official language of Italy. Ocean inscriptions have continued to be spoken, not only in the more secluded mountain districts, but even in the towns, in Campania at least, until a much later period; as we find at Pompeii inscriptions rudely scratched or painted on the walls, with their hasty execution and temporary character cannot be supposed to have existed long before the destruction of the city in A.D. 79.

(Concerning the remains of the Ocean language see Mommsen, Unter-italischen Dialekte, 4th Leipzig, 1850; Kienze, Philologische Abhandlungen, 8vo, Berlin, 1839; and Donaldson, Varro's Manuscripts, pp. 104—108.)

We have no evidence of the Oceanics having any literature, properly so called; but it was certainly from them that the Romans derived the dramatic entertainments called Atellanae, a kind of rude farce, probably bearing considerable resemblance to the performances of Pulcinello, still so popular at Naples and in its neighbourhood. When these were transplanted to Rome they were naturally rendered into Latin; but though Sicil is probably mistaken in speaking of the Fabules Atellane of his day as still performed at Rome in Ocean, it is very natural to suppose that they were still so exhibited in Campania as long as the Ocean language continued in common use in that country. (Sisrav. v. p. 233; concerning the Fabulae Atellane see Mommsen, l. c. p. 235.) For Pulcinella itself see Litt. Antiquities, p. 376, &c.; Munk, de Fabulae Atellane, Lips. 1840.)

OSCEINIUM, a name which appears in the Jerusalem Itin. on the road from Vasaetas (Bosna) to Elusa (Elusa). (Origio; Elusates.) The order of names in Vasaetas, Tras Arboras, Osceiniurn, Satium or Satrium, and Elusa. Osceiniurn is marked at the distance viii. from the two places between whose walls it lies. D'Anville finds on this road a place named Esquives, which in name and position agrees pretty well with the Osceiniurn of the Itin. (G. L.)

OSERIATRES (Oseriateres), a tribe of Pannonia Superior, dwelling on the banks of the river Dravus; but nothing is known about them but their name. (Ptol. ii. 15, § 2; Plin. ii. 38.)

OSI, a German tribe mentioned only by Tacitus (Grsec. 28, 43), as dwelling beyond the Quadri, in a woody and mountainous country. But their national customs, as well as their language, were those of the Pannonians. They were, moreover, tributary to the Quadri and Sarmatians. The exact districts they inhabited cannot be determined, nor do we know whether they had migrated into Germany from Pannonia, or whether they were an ancient remnant of Pannonians in those districts. (L. S.)

OSIANA, a town in the west of Cappadocia, between the river Ialy and lake Taita, on the road from Arzacya to Cassarea (H. Ant. p. 206). Its site must probably be looked for in the district of Jurab or Urgab. (L. S.)

OSISMI or OSISMI (Oserimus), a Celtic people who joined the Veneti in the war against Caesar, n. c. 56. (B. G. iii. 9.) There is nothing in Cassar which shows their position further than this, that they were on the peninsula of Bretaigne. Prolesy (ii. 8, § 5) makes them extend as far south as the Gobesum headland, and his name of Vorcanium as their chief city. (Gobarum.) If we accept the authority of Mela, who says (iii. 6) that the island Serra (Sese) is opposite to the abores of the Oisimii, this will help us to determine the southern limit of the Oisimii, and will confirm the conjectures of Gobesum being the headland called Ria Pointe, which is opposite to the small island Sese, or as it is improperly called Iles des Soisins or being somewhere near that headland. In another passage (iii. 2) Mela makes the great bend of the west coast of Gallia commence where the limits of the Oisimii end: "ab illis enim iterum ad septentriones littorium est et per Littorines, Carpenites ad ultimum Gallicarum septem Meridiones." Fliny (v. 8) describes this great peninsula of Bretaigne thus: "Gallia Lugdunensis contains a considerable peninsula, which runs out into the ocean with a circuit of 625 miles, beginning from the border of the Osimii, the neck being 125 miles in width: south of it are the Namnetae." It is plain then that Fliny placed the Oisimii along the north coast of France, and there is Mela's authority for placing them on the west coast of the peninsula. The neck of the peninsula which Fliny describes, may be determined by a line drawn from the bay of St. Brieuc on the north to Lorient on the south, or rather to some of the bays east of it, at Montsaint-Michel. It seems a fair conclusion, that the Osimii occupied a large part of the peninsula of Bretaigne; or as Strabo (iv. p. 195) says: "Next to the Veneti are the Oisimii, whom Pytheas calls Timili, who dwell in a peninsula which runs out considerably into the ocean, but not so far as Pytheas says and those who believe him." He does not tell us how far Pytheas said that the peninsula ran out into the sea, but if we had Pytheas's words we might find that he knew something about it. The conclusion of D'Anville is justified by the ancient authorities. He says: "It seems that it has been agreed up to the present time to limit the territory
of the Osamii to the northern coast of Bases Bragge, though there are the strongest reasons for thinking that they occupied the extremity of the same continent in all its breadth and that in their discourse of the Osamii was a part of the territory as well as the diocese of Livon." D'Anville observes that there is no part of ancient Gaul the geography of which is more obscure.

[GE.

OSMIDA (Oysida, Seyl. p. 18), a district of Crete, which Mr. Pashley's map places at the sources of the Mesa
do-potama. (Hück, Krete, vol. 1 p. 15.) [EBJ.

OSPIRAGUS, a branch of the river Erigon, in Lyceesia, upon which the consul Sulpicius pitched his camp in the campaign of a c. 200 (Liv. xxxi. 39); perhaps the same as the Schena
tius, an affluent of the Erigon, which falls into it to the N. of Sitoula. [EBJ.

OSQUADES, one of the peoples of Aquitania mentioned by Pliny (v. 19). He mentions Osqu
dates Montani and Osquades Campestres, but he enumerates many names between the two, from which we may conclude that the Campestres did not border on the Montani, for if they had, it is probable that he would have enumerated the Campestres immediately after the Montani instead of placing between them the names of other inhabitants. Besides this, we must look for the Montani on the north side of the Pyrenees and in the valleys of the Pyrenees, and the Campest
tres in the low country of Aquitania. There are no means for determining the position of either the Montani or the Campestres, except from the resemblances between the ancient and the modern names in this part of Aquitania, which resemblance is often very great. Thus D'Anville supposes that the Osquades Montani may have occupied the valley of Ossos, which extends from the foot of the Pyrenees to Osorun, on a branch of the Adour. This is prob
able enough, but his attempt to find a position for the Campestres is unsuccessful. [GL.

OSKROBEVE, a small district in the NW. corner of Mesopotamia (taken in its most extended sense), which there is some reason for supposing would be more correctly written Oriskoiva. It does not appear in any writer earlier than the times of the Auto
nines, and is not therefore mentioned by either Strabo or Ptolemy. Ptolemaeus states that it de
rived its name from a certain Oros, who ruled there (Ptol. v. 17, 12); and Dion Cassius declares that the name of the man who betrayed the Roman army under Crassus was Abgarus the Orosorean (xii. 19; see for the same name, lviii. 18, and lvii. 12.) Again, Herodian calls the people who dwelt in those parts Orosenii (ili. 9, lv. 7, vii. 1). Ammianus writes the name Odrosene (iv. 5, 3, xxiv. 1). The name prevailed in the country as late as the seventh century. (Herod. p. 75.) In the Notitia Imperat. Oroesene was placed under a "Praeses Provinciae," and appears to have been sometimes included in Mesopotamia, sometimes kept separate from it. (See Justinian, Notit. cit. § 11; Ioan. Malalas, xi. p. 274, ed. Robertson, de Eulog. p. 110.) It is most likely that the correct form of the name is Oriskoova; and that this is connected with the Mararskofo of Isidorus. (Statham, Parch. 1.; and see Dion, lviii. 2, for the name of Mamme, a chief of the Mesopotamian Arabs, who gave himself up to Trajan.) Not im
possibly, the Oroes of Pliny may refer to the same district. (vi. 30, 113.) [EDMERS.]

[IV.

OSSA (Ose, Ptol. iii. 13. § 15), a town of the

Bisaltae, which, before the annexation of Bisaltai to the kingdom of Macedonia, must have been a place of some importance from the fact of its pos
sessing an autonomous coinage. (Ezkbiel, vol. i. p. 78.) It has been identified with Sokhi, a large vil
lage on the S. side of the Ngixta mountain, where some Hellenic remains are found on the surrounding heights. Another ancient site at Labon, on the N. road from Serrès to Salonik, has also claims to be considered the representative of Ossa. (Leake, North. Greece, vol. iii. pp. 215, 235.) [EBJ.

COIN OF OSA.

OSSA (Ose, a lofty mountain in Thessaly on the coast of Magnesia, separated from Olympus only by the narrow vale of Tempe. Hence it was sup
posed by the ancients that these mountains were once united, and had been separated by an earth
dike. (Ptol. v. 17, 12; Strabo, iv. 5, 3, xxiv. 17; Lucan, vii. 347; Claudian, Respon. Præs. p. 183.) Ossa is conical in form and has only one summit. Polybius mentions it as one of the highest moun
tains in Greece (xxiv. 10); but it is considerably lower than Olympus, and according to Ovid even lower than Pelion. (Ov. Fast. iii. 441.) Accord
ing to Diodorus, who speaks, however, only from conjecture, Ossa must be 5000 feet high. To the south of Ossa rises Mt. Pelion, and the last falls of the two mountains are united by a low ridge. (Herod. vii. 129.) Olympus, Ossa, and Pelion differ greatly in character; and the conical peak, standing between the other two, is well contrasted with the broad majesty of Olympus, and the ex

tended outline of Pelion. The length of Ossa along the coast is said by Strabo to be 80 stadia (iv. p. 443). It is hardly necessary to allude to the passages in the poets, in which Ossa is mentioned, along with Olympus and Pelion, in the war of the giants and the gods. (Hom.Od. xi. 312; Virgil, Georg. i. 263, etc.) The modern name of Ossa is Úassos. (M. Lucknow, Thessaly, p. 120.) It is described by D'Anville in his "Guide de la Touristique," vol. ii. p. 106; Leake, Northern, Greece, vol. i. p. 434, vol. iv. pp. 411, 513; Médit,
és, Mémoire sur le Pelion et l'Ossa, Paris, 1853.)

2. A mountain in Elis near Olympia. (Vol. I p. 817, 17.)

OSSARIAE (Osebías), a people who dwelt in the Paisy on the banks of the Acentus (Cen
bub), and who surrendered themselves to Alexander the Great after the conquest of the Mali (Médita). (Arrian, vi. 15.)

OSSARENE (Ossarph, Ptol. v. 13. § 9; Ts
sarphi, Interp.), a canton of Armenia situated on the banks of the river Gyrum. St. Martin (Méth. sur l'Armenie, vol. i. p. 801) is of opinion that it may be the same as the Gozarrene of Strabo.

[EBJ.

OSET, also called Julia Constantin (Ptol. iii. 3), a town of Bactria, on the right bank of the river Bactris, and opposite to Hispalia. It is probably the modern S. Jews de Afora, near Castello de la Osetta, where there are some Roman remains.
OSSIGERDA

(Ossigera, Exp. S. x. p. 106, Med. ii. p. 598; M領導
seti. 28; Seinti, Med. Isp. p. 73.) [T. H. D.]

COIN OF OSSET.

OSSIGERDA or OSSICERDA (Ossiguras, Ptol. ii. 6 § 63), a town of the Edetani in Hispania Tarraconensis. It was a municipium in the jurisdiction of Caesareae (Plin. liii. 3. a. 4, who calls the inhabitants Osigerdenses.) It had a mint (Flores, Med. ii. p. 532, iii. p. 109; Mionnet, i. p. 47, Suppl. i. p. 95; Seinti, p. 177.) Ubert (vol. ii. pt. 1 p. 417) identifies it with Ossere, near Segora, in the valley of the Bidasoa [T. H. D.]

OSSEGI LACONICUM, a town on the borders of Hispania Baetica, at the place where the Baetis enters that country (Plin. liii. 3; now Marquis), where there are Roman ruins and inscriptions. (Flores, Esp. xii. 367, v. 24.) [T. H. D.]

OSSON'NOBA (Ossorina, Ptol. ii. 5 § 3), a town, the site of which is marked by two rocks in the river Tages and Anas, on the road from Eboris to Ebora and Pax Julia. (Tin. Ant. pp. 418, 426.) [Lustamia, p. 230, a.] It is the same town mentioned by Strabo in a corrupt passage (ili. p. 143), by Mela (ili. 1 § 6), Pliny (iv. 21. a. 33), and others. Commonly identified with Estag, lying a little N. of Faro, near the mouth of the Sulcis, where Roman ruins and inscriptions are still found. One of the latter has a large coin. (Ubert, vol. ii. pt. 1 p. 387.) [T. H. D.]

OSTEOIDES (Osteodiis), a small island in the Thyrrenian sea, lying off the N. coast of Sicily, and W. of the Aeolian Islands. Diodorus tells us that it derived its name (the Bodn) (from the circumstance of the Carthaginians having occasion got rid of a body of 6000 turbulent and disaffected mercenaries by landing them on this island, which was barren and uninhabited, and leaving them there to perish. (Diol. v. 11.) He describes it as situated in the open sea, to the west of the Liparisan or Aeolian Islands; a description which applies only to the island now called Ustica. The difficulty is, that both Pliny and Ptolemy distinguish Utica (Ost-vaia) from Osteodes, as if they were two separate islands (Plin. iii. 8. a. 14; Pol. iii. 4. § 17). The former writer says, "a Solunte lexv. M. Osteodes, contra Paronis Utica." But as there is in fact but one island in the open sea W. of the Liparides (which is apparently referred), it seems certain that this must have been the Ostede of the Greeks, which was afterwards known to the Romans as Ustica, and that the existence of the two names led the geographers to suppose they were two distinct islands. Mela does not mention Utica, but notices Osteodes, which he reckons one of the Aeolian group; and its name is thus explained, in the Table, in a manner that affords no real clue to its position. (Mal. ii. 7. § 18; Tab. Peut.)

Ustica is an island of volcanic origin, about 10 miles in circumference, and is situated about 40 miles N. of the Capo di Castello near Palermo, and 80 miles W. of Alicudi, the westernmost of the Lipari Islands. It is at this day well inhabited, and existing remains show that it must have been so in the time of the Romans also. (Smyth's Sicily, p. 279.)

OSTIA (Ostia: Edr. Ostienae: Ostia), a city of Latium, situated at the mouth of the Tiber, from which position it derives its name. It stood on the left bank of the river, at a distance of 16 miles from Rome, by the road which derived from it the name of Via Ostiense. (Tin. Ant. p. 801.) All ancient writers agree in representing it as founded by the Roman king Ancus Marcus; and it seems certain that it always retained the position of a colony of Rome, and was at no period independent. From its position, indeed, it naturally commanded the port of Rome, and was essential to that city, not only for the purpose of maintaining that naval supremacy which it had established before the close of the regal period, but for securing its supplies of corn and other imported produce which was carried up the Tiber. Ancus Marcus at the same time established salt-works on the coast, which continued for a time to supply both Rome itself and the neighbouring country in the interior with that necessary article. (Liv. i. 33; Dionys. iii. 44; Cic. de Rep. ii. 18; Strab. v. p. 323; Flor. i. 4; Enutrop. i 5; Fest. p. 197.) There can be no doubt that the importance of Ostia must have continued to increase with the growing prosperity of Rome; but it is remarkable that we meet with no mention of its name in history until the period of the Second Punk War. At that time it appears as a commercial and naval station of the utmost importance; and was not only the port to which a corn from Sicily and Sardinia was brought for the supply of Rome itself, as well as of the Roman legions in the field, but was the permanent station of a Roman fleet, for the protection both of the capital, and the neighbouring shores of Italy. (Liv. xxii. 11, 57, 57, xiii. 38, xxv. 20, xxvii. 22.) It was at this time still reckoned one of the "colonia maritimae," but on account of its peculiar importance in relation to Rome, it enjoyed special privileges; so that in c. o. 77, for instance, the Roman colonies endeavoured to establish a claim to exemption from levies for military service, which was allowed only in the case of Ostia and Antium; the citizens of which were at the same time compelled to be constantly present as a garrison within their own walls. (Liv. xxvii. 58.) On a subsequent occasion (c. o. 191) they obtained a still greater exemption from the naval service also; but their claim was at once disallowed by the senate. (Id. xxviii. 3.) Even after the complete establishment of the naval power of the Roman Republic, Ostia seems to have continued to be the usual station of a Roman fleet, and in c. o. 67 it was there that a squadron, which had been sent out to the representation of the Cilician pirates, was attacked by the pirates themselves, and the ships either destroyed or taken. (Cic pro Leg. Man. 12; Dion Cass. xxxiv. 5.) Ostia itself also suffered severely during the civil wars of Sulla and Marius, having been taken by the latter in c. o. 87, and given up to plunder and devastation by his soldiers. (Appian, B. C. 67; Liv. Epic. lxix; Oros. v. 19; Flor. iii. 21. § 12.)

But its position at the mouth of the Tiber, as the port of Rome, secured it from decay; and so im-
important was the trade of Ostia become, especially on account of the supplies of corn which it furnished to the capital, that it was made the place of residence of one of the four quaestors of Italy, and gave name to one of the "provinciae quaestoriarum" into which that country was divided. (Cic. pro Murena. 8. pro Sert. 17; Suet. Claud. 24.) But the increasing commerce of Ostia rendered its natural disadvantages as a port only the more sensible; and there can be little doubt that those disadvantages were themselves continually increasing. It had been originally founded, as we are expressly told, close to the mouth of the Tiber, from which it is now distant above three miles; and the process of alluvial deposition, which has wrought this change, has been undoubtedly going on throughout the intervening period. Hence Strabo describes in strong terms the disadvantages of Ostia in his day, and calls it "a city without a port, on account of the alluvial deposit continually brought down by the Tiber, which compelled the larger class of vessels to ride at anchor in the open roadstead at great risk, while their cargoes were unloaded into boats or barges, by which they were carried up the river to Rome. Other vessels were then hove up the Tiber, after they had been lightened by discharging a part of their cargoes." (Strab. v. pp. 231, 232.) Dionysius gives a more favourable view, but which does not substantially differ from the preceding account. (Dionys. ill. 44.) These evils had already attracted the attention of the dictator Caesar, and among the projects ascribed to him was one for forming an artificial port or basin at Ostia (Plin. Caz. 22); but this was neglected by his successors, until the increasing difficulty of supplying Rome with corn compelled Claudius to undertake the work.

That emperor, instead of attempting to cleanse and restore the original port of Ostia at the mouth of the Tiber, determined on the construction of an entirely new basin, which was excavated in the seashore about two miles to the N. of Ostia, and which was made to communicate with the river by an artificial cut or canal. This port was protected and enlarged by two mole projecting out into the sea, so as to enclose an extensive space, while in the interval between them a breakwater or artificial island was thrown up, crowned by a lighthouse. (Dion Cass. lx. 11; Suet. Claud. 26; Plin. ix. 6, xvi. 40. a. 76; Juv. xii. 75—81.) This great work was called the Portus Augusti, on which account its construction, or at least commencement, is by some writers referred to the emperor Augustus; but there is no authority for this; and Dion Cassius distinctly assigns the commencement as well as completion of it to Claudius. Nero, however, appears to have put the finishing hand to the work, and in consequence struck coins on which he claims it for his own. (Eckhel, vol. vi. p. 276.) After this it was considerably augmented by Trajan, who added an inner basin down a horizontal form, surrounded with quays and extensive ranges of buildings for magazines and storehouses. This port was called by him Portus Traiani; and hence we afterwards meet in inscriptions with the "Portus Augusti et Traiani," and sometimes "Portus utterque" in the same sense. (Juv. 1.c., et Schol. ad loc.; Gruter, Insocr. p. 306. 16, p. 446. 3.) At the same time he repaired the artificial channel of communication with

**Plan of Ostia**

A. Main channel of the Tiber.
B. Right arm of ditto, the Fossa Trajana, now called Primaevico.
C. Fiume Mere, dry bed of ancient course of the Tiber.
D. Modern village of Ostia.
E. Ruins of ancient Ostia.
F. Portus Augusti.
G. Portus Nei.
H. Insula Sacra.
OSTIA.

The Tiber, which now assumed the name of Fiume Trajana, and is undoubtedly the same which still exists under the name of Fiumicino, and forms the right arm of the Tiber, from which it separates about a mile and a half above the site of Ostia.

The new port thus constructed seems to have contributed to the growth of a new town around it, which was generally known by the name of PORTUS OSTENSIS, sometimes also PORTUS Urbis or PORTUS Romae, but much more frequently, at least in later times, simply PORTUS. It seems to have been designed more particularly for the importation of corn for the supply of the capital, an object of which the importance became felt more and more, as the population of Rome continued to increase, while it became more absolutely dependent upon foreign produce. The adjoining district on the right bank of the Tiber was portioned out among a body of colonists before the time of Trajan (Lib. Colum. p. 328); and a new line of buildings was constructed on the right bank of the Tiber from Rome to the new port, which obtained the name of Via Portuensis. In the reign of Constantine the city of Portus was erected into an episcopal see (Anastas. Vit. Silvest. 34); and the same emperor surrounded it with strong walls and towers, which are still in considerable part extant. Meanwhile the Ostian road, which was formerly sinking into decay, received notice of it during the earlier periods of the Roman Empire show it to have been still a flourishing and populous city, and successive emperors concurred in improving it and adorning it with public buildings. It was particularly indebted to the care of Hadrian (Guiter, Incer. p. 249. 7) and Septimius Severus, numerous inscriptions in honour of whom are discovered among its ruins. (Nihby, Distorsov, vol. ii. pp. 484, 468.) Aurelian, also, we are told, adorned it with a forum, which bore his name, and which was decorated by his successor Tacitus with 100 columns of Numidic marble. (Vigso. Aurel. 45; Tac. 10.) The existing remains confirm the inference which we should draw from these accounts, and show that Ostia must have continued to be a flourishing town till towards the close of the Roman Empire, and far superior in the number and splendour of its public buildings to the neighbouring town of Portus. But the security of the latter place, which was well fortified, while Ostia was wholly unprotected by walls (Procop. B. 5. c. 12. p. 102); and the city of Ostia had, besides the advantage of Portus; and the artificial port seems to have obtained an increasing preference over the natural mouth of the Tiber. Rutillius says that in his time (about A.D. 414) the left arm, or main channel of the river, was so obstructed with sand as to be wholly deserted (Hist. i. 181); but this would appear to be an exaggerated statement, as Ostia was more than a century later described as being more navigable (Procop. I. c.).

OSTIA.

Ostia was, however, in his day already in a state of great decay, and the road which led from thence to Rome (the Via Ostiensis) was neglected and abandoned, while the Via Portuensis on the other side of the Tiber was still the scene of considerable traffic. The importance of Ostia diminished, and Ostia became exposed to the attacks of hostile barbarians. In A.D. 409 Alaric, king of the Goths, made himself master of the port, and with it of the stores of corn for the supply of the capital, which compelled the senate to capitulate on the terms that he chose to dictate (Zosim. vi. 6); and again during the wars of Bellissarion and Vitiges (in 557) the Gothic king, by making himself master of Portus, was able to reduce his adversary to severe distress (Procop. B. G. i. 26, 36c.). The decline of Ostia continued throughout the earlier part of the middle ages; in 827 it is described as altogether in ruins, and continued to be so described by the Saracens throughout that century seem to have completed its desolation.

But meanwhile the artificial ports of Claudius and Trajan were beginning in their turn to suffer from the deposit of sand which is constantly going on along these shores; and no attempt being made in these ages of confusion and disorder to arrest the progress of the evil, they were both gradually filled up so as to be rendered altogether useless. In the 10th century, the port of Trajan was already reduced to a mere lake or pool, altogether cut off from the sea, and only communicating by a ditch with the Tiber. (Ughelli, Italia Sacra, vol. i. p. 134.) The consequence was that for a time the trade was again forced to have recourse to the left arm of the river; and the modern Ostia, which is a castle or fort, and has been founded by Pope Gregory IV., a little above the ruins of the ancient city, became again for a period of some centuries the landing-place of travellers and the port of Rome. It was not till 1618 that Pope Paul V. once more caused the canal of Trajan to be restored and cleared out, and continued to the present line of the present town of Ostia, where a canal called Fiumiccino was constructed; and from this time the whole traffic carried on by the Tiber with Rome (which is however but inconsiderable) has been confined to this arm of the river. The main channel, on the other hand, having been completely neglected, has become so obstructed with sand near the mouth as to be wholly impassable.

The modern village of Ostia is a very poor place, with the ruins of an old castle, but retains little more than 50 permanent inhabitants, who are principally employed in the neighbouring salt-works. Its climate in summer is extremely unhealthy. The ruins of the ancient city begin about half a mile below it, and extend along the left bank of the Tiber for a space of near a mile and a half in length, and a mile in breadth. Though extensive, they are for the most part in a very dilapidated and imperfect state, so as to have little or no interest as architectural monuments; but among them may be distinctly traced the remains of a theatre, a temple of the Corinthian order, the forum part of which is probably the same that surrounded it; and near the Torre Bove, respectively close to the Tiber, are the ruins of buildings that appear to indicate this as the site of the actual port or emporium of Ostia in the imperial period. The great number and beauty of the statues and other works of art, which have been brought to light by the excavations carried on at successive periods on the site of Ostia, are calculated to give a high notion of the opulence and prosperity of the ancient city.

The ruins of Portus, which are also very considerable, are of an entirely different character from those of Ostia. They are found on the right bank of the Tiber, about 2 miles from the present line of sea-coast at Fiumicino, and are still known as Portus; while the inner basin of Trajan, the hexagonal harbor, of which may be distinctly traced, though it is in great part filled with sand, is still popularly known by the name of II Trajano. The quays of solid masonry that surrounded it are still well preserved; while extensive, though shapeless, masses of ruins adjoining it appear to have been those of the magazines and storerooms attached to the port. The

X K 4
remains of the port of Claudius are less distinct; the line of the moles which bound it may, however, be traced, though they are altogether buried in sand; the gate and the mole light still visible in the 15th century, when the ruins were visited and described by Pope Paul II., but has now entirely disappeared. A considerable part of the ancient walls with which the city was fortified by Constantine is still visible; they were strengthened with towers, and closely resemble in their style of construction the older walls of Rome situated on the road from Ostia to Capua. Between the site of Ostia and that of Portus is the island, formed by the two branches of the Tiber, which is about 3 miles in length by 2 in breadth. It is commonly known as the Insula Sacra, an appellation first given to it by Procopius, who describes it in detail (B. G. i. 26). The origin of the epithet is unknown, but it appears to have been in Christian times regarded as consecrated, having been, according to Anastasius, bestowed by Constantine upon the church. It is described in exaggerated terms by a writer of the 6th century (Aethicus, Cosmogr. p. 716, ed. Gronov.) for its beauty and fertility, whence he says it was termed "Liburan Almns Veneris;" but in spring it is still covered with fields and gardens, and only distinguished by the beauty of its towers. The formation of this island obviously dates only from the construction of the right arm of the Tiber, now known as Il Fiumicino, which, as already shown, is probably wholly artificial. No writer before the time of the Roman Empire alludes to more than one mouth of the river.

The topography of Ostia and Portus, and the vicissitudes and changes which the two ports at the mouth of the Tiber have undergone, are fully traced, and the existing ruins described in detail, by Nibby (Dintorni di Roma, vol. ii. p. 436–474, 602–660); as well as by Preller, in the Berichte der Sächsischen Gesellschaft für die year 1849 (pp. 5–38). The plan of Ostia is copied from one given by the latter writer.

OSTIAE, OSTIDAMNII. Stephanus (s. v. ‘Ostiaianes’) has preserved a notice of a Gallic people whom he describes "as a nation on the western Ocean, whom Artemidorus names Cassini, and Pythaeus names Ostiian." Strabo (p. 65) observes of Pythaeus that what he says of the Ostiian and the Cassines is confirmed by the testimony of Lycurgus, the last false. Whether false or true, we learn from Strabo that Pythaeus spoke of the Ostiian of Gallia; and we can safely infer that Pythaeus placed them on the west coast of Gallia opposite to Britain. A passage of Strabo has been cited under Osismii, in which it is stated of the Osismii that Pythaeus named them Tindii. Ukert (Gallien, p. 366) purposely to change ὀσίμις Tauvus in this passage of Strabo into ὀσίμις οπταλος. The proposal is reasonable. The text of Strabo is probably corrupt here. These Ostiian of Pythaeus can be no other than the Osismii.

Eratosthenes mentions a people of Gallia named Ostidamnii on the west coast of Gallia. He also spoke (Stobaeus) of the district of the Osidamnii, which is called Calabium. It is clear that he was speaking of the peninsula of Brëtagna. The Osidania, Osidamnii, Osismii are evidently the same people.

OSTIPPO, a free city of Hispania Baetica, in the jurisdiction of Astigi (Plin. iii. 1. 3), and on the road from Hispalis to Corduba. (Hisp. Asti. p. 111.) It has not been satisfactorily identified. But, according to Ukert (vol. ii. pt. 1. p. 360), it must probably be sought in the neighbourhood of the modern Ecaja.

OSTRIS (Orros. Orstaniae), a town of Umbria. It is a district once occupied by the Semnones mentioned both by Pliny and Polyaenus (Plin. iii. 14. a. 19; Pol. iii. 1. § 51), but of very uncertain site. [UMBRIA].

OSTRACINUS (? ‘Ostrakos), a town on the road from Alexandria to Palestine in A. D. 69, as described by Josephus (B. J. iv. 11. § 5), Ostracina appears to have been one day’s march from the temple of Jupiter Casius in the Arabian hills, and about the same distance from the lake Sebaste. It was destitute of wells, and supplied with water brought by a canal from the Delta. (Comp. Mart. Capella, c. 6. [W. B. D.])

OSTRICINA, a mountain on the road from Mantinea to Methydrium. [MANTINEA, p. 262, b.]

OSTUDIZUS (also written Ostdiuzus and Ostdiuros, Ptolemy, Ap. ii. 137, 230, 322; and in Hilar. viii. p. 1346, Catudassia), a town in Thessalosta, on the road from Eumenus to Thessalonica. [T. H. D.]

OSTUR, a town of Spain, not mentioned in any ancient writer, but which appears upon coins. There is still a place called Ostur near Alcora in Valencia, which has some Roman ruins, and which abounds with acorns,—the figure of which also appears upon the coins. (Flores, Med. ii. p. 535, iii. 1. p. 279; Mommsen, ii. p. 95, ap. UKERT, vol. ii. pt. 1. p. 416.) [T. H. D.]

OTADINI (Othadnion, Ptol. ii. 3. § 10), a British tribe on the E. coast of Britannia Barba, in the province of Valentia, lying S. of the Boderia estuary, or Forth of Forth, down to the river Tyne; and therefore including the counties of Haddington, Berwick, Roxburgh, and the greater part of Berwickshire. Their chief cities were Curia and Bremenium. [T. H. D.]

OTENE (Othene, Ptol. v. 13. § 9, where the reading Marturp is incorrect), a canton of Armenia, separated from Atropates by the river Araxes, (Ptol. vi. 15.) St. Martin (Mém. sur l’Arménie, vol. i. p. 86) identifies it with the provinces known to the native geographers by the name of Osidamnium, what is now called Karo-bagh, to the N. of the Araxes. [E. B. J.

OTESIA, a town of Cispadane Gaul, known only from the mention of the Osismii by Pliny (iii. 15. a. 20) among the municipal towns of the Eighth Region. But an inscription given by Cluverius makes mention of the "Respublica Osisminorum," and it is probable that Alawesia and Oopria, which are found in Phlegon among the towns of the same part of Italy, are only corruptions of the same name. (Phlegon, Macrov. 1; Cluver. Ital. p. 202.) Its site is wholly uncertain. [E. B. H.]

OTHRYS (Os Othryos), a lofty chain of mountains, which shuts in one pass of the Thracian front of the Black Sea. It branches off from Mount Tymphium, a summit in the range of Pindus, and runs nearly due east through Pithoios to the sea coast, thus summing the waters which flow into the Peneus from those of the Spercheus. (Strab. ix. p. 433, 453; comp. Herod. vii. 129; Ptol. iv. 8. a. 15.) On its northern side, many offshoots extend into the plain of Pharnassa. It is lofty and covered with wood, whence the poets give it the epithet of "nivalis."
OTIS.

(Virg. Aen. vii. 675) and "nameromus" (Lucan, v. 337). It is now usually called Gere, from a large village of this name upon its sides; but its highest summit, which lies to the east of this village, is named Jeracevomi, and is 5569 feet above the level of the sea. The suburb of the whole range is a limen of various and highly-inclined strata occasionally mixed with iron ore, amethystite and asbestos. (Leake, Northern Greece, voi. ii. p. 17, iv. p. 350, seq.; Journal of Geog. Society, vol. iv. p. 266.)

OTIS, a town on the Euphrates below Babylon, just above the commencement of the Babylonian Marshes. (Plin. vi. 26.)

OTTOROBORAS ('Otrorobóras, Ptol. vi. 16. §§ 2, 3), the E. termination of the Emori Montes. This is an example of a Sanscrit word which has been preserved in Ptolemy's geography, as it is merely the Greek form of the Uttarabharas of the "Mahabharata," or the highland of the happy Indian Hyperboreans, who lived there sheltered from the cold blasts, about whom, under the name of Attacoris, as Pliny (vi. 20) relates, a certain Ammonetus wrote a book. Ammianus (xxii. 6. § 65), copying Ptolemy, has OPPORORAS, and O Pororóras. The conjecture of Vitruvius (De architect. xiv. 6), that the men living in the desert of whom Ctesias (Ind. 8, ed. Böhr) speaks, belong to this imaginative geography, which saw in the snow-covered summits of the Himadryas the chosen habitation of the Gods and of the Blessed, according to Ptolemy (vi. 16. § 5, viii. 24. § 7) there was a people of the Ottoroberas, with a town of the same name, to the E. of the caus. Mediana and a lake which is one of Ptolemy's points of recorded astronomical observations, having about 14 hrs. 45 min. in its longest day, and being 7 hrs. E. of Alexandria, there must have been some real locality bearing this name, which must be assigned to E. Thèbes. (Lassen, Ind. At. vol. i. pp. 511, 847.) [E. B. J.]

VIVALA (Vivala, Strabo), a town of Noricum, on the road from Leunacum to Augsburg Vindelicorum. (Itin. Ant. pp. 235, 258, 277; Tab. Peut., where it is called Ovilia.) It is said, according to an inscription, to have been a Roman colony under the name of Aurelia Antoniniensia. (Mucur, Noticiae, i. pp. 217, 235, 366, &c., 285, &c.) [L.S.]

OXIAE. [Echidnai.] OXIAE (Oxiale) was the place which was formed by two very large rivers, the Azaraxes (Jaxartes) and Dymas (probably the Demus of Ptolemy, vi. 12. § 3), at the foot of the Soli Montes. (Ann. Marc. xxiii. 6. § 59.) This has been supposed to intimate, though very vaguely, the formation of the Sea of Aral; but there seems to be more reason for identifying it with the lake of Khorassan to the SSE. of Bokhara, formed by the Zor-afahans or "gold-scatterer" river of Samarcand, called also the Kobi, or more correctly the river of the Koh-ak or hilllock. This river is the Polytemuss, which, according to Aristobulus (ap. Strab. xi. p. 518), traversed Sogdiana, and was lost in the sands; while Q. Curtius (vii. 37) describes it as entering a great salt lake, continuing its course under ground, though it really discharges itself into this lake, which the Uzbeks call Denogh, the Turkish word for "sea." The Greeks translated the indigenous name Oskhol—the valley of which is one of the four Paradises of the Persian poets—into that of Polytemuss, "the very precious,"—an epithet which it well deserves from the benefits it showers upon this region, the plain of Bokhara, famed for its gigantic melons. Ptolemy (vi. 12. § 3), if a correction be made in his latitudes, which are uniformly put too far forward to the N., gives the OXIAE PALUS (\Oξίαια Πάλις,) its true position between Zeriana and Tribactra (Balahk and Byzamund). "From the mountains of the Soli," says that geographer, "descend several rivers with no name, but which are commoints; one of these forms the Oxiana Palus." The Soli Montes of Ptolemy are the Asfereh mountains, by which the volcanic chain of the Thins—Schems is prolonged to the N. and S. break of Bolor, and Kasawert. It is singular that Ptolemy does not connect the Polytemuss with his Oxian lake, but mentions it (vi. 14. § 2) as one of the rivers discharging itself into the Caspian between the Oxus and Jaxartes. Pliny knows nothing of the Polytemuss; and his Oxus Lacus (vii. 18, xxxii. 29; Solin. 49) is either the crescent-shaped lake of Sirikel, on the Baumi Dungai, or "terraced roof of the world," near the pass of Pami, from which the infant Oxus [Oxus] issues, or some other Alpine lake in the Bolor chain, from which this river derives most of its waters. The marshes of the Oxus are the Massagetas. The Jaxartes, in its course from Arkous to the lake Laghiana (l. 202) flows, with the exception of one of its 40 channels, indicate some vague notion of the Sea of Aral. Strabo (xi. p. 531), when he blames the opinion of Herodotus and Callisthenes, about the 40 channels of the Araxes, also (p. 512) asserts that some of the Massagetas live in marshes formed by rivers and in islands; adding (p. 579) that this district is flooded by the Araxes, which is divided by many channels, of which only one discharges itself into the sea of Hyrcania, while the others reach the Northern Ocean. It is surprising that Strabo does not give to this river of the country of the Massagetas (which is undoubtedly the same as that of which Herodotus speaks) the name of Jaxartes, which he mentions so often (pp. 505, 509, 518, 529), and carefully distinguishes (pp. 577—592) from the Araxes of the Massaetian, or Armenian river, which was known to Hecataeus (Fr. 170). Strabo (p. 515) as well as Herodotus (l. 202) allude to the seals, with the skins of which the natives clothe themselves; and it is well known that these animals are found in the Sea of Aral as well as in the Caspian, and the lakes Seriz and Oroz; for these and other reasons it would seem that both Herodotus and Strabo were acquainted with that series of lagoons from which the Sea of Aral has been formed. This was the opinion of Bayar (Acta Petrop. vol. i. p. 398) and of D'Anville, who (Carte du Monde des Grecs et des Romains, 1763) designates the Aral by these words, "Poules remplies Araxes apot Herodotum." With Herodotus all this network of lagoons forms a basin of the interior, while Strabo connects it with the N. Ocean, directly, and not through the medium of the Hyrcanian sea, and the channel by which, according to the systematic cosmographers of Alexandria, this sea was united to the Ocean. It must be remembered that Strabo distinguishes clearly between the single mouth of the Araxes of the Massagetas (Jaxartes) and the numerous channels which go directly to the N. Ocean. This statement acquires great importance as implying traditions of a channel of communication between the waters of the Aral and the icy seas; a communication which probably took place along that remarkable depression of 50° of longitude in length,
OXUS.

in a direction from SW. to NE., from the Aral to the "embouchure of the Oth. The characteristic feature of this depression is an immense number of chains of small lagoons surrounding each other, and becoming in a circular form, or like a necklace. These lakes are probably the traces of Strabo's channel. The first distinct statement of the Sea of Aral, described as a vast and broad lake, situated to the E. of the river Oural or Jaxk, occurs in Monastier of Constanti- nople, surmised the "Protector," who in the time of his visit (1220 A.D.) was the known Emperor, Huin. 18., 1892). But it is only with the series of Arab geographers, at the head of whom must be placed El-Istakhry, that any positive information upon the topography of these regions commences. (Humboldt, Asia Centrale, vol. ii. pp. 121—364.)

OXUS MONTES ( revolves 3, Polt. vi. 12. §§ 1, 4), a chain of mountains between the rivers Oxus and Jaxartes, in a direction from SW. to NE., and which separated Scythia from Sogdiana. They are identified with the metallic group of Aserah and Atabag— the Botom, Botum, or Batum ("geological"), and the Edreii ("geographers"). In xv. p. 198—200). The Oxus River of Strabo (Ox. 175), which he also calls the hill-crest of Aryaninae (Q. Curt. viii. 11), has been identified by Droysen, as quoted by Thirwall (Hist. of Greece, vol. vi. p. 300), with the pass of Kolkaha or Derbend, in the Kas-Kurangh, between Kish and Hisar; but as it is called the rock of the Oxus, it must be looked for on that river, which is probably Kurgan-Tiippa on the Aras. (Wilson, Aryaninae, p. 167; Ritter, Erdkunde, vol. vii. p. 734; Humboldt, Asia Centrale, vol. ii. pp. 18—20.) [E. B. J.]

OXINES ('Oxines), a small river on the coast of Bithynia, according to Arrian (Peripl. p. 14) between Heraclia and Phyllium, and according to Marmbrant (p. 70) 90 stadia to the north-east of Cape Posidium. (Comp. Anonym. Peripl. p. 4, where, as in Arrian, its name is Oxinas.) It is probably the modern Tebrizk.

OXINGIS. [Aureli.]

OXTHRACAE ("Oxthram, Appian, B. Hipp. c. 58), a town on the Lusitania, and according to Appian the largest they had; but it is not mentioned by the other historians. [T. E. D.]

OXUS ("Oxus), Polyb. x. 48; Strab. i. 73, xi. pp. 507, 509, 510, 513, 514, 516—518; Polt. vi. 9. §§ 1, 2, 10. §§ 1, 2, 11. §§ 1—4, 7, 12. §§ 1, 14. §§ 1, 2, 14, 18. § 1; Agathem. ii. 10; Arrian, Anab. iii. 28, 29, 30, ir. 15, vili. 10, 16; Plut. Alex. 87; Diónys. 747; Pomp. Mela, iii. § 6; Plin. vi. 16; Q. Curt. vii. 8, 10; Amm. Marc. xxiii. 6. § 232, a river of Central Asia, on the course of which there appears a considerable discrepancy between the statements of ancient and modern geographers. Besides affirming that the Oxus flowed through Hyrcania to the Caspian or Hircanian sea, Strabo (in. 509) adds, upon the authority of Aristobulus, that it was one of the streams that formed the great commercial route to the north which was navigable, and that by it much valuable merchandise was conveyed to the Hircanian sea, and thence to Albania, and by the river Cyrus to the Exune. Pliny (vi. 19) also quotes M. Varro, who says that it was ascertained at the time when Pomponius was carrying on hostilities in the East against Mithridates, that a journey of 100 days was necessary from the frontier of India for the barbarians to be brought to the traveller to the Icaura, which flowed into the Oxus; the voyage continued along that river into the Caspian, and across it to the Eurus, from whence a land journey of no more than five days carried Indian merchandise to Phasis in Pontus. In 40 B.C. Porus (Strab. L. c.) was received at the admiral of Seleucus and Antiochus, had navigated the Caspian, and that the results of his observations were in perfect accord with these statements. With such definite accounts mistake is almost impossible; yet the country between the Caspian and the Oxus has been crossed in several directions, and not only by native adventurers, but by Roman and Persian, who are ascertained to take a direction to the NW. instead of to the SW.; and it flows not into the Caspian, but the sea of Aral. Sir A. Barnes (Travels in Bo- hara, vol. ii. p. 188) doubts whether the Oxus could indeed have had any other than its present course, for physical obstacles oppose its entrance into the Caspian S. of the bay of Baldaus, and N. of that point its natural receptacle is the Aral; and that this has been the case for nine centuries at least there is the evidence of Ibn Hankil (Istakryan). (Oriental Geography, p. 239, ed. Ouseley, London, 1800.) Singularly enough, Pomponius Mela (L. c.) describes very concisely the course of the Oxus almost the exact contrary to "Jaxartes and Oxus per desertas Scythiae ex Sogdiana regionem perventibus in Sythicum sinum eunctum, ille sono fontes grande, hoc incuro aliumus grandior; et aliquid quoad occasum a oriente cursum, juxta Dabas primum indicat: curramus ad Septentriones usque verso inter Amanuros et Pascias apud apertum." The course of the Oxus or Ojlikos, as it is termed in the Thracian and Persia, which treat upon its basin, or Amuls Deryad, as the natives on its banks call it, whether we consider the Bodabek branch or Kokha to be its source, or which rises in the Alpine lake of Sir-i-lol, on the snow-covered heights of the Tatarie and Caspian, has a direction from SE. to NW. The volume of its waters takes the same course from 32° to 45°, in the form of the regularity from Khooomos to Chadhir. About the parallel of 40° the Oxus turns from SSE. to SWNW., and its waters, diminished by the numerous channels of irrigation which from the days of Herodotus (iii. 117) have been the only means of fertilizing the barren plains of Khurasan, reach the Aral at 45° 40'. Marmbrant (vol. iv. p. 492) and others have seen in the by Strabo Mela a convincing proof, that in his time the Oxus had no longer communication with the Caspian. But it can hardly be supposed that the commerce of India by the Caspian and the Oxus had ceased in the little interval of time which separates Mela from Strabo and M. Varro. Besides, the statement of the Roman geographer remains singularly isolated. Ptolemy (L. c.), less than a century after Mela, directs the Caspian again from E. to W. into the Caspian. The lower course of the river, far from following a direction from S. to N., is represented, in the ancient maps, which are traced after Ptolemy's positions, as flowing from N. to S.W. But a more convincing proof has been brought forward by A. G. Cowan (Journ. Asiatique, Dec. 1833, p. 498), who opposes the authority of Hamalalah, a famous geographer of the 14th century, who tells the Persian Eristotes, who asserted that while one branch of the Oxus had its débouché into the sea Khooomos (Aral), there was a branch which pursued a W. course to the river of India, and that the country between them had been conquered by a Macedonian (Purchas, vol. iii. p. 236; Hakluyt, vol. i. p. 569), who visited the Caspian in 1559, also says that
OXYBII.

The Oxybi formerly fell into the Gulf of Balkon. He is the author of the story that the Turkomans, in the hope of preventing the diminution of its waters in the upper part of its course, dammed up the mouth of the river. Evidence still more positive of the "débouche" into the Caspian of a considerable river which is now dry, is afforded by observations on the sea-coast, particularly in the Bay of Balkon. The earliest of these is the survey of that bay by Captain Woodrooffe, in 1743, by order of Nadir Shah, who lays down the course of the river, which he was told was the Oxus (Hawkesworth, Trav. vol. i. p. 130.) The accuracy of his survey has been confirmed by the more elaborate investigations of the Russian surveyors, the results of which are embodied in the Periplus of the Caspian compiled by Eckwold (Alla Geogr. d. Casp. Mirvès, Berlin, 1838), and these leave no doubt that a river, which could have been no other than the Oxus, formerly entered the Caspian at the SE. of the Bay of Balkon by two branches; in one of these there are still pools of water; the other is dry. How far they may be traceable inland is yet to be ascertained; but enough has been determined to justify the belief of the ancient world, that the Oxus was a channel of communication between the Ox and the Caspian, and that Alexander as approaching the river from Bactria, which was distant from it 400 stadia; their estimate is correct, and there are no fables about the breadth of the river. Arrian, who follows Aristobulus, says that it was 6 stadia. The very topography of the river's bank may almost be traced in Curtius; for there are low and peaked hillocks near the passage of the Oxus, which are a remnant of the Kuh Kalai, adds that the Oxus was a muddy river that bore much slime along with it; and Burns (vol. ii. p. 7) found that one-forth of the stream is clay suspended in water. Polybius' (I. c.) statement about the impetuous course of the river and of its falls is untrue, as its channel is remarkably free from rocks, rapids, and waterfalls. This is the manner in which the Asapit enter Hyrcania, either under the vault formed by the fall of the waters (comp. Strab. p. 510), or over its submerged stream. It is still a popular belief that the waters of the Aral pass by a subterraneous channel to the Caspian. At Kerve Goomehes, where the caravans halt, between the two seas, it is said by some that the water is heard rushing beneath. (Burnes, vol. ii. p. 188.)

The conclusions to which von Humboldt (Asia Centrales, vol. ii. pp. 162 - 197) arrived as to the physical causes which may have interrupted the connection between the Caspian and the Oxus are given in the article Jaxartes. For all that concerns the modern geography of the basin of the Oxus the travels of our countrymen, to whom we owe most of our real knowledge of these countries, should be consulted — Elphinstone, Burnes, Wood, and Lord. Professor Wilson (Ariaenc, pp. 143 — 145) has treated this long- vexed question with great ability, and shown that there is every reason for believing the statements of the ancients that the Oxus was once the great highway of nations, and was an easy access to the great inland-Caspian basin.

[EB. J.]

OXYBII (O'qibai), "a part of the Ligyes," as Stephanus says (v. c.), on the authority of Quadratius. Strabo (p. 185) terminates his description of the coast of Gallia Narbonensis, in which he proceeds from west to east, by mentioning the harbour Oxybium, so called from the Oxybii Ligyes. The Oxybii were a Ligurian people on the south coast of Gallia Narbonensis; but it is not easy to fix their position precisely. They were west of the Var and not far from it, and they were near to or bordered on the Decimes. The Oxybii had a town Aegitna, but its position is unknown. A brief sketch of the history of this people is written under DECLATES. Pliny (iii. c. 4) places the Oxybii east of the Argenticus river (Argentata) and west of the Decimes. The Oxybii, therefore, occupied the coast east from Frigus as far as the Argenticus, after which they had the remainder of the coast to the Var. Antipolis (Antichis) was in the country of the Decimes.

[G. L.]

OXYDRAECAE (O'qishämyn), a great nation of the Paspip, who, with the Malli, occupied the banks of the Hydaspes and Acesines, and strenuously resisted the advance of Alexander through their country. It was a common belief of the ancients, that it was in a battle with these people that Ptolemy saved the life of Alexander, and hence obtained the name of Soter. (Steph. B.) Arrian, however, transfers the story to the siege of the Malli (Mallidas), where Alexander was in imminent danger of his life and was severely wounded (vi. 11). The name is written by different authors. Thus Strabo writes it Sydracae (xxv. p. 701), in which Pliny concurs (xii. 6), who makes their country the limit of Alexander's advance eastward; in Diodorus they appear under the form of Syracusae (xvii. 98); lastly, in Orison as Saba- gnae (iii. 19). The name is clearly of Indian origin, hence it has been conjectured by Fott, that the titles commended to this manner represent the Hellenised form of the SanscritCASTHERE (king) corresponding with the Zend CASTHRA. (Pott, Etym. Forsch. p. lxvii.)

[V.]

OXYDRAECAE (O'qishämyn), a tribe of ancient Scyrians, appear to have occupied the district to the N. of the Oxus, between that river and the Jazartes. (I. c. 1.

OXYMAGIS (O'qisamay), Arrian, Ioudic. 4), a river which flowed into the Gauges, according to Arrian, in the territory of the Pasailes. The same people are mentioned by Pliny (vi. 19) and Ptolemy (vii. 9. § 15) under the name of Tasulae; and may be identified with the Sanscrit Pasaile, and as dwelling near Conjanca, in the plain country between the Sauzas and the Ganges. In the immediate neighbourhood is the river Jamwati, which has been doubtless Grecised into Oxymagis. The Sanscrit appellation means "abounding in sugar-cane," which applies perfectly to the land through which it flows. (Cf. Ritter, Asia, ii. p. 547; Schwanzbeck, Frugis. Megapankhm, p. 28.)

OXYNEIA (O'qisamay), a town of these, situated on the Ion, a tributary of the Peneus, and perhaps the capital of the Talara, occupied probably the valley of Mirtina. It is described by Strabo as distant 130 stadia from Assora. (Strab. vii. p. 337; Leake, Northern Greece, vol. iv. p. 279.)

OXYERNICHUS (O'qisamay, Strab. xvii. p. 819; Plin. iv. 5. § 59; Steph. B. 4. c. 11; Amm. Marc. x. 16; Oxynichinum, It. Anton. p. 157. ed. Parthey: Ech. O'qisamayhe), was the chief town of the Nomos Oxyrinchitis, in Lower Aegypt. The appellation of the nome and its capital was derived from a fish of the sturgeon species (Acipenser Sturio, Linnaeus; Athen. vii. p. 519), which was an object of religious worship, and had a temple dedi-
OZENE.

The town stood nearly opposite Cyropolis, on the western bank of the Nile and the Joseph Canal, lat. 28° 6' N. At the village of Boulne, which stands on part of the site of Ozynychus, there are some remains—broken columns and cornices—of the ancient city (Jomard, Descrip. de l'Egypte, vol. ii. ch. 16. p. 55 ; Champollion, l'Egypte, vol. i. p. 803, seq.). And a single Cornish column (D'Annon, l'Egypte, pl. 31), without leaves or volutes, partly buried in the sand, indicates a structure of a later period, probably of the age of Diocletian, which was the site of an episcopal see, and Apollonius dated from thence an epistle to the Council of Sarcenia (Epiph. Haeres. ix. 23.). Roman coins were minted at Ozynychus in the age of Hadrian and Antoninus Pius. (1.) Hadrian, with the reverse of Pallas, holding in her right hand a statue of Victory, in her left a spear; or, (2.) Serapias holding a stag in his right hand. (3.) Antoninus, with a reverse, Pallas holding in her right hand an ax, in her left a statue of Victory. (Eckhel, vol. iv. p. 112.)

OZENE ('Oz'ēnē, Peripl. M. Eryth. c. 48, ed. Müller), the principal emporium of the interior of the district of W. India, anciently called Linyres. The Phoenicians named it the Saca or Saccari Ujshai, the present Oujjai. This place is held by all Indian authors to be one of great antiquity, and a royal capital—as Ptolemy calls it—the palace of a king of Tiangatze (vii. 1. § 63). We know for certain that it was the capital of Vikramaditya, who in a. c. 56 expelled the Saccas or Selhianis from his country, and founded the well-known Indian state, which has been called from this circumstance the Sacca sara. (Lassen, de Persp. p. 57; Bohlen, Alte Ind. i. p. 94; Ritter, v. p. 486.) The author of the Periplus states that great variety of commerce was sent down from Osene to Barayza. (L.; c. v.)

OZOGARDANA, a town in the middle of Mesopotamia, recorded by Ammianus, in his account of the advance of Julianus through that country (xxiv. c. 9). He states that the inhabitants preserve there a throne or seat of judgment which they say belonged to Trajan. The same story is told in almost the same words by Zosimus of a place he calls Zargadzis (iii. 15). The place now cannot with certainty be fixed. All the Macedonians think it the same as shortly afterwards bore the name of Porcia, from Porsius (v. 2. p. 204); and Rechard holds it to be the same as Is or Isamemopolis (the present Hiu).

PACTYTA. (Pacttēa, Actyta.) A small river of Lydia, which flows down from Mount Tmolus in a northern direction, and, after passing on the west of Sardis, empties itself into the Euxine. (Procop. De Aed. i. 15; Strab. viii. p. 554, 591, xii. p. 625, foll.; Plut. v. 2. § 6; Flin. v. 30.) In ancient times the Pactus had carried in its mud, it is said, a great quantity of small particles of gold-dust, which were carefully collected, and were believed to have been the source of the immense wealth possessed by Croesus and his ancestors; but in Strabo's time gold-dust was no longer found in it. The gold of this river, which was hence called Chryseis, is often spoken of by the poets. (Soph. Phil. 392; Dionys. Perig. 831; Hom. Hymn. in Del. 249; Virg. Aen. x. 149; Horat. Epod. xv. 30; Ov. Met. xi. 83, &c.; Senec. Phaed. 504; Iun. v. 249; Silius It. 158.) The little stream, which is a part of the Pactus, is still very deep, still carries along with it a quantity of a redish mud, and is now called Sarabat. (L.; S.)

PACTYTA. (PACTYTA, Herod. vi. 36; Strab. vii. p. 331), a town on the coast of the Propontis, 36 stadia from Caria, whither Alcibiades retired after the Athenians had sent him to作 for the second time deprived him of the command.
PACTYCE.

(Diod. xxii. 74; Nepos, Aec. 7; cf. Plin. iv. 18; Scyl. p. 28.) Perhaps St. George. [T. H. D.]

PACTYCE (Paucyce), a district of North-Western India, which, there is every reason to suppose, must have been nearly the same as the modern Kusseir, but probably extended westward across the Indus. It is certainly mentioned with that group of uncertainty which attaches to almost all that he relates of the far East. Thus in the catalogue of the produce of the different satrapies of the Persian empire, Pactyce is reckoned after Bactrians, and is connected with the Armenians, which gives it an extent too far to the W. (iii. 93). Again, in his account of the army of Xerxes, Herodotus mentions the Pactyces in connection with the Sagartians, and places them under the command of a Persian (vii. 67). And in the subsequent description of the former people, he states that their dress is the same as that of the Pactyces (vii. 85). Evidently, therefore, he here imagines the country and the people to have occupied a district to the N. and NE. of Persis. Again, Herodotus states (iv. 89) that the bravest of the Indian tribes are those who are in the immediate neighbourhood of the city of Caspatyrus and Pactyce; and he connects the same two places together where he states (iv. c. 44) that the celebrated voyage of Scylax of Caryanda, which was promoted by Dareios, the son of Hystaspes, commenced from the River Indus; and that Scylax went up the river to the main settlement of the Kusseir, Caspatyrus, and Pactyce. Scylax, however, having known the hazards of his voyage (ap. Str. B. r. a. 4), placed Caspatyrus in the country of the Gandarri (Fraugs. p. 94, ed. Klau- sen): hence the strong inference that Pactyce was part of Gandaric, if not, as Larcher has supposed, actually the same.

PACTYCE. [CARCINUM.]

PADAIL [India, p. 59, b.]

PADIS [India, c. 39], a small stream of Persis, which appears to have flowed into the Persian Gulf near the present Abusir. It is not possible to identify this and some other names mentioned by Arrian from the Journals of Nearchus, owing to the physical changes which have taken place in the coast-line.

PADIS [India, c. 39], a tributary of Gallus Caspadaranus, which flows only from Pliny, who mentions the Padanates among the municipia of that region (Plin. iii. 15. a. 36). But he affords us no clue to its position. Clever would identify it with Bandino, between Ferraia and Miranda, but this is a mere conjecture.

Padus (Hab. Po), the principal river of Northern Italy, and much the largest river in Italy altogether. Hence Virgil calls it" flaviorum rex" (Georg. i. 481), and Strabo even erroneously terms it the greatest river in Europe after the Danube. (Strab. iv. p. 204.) It has its sources in the Monte Fico, or Mons Venustus, one of the highest summits of the Western Alps (Plin. iii. 16. a. 30; Mal. ii. 4. 5); and the river rises at an altitude of more than 10,000 feet. After a very short course through a mountain valley it descends into the plain a few miles from Salerno, and from thence flows without interruption through a plain or broad level valley all the way to the sea. Its course from Salerno, as far as Chi-

PADUS.

509

(through the district of the ancient Vagnenni and Taurini), is nearly NE.; but after rounding the hills of the Monferrato, it turns due E., and pursues this course with but little variation the whole way to the Adriatic. The great plain or valley of the Po is in fact one of the most important physical features of Italy. Bounded on the N. by the Alps, and on the S. by the Apennines, both of which range have in this part of their course a general direction from W. to E., it forms a gigantic trough-like basin, which receives the whole of the waters that flow from the southern slopes of the Alps and the northern ones of the Apennines. Hence, as Pliny justly observes (l. c.), there is hardly (P. 7. the Tuscan, in the same space, receives so many and such important tributaries. Those from the north, on its left bank, are the most considerable, being fed by the perpetual snows of the Alps; and many of these form extensive lakes at the points where they first reach the plain; after quitting which they are deep and navigable rivers, though in some places even very tepid. Pliny states that the Padus receives in all thirty tributary rivers, but it is difficult to know which he reckons as such; he himself enumerates only seventeen; but this number can be increased almost indefinitely, if we include smaller streams. The principal tributaries will be here enumerated in order, beginning from the source, and proceeding along the left bank. They are: 1. the Clinus (Chissone), not noticed by Pliny, but the name of which is found in the Tabula; 2. the Ducula, commonly called Daris Minor, or Dora Riparia; 3. the Studa (Stura); 4. the Orgna (Orco); 5. the Ducula Major, or Bantica (Dora Baieta), one of the greatest of all the tributaries of the Padus; 6. the Senara, a name still very general among the people; 7. the Adda (Adda), flowing from the Lacus Verbanus (Lago Maggiore); 8. the Lanius or Laminus (Lambrico), a much less important stream, and which does not rise in the high Alps; 9. the Adda (Adda), flowing from the Lucus Larus or Lago di Como; 10. the Ollius (Opio), which flows from the Locus Sabinae (Lago d'Iseo), and joins the river at its mouth; 11. the Mella (Mella) and Clusius (Cliese); 12. the Mincius (Minio), flowing from the Lago di Garda, or Laca Benacca. Below this the Po cannot be said to receive any regular tributary; for though it communicates at more than one point with the Tartaro and Adige (Athesis), the channels are all artificial, and the bulk of the waters of the Adige are carried out to the sea by their own separate channel. [ATHENS.]

On the southern or right bank of the Padus its principal tributaries are: 1. the Tamarus (Tamaro), a large river, which has itself received the important tributary streams of the Stura and Bor- smada, so that it brings with it almost all the waters of the Maritime Alps and adjoining tract of the Ligurian Apennines; 2. the Ticino, a river of above 400 miles. Pliny estimates it at 300 Roman miles without including the windings, which add about 88 more. (Plin. iii. 16. a. 20.) Both statements are beneath the truth. According to modern authorities its course, including its windings, is calculated at 380 Italian, or 475 Roman miles. (Cass. VIII. 17. 1.; Plin. X. 17. 2.) It enters the Adriatic by a course of above 400 miles. After a very short course through a mountain valley it descends into the plain a few miles from Salerno, and from thence flows without interruption through a plain or broad level valley all the way to the sea. Its course from Salerno, as far as Chi-
PADUS.

where it separates from the main stream. Several smaller tributaries of the river in the highest part of its course are noticed in the Tabula or by the classical writers, which are not mentioned by any ancient author; but their names are for the most part corrupt and uncertain.

Though flowing for the most part through a great plain, the Padus thus derives the great mass of its waters directly from two great mountain ranges, and the consequence is that it is always a strong, rapid, and full river, and has been in all ages subject to violent inundations. (Virg. Georg. i. 481; Plin. l.c.) The whole soil of the lower valley of the Po is indeed a pure alluvial deposit, and may be considered, like the valley of the Mississippi or the Delta of the Nile, as formed by the gradual accumulation of mud, sand, and gravel, brought down by the river itself and its tributary streams. But this process was for the most part long anterior to the historical period; and there can be no doubt that this portion of Italy had already acquired very much its present character and configuration as early as the time of the first Etruscan settlements. The valley of the Padus, as well as the river itself, are well described by Polibius (the earliest exact antecedent in whom the Padus is named), by Strabo, and by the historians of the Roman period by Strabo and Pliny. (Pol. ii. 16; Strab. iv. pp. 303, 304, v. p. 212; Plin. iii. 16. a. 20.)

Considerable changes have, however, taken place in the lower part of its course, near the Adriatic sea. Here the river forms a kind of great delta, analogous in many respects to that of the Nile; and the phenomena is corroborated, as in that case, by the existence of great lagoons bordering the coast of the Adriatic, which are bounded by narrow strips or bars of sand, separating them from the sea, though leaving open occasional channels of communication, so that the lagoons are always salt and affected by the tides, which are more sensible in this part of the Adriatic than in the Mediterranean. (Strab. v. p. 291.) These lagoons, which are well described by Strabo, extended in his time from Ravenna to Althium, both of which cities stood in the lagoons or marshes, and were built on piles, in the same manner as the modern Venice. But the whole of these could not be fairly considered as belonging to the Delta of the Padus; the more northern being formed by the mouths of other rivers, the Althium, Medesina, &c., which had no direct or natural communication with the great river. They all, however, communicated with the Padus, and with one another, by channels or canals more or less artificial; and as this was already the case in the time of Pliny, that author distinctly reckons the mouths of the Padus to extend from Ravenna to Althium. (Plin. l.c.) From the earliest period that this tract was occupied by a settled people, the necessity must have been felt of embanking the various arms and channels of the river, for protection against inundation, as well as of constructing artificial cuts and channels, both for carrying off its superfluous waters and for purposes of communication. The whole of this kind of work is ascribed to the Etruscans (Plin. l.c.), and from that time to the present day, they have been carried on with occasional interruptions. But in addition to these artificial changes, the river has from time to time burst its banks and forced for itself new channels, or diverted the mass of its waters into those which were previously unimportant. The most remarkable of these changes which is recorded with certainty, took place in 1152, when the main stream of the Po, which then flowed S. of Ferrara, suddenly changed its course, and has ever since flowed about 3 miles N. of that city. Hence it is probable that the true source of the Po, from the Po di Goro to the Po di Lecce, were in ancient times comparatively inconsiderable.

Polibius (ii. 16) describes the Padus as having only two principal months, which separated at a place called Trigeboli (the site of which cannot be determined); the one of these is called by him Padus (or Po, the name which was the principal channel, and the one commonly navigated, he calls Olana or Holana ("Olana"). This last is in all probability the channel still called Po di Volese, which until the great inundation of 1152, above noticed, was still the principal mouth of the Po. The other is probably the southernmost branch of the river, which separates from the preceding at Ferrara, and is carried at the present day by a wholly artificial channel into the sea at Primaro, from whence it derives the name of Po di Primaro. Its present mouth is about 15 miles N. of Ravenna; but it seems that in the days of Pliny, and probably in those of Polibius also, it discharged itself into the lagoons which then surrounded Ravenna on all sides. Pliny tells us that it had been temporarily regulated, and perhaps altered, by that emperor. (Plin. iii. 16. a. 20.) The same author gives us a detailed enumeration of the mouths of the Padus as they existed in his day, but from the causes of change already adverted to, it is very difficult, if not impossible, to identify those of the present day called the mouth of the Reno. This was also known as the Spinetricum Ostium, from the once celebrated city of Spina, which was situated on its banks (Spinæ). It was probably the same with the modern Po di Primaro. 3. Ostium Caprasiae. 4. Sagia. 5. Veluna, previously called Olana; this is evidently the Padus of Polibius, and is the mouth of the river, formerly called Oronon; the two preceding cannot be identified, but there has been openings communicating with the great lagoons of Comacchio. 6. The Carbonaria, perhaps the Po di Goro. 7. The Fossio Filistina, which seems to have been an artificial canal, conveying the waters of the Tantarius, still called Tortaro, to the sea. This cannot be identified, the changes of the mouths of the river in this part being too considerable. The whole of the present delta, formed by the actual mouths of the Po (from the Po di Goro to the Po di Lecce), must have been formed since the great change of 1152; its progress for some centuries back can be accurately traced; and we know that it has advanced not less than 9 miles in little more than 800 years, 

* Much curious information concerning the deltas of
PADUS.

The changes which have taken place on this line of coast are due not only to the pushing forward of the coast-line at the actual mouths of the rivers, but to the filling up of the lagunes. These in ancient times extended beyond Ravenna on the S.; but that city is now surrounded on all sides by dry land, and the lagunes of the N. of the Po are now separated. Here the lagunes of Comacchio extend over a space of more than 20 miles in length, as far as the mouth of the Po di Volano; but from that point to the port of Brondolo, where the Venetian lagunes begin, though the whole country is very low and marshy, it is no longer covered with water, as it was almost so at no distant period. It is now, therefore, impossible to determine what were the particular lagunes designated by Pliny as the Septem Maria, and indeed the passage in which he alludes to them is not very clear; but as he calls them Africornor Paludes, they would seem to have been in the neighbourhood of Adria, and may probably have been the extensive lagunes (now converted into marshes) on either side of the Po. In a later period the name seems to have been differently used. The Itineraries speak of the navigation "per Septem Maria [a Ravenna] Altumus usque," so that the name seems here to be applied to the whole extent of the lagunes; and it is employed in the same sense by Prosdocimianus (vill. 7); while the Tabula, on the contrary, gives the name to particular estuaries or small gulfs of the coast of Ravenna to Altinum. This line, which is given in much detail, must have been by water, though not so specified, as there never could have been a road along the line in question; but it is impossible to identify with any certainty the stations or points named. (Hist. Ast. p. 126; Tab. Peut.)

VENETIJA.

A later work speaks of the Padus as navigable for a distance of 2000 stadia, or 250 Roman miles from the sea. (Pol. II. 16.) Strabo notices it as navigable from Placentia downwards to Ravenna, without saying that it was not practicable higher up; and Pliny correctly describes it as beginning to be navigable from Augusta Taurinorum (Turigo), more than 100 miles from the estuary of the Po. (Hist. Ast. p. 145; Manlio Ovocida [I. 1. Hier. p. 575], and Biringiponidos (Hieroc. p. 599). The place is described by Basilius (Epist. 74) as one of the most wretched holes on earth. It is said to have derived its name from a small stream in the neighbourhood. (Const. Purp. Vit. Basil. 38; comp. Celsin. p. 775; Jo. Scyl. Plut. pp. 829, 844.) The place is still called Podena.

PAEANIA. [Attica, p. 523, b.]

PAEANIIUM (Paeanum), a town in Aetolia, on the Achelea, a little S. of Ithoria, and N. of Oeniades, which was on the other side of the river. It was only 7 stadia in circumference, and was destroyed by Philip, a. c. 219. (Polyb. iv. 85.) Paeanum was perhaps rebuilt, and may be the same town as Phana (Φῆνα), which was taken by the Acheleans, and which we learn from the narrative in Pananias was near the sea. (Pana. x. 18.) Stephanus mentions Phana as a town of Italy; but for Phæanus Ίαραλατ., we ought probably to read Phæanæ Araliae. (Steph. B. s. v. Φῆνα.)

PAELONIA [Paelon.] (Palaeonia), a town of the Longines in Aetolia, variously identified with Apleua, Polis de Leno, and Conoco de Pilomena. (T. H. D.)

PAEMANI, mentioned in Caesar (B. G. ii. 4) with the Condreti, Eborones, and Caesorei, and the four peoples are included in the name of Germani. D'Anville conjectures that they were near the Conedu, who probably held the country which is now called Codova. (Condrus.) The Paemani may have occupied the country called Pays de Paneme, of which Durbuy, Larochette in the Ourthe, and Rockfort on the Homme are the chief towns.

PAEON (Paeus, Scyl. p. 28), a town of Thrace, mentioned only by Scylus. (T. H. D.)

PAEONEYS (Payoeevs, Hom. I. 845, xvi. 827, xvi. 348, xxi. 139; Harrod. iv. 83, 49, v. 1, 13, 98, vill. 113, 185; Thuc. ii. 95; Scob. i. pp. 6, 28, vii. pp. 316, 318, 323, 329, 330, 331; Arrian. Anab. ii. 9. § 2, ii. 13. § 4; Plut. Alex. 59; Polyan. Const. iv. 12. § 5; Estiant. ad Hes. I. xvi. 337; Lit. xiii. 51), a people divided into several tribes, with whom the Argolic colonisation of Eumathis, appear to have occupied the entire country afterwards called Macedonias, with the exception of that portion of it which was considered a part of Thrace. As the Macedonian kingdom increased, the district called PAMBRIA...
PAESTUM.

(Paeseus; Thuc. ii. 99; Polyb. v. 97, xxiv. 8; Strab. vii. pp. 318, 319, 329, 331; Ptol. iii. 13. § 28; Liv. xxxii. 19, xxxviii. 17, xxxix. 54, xl. 3, xiv. 25; Phil. iv. 17, vi. 99) was curtailed of its possessions when the same still continued to be applied in a general sense to the great belt of interior country which covered Upper and Lower Macedonia to the N. and NE., and a portion of which was a monarchy nominally independent of Macedonia until fifty years after the death of Alexander the Great. The banks of the river Strymon, which was crossed by the Macedonian army under Alexander during his march from Locris to Samothrace, and which he passed on his return to the Hellespont, are described as the scene of the illustrious exploit which he there performed. (Herod. ii. 12. 16.) These two towns were tributary to the Kingdom of Macedon, and after the death of Philip the Great were afterwards taken possession of by the Thracians. When the Macedonians had acquired Emathia, Almopia, Crestonia, and Mygydonia, the kings of Paeonia still continued to rule over the country beyond the straits of the Alus, until Philip, son of Amyntas, twice reduced them to terms, when weakened by the recent death of their king Agias, and the Greeks at length subdued by Alexander. (Diodor. xiv. 6, 24, xxvii. 8; after which they were probably submissively to the Macedonian sovereigns. An inscribed marble which has been discovered in the acropolis of Athens records an interchange of good offices between the Athenians and Andolose, king of Paeonia, in the archonship of Dictimus, a.c. 584, or a few years after, at the request of Philip and Alexander, to establish the kingdom. (Diodor. xiv. 24, xxvii. 8; after which they were probably submissively to the Macedonian sovereigns. An inscribed marble which has been discovered in the acropolis of Athens records an interchange of good offices between the Athenians and Andolose, king of Paeonia, in the archonship of Dictimus, a.c. 584, or a few years after, at the request of Philip and Alexander, to establish the kingdom. (Diodor. xiv. 24, xxvii. 8; after which they were probably submissively to the Macedonian sovereigns. An inscribed marble which has been discovered in the acropolis of Athens records an interchange of good offices between the Athenians and Andolose, king of Paeonia, in the archonship of Dictimus, a.c. 584, or a few years after, at the request of Philip and Alexander, to establish the kingdom.) The coins of Andolose, who reigned at that time, and adopted, after the death of Alexander, the common types of that prince and his successors,—the head of Alexander in the character of young Hercules, and on the obverse the figure of Zeus Aspellochos,—prove the coinage of the kingdom. (Strab. v. 251.) The only evidence of a flourishing condition and prosperity of Paeonia, is to be found in the numbers of its coins and in the splendid architectural remains, so well known as the temples of Paestum. From its northerly position, it must have been one of the first cities that suffered from the advancing power of the Lucanians, and it is certainly one of the first Greek colonies that fell into the hands of these people. (Strab. v. 251.) The date of this event is very uncertain; but it is probable that it must have taken place before a.c. 390, when the city of Lafas was besieged by the Lucanians, and had apparently become the bolwark of Magna Graecia on that side. [MAGNA GREA.] We learn from a curious passage of Aristoxenus (p. Athen. iv. 23), that at the time of Herodotus, Paeonia was not expelled, but compelled to submit to the authority of the Lucanians, and receive a barbarian colony within their walls. They still retained many of their customs, and for ages afterwards continued to assemble at a certain festival every year with the express purpose of bewailing their captivity, and preserving the traditions of their prosperity. It would appear
PAESTUM.

from Livy (viii. 17), though the passage is not quite distinct, that it was recovered by Alexander, king of Epirus, as late as n. c. 350; but if so, it certainly soon fell again into the hands of the barbarians.

Posidonia passed with the rest of Lucania into the possession of the Romans. We find no mention of it on this occasion; but in n. c. 375, immediately after the departure of Pyrrhus from Italy, the Romans established a colony there for the security of their newly acquired territory on this side. (Livy. Epit. xiv.; Vell. Pat. i. 14; Strab. v. p. 251.) It was probably at this period that the name was changed, or corrupted, into Pasistrum, though the change may have already taken place at the time when the city fell into the hands of the Lucanians.

But, from the time that it became a Roman colony, the name of Paestum seems to have exclusively prevailed; and even its coins, which are inscribed with Greek characters, have the legend PAESTUM and PAETISTANUN. (Eckhel, vol. i. p. 158.) We hear here of Pasistrum which was the seat of one of the Colonies Latins, and distinguished itself by its unshaken fidelity throughout the Second Punic War. Thus the Paestani are mentioned as sending golden paterae as a present to the Roman senate just before the battle of Cannae (Livy. xxiii. 56). Again in n. c. 210 they furnished ships to the sea of a Cretan which under the command of C. Quintus repaired to the siege of Tarentum; and the following year they were among the eighteen colonies which still pressed their readiness to furnish supplies and recruits to the Roman armies, notwithstanding the long-continued pressure of the war (Livy. xxvii. 39, xxvii. 10.)

Paestum was therefore at this period still a flourishing and considerable town, but we hear little more of it during the Roman Republic. It is incidentally mentioned by Cicero in one of his letters (Ep. ad Att. xi. 17); and is noticed by all the geographers as a still suburban municipal town. Strabo, however, observes that it was rendered unhealthy by the stagnation of a small river which flowed beneath its walls (v. p. 251); and it was probably, therefore, already on the decline when it became one of the eight Praefecturae of Lucania at a considerably later period; and inscriptions attest its continued existence throughout the Roman Empire. (Strab. i. c.; Plin. iii. 5. a. 10; Pol. iii. 1. § 8; Lib. Colon. p. 209; Orell. Inscr. 135, 2495, 3078; Bull. d. Inst. Arch. 1836, p. 128.) In some of these it bears the title of a Cretan; but it is uncertain at what period it attained that rank: it certainly cannot refer to the original Latin colony, as that must have become merged in the municipal condition by the effect of the Lex Julia. We learn from ecclesiastical authorities that it became a bishopric at least as early as the fifth century; and it is probable that its final decay and desolation was the result of the ravages of the Saracens in the tenth century. At that time the episcopal see was removed to the neighbouring town of Capaccio, in an elevated situation a few miles inland.

Paestum was chiefly celebrated in ancient times for its roses, which possessed the peculiarity of flowering twice a year, and were considered as surpassing all others in fragrance. (Virg. Georg. iv. 118; Ovid. Met. xvi. 708; Propert. iv. 5. 59; Martial. iv. 41. 10, vi. 80. 6; Auson. Idyll. 14. 11.) The roses that still grow wild among the ruins are said to retain their ancient property, and flower regularly both in May and November.

The site of Paestum appears to have continued wholly uninhabited from the time when the episcopal see was removed till within a very recent period. It was not till the middle of the last century that attention was drawn to the ruins which are now so celebrated. Though they can hardly be said to have been then first discovered, as they must always have been a conspicuous object from the Bay of Salerno, and could not but have been known in their immediate neighbourhood, they were certainly unknown to the rest of Europe. Even the diligent Oliviarius, writing in 1624, notices the fact that there were ruins which bore the name of Paestum, without any allusion to their ancient site and importance. (Oliviarius. p. 1255.) They seem to have been known to a certain Count Gasola, in the service of Charles VII., King of Naples, before the middle of the last century, and were described by Antonini, in his work on the topography of Lucania (Naples, 1745), and noticed by Mazzaocchi, who has inserted a dissertation on the history of Paestum in his work on the Heraclean Tablets (pp. 496-511). In the beginning of the eighteenth century they became the subject of the special works of Magnoni and Paoli, and were visited by travellers from all parts of Europe. Among these, Swinburne in 1779, has left a very accurate description of the ruins; and their architectural details are given by Wilkins in his Magna Graecia (fol. Oxford, 1786).

The principal ruins consist of the walls, and three temples standing within the space enclosed by them. The whole circuit of the walls can be clearly made out, and they are in many places standing to a considerable height; several of the towers also remain at the angles, and vestiges of the ancient gates, which are four in number; one of these, on the E. side of the town, is nearly perfect, and surrounded by a regularly constructed arch. The whole circuit of the walls forms an irregular polygon, about 3 miles in circumference. The two principal temples stand not far from the southern gate of the city. The finest and most ancient of these is commonly known as the temple of Neptune; but there is no authority for the name, beyond the fact of a Pool having stood near the Greek colonists. It is unquestionably the tuteal deity of the city which derived from him its ancient name of Posidonia. The temple was hypaethral, or had its cella open to the sky, and is 195 feet long by 79 wide: it is remarkably perfect; not a single column is wanting, and the entablature and pediments are almost entire. The style of architecture is Doric, but its proportions are heavier, and the style altogether more massive and solid than any other extant edifice of the kind. On this account some of the earlier antiquaries disputed the fact of its Greek origin, and ascribed it to the Phenicians or Etruscans; but there is not a shadow of foundation for this; we have no trace of any settlement of the Phenicians in the Greek colonies, and the architecture is of pure Greek style, though probably one of the most ancient specimens of the Doric order now remaining. About 100 yards from the temple of Neptune, and nearer to the south gate, is the second edifice, which on account of some particulars in its plan has been called a Basilica, but is unquestionably also a temple. It is of the kind called pseudo-dipteral; but differs from every other ancient building known in having nine columns at each end, while the interior is divided into two parts by a single range of columns running along the centre of the building. It was probably a temple consecrated to two different divinities, or rather, in...
fact, two temples united in one. It has 18 columns in each side, and is 180 feet long by 80 in width. The third temple, which is at some distance from the other two, nearer to the N. gate of the town, and is commonly known as the Temple of Ceres or Vesta (though there is no reason for either name), is much smaller than the other two, being only 108 feet in length by 48 in breadth; it presents so remarkable architectural peculiarities, but is, as well as the so-called Basilica, of much later date than the great temple. Mr. Wilkins, indeed, would assign them both to the Roman period; but it is difficult to reconcile this with the history of the city, which never appears to have been a place of much importance under the Roman rule. (Swinburne’s Travels, vol. ii. pp. 131–138; Wilkins’s Magna Graecia, pp. 55–67.)

The other remains are of little importance. The vestiges of an amphitheatre exist near the centre of the city; and not far from them are the fallen ruins of a fourth temple, of small size and clearly of Roman date. Excavations have also laid bare the foundations of many houses and other buildings, and the traces of a portico, which appear to indicate the site of the ancient forum. The remains of an aqueduct are also visible outside the walls; and numerous tombs (some of which are said to be of much interest) have been recently brought to light.

The small river which (as already noticed by Strabo), by stagnating under the walls of Paestum, renders its situation so unhealthy, is now called the Salso; its ancient name is not mentioned. It forms extensive deposits of a calcareous stone, resembling the Roman travertina, which forms an excellent building material, with which both the walls and edifices of the city have been constructed. The malaria, which caused the site to be wholly abandoned during the middle ages, has already sensibly diminished, since the resort of travellers has again attracted a small population to the spot, and given rise to some cultivation.

About five miles from Paestum, at the mouth of the Silaurus or Selin, stood, in ancient times, a celebrated temple of Jove, which, according to the tradition adopted both by Strabo and Pliny, was founded by the Argonauts under Jason (Strab. vi. p. 232; Plin. iii. 5. s. 10). It is of the Argive Hera, or Juno, the Troezenian colonists set up the temple on the N. bank, probably more correctly, to the headland called I at the entrance to the bay, and is now known as the Teletaean (Strab. v. 5. s. 10; Plin. iii. 5. s. 10; Mel. ii. 6.)

PAESULA (Nauui) in Hispalia Baetica. (Identified by Uberti with uncertain.)

PAESUS (Nauuros), a port of Troas, at the entrance of Lampsacus and Parium. (Herod. v. 117.) At one from Miletus; but in Strabo’s time was destroyed, and ferried themselves to Lamprocus, a Milesian colony. The place continued to be called Paesus, and now bears the name PAGAEAE. [PAGAEAE]

PAGALA (a Nauys) a town on the coast of Garamantes, came after Jason. It seems probable that it is the Segada or Pegala of Pliny (iv. 10.) also in the country of the Pegallae (i. 54). It cannot be identified.

PAGASAS (Pegasa) an island of the Hesperides, off the coast of Garamantes. (Reg. i. 3. v. 8. s. 15; Mela, ii. 3.)

PAGASAE (Pegasa) a town on the coast of Segeda or Pegala. (Strab. ix. p. 438; Pegasaus Ser. 159; Plin. l. c.) Pegasa is the headland where Jason built his ship Argo. It seems probable that it is the spot where Jason built his ship Argo. It was the place where some of the ancients derived the name of that vessel (Pegasa) from the numerous and fierce horsemen who were found at this spot. (Dem. ol. i. 1.)

where for Nauys we ought
PAGYRITAE (Παγυρίται, Ptol. iii. 3. § 22), a people of European Sarmatia, whose position cannot be made out. Schrafik (Stor. Aët. vol. i. p. 211) connects the termination of their name with the word "gura," which the Poles and other Russian-Carpathian stocks use for "gura," or "mountain." [E. B. J.]

PALACIUM (Παλακίον), a fortress in the Tauric Chersonese, built by Scilius, king of the Tagrian-Scythians, to resist the attacks of Mithridates and his generals. (Strab. vii. p. 516.) The name, which it seems to have taken from his son Palaeus (Strab. pp. 306, 309), still survives in the modern Balakah, which Dr. Clark (Travels, vol. ii. p. 309) inaccurately supposes to be derived from the Genoese "Bella Clava," or "The Fair Harbour." Its harbour was the Symbolon Portus Συμβόλον λιμάν. (Strab. vii. pp. 308, 309; Arrian, Peripl. p. 20; Ptol. iii. 6. § 2; Ptole. iv. 26), or the Cembaro or Cembaro of the middle ages, the narrow entrance to which has been described by Strabo (L. c.) with such fidelity to nature. According to him, the harbour, together with that of Cenus (Scabaeopolis), constituted by their approach an isthmus of 40 stadia; this with a wall fenced the Lesser Peninsula, having within it the city of Chersonesus. The Sinus Portus-China of Pomponius Mela (ii. l. § 8), from the position he assigns to it between Cimnetopolis and the next point to the W., can only agree with Balakah, which is truly "καλὸς λιμάν. Περιοχής, ο Bitcoins duolac is.It is almost impossible to say that the poet's graphic picture of details freshly drawn from the visible world, is as true of other land-locked basins, edged in by cliffs, as when applied to the greyish-blue, or light red Jura rocks, which form in the entrance the straits of Balakah. [E. B. J.]

PALAEE, a town of Thrace, according to Lupia near Mousolosia. (Itin. Ant. p. 568.) [T. H. D.]

PALAEA. 1. (Paläaia), a place in the Troad on the coast, 130 stadia from Andreia. (Strab. xiii. p. 514.)

2. (Παλαία κάστ. in Laconia. [Pleia.]

Palaëbylos (Παλαϊβλος, Strab. xv. p. 755; Παλαϊβλος, Ptol. v. 15. § 21), a town of Phoenicia, which Strabo places after the Climax or promontory called Ras-Watta-Salam, forming the N. extremity of the Bay of Karuan. The site, which is unknown, was therefore probably between the Climax, in the steep cliffs of which it was necessary to cut steps—whereby the name—and the river Lykus, among the hills which closely border the shore, and rise to the height of 1000 feet. Ptolemy (L. c.) calls it a city of the interior, and the Peuge-Table places it 7 M. from Berythus, but does not give its distance from Byblos. (Kemrich, Phoenicia, p. 12. London, 1855.) [E. B. J.]

PALAIAMYNUS. (Μυδύς)

Palaëobyblus. (Palaëobyblus.)

Palaepharus, or Palaepharsalus, that is either old Pharae or Pherae or old Pharsalus, according to the difference of the readings in the text of Livy (xxii. 13).

Palaëpolis (Neapoli.)
PALAEBUS. (Παλαέβος: Eik. Παλαέβος), a town on the W. coast of Accasia, on the Ionian sea, which is placed by Strabo between Leucas and Alysia. Its exact site is unknown. Leake places it in the valley of Loredii. In the first year of the Peloponnesian War (s. c. 431) Palaebus was in alliance with the Athenians; and when the latter people took the neighbouring town of Solium, which was a Corinthian colony, they gave both it and its territory to the inhabitants of Palaebus. (Thuc. ii. 30; Strab. x. pp. 450, 459.)

Palaestimundum (Plin. vi. 22. s. 24), a great town in the ancient Taprobane (Ceylon), an account of which was given to the Romans by Annius Plancus, who spent six months there during the reign of the emperor Claudius. According to him, it was situated on a river of the same name, which, flowing from a great inland lake, entered the sea by three mouths. It is probable that it is represented by the present Trincomalee, in the neighbourhood of which are the remains of ancient and extensive works for the regulation of the course of the river—now called the Mahavela-Ganga. (Brookes, Geogr. Journ. vol. iii. p. 223.) The name occurs under the form Palaesimundus in the Periphas Mar. Ethiop., and in Manethon, as Palaesimundus, of the northern part of the island itself. Thus the first speaks of viris Palaesimundis, but anciently Taprobane (c. 61, ed. Müller); and the second states that the island of Taprobane was formerly called Palaesimundus, but is now called Salice (c. 35, ed. Müller).

Ptolomy and Stephanus, who follows him, state that the island Palace m. exeixto xhordov, rei de kai tov antioth, on the northern part of the island itself. Thus the first speaks of viris Le-

Palaestina, (Παλαύστα, Παλαυστίνα, Παλαύστη, Παλαύστη̂, Παλαύστης), the most commonly received and classical name for the country, otherwise called the Land of Canaan, Judea, the Holy Land, &c. This name has the authority of the prophetic books, among the sacred writers; and was received by the earliest secular historians. Herodotus calls the Hebrews Syrians of Palestine; and states that the sea-border of Syria, inhabited, according to him, by Phoenicians from the Red Sea, was called Palaestina, as far as Egypt (vii. 89). He elsewhere places Syria Palaestina in the valley of Loredii. In the first year of the Peloponnesian War, as seen this, was called Palaestina, as far as Egypt (vii. 89). He elsewhere places Syria Palaestina in the valley of Loredii. In the first year of the Peloponnesian War, as far as Egypt (vii. 89). He elsewhere places Syria Palaestina in the valley of Loredii. In the first year of the Peloponnesian War, as far as Egypt (vii. 89). He elsewhere places Syria Palaestina in the valley of Loredii. In the first year of the Peloponnesian War, as far as Egypt (vii. 89). He elsewhere places Syria Palaestina in the valley of Loredii. In the first year of the Peloponnesian War, as far as Egypt (vii. 89). He elsewhere places Syria Palaestina in the valley of Loredii. In the first year of the Peloponnesian War, as far as Egypt (vii. 89). He elsewhere places Syria Palaestina in the valley of Loredii. In the first year of the Peloponnesian War, as far as Egypt (vii. 89). He elsewhere places Syria Palaestina in the valley of Loredii. In the first year of the Peloponnesian War, as far as Egypt (vii. 89). He elsewhere places Syria Palaestina in the valley of Loredii. In the first year of the Peloponnesian War, as far as Egypt (vii. 89). He elsewhere places Syria Palaestina in the valley of Loredii. In the first year of the Peloponnesian War, as far as Egypt (vii. 89). He elsewhere places Syria Palaestina in the valley of Loredii. In the first year of the Peloponnesian War, as far as Egypt (vii. 89). He elsewhere places Syria Palaestina in the valley of Loredii. In the first year of the Peloponnesian War, as far as Egypt (vii. 89).
those boundaries, as do the sacred writers and Josephus, we may now take a general view of its physical features which have always so much to do with the formation of the character of the inhabitants. It is well marked in its principal features, in the book of Deuteronomy, as "a land of brooks of water, of fountains and depths, that spring out of valleys and hills; a land of wheat, and barley, and vines, and fig-trees, and pomegranates; a land of oil-olive, and honey; a land wherein thou shalt eat bread without scarceness; thou shalt not lack anything in it; a land whose stones are iron, and out of whose hills thou mayest dig brass" (viii. 7—9 comp. xi. 11, 12). The great variety of its natural productions must be ascribed to the diversified character of its surface and the richness of its soil, which was obviously taxed to the utmost by the industry of its numerous inhabitants; for there is no part of the hill country, however at present desolate, however, with this alluvial near the edges of ancient agricultural labour in its scarped rocks and ruined terrace-walls; while in the vicinity of its modern villages, the rude traditional style of husbandry, unimproved and unvaried for 3000 years, enables the traveller to realise the ancient fertility of this highly favoured land, and the occupation of the soil is as well described in the descriptions of their poetry, all whose images are borrowed from agricultural and pastoral pursuits. As the peculiar characteristic feature in the geography of Greece is the vast proportion of its sea-border to its superficial area, so the peculiarity of the geography of Palestine may be said to be the undue proportion of its sea to its hither. In the district of Tripoli, Akka, and Damascus, the descriptions of soil prevail. In general that of the mountainous parts of Palestine and central Syria is dry and stony, being formed in a great measure from the debris of rocks, of which a large portion of the surface of the districts of Lebanon, the Hermon, and Leesia, with the mountainous countries of Judea, are composed; it is mixed, however, with the alluvial brought down by the irrigating streams. The second and richest district are the plains of Esdraelon, Zabulon, Baalbek, part of the Decapolis, and Damascus, as well as the valleys of the Jordan and Orontes, which for the most part consist of a fat soamy soil. Being almost without a pebble, it becomes almost a marsh drained by the season of the rains, and août, which, when saturated by the rains, is almost a quagmire, and in the early part of the summer becomes a marsh: when cultivated, most abundant crops of tobacco, cotton, and grain are obtained. The remainder of the territory chiefly consists of the plains called Baaw by the Arabic, and Modern by the Hebrews, both words signifying only a tract of land left entirely to nature, and being applied to the pasture tracts about almost every town in Syria, as well as to those spots where vegetation almost entirely fails. Such spots prevail in the tracts towards the eastern side of the country, where the soil is mostly an indurated clay, with irregular ridges of limy stone hills separating different parts of the surface. The best description of this soil is occasionally diversified by hill and dale, and has very much the appearance of some of our downs, but is covered with the liquorice plant, mixed with aromatic shrubs and, occasionally some dwarf trees, such as the tamarisk and acacia. Many of the tracts eastward of the Jordan (Peneae) are of this description, particularly those near the Hermon, which, under the name of Roman Arabia, had Bousa for its capital. The inferior tracts are frequently coated with pebbles and black flints, having little, and sometimes no vegetation. Such are the greater portions of the south-east of Gazze and Hebron, and that part of the pashalick which borders upon Arabia Deserta, where scarcity of water has produced a wilderness, which at best is only capable of nourishing a limited number of sheep, goats, and camels: its condition is the worst in summer, at which season little or no rain falls throughout the eastern parts of Syria.

Owing to the impregnality of its surface, Palestine has a great variety of temperature and climate, which have been distributed as follows. — (1) The cold; (2) warm and humid; (3) warm and dry. The first belongs principally to the Lebanon range and to Mount Hermon, in the extreme north of the country, but is shared in some measure by the mountain districts of Nudda, Jerusalem, and Hebron, where the winters are often very severe, the springs mild, and a refreshing breeze tempers the summer heat. The second embraces the slopes adjoining the coast of the Mediterranean, together with the adjacent plains of Akka, Jaffa, and Gaza; also those in the interior, such as Esdraelon, the valley of the Jordan, the valley of the Orontes, and the plains of Damascus, which prevail in the south-eastern parts of Syria, the contiguity of which to the arid deserts of burning sand, exposes them to the furnace blasts of the sirocco untempered by the humid winds which prevail to the west of the central highlands, while the depression of the southern part of the Jordan valley and the Dead Sea gives the plain of Arabah, and the districts in the vicinity of that sea an Egyptian climate. (Col. Chesney, Expedition to the Euphrates, &c. vol. i. pp. 533—537.)

II. GEOLOGY, NATURAL DIVISIONS, AND PRODUCTIONS.

The general geographical position of Palestine is well described in the following extract: — "That great mountain chain known to the ancients under the various names of Imaus, Caucasus, and Tanus, which extends due east and west from China to Asia Minor; this chain, at the point where it enters Asia Minor, throws off to the southward a subordinating ridge of hills, which forms the barrier between the Western and the Eastern parts of that part of Assyria. After pursuing a tortuous course for some time, and breaking into the parallel ridges of Libanus and Anti-Libanus, it runs with many breaks and diversifications through Palestine and the Arabian peninsula to the Indian Ocean. One of the most remarkable of these breaks is the great plain of Esdraelon, the battle-field of the East. From this point . . . the ridge or mountainous tract extends, without interruption, to the south end of the Dead Sea, or further. This whole tract rises gradually towards the south, forming the hill country of Ephraim and Judah, until, in the vicinity of Hebron, it attains an altitude of 2820 feet above the level of the Mediterranean. At a point exactly opposite to the extreme North of the Dead Sea, i.e. due west from it, where the entire ridge has an elevation of about 2710 feet, and close to the saddle of the ridge, a very remarkable feature of this rocky process, so to call it, occurs. The appearance is as if a single, but vast wave of this sea of rock, rising and swelling gradually from north to south, had been suddenly checked in its advance, and, after a
considerable subsidence below the general level, left standing perfectly isolated from the surrounding mass, both as to its front and sides. Add, that about the middle of this wave there is a slight depression, channelling it from north-west to south-east, and you have before you the "natural limestone rock which forms the site of Jerusalem." (Christian Remembrancer, No. lxvi. N. S., vol. xviii. pp. 425, 426.) A few additions to this graphic sketch of the general geography of Palestine will suffice to complete the description of its main features, and to furnish a nomenclature for the more detailed notices which must follow. This addition will be best supplied by the naturalist Rusegger, whose travels have furnished a desideratum in the geography of Palestine. It will, however, be more convenient to consider below his third division of the country, comprehending the river Jordan and the Dead Sea, with its volcanic phenomena, as those articles have been placed for the sake of the garden-terrace, and a few scattered pines, entirely devoid of wood.

The want of grass begins to show itself in Syria, and especially on the sides of the promontory, owing to the long continued droughts. The Syrian mountains along the coast north of Carmel, and especially the sides of Lebanon, are, with the exception of the garden-terrace, and a few scattered pines, entirely devoid of wood.

(2.) The land immediately towards the east, which follows the line of coast from south to north, at a distance now greater now less, rises in the form of a lofty mountain chain, the summits of which are for the most part rounded, and rarely peaked; forming numerous plateaux, and including the whole space between the coast on the west, and the valley of the Jordan, with the Dead Sea and the lake of Tiberias, on the east, having an average breadth of from 8 to 10 German miles.

This mountain chain commences in the south with the range of Jebel Kharil, which, towards the west and southeast, stretches to the plain of Gaza and the sandy deserts of the ismaun, and towards the south and southeast joins the mountain country of Arabia Petraea, and towards the east sinks suddenly into the basin of the Dead Sea. Immediately joined to Jebel Kharil are Jebel el-Kods and the mountains of Ephraim, sinking on the east into the valley of the Jordan, and on the west into the beach of the plain of Jaffa. Further north follows Jebel Nebi, with the other mountains of Samaria, bounded on the east by the valley of the Jordan, on the west by the coast district; and towards the north-west extending to the sea, and forming the promontory of Carmel. North of Mery 'Ibn Amir are the mountains of Galilee, Hermon, Tabor, Jebel Safid, Saron, &c. This group sinks into the basin of the lake of Tiberias and the upper valley of the Jordan, on the east, on the west into the coast district of Acre and Sour, extends into the sea in several promontories, and is united to the chain of Lebanon at Seida, by Jebel-ed-Draa, and by the mountains of the Upper Jordan and of Hasbela to Jebel-es-Sheik, or Jebel-es-Tefji, and through the channel of Antilibanus to the Mediterranean.

The whole mountain chain in the district just described belongs to the Jura and chalk formation. Crystaline and platoic rocks there are none, and the volcanic formations are to be found only in the mountains surrounding the basin of the lake of Tiberias. The highest points are situated in the north near the edge of the mountains of the district, and especially Jebel-es-Sheik, in the eastern and southeastern part of Galilee. (Jebel-es-Sheik is 9500 feet above the sea.) Further south the mountains become perceptibly lower, and the highest of the mountains of Judaea are scarcely 4000 feet above the sea.

The character of the southern part of this range is very different from that of the northern. The plateaux and slopes of the central chain of Judaea are wild, rocky, and devoid of vegetation; the valleys numerous, deep, and narrow. In the lowlands, wherever productive soil is collected, and there is a supply of water, there springs up a rich vegetation. All the plants of the temperate region of Europe flourish well, and the various tropical fruits in perfection, especially the vine and olive.

In Samaria the character of the land is more genial; vegetation flourishes on all sides, and several of the mountains are clothed with wood to their summits. With still greater beauty and grandeur does nature exhibit herself in Galilee. The mountains become higher, their form bolder and sharper,
The great Hermon (Jobel-es-Saleikh) rises high above the sea, and is the highest mountain in the country. It is the most remarkable of all the mountains of the country, and is the highest peak of the range of mountains which extend from the Mediterranean to the Dead Sea. It is a beautiful pastoral land, and extends to the heights of the mountains. Considerable mountain streams water the valleys.

3. To the east of this mountain chain lies the valley of the Jordan, the most remarkable of all the valleys of the country. It is at its greatest width as it approaches the sea, and as it approaches the coast it narrows considerably. It is a beautiful pastoral land, and extends to the heights of the mountains. Considerable mountain streams water the valleys.

4. On the east of the Dead Sea lies the Jordan valley, with the sea of Tiberias. It rises like a wall on a steep mountain range of Judea. The Jordan river, which rises in the mountains of Moab, flows through this valley and is joined by the Dead Sea and the Gulf of Elath.

III. The Jordan.

1. The most celebrated river of Judaea, and of all the countries of the world, is the Jordan. Its etymology has not been satisfactorily investigated by the ancients. It is called Jor, and Jizzor, by some, and also Jozor, by others. It is the Jordan river, which flows through the valley of Tiberias. It is the Jordan river, which flows through the valley of Tiberias. It is the Jordan river, which flows through the valley of Tiberias. It is the Jordan river, which flows through the valley of Tiberias.

2. The second fountain of the Jordan is at Tell el-Kadi. It is at Tell el-Kadi. It is at Tell el-Kadi. It is at Tell el-Kadi. It is at Tell el-Kadi.

3. A mile to the west of Tell el-Kadi, runs the Nahr Hasbea, the Jordan river, little inferior to either of the former. It rises 6 or 8 miles to the north, the little village of Hasbea, being joined in its course by a stream from Mount Hermon, contributes considerably to the bulk of the Jordan. It is therefore somewhat remarkable that this tributary has been unnoticed until comparatively modern times. (Robinson, Bib. Res. vol. iii. p. 354, note 3.)

These three principal sources of the Jordan, as the natives affirm, do not intermingle their waters until they meet in the small lake now called Bakr.
el-Huleh, "the waters of Meron" of Scripture (Josh. xi. 5, 7), the SKHECHONITES PALUS of Josephus (Ant. v. 6 § 1, Bell. Jud. iii. 12 § 7, iv. 1 § 1); but the plain between this lake and Paneas is hard to be explored, in consequence of numerous fountains and the rivulets into which the main channel is divided. (Robinson, l.c. pp. 835, 354; Bibliotheca Sacra, 1843, pp. 12, 13.)

This point was investigated by Dr. Robinson in 1852, and he found that both the Leddas and the Hasdey unite their waters with the stream from Banaias, some distance above the lake, to which they run in one stream. (Journal R. Geog. Soc. vol. xxiv. pp. 337-339.)

This region, now called Marj el-Huleh, might well be designated $\delta\tau\o\epsilon$ or $\lambda\gamma\nu\tau\o\nu\iota\nu\d\o\o\d\o\i\nu\i\o\nu$, "the marshes of Jordan," by which name, however, the author of the first book of Maccabees (1 Macc. ix. 42) and Josephus (Ant. xii. i. § 3) would seem to signify the marshy plain to the south of the Dead Sea. The water of this reservoir was at one time supposed to be the source of the Jordan, and was ascribed to the Euphrates; but, as already noticed, the sand and silt of the northern part of the lake have long since covered the bed of this ancient channel, which is now filled with a similar deposit of sand and silt.

Attention has been lately called to a peculiar phenomenon exhibited by this river, the problems relating to which have been solved twice within the last few years by the enterprise of English and American sailors. In the spring of the year 1858 a series of barometrical observations by M. Berton gave to the Dead Sea a depression of 1374 feet below the level of the Mediterranean, and to the sea of Tiberias a depression of 755 feet, thus establishing a fall of 619 feet between the two lakes. At the close of the same year, similar observations were made by Russegger, with somewhat different results; the depression of the Dead Sea being given as 1429 feet, the sea of Tiberias 666 feet, and the consequent fall of the Jordan between the two, 763 feet.

Herr von Wildenbruch repeated the observations by barometer in 1845, with the following results:—Depression of the Dead Sea 1446 feet, of the sea of Tiberias 845 feet, difference 601 feet. He carried his observations further north, even to the source of Tell-el-Kadi, with the following results:—At Jacob's bridge, about 2½ miles from the southern extremity of Bahar Huleh, he found the Jordan 89½ feet above the Mediterranean; at the Bahar Huleh 100 feet; and at the source tell el-Kadi, between the two, a direct course of 117 miles:—the most rapid fall being between the bridge of Jacob and the sea of Tiberias, a distance of only 8 miles, in which the river falls 845 feet, or 116 feet per mile. Results so remarkable did not find easy credence, although they were further tested by a trigonometrical survey by the King's Royal Engineers, in 1841, which confirmed the barometrical observations for the Dead Sea, but were remarkably at variance with the statement for the sea of Tiberias, giving to the former a depression of 1313 feet, and to the latter of 338 feet, and a difference of level between the two of 984 feet. The whole subject is ably treated by Mr. Petermann, in a paper read before the Geographical Society, chiefly in answer to the strictures of Dr. Robinson, in a communication made to the same society,—both of which papers were subsequently published in the journal of the society (vol. xviii. part 2, 1848). In consequence of these last, the writer in 1842 followed the course of the Jordan from the sea of Tiberias to the sea of Huleh, and found it to be a continuous torrent, rushing down in a narrow rocky channel between almost precipitous mountains. It is well described by Harrington, who explored it in 1843, as a "continuous waterfall" (cited by Petermann, l.c. p. 103).

The lower Jordan, between the sea of Tiberias and the Dead Sea, was subsequently explored by Lient. Molyneux in 1847, and by an American expedition under Lient. Lynch in the following year. The following extracts from the very graphic account of this expedition, already referred to, will give the best idea of the character of this interesting river, hitherto so little known. Immediately on leaving the sea of Tiberias they found the river upwards of 100 feet broad and 4 or 5 deep; but on reaching the banks of a bridal lane 8 miles down the stream they found the passage obstructed by the ruins, and their difficulties commenced; for seven hours they scarcely ever had sufficient water to swim the boat for 100 yards together. In many places the river is split into a number of small streams, and consequently without much water in any of them. Occasionally the boat had to be carried upwards of 100 yards over rocks and through thorny bushes; and in some places they had high, steep, sandy cliffs all along the banks of the river. In other places the boat had to be carried on the backs of the camels, the stream being quite impracticable. The Ghur, or great valley of the Jordan, is about 8 or 9 miles broad and 8, and the space is anything but flat—rolling but a continuation of the mountains, with yellow dried-up weeds, which look when distant like corn stubbles. These hills, however, sink into insignificance when compared to the ranges of the mountains which enclose the Ghur; and it is therefore only by comparison that this part of the Ghur is entitled to be called a valley. Within this broader valley is a smaller one on a lower level, through which the river runs; and its winding course, which is marked by luxuriant vegetation, resembles a gigantic serpent twisting down the valley. So tortuous is its course, that it would be quite impossible to give any account of its various turnings in its way from the lake of Tiberias to the Dead Sea...
PALAESTINA.

tortuous manner between them. In many places these cliffs are like walls. About this part of the Jordan the lower plain might be perhaps 1½ or 2 miles broad, and so full of the most rank and luxuriant vegetation, like a jungle, that in a few spots only can anything approach its banks. Below Beisan the higher terraces of the Jordan's valley plains are lost in the fertile space below; the hills become irregular and only partly cultivated; and by degrees the whole Ghōr resumes its original form. The zigzag course of the river is still pretty marked by lines of green foliage on its banks, as it veers from the cliffs on one side to those on the other. This general character of the river and of the Ghōr is continued to the Dead Sea, the mountains on either side of the upper valley approaching or receding, and the river winding in the lower valley between bare cliffs of soft limestone, in some places not less than 300 or 400 feet high, having many shallows and some large falls. The American expedition added little to the information contained in the paper of old and the countryman who only visited his exploit one month. Lient. Lynch's report, however, fully confirms all Lient. Molyneux's observations; and he sums up the results of the survey in the following sentence:—"The great secret of the depression between lakes Tiberias and the Dead Sea is solved by the tortuous course of the Jordan. In a space of 60 miles of latitudes and 4 or 5 miles of longitude, the Jordan traverses at least 200 miles. We have plunged down twenty-seven threatening rapids, besides a great many of lesser magnitude." (Lynch, Narrative of the United States' Expedition to the Jordan, &c., p. 265.) It is satisfactory also to find that the trigonometrical survey of the American expedition confirms the results arrived at by Lient. Symonds. (Dr. Robinson, Theological Review for 1848, pp. 764—768.)

It is obvious that these phenomena have an important bearing on the historical notices of the river; and it is curious to observe (as Mr. Petermann has remarked), in examining the results of De Berton, Robinson and Fenn of the American expedition both of the Dead Sea and of the lake of Tiberias, increases in a chronological order (with only one exception); which may perhaps indicate that a continual change is going on in the level of the entire Ghōr, especially as it is well proved that the whole Jordan valley, with its lakes, not only has been but still is subject to volcanic action; as Ruessiger has remarked that the mountains between Jerusalem and the Jordan, in the valley of the Jordan itself, and those around the Dead Sea, bear unequivocal evidence of volcanic agency, such as disruptions, upheavals, faults, &c., &c.—proofs of which agency are still notorious in continual earthquakes, hot springs, and fumaroles in the region.

One of the earliest historical facts connected with this river is its periodical overflow during the season of barley-harvest (Josh. iii. 15; 1 Chron. xii. 15; Jeremiah, xii. 5; see Blunt's Undesigned Coincidences, pp. 113, 114); and allusion is made to this fact after the captivity. (Ecclesi. xxiv. 26; Aristaenus, Epist. ad Philip. vi.) The river in the vicinity of Jericho was visited by the writer at all seasons of the year, but he never witnessed an overflow, nor were the Bedonins who inhabit its banks acquainted with the phenomenon. The American expedition went down the river in the month of April, and were off Jericho at Easter, yet they wit-nessed nothing of the kind, though Lient. Lynch remarks, "the river is in the latter stage of a freshet; a few weeks earlier or later, and passage would have been impracticable." Considerably further north, however, not far below Beisan, Lient. Molyneux remarks "a quantity of deposit in the plain of the Ghōr, with mounds on the banks, and various places at a distance from the river, from which it was evident that the Jordan widely overflows its banks; and the sheik informed him that in winter it is occasionally half a mile across; which accounts for the luxuriant vegetation in this part of the Ghōr" (l. c. p. 117). It would appear from this that the submerge of the banks of the Dead Sea and the more rapid fall of the Jordan consequent upon it, which has also cut out for it a deeper channel, has prevented the overflow except in those parts where the fall is not so rapid.

Another change may also be accounted for in the same manner. "The fords of the Jordan" were once few and far between, as is evident from the historical notices. (Josh. ii. 7; Judges, iii. 28, viii. 24, xii. 5.) But Lient. Molyneux says of the upper part of its course, "I am within the mark when I say that there are many hundreds of places where we might have walked across, without wetting our feet, on the large rocks and stones" (p. 115).

The thick jungle on the banks of the river was formerly a covert for wild beasts, from which they were dislodged by the periodical overflow of the river; and "the lion coming up from the swelling of Jordan" is a familiar figure in the prophet Jeremiah (xxix. 1, 44). It was supposed until very recently that not only the lion but all other wild beasts were extinct in Palestine, or that the wild boar was the sole surviving member of the genus in company with Lient. Molyneux reported having seen "two tigers and a boar" in their passage down the stream (p. 118).

The principal tributaries of the Jordan join it from the east; the most considerable are the Yarmuk [GADARA] and the Zerka [JABBAK].

This river is principally noted in sacred history for the miraculous deliverance of the children of Israel under Joshua (iii.).—the miracle was repeated twice afterwards in the passage of Eiljah and Eliasah (2 Kings, ii. 8, 14).—and for the baptism of our Lord (St. Matt. iii. &c.). It is honoured with scanty notice by the classical geographers. Strabo reckons it the largest river of Syria (vi. p. 755). Pliny is somewhat more communicative. He speaks of Panas as its source, consistently with Josephus. "Jordania annis erituar fonte Panasae, qui nomen dedit Caesaris: annis amnoo, et quatenus locorum situs palitur ambicioso, accolique sem praebens, veint invius. Asphaltdien lacum dirum natura petis, a quo praeesto ebisset, aquasque lanitas perlient, Ergo ultima parvum convallium fons occulta in lacum se fundens quaeque plures Geneassar vocant, etc." (Hist. Nat. v. 15.)

Tacitus, though more brief, is still more accurate, as he notices the Bahr Huleh as well as the sea of Tiberias. "Neo Jordanes pelago acquirit: sed unum atque altem lacum, integre perdit: tertio retinet." (Hist. v. 6.)

The ancient name for El-Ghor was Ailun, and the modern native name of the Jordan is Es-Shiriah.

(Karl von Raumer, Palastina, 2nd ed., 1850, pp. 48—54, 449—452; Bitter, Erdkunde, g.e. West Asien, vol. 15, pp. 181—556, A.D. 1850, Der
IV. THE DEAD SEA.

Of all the natural phenomena of Palestine, the Dead Sea is that which has most attracted the notice of geographers and naturalists both in ancient and modern times, as exhibiting peculiarities and suggesting questions of great interest in a geological point of view.

Names.—The earliest allusion to this sea, which, according to the prevailing theory, refers to its original formation, is found in the book of Genesis (xv. 3), where it is identified with the vale "of Sodom," and denominated "the Salt Sea" (H. Sodamo τών διώξων, LXX.); comp. Num. xxxv. 3, 12); which Salt Sea is elsewhere identified with "the sea of the Philistines" (Deut. ii. 25; Josh. iii. 16, xii. 8). Sodamo is the name given to a fountain available by the prophets Joel (i. 20), Zachariah (xvii. 8), and Es- sikel (xiv. 18), the "former," or "eastern sea." Its common name among the classical authors, first found in Diodorus Siculus (inf. cit.), and adopted by Josephus, is "Asphaltitis Lacus" (Asphalitinos λίμνη), or simply Ἀσφαλιτίνη. The name by which it is known among the Europeans has the authority of Justin (xxxvi. 3. § 6) and Pausaniai (v. 7. § 4), who call it Sodamo ἡ θαλάσσα, "Mortum Mare." Its modern native name is Bahir Lut, "the Sea of Lot,"—therein perpetuating the memorial of the catastrophes to which it may owe its formation, or by which it is certain that its features were essentially altered and modified. The name assigned it by Strabo must be referred to a slip of the author; for it is too much to assume with Falconer that the geographer had written Ἀσφαλίτις λίμνη, when all the copies read Ἀσφαλίως λίμνη.

So copious are the modern notices of this remarkable inland sea, that it would be vain to attempt even an abridgment of them; and the necessity for doing which is increased by the earnest supposition that a successful surveying expedition, conducted by Lieut. Lynch of the American navy, whose published narrative has set at rest many questions connected with its physical formation. The principal ancient writers will be quoted in detail and in chronological order, that is may appear how far they have borrowed one from another, or may be regarded as independent witnesses. Their notices will then be substantiated orcontroverted by modern writers. The questions relating to the formation of the sea, its volcanic origin, and the other igneous phenomena in the country, will be reserved for another chapter.

The earliest extant writer who has noticed at any length the marvels of the Dead Sea, is Diodorus Siculus (v. 45), who has twice described it; first in his geographical survey of the country (ii. 48), and subsequently in his account of the expedition of Demetrius against the Nabataeans (xii. 98), to which last account a few particulars are added, which were omitted in the earlier book. "We ought not to pass over the character of this lake (Asphalitoinsa) unmentioned. It is situated in the midst of the saltary of Idumaea, in length extending about 500 stadia, and in breadth about 60. Its water is very salt, and of an extremely noxious temper. Moreover, no other fish nor terrestrial ordinary marine animals can live in it: and although great rivers remarkable for their sweetness flow into it, yet by its smell it counteracts their effect. From the centre of it there rises every year a large mass of solid bitumen, sometimes more than 3 pletrea in size, sometimes a little less than one pletrea. For this reason the neighbors of the barbarians usually call the greater, bull, and the lesser, calf. The bitumen floating on the surface of the water appears at a distance like an island. The time of the rising of the bitumen is known about twenty days before it takes place; for around the lake to the distance of several stadia the smell of the bitumen spreads with a noxious air, and all the silver, gold, and brass in the neighborhood loses its proper colour; which, however, returns again as soon as all the bitumen is ejected. The fire which burns beneath the ground and the stench render the inhabitants of the neighboring country sickly and very short-lived. It is nevertheless well fitted for the cultivation of palms, wherever it is traversed by streams of clear water, either from springs or from sources of irrigation. In a neighboring valley grows the plant called balsam, which yields an abundant income, as the plant grows in no other part of the world, and it is much used by physicians as a medicine. The bitumen which rises to the surface is carried away by the inhabitants of both sides of the lake, who are hostilely inclined towards each other. They carry away the bitumen in a singular manner without boats: they construct large rafts of reeds, which they launch into the lake. Upon each of these not more than three can sit, two of whom row with oars attached to the raft, and the third, armed with a bow, drives off those who are sailing up from the opposite side, or who venture to use violence; but when they come near to the bitumen they leap on it with axes in their hands, and, cutting it like soft stone, they load their rafts, and then return. If the raft break and any one fall off, even though he may be unable to swim, he does not sink as in other water, but floats as well as one who could swim; for the water naturally in the lake is not capable of expansion, or which contains air, but solid substances, which have a density like that of gold, silver, and lead, and the like: but even these sink much more slowly in this water than they would if they were thrown into any other lake. This source of wealth the barbarians possess, and they transport it into Egypt and there sell it for the purposes of embalming the dead; for unless this bitumen is mixed with the other spices, the bodies will not long remain undecayed."

It has been mentioned that Strabo (cir. A. D. 14) describes it under the name of Sibornis Lacus, a palpable confusion, as regards the name, with the sea of Sibon, which the former confines of Egypt (for Sibon Lacus), as is evident from his statement that it stretched along the sea-coast, as well as from the length which he assigns it, corresponding as it does with the 200 stadia given by Diodorus Siculus as the length of the true Sibornis Lacus, which that author properly places between Ceesarea and *

* In book ii. he says the smaller masses were two pletrea in size.
Palaestina.

Egypt (c. 30). The mistake is in the more unaccountable, as he not only describes the Dead Sea in a manner which shows that he was thoroughly acquainted with its peculiarities, but also cites the opinions of more ancient authors, who had described and attempted to explain its phenomena. His notice is peculiarly interesting from the accounts which he gives of the formation of the bitumen, and the other instances by which he records the vicinity of the operation of volcanic agency, of which more will be said in the following chapter. The native traditions of the catastrophe of the cities of the plain, and the still existing monuments of their overthrow, are facts not mentioned by the earlier historian.

The lake Sirbonis is of great extent: some have stated its circumference at 3000 stadia; it stretches along near the sea-coast, in length a little more than 300 stadia, deep, and with exceedingly heavy water, so that it is not necessary to swim, but one who advances into it up to his waist is immediately borne up. It is full of asphalt, which it vomits up at uncertain seasons from the midst of the depth, together with bubbles like those of boiling water, and the surface, covered with asparagum, which appears most combustible. Together with the asphalt there rises much smoke, smoky, and invisible to the sight, by which brass, silver, and everything shining, even gold, is tarnished; and by the tarnishing of their vessels the inhabitants of the neighbourhood know the time when the asphalt begins to rise, and make preparations for collecting it by competent means. Now the asphalt is the soil of the earth melted by heat, and bubbling up, and again changed into a solid mass by cold water, such as that of the lake, so that it requires to be cut; it then floats on the surface by reason of the nature of the water, which, as I have said, is such that a person who goes into it need not swim, and indeed cannot sink, but is supported by the water. This people sail up on the rafts, and cut and carry off as much as they can of the asphalt: this is what takes place. But Posidonius states that they being sorcerers use certain incantations, and consolidate the asphalt by pouring over it urine and other foul liquids, and then pressing them out. After this they cut it; when they cut it, it is found to have such properties in the bladder of those who suffer from stones. For gold-solder (χρυσοκόλλα, boros) is made with the urine of boys. In the midst of the lake the phenomenon may reasonably take place, because the source of the fire, and that of the asphalt, as well as the principal quantities of it, are in the middle; and the eruption is uncertain, because the movements of fire have no order known to us, as is that of many other gases (σωματες). This also takes place in Apollonia of Epirus. There are many other evidences also of the existence of fire beneath the ground; for several rough burnt rocks are shown near Moassa [Maraada], and caves in several places, and earth formed of ashes, and drops of pitch distilling into the soil. There is an unpleasant odour perceptible from a distance, and houses overthrown in every direction, so as to give probability to the legends of the natives, that formerly thirteen cities stood on this spot, of the principal of which, namely, Sodoma, ruins still remain about 60 stadia in circumference; that the lake was produced by fire, and hot water impregnated with bitumen and sulphur; that the rocks took fire; and that some of the cities were swallowed up, and others were de-
which circumstance its name is derived. It receives no animal body; bulls and camels float in it; and this is the origin of the report that nothing sinks in it. In length it exceeds 100 miles; its greatest breadth is 25 miles; its least 6. On the east of it lies Arabah Nomadum, on the south Machtar, formerly the second fortress of Judaea after Jerusalem. On the same side there is situated a hot-spring, possessing medicinal properties, named Callirrhoe, indicating by its name the virtues of its waters."

(Hist Nat. lib. v. 16.)

The last author who will be here cited is Tacitus, whose account may be given in the original. He appears in this, as in other passages, to have drawn largely on Josephus, but had certainly consulted other writers. He wrote A. D. 97.

"Lacus immenso ambitu, specie maris, sapore corruptor, gravitate odoris acculis pestifer, neque vento impulsitur, neque pisces aut aestu aequo volucres pai- tur. Insulae adsunt, superiusque montes, acu suo curatae, summa navibus transactae. Inde, nullo juventae, infinit, onerete, donec abscedant: nimio fervore possunt ignes, igne cries scorsae vestrumque infectam sanguinem, quasi feminam per mensae axovolunt: sic veteres actuores. Sed gvari locorum tradunt, undantes bituminæ moles pellii, ma-noque trahi ad littus; max, ubi vapore terrae, solis inarurent securibus cuneisque, ut trabes aut saxa, disiciunt. Haud procula inde campi, quae ferunt olium uberes, magnique urbis habitatores, fulminum jacto saturae, ad vendis vendit, terraque ipsum specie territardium, vim frigurantium perdiciad. Nam cancta aponte edita, aut manu salute, aves habres tenus aut flore, seu solidam in speciem adeverunt, et iniuria etiin in uncinam vanescunt. Ego sicut inclinas quondam urbes igne coeleste flagrante congerissem, ipsis halitus lacus infici terram, carrumpit superius spiritum, equosque fluxerit ursaque, soli solidaque jacta gravi." (Hist. v. 6.)

This sea is subsequently noticed by Galen (A. D. 164) and Pausanias (cir. A. D. 174), but their accounts are evidently borrowed from some of those above cited from Greek, Jewish, and Latin writers; in illustration of whose statements reference will now be made, as the northern travellers to have had better opportunities of testing the truth than were presented to them; and it will appear that those statements, even in their most marvellous particulars, are wonderfully trustworthy; and that the hypotheses by which they endeavoured to account for the phenomena of this extraordinary lake are confirmed by the investigations of modern science.

A General Remarks. — It is devoutly to be regretted that the results arrived at by the American exploring expedition, under Lieut. Lyon, have been given to the world only in the loose, unsystematic and thoroughly unsatisfactory notes scattered through the personal narrative published by that officer; and that his official report to his government has not been published. It is to the late travellers to have had the opportunity of testing the truth than were presented to them.

(Vol. v. p. 767, and vol. vii. p. 396.) The distance in a straight line from the fountain Ain-el-Feshkhah, on the west, directly across to the eastern shore, was nearly 6 statute miles. The soundings gave 98 feet as the greatest depth. Another line was run diagonally from the same point to the south-east, to a chain forming the outlet of the hot-springs of Callirrhoe. The bottom of the northern half of the sea is almost an entire plain. Its meridional chains are at a short distance from the shore scarce vary in depth. The deepest soundings thus far are 188 fathoms, or 1128 feet. Near the shore the bottom is generally an incrustation of salt; but the intermediate one is soft, with many rectangular crystals, mostly cubes, of pure salt. The southern half of the sea is as shallow as the northern and is deep, and for about 1 mile of its entire length the depth does not exceed 3 fathoms or 18 feet. Its southern bed presented no crystals, but the shores are lined with incrustations of salt.

Thus, then, the bottom of the Dead Sea forms two submerged plains, an elevated and a depressed one. The first, its southern part, of silty mud covered by a shallow bay; the last, its northern and largest portion, of mud with incrustations and rectangular crystals of salt, at a great depth, with a narrow ravine running through it, corresponding with the bed of the river Jordan at one extremity and the Wady-el-Jebel at the other. The opposite shores of the peninsula and the west coast present evident marks of disruption.

2. Saltiness. — It will have been seen that the ancient authorities differ widely as to the size of the sea: Diodorus stating it at 500 stadia by 60; Pliny at 100 miles in length, by 25 miles in its widest, and 6 miles in its narrowest part; Josephus at 280 stadia by 150. Strabo's measure evidently belongs to the Sironia Lacus, with which he confounded the Dead Sea, and is copied from Diodorus's description of that lake. Of these measures the earliest, viz. that of Diodorus, comes nearest to modern measurement. We have seen that a straight line from Ain-el-Feshkhah to the east shore measured nearly 8 statute miles; from Ain Jidy directly across to the mouth of the Arnon the distance was about 9 statute miles. The length of the sea does not now remain to be measured by the Americans, but the near agreement of their actual measurement of the width with the computation of Dr. Robinson may give credit to his estimate of the length also. His observations resulted in fixing the breadth of the sea at Ain Jidy at about 9 geographical miles, and the length about 39,—Ain Jidy being situated near the centre of the western coast. (Bib. vol. ii. p. 217.)

3. Saltiness and Specific Gravity. — Its excessive saltness, noticed by Josephus, is attested by all travellers; and is indicated by the presence of crystals of salt in profusion over the bed of the sea,—"at one time Stellwagen's lead brought up nothing but crystals," —as well as by the district of rock-salt at the southern quarter of the sea, where the American officers discovered "a lofty, round pillar, standing detached from the general mass, composed of solid salt, capped with carbonate of lime, cylindrical in form and pyramidal behind, about 40 feet high, resting on a kind of oval pedestal from 40 to 60 feet above the level of the sea." (Stellwagen, Exploration, p. 907.) In the southern bay of the sea, where the water encroaches more or less according to the season, it dries off into shallows and small pools, which in the end deposit a salt as fine and as well bleached, in some instances, as that in regular salt-pans. In this part, where the salt water stagnates and evaporates, Irby and Mangels "found several persons engaged in
peeling off a solid surface of salt, several inches in thickness; they were collecting it and loading it on a barge."

It has been sometimes asserted that the water is so saturated with salt that salt cannot be dissolved in it. The experiment was made in the following manner: the following result: "Tryel the relative density of the water of this sea and of the Atlantic—distilled water being as 1. The water of the Atlantic was 1.02, that of this sea 1.13; the last dissolved 1.4 times the water of the Atlantic, and distilled water, 1.5 times, of its weight of salt. The boats were found to draw 1 inch less in the salt sea than in the water of the Atlantic, in the river." (Lynch, p. 377.) The experiment tried by Vespuccius has been repeated by nearly all travellers, of course with the same result. The density and buoyancy of the waters is such that it is impossible to sink in it. "A muscular man floated nearly breast high, without the least exertion." Several analyses of the waters have been made with various results, to be accounted for, as Dr. Robinson supposes, by the various states of the sea at different seasons; for its body of water is increased to the height of 7 feet or more in the rainy season (Lynch, p. 289), or, according to Dr. Robinson, 10 or 15 feet; for he found traces of its high-water mark, at the mouth of the river mouth at the south of its limit at that time. The following are the results of the analyses, the standard comparison for the specificity of the sea being distilled water at 1000:

(Robinson, Bib. Res. ii. pp. 224, 225.)

Russegger says:—"The excessive saltness of the Dead Sea is easily accounted for by the washing down of the numerous and extensive salt-beds, which are peculiar to the formation of the basin, in which also are found bituminous rocks in sufficient quantity to enable us, without doing violence to science, to explain several chemical and physical peculiarities of this lake-water by the continual contact of these rocks with water strongly impregnated with salt."

(Reise, p. 207.)

4. Evaporation. — The enormous quantity of water brought down by the Jordan, particularly in the rainy season, and by the other streams around the Dead Sea, seems to be very considerable, — as e.g. the Arnon was found to be 82 feet wide and 4 feet deep at its mouth, — is all carried off by evaporation; and, when the small extent of the sea is considered, it is clear that the decomposition of its waters must be very rapid. The ancient writers speak of a noxious smell, of bubbles like those of boiling water, of mud covering the sea-bed, turning all metals, and deleterious to the inhabitants; and its change of aspect thrice a day may also be ascribed to the same cause. Now it is remarkable that nearly all these phenomena have been noticed by recent explorers, and the single one which is not confirmed is accounted for in a manner which must exempt the ancient geographers from the charge of misrepresentation or exaggeration; and it may well be believed that the enormous chemical processes, perpetually going forward in the depths of the sea, may occasionally produce effects upon the surface which have not been chronicled by any modern traveller. Lieut. Lynch, when登陆 near Egerdis, remarked, "a strong smell of sulphuretted hydrogen," though there are no thermal springs in this vicinity; and again, "a foetid sulphureous odour in the night;" — "the north wind, quite fresh, and accompanied with a smell of sulphur." Lieut. Molyneux detected the same disagreeable smell the night before, and he also observed the phenomenon of the gas described to the journal (Journal of the R. Geog. Soc. vol. xviii. p. 127, 1848.) But Lieut. Lynch states that, "although the water was grey, acrid, and disagreeable, it was perfectly inodorous." He is therefore inclined to attribute the noxious smell to the foetid springs and marshes along the shores of the sea, increased, perhaps, by exhalations from stagnant pools in the flat plain which bounds it to the north. (Expedition, pp. 299, 294, 296, 300.) The "pale-blue misty appearance over the sea," the "air over the sea, very misty," and "the two extremities of the sea misty, with constant evaporation" (p. 294), are other notes indicating the unnatural state of the atmosphere surcharged with the gases disengaged by the process. Or, in short, that "the surface of the sea was one wide sheet of phosphorescent foam, so that a dark object could have been discerned at a great distance" (p. 281; comp. Molyneux, l. c. p. 129). A kind of mirage, noticed by many travellers, may be attributed to the same cause. A thin haze-like vapour over the southern sea, — which often in islands we see the two shores" (p. 288). This phenomenon is more fully noticed by Irby and Mangles: "This evening, at sunset, we were deceived by a dark shade on the sea, which assumed so exactly the appearance of an island that we entertained no doubt regarding it, even after looking through a telescope. It is not the only time that such a phenomenon has presented itself to us; in two instances, looking up the sea from its southern extremity, we saw it apparently closed by a low, dark line, like a bar of sand to the northward; and, on a third occasion, two small islands seemed to present themselves between a long sharp promontory and the western shore. We were unable to account for these appearances, but felt little doubt that they are the same that deceived Mr. Seetzen into the supposition that he had discovered an island of some extent, which we have had opportunity of ascertaining, beyond all doubt, does not exist. It is not absolutely impossible, however, that he may have seen one of those temporary islands of bitumen, which Plliny describes as being several leagues in extent." (Trzebel, p. 191.)

Two effects of the heavy atmosphere of the sea remain to be noticed: one, the irresistible feeling of drowsiness which it induced in all who navigated it; the other, confirming, in a remarkable manner, the ancient testimonies, above cited, that the water appeared to be destructive to everything it touched, particularly marshy soil; the villages near its margin were covered with a nasty slimy substance, iron dreadfully corroded, and looked as if covered with coal-tar. (Molyneux, l. c. p. 128.) The "bubbles like those of boiling water," mentioned by Strabo, may be identified with the curious broad strip of foam, lying in a straight line nearly north and south throughout the whole length of the sea, which
seemed to be constantly bubbling and in motion. (Molyneux, p. 159; Lynch, pp. 288, 289.) And even the marvellous fact mentioned by Josephus, of the sea changing its colour three times a day, may derive some occurrence from testimonies already cited, but more especially from the following notice of Lieut. Lynch:—"At one time, to-day, the sea assumed a very great resemblance to milk. ... The great elevation of the surface, and the transparent vapour, its purple tinge contrasting strangely with the extraordinary colour of the sea beneath, and, where they blended in the distance, giving it the appearance of smoke from burning sulphur. It seemed to be a vast caldron of metal, fused but motionless" (p. 284). After this, it looked like a sheet of foam." In the afternoon, of the same day, it "verified the resemblance which it has been said to bear to molten lead;" "at night it had the exact hue of abalone" (p. 276). The earlier testimony of Prince Badoirvi may also be added, who, after citing Josephus, adds, that he had had ocular proof of the fact: "Nam mane habelat squam nigricans terrentem sub aqua, sole interna (sunt in insula calores hic maximus) instar panni fit caerulea: ante occasum, ubi via caloris remittita, tanquam limo permixta, molocies rubet, vel potius flavescit." (Ieroglomnitana Peregrination, p. 96.) A familiarity acquired by three weeks' diligent examination did not remove the feeling of awe inspired by its marvels: "So sudden are the changes of the weather, and so different the aspects it presents, as at times to seem as if we were in a world of enchantments. We are alternately beside and upon the brink and the surface of a huge and sometimes seething caldron." (Lient. Lynch, Bib. Sacr. vol. v. p. 788.)

5. Bitumens.—It is to be regretted that the American travellers have not given a night light shed on the production of the asphalt for which this sea was once so famous. Along almost the whole of the west coast numerous fragments of this substance are found among the pebbles, but there is no record of any considerable masses or fields of it being seen by any European travellers in modern times; unless, as is suggested by Irby and Mangles, the imagination of the natives may have been stirred. But it is curious that the traditions of the natives still confirm the notion of Strabo that drops of pitch are distilled from rocks on the eastern shore;—a story repeated by various Arab sheikhs to Seetsen, Burchhardt, and Robinson, the last of whom also mentions the fact of their belief that the large masses of bitumen appear only after earthquakes. Thus, after the earthquake of 1834, a large quantity was thrown upon the shore near the south-western part of the sea, of which one tribe brought about 60 kantfas into market (each kantfa = 98 lbs.); and that after the earthquake of Jan. 1st, 1837, a large mass of bitumen (one said like an island, another like a house) was discovered floating on the sea, and later collected by the west side, not far to the north of Uesdem. The Arabs swam off to it, and cut it up with axes so as to bring it ashore; as Tacitus tells us was done in his times, though he mentions what he considered the less probable account of its flowing as a black liquid into the ships in a perpetual stream. (Robinson, Bib. Res. vol. ii. pp. 425-427.) The destructive effects of this sea on all living animal life, as well as the ancients held, seems sufficiently proved; for although shells have been found on the shore, they have been evidently washed down by the Jordan or other fresh-water streams, and their inmates destroyed by the sea water; while the birds that have been occasionally seen on its surface may be regarded as denizens of those same streams; and no animal life has been discovered in its waters.

V. VOLCANIC PHAEOMENA.

Something must now be said of the various theories by which it has been attempted to account for the wonderful phenomena above recorded of the depression of the Ghor, or Valley of the Jordan; and of the formation and physical constitution of the Dead Sea. All theories suppose volcanic agency: and it is worthy of observation that, while the earliest historical and poetical records of the country bear witness to its ruin by "fire and brimstone, plagues," and like destructions, and the existing geological monuments confirm the testimony. Independently of the igneous agency by which the cities of the plain were destroyed, much of the descriptive imagery of the psalmists and prophets is borrowed from volcanoes and earthquakes; while there are evidences of an earthquake of very great and probably destructive violence during the reign of Uzziah, King of Judah, which formed a kind of era in the history of the country, being alluded to after an interval of 300 years. (Amos, i. 1; Zechar. iv. 5.) The existing phaenomena may be briefly mentioned, beginning with one recently discovered by the American explorers, of whom Mr. Aulick reports a volcanic formation on the east shore, and brought specimens of lava." (p. 280.) The mountain known as Jebel Macas, at the north-east of the Dead Sea, composed entirely of black bituminous limestone, which burns like coal, has not been investigated so fully as it deserves: but the basaltic columns in the vicinity of the sea of Tiberias have been frequently noticed by travellers. The cliffs of Tiberias are of a dark greyish-colour, and are composed of black bituminous limestone, and Tiberias complete the chain of evidence, and render it highly probable that the extinct volcano noticed by Dr. Robinson at a short distance north-west of Safed, the Frank Mountain, and others, may have been active during the historical period, and furnished the poets and prophets with the sublime imagery of the Bible. The want of the chemical agent among the geological changes that the country has passed through, it may be interesting to hear the opinion of two eminent and scientific writers on the great problem under consideration.

Russeggier, who has himself carefully examined the phaenomena of the country and tested the observations of preceding travellers, thus sums up the result: (Geol. p. 205):—"From its exit from the lake of Tiberias to its entrance into the Dead Sea the Jordan has a fall of 716 Paris feet and thus lies at the latter place 1341 Paris feet below the level of the Mediterranean sea. At the southern extremity of the Dead Sea lies the marshy lowlands of Wady-el-Ghor, the bed of which is composed of the Pomatolite, and is very little higher than the Dead Sea itself. These lowlands join Wady-el-Arabs, the bed of which rises gently to the watershed which separates the water system of the Dead Sea from that of the Red Sea. As the watershed of Wady-el-Arabs is apparently of no considerable height above the level of the Jordan, the bed of its waters may be reckoned from the northern extremity of the plain El-Batikh (to the north of the sea of Tiberias) to this watershed, a distance of full three degrees. All the rock of this region consists of morainal formations, amongst which those of the Jura and
chalk period prevail. It is in the northern part of this country alone that volcanic formations are found in considerable quantities. Nevertheless much of the land in which volcanic rocks are not found bears evident marks of frequent volcanic action, such as hot-springs; the crater-like depressions, such as the basin of Tiberias, and that of the Dead Sea, with its basaltic rocks; the frequent and visible disturbances of the strata of the normal rocks, the numerous crevices, and especially the frequent and violent earthquakes. The line of earthquakes between the cities of Afula, Jerusalem, Nazareth, Tiberias, Safed, Bozilek, Aleppo, from thence takes a direction from south-west to north-east, follows the direction of the central chain of Syria, runs parallel to that of the valley of the Jordan, and has its termination northwards, in the volcanic country on the slope of Taurus (Gazer-Dagh), and southwards in the mountain land of Arabia Petrosa. At several places branches of this great volcanic crevice appear to stretch as far as the sea, and to touch Jaffa, Acco, Beirut, Antioch, — unless, indeed, there is a second crevice, parallel to the first, running along the coast, and connecting the above places. I am of opinion that such is the case, and that there exists also a third crevice, coinciding with the one already mentioned, and united to the principal crevice above mentioned at its northern extremity. This supposition will account for the depression of the valley of the Jordan. At the time of the destruction of Sodom and Gomorrah the surface of the crevice opened, and the great depression of the ground from Jebel-es-Sheikh to the waterless Wady-el-Araba is a result of this. The difference of the regions arising from local circumstances, the volcanic eruptions connected with this phenomenon, the local form of the land, and the different depths of the chasm then formed, caused a more or less extensive depression, and created along the chasm crater-like hollows, some extraordinary depth, as the basin of Tiberias and that of the Dead Sea. These hollows, at several places where branches of this crevice have been filled with water, and formed a system of lakes. Next the waters from the sides of Jebel-es-Sheikh formed the principal stream of Jordan connecting these lakes, having overflowed them successively. This however was not the case with the Dead Sea. The watershed of Wady-el-Araba is probably much more extended than the Dead Sea, and formed a kind of a barrier to the stream of Jordan, judging by the geognostic nature of Wady-el-Araba, formerly seems to have extended so far inland, this barrier must have existed at the time of the depression, since otherwise the Red Sea would have burst into the hollow formed by the sinking of the land. If, however, there existed before the time of the depression a regular fall throughout the whole valley to the Red Sea, it is natural to suppose that at that time the Jordan flowed into the Red Sea, and that when the depression took place its course was interrupted. However this may have been, after the depression the filling of the basin of the Dead Sea continued until it became of such superabundance, that the evaporation of the water was equal to the inflow. Thus the Jordan was not found, owing either to a greater influx of water during rainy seasons, or to a less copious evaporation caused by circumstances of temperature, the sea at one time was considerably higher than at present.

Professor Dunben introduces his theory with other notices of volcanic agency collected from modern books of travel. (Dr. Davy. A Description of active and extinct Volcanoes, 2d ed. pp. 350—363.)
which, with its deep fissures, the earthquakes to which it is subject, and the saline sulphureous springs, which have a temperature of 46° cent., attest the volcanic origin of this depression. "The other substances met with in the neighbourhood are less corrobative of the cause assigned. On the shore of the lake Mr. Maundrell found a kind of bituminous stone, which I infer from his description to be analogous to that of Bardina in Sicily."

It would appear that, even antecedently to the eruption mentioned in Scripture, bitumen-pits abounded in the plain of Siddim. Thus, in the account of the battle between the kings of Sodom and Gomorrah and some of the neighbouring princes (Gen. xiv.), it is said, "And the vale of Siddim was full of slime-pits," which a learned friend assures me ought to be translated fountains of bitumen. "But besides this volcanic eruption, which brought about the destruction of the cities, it would appear that the very plain itself in which they stood was obliterated, and that a lake was formed in its stead. This is collected, not only from the apparent non-existence of the valley in which these cities were placed, but likewise from the express words of Scripture, speaking of the evaporation (compare Job xxii. 29) which took place between the kings of Sodom and Gomorrah and certain adjoining tribes, it is added that the latter assembled in the vale of Siddim, which is the Salt (i.e. the Dead) Sea."

It is therefore supposed that the lake itself occupies the site of this once fertile valley, and that it was paroxysm by paroxysm of the Jordan, which, being without outlet, would fill the hollow until the surface over which they spread themselves proved sufficiently large to cause the loss arising from evaporation to be equivalent to the accessions it received from the rains and snows of the mountains in which it took its rise.

This hypothesis assumes that previously to the existence of the Dead Sea the Jordan must have had an outlet, either into the Mediterranean or into the Red Sea; and accordingly when it was discovered by Burekhardt, that there actually existed a longitudinal valley, parallel to the course which the Jordan took before it reached the Dead Sea, as well as to the larger axis of that expanse of waters, running from north to south, and extending from the southern extremity of the Dead Sea to the extremity of the gulf of Akaba, it was immediately concluded that this valley was in fact the former bed of the Jordan, which river, consequently, prior to the catastrophe by which the Dead Sea was produced, had flowed into this arm of the Red Sea."

"Briefly, then, to recapitulate the train of phenomena by which the destruction of the cities might have been brought about, I would suppose that the river Jordan, prior to that event, continued its course tranquilly through the great longitudinal valley called El-Arabah, into the gulf of Akaba; that a shower of stones and sand from some neighbouring volcano first overwhelmed these places; and that its eruptions, the source of this depression of the whole of the region, from some point apparently intermediate between the lake of Tiberias and the mountains of Lebanon, to the watershed in the parallel of 30°, which occurs in the valley of El-Arabah above mentioned. I would hence infer that the waters of the Jordan, pent up within the valley by a range of mountains to the east and west, and a barrier of elevated table-land to the south, could find no outlet, and consequently by degrees formed a lake in its most depressed portion; which, however, did not occur at once, and therefore is not recorded by Scripture as a part of the catastrophe (see the passage in Ezekiel, xlviii. 8, indicating, if it be interpreted literally, the gradual manner in which the Dead Sea was formed, and likewise perhaps the existence of a tradition that its waters once had their exit in the Red Sea), though reference is made in another passage to its existence in what was before the valley of Siddim.""

If, as Robinson states, extensive beds of salt occur immediately round its margin, the solution of the contents of these by the waters of the lake would account for their present composition, its saltness increasing nearly to the point of saturation, owing to the gradual accession of waters from above, which, on evaporating, would leave their salt behind; whilst the bitumen might either have existed there previously as a consequence of antecedent volcanic eruptions, or have been produced by the very one to which reference is here made.

"I do not, however, see what is gained by attributing the destruction of these cities, as some have preferred to do, to the combustion of these beds of bitumen; for the great fires which have sometimes been started by natural agent with which we are acquainted except the volcano itself, which therefore must in any case be supposed instrumental, and, being invoked, will alone enable us to explain all the facts recorded."

"It must at the same time be confessed that much remains to be done before this or any other explanation of the destruction shall have been adequately disposed of; and I am disappointed to find that amongst the crowd of travellers who have resorted to the Holy Land within the last twenty years, so few have paid that attention to the physical structure of the country which alone could place the subject beyond the limits of doubt and controversy."

"The geologist, for instance, would still find it worth his while to search the rocks which bound the Dead Sea, in order to discover if possible whether there be any crater which might have been in a state of eruption at the period alluded to; he should ascertain whether there are any proofs of a sinking of the ground, from the existence of rapids anywhere along the course of the river, and whether south of the lake there be any evidences of the existence of the Jordan, as well as of a barrier of lava stretching across it, which latter hypothesis Von Buch, I perceive, is still inclined to support; nor should be omit to examine whether vestiges of these devoted cities can be found, as some have stated, submerged beneath the waters, and buried, like Pompeii, under heaps of the ejected materials.""

VI. HISTORICAL GEOGRAPHY.

1. Earliest period. — The first notice we have of the inhabitants of Palestine is in the days of Abraham's immigration, when the Canaanite was in the land, from whom it received its earliest appellation, "the land of Canaan." (Gen. xii. 5, 6; xiii. 7, 12, 18.) The limits of this term as first defined are given in the genealogy of Canaan; but its distribution among the various families of that patriarch is nowhere clearly stated. "Canaan begat Sidon his first-born, and Heth, and the Jebusite, and the Amorite, and the Girgasite, and the Hivite, and the Arkite, and the Sinite, and the Arvadite, and the Zemarite, and the Hamathite; and these were the families of the Canaanites spread abroad. And
the border of the Canaanites was from Sidon, as thou comest to Gerar, unto Gaza; as thou goest unto Zebaim, even unto Lasha." (x. 15–19). As several of these names occur no more in the history of Palestine, we must suppose either that the places reappear under other names, or that these tribes, having originally settled within the limits here assigned, afterwards migrated to the north, where we cet different nations in the latter times. Of the eleven families above named, the first six are found in the subsequent history of the country: the descendants of Sidon on the coast to the north; the children of Heth in Hebron, on the south; the Jebusites to the north of these, in the highlands about Jerusalem; the Amorites to the east of the Hittites, on the west of the Dead Sea; the Gergashites, supposed to be a branch of the Hivites next named, who were situated north of the Jebusites in Shechem and its vicinity. (Gen. xxxiv. 2.)

The coast to the south was wrested from the Canaanites in very early times, if they ever possessed it; for throughout the records of history the Philistines, descendants of Japheth, or of Miriam, daughter of Pharaoh, masters of the great plain (x. 14). The distribution of the country among these tribes is involved in further confusion by the introduction of the Perizzites with the Canaanites as joint occupiers of the country (xiii. 7), and by the fact of the Canaanites appearing as a distinct tribe, where the Hittites, the Amorites, the Gergashites, and the Jebusites were only mentioned. The names are now occasionally enumerated (xv. 19–31). It would appear also that while the name Canaanites was used in a more restricted sense in the last cited passage, the names of the particular families were sometimes used in a wider acceptation; which may account for the Hittites, whose seats we have already fixed to the south of Haran, being found in the north of that city, in the neighbourhood of Bethel. (Judges, i. 26.) It may be, however, that the seats of the several tribes in those early times were not fixed, but fluctuated with the tide of conquest or with the necessities of a pastoral people; an example of the former may be found in the victories of Adar-Damun (Gen. xiv.), and of the latter in the many migrations of Abraham, his descendants and of his descendents, which finally transferred the whole of his posterity into Egypt for a period of four centuries (xii. 6–10, xiii. 1—4, 18, xx. 1, xxxvi. 1, &c.). To attempt to trace these various migrations was a fruitless task with the very scanty notices which we possess; but the number and general disposition of the Canaanitic tribes at the period of the Exod. of the Israelites under Joshua may be approximately ascertained, and aid in the description of the distribution of the land among the latter. The tribes then in occupation of the land are said to be seven (Deut. vii. 1), and are thus enumerated:—"Canaanites, Hittites, Amorites, Perizzites, Hivites, Jebusites," only the last (xvi. 8; L.C.) and Joshua (xii. 1!) the Gergashites are added, which completes the number of these. Of these the Amorites occupied the southern border, or probably shared it with the Amalekites, as it was with the latter that the Israelites were first brought into collision. (Exod. xvii. 8, 9; Num. xiv. 25, 43–45.) This was therefore called "the border of the Amorites" (Deut. i. 19, 20); and their relative position with regard to the other tribes is thus clearly stated:

"The Amalekites dwell in the land of the south, and the Hittites, and the Jebusites, and the Amorites (Joshua, iii. 14, and the Perizzites west of the mountains: and the Canaanites dwell by the sea, and by the coast of Jordan." (Num. xiii. 28, 29.)

The limits of the Amorite territory are further defined by the confederacy of the five sheikhs of Jerusalem, Hebron, Jarmuth, Lachish, and Eglon, all of whom were Amorites (Josh. x. 5); while the hill-country of the Amorites was immediately to the east of the Amorite territory comprising Gibeon, Cherithaim, Beeroth, and Kirjath-jearim was held by the Hivites (ix. 3, 7, 17, xii. 19), who are also found, at the same period, far to the north, "under Hermon in the land of Mizpah" (xi. 3; Judges, iii. 3), as two large and powerful kingdoms of the Amorites existed on the east of the Jordan [Assurrites], the older inhabitants having been driven out. It is worthy of remark that during the occupation of Palestine by these Canaanites it is already called "the land of the Hebrews" or Hebrewites, which can only be accounted for by an actual residence in it of Heber himself and his race, which goes far to prove that the Canaanitic tribes were not only intruders in the Land of Promise. (Gen. xv. 13; Josh. x. 20; Josh. xvi. 10; Judges, xiv. 4.)

For fuller details reference may be made to Reland (Palaestina, cap. xxvii. pp. 155–141) and Bochart (Phall. lib. iv. caps. 34–37).

2. Second period. — We have now to consider the division of Palestine among the twelve tribes of Israel, and on the settlement of the land, and the sons of Nun; and the Scripture statement compared with Josephus will furnish numerous landmarks, which a more careful survey of the country than has yet been made would probably bring to light at the present day. To begin with the cis-Jordanic tribes:

Judah, Simeon, Dan.—The south border of Judah was bounded by the country of Edom and the wilderness of Zin; the frontier being plainly defined by a chain of hills, of considerable elevation, forming a natural barrier from the southern bay of the Dead Sea on the east to the Mediterranean on the west, in which line the following points are named, viz., the ascent or pass of Acrabbon, Ziz, Kades-barnes, Hazron, Adar, Kibra, Arad, Ramon, Damaris, and Edom. These points are, in fact, in the line of the ancient boundary between the Israelites and the Amorites. The east border extended along the whole length of the Dead Sea to the mouth of the Jordan, from which the north border was drawn to the Mediterranean along an irregular line, in which Jerusalem would be nearly the middle point. The road from Jerusalem to Jericho passes immediately within the line, and 'Ain-s-Belz, Wady Kelt, Kediri-ed-dimmun, and 'Ain or Kazer Hagiaj, are easily identified with Enabemesh, the river, Adummim, and Beth-hogla. It passed south of Jerusalem, from Enorgul over the valley of the Hinnom, by Nephast, Mount Ephron, Kirjath-jearim, Bethabara, Timnah, Ekron, Shidron, and Jabneel. Their cities were, as stated in the summary, 39 in number, in the south division of the tribe, on the borders of Edom; but the names, as recounted in the English version, are 39. The discrepancy is to be accounted for, as Reland remarks, by several of the words, regarded as proper, or separate names, being capable of translation as appellatives or as adjectives to other names. In the valley, including under that name the declivity of the western plain and the plain itself, there were 14 + 16 + 9 = 39 towns, with their villages, besides the cities of the Philistines.

PALAESTINA. 529
between Ekron and Gaza, which the Israelites did not occupy; in the mountains 11+9+10+6+2 = 38 cities, with their villages; and in the wilderness, i.e. the western side of the Dead Sea, 6 towns and their villages; in all, according to the Hebrew version, no less than 112 towns, exclusive of their future capital, of which the Jebusite still held possession. But the Septuagint version inserts the name of a town in the mountain district, among which are the important towns Bethlehem and Tekoa, which would make the total 123 in the tribe of Judah alone, implying an enormous population, even if we admit that these towns were only large villages with scattered hamlets. It must be remarked, however, that the tribe of Simeon was comprehended within the limits above assigned to the tribe of Judah; and that 17 cities in the south of Judah are referred to Simeon, as is expressly stated: "Out of the portion of the children of Judah was the inheritance of the children of Simeon: for the part of the children of Judah was too much for them: therefore the children of Simeon had their inheritances within the inheritances of them." (Josh. xix. 45.)

As Simeon possessed the southern part of the territory assigned to Judah, so did the tribe of Dan impinge upon its north-west border; and in the list of its seventeen cities are some before assigned to Judah (Josh. xix. 41-45); a limited extent of territory on the confines of the plain of the Philistines, west of Edra, was set out as a colony to the extreme north of the Holy Land, where their city, synonymous with their tribe, situated at the southern base of Mount Hermon, became proverbial in Israel for the worship of the golden calf. (Judges, xvii.)

Benjamin.—The tribe of Benjamin was bounded by Judah on the south, by the Jordan on the east. The northern line was drawn from Jericho westward through the mountains, by Bethel and Ai, through the hill that lay to the south of the lower Beth-horon, from which point the boundary was drawn to Kirjath-jearim of the tribe of Judah. They possessed twenty-six cities, including Jerusalem. (Josh. xvii. 11-22.) It is evident that Josephus is mistaken in stating that they extended from Jericho to the sea; for it is clearer that the tribe of Dan and the plain of Philistia lay between them and the Mediterranean. His remark that the width of their territory was least of all, is more accurate, though his explanation of the fact may be doubted, when he ascribes it to the fruitfulness of the land, which, he adds, comprehended Jericho and Jerusalem.

Ephraim.—The tribe of Ephraim was contiguous on the south with the tribe of Benjamin, as far as the western extremity of the latter; from whence it passed by Tappuah and the river Kanah to the sea. On the east side are named Ateroth-adar and Beth-horon the upper, and on the north, beginning at the sea and going east, Michmethath, the west plain of Edra, Arthoth, Naarah, Jericho, and the Jordan. The cities of Ephraim are not catalogued; but it is remarked that "the separate cities for the children of Ephraim were among the inheritance of the children of Manasseh, all the cities with their villages" (xvi. 5-9). According to Josephus it extended in width from Bethel even to the west plain of Edra, as far as Naarah, Jericho, and the Jordan. The portion of Jericho on the west of Jordan was contiguous to that of Ephraim, and appears to have been allotted to the two tribes jointly, as the same boundaries are assigned to both (xvi. 1-4, comp. 5-8 with xvii. 7-10), but in general the southern part was Ephraim, and the north Manasseh, which latter also possessed towns in the borders of Asher and Issachar, as Bethheaven and Enor, on the east, in Issachar, and Taanach, Megiddo, and Dor, on the west, in Asher (ver. 11). It will have been seen that these twin tribes did not extend to the north into Manasseh, but their eastern boundary excluded the valley of the Jordan, and formed, with their northern boundary, a curved line from Jericho to the sea, south of Mount Carmel.

Issachar.—This tribe covered the whole of the north-east frontier of Manasseh and Ephraim, and so comprehended the valley of the Jordan northward from Tabor, and the eastern part of the plain of Edra, in which Tabor is situated, containing sixteen cities, among which were Shunem and Jessreel of Scripture note, the latter for many years the capital of the kingdom of Israel.

Asher.—To the west of Issachar was Asher, occupying the remainder of the valley of Edra, north of the coast of Acre, and extending along the coast of the Mediterranean, from Mount Carmel to Sidon. Our ignorance of the modern geography of Upper Galilee does not allow us to assign its limits to the east; but there is little doubt that careful inquiry would still recover the sites at least of some of their twenty-two cities, and so restore the eastern boundary to its original limits, continuing along the western borders of Zebulun and Naphtali, which two tribes occupied the highlands of Galilee to the extremity of the Land of Promise.

Zebulun.—Of these two, Zebulun was to the south, contiguous to Issachar, having the sea of Tiberias for its eastern boundary, as far perhaps as the mouth of the northern Jordan. None of its twenty cities can now be identified with certainty; but Japhia is probably represented by the modern village of Yapha, in the plain, not far to the south of Nazareth, which was certainly situated within the borders of this tribe; and Bethlehem may, with great probability, be placed at the modern village of Bethlehem, not far from the ruins of Sephoris to the north-east of Cana of Galilee; for it.

Naphtali.—The northernmost of the tribes was Naphtali, bounded by the Upper Jordan on the east, from its source to its mouth, near which was situated the city of Caesarea, expressly declared by St. Matthew to have been in the borders of Zebulun and Naphtali (ver. 13). On the south was Zebulun, on the west Asher, and on the north the resorts of Libanus and the valley of Goele, now called the Belkau. Of their nineteen cities Kedesh is the most noted in Scripture history; and its ruins, existing under the same name at this day, attest its ancient importance. Josephus absurdly extends their territory to Dumascus, if the reading be not corrupt, as Rashi suggests.

Having described the survey of the tribes, it may be remarked in anticipation of the following section, that the subsequent divisions of the country followed very much the divisions of the tribes: thus the district of Judaea was formed by grouping together the tribes of Judah, Simeon, Dan, and Benjamin; Samaria was contiguous with Ephraim and the half of Manasseh; Issachar and Asher occupied Lower Galilee; Zebulun and Naphtali Upper Galilee.

Trans-Jordanian tribes.—A few words must be
added concerning the two tribes and a half beyond Jordan, although their general disposition has been anticipated in the account of the nations whom they possessed.

[AMORITES.]

[Reuben, Gad, and half Manasseh.-The southern part of the old Amorite conquest on the east of Jordan was assigned by Moses to the Reubenites, where the province was divided from the kingdom of Sihon, with the kingdom of the Amorites, whose capital was at Hebron. [HERMON.] There is, however, some apparent confusion in the accounts; as while Reuben is said to have possessed “from Arnon by the river Arnon,...Hebron,...and all the kingdom of Sihon king of the Amorites,” Gad is also said to have possessed “from Arnon by the river Arnon,...Hebron,...and all the kingdom of Sihon king of the Amorites,” Gad is also said to have possessed “from Arnon by the river Arnon,...Hebron,...and all the kingdom of Sihon king of the Amorites,” while Gad is said to have had “all the cities of Gilead,” Manasseh is said to have had “half Gilead.” (Josh. xiii. comp. ver. 21 with 27, and 25 with 31); while from Numbers (xxviii. 39 — 43) it would appear that Manasseh possessed the whole of Gilead. As the Israelites were not permitted to occupy the country which they found still in the possession of the Amorites, but only so much of it as had been taken from them by Sihon king of the Amorites, the limits of the Israelite possessions towards the Ammonites are not clearly defined [AMMONITE; BANHAN]; and it may be doubted whether the distribution of the country among the two tribes and a half was not regulated rather by convenience or the state of conquest than by any distinct territorial limits: certainly it is that it would be extremely difficult to draw a line which should include all the cities belonging to any one tribe, and whose sites are fixed with any degree of certainty, and yet exclude all other cities mentioned as belonging to one of the other tribes. Generally it may be said that the southernmost of the kingdom lay to the south and west of the trans-Jordanic provinces, while those of Manasseh lay in the mountains to the east of the Jordan valley and the lake of Gennesaret. It is plain only that the Jordan was the border of the tribe, and that of these the tribe of Gad held the northern part of the valley, to “the sea of Chinnereth” (Josh. xiii. 37). When the Gadites are said to have built nine cities, the Reubenites six, it can only be understood to mean that they restored them after they had been dismantled by their old inhabitants, as in the case of Machir the son of Manasseh it is expressly said that he occupied the cities of the dispossessed Amorites. (Num. xxxii. 34—42). It may, perhaps, be concluded from Deut. iii. 1—17 that, while the kingdom of Sihon was divided between the tribes of Gad and Reuben, the whole kingdom of Og was allotted to the half-tribe of Manasseh; as, indeed, it is highly probable that the division of the land on the west of Jordan also followed its ancient distribution among its former inhabitants.]

PALAESTINA.

[3. Third Period.—We have no distinct account of the civil division of the country on the return of the Jews from the captivity, and during its subsequent history, until it was reduced to a Roman province. Under the Persians, the title of “ governor on this side the river” received from the Emperor of Persia, both to the High Priest and the King of Taxim and Ezra, and the description of the strangers, colonists of Samaria, as “men on this side the river” (Ezra), probably indicates the only designation by which Palestine was known, as a comparatively small and insignificant part of one of the satrapies of that enormous kingdom. (Ezra, iv. 10, 17, v. 20, vi. 6, etc.; Neh. iii. 7, iii. 8, etc.) Among the Jews, the ancient divisions were still recognised, but gradually the larger territorial divisions superseded the tribal, and the political geography assumed the more convenient form which we find in the New Testament and in the writings of Josephus, illustrated as they are by the classical geographers Pliny and Ptolemæus.]

THE divisions most familiar to the readers of the New Testament are, Judæa, Galilee, Samaria, Decapolis, and Perææ, in which is comprehended the whole of Palestine, with the exception of the seaboard, the northern part of which is called “the coasts of Tyre and Sidon” by the evangelists, and comprehended under the name of Phœnicia by Josephus and the classical geographers. The first-named districts are very clearly described by Josephus; and his account is the more valuable as confirming the descriptions contained in the Bible of its extreme fertility and populousness, which will, however, present no difficulty to the traveller who has had the opportunity of observing the natural fertility of these parts still rudely cultivated, and the numerous traces of the agricultural industry of ancient times.

Galilee, Upper and Lower.—“There are two Galilees, one called Lower, the other Upper, which are surrounded by Phœnicia and Syria. On the side of the setting sun they are bounded by the frontiers of the territory of Ptolemais, and Carmel, a mountain forest belonging to the Tyrians, but at present to the Tyrians; which is joined by Gaba, called the 'city of knights,' because the knights disbanded by Herod dwell there; and on the south by Samaria and Scythopolis, as far as the river Jordan. On the east it is bounded by Hippene and Gadara, and Gyalanthes and the frontiers of Agrippa's kingdom. The northern limit is Tyre and the Tyrian territory. That which is called Lower Galilee extends in length from Tiberias to Chabulon, near which on the sea-coast is situated Ptolemais. Its greatest breadth is from a village called Xalith, situated in the great plain, to Beræa; from which place also the breadth of Upper Galilee commences, extending to a village named Baca, which separates the Tyrian territory from Galilee. In length, Upper Galilee reaches to Meroth from Thalla, a village near the Jordan.]

"Now the two Galilees, being of such extent, and surrounded by foreign nations, have always resisted every hostile invasion; for its inhabitants are trained to arms from infancy, and are extremely numerous; and neither horde the most ever been wanting in courage, nor the country suffered from paucity of inhabitants, since it is rich, and favourable for pasture, and planted with every variety of tree; so that by its fertility it invites even those
Palaestina.

Who are least given to the pursuit of agriculture. Every part of it, therefore, has been put under cultivation by the inhabitants, and none of it lies idle; but it possesses numerous cities and multitudes of villages, all densely populated on account of its fertility, so that the smallest of them has more than 15,000 inhabitants.

Persera.—"On the whole, then, although Galilee is inferior to Persera in extent, yet it is superior to it in strength. For the former is all under cultivation, and productive in every part; but Persera, although much more extensive, is for the most part rugged and barren, and too wild for the culture of tender produce. Nevertheless, whatever the soil is soft it is very productive; and the plains are covered with various trees (the greater part is planted with olives, vines, and palms), and watered by mountain torrents, and perennial wells sufficient to supply water whenever the mountain streams are dried up by the heat. Its greatest length is from Machaerus to Pella, and its breadth from Philadelphia to the Jordan. It is bounded on the north by Pella, which we have mentioned; on the west by the Jordan. Its southern boundary is Moabitis, and its eastern is Arabia and Sibonitis, and also Philadelphia and Gerassa.

Judaea.—"The country of Samaria lies between Judaea and Galilee; for beginning at the village called Gineses, situated in the great plain, it ends at the topharchy of Acraebatus; its character is in no respect different from that of Judaea, for both abound in mountains and plains, and are suited for agriculture, and productive, wooded, and full of fruits both wild and cultivated. They are not abundantly watered; but much more there. The springs are an exceedingly sweet taste; and, on account of the quantity of good grass, the cattle there produce more milk than elsewhere. But the best proof of their richness and fertility is that both are thickly populated.

Judaea.—"On the confines of the two countries stands the village Amathus, otherwise called Bonera, the boundary of Judaea on the north. The south of it, when measured by length, is bounded by a village, which stands on the confines of Arabia, called by the neighbouring Jews Jarden. In breadth it extends from the Jordan to Joppa, and in the centre of it lies the city Jerusalem; for which cause the city is called by the Jews, not without reason, the navel of the earth. Judaea is not deprived of the advantages of the sea, as it extends along the sea-coast to Polemais. It is divided into eleven districts, of which Jerusalem, as the seat of government, rules, taking precedence over the surrounding country as the head over the body. The other districts, after it, are distributed by topharchies. Gophna is second; and Joppa, Aracabata, then Thana, Lydda, Amman, Pella, Idumaea, Engaddas, Herodias, Jerichus, then Jamnia and Joppa, which take precedence of the neighbouring country.

"Besides these districts, there are Gamalitica and Gauantiani, Batanea, and Trachonitis, parts of the kingdom of Agrippa. Beginning from Mount Libanus, all descends to sea level, as it reaches in breadth to the lake of Tiberias: its length is, from a village called Arpha to Julias. It is inhabited by Jews and Syrians mixed.

"Thus we have given an account, as short as was possible, of Judaea and the neighbouring regions.

Besides this general description of the country according to its divisions in the first century of the Christian era, Josephus has inserted in his history special descriptions of several towns and districts, with details of great geographical interest and importance. These, however, will be found, for the most part, under their several names, in the text. And, Bishar, Elah-Elah, Zabbulon, and Galilee.

Jericho; Jerusalem; Tiberias, Mark, etc.

As the division of Gabinus does not appear to have had a permanent influence, it may be sufficient to notice it, before dismissing Josephus, who is our sole authority for it. He informs us that the Roman general having defeated Alexander the son of Sobulas, and into the hands of five councils (εντασεων) in various parts of the country, which he distributed into so many equal divisions (ταξεων). These seats of judicature were Jerusalem, Gadesara, Amathus, Jericho, and Sephoris in Galilee. (Atst. xiv. 5. § 4.) In the division of the country among the sons of Hedor the Great, Judaea, Idumaea, and the southern part of Judaea, with Samaria, were assigned to Archelaus, with the title of ethnarch. Antipas had Galilee and Perasa, with the title of tetrarch, and Philip, with the same title, Trachonitis, Aranitis, Batanea, and Panaes, mostly without the limits of Palistoe (vid. s. ev.). (Atst. xiv. 13. § 4.) On the death of Herod the son of Herod, under the 40th year of his reign, his government was added to the province of Syria, and administered by a procurator subordinate to the prefect of Syria; the same fate attended the tetrarchy of Philip on his death in the twelfth year of Tiberias, until it was committed to Herod Agrippa by Cairis Caligula, with the title of king, to which was added the tetrarchy of Antipas, his tetrarchy also; to which Oedocias added besides Judaea and Samaria, so that his kingdom equalled in extent that of his grandfather Herod the Great. On his death, his son, who was but seventeen years old, was thought too young to succeed him, and his dominions reverted to the province of Syria. But on the death of Herod the son of Herod, the country was committed to the younger Agrippa, which was afterwards exchanged for the tetrarchies of Philip and Lysanias, to which Nero added the part of Galilee about the sea of Tiberias, and Julias in the Decapolis. After his death, in the third year of Trajan, there is no further mention of the tetrarchies (Beland, Palaestina, lib. i. cap. 30, pp. 174, 175.)

The division into topharchies, mentioned by Josephus, is recognised also by Pliny, though their lists do not exactly coincide. Pliny reckons them as follows:—

1. Jericho.
2. Emmaus.
3. Lydda.
4. Joppa.
5. Acrabata.
7. Thama.
8. Bethlephatnae.
9. Oretine (in which was Jerusalem.)

Of these 8 and 9 are not reckoned by Josephus; but Beland is probably correct in his conjecture that 8 is identical with his Pella, and 9 with his Idumaea, as this district may well be described as εντασι, as under the 40th year of Hedor. The other notices of Pliny are few and fragmentary, but agree in all essential particulars with the synchronous but independent account of Josephus above cited.

Its geography had undergone little variation when Ptolemy wrote in the following century, and the brief notices of that geographer are as accurate as
Palaetius. usual. He calls it Palæstina of Syria, otherwise called Judaea, and describes it as bounded by Syria on the north, by Arabia Petraea on the east and south. Independently of the coast of the Mediterranean, he reckons the districts of Galile, Samaria, Judaea, and Idumæa, but describes the Perea, as a promontory, as the eastern side of Jordan, which may imply that the name was no longer in vogue. He names also the principal cities of these several divisions (v. 16).

The most valuable contributions to the ancient geography of Palæstina are those of Eusebius and his commentator S. Jerome, in the Onomasticon, composed by the former, and translated, with important additions and corrections, by the latter, who has also interspersed in his commentaries and letters numerous geographical notices of extreme value. They are not, however, of such a character as to be available under this general article, but are fully cited under the names of the towns, &c. (See Rendel, Palæst. lib. ii. cap. 12, pp. 479, &c.)

It remains only to add a few words concerning the partition of Palæstina into First, Second, and Third Palæstina, as mentioned by Strabo in the fifth century of the Christian era, in the Code of Theodosius (A. D. 409); and this division is observed to this day in the ecclesiastical documents of the Eastern Church, by which it was adopted from the first; as it is recognized in the Notitiæ, political and ecclesiastical, of the fifth and following centuries. (Quoted fully by Rendel, ib. cap. 94, 95, pp. 204-234.) In this division Palæstina Prima comprehended the old divisions of Judæa and Samaria; Palæstine Secunda, the two Galileæ and the western part of Pæææ; Palæstina Tertia, otherwise called Salutaris, Idumææ and Arabia Petraæ; while the greater part of the ancient Pæææ was comprehended under the name of Arabia.

The source of geographical information for Palæstina are far too numerous for citation, it may suffice to refer to the copious list of authors appended to Dr. Robinson's invaluable work (Bibl. Res. vol. iii. first appendix A, pp. 1-28), and to the still more copious catalogue of Carl Ritter (Erdbesch., Palæstina, 2 vol. B. i. 2. Abt. 1859, pp. 29-91), who in his fifth last volumes, includes within the limits of Palæstina, Petraæ, and Syria, has, with his usual ability systematized and digested the voluminous records of centuries, and completely exhausted a subject which could scarcely be touched within the limits assigned to a general article in such a work as the present.

G. W. Palaetius, [Tyrus.]

Palamnus (Παλαμνος, Syl. p. 10), a river of Illyricum, which flowed into the sea near Epidamnus. This river has been identified with the Pantaenus (Παντανθαι), Ptol. ii. 18. § 3; but this latter corresponds better with the Genus (Τεμνας or Σκαμβος): the Palamnus is probably the same as the Darcoth or Spiranis, to the S. of Durrus. [V.]

Palandus (Παλανδός), a small stream mentioned by Poxemy in the Chersonesus Ausea (vii. 2. § 5). It is supposed by Forbiger that it is the same as that which flows into the gulf of Mætanae near Tauris. Poxemy notices also a town in the same neighbourhood which he calls Palanda (vii. 2. § 36). [V.]

Palas, a district in the south of Germany, on the borders between the Alemanii and Burgundii; it was also called Capallatium; but as it is men-

tioned only by Ammianus Marcellinus (xviii. 2), it is improbable with any degree of certainty to identify it. [L.S.]

Palatium, a place in the Rhaetian Alps, on the road from Tridentum to Verona, still bears its ancient name in the form of Palasum. (It. Ant. p. 275.) [L. S.]

Pales (Παλαια: Ek. Palæa, Palae, Thuc.; Palæa: the city itself is usually also Παλαιατος της Παλαιας, Polyb. v. 3), a town in Cephalenia on the eastern side of a bay in the north-western part of the island. It is first mentioned in the Persian wars, when two hundred of its citizens fought at the battle of Platea, alongside of the Lucediæans and Anactorians. (Herod. i. 28.) It also sent four ships to the assistance of the Corinthiæans against the Cercynæans just before the commencement of the Peloponnesian War (Thuc. i. 27); from which circumstance, together with its fighting along with the Corinthiæans and Anactorians at the battle of Platea, it has been conjectured that Pales was a Corinthiæan colony. But whether this was the case or not, it joined the Athenian alliance, together with most of the other towns of the island, in n. c. 431. (Thuc. ii. 50.) At a later period Pales espoused the side of the Aetolians against the Achaæans, and was accordingly besieged by Philip, who would have taken the city but for the treachery of one of his own officers. (Pol. v. 3, 4.) Polybius describes Pales as surrounded by the sea, and by precipices heights on every side, except the one looking towards Zacynthia. He further states that it possessed a fertile territory, in which a considerable quantity of corn was grown. Pales surrendered to the Romans without resistance in n. c. 189 (Liv. xxxvii. 28); and after the capture of same by the Romans in that year, it became the chief town in the island. It was in existence in the time of Hecateus, to whose work it is called in an inscription Ἐκῆθος λαον ἀπὸ την της Παλαιας. (Böckh, Inscr. No. 840.) According to Pherecydes, Pales was the Homeric Dulichium; this opinion was rejected by Strabo (x. p. 456), but accepted by Pausanias (vi. 15. § 7).

The remains of Pales are seen on a small height, about a mile and a half from the modern Lixouri. Scarcely anything is left of the ancient city; but the name is still retained in that of Palico and of Paliki, the former being the name of the plain around the ruins of the city, and the latter that of the whole peninsula. (Leake, Northern Greece, vol. iii. p. 64.)

[C.]

Palicus, a town of Hispania Tarraconensis, by Ukert (vol. ii. pt. i. p. 420) and others placed in the territory of the Hercenses; by Forbiger (vol. iii. p. 73) in that of the Cossatini. It was on the road from Barbino to Taraco, and is usually identified with Vencescell (Marc. V. iii. 11. p. 14. Päc. C. ii. 41. Päc. Exp. S. xxvii. 43.) [T. H. D.]

Palicorum Lacus (Παλικορως λακων: Lago di Nafstio), a small volcanic lake in the interior of Sicily, about 15 miles W. of N. M. M. 3

[The text is a reference to various geographical and historical locations in the ancient world, discussing their historical context, names, and significance.]
of Leontini. It is a mere pool, being not more than 480 feet in circumference, but early attracted attention from the remarkable phenomena caused by two jets of volcanic gas, which rise under the water, causing a violent ebullition, and sometimes throwing up hot fumes of the most remarkable kind. On this account the spot was, from an early period, considered sacred, and consecrated to the indigenous deities called the Palici, who had a temple on the spot. This enjoyed the privileges of an asylum for fugitive slaves, and was much resorted to also for determining controversies by oaths; an oath taken on a sacred crane or crane, as they are called, being considered to possess peculiar sanctity, and its violation to be punished on the spot by the death of the offender. The remarkable phenomena of the locality are described in detail by Diodorus, as well as by several other writers, and notwithstanding some slight discrepancies, leave no doubt that the spot was the same now called the Apps Nysa, from the naphths with which, as well as sand, they are filled, the name being strongly impregnated. It would, however, seem that in ancient times there were two separate pools or craters, sometimes termed fountains (ρηχαίας), and that they did not, as at the present day, form one considerable pool or lake. Hence they are alluded to by Ovid as "Stagnis Pali- corum," and Virgil notices only one Virgil's notice (a sacred altar, "pinguis et placabilis est Palici." (Diod. xi. 89; Step. B. s. v. Παλίκωρ; Pseudep. Aríst. Mvrob. 56; Macrobr. Μvrob. s. v. 18; Strab. p. 206; Ovid, Met. v. 406; Virg. Aen. ix. 585; Sil. Ital. xiv. 219; Nonn. Dionys. xiii. 511.) The sacred cha- racter of the spot as an asylum for fugitive slaves caused it to be selected for the place in which the great servile insurrection of Sicily in a. c. 102 was first discussed and arranged; and for the same reason Salvinus, the leader of the insurgents, made splendid offerings at the shrine of the Palici. (Diod. xxi. 3, 7.)

There was not in early times any other settlement beside the sacred temple, and the neighbouring village of the Palici; but in a. c. 453, the celebrated chief of the Siculi, founded a city close to the lake, to which he gave the name of Palica (Παλίκωρ), and to which he transferred the inhabitants of Menaeum and other neighbouring towns. This city rose for a short time to considerable prosperity; but was destroyed again shortly after the death of Proculus, and never afterwards restored. (Diod. xii. 88, 90.) Hence the name of it in Stephanus of Byzantium and other writers can only refer to this brief period of its existence. (Steph. B. l. c.; Polemis, ap. Macrobr. l. c.) The modern town of Palagonia is thought to retain the traces of the name of Palica, but certainly does not occupy the site of the city of Duceea, being situated on a lofty hill, at some distance from the Lago di Nysa. Some remains of the temple and other buildings were still visible in the days of Fasello in the neighbourhood of the lake. The locality is fully described by him, and more recently by the Abate Ferrara. (Fasello. del De Reb. Sic. iii. 2; Ferrara, Col. Storia deli Sicili, pp. 101, 102) [E.H.B.]

PALIMBOTA. (Παλιμβοτα). (Ptol. vii. 1. § 73; Step. B. s. v.), a celebrated city of ancient India, situated at the junction of the Ganges and Brahmaposas (Hirmajitaka), at present known by the name of Pátima. Strabo, who states (ii. p. 70) that Megasthenes was sent to Palimbotra as an ambassador to the king Sandrocottus (Chamagrapagou), describes it as a vast town, in the form of a parallelogram 80 stadia in length and 15 in breadth, surrounded by a stockade, in which open spaces were cut to shoot through, and by a ditch. He adds that it was in the country of the Prasili (av. p. 270). Ptolemy describes it as having 37 names. In the description of Megasthenes, at 6000 stadia from the mouths of the Ganges; or on that of Ptolemy, who was sent as an ambassador to Allitirochad, the son of Sandrocotus (ii. p. 70), at 5000 stadia (av. p. 689). Pliny approaches most nearly to the computation of the latter traveller, as he makes the distance from Palimbotra to the town of Samapolomeus 3700 stadia (vi. 17. § 21). Arrian calls it: the greatest of the cities of India, and apparently quotes the same description from Megasthenes which Strabo must have had before him. (Indic. c. 10.) Diodoros attributes to Hercules the building of its walls (ii. 59). Where Pliny says "Amnis Jomasites in Gangyre palimbotro decursus," he is evidently speaking of the river which waters the plains, and of the town (vi. 19). There seems no reason to doubt that the ancient Sanscrit name of this town was Pataliputra. (Lassen, Indisch. Alterth. i. p. 137; Franklin, Inquiry into the ancient Palim- botra, Lond. 1815, who, however, places it wrongly as Epipolomeus.)

PALINDROMUS PROMONTORIUM (Παλινδρομος Χειρων), a promontory of the extreme SW. of the Arabian peninsula, at the Straits of Bah-al-Mandaq, placed by Ptolemy between Oacopia Emprion and Ptolemais Aegypt, in long. 74° 30', lat. 11° 40' (vi. 7 § 7). It now bears the same name as the strait. (Moreby, Stilling Directions for Mariners, 3d ed., 1759.)

PALINURUS or PALINURI PROMONTORY. PALINURUS (Παλινόρους χειρων, Strab.: Cepo Palis- wo), a promontory on the coast of Lucania, on the Tyrrhenian sea, between Velia and Buxetum. It had a port of the same name immediately adjoining it, which still bears the name of the Port of Palinuro. Both headland and port received their name from the island Palinurus. (Steph. B. l. c.) The island, however, is alluded to by many other Latin writers, that it was here that Palinurus, the pilot of Aeneas, was cast on shore and buried. (Virg. Aen. v. 333—371, vi. 387—381; Dionys. l. 53; Lucan, ix. 42; Mel. ii. 4 § 9; Solin. 2. § 13.) We learn from Servius that heroic honours were paid him by the Lucanians (probably by the citizens of Velia), and that he has a cenotaph and sacred grove not far from that city. (Serv. ad Aen. vi. 278.) It does not appear that there was ever a town adjoining the headland; and the port, which is small, though secure and well sheltered, is mentioned only by Dionysius; but the promontory is noticed by all the geographers except Ptolemy, and is described by some as being the northern boundary of a great bay which might be considered as extending to the Columna Rhegina, or the headland on the Sicilian straits. It is in fact the most salient point of the projecting mass of mountains which separate the gulf of Pisoconia from that of Latis or Policastro, and form the chief natural frontier of the coast of Lucania. (Pit. iii. 5. s. a. 10; Mel. ii. 4 § 6; Strab. viii. 1 § 559; Coss. viii. 1 § 5.) Some ruins of ancient buildings are still visible on the summit of the headland, which are popularly known as the tomb of Palinurus. The promontory still retains its ancient name, though vulgarly corrupted into that of Palomado.

Like most mountain promontories, that of Pali-
nurnus was subject to sudden and violent storms, and became, in consequence, on two occasions the scene of great disasters to the Roman fleets. The first was in n. c. 253, when a fleet under the consul Servilius Caepio and Sempronius Balbus, on its return from Africa, was shipwrecked on the coast about Cape Palinurus, and 150 vessels lost with all the crew; the second was in n. c. 362, when a considerable part of the fleet of Augustus, on its way to Sicily, having been compelled by a tempest to seek refuge in the bay or roadstead of Velia, was lost on the rocky coast between that city and the adjoining headland of Palinurus. (Dion. Cass. xlix. i.; Appian, B. C. v. 98; Val. Max. ii. 73.)

PALIO (Palo), a town of Apulia, mentioned only by Pliny, who enumerates the Pallonenses among the "populi" of the interior of that region. (Plin. iii. 11. s. 16.) Its site is probably indicated by the modern village of Paló, about 5 miles south of Bitonto (Batantonum). [E. H. B.]

PALLISIUS. [E. H. B.]

PALLIUS [Pallium], Strab. xvii. p. 838; Scodiam. § 49; Ptol. iv. 5. § 3; Pallinur, Ptole. Tab.; Geography, vol. iii. 3; Panionius, (Ibn. Anton.), a village of the Marmareda, near which was a temple to Hercules (Strab. l. c.), a deity much worshipped in Cyrenaica. (comp. Str. Thr. Res. Cyrenas, p. 291.) Ptolemy (iv. 4. § 5) adds that there was a marsh here with birds and reeds, which was covered with water. It is identified with the Wady Tenenbisk (Pachho, Voyage p. 69; Barth, Wanderingings, pp. 506, 548), where there is a brackish marsh, corresponding to that of Ptolemy (l. c.), and remains of ancient wells and buildings at Meriadict. (Syed.) Hadjar-el-Djem.

It was off this coast that Cato (Lucan, i. 49, with the reading in Pallinurus, with an allusion to the tale of Aeneas) met the flying vessels which bore Cornelia, together with Sextus, from the scene of her husband, Pompeius, s murder. [E. B. J.]

PALLACOAΣ. [Barylonia, p. 362 b.] PALLAE. [Corbica, p. 691, b.]

PALLAN'TIA (Pallantia, Strab. iii. 168; Ptol. ii. 6. § 50), the ancient important town, the capital of the Vaius Palatinus, of the Vaius Hispamerus Transalpinus, and in the jurisdiction of Clunia. (Plin. iii. 3. s. 4.) Strabo (l. c.) wrongly assigns it to the Arravali. Now Polancia on the Caravon. (See D'Anville, Geog. Anc. i. p. 23; Flores, Esp. v. s. 4; Appian, B. C. 35, 80; Mela, li. 5.) For its coins, see Mionnet (l. i. 48). [T. H. D.]

PALLANTIAS (Pallantias, Ptol. ii. 6. § 15), a small river of Hispania Tarraconensis, between the Iberus and Fresum Herculeum, and near Seguntum; now the Polancia near Mercurio. [T. H. D.]

PALLANTHUM (Pallacym, more rarely Pal- lacym; Eid. Pallacym), one of the most ancient towns of Arcadia, in the district Massalia, said to have been founded by Palasias, a son of Philemon, was situated on the W. of Tegea, in a small plain called the Pallactic plain (Pallacymnus libanus, Paus. viii. 44. § 5), which was separated from the territory of Tegea by a choma (xoma) or dyke (Theog.). It was from this town that Evander was said to have led colonists to the banks of the Tiber, and from it the Palatium or Palatine Mount at Rome reputed to have derived its name. (Hes. op. Steph. B. s. v.; Paus. viii. 43. § 2; Liv. i. 5; Ptol. iv. 6; Justin, xilii. 1.) Pallantium took part in the foundation of Megalopoli, n. c. 271 (Paus. viii. 27. § 3); but it continued to exist as an indepenent state, since we find the Pallantians mentioned along with the Tegastae, Megalopolitae and Asseatae, as joining Epaminondas before the battle of Mantinea, n. c. 362. (Xen. Hell. vii. 5. § 5.) Pallantium subsequently sank into a mere village, but was restored and enlarged by the emperor Antoninus Pius, who conferred upon it freedom from taxation and other privileges, and gave it the municipal connection with Rome. The town was visited by Pausanias, who found here a shrine containing statues of Pallas and Evander, a temple of Core (Proserpine), a statue of Polybius; and on the hill above the town, which was anciently used as an acropolis, a temple of the pure (aunsages) gods. (Paus. viii. 45. § 1, 44. §§ 5, 6.) Leake was unable to find remains of Pallantium, and supposed that it occupied a part of Triopolis itself; though at a later time he appears to have adopted the erroneous opinion of Gell, who placed it at the village of Themos, to the S. of Triopolis. (Leake, Morea, vol. i. pp. 117, 118, vol. iii. p. 36; Gell, Itinerary of the Morea, p. 156.) The remains of the town were first discovered by the French expedition at a distance of an hour's distance from the Khan of Makri on the road from Triopolis to Leondari. The ruins have been used so long as a quarry by the inhabitants of Triopolis and of the neighbouring villages, that there are very few traces of the ancient town. Boss discovered the foundations of the temple of the pure gods on the highest point of the acropolis, near the Venus, &c., p. 146; Ross, Reisen im Peloponnes, p. 68, seq.; Curtius Peloponnesos, vol. i. p. 263, seq.

PALLANUM, a town of the Frenitani, the name of which is known only from the Tabula, which places it on the road from Axanum (Lancium) to Histodium; but the distances are corrupt and confused. It is identified with Boss, extensive ruins still remain of an ancient city on a site still called Monte Pallano, about 3 miles SW. of Atessa. It is difficult, however, to reconcile this position with the course of the route given in the Tabula. (Tab. Punt.; Bomandali, vol. iii. p. 43; Zanonni, Carta del Regno di Napoli, vol. 4.) [E. H. B.]

PALLAS LULLUS. [Tartumus Lacus.] PALLAMYON, (Eid. Apl. Herod. vii. T. Thuc. iv. 120; Scyl. p. 65; Strab. vii. 330, x. p. 447, xii. p. 550; Ptol. iii. 3. § 13; Procop. Aed. iv. 5; Steph. B. s. v.; Pomp. Mela, ii. 2. § 9; Plin. iv. 17: Eid. Pallaymon), the westernmost of the three headlands of Chalcisidia, which run out into the Aegean. It is said to have anciently borne the name of Pilmora (Phylora, Herod. l. c.), and to have witnessed the conflict between the gods and the earthborn Gigantes. (Pind. Nem. i. 100, Isthm. vi. 48; Apollod. i. 6. § 1; Lycur. 1408; Strab. vii. p. 380; Steph. B. s. v.) Heyne (Anm. in Apl. etc. comp. Dissert. de Theag. Hea. in Com. Gort. vol. ii. p. 151), who has identified these burning plains with Pallas, a small village, without mentioning any authority, that the very aspect of the country at the present day, proves the agency of earthquakes and subterranean fires; this statement is not confirmed by modern travellers: on the contrary, Dr. Holland states that the peninsula, is in part at least, of primitive formation, and this is confirmed by Virgil (Expedition Scaenica de Moris, p. 327, 1439) in his general description of the natural structure of continental Greece. (Dauenby, Vol- cones, p. 334.) The modern name of the peninsula is Kassimoura, which, besides affording excellent winter pasture for cattle and sheep, also pro-
PALLENE.

duces an abundance of grain of superior quality, as well as wool, honey, and wax, besides raising silkworms. (Leake, North Grecia, vol. iii. p. 163.) A list of the towns in Pallene is given under Chalcyneus.

PALLAS (A. T. c. 337, s.)

PALMA. (B. E. B.)

PALMAM, AD, a station on the coast-road of Syrta, 12 M. P. from Lepria Magna, and 15 M. P. from Quintilliana (Pest. Tab.). This position agrees with that of the ruins found at Sóbel Bérjoi. (Barth, W. Ger. Handb., ii. p. 18.)

PALMÁRIA (Palmarola), a small island in the Tyrrenhian sea, the most westerly of the group now known as the Ponta Islands, or isola di Ponta. It is between 3 and 4 miles long, and not more than a quarter of a mile broad; and was doubtless, in ancient, as well as modern times, a dependency of the neighbouring and more considerable island of Pónta, mentioned in the odium which it bears only 6 miles distant. (Plin. iii. 6. s. 13; Mal. ii. 7. § 18; Varr. R. R. iii. 5. § 7.)

PALMATIS (Tit. Rom. Proc. de Aed. iv. 7. p. 293), a town of Moesia Inferior, between Dorostorum and Marcianopolis (Tab. Peut.), perhaps Kaslau or Kastoria. (T. E. D.)

PALMYRA (Al-Múqāsa), Potl. v. 70, 74, 78, 80. § 10; Appian, B. C. v. 9; Παλμυρα, Joseph. Antiq. viii. 2; and Palmaris, Plin. v. 25. a. 21: 7th. Palmyreneus, or Palmarus, I. d. c.), a city of Syria, situated in 34° 24' N. lat., and 36° 20' E. long. Its Hebrew name, Tadmor, or Thadmor, denotes, like its Greek one, a city of palms; and it is said to have been first assailed by the Arabs, who still call it Tadmor. Tadmor was built, or more probably enlarged, by Solomon in the tenth century a. c. (1 Kings, ix. 18; 2 Chron. viii. 4), and its identity with Palmyra is shown in the passage of Josephus before cited. It is seated in a pleasant and fruitful oasis of the great Syrian desert, and is well watered by several small streams; but the river mentioned as the main source of Palmyra is nowhere to be found. Its situation is fine, under a ridge of hills towards the W., and a little above the level of an extensive plain, which it commands on the E. (Wood, Ruins of Palmyra, p. 5), at a distance of about 140 miles E.N.E. of Damascus. It is not mentioned by Xenophon, who must have passed near it, nor in the accounts of those who crossed the Great. The first historical notice that we find of it is in Appian, who tells us that D. Antony, under pretence of punishing its equivocal conduct, but in reality to enrich his troops with the plunder of a thriving commercial city, directed his march towards it, but was frustrated of his object by the inhabitants remonstrating with their goods to the other side of the Euphrates. (B. Civ. v. c. 9.) This account shows that it must have been a town of considerable wealth; and indeed its advantageous situation must have long rendered it a great depot for the traffic between the east and Damascus and the Phcenician cities on the Mediterranean. Yet its name is not mentioned either by Strabo or Mela. Under the first Roman century it was an independent city; and its situation on the borders of the Roman and Parthisan empires gave it a political importance, which it seems to have preserved by a well-judged course of policy, though naturally exposed to much danger in the quarrels of two such formidable neighbours. ("Inter duas imperia summa, et primus in discordia semper utique cura,") Plin. i. d. c.) It is called a colonia on the coins of Caracalla, and Uljan mentioned it in his first book de Consensus as having the Jus Italicum. It appears, from an inscription, to have assisted the emperor Alexander Severus in his wars against the Parthians. (Wood, Ins. i. 317.) It is not, however, till the reign of Gallienus that we find Palmyra playing any important part in history; and at this period we have notices of it in the works of Zosimus, Vopiscai, and Trebellius Pollio. Odenathus, a noble of Palmyra, and according to Procopius (B. Pers. i. 5) prince of the Saracens who inhabited the suburbs, and his splendid services against the Persians, received from Gallienus the title of Augustus, and was acknowledged by him as his colleague in the empire. After the assassination of Odenathus by his nephew Macedon, the celebrated Zenobia, the wife of the former, whose prudence and courage had been of great assistance to Odenathus in his former contests, was captured and put to death, which it is now only 8 miles from the capital. (Plin. iii. 6. a. 13; Mal. i. 7. § 18; Varr. R. R. iii. 5. § 7.)

PALMYRA.

Besides the sovereignty of Syria and Mesopotamia, she is said to have extended her sway over Egypt and Arabia Felix. (Zosimus i. 19, 20.) The latter, however, has been questioned. Claudius, the successor of Gallienus, being engaged in the Gothic War, tacitly acknowledged her authority. But after the termination of the short reign of that emperor, the progress of Zenobia in Asia Minor was regarded by Aurelian with jealousy and alarm. Her arms and intrigues already menaced the security of Bithynia (B. c. 60.), when Aurelian marched against her, and defeated her in two great battles near Antioch and Emesa, at both of which she commanded in person. Zenobia now retreated to Palmyra, and prepared to defend her capital with vigour. The difficulties of the siege are described by Aurelian himself in an original letter preserved by Vopiscai. (A. Souv. c. 56.) After defying for a long time the arms of the conqueror, who, however, sufficed his fame by the cruel execution of Longinus and some of the principal citizens, whom Zenobia had denounced to him. The personal adventures of Zenobia we need not pursue, as they will be found related in the Dictionary of Biography and Mythology. No sooner had Aurelian crossed the Euphrates than he was recalled by the intelligence that the Persians had risen against him. He massacred the small garrison which he had left in their city. The emperor immediately marched again to Palmyra, which now paid the full penalty of its rebellion. In an original letter Aurelian has himself recorded the unpardonable execution, which extended even to old men, women, and children. (Vopiscai. Aev. c. 31.) To the remnant of the Palmyrenians,
Palmyra.

Indeed, he granted a pardon, with permission to repair and inhabit their ruined city, and especially discovered much solicitude for the restoration of the Temple of the Sun. But the effects of the blow were too heavy to be retrieved. From this period (A.D. 273) Palmyra gradually dwindled into an insignificant town, and at length became only a place of refuge for a few families of wandering Arabs. The purpose of exploring them is to ex- hibited was chiefly owing to Oedonathus and Zenobius. For many centuries even the site of Palmyra re- mained totally unknown except to the roving Arabs of the desert, whose magnificent accounts of its ruins at length excited the curiosity of the English mer- chants settled at Aleppo. Under the auspices of the Levant Company, an expedition was sent out in 1676 for the purpose of exploring them; but the persons who com posed it were robbed and ill-treated by the Arabs, and compelled to return without having accom- plished their object. In 1691 the expedition was renewed with better success, and an account of the discoveries then made was published in the transactions of the Royal Society. (Sellers, Antiquitie- tes of Palmyra, Preface. Subsequently Palmyra was visited in 1751 by Wood and Dawkins, who pub- lished the results of their journey in a large folio volume with magnificent engravings. The account in Volney (vol. ii.) is chiefly taken from this work. Among the more recent descriptions may be men- tioned that of Irby and Mangles (Frontise, ch. v.), who visited Palmyra in 1816. The present travellers the plates of Wood and Dawkins have done more than justice to the subject; and although the view of the ruins from a distance, with their line of dazzling white columns extending between one and two miles, and relieved by the contrast of the yellow sand of the desert, is very striking, yet, when examined in detail, they excite but little interest. Taken separately, not a single column or architectural member is worthy of admiration. None of the former exceed 40 feet in height and 4 feet in diameter, and in the boasted avenue they are little more than 30 feet high. The remains of the Tem- ple of the Sun form the most magnificent object, and being of the Ionic order, relieve the monotony of the prevailing Corinthian. There are four sets of columns, which are 40 feet high and 4 feet in diameter, are fluted, and formed of only three or four pieces of stone; and in former times were surmounted by bronze Ionic capitals. The façade of the portico consists of 12 columns, like that of the temple of Baalbec, besides which there are other points of resemblance. On the other hand, however, the modern ruins are far inferior to those at Baalbec. At the time of Meurs. Irby and Mangles' visit the peristyle court of the Temple of the Sun was occupied by the Arab. men of Tadmor; but with this exception, and the Turkish

Pamphylia.

557

burial ground, the space was unencumbered, and there was nothing to obstruct the researches of the antiquary. In some places the lines of the streets and the foundations of the houses were distinctly visible. The sculptures are uniformly coarse and bad; the stone is of a perishable description, and scarcely deserves the name of marble. The sepulchres outside the walls formed perhaps the most interesting part of the remains. These consist of square towers, from three to five stories high, forming sepulchral chambers, with recesses for the reception of the bodies. In these tombs mummies and mummy clothes are found, prepared very much after the Egyptian manner; but there are no paintings, and on the whole they are far from being so in- teresting as the sepulchral chambers at Tanis. Several Greek and Pamphylian inscriptions, and two or three in Latin and Hebrew, have been discovered at Pamphylia. They will be found in Wood's Rassias of Pamphylia, and the follow- ing works have been devoted to the subject: Pococke and Smith, Inscriptiones Graecae Pamphylienses, Utrecht, 1698; Guglielmi, De inscriptionibus Palmy- renis quae in Museo Capitolino adversarum interpretandis Epistolae, Rome, 1782; Barthélemy, in Mem de l'Académie des Insers. tom. xix.; and Swinton, in the Philosophical Transactions, vol. xlviii.

With regard to the general history and antiquities of Pamphylia, besides the works already cited in this article, the following may be consulted: Seller, Antiquities of Pamphylia, London, 1696; Huntington in the Philosophical Transactions, vol. xiii. Nos. 217, 218; a Dissertation by Dr. Halley in the same work; Gibbon's Decline and Fall, ch. xi.; St. Mart. Histoire du Palmyre, Paris, 1825; Addit. in Davenant's sculptured tablet in bas-relief, with seven or eight figures standing and clothed in long robes, supposed to represent priests. Several Greek and Pamphylian inscriptions, and two or three in Latin and Hebrew, have been discovered at Pamphylia. They will be found in Wood's Rassias of Pamphylia, and the follow- ing works have been devoted to the subject: Pococke and Smith, Inscriptiones Graecae Pamphylienses, Utrecht, 1698; Guglielmi, De inscriptionibus Palmy- renis quae in Museo Capitolino adversarum interpretandis Epistolae, Rome, 1782; Barthélemy, in Mem de l'Académie des Insers. tom. xix.; and Swinton, in the Philosophical Transactions, vol. xlviii.

Palmylene (Παλμυρα), a district of Syria, so named after the city of Palmy- ra, and which extended S. from Chalabonit to the desert. (Cf. Plin. v. 34. a. 216.) [T. H. D.]

Palorum Portus. [Mallyca and Ma- garba.]

Paltus (Πάλτως; Ezh. Παλτνίας), a town of Syria upon the coast, subject to the island of Aratus, which was at no great distance from it. According to some accounts Memnon was buried in the neigh- bourhood of Paltus. Pococke places it at Bolda; Shaw at the ruins at the mouth of the Mellock, 6 miles from Jebelis, the ancient Gabala. (Strab. xv. pp. 728, 735; Plin. v. 15. § 8; Gic. ad Fam. xii. 13; Plin. v. 20. a. 18; Mela, i. 13: Steph. B. S. e.; Pococke, vol. i. p. 199; Shaw, p. 324, Oxf. 1738.)

Pambottis Lacus. [Dodoana, p. 784.]

Pamphila (Παμφιλία), a village of Acokia, on the road from Metap to Thernum, and distant 30
PAMPHYLIA.  

PANDATARIA.  

against the Greeks their naval contingent consisted of only 30 ships, while the Lycians furnished 50, and the Cilicians 100. (Herod. vii. 92.) After the destruction of the Persian empire by Alexander, the Pamphylians first became subject to Macedonia, and then to Syria. After the defeat of Antiochus the Great, they were annexed by the Romans to the kingdom of Pergamus (Polyb. xxi. 27), and remained connected with it, until it was made over to the Romans. The Greek colonies, however, did not fall to pieces by Alexander’s conquests. The independent republics even under the Persian dominion (Arrian, Anab. i. 25, foll.); but we have no information at all about their political constitutions. In their manners and social habits, the Pamphylians strongly resembled the Cilicians (Strab. xii. 570, xiv. 670), and took part with them in their piratical proceedings; their maritime towns were in fact the great marts where the produce of the Oriental pirates were disposed of. (Strab. xiv. 664.) Navigation seems to have been their principal occupation, as is evident from the coins of several of their towns. Their language was probably a mixture of Greek and some barbarous dialects, which could scarcely be recognised as a dialect of the Greek. (Arrian, Anab. i. 25.)

PAMPHYLION MARE, PAMPHYLION SI-
NUS (Παμφυλίων πώλης or Παμφυλίων κύβος), a large and deep bay formed by the curving form of the coasts of Lycia, Pamphylia, and Cilicia, beginning in the west at the Cilician promontory, and terminating in the east at Cape Anemurium. The persons and the Cilician tribe of the Olbians is stated by Strabo to be 367 sta. (Strab. ii. pp. 121, 125, xiv. p. 666; Agathem. i. 3, ii. 14; Sto-
benos, i. p. 656; Plin. v. 28, 35; Flor. iii. 6.)

This sea is now called the bay of Adalia. (L. S.)

PANACHICUS MONS. (Achaia, p. 13, a.)

PANACTUM. (Attica, p. 329, a.)

PANAIGRA (Παναΐγρα), a town in the interior of Lycia, on the lake Liya, and near the Nigirt. (Ptol. iv. 6. § 57.)

PANDAE (Plin. vi. 20. s. 23), a tribe of Indians mentioned by Pliny, who, according to him, were alone in the habit of having female sovereigns, owing to a tradition prevailing among them that they were descended from a daughter of Hercules. They would seem from his account to have been a race of great power and influence, as the Cilician towns part at least of the Pamph. Arrian (Ind. 8) tells nearly the same story of a daughter of the Indian Hercules, whom he calls Pandaes. There can be no doubt that both are to be referred to the Indian dynasty of the Pandæans, traces of whose names are met in several ancient authors. (Pandoni Rizzo.)

PANDATARIA (Πανδαταρία; Βανδαταρία), a
small island in the Tyrrenian sea, lying off the Gulf of Gaeta, nearly opposite to the mouth of the Volesus. It appears to have been called in 3.19.1 1 of the mon. 198; Mela, ii. 7. § 18; Ptol. iii. i. § 79.) Strabo says it was 250 stadia from the mainland, which is just about the truth (r. p. 238). He calls it a small island, but well peopled. It was not unfrequently made use of, as well as the neighbouring Pontia, as a place of confinement for state prisoners or political exiles. It was mentioned in the Iliad as the daughter of Augustus, Agrippina, the widow of Germanicus, and Octavia, the first wife of Nero, of whom the two last were put to death in the island. (Tac. Ann. i. 53, xiv. 63; Suet. Tib. 53.) Pandataria is about midway between Pontia (Pomus) and Amasias (Jackis); it is of volcanic origin, like the group of the Pomus Islands, to which it is sometimes referred as belonging; and does not exceed 3 miles in length. Varro notices it as frequented, like the neighbouring islands of Pontia and Palmaria, by flocks of guails and turtle-doves in their annual migrations. (Varr. R. R. iii. 5. § 7.) [E. H. B.]

PANDION, a headland in the south-west of Cilicia, opposite the island of Syrma. (Pompon. Mela, i. 17. § 7.) Liv. viii. 24. mentions this as a small town Pandia, or according to another reading Paydon. [L. S.]

PANDOSIÁ (Πανδοσία; Eth. Πανδοσίας). 1. A city of Bruttium, situated near the frontiers of Lucania. Strabo describes it as a little above Consentia, the precise sense of which expression is far from clear. (Strab. vi. 246.) But according to Livy, "immemstant Lucania ac Bruttii finibus." (Liv. viii. 24.) According to Strabo it was originally an Oenotropic town, and was, even at one time, the capital of the Oenotropic kings (Strab. l. c.); but it seems to have certainly received a Greek colony, as Scylax expressly enumerates it among the Greek cities of this part of Italy, and Scymnus Chiosian, though perhaps less distinctly, asserts the same thing. (Scyl. p. 4. § 12; Scymn. Ch. 326.) It was probably a colony of Crotona; though the statement of Eusebius, who represents it as founded in the same year with Metapontum, would lead us to regard it as an independent and separate colony. (Euseb. Arm. Chron. p. 99.) But the date assigned by him, 351 B.C., is entirely out of the question. [METAPONTUM.] But whether originally an independent settlement or not, it must have been a dependency of Crotona during the period of greatness of that city, and hence we never find its name mentioned among the cities of Magna Graecia. Its only historical celebrity arises from its being the place near which Alexander, king of Epirus, was slain in battle with the Bruttians, c. 326. That monarch had been warned by an oracle to avoid Pandosia, but he understood this as referring to the town of that name in Thessaly, on the banks of the Acheron, and was ignorant of the existence of both a town and river of the same names in Italy. (Strab. vi. p. 256; Liv. viii. 24; Justin. xii. 2; Plin. iii. 1. x. 15.) The name of Pandosia is again mentioned by Livy (xxii. 36) in the Second Punic War, among the Bruttian towns retaken by the consul P. Sempronius, in c. 204; and it is there noticed, together with Consentia, as opposed to the "ignobiles aliæ civitates." It was therefore at this time still a place of some consequence; and flemo seems to imply that it was still in use in his time (Strab. l. c.), but we find no subsequent trace of it. There is great difficulty in determining its position. It is described as a strong fortress, situated on a hill, which had three peaks, whence it was called in 0.13.8 (Strab. l. c.). In addition to the vague statements of Strabo and Livy above cited, it is enumerated by Scymnus Chius between Crotona and Thurii. But it was clearly an inland town, and must probably have stood in the mountains between Consentia and Thurii, though its exact site cannot be determined, and those assigned are all conjectural. The proximity of the river Acheron affords no assistance, as this was evidently an inconsiderable stream, the name of which is not mentioned on any other occasion, and which, therefore, cannot be identified.

Much confusion has arisen between the Bruttian Pandosia and a town of the same name in Lucania (No. 2); and ancient writers have even considered this last as the place where Alexander perished. (Romanzelli, vol. i. pp. 261—263.) It is true that Theopompos (ap. Pline. iii. 11. x. 15), in speaking of that event, described Pandosia as a city of the Lucanians, but this is a very natural error, as it was, in fact, near the boundaries of the two nations. Plin. xxii. 39, mentions the town Pandosia, (xxix. l. c.) and Strabo can leave no doubt that it was really situated in the land of the Bruttians.

2. A town of Lucania, situated near Hercules. It has often been confounded with the preceding; but the distinct existence of a Lucanian town of the name is clearly established by two authorities. Plin. xxxii. describes this town as a modest town in the plain between Pandosia and Hercules," with the river Biris in front of him (Plin. Pyrrh. 16); and the celebrated Tabulae Herculesenses repeatedly refer to the existence of a town of the name in the immediate neighbourhood of Hercules. (Mazzocchi, Tab. Herc. p. 104.) From these notices we may infer that it was situated at a very short distance from Hercules, but apparently further inland; and its site has been fixed with some probability at a spot called Sta Maria d'Anglona, about 7 miles from the sea, and 4 from Hercules. Anglona was an episcopal see down to a late period of the middle ages, but is now wholly deserted. (Mazzocchi, l. c. pp. 104, 105; Romanzelli, vol. i. p. 263.) [E. H. B.]

COIN OF PANDOSIA. PANDOVI REGIO (Πανδοβίων ηδέος, Ptol. vii. 1. § 11), a district at the southern extremity of the Peninsula of Hindostan. The name is in some editions Πανδοβίων, but there is every probability that the above reading is the true reading. There is another district of the same name which is placed by Ptolemy in the Pen-
PANEAS.

PANISSA.

pt. 2, p. 380) believes it to have been the city of Diopolis in the Delta; and he agrees with Champollion (Egypte, vol. ii. p. 130) in identifying it with the modern Menmouâla. It stood between the Tanitic and Mendesian arms of the Nile, a little SE. of the Ostium Mendesian. Potlemy (l. c.) gives it as the site of a large town, which he alone mentions and denominates Neôwer. Panopolis may have been either the surviving suburb of a decayed Deltaic town, or one of the hamlets which sprang up among the ruins of a more ancient city.

W. B. D.

PANGAEUS, PANGAEUS (from παγκούρας or Παγκούρας, from παγκούρας, Herod. v. 16. vol. ii. 112; Timei. ii. 99; Aesch. Pers. 494; Plin. Nat. Hist. iv. 330; Eurip. Rhes. 929, 973; Dion Cass. xiv. 35; Appian, B. C. iv. 87, 106; Plin. iv. 18; Virg. Georg. iv. 462; Lucan, i. 679), the great mountain of Macedonia, which, under the modern name of Phærus, stretching to the E. from the left bank of the Strymon, was at the pass of Amphipolis, bounds all along the great Strymonic basin on the S., and near Prokriates meets the ridges which enclose the same basin on the E. Pangeaus produced gold as well as silver (Herod. vii. 112; Appian, B. C. iv. 106); and its slopes were covered in summer with the Roses comitofica. (Plin. xx. 10; Theophr. H. P. v. 6; Athen. xv. p. 692.) The valleys of the river were fertile and pleasant; the other peoples who, according to Herodotus (t. c.), worked Pangeaus, were the Pieres and Odomants, but particularly the Satræ, who bordered on the mountain. None of their money has reached us: but to the Pangean silver mines may be traced a large coin of Geta, king of the Edonae. (Eudoca.) (Erast., Norther Greeks, vol. iii. pp. 176, 190, 212.)

PANHYLENSES. [Gracia, Vol. i. p. 1016.]

PANIONIUM (Πανιώνιον), a place on the western slope of Mount Mycale, in the territory of Priene, containing the common national sanctuary of Poseidon, at which the Ionians held their regular meetings, from which circumstance the place derives its name. It was a town of Caria, now called Bithia, and contains now only 150 houses. On the NE. side of the village the river, supposed to be the principal source of the Jordan, issues from a spacious cavern under a wall of rock. Around this source are many hewn stones. In the face of the perpendicular rock, directly over the cavern and in other parts, several niches have been cut, apparently to receive statues. Each of these niches had once an inscription; and of them, copied by Burckhardt, appears to have been a dedication by a priest of Pan. There can be no doubt that this cavern is the cave of Pan mentioned above; and the hewn stones around the spring may have belonged perhaps to the temple of Apollo of this place. The spring was copied by Stasius, who gives it as a small lake called Phiala, situated 120 stadia from Panionium towards Trachonitis or the NE. Respecting this lake see Vol. ii. p. 519, b.

(Pternus, Conc. Ephes. p. 478; Pâgôteros, Cassian. Collat. xi. 3). It probably therefore bore another appellation in more ancient times. Mammert (vol. x. 8.

The earlier travellers and geographers looked for the site of the Panionium in some place near the modern village of Tekhangi; but Col. Leake (Asia Minor, p. 260) observes: " The uninhabitable aspect of the river mouth of Mycale, from Cape Trigilium to the modern Tekhous, is such as to render it possible to fix upon any spot, either on the face or at the foot of that mountain, at which Panionium can well be supposed to have stood. Tekhangi, on the other hand, situated in a delightful and well watered valley, was admirably suited to the Panonian festival; and here Sir William Gell found, in a church on the sea-shore, an inscription on which he distinguished the name of Panionium twice. I conceive, therefore, that there can be little doubt of Tekhangi being on the site of Panionium." [L.S.]

PANISSA, a river on the E. coast of Thrace. (Plin. iv. 11. a. 18.)

T. H. D.
PANNONIA.

PANNONIA. (Nádróvos), a town in the interior of Cripta, S. C. of Cremona, retaining the name of Pannonia. (Proc. ii. 14, 15.)

Pannonia Septentrionalis (Pannonia, Ptol. ii. 13. § 13; or Pannonia, Zosim. ii. 43), one of the most important provinces of the Roman empire, on the south and west of the Danube, which forms its boundary in the north and east; in the south it bordered on Illyricum and Moesia, while in the west it was separated from Noricum by Mount Celtis, and from Italy by the Julian Alps. The country extended along the Danube from Vindobona (Vienne) to Singidunum, and accordingly comprised the eastern portions of Austria, Carinthia, Carniola, the part of Hungary between the Danube and Sava, Slavonia, and portions of Croatia and Bosnia. After its subjugation by the Romans, it was divided into Pannonia Superior (the upper Pannonia) and Pannonia Inferior (the lower Pannonia), by a straight line running from Araroba in the north to Servitium in the south, so that the part west of this line constituted Upper Pannonia, and that on the east Lower Pannonia. (Proc. ii. 15. § 16.) In consequence of this division the whole country is sometimes called by the plural name Pannoniae. (Tacitus, Hist. ii. 31.) It is said that the emperors of the first century did promote the productivity of the country by rooting out the large forests and rendering the districts occupied by them fit for agriculture. (Plin. xxxvii. 11. a. 2.)

In the fourth century the emperor Galerius separated the district of Lower Pannonia between the Raab, Danube, and Drava, and constituted it as a separate province under the name of Valeria, in honour of his wife who bore the same name. (Aur. Vict. de Caes. 40; Amm. Mar. xvi. 3, 8.) This province was at first called Pannonia Seconda, and was distinguished from the other by the more severe treatment of the people. (Sext. Ruf. Breu. 11; Notit. Imp.) The three provinces into which Pannonia was divided, were governed by three different officers, a praeses residing at Sabaria, a consular residing at Sirmium, and a praeses who had his seat at Siscia. The part bordering upon Germany, which stood most in need of protection, had always the strongest garrisons, though all Pannonia in general was protected by numerous armies, which were gradually increased to seven legions. Besides these troops the fleet stationed at Vindobona was the strongest of the three fleets maintained on the Danube.

On the Danube the local term for a millstone is a fragment of stone, generally used for grinding corn or other grains. (Proc. ii. 16. § 1.)

In its physical configuration, Pannonia forms a vast plain enclosed only in the west and south by mountains of any considerable height, and traversed only by hills of a moderate size, which form the terminations of the Alpine chains in the west and south, and are for this reason called by Tacitus (Hist. ii. 28) and Tibullus (iv. 1. 109) the Pannonian Alps. The separate parts of these ramifications of the Alps are mentioned under the names of Mount Carvaria, Cuxius, Albae Mons, Claudia, and Alca or Almus. The mountains on the western frontier of Illyricum and Boetia are the sources of some important rivers, such as the Drava and Savus, which flow almost parallel and empty themselves into the Danube. Only one northern tributary of the Drava is mentioned, viz., the Murius; while the Savus receives from the south the Naupactus, Carobodus, Colamus, Osimbus, Usparus, Vindurus, and Dravus. The only other important river in the north-west is the Arrabio. The northern part of Pannonia contained a great lake called the Prisco or Prisno (the Platense), besides which we may notice some smaller lakes, the Ultia, Acidus, between the Sava and the Drava, near their mouth. The climate and fertility of Pannonia are described by the ancients in a manner which little corresponds with what is now known of those countries. It is said to have been a rough, cold, rugged, and not very productive country (Strab. vii. p. 317; Dion Cass. xlix. 37; Herodian, i. 6), though later writers acknowledge the fertility of the plains. (Solini. 21; comp. with Veil. Pat. ii. 110.)

Both statements, however, may be reconciled, if we consider how the emperors of the latter part of the empire did promote the productivity of the country by rooting out the large forests and rendering the districts occupied by them fit for agriculture. (Plin. iii. 28; Appian, Hispr. 23; Hygin. de Limit. Const. p. 306; Aurel. de Caes. 40.) As the forests in those times were probably much more extensive than at present, and as the principal articles of export from Pannonia, and great quantities of it were imported into Italy, (Solin. 29.) Agriculture was not carried on to any great extent, and was for the most part confined to the rearing of barley and oats, from which the Pannonians brewed a kind of beer, called Sabaia (Dion Cass. xlix. 36; Amm. Mar. xxvi. 8), and which formed the chief articles of food. (Oliverus, 20.) Olive trees do not appear, at least in early times, to have grown at all in Pannonia, until the emperor Probus introduced the cultivation of the vine in the neighbourhood of Sirmium. (Vopisc. Prob. 1, 18; Eutrop. ix. 17; Aurel. Vict. de Caes. 37.) Among the valuable productions of the vegetable kingdom, the fragrant salines is mentioned (Plin. xxi. 29), and among the animals dogs excellent for the chase are spoken of by Nemesianus (Cyneg. 126), the cattae by Martial (xxiii. 69), and the charax or black-cock by Athenaeus (ix. p. 398). The rivers must have provided the inhabitants with abundance of fish. The ancients do not speak of any metals found in Pannonia, either because the mines were not worked, or because the metals imported from Pannonia were vaguely said to come from Noricum, where mining was carried on to a great extent.

The inhabitants of Pannonia (Pannonii, Pannonii, Nádróvos, Nádrövos, or Náldores) were a very numerous race, which, in the war against the Romans, could send 100,000 armed men into the field. (Appian, Hispr. 22.) Appian (I. c. 14) states that the Romans regarded them as belonging to Illyricum. Some have inferred from this that the great body of the people were Illyrians; and some tribes, such as the Pyrastae, Mazani, and Dessaetii, are actually described by some as Illyrian and by others as Pan-
Pannonia. The fact that most Greek writers called them Pannonians, and that Tachitus (Geogr. 2.43) speaks of the Pannonian language as different from that of the German tribes, seems to favour the supposition that they were a branch of the Thracian Pannonians who previously spread to the banks of the Danube and the confines of Italy. It must however be observed that Dion Cassius (xlii. 38), who knew the people well, denies that they were Pannonians. There can, however, be no doubt that Celtic tribes also existed in the country, and in the early part of the Roman empire Roman civilization and culture had made considerable progress. They are described as a brave and warlike people, which, at the time when the Romans became acquainted with them, lived in a very low state of civilization, and were notorious for cruelty and love of bloodshed (Dion Cass. l. c.; Appian, Ill. 14; Strab. vii. p. 318; Stat. Silv. iii. 15), as well as for faithlessness and cunning (Tibull. iv. 1. 8). But when their subjugation by the Romans, the civilization of the conquerors produced considerable changes (Vell. Pat. ii. 110); and even the religion of the Pannonians (some of their gods, such as Latobina, Labura, Chartus, are mentioned in inscriptions) gave way to that of the Romans, and Pannonian divinities were identified with Roman ones (Spart. Sesvr. 1. 15). The Romanization of the country was promoted and completed by the establishment of colonies and garrisons, so that at the time of the migration of nations, the country was completely Romanized.

The following are the principal tribes noticed by the ancients in Pannonia; some of them, it must be confessed, are very obscure. In the Upper Pannonia, we meet with the Azali, Cythae, Boii, Colatae, Isci, Isertes, Isierri, Sandrikeri, Latorici, and Varanci, and perhaps also the Lapodes or Lapydes, the Colapianti and Scordisci, though some of these latter may have extended into Illyricum. In Lower Pannonia, we have the Arubici, Hercobonatii, Andianatii, Oxystius, and Catari; besides these, Pliny (ii. 26) mentions the Aviates, Belotes, and Catari, of whom it is not known what districts they inhabited. Towns and villages existed in the country in great numbers even before its conquest by the Romans (Dion Cass. i. 29; Jornand. Get. 50); and Appian's statement (Il. 22), that the Pannonians lived only in villages and isolated farms, probably applies only to some remote and more rugged parts of the country. The most important towns were Vindobona, Carnuntum, Scarinbatia, Sabaria, Arrabo, Pantois, Sicilia, Aegiona, Naupactus, and in Lower Pannonia, Bregenta, Aquincum, Murilia, Cinala, Acremcum, Tacirum, and Sirmium.

The province of Pannonia to its conquest by the Romans, is little known. We learn from Justin (xxiv. 4, xxvii. 8, 12) that some Celtic tribes, probably remnants of the hosts of Brennus, settled in the country. Most of the tribes seem to have been governed by their own chieftains or kings. (Vell. Pat. ii. 114; Sext. Enn. Brev. 7; Jornand. i. 28). The province, as it is often called over its history begins to be somewhat removed in the time of the triumvirates at Rome, b.c. 35, when Octavianus, for no other purpose but that of giving his troops occupation and maintaining them at the expense of others, attacked the Pannonians, and by conquering the town of Sciaea brake the strength of the nation. (Dion Cass. xliii. 36; Appian, Ill. 13, 22, foll.) His general Vibius afterwards completed the conquest of the country. But not many years after this, when a war between Marobodius, king of the Marcomanni, and the Romans was on the point of breaking out, he sent a considerable army to keep Pannonia secure to the submission of the people. When the soldiers received the news of the death of Augustus, they broke out in open rebellion, but were reduced by Drusus. (Tac. Ann. i. 15, foll. 30; Dion Cass. liv. 4.) During the first century Pannonia formed only one province, under the administration of a lieutenant of the emperor. After the division in the second century, we have already spoken. Until the time of the migration of nations, Pannonia remained a part of the Roman empire; many colonies and municipia were established in the country, and fortresses were built for its protection; military roads also were constructed, especially one along the Danube, and a military frontier.
PANOROUS (Πανορός; Ebd. Panouµei, Panorouµianis: Palermo), one of the most important cities of Sicily, situated on the N. coast of the island, about 50 miles from the S.W. extremity, on an extensive bay, which is now known as the Gulf of Pa-
lermo. The name is evidently Greek, and derived from the excellence of its port, or, more strictly speaking, from the anchorage in its spacious bay. (Diod. xxi. 10.) But Panormus was not a Greek colony; it was undoubtedly of Phoenician origin, and appears to have been one of the outposts of the Phoenicians in the island. Hence, when the increasing power of the Greek colonies in the island compelled the Phoenicians to concentrate themselves in their more western port, Panormus, together with Motya and Solin, became one of the chief seats of their power. (Thuc. vi. 2.) We find no mention of the Phoenician name of the city, though it may fairly be presumed that this Greek appellation was not that used by the colonists themselves. It would be natural enough to suppose that the Greek name was only a transliteration of the Phoenician one; but the Punic form of the name, which is found on coins, is read "Machanath," which signifies "a camp," like the Roman "castra," and has no reference to the port. (Gessinus, Mommsen, Phoca. p. 298; Moir's Pana-
niser, vol. iii. p. 335.)

We have no account of the early history of any of these Phoenician colonies in Sicily, or of the process by which they were detached from the dependence of the mother country and became dependencies of Carthage; though it is probable that the change took place when the Phoenicians became the vassals of the Persian monarchy. But it is certain that Car-
thage already held this kind of supremacy over the Sicilian colonies when we first meet with the name of Panormus in history. This is not till s. c. 480, when the great Carthaginian armament under Ham-
nicus landed there and made it their head-quarters before advancing (474 B.C.) to the island of Aegina. (I. c. 480.)

From this time it bore an important part in the wars of the Carthaginians in Sicily, and seems to have gradually become the acknowledged capital of their
PANORMUS.

Dominus in the island. (Polyb. i. 38.) Thus, it is mentioned in the war of a. c. 408 as one of their principal naval stations (Diod. ii. 38); and again in a. c. 274, when it was one of the few cities which remained faithful to the Carthaginians at the time of the siege of Motya. (Id. xiv. 48.) In a. c. 383 it is again noticed as the head-quarters of the Carthaginians in the island (Id. xv. 17); and it is certain that it was never taken, either by Dionysius or by the still more powerful Agathocles. But in a. c. 276, Pyrrhus, after having subdued all the other cities in Sicily held by the Carthaginians, except Lilybaenum and Panormus, attacked and made himself master of the latter city also. (Id. xxii. 10. p. 498.) It, however, soon fell again into the hands of the Carthaginians, who held it at the outbreak of the First Punic War, a. c. 264. It was at this time the most important city of their dominions in the island, and generally made the head-quarters both of their armies and fleets; but was nevertheless taken with but little difficulty by the Roman consul Attius Calatinus and Qn. Cornelius Scipio in a. c. 254. (Polyb. i. 21, 24, 38; Zonar. viii. 14; Diod. xxiiii. 18 p. 505.) After this it became one of the principal cities of the Romans throughout the remainder of the war, and for the same reason became a point of the utmost importance for their strategic operations. (Diod. xxiiii. 19, 21, xxiv. 1; Polyb. i. 39, 55, &c.) It was immediately under the walls of Panormus that the Carthaginians under Hasdrubal were defeated by L. Cassius Metellus in a. c. 250, in the most signal of the decisive battles of the whole war. (Polyb. i. 40; Zonar. viii. 14; Oros. iv. 9.) It was here also that the Romans had to maintain a long-continued struggle with Hamilcar Barca, who had seized on the remarkable isolated mountain called Erckta, forming a kind of natural fortress only about a mile and a half from Panormus [ERKTA], and succeeded in maintaining himself there for the space of three years, notwithstanding all the efforts of the Romans to dislodge him. They were in consequence compelled to maintain an intrenched camp in front of Panormus, at a distance of only five stadia from the foot of the mountain, throughout this protracted contest. (Polyb. i. 56, 57, 58.)

After the Roman conquest of Sicily, Panormus became a municipal town, but enjoyed a privileged condition, retaining its nominal freedom, and immunity from the ordinary burdens imposed on other towns of the province. (Cic. Fextr. iii. 6.) It was in consequence a flourishing and populous town, and the place where the courts of law were held for the whole surrounding district. (Id. vii. 26, v. 7.) Cicero notices it at this time as a political and administrative, as well as a maritime and commercial city of the island. (Id. v. 27.) In the settlement of the affairs of Sicily which seems to have followed the war with Sextus Pompeius, Panormus lost its liberty, but received a Roman colony (Strab. vi. p. 272), whence we find it bearing in inscriptions the title of " Colonia Augusta Panormitanorum." It would seem from Dion Cassius that it received this colony in a. c. 20; and coins, as well as the testimony of Strabo, prove incontestably that it became a colony under Augustus. It is strange, therefore, that Pliny, who notices all the other colonies founded by that emperor in Sicily, has omitted all mention of Panormus as such, though it was certainly an ordinary municipal town. (Plin. iii. 8. s. 14; Dion Cass. liv. 7; Eckel, vol. i. p. 232; Orell. Inscr. 948, 3760.) It subsequently received an accession of military colonists under Verpassian, and again under Hadrian. (L. Colom. p. 211; Zumpt, de Colom. p. 410.) Numerous inscriptions prove that it continued to be a flourishing provincial town throughout the period of the Roman empire; and its name is repeatedly mentioned in the Itineraries (Itin. Anit. pp. 91, 97; Tab. Pest.; Castell. Inscr. Sicil. pp. 26, 27, &c.); but it is certain that it did not attain in ancient times to the predominant position which it now enjoys. It fell into the hands of the Goths, together with the rest of Sicily, and was the last city of the island that was wrested from them by Belisarius in a. d. 535. (Procop. B. G. i. 5, 8.) After this it continued subject to the Byzantine empire till 835, when it was taken by the Saracens, who selected it as the capital of their dominions in the island. It retained this position under the Norman kings, and is still, though not the principal city of Sicily, one of the most populous cities in the island, containing above 160,000 inhabitants.

The situation of Palermo almost vies in beauty with that of Naples. Its beautiful bay affords an excellent roadstead, from whence it doubtless derived its name; and the inner or proper harbour, though not large, is well sheltered and secure. The ancient city probably occupied the site immediately around the port, but there are no means of tracing its topography, as the ground is perfectly level, without any natural features, and all ancient remains have disappeared, or are covered by modern buildings. We learn that it consisted of an outer and inner city; the former might be supposed to be the more recent of the two, and thence called the New City (γη νέα ωδά). Each had its separate enclosure of walls, so that when the outer city was taken by the Romans, the inner was still able for some time to withstand their efforts. (Polyb. i. 38; Diod. xxiiii. 18.) The only ancient remains now visible at Palermo are some slight vestiges of an amphitheatre near the Royal Palace; but numerous inscriptions, as well as fragments of sculpture and other objects of antiquity, have been discovered on the site, and are preserved in the museum at Palermo.

The coins of Panormus are numerous; the more ancient ones have Punic inscriptions, and belong to the period when the city was subject to the Carthaginians, but the beauty of their workmanship shows the unequivocal influence of Greek art. The later ones (struck after the Roman conquest, but while the city still enjoyed nominal freedom) have the legend in Greek letters ΠΑΝΟΡΜΙΤΑΝ. Still later are those of the Roman colony, with Latin legends. Among these, as still the capital of the island, the name is frequently written Panormitanorum; and this orthography, which is found also in the best MSS. of Cicero, seems to have been the usual one in Roman times. (Eckel, vol. i. p. 232; Zumpt, ad Cic. Fextr. ii. 26.)
PANTHIALAEI (Πανθιάλαι, Herod. i. 125),
on one of the tribes of ancient Persis mentioned by Herodotus. Nothing is known of them beyond what he states, that they pursued husbandry as their occupation.

PANTI SINUS (Παντις ἕδας), Ptol. vii. § 7,
a bay on the NE. side of the island of Ceylon. It is probably that which leads up to Trincomalee.
The name in some editions is written Parī. [V.]

PANTICAPAEMUM (Παντικάπαι, Παντικάτα, Scylax, Strab. et alii; Παντικάνων, Ptol. iii. 6. § 4; Εἰκ. Παντικάπαι, Παντικάπαια, Steph. B. a. e. for the probable reading Παντικαπαίας, as Παντικαπαίων occurs on coins, Eckhel, vol. ii. p. 3; also Παντικάπαιας, as if from a form Παντικάπας, Steph. B.; Pantikapaensae, Plin. vii. 7: Kertch), an important Greek city, situated in the Tauric Chersonesus on the western side of the Cimmerian Bosporus, and not far from the entrance to the Lacus Macotis. (Strab. vii. p. 308; Appian, Midhr. 107.)

Scylax says (p. 30, Huda) that Panticapaum was 30 stadia from the Maeotis, which is too short a distance; but Arrian (Peripol. § 29, p. 20, Huda) more correctly makes the distance 60 stadia from Panticapaum to the mouth of the Tanais. After this, however, no authority is given.

Panticapaum derived its name from a river Panticape; but this is a mistake of the learned Byantine, who appears to have recollected the river of this name mentioned by Herodotus, and then confused it with the city Panticapaum, which, however, does not stand upon any river. Ammianus and other historians, however, place it on the Hypanis (xii. 8. § 26). According to a tradition preserved by Stephanus (e. v.) it was founded by a son of Aesilaus, who received the district as a present from the Scythian king Agasates; but we know from history that it was a Milesian colony, and apparently one of the earliest on this coast. (Strab. vii. p. 308; Plin. iv. 12. § 26.)

Ammianus calls it the Portus, as Panticapaeum, or it now is called the Portus, and placed the camp of the legions of the emperor on the Bosporus; but the date of its foundation cannot be determined.

Böckh (Inscr. vol. ii. p. 91) places it about Ol. 59. 4 (n. c. 541), and it must certainly have been earlier than Ol. 75.1 (n. c. 480), which is the date assigned to it by Niebuhr. (Kiesens Schriften, vol. i. p. 378.)

This country connected the name Panticapaum with the name of the town, whose figure, or that of a Satyr, frequently appears on the coins of the city; but this name, as well as that of the river Panticape, probably belonged to the Scythian language, and was, as in similar cases, adopted by the Greeks with a Hellenic termination.

Panticapaum was the capital of the kings of Bosporus (Strab. viii. p. 495; Diod. xii. 44), of whom a brief account is given elsewhere (iv. 13, Huda) as having been killed by the Amazons. Accordingly Panticapaum was frequently called Bosporus, though the latter name was also given to the whole kingdom. Hence, when Demosthenes says that Thermodon was reckoned by many as a good harbour as Bosphorus, he evidently means by the latter the capital and not the kingdom (in Lept. p. 467); and accordingly Panticapaum (iv. 13, Huda) that was called Panticapaum was called Bosporus by some. En
tropius (vii. 9) erroneously makes Panticapaum and Bosporus two different cities. Under the Byzantines Bosporus became the ordinary name of the city (Procop. de Aedif. iii. 7, B. Pers. i. 12, B. Goth. iv. 3); and among the inhabitants of the
PANTICAPAEUM.

Crimea Kertch is still called Bospor. The old name, however, continued in use for a long time; for in the Italian charts of the middle ages we find the town called Pandico or Pandico, as well as Bospor or Vospor.

The walls of the city were repaired by Justinian. (Proc. de Asie, iii. 7.)

The site of Panticapaenum is well described by Strabo. "Panticapæum," he says, "is a hill, 20 stadia in circumference, covered with buildings on every side; towards the east it has a harbour and docks for 30 ships; it has also a citadel" (vi. p. 390). The hill is now called the Arm-chair of Mithridates. The modern town of Kertch stands at the foot of this hill, a great part of it upon alluvial soil, the site of which was probably covered by the sea in ancient times. Hence the bay on the northern side of the city appears to have advanced originally much further into the land; and there was probably at one time a second port on the southern side, of which there now remains only a small lake, separated from the sea by a bar of sand. Foundations of ancient buildings and heaps of brick and pottery are still scattered over the hill of Mithridates; but the most remarkable ancient remains are the numerous tumuli round Kertch, in which many valuable works of art have been discovered, and of which a full account is given in the works mentioned below. The most extraordinary of these tumuli is that of the king Pharnaces; and the mountain called Altum-Oba, or the golden mountain, by the Tartars. One of the tumuli is in the form of a cone, 100 feet high and 450 feet in diameter, and cased on its exterior with large blocks of stone, cubes of 3 or 4 feet, placed without cement or mortar. This remarkable monument has been at all times the subject of mysterious legends, but the truth is, it was not discovered till 1832. This entrance led to a gallery, constructed of layers of worked stone without cement, 60 feet long and 10 feet high, at the end of which was a vaulted chamber, 35 feet high and 20 feet in diameter, the floor of which was 10 feet below the floor of the entrance. This chamber, however, was empty, though on the ground was a large square stone, upon which a Paphlagonian might have rested. This tumulus stands at a spot where two branches of a long rampart meet, which extends N. to the Sea of Aesopus and SE. to the Bosporus just above Nymphaeum. It was probably the ancient boundary of the territory of Panticapaenum and of the kingdom of the Bosporus, before the conquest of Nymphaeum and Thedosia. Within the rampart, 150 paces to the E., there is another monument of the same kind, but unfinished. It consists of a circular esplanade, 500 paces round and 166 in diameter, with an exterior covering of Cyclopean masonry, built of worked stones, 3 feet long and high, of which there are only five layers. But the greatest discovery has been made by the Tartars called by the Tartars Alum-Oba, on the hill of cinders, which is situated outside of the ancient rampart, and 4 miles from Kertch. Here is a tumulus 165 feet in diameter; and as some soldiers were carrying away from it in 1830 the stones with which it was covered, they accidentally opened a passage into the interior. A vestibule, 6 feet square, led into a tomb 15 feet long and 14 broad, which contained bones of a king and queen, golden and silver vases, and other ornaments. Below this tomb was another, still richer; and from the two no less than 120 pounds' weight of gold ornaments are said to have been extracted. From the

forms of the letters found here, as well as from other circumstances, it is supposed that the tomb was erected not later than the fourth century B.C. (Dubois, Voyage autour du Caucase, vol. v. p. 113, seq.; Seymour, Russia on the Black Sea, 4th ed. p. 235, seq.; Neumann, Die Heiligen in Skythienlands, vol. i. p. 478, seq.)

PAPHLAGONIA.

COIN OF PANTICAPAEUM.

PANTICAPES (Παντικάπης), a river of European Sarmatia, between the Borysthenes and the Tanais, rises in a lake, according to Herodotus, in the N., separates the agricultural and nomad Scythians, flows through the district of Ylasses, and falls into the Borysthenes. (Herod. iv. 18, 19, 47, 54; comp. Plin. iv. 12. a. 26; Melas, ii. 1. § 5.) Dionysius Per. (314) says that it rises in the Rhipean mountains. Many suppose it to be the Sameara; but it cannot be identified with certainty with any modern river. For the various opinions held on the subject, see Bähr, ad Herod. iv. 54; Uktur, vol. iii. pt. ii. p. 191. Stephanus Byz. erroneously states that the town of Panticapaenum stood upon a river Panticae. [PANTICAPAEUM.]

PANTICHUM (Παντικέμ), a small coast-town of Bithynia, to the south-east of Chalcedon, on the coast of the Propontis. (I. Ant. p. 140; Hieroc. p. 271; Tut. Pess.) The place still bears the name of Pandik or Pandikhi. [L. S.]

PANTOMATRIUM (Πάντωματριον; Eth. Παντωματρίας; Steph. B. s. v.), a town on the N. coast of Crete, placed by Ptolemy (iii. 17. § 7) between Rhithymna and the promontory of Diium, but by Pliny (iv. 20. a. 20) more to the W., between Aptera and Amphipollis: probably on the modern C. Retino. (Böck. Cretae, i. p. 16, 394.) [T. H. D.]

PANYUSUS (Πανύςους), Plut. iii. 10. § 8; Plin. iv. 11. a. 18), a river of Moesia Inferior, flowing into the Euxine at Odessus (Varna). [T. H. D.]

PAPHLAGONIA (Παφλαγονία; Eth. Παφλαγωνία), a country in the north of Asia Minor, bordering in the west on Bithynia, in the east on Pontus, and in the south on Galatia, while the north is washed by the Euxine. The river Parthenius in the west divided it from Bithynia, the Halys in the east from Pontus, and Mount Olympos in the south from Galatia. (Hecat. Fragm. 140; Scylax, p. 34; Strab. xii. pp. 544, 565; Agathem. ii. 6.) But in the case of this, as of other countries of Asia Minor, the boundaries are somewhat fluctuating. Strabo, for example, when saying that Paphлагonia also bordered on Phrygia in the south, was most probably thinking of those earlier times when the Galatians had not yet established themselves in Phrygia. (vi. 2) again includes Amius beyond the Halys in Paphlagonia, while Mela (i. 19) regards Sinope, on the west of the Halys, as a city of Pontus. It is probable, however, that in early times the Paphlagonians occupied, besides Paphlagonia proper, a considerable tract of country on the east of the Halys, perhaps as far as Themiscarya or even Cape Paxianum (Xenoph. Anab. v. 6. § 1; Strab. xii.}
PAPHLAGONIA.

p. 548), and that the Halys did not become the permanent boundary until the consolidation of the kingdom of Pontus. The whole length of the country from west to east amounted to about 40 geographical miles, and its extent from north to south about 20. Paphlagonia was on the whole a somewhat hilly and montaneous country, Mount Olympos sending forth its ramifications to the north, sometimes even as far as the coast of the Euxine; but the northern part nevertheless contains extensive and fertile plains. (Xenophon. Anab. v. 6. § 6; foll.; comp. Strab. xii. p. 543; Pococke, Travels, iii. p. 158.) The Olympos is the chief mountain of Paphlagonia. Its numerous branches are not distinguished by any special name, but it extends to other parts of Asia Minor, and were even rich in olive plantations (Strab. xii. p. 546), but the southern, or more montaneous parts, were rough and unproductive, though distinguished for their large forests. Paphlagonian horses were celebrated in the earliest times (Hom. II. ii. 281, foll.); the mules and antelopes (Alopeidæ) were also highly prized. In some parts sheep-breeding was carried on to a considerable extent, while the chase was one of the favourite pursuits of all the Paphlogionians. (Strab. xii. p. 547; Liv. xxxviii. 18.) Stories are related by the ancients according to which fish were dug out of the earth in Paphlagonia. (Strab. xii. p. 562; Athen. viii. p. 881.) The forests in the south furnished abundance of edible roots, the Via of Mount Cyrrus was celebrated. (Theophr. H. Pl. ii. 15; Plin. xvi. 16; Cato, iv. 13; Val. Flacc. v. 16.) Of mineral products we hear little except that a kind of red chalk was found in abundance.

The name Paphlogion is derived from the legends of Paphlogon, a son of Phineus. (Eustath. ad Odyssey D. 207. Dim. P. C. 26. Per Eph. B. 4. xii. Const. Porphy. De Them. i. 7.) Some modern antiquaries have had recourse to the Semitic languages to find the etymology and meaning of the name; but no certain results can be obtained. An ancient name of the country is said to have been Pylaemenia (Plin. vi. 2; Justin, xxxvii. 4). Because the Paphlogionians pretended to be descendants of Pylaemenes, the leader of the Paphlogonian Heneti (Hom. II. xi. 851) in the Trojan War, after whom they also called themselves Pylaemenes. The Paphlogionians, who are spoken of even in the Homeric poems (Ili. ii. 851, v. 577, xiii. 656, 661), appear, like the Lycæans or on that coast, to have been of Syrian origin, and therefore to have belonged to the Semitic nomads, the Phœnicians. (Herod. i. 72, 110; Plut. Lucullus 23; Eustath. ad Dionys. Per. 72.) They widely differed in their language and manners from their Thracian and Cæcil neighbours. Their language, of which Strabo (xiv. p. 552) enumerates some proper names, had to some extent been adopted by the inhabitants of the adjacent former Hellespontine country, as it consisted of a peculiar kind of helmet made of wickerwork, small shields, long spears, javelins, and daggers. (Herod. vii. 72; Xenophon. Anab. v. 2. § 38, 4. § 13.) Their cavalry was very celebrated on account of their excellent horses. (Xenophon. Anab. v. 6. § 8.)

PAPHUS.

The Paphlogionians are described by the ancients as a superstitious, silly, and coarse people, though this seems to apply to the inhabitants of the interior more than to those of the coast. (Xenophon. Anab. v. 9. § 6; Aristoph. Ec. 2, 65, 102, 110; Lucian, Alex. 9. foll.) Besides the Paphlogionians proper and the Greek colonists on the coast, we hear of the Hettipers living along whose nationality nothing is known; they may accordingly have been subdivisions of the Paphlogionians themselves, or they may have been foreign immigrants. Until the time of Croesus, the country was governed by native independent princes, but that king made Paphlogonia a part of his empire. (Herod. iii. 90.) The conquest of Lydia by Cyrus, the Paphlogionians were incorporated with the Median empire, in which they formed a part of the third satrapy. (Herod. iii. 90.) But at that great distance from the seat of the government, the satraps found it easy to assert their independence; and independent Paphlogionian kings are accordingly mentioned as early as the time of Xenophon (Anab. v. 6. § 3, § 8). In the time of Alexander the Great, whose expedition did not touch those northern parts, kings of Cappadocia and Paphlogonia are still mentioned. (Arrian, Anab. ii. 4. § 1; iii. 8. § 5; Diod. Sic. xviii. 16.) But this independence, though it may have been merely nominal, ceased soon after, and Paphlogonia and Cappadocia fell to the share of Eumenes, whose son, Soter, became king of Paphlogonia and his neighbour Nicomedes, who made his son, under the name of Palaetanes, king of Paphlogonia. (Justin, xxxvii. 3, 4.) After the conquest of the satraps, the Romans united the coast districts of Paphlogonia with Bithynia, but the interior was again governed by native princes (Strab. i. c. Appian, B. C. ii. 71; Plut. Pompey, 79); and when that kingdom became extinct, the Roman satrap governed the whole with their empire, and henceforth Paphlogonia formed a part of the province of Galatia. (Strab. vi. p. 288, xii. pp. 541, 562.) In the new division of the empire in the fourth century, Paphlogonia became a separate province, only the easternmost part being cut off and added to Pontus. (Herod. pp. 695, 701.) The principal coast towns were Amathus, Erythrae, Crimna, Cyttorum, Aegialus, Abonitchoes, Cimolias, Stephane, Potamia, Armiman, Singia, and Camira. The whole of the interior of the country was divided, according to Strabo, into nine districts, viz. Blemis, Domestis, Filomelis, Cimamata, Tisadanis, Domestis, Sphaiton, and Tesa- tana. The interior contained only few towns, such as Pompeipolis, Gangra, and some mountain forresses. (L. S.)

PAPHUS (Ptol. vii. 80. § 3, &c.; Eth. and Adj. Παφος, Paphus, and Paphius), the name of two towns seated on the SW. extremity of the coast of Cypria. The older town consisted of a peculiar kind of helmet made of wickerwork, small shields, long spears, javelins, and daggers. (Herod. vii. 72; Xenophon. Anab. v. 2. § 28, 4. § 13.) Their cavalry was very celebrated on account of their excellent horses. (Xenophon. Anab. v. 6. § 8.)
denote both Old and New Paphos, but with this distinction, that in prose writers it commonly means New Paphos, whilst in the poets, on the contrary,—for whom the name of Palaeopaphos would have been unwieldy,—it generally signifies Old Paphos, the more peculiar seat of the worship of Aphrodite. In inscriptions, also, both towns are called Πάφος. This indiscriminate use is sometimes productive of ambiguity, especially in the Latin prose authors.

Old Paphos, now Κυάδο or Κοσσάκια (Engel, Kypros, vol. i. p. 125), was said to have been founded by Cinyras, the father of Adonis (Apollod. iii. 14); though according to another legend preserved by Strabo (xii. p. 505),—whose text, however, varies,—it was founded by the Amazons. It was also an oracle there ("velix Paphos," Virg. Aen. x. 51), at the distance of about 10 stadia, or 1 1/4 mile, from the sea, on which, however, it had a roadstead. It was not far distant from the promontory of Zephyrium (Strab. xiv. p. 683) and the mouth of the little river Bocarus. (Herzsch. v. Βάκαρος.) The fable ran that Venus had landed there when she rose from the sea, and was worshipped by the king and his people. (Paus. viii. 456.) According to Panormus (i. 14), her worship was introduced at Paphos from Assyria; but it is much more probable that it was of Phoenician origin. (Phoenicia.) It had been very anciently established, and before the time of Homer, as the grove and altar of Aphrodite at Paphos are mentioned. As the sanctuary, which was the temple to the worship of the goddess centred, not for Cyprus alone, but for the whole earth. The Cinyrasiae, or descendants of Cinyras,—Greek by name, but of Phoenician origin,—were the chief priests. Their power and authority were very great; but it may be inferred from certain inscriptions that they were controlled by a senate and an assembly of the people. There was also an oracle there. (Engel, p. 453.) Few cities have ever been so much sung and glorified by the poets. (Cf. Aesch. Suppl. 525; Virg. Aen. i. 415; Hor. Od. i. 19, 30, iii. 26; Stat. Silv. i. 2. 101; Aristoph. Lysia. 833, &c. &c.) The remains of the vast temple of Aphrodite are still discernible, its circumference being marked by huge foundations walls. After its destruction by the armies of Trajan and Vespasian, on whose coins it is represented, as well as on earlier and later ones, and especially in the most perfect style on those of Septimius Severus. (Engel, vol. i. p. 130.) From these representations, and from the existing remains, Hetsch, an architect of Copenhagen, has attempted to restore the building. (Monats. Arch. 395, p. 261; Eckhel, vol. iii. p. 86.)

New Paphos, now Βόφιλα, was seated on the sea, near the western extremity of the island, and possessed a good harbour. It lay about 60 stadia, or between 7 and 8 miles NW. of the ancient city. (Strab. xiv. p. 683.) It was said to have been founded by Agapenor, chief of the Carians at the siege of Troy (Hom. II. ii. 609), who, after the capture of that town, was driven by the storm, which separated the Grecian fleet, on the coast of Cyprus. (Paus. viii. 5, § 3.) We find Agapenor mentioned as king of the Paphians in a Greek district preserved in the Ancienta (p. 181, Bruckn.); and Agapenor, king of the Carians (vii. 90). He may accordingly have been one of the forms of Typhon, whose worship was widely spread over the Delta. There is indeed an Egyptian god named Rambo (Wilkinson, M. & C. pl. 69, 79), whose attributes answer to those of...
PARACANDA.

Are, and who may, accordingly, have been the object of Papremita worship. In the Papremita name, Ar, was found the common meeting of the Greeks and Egyptians, in which the satrap Achaemenes was defeated by Inarua, king of Lower Egypt, B. C. 460. (Herod. Ili. 12, comp. viii. 7; Ctesias, Ecounter. Persic. c. 32; Thuc. i. 104, 109.) It is useless to speculate which of the various mounds of ruins in the Delta cover the site of a town whose exact situation cannot be ascertained.

W. B. D.

PARACANDA. [Maraucand.]

PARACHELOITIS. [Alexandria. p. 63, s.]

PARACHOATRAS (6 Papaydovas, Ptol. vi. 2. § 3, 4. § 1), the great south-eastern chain of the Taurus, which under various names extended from the Caspian Sea to the province of Persia. The portion so called appears to have been the central part of the mountains of Media Apotapote on the N. and those of Persis on the S. Of this portion M. Orontes (now Elumod) was the most considerable. Ancient geographers are not clear as to the extent to which the local names prevailed. Thus Strabo evidently places the Parachorathras far to the N., and seems to have considered it as an extension of the Apotapote. It is probable that M. Hyrcania (xi. pp. 511, 514, 522). Ptolemy seems to have considered it a continuation towards the S. of the portion of the Anti-Taurus which was called M. Jasonius.

[1.]

PARADA, a town in Africa Propria, on the road from Thaphus to Uica. (Hirt. B. Afr. 87.) It seems to have been inhabited by the Libyans, by what is mentioned by Strabo (xxvii. p. 831). Mamert (a. 2. p. 374) places it on Mount Zonum. [T. H. D.]

PARABASUM. [Megapologis, p. 310, b.]

PARAPAPHITIS (Papysparifius), a district of ancient Carmania Deserta (now Kurman) mentioned by Ptolemy (vi. 8, § 12).

[1.]

PARATAEONE (Heresapriste), a district of ancient Persis extended along the whole of its N. frontier in the direction of Media Magna, to which, indeed, it in part belonged. The name is first mentioned by Herodotus, who calls one of the tribes of the Median Parataecani (i. 101). The same district comprehended what are now called the Bakdjer mountains and tribes. The whole country was mentioned by Strabo (xii. p. 515, xii. p. 522, xv. p. 723; Plin. vi. 27. a. 31), and appears to have been inhabited, like the adjacent province of Cosseia, by wild and robber tribes (xvi. p. 744). The inhabitants were called Parataecani (Herod. l. c.; Strab. i. c. xv. p. 732) or Parataecas (Strab. xv. p. 726; Arrian, iii. 19). There has been on the wide discussion with regard to the origin of this name. The best determination seems to be that it is derived from a Persian word, Parata, signifying mountain; and this again from the Sanscrit Parvata. It will be observed that while Herodotus gives the Parataecani a Median origin (l. c.), and Stephanus B. calls Parataeca a Median town, Strabo gives them the distinction named to the Persian province of Appoloniais or Sittacene (xvi. p. 736). There were, however, other places of the same name at considerable distances from the Median or Persian province. Thus, one is mentioned between Bactrians and Sogdians, between the Oxus and Jaxartes (Arrian, iv. 21; Curt. viii. 14, 17), and another between Drangae and Armenia. (Isid. Chron. 5.) In India, too, we find the Paryati Montes, one of the outlying spurs of the still greater chain of the Parapanianus (or Hindu Kes). (Lasso.

PARAPOTAMII.

549

PARAETONIUM (Papawusvus, Syl. ii. 1), Strab. xvii. p. 799; Pomp. Mela, i. 8. § 2; Plin. v. 5; Ptol. iv. 5. § 4; Steph. B.; Itin. Anton.; Hierocles), a town of Marmaria, which was also called Ammonia. (Cleomace, Strab. l. c.) Its celebrity was owing to its spacious harbour, extending to 40 stadia (Strab. l. c.; comp. Dio. i. 31), but which appears to have been increased. It was called Cherson (Hierocles historia sive consendenda, 65.) Paraetonium was 1300 stadia (Strab. l. c.; 1550 stadia, (Strab. l. c.) from Alexandria. From this point Alexander, n. c. 333, set out to visit the oracle of Ammon. (Arrian, Anab. iv. 3. § 3.) When the "world's debate" was decided at Actium, Antonius stopped there, where some Roman troops were stationed under Pircas for the defence of Asyptum. (Plut. Anton. 70; Flor. iv. 11.) The name occurs in Latin poetry. (Ovid, Met. ix. 772, Arcus, lib. 13. 7; Lucan, iii. 295.) Justinian fortified it as a frontier fortress to protect Asyptum from attacks on the W. (Procop. de Aed. vi. 2.) An imperial coin of the elder Faustina has been assigned to this place. (Hartw. in Schol. in Ep. Faustina, l. c. p. 116.) When the Aedilis Ay were sovereigns over this district, the site, where there were ancient remains, retained the name of Baretus; but after their expulsion by the pasha of Asyptum, it was called Berek Sandokh. (Pacho, Voyage dans la Marmaria, p. 297.) [E. B. J.]

PARAGON SIMUS (Papawusvus, Syl. ii. 1), Strab. 9. § 7; Marcian, c. 28. ed. Müller), a gulf on the shore of Gedrosia, a little way beyond the Pron. Carpeja (now Cape Bomboreh), according to Ptolemy. Marcian states that it was of considerable size, and extended as far as the promontory called Alainbad (now Ras Goudud) and the island of Libea or Ziba. It appears to have been in that part of Gedrosia which was inhabited by the Ichthyophii; it is not, however, noticed in Nearchus's voyage. [V.]

PARALATIS (Papawusvus), a town of Lycaonia, and, as its name seems to indicate, situated near a lake. (Plut. v. 6. § 16.) There are coins bearing the inscription "Jul. Ang. Col. Paris" (Echke, vol. iii. p. 58, foll.), from which it appears that the place was marked by a column, and that its elevation to the rank of a colony is not mentioned elsewhere, it has been supposed that the coins are either forged or have been incorrectly read. [L.S.]

PARALIA, or PARALUS. [Attica, p. 322.]

PARALIA, PARAXIA [Chalidon, vol. i. p. 596, a.]

PARAMBOLE (Paramboles, H. Hieros. p. 556; Parenoles, Acts & Alex. Wessel. p. 568), a town of Thrace, on the river Hebrus, still called Parmobole, according to Palma. [T. H. D.]

PARAPIOTAE (Papawusvus), an Indian tribe mentioned by Ptolemy (IV. l. c. 62), and placed by him on the slopes of the Vindus or Vindaka M. (Vindikus Ma) along the coast of N. (Nafinda). Lassen, in his Map of Ancient India, places them along the upper sources of the same river. [v.]

PARAPOTAII (Papawusvus, Strab. Paus. 9. Papawusvus, Steph. B. s. v. Eth. Papawusvus), a town of Phocis on the left bank of the Cephisus (whence its name), and near the frontier of Boeotia. Its position is described as a passage of Theopompus, preserved by Strabo, who says that it is marked at a distance of 40 stadia from Charesia, in the entrance from Boeotia into Phocis, on a height of
PARASPIAS.

moderate elevation, situated between Parnassus and Mount Helicon; he adds that these two mountains were separated from each other by an interval of 5 stadia, through which the Cephissus flowed. (Strab. x. p. 434.) Parapotamia was destroyed by Xerxes (Hearld. viii. 33), and again a second time by Philip at the conclusion of the Sacred War. (Paus. x. 3. § 1.) It was never rebuilt. Pindar in his life of Sulia (c. 16) speaks of the acropolis of this city by which he describes as a stony height surrounded with a precipice and separated from Mt. Hedyllion only by the river Assos. (Leake, Northern Greece, vol. ii. pp. 97, 195.)

PARASPIAS (Παρασπιάς), a town of Thessaly in the district of Oetae. (Strab. ix. p. 454.)

PARAVAEI (Παραβαέη), Thuc. ii. 68; Rhianus, ep. 96. A port or castle (Cartes, whose territory, contiguous with those of the Orestae, was situated on the banks of the Aous (Βίδας), from which they took their name. In the third year of the Peloponnesian War, a body of them, under their chief Oroedus, joined Ceneus (Thuc. l.c.), the Lacedaemonian commander. Arrian (Anab. i. 7), describing the route of Alexander, says that he passed through the territory of the Paravaeis (Παραβαέη) to Pharsamum in Thessaly, which stood a little to the E. of Trikkala, remarks that Alexander passed by the highlands of Paravaeis.—Λάορι and Smolitsa, with the adjacent mountains.

The seat of this tribe must be confined to the valleys of the main or E. branch of the Aous, and the mountains in which rivers rapids, extending from the Aos Stima or Khmis, as far S. as the borders of Thymphae and the Molosoi, and including the central and fertile district of Kimita, with the N. part of Zagori. (Leake, Northern Greece, vol. iv. pp. 115—130, 195.) [E. B. J.]

PAREMBÖLE (Παρεμβόλη, Melet. Brev. p. 188; Parambale, It. Ant. p. 161; It. Hieros. p. 56., 96. A city of Epirus, on the borders of Aegypt and Aethiopia, and alternately attached to either kingdom. Parembole was situated between Syene and Taphis, on the left bank of the Nile, lat. 23° 40' N. In Roman times it was one of the principal fortresses of the southern extremity of the empire, and was usually occupied by a Roman garrison. At the boundary in Dioctelian's reign, Parembole was handed over to the Nabas, and was frequently assailed by the Blemmyes from the opposite bank of the river. (Procop. B. Pers. i. 19.) The ruins of its temples may still be seen at the village of Debot or Deboh. From the square enclosures of brick found there it would seem to have been a penal settlement for criminals as well as a regular station for soldiers. (Rosellin. Mon. del Culto, p. 189.) [W. B. D.]

PARENTIUM (Παρεντιούμ, Parenoia), a city of Ithria, on the W. coast of the peninsula, about 80 miles N. of Pula. (Plin. iii. 19. s. 23; Ptol. iii. 1. § 37; It. Ant. p. 271; Tab. Peut.; Anon. Rav. iv. 91.) From the mention of the name by Stephanus of Byzantium (s. v.) it is probable that it existed as an Ithrian town previous to the Roman settlement there. Pliny calls it an "oppidum civium Romanorum," and it would seem that it was already one of the most considerable towns in the province, though it did not gain the rank of a colony. But it is mentioned from inscriptions that it subsequently attained this rank under Trajan, at least the titles of Colonii Ulpra Parentium (Orell. Inscr. 72. 3729; Zumpt, de Colon. p. 402.) In common with the other cities of Ithria, its most flourishing period belongs to the close of the Western Empire.

The modern city of Parenoia is a small place, but retains its episcopal see, which dates from a very early period... [E. H. B.]

PARAGYETAE (Παραγιήται), a tribe who, according to Ptolemy (vi. 18. § 3), occupied part of the chain of the Parapamisus (Hindie Kish). There can be little doubt that they lived along what are now called the Solakas Kob, a great chain of mountains which extends nearly parallel from Cidrim to the Panjdeh. There is some doubt as to the correct orthography of their name; and it seems most probable that the real form is Paryyetae or Paryetas, which is also given by Ptolemy as the name of another portion of the chain of the Parapamisus. Both probably derive their name from this group of mountains. [V.]

PARIDION. [PARDION.]

PARIENNA (Παριέννα), a town of Germany, in the country of the Quadi, was probably situated on the river Waag, on the site of the modern Baren or Varis. (Ptol. ii. 11. § 29.) [L. S.]

PARI (Πάρι, Isidor. Mem. Paris. c. 17, ed. Müllcr), a town mentioned by Isidorus of Charax in Drangiana, or, as he calls it, Zarangiana. It has been conjectured by Forger that it is represented by the Modern Pora; Müller, however, thinks it is situated on the banks of the same river, on the site of the ancient city of Chamnion, which was said to have been founded by Thracian colonists, and was destroyed by the Gauls. (Rosellin. Mon. del Culto, p. 189.) [W. B. D.]

PARI (Παρί, Ptol. ii. 3. § 17), a British tribe dwelling on the NE. coast of Britannia Romana, and on the left bank of the Abus (Humber), consequently in the East Riding of Yorkshire. Their chief town was Petuaria (Πετυαρία, Ptol. l.c.), which is thought to be the same with the Praetorium of the Itinerary (pp. 464, 466), and whence there was a road through Humber (folk) to the Roman Wall. Respecting the site of Petuaria there have been many conjectures, and it has been variously identified with Beverley, Burgh, Audley, &c. [T. H. D.]

PARIISIL (Παραίσιλ), Lutetia.

PARIUM (Παρίμ, Euk. Παριμ), a coast-town of Mytilene on the coast of Thrace, on the west of Priapea in the district called Adraistera, from an ancient town which once existed in it (Strab. xiii. p. 588). Pliny, (v. 40) is mistaken in stating that Homer applied the name of Adraistera to Parium, and the only truth that seems to lie at the bottom of his assertion is that a town Adraistera did at one time exist between Priapus and Parium, and that on the destruction of Adraistera all the building materials were transferred to Parium. According to Strabo, Parium was a colony of Milesians, Erythraeans, and Parians; while Pausanias (ix. 27. § 1) calls it simply a colony of Erythrae. According to the common traditions, it had received its name from Parus, a son of Jason. (Esthath. ad Hom. Od. v. 135, ad Dion. Per. 517; Steph. B. a. e.) The harbour of Parium was larger and better than that of the neighbouring Priapus; whence the latter place decayed, while the prosperity of the former increased. In the time of Augustus, Parium became a Roman colony, as is attested by coins and inscriptions. It contained an altar constructed of the stones of an earthen temple; but has been removed to Parium; and this altar, the work of Hermocreon, is described as very remarkable on account of its size and beauty. Strabo and Pliny (vii.
PARMA.

2) mention, as a curiosity, that there existed at Pa-
rium a family called the Ophigenes ('Όφιγενεοι),
the members of which, like the Libyces Phyllis, had it in
their power to cure the bite of a snake by merely
touching the person that had been bitten. Parium
is also mentioned in Herod. v. 117; Xenoph. Anab.
vii. 2 § 7, 3 § 16; Ptol. v. 2 § 2; Appian, Mithrid.
76; Mela, i. 19; Polyaen. vi. 24. The present
town occupying the site of Parium bears the name of
Kemer or Kamaras, and contains a few ancient re-
 mains. The walls fronting the sea still remain, and
are built of large square blocks of marble, without
mortar. The cisterns in the acropolis serve for re-
 servoirs for water, and the fallen architraves of a por-
tico. The modern name Kamaras seems to be de-
 rived from some ancient subterraneous buildings
(καμάρας) which still exist in the place. (Walpole,
Turkey, p. 88; Seesthi, Num. Vet. p. 78.) [L. S.]

COIN OF PARIUM.

PARMA (Παρμα: Eth. Parmenias: Parmas), a
city of Gallia Cispadana, situated on the Via Aemilia,
as the distance of 19 M. P. from Regium Lepidum,
and 40 from Placentia. (Itin. Ant. p. 286.) It
was about 15 miles distant from the Padus, on the
banks of a small stream called the Parma, from
which it probably derived its name; and about 6
miles from the more considerable Taurus or Tarro.
We find no mention of the name before the establish-
ment of the Roman colony, though it is very pro-
bable that there already existed a Gaulish town or
village on the spot: in a. c. 183, after the com-
plete subjugation of the Boii, and the construc-
tion of the Via Aemilia, the Romans proceeded to
secure their footing in this part of Gaul by
establishing the colonies of Mutina and Parma, along
the line of the newly opened highway, which, in
connection with the two previously existing colonies
of Bononia and Placentia, formed a continuous chain
of Roman towns, from one end to the other of the
Via Aemilia. Parma was a "colonia civium," its
settlers retaining their privileges as Roman citi-
zens; it received in the first instance 2000 colonists,
each of whom obtained 8 jugera of land for his allotment.
(Liv. xxxix. 55.) We hear little of Parma for some
time after this: it is mentioned incidentally in a. c.
176, as the head-quarters of the consul C. Clau-
dius (Id. xli. 17); but appears to have suffered little
from the wars with the Gauls and Ligurians;
and hence rose with rapidity to be a flourishing
and prosperous town. But its name is scarcely men-
tioned in history till the period of the Civil Wars;
when it sustained a severe blow, having in a. c. 43
taken a prominent part in favour of the senatorial
party against M. Antony, in consequence of which it
was taken by that general, and plundered in the
most unsparing manner by his troops. (Cic. ad
Pom. x. 35, xl. 13, a., xii. 3, Phil. xiv. 3, 4.) Cicero
states that the town was restored to the senatorial
party by Antony, and can be no doubt but that it
still retained that rank; but under Augustus it received a fresh colony, from
which it derived the title of Colonia Julia Augusta, which we find it bearing in inscriptions. (Gruter, Insocr. p. 492. 5; Umbri, de Colon. p. 354.) Pliny
also styles it a Colonia, and there seems no doubt
that it continued under the Roman Empire to be, as
it was in the time of Strabo, one of the principal
towns of this populous and flourishing part of Italy.
(Plin. iii. 15. a. 20; Strab. v. p. 216; Ptol. iii. 1.
§ 46; Plhegon, Macrob. 1.) But its name is
scarcely mentioned in history; a proof that the
tranquillity that it enjoyed. Its territory was
celebrated for the excellence of its wool, which
according to Martial was inferior only to that of
Apulia. (Martial, xiv. 155; Colum. vii. 2. § 3.)

In a. d. 377, a colony of Goths was settled by order of
Gratian in the territory of Parma, as well as the
adjoining districts, as a proof that they were already suffering from a decay
of the population; and it is probable that it did not
escape the general devastation of the province
of Aemilia by Attila. But it survived these calamities;
it still bears a part as an important town during the
wars of Narses with the Goths and their allies, and
is noticed by P. Diaconus, as one of the wealthy
cities of Aemilia after the Lombard conquest.
(Aegag. &c. 1. 14—17; P. Diacon, Hist. Lang. ii. 18.)
It retained its consideration throughout the middle
ages, and is still a populous and flourishing place
with above 30,000 inhabitants, but has no remains
of antiquity, except a few inscriptions.
The Roman poet Catullus Parmennis would appear
from his name to have been a native of Parma,
but there is no distinct testimony to this effect.

The Itinerary (p. 284) mentions a line of cross-
road which proceeded from Parma across the Apen-
nines to Luca: this must have ascended the valley
of the Parma, or the adjoining one of the Tarus, as
far as the main ridge, and thence descended the
valley of the Macra to Luca. This passage,
throughout the valley, is one of the main lines of natural communication across
this part of the Apenines, and is in all probability
that followed by Hannibal on his advance into
Etruria. [E. H. B.]

PARMAECAMP1 (Παρμαεκάμπος), a tribe
of Southern Germany, on the east of Mount Abnoba
and the Danube; they probably occupied a dis-

[PARNASSUS (Παρνάσος) a town in the nor-
thern part of Cappadocia, on the right bank of
the Halys, and on or near a hill, to which it owed
its name, on the road between Ancyr and Arcelia,
about 68 miles west of the latter town. (Polyb.

PARNASSIUS MONS. [DELPHI.]

PARNES. [ATTICA, p. 391, seq.]

PARNON. [LACONIA, p. 109.]

PAROECOPOLIS (Παροικοπολίς, Ptol. iii. 13.
§ 90), a town of Sittike, in Macedon, on the right
side of the river Sittisi. It is said to be from
Saloniki to Seres, was either Tarraula (Ταρρα-
ύλα, Ptol. L. c.) or Paroecopolis, for these are the only
two towns besides Heraclea which Potemk
assigns to Sittike. If Nigerita be assigned to Tri-
stoma, Paroecopolis will be represented by Skaptechako,
which lies to the N. of the former town. (Leake,
Northern Mount Parnassus ii. p. 229.) [E. E. J.]

PAROLISSUM (Παρολισσός, or Papoulo-
λος, Ptol. iii. 8. § 6; Parolissos, Tab. Peut.; cf.
Orelli, Insocr. no. 8433), a municipal town of Dacia,
seated at the termination of the Roman road towards
the N. According to Marcul (iv. p. 316), on the
Macrosc, M. N. 4
above Wissemburg; according to Reichard, Nagy-
Bonyja.  

[ T. H. D. ]

PAROPAMISADAE (Παροπαμίσαδας or Παρ-
ωμίσαδας, Strab. xvi. p. 689, &c.; Dios. xvi. 62; 
Arrian, Adv. hel. v. 3.; Pol. vi. 18.; Paropamias, 
Mel. i. 2. § 5), the collective name of a number of 
small tribes who lived along the spurs of the great 
chain of the Paropamisus (Hindu Kish), and chiefly 
along its southern and eastern sides. The dis-
tRICT they inhabited, which was called generally 
Παροπαμίσαδων χώρα (Arrian, Adv. v. 3.), was 
besieged by the Paropamisae of Alcaeus, the Skiros, 
and Bactrians, on the E. by the Indus and Panjāb, and 
on the S. by Arachosia. It comprehended therefore 
the whole of Cabotātâ, and a considerable partial 
of Afghānistan. The two principal rivers of this 
district were the Dargameses (now Gori) and Co-
phen (Câbūl river). The population appears to 
have been a free independent mountain race, who 
never till the time of Alexander had been compelled 
to submit to a foreign ruler. During the Persian 
dominion of Asia, as the Paropamisae are not 
mentioned, it may be presumed that they remained 
unsubdued. Their chief tribes were the Bolti (
perhaps Cabotātâ, the inhabitants of Câbūl), the 
Amūr, and the Bactrians (Ptol. vi. 18. § 3). Their 
chief towns were: Oiro-
spanum (Câbūl), Alexandrea (perhaps Bamīdān), 
Gauza, and Capispa or Capusus. The valleys 
between the mountains, though exposed to great 
cold during the winter, were very fertile. (Strab. 
xxvi. p. 725; Curt. vii. 3. § 15.)

PAROPAMISUS (Παροπαμίσας, Strab. xv. 
p. 689.; Ptolemaeus, Pol. vii. 11. § 17; Pārōpam-
īsas, Arrian, Adv. v. 4. § 5.; Παροπαμίσας, 
Steph. B. s. v.; Paropamias, Mela, i. 15. § 2.; Pīlin. 
17. a. 30.), a great chain of mountains extending 
from about 67° 8. long. to 75° 8. long., and along 
33° N. lat., and forming the connecting link between 
the Western Caucasus and the still more eastern 
Imāns or Ḥindū Kish. The general modern name 
is Hindu Kish, but several of the most remarkable 
grains have their own titles; thus the great moun-
tains W. of Čâbūl are now called Koh-i-Babao, and 
those again N. of the Čâbūl river in the direction 
of Jejīlābād bear the title of Nishādah.

The altitude of these mountains, though not so 
great as that of the Hindū Kish, varies from 12,000 
and 18,000 feet. It is difficult to determine whence 
the Greeks obtained the name whereby they have 
recorded these mountains, or which is the best 
orthography to adopt. Yet it seems not unlikely 
that Ptolemy is the most correct, and that in the 
Greek Paropamias we have some traces of the San-
scrit Nishādah.

The ancient writers are by no means clear in 
their accounts of these mountains, and there is a 
perpetual confusion between the Taurus and the 
Caucasus. The reason of this no doubt is, that 
till the time of Alexander's invasion they were 
entirely unknown to the Greeks, and that then 
the officers who described different portions of 
this colossal range had the most confused and 
varied ideas. As the Persians considered the In-
dian chain as a continuation of the Taurus, and 
sometimes of the Caucasus. Thus Strabo, in one 
place, states that the Macedonians called all 
the mountains beyond Ariana eastward, Caucasus, 
but that among the barbarous people they bore severally 
the names of Paropamisus, Emodus, and Imāns (xi. p. 511); in another, he appears to consider the 
range which bounded India on the north to be the 

extreme end of Taurus, which extended to the 
Eastern Sea (iv. p. 689). Arrian appears to have 
thought that Taurus ought to have been the true 
naming of these, as he considers this great chain to 
extend across the whole of Asia from M. Mycale, 
which is opposite to Samos. (Adv. vi. 5.) But 
he adds, that it was named Caucasus by the Mace-
donian soldiers to gratify Alexander, as though, in 
passing into Sogdiana through Bactriana, he had 
crossed the Caucasus. Under the double name of 
Taurus and Caucasus, he states his belief that this 
chain united the whole continent of Asia, and all 
the rest of Asia. (L.c.) Again, in another place, he coincides with the description in Strabo, and asserts that the 
Indian names of Paropamisus, Emodus, &c., are 
local titles of the extended chain of the Taurus. 

(Ind. 2.) Other ancient authors agree more or 
less with these determinations: thus Mela gives 
the whole central chain from E. to W. the name of 
Taurus (1. 15. illi. 7); Curtius calls it Caucasus (vii. 3. § 19. viii. § 3); Pliny, enumerating 
the several groups from E. to W., gives the name of 
Caucasus to that portion W. of the Hindu Kish 
which connects the chain with the Caucasus and 
Taurus of Western Asia (vi. 17. s. 21); Ptolemy 
appears to have considered the Paropamias part 
of the Caucasus (vi. 18. s. 1); lastly, Strabo, 
speaking of the Ouxa, states that it derived its 
waters from the Caucasus (x. 46. xi. 32). It has 
been suggested that the present name of Hindu 
Kish is derived from Indicus Caucasus. [V.]

PAROPUS (Παροπός; Eth. Paropón), a town 
of Sicily mentioned by Polybius (l. 24) during 
the First Punic War that he states to have 
marked its site between Panormus and Thermea (Ter-
mini). It is not noticed by any of the geographers 
except Pliny, who mentions it in his list of the 
sidestriped towns of Sicily (Plin. iii. 8. s. 14); 
and in another passage (l. 8. § 92) speaks of the 
Island of Utica as lying contra Paropones. This 
is all the information we have to position it, and its 
exact site cannot therefore be determined. [E. H. B.]

PARORETAE. [Elias, p. 818, a.]

PAROBELA. [Megapolis, p. 309, 6]

PAROBEIA (Παροποβεία), a city of Thrace on the 
borders of Macedonia (Liv. xxxix. 27. xlii. 51), 
and is called by Stephana B. (s. v.) a city of Macedonia. 
Its inhabitants are mentioned by Pliny (iv. 10. a. 
1) under the name of Parovesi.

PAROBIA. [Phryg.]

PAROS or PARUS (Πάρος; Eth. Paros; Paro), 
an island in the Aegean sea, and one of the 
largest of the Cyclades, lies west of Naxos, from 
which it is separated by a channel about 6 miles 
wide. It was said to have been originally inhabited 
by Grecians and Arcadians, and to have received its 
name from Parus, a son of the Arcadian Parrhasius. 
(Callimach. ap. Steph. B. s. v.) It was also 
reported to have borne the names of Pactia, Deme-
trias, Zaczynthus, Hyléis, Minos, and Cabarnia. 
(Phot. III. 133, sq.; Ephorus, ap. Steph. B. 
s. v.) The Parians did not take part in the battle 
of Salamis, but kept aloof at Cythium, watching 
the course of events. (Herod. vii. 67. 7.) They ex-
PARRESIASIA. PARRHISIA. PARRHISIA, PARRHISIL. PARSICIC MONTES. PARRHISIA, PARRHISIL. [ARCADIA, p. 192, b.]

PARSI MONTES, a small chain of mountains in the western part of Gedrosia, beyond the river Arabres. Forbiger has conjectured that they are the same as the present Beshurd Mts. Connected doubtless with these mountains, and in the same district was the Paris of Potomax (vi. 21. § 5), which he Pliny a metropolis, an opinion of which Marcian assents (c. 24, ed. Müller), and another tribe whom Potomax calls the Parasai or Parsodai (vi. 21. § 4). It seems not unlikely that these are the same people whom Arrian calls Pasairae (Ind. c. 26) and Pliny Parsiae (vi. 23. a. 26). [V.]

PARRHASIL (Plin. vi. 18. a. 29), the name given by Pliny to the title of the rulers of the Calingae, who lived at the mouths of the Ganges. The last edition of Pliny by Sillig reads Protalas for the older form, Parthias. [V.]

PARTHANUM, a town in Bactria, on the road from Lagrescum to Velidiana, where, according to the Notitiae Imperii (in which it is called Parra-

dum), the first Bactrian cohort was stationed. (Plin. Ant. pp. 257, 275.) Its site is generally identified with the modern Partenikirchen. [L. S.]

PASCHENI PARDMYNN (Παρθηνίαν, Παρθηνία, Pardome, Strab. viii. p. 356). Appian, Ill. 1; Dion Cass. xlii. 49; Cic. eis P. 40; Pomp. Mela, ii. 3. § 11; Plin. iii. 26), a people of Grecian Illyricum, who may be placed to the N. in the neighborhood of Epidamnus, and, consequently, next to the Taulentii. They are often mentioned in the course of the war with Illyricum, c. 229, but as friends rather than foes of the Romans, being submitted to their arms. (Ptol. ii. 11; Liv. xxix. 12.) After the death of Philip, king of Macedon, they appear to have been added to the dominions of Ptolemaeus, an Illyrian prince allied to the Romans. (Ptol. xviii. 30; Liv. xxxix. 34, xlv. 30.) Their principal town was PARTHUS (Παρθός, Stephan. B. s. a.), which was taken by Caesar in the course of his campaign with Pompeia. (Cas. B. C. iii. 41.) In Leake's map the site is marked at Archegetas (>). The double-hilled Dimallum, the strongest among the Illyrian places, with two citadels on two heights, connected by a wall (Ptol. iii. 18, vii. 9), was within their territory. There is no indication, however, of its precise position, which, between Preus, Epidamnus and Eugenum and Bargium, the two other fortresses noticed by Livy (xxix. 12), nothing further is known. [E. B. J.]

PARDHENSIS. [HARPIA.]

PARDHENION (τὸ Παρθηνίαν Ἀρτύ), a mountain on the frontiers of Arcadia and Argolia, across which there was an important pass leading from Argos to Sparta (Strab. viii. 356). (Paus. viil. 8. § 4. Strab. viii. pp. 376, 389; Polyb. iv. 23; Liv. xxxiv. 26; Plin. iv. 6. a. 10.) It was sacred to Pan; and it was upon this mountain that the courier Phedippides said that he had had an interview with Pan on returning from Sparta, whither he had gone to ask assistance for the Athenians shortly before the battle of Marathon. (Herod. vi. 105; Paus. i. 28. § 4, viii. 54. § 6.) The pass is still called Parthénion, but the whole mountain bears the name of Róino. It is 3933 feet in height. (Leake, Morea, vol. ii. p. 329, seq.; Peloponnesica, p. 203.)

PARDNHEUM (Παρθηνός), a town in Myzia, in the south of Peg nonzero (Xenoph. Anab. viii. §§ 15, 21; Plin. vi. 33.) Its exact site has not been ascertained. [L. S.]

PARDNHEUM MARE (Παρθηνός κέτωας, Greg. Naz. Or. xix.), the eastern part of the Mare Internum, between Egypt and Cyperus. (Amm. Mar. xiv. 8. § 10; from which writer it also appears that it sometimes called the Isiaca Sea — " a vases (Aegyptas) Isiaceo digeritus est, quo quidam nominatur Parthenum," xii. 15. § 2.) [T. H. D.]

PARDYNIUS (Παρθηνός), the most important river in the west of Paphlagonia. It owes its Greek name probably to a similarity in the sound of its native appellations, which is still Bzurum-Se or Bzur-

tane; though Greek authors had that name from the fact that Artemis loved to bathe in its waters (Scurm. 226, f01) or to hunt on its banks, or from the purity of its waters. The river has its sources on mount Ogaesyas, and in its north-western course formed the boundary between Paphlagonia and Bithynia. It empties itself into the Euxine about 90 stadia west of Astrea. (Hom.
PARTHENOPH.

PARTHENOPH. [NEAR Ph.]  
PARTHIA (ς Παρθία, Strab. xi. pp. 514, 515, etc.; Παρθία, Polyb. x. 28; Steph. B. S.v.; Curt. v. 12; Παρθία Τ. Strab. vi. 5; Παρθία, Plin. vi. 15. s. 16), originally a small district of Western Asia, shut in on all sides by either mountains or deserts. It was bounded on the W. by Media Apourtemata, or the X. of Armenia and M. Cappadocia, and on the S. by Carmania Deserta, M. Par- 
chaothras, and Persia. It comprehended, therefore, the southern part of Khordis, almost all Kohistan, 
and some portion of the great S alt Desert. It was for the most part a mountainous and rugged district. 
The principal mountains were the Labus or Labutas (probably part of the great range now known as 
the Elbur Mts.), the Parchothras (or Khedem), and the Mazarumas. The few rivers 
which it possessed were little more than mountain streams, liable to violent and sudden floods on 
the melting of the snow, but nearly dry during the summer: the only names which have been recorded 
of mountain streams were for the most part the Bidas and the Chostrae. The principal 
divisions of the land were into Camisensa, on the north; Parthysne, to the SW of Camisensa, extending along the 
edge of the Caspian Sea, as far as the Caspian Gates, a district which some have supposed to have been 
the original seat of the population, and that from which the whole country derived its name; 
Chosarana, the upper E. of Armenia and M. Cappadocia, and for the most part a fruitful valley along 
the frontiers of Medias, Apsaracte, the S., and Tabione, along the borders of Carmania Deserta. There were no 
great towns in Parthia, properly so called, but his-
tory has preserved the names of a few which played an important part at different periods: of these, the 
best known are Nisibis, a town of the Parthians, and the chief town of the Parthians, and the royal residence of the dynas-
ty of the Arsacidæ, and Apamea, or Apamea in Xhagiana. 
Little is known of Parthian history at an early 
period; and it is probable that it was subject to the 
great empire of Persia, and subsequently to the first 
erscissors of Alexander, till the first Arsacids threw 
off the Byro-Macedonian rule, and established a native 
power on the throne of Parthia in n. c. 236. From this period it grew rapidly more powerful, till, 
the final decay of the house of the Seleucids, the 
Arachidan dynasty possessed the rule of the 
greater part of Western Asia. Their long wars with 
the Romans are well known: no Eastern race was 
able to make so effectual a resistance to the advance of 
the Romans, as the Parthian arms. The Romans con-
stancy and determination their natural freedom. 
The overthrow of Crassus, B. C. 53, showed what 
even the undisciplined Parthian troops could do 
when fighting for freedom. (Dion Cass. xi. 21.) 
Subsequent to this, the Romans were occasionally 
successful. Thus, in A. D. 34, Vonones was sent as 
a hostage to Rome (Tact. Annal. i. 12); and 
finally the greater part of the country was sub-
ded, successively, by the arms of Trajan, by 
Antoninus, and Caracalla, till, at length, the rise of 
the new Sasanian, or native dynasty of Persia, under 
the command of Araxeses I. put an end to the 
house of Arsaces (A. D. 220). Subsequent to this 
period there is a constant confusion in ancient 
authors between Persians and Parthians. The his-
tory of the Parthian kings is given at length in the 

The inhabitants of Parthia were called Parthae (Παρθα, Polyb. xii. 48; Strab. xvi. p. 509; Arrian, 
Anab. iii. 21; Poli. vi. 13. § 41) or Parthi (Παρθες, 
Herod. iii. 93; Strab. xvi. p. 524; Plin. vi. 25. s. 28; 
Amm. Marc. xxii. 6), and were, in all probability, 
one of the many branches of the great Indo-Germ-
manic family of nations. Their own tradition (if, 
indeed, faithfully reported) was that they came out 
of Scythia, Pliny was famous on this subject, that Parthian 
speak the worst exile in the Scythian tongue. (Justin, xi. 1.) 
Herodotus, too, classed them with the people of 
Chorasmia and Sogdiana (iii. 91, 576); and Strabo 
admits that their manners resembled those of 
the Scythians (xi. p. 515). On the other hand, modern 
research has demonstrated their direct connection with 
the Iranian tribes; their name is found in the Zend 
as Pard, in the Sanscrit Parnawa. (Benfey, 
Review of Wilson's Arabia, Berl. Jahrb. 1842, No. 107.) According to Strabo, who quotes Posidonius as 
his authority, the Parthians were governed by a double 
council, composed of the nobles or relatives of the 
king (according as the reading συνενωσε double) 
and of the Magians (xi. p. 515). As a matter of 
fact, these were famous for their skill in the 
management of the horse and for their use of the 
bow (Dion Cass. xii. 15. 28; Dionysius 1045; Plat. 
Crass. c. 24), and for the peculiar art which they 
practised in shooting with the bow from horseback 
when retreating. This peculiarity is repeatedly 
noticed by the Roman poets. (Virg. Georg. iii. 31; 
Horat. Carm. i. 15. 11; ii. 18. 17; Ovid. Art. Am. 
209.) In their treatment of the kings and 
nobles they were considered to carry their adula-
tion even beyond the usual Oriental excess. (Virg. 
Georg. iv. 211; Martial, Epigr. x. 72, 1—5.) [V.] 
PARTHI.[N.] [PARTHENI.] 
PARTHUM (Παρθουν or Παρθον, Appian, Pm. 
viii. 39), a town in the jurisdiction of Carthage, in 
the northern part of Africa. [T. E. B.] 
PARTHUS, in Illiricum. [P. T. REN.] 
PARUS. [P. R.] 
PARU'TAE (Παρομητα, Polyb. vi. 17. § 3), a tribe 
placed by Ptolemy on the outskirt of the Pay-
ramians in Aria. It is probable that these people 
derive their name from the Sanscrit Paro, mean-
ing mountain tribes. [V.]

PARYADRES (Παραγδρες, Παραγδρες, or Πα-
ραδρες), a range of lofty and rugged mountains in 
the north of Pontus, which is connected with Mount 
Taurus and Mount Caracausus (Strab. xi. p. 497, 
ii. p. 548; Plin. vi. 27, vi. 9, 11). It commences 
at the western extremity of the Montes Moschici, 
proceeds in a south-western direction round Pontus, 
and forms the frontier between Armenia and 
Cappadocia. A more southern branch of the same 
mountain is the Scoedises. Ptolemy (v. 13. §§ 5, 9) 
describes this mountain as containing the sources 
of the Euphrates and Araxes, and accordingly includes 
within its range Mount Abus, from which others 
make those rivers flow. The Paryadres contains 
the sources of only small rivers, of which the largest is 
the Abas. The mountain was in ancient times 
covered with wood, and the population 
upon and about it consisted of robbers (Strab. xii. p. 548). 
Many parts of the mountain are extremely rugged, 
and almost inaccessible, whence Mithridates of 
Pontus built many of his treasure-houses there, and
PARTYTAE.

when pursued by Pompey, concealed himself in its fastnesses. In a climatic point of view the mountain divides Pontus into two distinct regions; for while the north side is stern and cold, its southern side is delightfully warm. Hence the ancients called the point of transition a pass between Trapezus and Satate, the Frigidarium. The modern name of the mountain is generally Kuttay, but it is also called Kuru Bel. (Tourn.ford, Voyage i. lettere 18. p. 107.)

PARTYTAE. [PARYTAE.]"}

PASA'RGADAE (Πασάργαδας), according to Hrodotus, one of the three chief tribes of the ancient Persians (ι. 125); according to other writers, a people of the adjoining province of Carmania (Ptol. vi. 8. § 12; Dionys. v. 1069). The probability is, that they were the inhabitants of Pasargadæ in Persia.

PASA'RGADÆ (Πασάργαδας, Strab. xv. 730), a great city of the early Persians, situated, according to the best authorities, on the small river Cyrus (now Kehr), in a plain on all sides surrounded by mountains. It contained, according to Strabo, a palace, the treasuries, and other memorials of the Persian people, and though not so magnificent as Persepolis was highly esteemed by the antiquaries of antiquity (v. 728). In another place the same geographer states that the most ancient palace was at Pasargadæ; and in its immediate neighbourhood, the tomb of Cyrus, who had a regard for the spot, for that on which he finally overthrew Astyages the Mede (xv. 730). It is by the notice of the tomb of Cyrus in Strabo (x. c.), and more fully in Arrian (vi. 26, 30) that we are now enabled to identify the site of the ancient Pasargadæ with the modern Murgab. At Murgab a building has been noticed by many modern travellers, and especially by Morier and Ke Porter, which corresponds so well with the description in ancient authors that they have not hesitated to pronounce it the tomb of Cyrus; and the whole adjoining plain is strewed with relics of the once great capital. Among other monuments still remaining is a great monolith, on which is a bas-relief, and above the relief, in cuneiform characters, the words "I am Cyrus, the king, the Achaemenian." The same inscription is found repeated on other stones. (Morier, Travels, i. p. 30, pl. 29; Ke Porter, Researches in Persia, p. 149; Burnouf, Mémoires, p. 169; Ouseley, Travels, ii. pl. 49.) The name of the place is found in different authors differently written. Thus Pliny writes "Pasargadae " (vi. 26. a. 29), Piolomy "Pasargadae " (vi. 4. § 7). Sir W. Ouseley (l. c.) thinks that the original name was Parnagardia, the habitation of the Persians, on the analogy Dacian, Frisian, Erci, etc.

PASIDA (Πασίδα), a small port on the coast of Caramania, mentioned by Marcian (Peripl. § 38). Forbiger thinks that it is the same as that called in some editions of Poleney Magida, in others, Masin (vi. 8. § 7). [V.]

PASINUM, PASINUS. [LAVINIA.] (v. Arates, Arrian, ind. c. 25), a place mentioned by Arrian in Gedrosia, as touched at by Nearcirus in his voyage. It is doubtful whether it is to be considered as distinct from another place he has mentioned just before, Bagisara. Kempthorne has identified the latter with a locality now known by the name of Arasab or Hormasab bay, and thinks that a large fishing village in the immediate neighbourhood may be that called by Nearcirus, the inhabitants of which were called Pa{irae or Pairees. Pliny places the Pa{irae along the river Tomeron or Tomeirus. (vi. 25. a. 27.) Nearcirus, however, makes the Tomerus flow at a distance of 900 stadia from Pasira. It is probable that the Rhagarian of Piolomy refers to Bagisarha or Pasira (vi. 21. § 2).

PASITIGRIS. [TORM.]"}

PASSALAE (Πασαλάς, Ptol. vii. 2. § 15), a tribe in India extra Gangem, placed by Piolomy between the Inaus and the M. Depryrus. They must therefore have occupied some of the main valleys on the eastern side of Tibet. Pliny mentions them also (vi. r. a. 22).

PASSARON (Πασαρὸν), the ancient capital of the Molossi in Epeirus, where the kings and assembled people were accustomed to take mutual oaths, the one to govern according to the laws, the other to defend the kingdom. (Plin. Persic. 6.) The town was taken by the Roman praetor L. Anicius Gallus in a. 167. (Liv. xiv. 26, 33, 34.) Its site is uncertain, but it was apparently on the sea-coast, as Anna Comnena mentions (vi. 5. p. 284, ed. Bonn) a harbour called Passara on the coast of Epeirus. If this place is the same as the modern Patsos, at the mouth of a bay, which its inland in a SSW. direction from Ionina, cannot be that of the ancient capital of the Molossi. These ruins are very considerable, and contain among other things a theatre in a very fine state of preservation. (Leake, Northern Greece, vol. iv. p. 81.)

PATARA. [ΠΑΤΑΡΑ.] "Εθ. Παταρεύς, Patareus or Patarus. 1. A small town in Cappadocia or Armonia Minor. (Tab. Peut.)

2. A flourishing maritime and commercial city on the south-west coast of Lycia. The place was large, possessed a good harbour, and was said to have been founded by Patarus, a son of Apollo. (Strab. xiv. p. 666; Steph. B. s. a.) It was situated at a distance of 60 stadia from the mouth of the river Xanthus. (Stadium, Mag. Mag. § 219.) Patarus was most celebrated in antiquity for its temple and oracle of Apollo, whose renown was inferior only to that of Delphi; and the god is often mentioned with the surname Patarus (Παταρεύς, Strab. L. c.; Lycop. 920; Horat. Carm. iii. 46. 64; Stat. Theb. iii. 295; Ov. Met. 515; Virg. Aen. iv. 143; Pomp. Mela, i. 15.) Hrodotus (1. 182) says that the oracle of Apollo was delivered by a priestess only during a certain period of the year; and from Servius (ad Aen. L. c.) we learn that this period was the six winter months. It has been supposed that the town was of Phoecean or Semitic origin; but whatever may be thought on this point, it seems certain that at a later period it received Dorian settlers from Crete; and the worship of Apollo was certainly Dorian. Strabo informs us that Piolomy Philadelphus of Egypt, who enlarged the city, gave it the name of Arinose, but that it nevertheless continued to be called by its ancient name, Patarus. The place is often noticed by ancient writers as one of the principal cities of the Lycians, although it is on the border between Caria and Lycia. (Ptol. viii. 15—17, xxxvii. 39; Polyb. xxii. 26; Cic. p. Flacc. 32; Appian, B. C. iv. 53, 81; Mith. 27; Plin. ii. 112, v. 28; Plut. v. 3. § 3; viii. 17. § 22; Dio. Per. 129, 507. Patarus is mentioned among the Lycian bishoprics in the Acts of Councils (Hieroc. p. 664), and the name Paterus is still attached to its numerous ruins. These, according to the survey of Capt. Beaufort, are situated on the sea-shore, a little to
PATAVIUM.

Lacedaemonian, who in n. c. 301 landed at the mouth of the Medusa, but was attacked by the Patavians, and the greater part of his forces cut off. (Liv. xii. 2.)

It was doubtless their continual hostility with the Gauls that led the Venetians to become the allies of Rome, as soon as that power began to extend its arms into Cisalpine Gaul. (Pol. ii. 23.)

No special mention of Patavium occurs during the wars that followed; and we are left to infer from an inscription (in the basilica), found near the town, that it passed gradually under the dependence and protection of Rome, till it ultimately became an ordinary municipal town. In n. c. 174 it is clear that it still retained at least a semblance of independence, as we hear that it was distracted with domestic divisions, which the citizens appealed to Rome to pacify, and the consul M. Aemilius was selected as deputy for the purpose. (Liv. xii. 27.) But the prosperity of Patavium continued unbroken; for this it was indebted as much to the manufacturing industry of its inhabitants as to the natural fertility of its territory. The neighbouring hills furnished abundance of wool of excellent quality; and this supplied the material for extensive woollen manufactures. The ancient town must have been the scene of the trade of Patavium, that city supplying Rome in the time of Augustus with all the finer and more costly kinds of carpets, hangings, &c. Besides these, however, it carried on many other branches of manufactures also; and so great was the wealth arising from these sources that, according to Strabo, Patavium paid a large part of the war tribute. (ii. 4. 9.)

Besides, this, it traded with many other countries, among others with Patara; Spratt and Forbes, Travels in Lycia, i. p. 31, foll.

PATAVIIA (PATERUMA, Ptol. iii. 8. § 7, wrongly), a small town of Dacia, endowed by the emperor Severus with the jus coloniae. (Ulpian, Dig. i. 8, 9, where it is called Patavaciumus vicus.)

Vulcanus, in the line of the Via Emilia, lies near to the River Po. (II. v. 13.) Pataia (Patavium), in the line of the road from Verona to the town of the ancient city Tauria.

PATAVIUM (Heronotaur: Eth. Patavinius: Patavina: Pataveti, one of the most ancient and important cities of Venetia, situated on the river Medusa (Brenta), about 30 miles from its mouth. According to a tradition recorded in Virgil, and universally received in antiquity, it was founded by Antenor, who escaped thither after the fall of Troy; and Livy, himself a native of the city, confirms this tradition, though he does not mention the name of Patavium, but describes the whole nation of the Veneti as having migrated to this part of Italy under the guidance of Antenor. He identifies them with the Veneti, who were considered as a Sclavonian tribe. (Livy i. 1; Virg. Aen. i. 247; Strabo v. 212; Mal. ii. 4. § 2; Solin. 2. § 10.) The national affinities of the Veneti are considered elsewhere [VENETI]. The story of Antenor may safely be rejected as mythical; but we may infer from the general accordance of ancient writers that Patavium itself was a Venetian city, and apparently from an early period the capital or chief place of the nation. We have very little information as to its history, before it became subject to Rome, and we know only the general fact that it was at an early period an opulent and flourishing city; Strabo even tells us that it could send into the field an army of 120,000 men, but this is evidently an exaggeration, and probably refers to the whole nation of the Veneti, of which it was the capital. (Strab. v. 212.) Whatever was the origin of the Veneti, there seems no doubt they were a people far more advanced in civilisation than the neighbouring Gauls, with whom they were on terms of almost continual hostility. The vigilance rendered necessary by the incursions of the Gauls stood them in stead on occasion of the unexpected attack of Clunyus, the eastward of the river Xanthus, and consist of a theatre excavated in the northern side of a small hill, a ruined temple on the side of the same hill, and a small circular appearance which may have been the seat of the oracle. The town walls surrounded an area of considerable extent; they may easily be traced, as well as the situation of a castle which commanded the harbour, and of several towers which flanked the walls. On the outside of the walls there is a multitude of stone sarcophagi, which in all the inscriptions, his honorific titles, are inscribed, open and empty; and within the walls, temples, altars, pedestals, and fragments of sculpture appear in profusion, but ruined and mutilated. The situation of the harbour is still apparent, but at present it is a swamp, choked up with sand and bushes.” (Beaufort, Hibernia, pp. 2, 6.) The theatre, of which a plan is given in Scule’s Asia Minor (p. 330), was built in the reign of Antoninus Pius; its diameter is 256 feet, and has about 30 rows of seats. There are also ruins of thermae, which, according to an inscription upon them, were built by Vespasian. (Comp. Sir C. Fellows, Tour in Asia Min. p. 232, foll.; Disc. in Lycia, p. 179, foll.; Texier, Description de l’Asie Mine. which contains numerous representations of the ancient city of Patara; Spratt and Forbes, Travels in Lycia, i. p. 31, foll.) [L.S.] PATAVIIA (Hieronotaur: Eth. Patavinius: Patavina: Pataveti, one of the most ancient and important cities of Venetia, situated on the river Medusa (Brenta), about 30 miles from its mouth. According to a tradition recorded in Virgil, and universally received in antiquity, it was founded by Antenor, who escaped thither after the fall of Troy; and Livy, himself a native of the city, confirms this tradition, though he does not mention the name of Patavium, but describes the whole nation of the Veneti as having migrated to this part of Italy under the guidance of Antenor. He identifies them with the Veneti, who were considered as a Sclavonian tribe. (Livy i. 1; Virg. Aen. i. 247; Strabo v. 212; Mal. ii. 4. § 2; Solin. 2. § 10.) The national affinities of the Veneti are considered elsewhere [VENETI]. The story of Antenor may safely be rejected as mythical; but we may infer from the general accordance of ancient writers that Patavium itself was a Venetian city, and apparently from an early period the capital or chief place of the nation. We have very little information as to its history, before it became subject to Rome, and we know only the general fact that it was at an early period an opulent and flourishing city; Strabo even tells us that it could send into the field an army of 120,000 men, but this is evidently an exaggeration, and probably refers to the whole nation of the Veneti, of which it was the capital. Fellows, Tour in Asia Min. p. 232, foll.; Disc. in Lycia, p. 179, foll.; Texier, Description de l’Asie Mine. which contains numerous representations of the ancient city of Patara; Spratt and Forbes, Travels in Lycia, i. p. 31, foll.)
PATAVIIUM. was the birthplace also of Thrasæus Patas, who was put to death by Nero in A. D. 66. One of the causes of offence which he had given was by assisting as a tragedian in certain games, which were celebrated at Patavium every 30 years in honour of Antoninus, a custom said to be derived from the Trojan founders of the city. (Tac. Ann. xvi. 21; Dion Cass. ix. 26.) We learn also from Livy the story of the famous foundation of the city by the Spartan Cleonymus was preserved by an annual mock fight on the river which flowed through the midst of the town. (Liv. x. 2.) [E. H. B.]

PATERINIUM. (Parsenia), a town of Bithynia on the south of Lake Ascania, between the Sinus Astacanus and the Sinus Clarius. (Pol. v. 1. § 12.)

PATERNUN, a town on the E. coast of the Bruttian peninsula, mentioned only in the itinerary of Antoninus (p. 114); from which we learn that it was situated 27 miles from Boscanum (Rosano), probably in the neighbourhood of the Capo dell' Aíce, the ancient Cape Crimissa; but the supposition that it was the same place with the more ancient city of Crimissa is a mere conjecture; as is also its identification with the modern town of Cirò.

The name of Paternum again occurs in early ecclesiastical records as the see of a bishop, but afterwards wholly disappears. (Holsten. Not. ad Chro. p. 307; Romanelli, vol. i. p. 213.) [E. H. B.]

PATHCIES. (Timiscus.)

PATIGRAN. Ammian (Hist. xvi. 6.), one of the three principal towns mentioned by Ammianus Marcellinus in Media. This place is nowhere else noticed; but it is not impossible that the name is a barbarous corruption of the Tigrana of Pontus (vi. 2. § 9).

PATMOS (Nýrpos: Patmo), one of the Sporades Insulae, in the south-east of the Aegean, to the west of Lep sia and south of Samos, is said to have been 30 Roman miles in circumference. (Pliny, iv. 23; Strab. x. p. 488; Thucyd. iii. 23; Eustath. ad Dion. Per. 350.) On the north-eastern side of the island there was a town with a harbour of the same name as the island, and the southernmost point formed the promontory Amazonus (Stadion. Mar. Mag. p. 488, ed. Hoffmann). This little island is celebrated as the place to which St. John was banished towards the close of the reign of Domitian, and where he is said to have composed the Apocalypse (Rev. i. 9). A cave is still shown in Patmos where the apostle is believed to have received his revelations. (Comp. Iren. i. 22; Euseb. Hist. Eccl. iii. 18; Dion Cass. viii. 1.) The island contains several churches and convents, and a few remains of the ancient town and its castle. (Walpole, Turkey, tom. ii. p. 48; Ross, Reisen auf dem Griech. Inseln, vol. ii. p. 123, foll.)

PATRAE. (Póras); in Herod. i. 145, Parpées, properly the name of the inhabitants: Ec. Pórepév, Thuc.; Parpásès, Pol. iv. 6; Patrænsis: Patrassó, Patras, Patra), a town of Achaia, and one of the twelve Achaean cities, was situated on the coast, W. of the promontory Rhium, near the opening of the Corinthian gulf. (Herod. i. 145; Pol. ii. 41; Strab. viii. p. 386.) The town was built on the south side of Mount Panachæus (Voidié), which rises immediately behind it to the height of 6322 feet. It is said to have been formed by an union of three small places, named Areô (Aro), Anthia (Anthia), and Messasta (Médrías), which had been founded by the Ionians, when they were in the occupation of the country. After the expulsion of the Ionians, the Achaean hero Patras withdrew the inhabitants from Anthia and Messasta to Areô, which he enlarged and called Patrae after himself. The acropolis of the city probably continued to bear the name of Areô, which was often used as synonymous with Patras. Strabo says that Patrae was formed by a coalescence of seven demes; but this statement perhaps refers to the restoration of the town after the restoration of the Carian territory, viii. 18. § 9, seq.; Strab. viii. p. 387.) In the Peloponnesian War Patrae was the only one of the Achaean cities which espoused the Athenian cause; and in a. o. 419, the inhabitants were persuaded by Aeolians to connect their city by means of long walls with its port. (Thuc. v. 52; Plut. Ale. 15.) After the death of Alexander the city fell into the hands of Cassander, but his troops were driven out of it by Aristodemus, the general of Antigonus, a. o. 314. (Diod. xix. 66.) In a. o. 280 Patrae and Dyrræ were the first two Achaean cities which expelled the Macedonians, and their example being shortly afterwards followed by Tritea and Pharsë, the Achaean League was renewed by these four towns. [See Vol. i. p. 15.] In the following year Patrae was the only one of the Achaean cities which sent assistance to the Aeolians, when their country was invaded by the Gauls. In the Social War Patrae is frequently mentioned as the port of which Philip landed in his expedition into Peloponnesus. In the war between the Achaean and the Romans Patrae suffered so severely that the greater part of the inhabitants abandoned the city and took up their abodes in the surrounding villages of Messastas, An-
PATRÆ.

The country around Patras is a fine and fertile plain, and produces at present a large quantity of currants, which form an article of export. The modern town occupies the same site as the ancient city. It stands upon a low hill, and is built on the top of a large S. of the promontory Rhium. (Paus. vii. 28. § 1.) Patras continued an insignificant town down to the time of Augustus, although it is frequently mentioned as the place where persons landed going from Italy to Greece. (Cic. ad Fam. vii. 38. xvi. 1. 5. 6. ad Att. v. 9. vii. 2.) After the battle of Pharsalia (A.D. 48) Patras was settled by the exiles of Corinth, but shortly afterwards surrendered to Callena, Caesar's lieutenant. It was here also that Antony passed the winter (32—31) when preparing for the war against Augustus; and it was taken by Agrippa shortly before the battle of Actium. (Dion Cass. xii. 13. 14. l. 9. 13.) It owed its restoration to Augustus, who restored after the battle of Actium to establish two Roman colonies on the western coast of Greece, and for this purpose made choice of Nicopolis and Patras. Augustus colonised at Patras a considerable body of his soldiers, again collected its inhabitants from the surrounding villages, and added to them those of Rhypes. (Paus. vii. 18. § 7. Phil. iv. 5.) He not only gave Patras dominion over the neighbouring towns of the promontory Rhium (Paus. vii. 22. § 1.) Dyrrhachium (Paus. vii. 17. § 5.) Tritae (Paus. vii. 23. § 6.), but even over Locria. (Paus. x. 38. § 9.) On coins it appears as a Roman colony with the name of Colonias Augustæ Arvæ Patraenis. Strabo describes it in his time as a populous place with a good anchorage, and Pausanias has devoted four chapters to an account of its public buildings. (Strab. viii. p. 494.; Bickh. Inscr. vol. ii. p. 163. n. 2187. Klapreth. Nemet. Journal Asiatique, vol. i. pp. 67, 290.; Uebert, vol. iii. pt. ii. p. 488.)

COIN OF PATRÆ.

the East, or land of the Ganges; or, mythologically, the Lower Regions (Ritter, p. 476). [V.]

PATTALENE (Παττάληνη), Strab. vi. pp. 691, 701; Patala, Palaus, Πατάλα, Ptol. vii. i. § 55; Patala, Plin. vi. 20, 21, 23), the delta-shaped district comprised by the arms of the Indus, and extending from its capital Pattala (now Tata) to the Indian Ocean. It was a very fertile, flat, marshy country, liable to be constantly overflowed by the waters of the great river. The ancients gave, on the whole, a tolerably accurate estimate of the size of this delta, Aristobulus stating that it was 600 stadia in one arm of the Indus, and Nearchus considering the distance to be 800 stadia; they, however, greatly exaggerated the width of the river, at its point of separation, Oneiscirucus deeming this to have been as much as 200 stadia (Strab. vi. p. 701). We may presume this measure to have been made during a time of flood. By Marcian, Pattalene is comprehended in Gedrosia; but there seems reason to suspect that the present text of Marcian has been tampered with (c. 34, ed. Müller, 1855). Arrian does not distinguish between the town and the district of which it was the capital, but calls them both indiscriminately Patala (Anab. v. 3). The district probably extended along the coast from the present Karwalsk on the W. to Chach on the E. [V.]

PATUMUS (Πάτομος, Herod. ii. 159), a town of Arabia, on the borders of Egypt, near which Necho constructed a canal from the Nile to the Arabian Gulf. It is probably the Pithom of Scripture (Exod. i. 11), not far from Bubastis, and near the site of the present Belbay. [T. H. D.]

PAULO (Παύγλωνε, a river of Liguria, rising in the Maritime Alps, and flowing into the sea staidis the walls of Nicea (Nico). (Plin. iii. 5. a. 7; Mel. ii. 4. § 9.) It is now called the Paglione, and is a considerable mountain torrent in winter and spring. [E. H. B.]

PAUS. [CLERTON]

PAUSILYPUS MONS. [NAPOLITAN, p. 410.]

PAUSILYPUS MONS. [NAPOLITAN, p. 410.]

PAUSTUS (Παύστος, Pausilipos), a town of Sicily.

PAXI (Πάξι, the name of two small islands, now called Paxi and Antipaxi, situated between Corcyra and Leucasia. (Polyb. ii. 10; Plin. iv. 12. a. 15; Dion Cass. i. 12.)

PEDEKIONIUS (Πεδεκιόνιος), a place mentioned by Homer (Il. xii. 179), which is said by Eustathius to have been a town in Troas; but it is otherwise entirely unknown. [L. S.]

PEDEIA, a place on the coast of Cilicia, between Pinara and Alea, is mentioned only by Pliny (v. 29), and its exact site is unknown. [L. S.]

PEDEM LABONUM, a promontory in the south-eastern coast of the island of Sicily, to the south of the western coast of the Sinus Glausus. (Pomp. Mela, i. 16; Plin. v. 29; Stadi. Mar. Magn. §§ 236, 233, 234.) Strabo (xiv. p. 651) gives to the same promontory the name of Artemisium, from a temple of Artemis, which stood upon it; its modern name is Bokosmadi. (Leake, Asia Minor, p. 235, fol.)

PEDESUS (Πέδεςος), also called PEDASUS (Plin. v. 29), an ancient city of Caria, in which the Persians suffered a defeat during the revolt of the Ionians. (Herod. v. 121, vi. 20.) It was now the chief seat of the Leleges. Alexander the Great deprived the place of its independence by giving it over to the Halicarnassians, together with five other neighbouring towns. (Plin. l. c.) In the time of Strabo (xiii. p. 611) the town had ceased to exist, and the name of the district, Pedesia (Πεδεσία), was the only remaining memorial of the place. (Comp. Polyb. xviii. 27; Steph. B. s. s.) As Herodotus assigns to Pedessa a portion of the territory of Melius, it is clear that the town must have been situated between the Halicarnassian and the Lelegian territory; but its exact site is still only matter of conjecture, some placing it at the modern Melas, and others at Arabi Hisar, neither of which suppositions is free from inconsistencies. [L. S.]

PEDASUS (Πέδεςος), a small town of Mylas, on the river Satricias, which is mentioned by Homer (Il. vii. 35), was a fastness of the Persians, and at the time of Strabo (xiii. p. 605), who (p. 584) mentions it among the towns of the Leleges, which were destroyed by Achilleus. (Comp. Steph. B. s. e. Plin. v. 32) Pliny (v. 32) conceives that Pedesus was the same place as that which subsequently bore the name of Adramyttium; but as Homer distinctly places it on
the river Salmoeis, the supposition is impossi-

[LI. S.]

PEDASUS. [Methone.]

PEDIAEUS (Πεδιαίος), the largest river of Cy-

prus, rising from the eastern side of Olympus, and

flowing westward, it finally unite into the same. (Ptol. v. 14. § 3; 

Engel, Kypros, vol. i. p. 37.)

PEDIEIS (Πεδιές), the inhabitants of one of the

Phocian towns destroyed by Xerxes. (Herod. 

viii. 38.) From the order in which it stands in the

enumeration of Herodotus, it appears to have stood

near the Cephissus, in some part of the plain be-

tween Mount Olympos and Mount Eetia, and perh-

haps represented by the ruins at Palaik Fvra. (Leake, 

Northern Greece, vol. ii. p. 89.)

PEDNELLUS (Πεδνέλλους), a town in the

Interior of Pisidia, near the Erymeon, above Aspin-

dus (Strab. xii. p. 370; xiv. p. 667; Stephan. B. s. v.; 

Ptol. v. § 8.) Hierocles (p. 681), giving a

greater extension to Pamphylia, assigns the town to

this province. The town formed a small state by

itself, but was always involved in war with the

neighbouring Selge. (Polyb. v. 72, &c.) It is

also mentioned in the ecclesiastical annals and on

coins. (Sestini, p. 96.) Fellows (Asia Minor, 

p. 196, &c.) is inclined to identify the extensive

ruins near the village of Sokkades, with the anci-

terior Pedicles; but on its standing on a narrow tongue of land

projecting between two narrow valleys or ravines with

lofty and precipitous banks; but, from the pecu-

liar nature of the country, this province almost

exactly resembles that of Zagareolo and other nei-

bouring places. No ruins exist at Gallicano; and

from the early decay of Pedum we can hardly expec-

to its ever being of any importance. It was never

really set at rest. Gallicano is 44 miles from 

Palestrina (Præneste), and about the same distance

from La Colonna (Labicum); it is about a

mile on the left of the Via Praenestina, and 19 miles

from Rome. (Cluer, Ital. p. 966; Gell, Top. 

Abeken, Mittel Italien, p. 14.)

PEGAE or PAGAE (Πεγαῖ, Dor. Πεγαῖ; Ἑθ. 

Παγαῖοι), a town of Megaris, on the Alcyonian or 

Corinthian gulf. It was the harbour of Megaris on 

the western coast, and was the most important place 

in the country next to the capital. According 

to Strabo (viii. p. 334) it was situated on the nar-

rowest part of the Megarian isthmus, the distance 

from Pagae to Nissa being 120 stadia. When the 

Megarians joined Athens in a. c. 455, the Athenians 
graciously Pegas, and its harbour was service of 
to them in sending out an expedition against the 
northern coast of Peloponnesus. (Thuc. i. 103, 111.)

The Athenians retained possession of Pegas a short 
time after Megara revolted from them in a. c. 454; 
but, by the thirty years treaty made in the same 
year, they surrendered the place to the Megarians. 
(Thuc. i. 114, 115.) At one period of the Pel-

oponnesian War (a. c. 424) we find Pegae held by 
the aristocratical exiles from Megara. (Thuc. iv. 
66.) Pegas continued to exist till a late period, 
and under the Roman emperors was a place of suffi-
cient importance to be besieged by money. Strabo 
(viii. p. 380) calls τὰς τεῖχος Μεγαρικὴς Ἑγάλα 
Pausanias saw there a chapel of the hero Aigaleos, 
who fell at Glissa in the second expedition of the 
Argives against Thebes, but who was buried at this 
place. He also saw near the road to Pegae, a rock 
covered with marks of arrows, which were supposed 
to have been made by a body of the Persian cavalry
of Mardonius, who in the night had dischargeth their arrows at the rock under the impulse of Artemis, mistaking it for the enemy. In commemoration of this event, there was a brazen statute of Artemis Soteira at Pegae. (Paus. i. 44. § 4.) Pegae is also mentioned in the following passages—Strab. ix. pp. 400, 409; Paus. i. 43. § 8; Ptol. iii. 15. § 6. Strabo, however, loc. cit.; Mela, iii. 3. § 10; Plin. iv. 7. s. 11; Hieroc. p. 645; Tab. Peut, where it is called Pachy. Its site is now occupied by the port of Faisth, not far from the shore of which are found the remains of an ancient fortress. (Leake, Northern Greece, vol. ii. p. 407.)

PEGASEUM STAGNUM, a small lake in the Cystarian plain near Ephesos, from which issue the little river Phryrites, a tributary of the Cystaros. (Plin. v. 31.) The district surrounding the lake is at present an extensive morass. (Comp. Arndell, Seven Churches, p. 23, &c.) [L.S.]

PEIUM (Πηῖον), a fortress of the Tolistobogii, in Gelaia, where Deiotaurus kept his treasures. (Strab. xii. 537.)

PHELAGONIA (Πηλαγονία, Strab. vii. pp. 336, 337; Πηλαγονία, Steph. B.), a district of Macedonia, bordering on Illyricum, occupied by the PELAGONIANS (Πηλαγονῖοι, Strab. vii. pp. 327, 331, Fr. 38—40, 454; Ptol. iii. 13. § 34; Plin. iv. 17.). Although Livy employs the name of Pelagonia, corresponding with the fertile plains of Biblos, in his narrative of the campaigns of Sulpicius, as that of a large district containing Strymbara, it is evident, from his account of the division of Macedonia after the Roman conquest, that Pelagonia became the appellation of the chief town of the Pelagonians, and the capital of the Fourth Macedonia, which included all the primitive or Upper Macedonia E. of the range of Pindus and Scænum. Strabo indeed was perhaps not very specically employed as the name of a town until the other two cities of Pelagonia were ruined; for that Pelagonia, or a portion of it, once contained three, may be inferred from the adjacent Tripolitissa, given to it by Strabo (vii. p. 327). The town, which, from the circumstance of its having been the capital of the Fourth Macedonia, must have been of some importance, existed till a late period, as it is noticed in the Symmachus of Hierocles, and by the Byzantine historian, Malchus of Philadelphia, who speaks of the strength of its citadel (ap. Const. Porph. Excerpt. de Legal. p. 81). From its advantageous position it was occupied by Manuel Comnenus, in the war with Gelas II. and the Hungarians. (Nicet. p. 142; Pselus; Xan. xvi. 141.) The name of Pelagonia still exists as the designation of the Greek metropolitan bishopric of Biblos or Mo nastiri, now the chief place of the surrounding country, and the ordinary residence of the governor of Rumilii. At or near the town are many vestiges of ancient buildings of Roman times. The district was exposed to invasions from the Dardani, who bordered on the N., for which reason the communication ("fanes Pelagonis," Liv. xxxi. 34) were carefully guarded by the kings of Macedonia, being of great importance, as one of the direct en- trances from Illyricum into Macedonia by the course of the river Drivan. Between the NE. extremity, Mt. Ljubatin, and the Kisinra of Đavol, there are in the mighty and continuous chain of Scardus (above 7000 feet high) only two passes fit for an army to cross, one near the N. extremity of the chain from Koljanciela to Peirogari or Peirescri, a very high "col," not less than 5000 feet above sea-level; the other considerably to the S., and lower as well as easier, nearly in the latitude of Abridha. Leake (Northern Greece, vol. iii. pp. 318—322) is of opinion that the passes of Pelagonia, in which Perseus was stationed by his father Philip, were this latter depression in the chain over which the modern road from Scodra or Scutari runs, and the Via Egnatia travelled formerly. The Illyrian Autaratas and Dardani, to the N. of Pelagonia, no doubt threatened Macedonia from the former pass, to the NE. of the mountain-chain of Scardus. (Comp. Grote, Greece, c. xxxv. and the references there to Pouqueville, Bon8, Grisebach, and Müller.) Symbata or Strobati was situated apparently on the Erigone, as also were most of the Pelagonian towns. Polybius (v. 108) speaks of a Pelagonian town named PELARIAUM (Πηλαριαύ). Ptolemy (l. c.) assigns to the Pelagones the two towns of Andrastrus and Ebulius (Peiot. Tab., the orthography is not quite certain), and Strabo. (E. B. J.)

PELASGII (Πελασγοῦς), an ancient race, widely spread over Greece and the coast and islands of the Aegean sea in prehistoric times. We also find traces of them in Asia Minor and Italy.

I. THE PELASGIANS IN GREECE.—The earliest mention of the Pelasgians is in Homer (Il. ii. 681), who enumerates several Thessalian tribes as furnishing a contingent under the command of Achilles, and among them he mentions the dwelt in Pelasgian Argos." Homer also speaks of Epirus as a chief abode of the Pelasgii; for Achilles addresses Zene as Δαυδοναίας, Πηλασιάτη (Il. xvi. 233.) And this agrees with Hesiod's description of Dodona as the "seat of the Pelasgii." (Fragm. xviii.) So in the Supplices of Aeschylus, the king declares himself to be ruler of the country through which the Alges and the Strymon flow, as also the whole of the district of the Perras, the Paeonians, and the Dodecanian mountains, as far as the sea. (Suppl. 250, seq.) Herodotus tells us he found traces of the Pelasgi at Dodona, where he says they worshipped all the gods, without giving a name to any (ii. 52). Compare his mythical account of the two priestesses at Dodona (ii. 56) with Homer's description of the Seliti. (Il. xvi. 234, seq.)

Strabo (v. p. 321, C), says: "Nearly all are agreed about the Pelasgi, that they were an ancient tribe (φῶλοι) spread over the whole of Hellas, and especially by the side of the Aeolians in Thessaly. . . . And that part of Thesaly is called Pelasgian Argos, which extends from the coast between the outlets of the Peneus and Thermopylae, as far as the mountain range of Pindus, because the Pelasgi were masters of that region."

We also hear of the Pelasgian in Boetia, where they dwelt for a time, after having, in conjunction with the Thracians, driven out the Aenes, Temnices, Leleges and Hyantes. Afterwards they were, in their turn, driven out by the former inhabitants, and took refuge at Athens under Mt. Hymettus, part of

* Argos probably means a plain, see Kruse's Hellas (vol. i. p. 404).
the city being called after their name. (Strab. ii. p. 401.) And Attic historians speak of their residence there, and say that on account of their migratory disposition they were called wλαργεῖον ('storks) by the Attic people. (Strab. v. p. 221.) This is the character generally given to the Pelasgi, and it is curious to find Herodotus (i. 56) contrasting the stationary habits of the Pelasgians, with the love of wandering exhibited by the Hellenic Dorians. For even his own account of the Pelasgi disproves his general statement; since they could not have existed in different quarters as he designates them, without several migrations, or—which he nowhere asserts—an almost universal extension over Greece and its dependencies. It is true that he says (ii. 56) that Hellas was formerly called Pelasgia, and Thucydides speaks (i. 3) of the name Hellas being of comparatively recent date, and of the Pelasgic name being the most prevalent among the tribes of Greece; but this does not account for the Pelasgi being found in Asia (Hom. Η. x. 429), and for their having introduced Egyptian rites into Greece. (Herod. ii. 51.)

Their sojourn in Attica is related by Herodotus, who says (vi. 187) that they had a portion of ground under Mt. Hymettus assigned them as a reward for their services in building the wall of the Acropolis at Athens, and it is said that they were driven out by the Athenians from envy, because their land was the best cultivated. The Athenians, however, says Herodotus, avenge their expulsion to their licentious conduct. Thucydides also (ii. 17) mentions the Pelasgic settlement beneath the Acropolis, and the oracle relating to it.

In the above quoted Herodotus speaks of Pelasgi as foreign extraction. In another passage (viii. 44) he tells us that the Athenians were formerly Pelasgians, and were so called, with the surname of Cranai. They were called successively Cecropiae, Erechtheidæ and Ions. Strabo (xiii. p. 621) mentions a legend that the inhabitants of Mt. Phricon near Thermopylææ made a descent upon the plate where Cyane afterwards stood, and found it in the possession of Pelasgians, who had suffered from the Trojan War, but were nevertheless in possession of Larissa, which was about 70 stades from Cyane.

We find traces of the Pelasgi in several parts of the Peloponnesus. Herodotus (i. 146) speaks of Argolid Pelasgians, and (vill. 94) tells us that the Ionians in Achaia were formerly called Pelasgian Angialæs (or Pelasgians of the coast). After Danaus and Xuthus came to Peloponnesus, they were called Ionians, from Ion, son of Xuthus.

In the passage of Asopius before referred to (Supp. 250) Argos is called Pelasgia; the king of Argos is also called Ἀρεάκτης ('heroeas') (v. 287), and throughout the play the words Argos and Pelasgia are used indiscriminately. So, too, in the Prometheus Vinctus (v. 860), Argolis is called 'the Pelasgian land.' In a fragment of Sophocles (Inachus) the king is addressed as lord of Argos and of the Tyrrenhi Pelasgi.

In the passage (vii. p. 392) speaks of Pelasgians taking possession of the Peloponnesus, along with other barbarous tribes, and (v. p. 221) says that Euphorus, on Hesiod's authority, traces the origin of the Pelasgi to Lycon, son of Pelasgus, and that he declares his own opinion to be that they were originally Argolidæ, who chose a military life, and, by inducing many others to join them, spread the name far and wide, both among the Greeks and wherever they happened to come. "The Arcadian divine or heroic pedigrees," says Mr. Grote (Hist. Greece, vol. i. ch. ix.), "begins with Pelasgus, whom both Hesiod and Asia considered as an indigeneous man, though Arcadians the Argive represented him as brother of Argos and son of Zeus by Niobe, daughter of Phoroneus; this logographer wished to establish a community of origin between the Argives and the Arcadians." For the legend concerning Lyconus, son of Pelasgus, and his fifty sons, see Grote's Greece, vol. i. p. 235, note.

Dionysius also speaks of Lyconus, Lycon, son of Pelasgus, lived eighteen generations before the Trojan War (lib. i. p. 30, ed. Bieses); and the migration of the Oeno-ctians under Oenomus, son of Lycon, in the next generation, is, in the words of Pausanias (viii. 3, quoted by Niebuhr), "the earliest colony, whether of Greeks or barbarians, whereof a recollection has been preserved."

Pausanias (viii. 2) gives the popular legend current among the Arcadians, that Pelasgus was the first man born there; on which he observes naïvely: "But it is likely that other men were also born with Pelasgus; for how could he have reigned without subjects?" According to this legend Pelasgus is a regular mythic hero, surpassing all his contemporaries in strength and wisdom, and they had nothing to do but what to choose for food and what to abstain from. The use of bee-chest-mast, which the Pythian oracle (Herod. i. 66) ascribed to the Arcadians, was taught them by Pelasgus. His descendants became numerous after three generations, and gave their names to various districts and many towns in Greece. Pausanias also speaks of Pelasgians coming from Iolcos to Pylus and driving out the eponymous founder (iv. 36. § 1).

Dionysius adopts the Achaean legend, viz. that the first abode of the Pelasgi was Achaian Argos. There they were autochthonous, and took their name from Pelasgus. Six generations afterwards they left Peloponnesus, and migrated to Easmia, the leaders of the colony being Achaean, and Pithias, and Pelasgus, sons of Larissa and Poseidon. These three gave names to three districts, Achaia, Phthiotis, and Pelasgiæa. Here they abode for five generations, and in the sixth they were driven out of Thessaly by the Curetes and Leleges, who are now called Locrians and Astolians, with whom were joined many others of the inhabitants of the district of Mt. Parnassus, led by Deucalion (i. 17. p. 46). They dispersed in different directions: some settled in Hesioctis, between Olympus and Ossa; others in Boeotia, Phocis, and Euboea; the main body, however, took refuge with their kinmen in Epirus, in the neighbourhood of Dodona (L. 18).

We now come to II. The Pelasgians in the Islands of the Aegean,

Homer (Od. xix. 175—177) mentions the Pelasgians (called Πελάσγοι), as one of the five tribes in Crete, the remaining four being the Aeaceans, Eteorectes, and Dorians (called τριγονείς). See Strabo's comment on this passage (v. p. 221), and x. pp. 475, 476, where two different explanations of the epithet τριγονείς are given.

Herodotus (ii. 51) speaks of Pelasgi living in Samothrace, where they performed the mysteries called Samoctracian orgies. Lemnos and Imbro were also inhabited by them (v. 26). So also Strabo (v. p. 221), quoting Antiochus. Thucydides (iv. 109) speaks of the Tyrrheni Pelasgi, who occupied Lemnos; and Pausanias
PELASGI

(vii. 2. § 2) says the Pelasgians drove out the Myrmans and Lacedaemonians from Lemnos. The perpetrators of the Lemnian massacre were Pelasgians. (Herod. vii. 138—140; compare Pind. Pyth. Od. iv. 449 [232, Bkh.]; Orph. Arg. v. 470; Stanley, Comm. in Asch. ii. 323.)

Herodotus also reckons the inhabitants of seventeen islands on the coast of Asia as belonging to the Pelasgian race (vii. 95). According to Strabo (xiii. p. 521) Menocrates declared the whole coast of Ionia, beginning at Mycale, to be peopled by Pelasgi, and the neighbouring islands likewise; and the Lesbians say they were under the command of Pelagis, who was called by the poet the leader of the Pelasgi, and from whom their mountain was called Pylossen. And the Chians say their founders were Pelasgi from Thessaly.

Dioscorus (i. 18) says that the first Pelasgian colony was led by Macar to Lesbos, after the Pelasgi had been driven out of Thessaly.

Diodorus Siculus (v. 88) gives a different account of this colony. He says that Xanthus, the son of Triopus, chief of the Pelasgi from Argos, settled first in Lycia, and afterwards crossed over with his followers to Lesbos, which he found unoccupied, and divided among them. This was seven generations before the flood of Deucalion. When this occurred, Lesbos was desert, and so were great parts of Zenos (according to Hesiod), occupied the second time, and the island received its name from his son-in-law. Smycon of Chios (quoted by Krane, Hellen) speaks of Pelasgians being in Sciothos and Scyros.

We next come to

III. The Pelasgians in Asia.—On this point we have Homer's authority that there were Pelasgians among the Achaeans, and when they fought against the Greeks they wore Hellenic armor. Strabo (v. p. 221) quotes Homer's statement that the neighbours of the Cilicians in the Troad were Pelasgians, and that they dwelt about Larissa. (II. ii. 641.) This name probably signifies a fortress built on a precipice or overhanging rock, and is an indication, wherever it occurs, of the presence of Pelasgi. There were several places of the same name in Greece and two or three in Asia Minor, which are enumerated by Strabo (ix. p. 440, xiii. p. 620). According to this geographer most of the Carians were Leages and Pelagi. They first occupied the islands, then the sea-coast. He argues, from the names of the tribes of Pelasgians (II. ii. 840), that their number was considerable.

Dioscorus (i. 18) says that the Pelagi, on being driven out of Thessaly, crossed over into Asia, and acquired many cities on the sea-coast.

Two cities were in existence in the time of Herodotus, namely, Scylace and Place, on the Propontis, which he believed to be Pelasgian cities, and which he says (i. 57) spoke similar dialects, but unlike their neighbours. That dialect was, on Herodotus's testimony, not Greek, but resembling the dialect of the Crotonitae, or rather Cretonians, a tribe among the Edones in Thrace.

Bishop Thirwall, comparing this passage with another, in which Herodotus is enumerating the dialects that prevailed among the Ionian Greeks, and uses the same terms, infers from the comparison that "the Pelasgian language which Herodotus heard on the Hellespont and elsewhere sounded to him a strange jargon; as did the dialect of Ephesians to a Milesian, and as the Bolognese does to a Florentine" (vol. i. p. 53). Mr. Grote differs from Bishop Thirwall in his estimate of these expressions of Herodotus, who, he thinks, must have known better than any one whether a language which he heard was Greek or not, and concludes that "Herodotus pronounces the Pelasgians of his day to speak a substantive language differing from Greek, but whether differing from it in a greater or less degree (e.g. in the degree of Latin or of Phoenician), we have no means of deciding" (vol. i. pp. 351—353).

Heeren (Ancient Greece, p. 26, note) has some remarks on Herodotus's opinion respecting the language spoken by the Pelasgians in his day, in which he seems to raise an imaginary difficulty that he may have the pleasure of overthrusting it.

Before quitting the coasts of the Aegean, it is necessary to quote Thucydides's observation (iv. 109), that "the Pelasgian race is said to be the most widely prevalent in the Chalcidice peninsula and in the adjoining islands," and that he regarded them as "a people of obscure origin, served by Alkaeus" (xiv. p. 639); "that Theyralp was, in the time of Pelasgus, suddenly converted by an earthquake from a vast lake into a fertile plain, irrigated by the Penesius, the waters of which before had been shut in by mountains."

The latter is a poetical version of a geological truth, which, though not falling within the province of history, recommends itself at once to the notice of the geographer.

We now come to

IV. The Pelasgians in Italy.—Legendary history has connected the Pelasgian race with more than one portion of the Italian peninsula. The name Oenotria, by which the southern part of Italy was formerly known (see Aristotle, Pol. vii. 2) suggests an affinity between the early inhabitants of that country and the Arcadian Pelasgians. The name Tyrrenii or Tyrrenian, which we have seen is used identically with that of Pelasgi, suggests another link. Innumerable legends, which furnished logographers with matters of their discourse, connected the Umbrians, the Peucetians, and other tribes in the north of Italy and on the coast of the Adriatic with the Pelasgians from Epirus and Thessaly. Some of these are given by Strabo. He quotes Anticleides to the effect that some of the Lemnian Pelasgians crossed over into Italy with Tyrreni, son of Arys (v. p. 221). Again, he quotes Hieronymus's assertion, that the Thessalian Pelasgians were driven out from the neighbourhood of Larissa by the Lapithae, and took refuge in Italy (ix. p. 443).

Pausanias's account of the Pelasgian colony led by Oenotrus has already been given. Dioscorus (i. 11. p. 30) confirms it, saying that Oenotrus son of Lycaon led a colony into Italy seventeen generations before the Trojan War. According to Dionysius, a colony of Pelasgians came over from Thessaly and settled among the Abergines, with whom they waged war against the Sicels (i. 17. p. 45.)

Another body came from the neighbourhood of Dodeca, whence, finding the territory unable to sup—
port them, they crossed over in ships to Italy, called Saturnia, in obedience to the oracle. The winds bore them to Spinae, on one of the mouths of the Po, where they established themselves, and by the help of their fleet acquired great power. They were, however, eventually driven out by an insurrection of the neighbouring herbarians, who were in turn overpowered by the Romans (i. 18). The Pelasgians thence migrated inland, crossed the Apennines, and entered the country of the Umbrians, who bordered on the Aborigines, and extended over a great part of Italy, being a numerous and powerful people. Here they established themselves for some time, and took some small towns from the Umbrians; but, being overpowered by them, they removed into the country of the Aborigines. When they came to Cotyle, they recognised the spot where the oracle had told them they were to offer up a sacrifice to Jupiter, Pluto, and Phoebeus. On this they invited the Aborigines, who came to attack them, to join alliance with them, which invitation they, being hard pressed by the Sicels, accepted, and gave the Pelasgi Velia to dwell in. The latter then helped the Aborigines to conquer Crotona in Umbria, and to drive the Sicels out of their land. Together they founded several cities, Caere, Agysia, Pisa, Saturnium, and others, which were taken by the Tyrrenians. Dionysius says that Platerium and Forsenia retained in his time certain faint traces of the old Pelasgic population, especially in the weapons of war—arms, Argolic spears and shields—and the institution of feasts, and other religious rites. There was a temple of Hera at Falerium, exactly like that at Argos, where were similar sacrifices, and similar priestesses, canophs, and choruses of maidens.

The Pelasgians also occupied parts of Campania, driving out the Aurunci, and founded Larissas and other cities. Some of these remained, after undergoing many changes of inhabitants, in Dionysius's time. Of Larissa there was no memorial save the name, and this was not commonly known; but its site was not far from Forum Populi. (Plin. iii. 15.) They took many cities from the Sicels, too, and established their town in the conquered lands. The Pelasgians, having driven out the Sicels, increased in power and extent of territory. Eventually, however, they incurred the anger of the gods, and suffered various penalties at their hands. On consulting the oracle, they were told that they had neglected to perform their oaths, in not sacrificing their first-born as well as the fruits of the field. Myrillus tells this story, adding that the Pelasgians were soon dispersed in different directions, some returning to Greece, and others remaining in Italy by the friendly intervention of the Aborigines. They were a warlike race, and acquired great skill in naval matters from their residence with the Tyrrenians. On this account they were often invited by other nations to serve as auxiliaries, and bore the names of Tyrreni and Pelasgi indiscriminately (i. 18—23).

Respecting the former name he says that it was given them on account of the forts, tēpas, which they built. Hellanicus of Lesbos says that the Tyrreni, formerly called Pelasgi, received the name which they bear after their arrival in Italy. For the counter-story of Myrillus, Dionys. i. 26. Dionysius thinks all are mistaken who hold the Tyrreni and the Pelasgi to be the same race. He thinks no argument can be drawn from the fact of their names being used indiscriminately, as that was very common, e.g., in the case of the Trojans and Phrygians. Moreover, the Greeks called all Italians—Lati, Umbrians, Anasones, &c.—Tyrrenians. Even Rome was believed by many to be a Tyrrenian city. Dionysius quotes Herodotus (i. 57) in support of his opinion that the Pelasgians and Tyrrenians are not of the same origin... It would be a wonderful thing, he says, if the Corinodites spake the same dialect as the Placieni on the Hellespont, both being Pelasgi, but should not speak the same dialect as the Tyrrenians, if they were also Pelasgi. For the contrary of the proposition—if δυσμελιζων, then δυσμελεθαι—holds good: i.e. if ἀλλογλωσσων, then ἀλλογλωσσες. If the case were reversed, there might be a show of reason for believing them of the same origin; for it might be said that distance had obliterated early traces of resemblance: but when they are so near each other as the Corinodites and Tyrreni this supposition is untenable (i. 29).

Hence Dionysius believes the Pelasgians and Tyrrenians to be distinct. He sums up all by saying that those Pelasgians who survived the final disperasion and ruin of the race existed amongst the Aborigines and their descendants helped them and other tribes to build Rome (i. 30).

It is unnecessary to remark the difference between Corontia in Umbria and Creton in Thrace, which Dionysius unapologetically passes over. The above somewhat lengthy extracts have been made from his Roman Antiquities, because they give us a very partial specimen of the way in which scattered traditions were dressed up in a quasi-historical garb, and decked out with any stray evidence which local names or language might supply.

The common native tradition of the Latins only testifies to an immigration of so-called Aborigines, not to any mixture of Pelasgi with them. On the other hand, another, which has received the testimony of Varro, and which agrees in other respects with the narration of Dionysius, speaks of an immigration of Pelasgians, but says nothing of Aborigines mixed with or allied with them. Certain Roman historians have combined these two traditions in a different way to that of Dionysius, making the Aborigines the descendants of the Pelasgian invaders, and the same people with the Pelasgians. This, for instance, is, without any doubt, the meaning of Cat's assertion that the Aborigines came over into Italy many generations before the Trojan War, out of Achaea; for so he named the old Pelasgi Greece by the common appellation of his time. (Schwager, Römische Gesch. iii. 3.) We find the same tradition of a Pelasgic immigration into Latium confirmed by many other testimonies. Pliny declares that writing was brought into Latium by the Pelasgians. It is a question, however, whether by these Pelasgi he means those who came out of Thessaly and Dodona, or the Arcadians of Evander.

Other traditions assert the name of Rome to be Pelasgic; the name Saturnalia from a feast originally instituted by the Pelasgians who settled on the Saturnian hill.

"In other parts of Italy we stumble repeatedly," says Schwager, "on the same wide-extended name. Thus, it is said that the Hernici were descended from the Pelași. Picenum also is said to have been occupied by the Pelași. Dionys. Report also says that the towns of Nuceria, Herculanum, and Pompeii were founded by them, or that they dwelt there for a certain time. Other instances have been already given of towns and districts with which legendary history has associated the name of the Pelași."
In short, the whole of Italy was, if we are to believe the authorities adduced, inhabited in ancient times by the Pelasgians. In later times they appear as vassals of the Illyriots; the common fate of original races that have been subjugated.

Upon these and similar traditions Niebuhr has grounded a hypothesis, which at present is generally received, and against which conclusive objections can only be made of a sort which can be charged with little likelihood of being borne into a lake. These sporadic Pelasgic tribes did not seem to these logographers to be fragments and relics, but colonies that had been sent out and had migrated, like the equally scattered colonies of the Hellenes. Hence the numerous traditions about the expeditions and wanderings of the Pelasgi. All these traditions are written in the highest historical value. They are nothing but a hypothesis of the logographers, framed out of the supposition that those scattered colonies of the Pelasgi had arisen and were produced by a series of migrations. There is nothing historical about them except, indeed, the fact which lies at the bottom of the hypothesis, namely, the existence in later times of scattered Pelasgic tribes—a fact which, however, implies much more the original greatness and extension of the Pelasgic nation. If the Pelasgians vanish gradually as historical times begin, the cause of this is, that they were transformed into other nations. Thus, in Greece they became gradually Hellenised, as a nation which, in spite of all distinction, was actually related to the Hellenes; and even in Italy they form a considerable portion of the later tribes of the peninsula, and owed their origin in the main to the mixture of races.

The half-Greek element which the Latin language contains, is, according to this view of Niebuhr's, Pelasgic, and owes its origin to the Pelasgic portion of the Latin nation, which Niebuhr and K. O. Müller (Estrucker) agree in finding in the Sicilians.

This hypothesis of Niebuhr's, generally received as it is, wants, nevertheless, a sound historical foundation. It has received at the hands of Schwiegier (Rom. Gesch.) a careful examination, and is condemned on the following grounds:

1. The absence of any indigenous name for the Pelasgians in Italy.
2. The evident traces of Roman writers on the subject having obtained their information from the Greek logographers.
3. The contradictory accounts given by different writers of the migrations of the Pelasgians, according as they follow Hellenic and Pherecydes or Myrillus.
4. The absence of any historical monument of the Pelasgi in Italy, whether literary or of another kind.

It only remains to make a few general observations on the evidence for the existence of the Pelasgi, and on the views taken by modern writers on the subject.

1. The modern authorities on the Pelasgi in Greece are: Larcher, Chronologie d'Hérodote, ch. viii. pp. 215—217; K. O. Müller, Etrucker, vol. i. Einleitung, ch. ii. pp. 75—100; Kruse, Hellas, vol. i. p. 509—533; Mayer, Geographic, part ii. introduction, p. 4; Thirlwall, History of Greece, ch. ii.; Grote, vol. i. ch. ix., vol. ii. ch. ii. sub fusc. The latter historian treats of the Pelasgi as belonging not to historical, but legendary Greece. He says, "Whoever has examined the many conflicting systems respecting the Pelasgi, from the literal belief of Cluvier, Larcher, and Raoul-Bochette, to the interpretative and half-credulous processes applied by elder men, such as Niebuhr, or O. Müller, or Dr. Thirlwall, will not be displeased with my resolution to decline so insoluble a problem. No attested facts are now present to us—none were present to Herodotus or Thucydides even in their age—on which to build trustworthy affirmations respecting the antecedents of the Pelasgi. As such is the case, we may without impropriety apply the remark of Herodotus respecting one of the theories which he had heard for explaining the inundation of the Nile by a supposed connection with the ocean—that the man who carries up his story into the invisible world, passes out of the range of criticism." (Vol. iii. p. 343.) Then Mr. Grote's way of disposing of the question too summary, will find it treated with great patience and a fair spirit of criticism by Bishop Thirlwall. The point on which he and Mr. Grote differ—namely, the question whether the language of the Pelasgi was a rough dialect of the Hellenic, or one Helicen—a has been already referred to. As we possess no positive data for determining it, it is needless to do more than refer the reader to the passages quoted. Respecting the architectural remains of the Pelasgi in Greece, a very few words will suffice. The Gate of the Lions at Mycenae, mentioned by Pausanias (ii. 15—16), is the only monument of the plastic art of Greece in prehistoric times. The walls of Tiryns, of polygonal masonry, appear to be of equal antiquity, and are ascribed to the Cyclopes. [MYKEMA.] These bear a strong resemblance to the Tyrrhenian-Pelasgic remains in Italy, specimens of which are given in Dümpter's Etruriae Regalis, v. g. the walls of Cosa, Segna (Segna) and Faesulae (Picolo). And a small amount of evidence is thereby afforded in favour of Niebuhr's theory of an original Pelasgic population existing in the peninsula of Greece and Italy. But this is much diminished by the fact, that similar remains are found in parts of Asia Minor where no traces exist of any Pelasgic traditions. And we are obliged therefore to fall back upon the view first adopted by A. W. Schlegel, that the peninsula of Greece and Italy were successively peopled by branches of one original nation, dwelling upon a time in the central part of Western Asia, and speaking one language, out of which, by successive modifications, sprang the different Greek and Italian dialects. 2. The authorities on the Pelasgi in Italy are Niebuhr (H. R. vol. i. p. 55, Tr.): Müller, Etrucker (quoted above); Lancer, Storia di Liscia, etc. Flor. 1824; Lepsius, über die Tyrrhen. Pelasger in Etrurien, Leips. 1842; Steub, über die 3 o 0 S.
PELAGIOTIS.

Urbevörner Ratisbon, geb., 1843; Mommersen, Unteritalischen Dialekte, 1850; Frichard, Natural History of Man, vol. iii. 4; Hefter, Geschichte der Latiner Sprache, p. 11; G. C. Lewis, Credibility of early Roman History, vol. i. p. 289; and Schwager, as quoted above.

The last-mentioned historian, after a careful review of all that ancient and modern authorities have said on the subject, agrees with Mr. Grote in concluding that there is no historical foundation for the commonly received traditions against the Pelasgi. In fact, the tradition is of such a conventional character that if we are to accept the view of the Pelasgic race, everywhere driven out, nowhere settling themselves for good,—of the race which is everywhere and nowhere, always reappearance, and vanishing again without leaving any trace,—the image of this gipsy nation is to me so strange, that we must entertain doubts as to its historic existence.

After they became a powerful nation in Italy, the tradition, which Dinius follows, tells us that they suddenly dispersed. This is in itself strange; but, were any other conclusion of the Pelasgian migrations invented, we should have to point out Pelasgians in Italy, which is impossible. Nothing remains of them but a few names of places, which are manifestly Greek. Let us therefore, inscriptions from the Argolid, and the stories of Mommsen (Unterital. Dial. p. 17) says it is nothing but old Etruscan.

It is not difficult to account for the prevalence of traditions relating to Pelasgi in Italy. Schwager has ably analysed the causes of this, and disproved on historical and linguistic grounds the views of Niebuhr, which he set up in opposition to the Roman grammarians.

There is considerable doubt, as he remarks, in what light we are to regard the name Pelasgi,—whether in that of an ethnographic distinction, or in that of an epithet = antochthones or aborigines. We have both in Greek and Latin words resembling it sufficiently, as, v. g., Пеласги, Пеласгиор, and Priesus. The change from Λ to ο is so common as to need no illustration, and the termination -οιν is nearly the same as -εοι.

These remarks, though they apply with considerable force to the indiscriminate use of the word Pelasgian as applied to Italian races, need not affect the statement of Herodotus concerning the towns of Scylace, Phison, and Creonia, which were accounted in his time Pelasgic, and spoke a different language from their neighbours.

That the name Pelasgi once indicated an existing race we may fairly allow; but we cannot form any historical conception of a people whom Herodotus calls stationary and others migratory, and whose earliest abode was between the mouths of Gess and Olympia, and also Arcadia and Argolis. On the whole we can partly appreciate Niebuhr's feelings when he wrote of the Pelasgi,—"The name of this people is irksome to the historian, hating as he does that spurious philology which raises pretensions to knowledge concerning races so completely buried in silence." (Rom. Hist. i. p. 26, Transl.)

The name of the Gessa [Attica] [Attius] is almost continuous with that which descends from the Gras Sasso towards the SE. through the country of the Vestini, but the great mountain barrier thus formed is interrupted by a deep gorge, through which the Aternus forces its way to the sea, having turned abruptly to the NE. immediately after receiving the river that of the Pelagian district was thus shut in on all sides by natural barriers, except towards the N., where they met the Vestini in the valley of the Aternus.

A tradition recorded by Festus (s. a. Peligni, p. 222), but on what authority we know not, represented the Peligni as of Illyrian origin; but this statement is far outweighed by the express testimony to Clazomenae. (Thuc. vili. 31; Plin. v. 31. s. 38, xxix. 2. s. 9; Steph. B. s. v.; see Vol. I. p. 639, a.)

PELECAS (Παινεύς), a mountain in Myus, which lay between the Apylian plain and the river Megistus. (Pol. v. 77.) It is probably the continuation of Mt. Temnus, separating the valley of the Aeseus from that of the Megistus. It has been remarked by Forbiger that there is a striking sameness of name and that of the woody mountain in Thessaly mentioned by Homer, as whose temple was said to be long strange, but the existence of which was subsequently unknown. (Hom. Il. vi. 397. viii. 396. 425. xxii. 479; Strab. iiil. p. 614.)

PELECES. [Αττίκη, p. 326, s.]

PELENDONES (Πελενδόνης), Pltol. ii. 6. § 54, a Celtiberian people in Hispania Tarraconensis, between the sources of the Durus and Iberus, and situated to the E. of the Arveni. Under the Romans they were in the jurisdiction of Clunia. They consisted of four tribes, and one of their towns was Numantia. We find also among their cities, Visontium, Olbia, Varia, &c. (Plin. iii. S. 4, iv. 20. a. 34.)

[Π. H. D.]

PELETHRONIUM (Πελεθρωνίων), a part of Mt. Pelion, whose Virg. gives the Lapithas the epithet of Pelethroni. (Stoch. vii. p. 299; Steph. B. s. v. = Virg. Georg. iii. 115.)

PELIGNI (Πελίγνοι) a people of Central Italy, occupying an inland district in the heart of the Apennines. They bordered on the Marsi towards the W., on the Samnites to the S., the Frontiani on the E., and the Vestini to the N. Their territory was as large as an ex. square, being confined in the upper part of the Gessio, a tributary of the Aternus, of which the ancient name is nowhere recorded, and a small part of the valley of the Aternus itself along its right bank. The valley of the Gessio is one of those upland valleys at a considerable elevation above the sea, running parallel with the course of the Apennines, which are so remarkable a feature in the configuration of the central chain of those mountains [APENNINUS]. It is separated from the Marsi and the basin of the lake Fuscinus on the W. by a narrow and strongly marked mountain ridge of no great elevation; while towards the S. it terminates in the lofty mountain group which connects the central ranges of the Apennines with the great mass of the Majella, the last group, one of the most elevated in the whole of the Apennines, attaining a height of 9100 feet above the sea, rises on the SE. frontier of the Peligni, while the Monte Morrone, a long ridge of scarcely inferior height, runs out from the point of its junction with the Majella in a N.W. direction, forming a gigantic barrier, which completely shuts the Peligni on the SE., separating them from the Frontiani and Marsi. This mountain ridge is almost continuous with that which descends from the Gras Sasso towards the SE. through the country of the Vestini, but the great mountain barrier thus formed is interrupted by a deep gorge, through which the Aternus forces its way to the sea, having turned abruptly to the NE. immediately after receiving the river that of the Pelagian district was thus shut in on all sides by natural barriers, except towards the N., where they met the Vestini in the valley of the Aternus.

A tradition recorded by Festus (s. a. Peligni, p. 222), but on what authority we know not, represented the Peligni as of Illyrian origin; but this statement is far outweighed by the express testimony
of Ovid, that they were of Sabine descent. (Ovid, Fast. iii. 95.) The authority of the poet, himself a native of the district, is strongly confirmed by the internal probabilities of the case, there being little doubt that all these upland valleys of the Central Apennines were peopled by the Sabines, who, radiating from Amulium as a centre, spread themselves towards the Etrurian and Latine districts, and so descended towards the valley of the Tiber on the W. and SW. Hence the Pergini were of kindred race with their neighbours, the Vestini, Marrucini, and Marsi, and this circumstance, coupled with their geographical proximity, 'sufficiently explains the close union which we find subsisting in historical times between the four nations. It is probable, indeed, that these four tribes formed a kind of league or confederacy amongst themselves (Liv. viii. 29), though its bonds must have been somewhat lax, as we find them occasionally engaging in war or concluding peace singly, though more frequently all four would adopt the same policy.

The first mention of the Pergini in Roman history occurs in Liv. iii. 343, when we are told that the Latins, who had been threatening war with Rome, turned their arms against the Pergini (Liv. vii. 38); but we have no account of the causes or result of the war. Soon after we find the Pergini, as well as their neighbours, the Marsi, on friendly terms with the Romans, so that they afforded a free passage to the Roman army which was proceeding through Samnium to Campania (Liv. viii. 6); and even when their neighbours the Vestini declared themselves in favour of the Samnites, they seem to have refused to follow the example. (Id. viii. 29.) In n. c. 308, however, they joined the Marsi in their defection from Rome, and shared in their defeat by Fabius (Id. ix. 41); but a few years afterwards (n. c. 304) they were induced to sue for peace, and obtained a treaty, apparently on favourable terms. (Id. 45; Diod. xx. 101.) From this period they became the faithful and steadfast allies of Rome, and gave a striking proof of their zeal in n. c. 295, by attacking the Samnite army on its retreat from the great battle of Sentinum, and cutting to pieces 1000 of the fugitives. (Diod. x. 50.) After the separation of Italy, as the Romans, the Pergini are seldom mentioned in history; but it is certain that they continued to furnish regularly their contingents to the Roman armies, and, notwithstanding their small numbers, occupied a distinguished position among the auxiliary troops, the Perginian cohorts being on several occasions mentioned with distinction. (Dionys. xx. Fr. Didot; Ennius, Asv. viii. Fr. 6; Liv. xxiv. 14, xlv. 40.) Their name is omitted by Polibius in his catalogue of the forces of the Italian allies in n. c. 225 (Fol. ii. 24), but this is probably by mere accident. During the Second Punic War they maintained unshaken their fidelity to Rome, though their territory was repeatedly ravaged by Hannibal; and besides furnishing their quota of troops to the Roman armies, they were still able in n. c. 205 to raise volunteers for the arms of Scipio. (Liv. xxvii. 9, xxvi. 11. xxvii. 45.) At the outbreak of the Social War, the Pergini, in conjunction with their neighbours and confederates the Marsi, were among the first to declare themselves against Rome; and the choice of their chief city, Corfinium, to be the capital of the confederates, and therefore the destined capital of Italy, had their plans proved successful, at once assigned them a prominent place among the nations arrayed against Rome. (Appian, B. C. i. 38; Liv. Epit. ixvi.; Oros. v. 18; Vell. Pat. ii. 16; Diod. xxxvii. 2.) The choice of Corfinium was probably determined by its strength as a fortress, as well as by its central position in regard to the northern confederates; at a later period of the war it was abandoned by the allies, who transferred their senate and capital to Asessina. (Diod. L. c.) The name of the Pergini has been preserved in the name of a town which is still inhabited, though it is certain that they continued to take an active part in it throughout, and it is probable that they were almost uniformly associated with the Marsi. But in n. c. 90 we are told that they sustained a severe defeat by Ser. Sulpicius Galba (Liv. Epit. ixixii.); and before the close of the following year they were received to submission, together with the Marrucini and Vestini, by Cn. Pompeius Strabo, a. c. 88. (Liv. Epit. ixvii.) It is certain that the Pergini, as well as their neighbours, were at this time, or very soon after, admitted to the Roman franchise, for the sake of which they had originally engaged in the war; they were enrolled in the Serbian tribe, together with the Marsi and Sabines. (Cic. in Fusc. 15; Schol. ad Enni. in soc. 49.) The Pergini again figure in the history of the Civil War between Caesar and Pompey, B. C. 49, when their chief town, Corfinium, was occupied by Domitius Ahenobarbus with twenty cohorts, which he had raised for the most part among the Marsi and Pergini, and with which he at first checked the advance of Caesar; but the praetorian disaffection among his own troops quickly compelled him to surrender. (Cass. B. C. l. 1—23.) Sulmo, which had been also garrisoned by Domitius, yielded without resistance to Caesar. (Ib. 17.) The Pergini, in common with the other mountain tribes, seem to have retained to a considerable extent their national character and feeling, long after they had become merged in the condition of Roman citizens, and as late as the civil war between Vespasian and Vitellius (A. D. 69) they are mentioned as declaring themselves, as a people, in favour of the former. (Tac. Hist. iii. 59.) This is the last notice of them which occurs in history; but they are described by all the geographers as a distinct people, retaining the remaining vestiges of their national character. (Strab. p. 241; Plin. iii. 12. a. 17; Prot. iii. l. § 64.) For the purposes they were included in the Fourth Region of Augustus (Plin. L. c.); and in the latter division of this part of Italy, their territory was comprised, together with that of the Marsi, in the province called Valeria. (Lib. Colon. p. 228.) It now forms a part of the province of Abruzzo Ultramarino. The position of the Pergini, surrounded on all sides by the loftiest ranges of the Apennines, while the valley of the Gizio itself is at a considerable elevation above the sea, naturally rendered the climate one of the coldest in Italy. Horace uses the expression "Pergina frigora," as one almost proverbial for extreme cold; and Ovid, who was a native of Sulmo, regards it almost as the coldest and wintry climate of his native district. (Flor. Caes. 19. 8; Ovid, Fast. iv. 81, 685, Trist. iv. 9.) On the other hand, it derived from the same cause the advantage of being watered by numerous and perennial streams, fed by the snows of the neighbouring mountains, where they are said to linger throughout the summer. (Ovid, Amor. ii. 16, Fast. iv. 685.) The broad valley of the Gizio was, however, sufficiently fertile; it produced considerable quantities of corn, and wine in abundance, though not of superior quality, and a few sheltered spots would even admit
of the growth of olives. (Ovid, Amor. ii. 16. 7; Martial, i. 27. 5, xii. 121.) Of the character of
the Peligni, we have only that they were sedentary,
as rivalling in bravery their neighbours the Marsi
(Plin. iii. 12. a. 17; Cic. de Viris. 15; Sil. Ital.
viii. 510), and that from their secluded position
they always retained the primitive simplicity of
their habits. From an expression of Horace it
would appear also that they shared with the Marsi
the talent of skill in magical incantations. (Hor.
Epod. 17. 60.)

The Peligni had only three principal towns, Co-
finium, Sulmo, and Superaquum, of which the
two first only are now known historically, and were
doubtless much the most important places. But
Pliny notices all three in his list of towns, and the
same names are found also in the Liber Coloniarum.
(Plin. l. c.; Lib. Colon. pp. 298, 299.) Hence
these are obviously the three alluded to by Ovid,
when he calls his native town of Sulmo “Peligini
pars tertia ruinis” (Amor. ii. 16); and it thus ap-
ppears there were no other places in the district
which enjoyed municipal rank and had a territory
of their own. Cuculum, mentioned only by Strabo
(v. 1), on the coast to the north of the Via Valeria,
is evidently the modern Cuculo, and must have
been in the territory of the Peligni, but was
probably an insignificant place. Statulium, known
only from the Tabula as a station on the Via Valeria,
7 miles from Corfinium, on the E. of the Mons
Imius, must have been situated at or near the
village of Statulium.

The territory of the Peligni must always have
been an important point in regard to the communica-
tions of the different nations of Central Italy. On
the one side a natural pass, now known as the Forca
Caruso, called in the Tabula the Mons Imius,
connected the basin of the Giseo and lower valley
of the Aternum with the land of the Marsi and
basin of the lake Fucinus; on the other the remarkable
pass or gorge through which the Aternum forces its
way just below Popoli, afforded a natural outlet,
through which these upper valleys had a direct
communication with the sea. These two passes, in
conjunction with that which led from the basin of
the Fucinus to Caruso, formed a natural line of
way south to the Adriatic, and through the
adjoining Anynthus which was undesubdivided frequented long before the Romans subdued the several nations
through which it passed, and ages before the Via
Valeria was laid down as an artificial road. That
highway, indeed, was not continued through the
land of the Peligni, and thence to the sea, until
the reign of the emperor Claudius [CIMFRNIA].
In the direction also the valley of the Giseo,
opening into that of the Aternum, afforded direct
means of communication with Reate, Interamna,
and the valley of the Tiber, while at its southern ex-
tremity a practicable pass led through the heart
of the Apennines into the valley of the Saurus, and thus
opened a direct line of communication with the
interior of Samnium that passed by the southern
branch of the river, and as well as the early period at which it
was frequented, is shown by the circumstance that it
was followed by the Roman armies in n. c. 340,
when the Samnites, as well as the Marsi and Peligni,
were friendly, and the revolt of the Latins cut off
their natural line of march into Campania. (Liv.
viii. 6.)

This line of road, as given in the Tabula, led
from Corfinium by Sulmo to Anfidenae, and thence
to Asvernium and Venafrum. At the distance of 7
miles from Sulmo that itinerary places a station
called “Jovis Labor,” evidently the site of a temple,
on the highest part of the pass. The spot is still
called Campo di Gioia, and it is probable that the
true reading is “Jovis Paleni,” the adjoining moun-
tain being still called Monte di Palena, and a village
or small town at the foot of it bearing the same
name. (Clement, Ital. p. 759; Holsten. Not. ad
Cicatorium. 209.) In Roman times the name of Labour
appears that the ancient road followed a more cir-
cumtuous but easier line than the modern highroad,
and thus avoided the passage of the Pianetto
Migno, an upland valley at the highest part of the
pass, much dreaded in winter and spring on ac-
count of the terrific storms of wind and snow to
which it is subject. (Craven’s Abruzzi, vol. ii. pp.
45—50.)

PELINAEUS. [CHIUSO.]

PELINA, more commonly PE LINAEUM (ΠΕΛΙΝΑ, Steph. B. s. a. v.; Plin. iv. 8. a. 15; Pe-
naviius, Scylax, p. 25; Pind. Pyth. x. 4; Strab.
ix. p. 437; Arrian, Anab. i. 7; Liv. xxxvi. 10; Pe-
navi o v on o coins, Eckhel, vol. ii. p. 146; Eck.
Anab. i. 9; in the Itinerary of Hittisadeon, a little above the left bank of the
Peneus. (Strab. l. c.) It seems to have been a
place of some importance even in the time of
Pindar (l. c.). Alexander the Great passed through
the town in his rapid march from Illyria to Boeotia.
(Arrian, l. c.) It did not revolt from the Mace-
donians, as did the other Thessalian cities, after the
death of Alexander the Great. (Diod. xvii. 11.)

In the war between Antiochus and the Romans,
B. c. 191, Pelinæaem was occupied by the Atha-
manians, but was soon afterwards recovered by the
Romans. (Liv. xxxvi. 14.) There are consider-
able remains of Pelinæum at Old Kardzikâ
or Gorgîkâ. “The city occupied the face of a
rocky height, together with a large semicircular
space at the foot of it on the southern.
The southern wall is more than half a mile in length, and
the whole circumference near three miles.” (Leake,

PELIIUM (ΠΕΛΙΝΟ, Arrian, Anab. i. 5; ΠΕΛΙΟ,
Quadratus, op. Steph. B. s. a. v.; Liv. xxxi. 40), a
town of the Thracian Odrysae, in Euzius, and
commanding the pass which led into that
country. From its situation it was a place of con-
siderable importance, and was attacked by Alex-
ander on his return from the expedition against the
Getae, in the war against the two Illyrian kings
Cleitus and Glaucias. On the defeat of the
Illyrians Oleius set the town on fire. According to
Arrian (l. c.), Pelium was situated at the foot of a
woody mountain, and close to a narrow defile through
which the Eordius flowed, leaving in one part
space only for four shields abreast, a description
which corresponds so exactly with the pass of Tsam-
gon, or Kisura of Devol, both as to the river,
and breadth of one part of the pass, that the identity
can hardly be questioned. Pelium will then be
either Philae or Pergamos, but the former has the
preference by its name, which seems to be a vulgar
sounding of Πελινος. (Leake, Northern Greece,
vol. iii. p. 323.) The consul Sulpicius, in his first
campaign against Philip (Liv. l. c.), crossed from
Eordus, or Sartigöö, which he had ravaged over
part of the plain of Greece, and through Anemodius
to Kaporia, whence he decoyed to Pelium, which he
occupied, leaving a strong garrison in it, as it
was an advantageous post for making excursions into the enemy's territory.

PELIUM (Πελιον), a lofty mountain in Thessaly, extending along the coast of Magnesia. It rises to the south of Ossa, and the last falls of the two mountains are connected by a low ridge. (Herod. vii. 129.) It forms a chain of some extent, stretching from Mt. Ossa to the extremity of Magnesia, where it terminates in the promontories of Sepias and Aeantium. It attains its greatest height above Iolcos. According to Ovid it is lower than Ossa (Fast. iii. 441), which Dodwell describes as about 6000 feet high. In form it has a broad and extended outline, and is well contrasted with the steeply conical shape of Ossa. On its eastern side Mt. Pelium rises almost precipitously from the sea; and its rocky and inhospitable shore (ἀκατάληπτος ἄνωθεν, Eurip. Aët. 595) proved fatal to the fleet of Xerxes. (Leake, Northern Greece, vol. iv. p. 384.) Mt. Pelium is still covered with venerable forests, to which frequent allusion is made in the ancient poets. Homer constantly gives it the epithet of ἔβρευσθολος (Il. ii. 744, &c.). Its northern summit is clothed with oaks, and its eastern side abounds with chestnuts; besides which there are forests of beeches, elms, and pines. (Diosecur. Descrip. Mont. Pet. in Geogr. Graec. Min. p. 106, ed. Paris, 1853; Ov. Fast. v. 381; Valer. Flacc. ii. 8.)

Mt. Pelium is celebrated in mythology. It plays an important part in the war of the giants and the gods; since the giants are said to have piled Ossa upon Pelium, in order to scale Olympus. It has been observed that this part of the fable is well explained by the respective forms of Ossa and Pelium. As Pelium is viewed from Athens, it appears to be seen at a considerable distance from each other,—a concavity between them, but so slight as almost to give the effect of a table-mountain, upon which fiction might readily suppose that another hill of the conical form of Ossa should recline. (Holland, Travels, vol. ii. p. 96.) Mt. Pelium was said to be the residence of the Centaurs, and more especially of Chiron. (Hesych. s.v. Achiæ, Athenaeus.) It is probable that the number of medicinal plants found on the mountain perhaps gave rise. (Diosecur. l.c.; Hom. Il. ii. 743, xvi. 143; Pind. Pyth. ii. 83, iii. 7; Virg. Georg. iii. 92.)

According to Diosecurus (l.c.), the cave of Cheiron and a temple of Zeus Actaeus occupied the summit of the mountain. The same writer relates that it was the custom of the sons of the principal citizens of Demetrias, selected by the priest, to ascend every year to this temple, clothed with thick skins, on account of the cold. Between the two summits of Mt. Pelium there is a fine cavern, now commonly known by the name of the cave of Achilles, and which accords with the position of the cave described by Plutarch. (Diosecur. l.c.) The same writer likewise speaks of two rivers of Mt. Pelium, called Cranaxidion and Brychyon. One of them is now named Zerwokhia, and falls into the gulf between Neokhori and St. George. (Leake, Northern Greece, vol. iv. p. 384, seq.) Lastly, Pelium was connected with the tale of the Argonauts, since the timber of their ship was built was cut down in the forests of this mountain. The north-western summit of Mt. Pelium is now named Pleasidhi; but the mountain is frequently called Zagora, from the town of this name immediately below the summit on the eastern side. (Leake, l.c.)

Pella, Médières, Mémoire sur le Pélion et l'Ossa, Paris, 1858.)

PELIA (Πηλια, Herod. vii. 123; Thuc. ii. 99, 100; Strab. vii. pp. 320, 323, 330, Plut. 29, 23; Ptol. iii. 13. § 89, viii. 12. § 8, Pline. iv. 17; Isid. Hist. s. a.; Paus. Tab.; Hérod. Hierocles), the capital of Macedonia. At the time when Xerxes passed through Macedon, Pella, which Herodotus (l.c.) calls a νότερα αὐτοῦ, was in the hands of the Bottiaeans. Philip was the first to make Pella, which Amyntas had been obliged to evacuate (Xen. Hell. v. 2. § 13; comp. Diodor. xiv. 39, xvi. 19), a place of importance (Dem. de Cor. p. 247), and (led the royal residence there; there was a navigation from the sea by the Lydia, though the marshes, which was 120 stadia in length, exclusive of the Lydia. (Scyl. p. 26.) These marshes were called Βαβικός (Βαβικορ) as appears from an epigram (Theocr. Chius, ap. Pind. de Econ. vol. viii. p. 360, ed. Reiske), in which Aristotle is reproached for preferring a residence near them to that of the Academy. Archestratus (ap. Athen. vii. p. 328, a.) related that the lake produced a fish called "chronia," of great size, and particularly fat in summer. From its position on a hill surrounded by waters, the metropolis of Philip, and the birthplace of Alexander (Juv. x. 168; Lucan, x. 26), soon grew into a considerable city. Had Alexander not been engaged from Macedon, it would probably have attained greater importance. Antipater lived there as regent of Macedonia, but Cassander spent less of his time at Pella, than at Thessalonica and Cassandra; from the time of Antigonus Gonatas till that of Perseus, a period of nearly a century, Pella remained the capital, and was a splendid town, and (led the royal residence there; xxvi. 7, xlii. 41, 51, 67, xxlili. 48, xlv. 10.) Livy (xlv. 46) has left the following description, derived undoubtedly from Polybius, of the construction of the city towards the lake. "Pella stands upon a height sloping to the SW., and is bounded by marshes which are impassable both in winter and summer, and are caused by the overflowing of a lake. The lake is called the "sea" (the "sea";) and to this "sea" is assigned, in which the number of medicinal plants found on the mountain perhaps gave rise. (Diosecur. l.c.; Hom. Il. ii. 743, xvi. 143; Pind. Pyth. ii. 83, iii. 7; Virg. Georg. iii. 92.) According to Diosecurus (l.c.), the cave of Cheiron and a temple of Zeus Actaeus occupied the summit of the mountain. The same writer relates that it was the custom of the sons of the principal citizens of Demetrias, selected by the priest, to ascend every year to this temple, clothed with thick skins, on account of the cold. Between the two summits of Mt. Pelium there is a fine cavern, now commonly known by the name of the cave of Achilles, and which accords with the position of the cave described by Plutarch. (Diosecur. l.c.) The same writer likewise speaks of two rivers of Mt. Pelium, called Cranaxidion and Brychyon. One of them is now named Zerwokhia, and falls into the gulf between Neokhori and St. George. (Leake, Northern Greece, vol. iv. p. 384, seq.) Lastly, Pelium was connected with the tale of the Argonauts, since the timber of their ship was built was cut down in the forests of this mountain. The north-western summit of Mt. Pelium is now named Pleasidhi; but the mountain is frequently called Zagora, from the town of this name immediately below the summit on the eastern side. (Leake, l.c.)
called by the Bulgarians Peł, and by the Greeks Πέλλα. Below the fountain, are some remains of buildings, said to have been baths, and still called τὰ Λουσία. These baths are alluded to by the comic poet Machon (ap. Athen. viii. p. 348, e.) as producing biliary complaints. Although little remains of Pella, a clear idea may be formed of its extent and general plan by means of the description in Livy, compared with the existing traces, consisting mainly of "tumuli." The circumference of the ancient city has been estimated about 3 miles. The sources of the fountains, of which there were two, were probably about the centre of the site: and the modern road may possibly be in the exact line of a main street which traverses it from E. to W.

The temple of Minerva Alcionea is the only public building mentioned in history (Liv. xiiii. 51), but of its situation nothing at present is known. Felix Beaujour, who was consul-general at Saloniki (Tableau du Commerce de la Grèce, vol. i. p. 87), asserted that he saw the remains of a port, and of a canal communicating with it. Leo (Northern Greece, vol. iii. pp. 261-266), who carefully went over the ground, could find no traces of a port, of which indeed there is no mention in ancient history; remains of a canal could be seen, as he was told, in summer.

An autonomous coin of Pella has the type of an ox feeding, which explains what Steph. B. s. e. describes as a Ξεν. de Ἐλ. (Leske) reports, that it was formerly called Βουργαζ. (Eckhel, vol. ii. p. 73; Sestini, Mon. Ιετ. p. 37.)

[Ε. Β. Ι.]

COIN OF PELLA IN MACEDONIA

PELLA (Πέλλα; Ευθ. Πελλάα). 1. A city of Palestine, and one of the towns of Decapolis in the Perea, being the most northerly place in the latter district. (Plin. v. 18. s. 16; Joseph. B. J. iii. 3. § 3.) Stephanus B. (s. e.) calls it a city of Coele-Syria and Ptolomy (v. 15. § 22) also describes it as a city of Decapolis in Coele-Syria. Stephanus adds that it was also called Butia (Ποτίτια), which appellation seems to be preserved in its modern name El-Budeche. Its name Pella shows that it was either built or colonised by the Macedonians. Pliny describes it as abounding in springs ("aquis divinis," Plin. l. c.). It was taken by Antiochus the Great (Polyb. v. 70), and was afterwards destroyed by Alexander Iannaeus, because its inhabitants would not adopt the Jewish religion (Joseph. Ant. iii. 15 (23)). § 5. E. F. (B. J.) calls it the Pelopoea, but it was afterwards restored by Pompey. (Joseph. Ant. iv. 4 (7). § 4.) Pella was the place to which the Christians of Jerusalem fled before the destruction of the latter city. (Euseb. H. E. iii. 5; Epiphian. de Mens. et Ponder. p. 171; Reland, Palæstina, p. 924.)

An extended town of Syria, on the Orontes, better known under the name of Apamea. [Ἀπάμα, Νο. 1.]

PELLA'NA or PELLENE (Πέλλανα; Πελλένα). Paus. i. 20. § 2; τὰ Πελλανα. Strab. viii. p. 386; Πελλάνη, Xen. Hell. vii. 5. § 9; Polyb. iv. 81, xvi. 37; Plut. Apol. 8), a town of Laconia, on the Eurotas, and on the road from Sparta to Arcadia. It was said to have been the residence of Tyndareus, when he was expelled from Sparta, and was subsequently the frontier-fortress of Sparta on the Eurotas, as Selinissa was on the Gennas. Polybius describes it (iv. 81) as one of the cities of the Locris Tridentis, and the other two being possibly Caryaun and Belmina. It had ceased to be a town in the time of Pausanias, but he noticed there a temple of Aesclapius, and two fountains, named Pellania and Loncesa.

Below Pellana, was the Characoma (Χαρακόμα), a fortification or wall in the narrow part of the valley; and near the town was the ditch, which according to the law of Agia, was to separate the lots of the Spartans from those of the Perioeci. (Plut. l. c.)

Pausanias says that Pellana was 100 stadia from Belmina; but he does not specify its distance from Sparta, nor on which bank of the river it stood. It was probably on the left bank of the river at Mt. Burdik, which is distant 55 stadia from Sparta, and 100 from Mt. Alimis, the site of Belmina. Mt. Burdik has two peaked summits, on each of which stands a chapel; and the bank of the river, which is only separated from the mountain by a narrow meadow, is supported for the length of 200 yards by an Hellenic wall. Some copious springs issue from the foot of the rocks, and from a stream which joins the river at the southern end of the meadow, where the wall ends. There are still the remains of an aqueduct, which appears to have carried the waters of these fountains to Sparta. The acropolis of Pellana may have occupied one of the summits of the mountain, but there are no traces of antiquity in either of the chapels. (Leske, Morea, vol. iii. p. 13, sq.; Boblaye, Archéologues, t. p. 76; Ross, Recherches sur Pellenésie, p. 191; Curtius, Peloponnesos, vol. ii. p. 235.)

PELLONE. 1. (ΠΕΛΛΩΝ), Dor. ΠΕΛΛΟΝ, ΠΕΛ-ΛΩΝ, Steph. B. s. e. : Ευθ. Πελλωνις, Pellenensis, Liv. xxiv. 29; Pellenaea, Plin. iv. 6: Τεσσαρος, ου Να-γραν, a town of Achaia, and the most easterly of the twelve Achaean cities, whose territory bordered upon that of Sicyon on the E. and uponthat of Aegira on the W. It was situated 60 stadia from the sea. On an elevated spot, upon a strongly fortified hill, the summit of which rose into an inaccessible peak, dividing the city into two parts. Its name was derived by the inhabitants themselves from the giant Pallus, and by the Argives from the Argive Pellen, a son of Phorbas. (Herod. i. 145; Poli. ii. 41; Strab. viii. p. 388; Paus. vii. 26. §§ 13—14; Apoll. Rhod. i. 176.) Pellenae was a city of great antiquity. It is mentioned in the Homeric catalogue; and according to a tradition, preserved by Thucydides, the inhabitants of Scione in the peninsula of Pallene in Macedonia professed to be descended from the Achaean Pelleneans, who were driven on the Macedonian coast, on their return from Troy. (Hom. Η. ii. 574; Thuc. iv. 120.) At the commencement of the Peloponnesian war, Pellenae was the only one of the Achaean towns which espoused the Spartan cause, though the other states afterwards followed their example. (Thuc. ii. 9.)

In the time of Alexander the Great, Pellene fell under the dominion of one of its citizens, the name of Maeron, a distinguished athlete, who raised himself to the tyranny by Alexander's assistance. (Paus. vii. 27. § 7.) In the wars which followed the re-establishment of the Achaean League, Pellene was several times taken and re-taken by the contend ing parties. (Pol. ii. 52, iv. 8, 13; Plut. Cleom. 17, Arat. 31, 32.) The buildings of Pellene are de-
scibed by Pausanias (vii. 27). Of these, the most important were a temple of Athena, with a statue of the goddess, said to have been one of the earliest works of Phidias; a temple of Dionysus Lamper, in whose honour a festival, Lamperia, was celebrated; a temple of Apollo Theoukous, to whom a festival, Theoukousia, was celebrated; a gymnasion, &c. See Strabo vii. 2. 11, and city was the Myseum, (Móseum), a temple of the Myse Demeiter; and near it a temple of Asclepius, called Cyrus (Κύρος): at both of these places there were copious springs. The ruins of Pelee are situated at Ζυγόρα, and are now called Τιρκού. The two temples of Myseum and Cyrus are placed by Leake at Τρίκκαλα, S.E. of the ancient city. (Leake, Morea, vol. iii. p. 315, Peloponnesiacs, p. 391.)

Between Aegium and Pelene, there was a village also called Pelee, celebrated for the manufacture of a particular kind of cloak, which were given as prizes in the agonistic contests in the city. (Strab. viii. p. 386; Pind. Ol. ix. 146, with Schol.; Aristoph. Αξ. 1451, with Schol.; Ηιον. and Phot. s. e. Πελοπόννησος, ουράνος.) K. C. Miller (Don. vol. ii. p. 430), however, questions this second Pelee; he supposes that Strabo is describing Pelee as both citadel and village, and he corrects the text, κενος μετά καλάντη καὶ Κάλλαντης, instead of Πελ-Λάντης; but the context renders this conjecture improbable.

The harbour of Pelene was called Aristonatae (Ἀριστοναταις), and was distant 60 stadia from Pelee, and 120 from Aegium. It is said to have been so called from the Argonantes having landed there in the course of their voyage. (Paus. vii. 26. § 14, ii. 12. § 2.) It was probably on the site of the modern Kamári. (Leake, Morea, vol. iii. p. 384.) A little to the E., near the coast, was the fortress Ουλυβος (Οὐλυβώς), dependent upon Pelee; Leake places it at Χυλο-καστρα. It would thus have stood at the entrance of the gorge leading from the maritime plain into the territory of Pelee, and would have been a position of great importance to the safety of that district. (Xen. Bell. vii. 14. §§ 17, 18; Plin. iv. 6; Mel. iii. 3; Steph. B. s. e.; Leake, vol. ii. p. 234.) N. of Pelee or Genoussa (Γενούσσα), to which Homer gives the epithet of lofty (αἰνωριωτος). According to Pausanias its proper name was Donousa (Δονούσα), which was changed by Peleistratus into Genoussa, when he collected the poems of Homer. Pausanias says that it was a fortress belonging to the Sicy- onians, and lay between Aegium and Pelene; but from its position we may infer that it was at one time dependent upon Pelee. Leake places it at Κόργυρ, the lofty mountain, at the foot of which is Kamári, the ancient Aristonatae. (Hom. II. ii. 573; Paus. vii. 26. § 13; Leake, vol. iii. p. 385.)

2. A town in Laconia. (Pellama.)

**COIN OF PELÉNE.**

**PELODES PORTUS. [ΒΟΥΣΑΡΥ]TOM.]**

**PELOPIS INSULAE,** nine small islands lying off Methana, on the Argolic coast. (Paus. ii. 34. § 8.) They must be the islands lying between Epidaurus and Aegina, of which Pitynoos (Ἀμ-
stationed, with the view both of threatening the city and preventing the Romans from crossing the straits.
(Pol. i. 11.) And at a later period, during the contest between Octavian and Sextus Pompey in the neighbourhood of Messana, the headland of Pelorus once more became an important post, being one of the points sedulously guarded by Pompey in order to prevent his adversary from effecting a landing. (Appian. B. C. v. 105, 116.)

The actual promontory of Pelorus, as already mentioned, is a low spit or point of sand, about 2 miles in length, which has evidently been drawn up by the waves from the open sea into a sandy ridge through the straits. (Symh. Sic. p. 107.) A tradition reported by Diodorus, but as ancient as the time of Herodotus, represented it as an artificial work constructed by the giant Orion. (Diod. iv. 85.) Within this sandy point, between the beach and the hills, are enclosed two small lakes or pools which are famous for producing the best sea and cockles in Sicily (See Serv. ad Aen. iii. 411.) but no remains of either building are now visible.

PELORUS (Πελορος), a small river of Iberia, in Asia, probably a tributary of the Cyrus. (Dion Cass. xxxvii. 2; comp. Graecurd. Strab. vol. ii. p. 575.)

PELESI (Anr. Vict. de Cass. 40) or PELESI (Phyl.) 27), a considerable lake in the north of Pannonia. A large portion of it was drained by the emperor Galerius, who conducted its waters into the Danube, and thus reclaimed large tracts of land, which formed an important addition to the province. (Anr. Vict. l.c.) The modern name of this lake is Plataissae; during rainy seasons it still overflows its banks far and wide, and forms extensive marashes, which are probably the very districts that were drained by Galerius. Lake Peleo is mentioned under different modifications of this name, such as Lacus Pelosodis (Jornand. Get. 52, 53) and Peleos (Geogr. Rav. iv. 19), while in the middle ages it was called Pelissa. Michan (Noric. i. p. 3, &c.) regarded Peleo and Pelas and Pelas and Peleo as two different places, one as the former, with Pliny, near the Deserta Bororum, and identifying it with the Neusiedlersee, while he admits the Peleo to be the Plataissae. This hypothesis, however, can hardly be sustained, as it is pretty certain that the Neusiedlersee did not exist in the times of the Romans, but was formed at a later period. (Comp. Scheinwiner, Ambiguidades et Historia Subcretion, p. 17, &c.; Liechtenbroem, Geogr. des Oester. Kunsirthen, vol. iii. p. 1245, &c.)

PELTAE (Πελτη: Eth. Peltrn, Pelteni), a according to Xenophon (Anab. i. 2. §10), at a distance of 10 parasangs from Celaenae, at the head of the river Maenander. Xenophon describes it as a populous city, and states that the army of Cyrus remained there three days, during which games and sacrifices were performed. The Penting, Table, where the name is erroneously written Pelss, places it, quite in accordance with Xenophon, 26 miles from Apamea Cibotos, to the conventus of which Peltae belonged. (Plin. v. 29; comp. Ptol. v. 2. §25; Steph. B. s. a. Strabo (xii. p. 576) mentions Peltai as the smallest towns of Phrygia, and the Notitiae name it among the episcopal cities of Phrygia Pacatana, which fixing Pelis as the town, and derived from it the name of the Peltasian plain (Πελταιας or Πελταειας; Strab. xii. p. 629). Kiepert (AP. Frans, Fünf Inschriften, p. 36) fixes the site of Peltai at the place where Mr. Hamilton found ruins of an ancient city, about 8 miles south of Sandalbus (Journal of the Roy. Geog. Society, viii. p. 144), while Hamilton himself (Researches, ii. p. 903) thinks that it must have been situated more to the south-west, near the modern Iskela. But this latter hypothesis seems to place it far west.

PELTEMNUM (Eth. Pelturnas; -tsis: Anacodea), a considerable town of the Vestini, and one of the four sacred to that people by Pline (iii. 12. a. 17). Its name is not found in the Itineraries, but its importance is attested by various inscriptions. One of these confirms the fact mentioned by Pline, that the Ainesates were closely connected with, or dependent on, Peltenum, apparently the more important place of the two. We learn from the Liber Coloniarum (p. 229) that it contained the rank of a colony, probably under Augustus, and that its importance is attested by various inscriptions. One of these dates from the time of A. D. 242; it was reduced to the condition of a Praefectura, though it seems to have been still a flourishing town. (Orell. Inscr. no. 4036; Zumpt, de Coloniiis, p. 359, not.) Its site was unknown to Cluvierius, but can be fixed with certainty at a spot called Anacodion, about 14 miles south of Aquila, on the road from thence to Popoli. The ancient name is retained by a neighbouring church, called in ecclesiastical documents S. Paolo a Pelteino. A considerable part of the circuit of the ancient walls is still visible, with remains of various public buildings, and the ruins of an amphitheatre of recent date. (Giovenazzi, Ansel. p. 119; Romenani, vol. iii. pp. 264—268; Orelli, Inscr. 106, 3961, 3981.)

PELVA, a town of Dalmatia, which the Antones used to place on the road from Sirmium to Salona. Schaffarik (Slav. Alt. vol. i. pp. 60, 247) identifies it with Pleson, a place in Bosnia, with a river of the same name, of which Pelve is the Latin name. (See E. B.)

PELUSIUM (Πελούσιον, Ptol. iv. 5. §11, viii. 15. §11; Stephe. B. s. a.; Strab. xvii. p. 802, seq. Eth. Πελούσιων, Πελούσιον), was a city of Lower Egypt, situated upon the easternmost bank of the Nile, the Ostium Pelusiacum, to which it gave its name. It was the site of the Hebrew Scriptures (Exek. xxx. 15); and this word, as well as its Egyptian (appellation, Peremou or Peremos, and so Greek (φαυλος) import the city of the omen or mud (φαυλα, Coptic, mud). Pelusium lying between the seaboard and the Deltaic marshes, about two and a half miles from the sea. The Ostium Pelusiacum was choked by sand as early as the first century B.C.,
PELUSIUM.

and the coast-line has now advanced far beyond its ancient limits, so that the city, even in the third century A.D., was at least four miles from the Mediterranean. The principal produce of the neighbouring lands was flax, and the linum Pelusiacum (Plin. xix. 1. s. 3) was both abundant and of a very fine quality. It was, however, as a border-fortress on the frontier, as the key of Egypt as regarded Syria and the sea, and as a place of great strength, that Pelusium was most remarkable. From its position it was directly exposed to attack by the invaders of Egypt; several important battles were fought under its walls, and it was often besieged and taken. The following are the most memorable events in the history of Pelusium:

1. Sennacherib, king of Assyria, B.C. 720—715, in the reign of Sethos the Aethiopian (25th dynasty) advanced from Palestine by the way of Libna and Lachish upon Pelusium, but retired without fighting from before its walls (lachish, xxxi. 8; Herod. ii. 141; Strabon. xiii. p. 604). His retreat was ascribed to the fear of the Pharaoh's forces marching towards Sethos, his rival. In the night, while the Assyrians slept, a host of field-mice gnawed the bow-strings and shield-straps of the Assyrians, who fled, and many of them were slain in their flight by the Egyptians. Herodotus saw in the temple of Hephaestos at Memphis, a record of this victory of the Egyptians, viz. a statue of Sethos holding a mouse in his hand. The story is probably true. From history the temple became a symbol of Egypt the mouse implied destruction. (Comp. Horapollo, Hieroglyph. i. 50; Aelian, H. An. vi. 41.)

2. The decisive battle which transferred the throne of the Pharaohs to Cambyses, king of the Medo-Persians, was fought near Pelusium in B.C. 525. The fields are full of new graves, the bones of the combatants when Herodotus visited Lower Egypt; and the skulls of the Egyptians were distinguishable from those of the Persians by their superior hardness, a fact confirmed by the mummies, and which the historian ascribes to the Egyptians shaving their heads from infancy, and to the Persians covering them up with folds of cloth or linen. (Herod. iii. 61.) As almost disappeared from history, we have no particular interest, as found at Tisch, near Domietta. (Champollion, L'Egypte, vol. ii. p. 82; Denon, Description de l'Egypte, vol. i. p. 208, iii. p. 306.)

3. In B.C. 373, Pharnabazus, satrap of Phrygia, and Iphicrates, the commander of the Athenian armament, appeared before Pelusium, but retired without attacking it, Nectanebus, king of Egypt, having added to its former forces by laying the neighbouring lands under water, and blocking up the navigable channels of the Nile by embankments. (Diodor. xv. 42; Nepos, Iph. c. 5.)

4. Pelusium was attacked and taken by the Persians, B.C. 309. The city contained at the time a garrison of 5000 Greek mercenaries under the command of Phililphon. At first, owing to the rashness of the Thebans in the Persian service, the defenders had the advantage. But the Assyrian king Nectanebus hastily venturing on a pitched battle, his troops were cut to pieces, and Pelusium surrendered to the Theban general Lactares on honourable conditions. (Diodor. xvi. 43.)

5. In B.C. 355, Pelusium opened its gates to Alexander the Great, who placed it under the command of one of those officers entitled "Companions of the King." (Arrian, Exped. 3. 11, sqq.; Quint. Curt. iv. 53.)

6. In B.C. 173, Antiochus Epiphanes utterly

PELENE.

defeated the troops of Ptolemy Philometor under the walls of Pelusium, which he took and retained after he had retired from the rest of Egypt. (Polyb. 8. 3; Hieronym. in Daniel, xi.) On the fall of the Syrian kingdom, however, if not earlier, Pelusium had been restored to its rightful owners, since it was, however, as a border-fortress on the frontier, as the key of Egypt as regarded Syria and the sea, and as a place of great strength, that Pelusium was most remarkable. From its position it was directly exposed to attack by the invaders of Egypt; several important battles were fought under its walls, and it was often besieged and taken. The following are the most memorable events in the history of Pelusium:

7. In B.C. 55, it belonged to Egypt, and Marcus Antonius, as general of the horse to the Roman consul Gabinius, defeated the Egyptian army, and made himself master of the city. Ptolemy Auletes, in whose behalf the Romans invaded Egypt at this time, wished to put the Pelusians to the sword; but his intention was thwarted by Antonius. (Plut. Anton. c. 8; Val. Max. l. 5.)

8. In B.C. 31, immediately after his victory at Actium, Augustus appeared before Pelusium, and was admitted by its governor Seleucus within its walls.

Of the six military roads formed or adopted by the Romans in Egypt, the following are mentioned in the Itinerarium of Antoninus as connected with Pelusium:

1. From Memphis to Pelusium. This road joined the great road from Pselia to Nubia at Babylon, nearly opposite Memphis, and coincided with it as far as Scenae Veteranorum. The two roads, viz. that from Pselia to Scenae Veteranorum, which turned off to the east at Helipolis, and that from Memphis to Pelusium, connected the latter city with the capital of Lower Egypt, Trajan's canal, and Arinis, or Siss, on the Sinus Heropoleit. 2. From Acca to Alexandria, ran along the Mediterranean sea from Paphus to Pelusium. Pelusium suffered greatly from the Persian invasion of Egypt in B.C. 501 (Ezra X, 22), but it offered a protracted, though, in the end, an ineffectual resistance to the arms of Amor, the son of Asi, in B.C. 618. As on former occasions, the surrender of the key of the Delta, was nearly equivalent to the subjugation of Egypt itself. The khallifs, however, neglected the harbours of their new conquest generally; and from this epoch Pelusium, which had long been on the decline, now became almost disused. From hence to this day, to have no particular interest, are found at Tisch, near Domietta. (Champollion, L'Egypte, vol. ii. p. 82; Denon, Description de l'Egypte, vol. i. p. 208, iii. p. 306.)

[GEORGE B. D.]
to have possessed a large tract of mountainous country to the N. of the Dassaretas, and extending to the E. as far as the frontier of Macedon, while on the W. and N.W. it almost reached to the Labastes and the dominions of Gentius. (Liv. xliii. 20, 21, 22, 23, 25, zviv. 11.) The principal city of this warlike tribe was Uscana; besides which they had the two fortresses of Drauiduc and Oankrum. [E. B. J.]

PENIEL or PENUEL (i. e. "Face of God," Elph. or LXX.), a place beyond Jordan, where Jacob wrestled with the angel (Gen. xlii. 30), and where a town was afterwards founded by the tribe of Gad. (Judges, viii. 8.)

PENIUS, a small river of Colchis, falling into the Euxine, on which stood a town of the same name. (Plin. iv. 4; Ov. ex Pont. iv. 10. 47.)

PENNELOCUS, in the Antonine Itin., and PENNELOCUS in the Ptolemy Table, is a place in Gallia in the country of the Nantuates, between Vivicus (Vexou) and Tarnaja (St. Maurice). In the Itin. the distance of Pennelocus from Vivicus is marked vii.; but it is uncertain whether they are Roman miles or Gallic leagues. It is generally assumed that Villeneuve at the eastern end of the Lake of Vivicus was the site of Palensiocum, and that the distance from Vexou does not agree. D'Anville found in some old maps a place called Penna on the direction of the road, but the position of Penna does not agree with the distances in the Itin. Pennelocus was in the Vallis Penninae or the Velise. [G. L.]

PENNINAE ALPES. [Alpes, p. 108, n.]

PENNOCRUM. A town in the territory of the Cornuti in Britannia Romana, sometimes identified with Penbridge in Staffordshire, but more probably Strutton. (Itin. Ant. p. 470; Camden, p. 636.) [T. H. D.]

PENTADEMITAE (Πεταδημίται), a tribe of Teuthrania in Mysia, which is mentioned only by Ploemey (v. 2. § 15). [L. S.]

PENTAPOLIS [Πεντάπολις.]

PENTADACTYLOS (Πεντάδακτυλος φως, Ptol. iv. 5. § 35), a mountain in Egypt, on the Arabian Gulf, S. of Berenice.

PENTELE. [Attica, p. 337, a.]

PENTILEUIUM (Πεντίλευιον), a fortress near Phenice, in the north of Arcadia, situated upon a mountain of the same name. For details see PENSET.

PENTELICUS MONS. [Attica, pp. 322, a., 323, b.]

PENTRI (Πέντρι), a tribe of the Samnitse, and apparently one of the most important of the subdivisions of that nation. Their capital city was Bovilarnum (Liv. ix. 31), in the very heart of the Samnite territory, and it is therefore probable that they occupied the whole of that rugged and mountainous district which extends from the frontiers of Latinum, in the valley of the Liris, to those of the Fruntani, towards the Adriatic. But it is impossible to determine their exact limits, or to separate their history from that of the remaining Samnites. It is probable, indeed, that throughout the long war of the Romans with the Samnites, the Pentri were the leading tribe of the latter people, and always took part in the war, whether specified or not. The only occasion when we hear of their separating themselves from the rest of their countrymen, is during the Second Punic War, when we are told that all the other Samnites, except the Pentri, declared in favour of Hannibal after the battle of Cannae, a. c. 216.

(Pen. 374)

PEPUSA. (Liv. xxvi. 61.) This is the last occasion on which we find their name in history; all trace of the distinction between them and the other Samnites seems to have been subsequently lost, and they are not even mentioned by Strabo or Pliny. The geographical account of their country is given under the article SAMNITUM. [E. H. B.]

PEOB (Φουρός, LXX.), a mountain in the land of Moab. (Nimrod. xliii. 28.) It is placed by Eusebius (s. a. Αφαγία Μαύδ) between Livias and Eubus, over against Jobs. [J.]

PEOS ARTEMIDOS. [Πεος Αρτέμιδος.]

PEPARETHUS (Πεπαρέθος; Eθ. Πεπαρέθος), an island in the Aegean sea, lying off the coast of Thessaly, to the east of Halonnesus. Pliny describes it as 9 miles in circuit, and says that it was formerly called Evemus (iv. 12. a 35). It was said to have been colonised by some Cretans under the command of Stephylus. (Scymn. Ch. 579; Hom. II. Άρσιπ. 30.)

Paparethus was an island of some importance, as appears from its frequent mention in history, and from its possessing three towns (ρηνάυα, Scylax, p. 53), one of which bore the same name as the island. (Strab. ix. p. 436.) The town suffered from an earthquake in the Peloponnesian War, a. d. 426; Thuc. ii. 82. 1; and the d. 828. 2. by Alexander of Phereus (Diod. iv. 95. 5), and the island was laid waste by Philip, because the inhabitants, at the instigation of the Athenians, had taken possession of Halonnesus. (Dem. de Cor. p. 248, Epist. Phil. p. 162.) In a. d. 207, Philip sent a garrison to the city of Paparethus, to defend it against the Romans. (Polyb. i. 8.) Pliny (v. 1. 200) destroyed it in a. d. 200, that it might not fall into the hands of the latter. (Livy. xxxi. 28.)

Paparethus was celebrated in antiquity for its wine (Athên. i. p. 29; Hes. plur. Frgm. 13; Plin. iv. 7. a 9) and oil. (Ov. Met. vii. 470.) Dioscurides, the earliest Greek historian who wrote upon the foundation of Rome,cs a nation of Paparethis. [See Dict. of Bibl. Vol. i. p. 101.] Paparethus is now called Khilidhronikos, and still produces wine, which finds a good market on the mainland. (Leake, Northern Greece, vol. iii. p. 112.)

PEPERINE (Πεπέρινη), an island off the SW. coast of India, which undoubtedly derived its name from producing pepper. (Ptol. vii. 1. § 9.)

Pepinuses. [P. S.; Πεπινούσες, B.]

PETRI, a town of Laconia, on the eastern coast of the Messenian gulf, distant 20 stadia from Thalamae. In front of it was an island of the same name, which Pausanias describes as not larger than a great rock, in which stood, in the open air, brazen statues of the Dioscuri, a foot high. There was a tradition, that the Dioscuri were born in this island. The island is at the mouth of the river Miles, which is the minor Parnius of Strabo (vii. p. 361). In the island, there are two ancient tombs, which are called those of the Dioscuri. The Messenians said that their territories originally extended as far as Paphnus. [Mesemb. p. 345, a.] (Paus. 11. 26. §§ 3, 4; Gell, Itin. of the Mores, p. 338; Leake, Mores, vol. i. p. 132, Paus. 11. 4. 5; Boebyse, I. 3. 178; Böhlau, Kriechbes, gef. p. 93; Curtius, Peloponnesium, vol. ii. pp. 283, 284.)

PEPUSA (Πεπούσα), a town in the western part of Phrygia, which is mentioned only by late writers. It gave its name to an obscure body of heroes noticed by Epiphanius (Haereses xivii. 14); but they did not exist long, since their town was ruined and deserted when he wrote. (Comp. Philostr.
PERAEA.

Hist. Eccl. iv. 8, where it is called Petusa; Aristaeus, Com. in Cam. 8, where its name is Pexusa.) Kiepert (ap. Franz. Fünf itinerarien, p. 33) believes that its site may possibly be marked by the ruins found by Arundell (Discoveries in As. Min. i. pp. 101, 127) near Bekehr el Kama, in the north of Bashan. [L.S.]

PERAEA (Περαια), the name of several places lying beyond (πέραις) a river or on the other side of a sea.

1. The district of Palestine lying beyond the Jordan, and more particularly the country between the Jordan on the W., the city of Pella on the N., the city of Philadelphia and Arabia Petreae on the E., and the land of the Moabites on the S. [P. Laestry, p. 539.]

2. 'H τῶν Ποταμῶν Petraea, Strab. xiv. pp. 651, 652; Polyb. xvii. 2, 6, 8, xxi. 25; Liv. xxxii. 33, xxxiii. 18; χώρα τῶν Ποταμῶν ἡ ἐν τῇ περαιᾷ, Scal. p. 38), a portion of the S. coast of Caria, opposite to Rhodes, and subject to it. It commenced at Mt. Phoenix, and extended as far as the frontiers of Caria at Croton. The peninsula, which bears to Mt. Phoenix was called the Rhodian Chersonesus. (Pll. xxxii. 2, 20; Diod. v. 60, 62.) For a description of this district, which is very beautiful and fertile, see vol. i. pp. 519., b. 530, a.

3. (Περαια Tiberias, Strab. xiii. p. 596), a small district on the coast of Myisa, opposite to Tenea, and extending from the promontory Sigeum to Alexandria Troas.

PERAEA. [Corinthius, p. 685, b.]

PEREAEIHEIS. [Megalopolis, p. 310, a.]

PERCO'TE (Περόπτη, Eth. Peróptos), an ancient town of Myisa, on the Hellespont, between Abur dus and Lamprocus, and probably on the little river Percoetes. (Hom. II. i. 835, xi. 229; Xenoph. Hell. v. i. § 25.) Percoetes continued to exist long after the Trojan War, as is spoken of by Herodotus (v. 117), Scal. (p. 35), Apollodorus Rhodius (i. 932), Arrian (Asab. i. 15), Pline (v. 31), and Stephanus Byz. (s. a.v.). The city was taken by the Persians in the time of Xerxes, and under the name discovered to Themistocles by the king of Persia. (Plut. Them. 30; Athen. i. p. 29.) According to Strabo (xiii. p. 590) its ancient name had been Perope. Modern travellers are unanimous in identifying its site with Burgas or Berga, a small Turkish town on the left bank of a small river, situated on a sloping hill in a charming district. (Sithoepe's Journal, in Walpole's Turkish i. p. 91; Eichler, Wulfrahm, p. 454.) [L. S.]

PERCO'TES (Περόπτης), a small river of Myisa, flowing from Mount Ida into the Hellespont. (Hom. II. ii. 835.) It is easily identified as the stream flowing in the valley of the modern town of Berga. [Comp. Perieb'Te.]

PERE'TES, a town in Mauretania Caesariensis, 25 M. from Stifi, perhaps Nas-al-Daud. (It. Ant. pp. 29, 36; Coll. Episc. c. 121.)

PERGA.

PEREG. [Perga.]

PERGAMUM. [Ilum.]

PERGAMUM (Πέργαμον : Eth. Pergamob, Pergameno), sometimes also called PERGAMUS (Ptol. v. 2. § 14, vii. 17. § 10; Steph. B. s. v.), an ancient city, in a most beautiful district of Thrace in Myisa, on the north of the river Calcus. Near the point where Pergamum was situated, two other rivers, the Selinus and Cetins, emptied them- selves into the Calcus; the Selinus flowed through the city itself, while the Cetins washed its walls. (Strab. xiii. p. 619; Plin. v. 33; Paus. vi. 16. § 1; Liv. xxxvii. 18.) Its distance from the sea was 120 stadia, but communication with the sea was effected by the navigable river Calcus. Pergamum, which is first mentioned by Xenophon (Anab. vii. 8. § 8), was originally a fort and a fortress of considerable strength, being situated on the summit of a conical hill, round the foot of which there were at that time no houses. Subsequently, however, a city arose at the foot of the hill, and the latter then became the acropolis. We have no information as to the foundation of the original town on the hill, but the Per gamenians believed themselves to be the descendants of Arcadians, who had migrated to Asia under the leadership of the Heraclid Telephus (Paus. i. 4. § 8); they derived the name of their town from Pergamus, a son of Pyrrhus, who was believed to have arrived there with his mother Andromache, and, after a successful combat with Arians, the ruler of Teuthanias, to have established himself there. (Paus. i. 11. § 2.) Another tradition makes Pergamus the son of Aileus, with a colony from Epidaurus, proceeded to Pergamum; at all events, the place seems to have been inhabited by many Greeks at the time when Xenophon visited it. Still, however, Pergamum remained a place of not much importance until the time of Saisias, one of the generals of Alexander the Great. This Lydian city chose Pergamum as a place of security for the reception and preservation of his treasures, which amounted to 9000 talents. The care and prudentcure of this treasure was intrusted to Philaretos of Tium, an ennuch from his infancy, and a person in whom Lysimachus placed the greatest confidence. For a time the Philaetos answered the expectations of Lysimachus, but having been ill-treated by Artaic, the wife of his master, he withdrew his allegiance and declared himself independent, n. c. 283. As Lysimachus was prevented by domestic calamities from punishing the offender, Philaretos remained in undisturbed possession of the town and treasures for twenty years, contriving by dexterous management to maintain peace both within and without. He also increased the principality to a nephew of the name of Eumenes, who increased the territory he had inherited, and even gained a victory over Antiochus, the son of Seleucus, in the neighbourhood of Sarde. After a reign of twenty-two years, from n. c. 263 to 241, he was succeeded by his cousin Attalus, who, after a great victory over the Galatians, assumed the title of king, and distinguished himself by his talents and sound policy. (Strab. xiii. pp. 693, 624; Polyb. xviii. 24; Liv. xxxiii. 21.) He espoused the interests of Rome against Philip of Macedonia, and in conjunction with the Rhodian fleet rendered important services to the Romans. It was mainly this Attalus that amassed the wealth for which his name became proverbial. He died at an advanced age, n. c. 197, and was succeeded by his son Eumenes II., from n. c. 197 to 159. He continued his friendship with the Romans, and assisted them against Antiochus the Great and Perseus of Macedonia; after the defeat of Antiochus, the Romans rewarded his services by giving to him all the countries in Asia Minor west of Mount Taurus. Pergamum, the territory of which had hitherto not extended beyond the gulfs of Elaea and Adramyttium, now became a large and powerful kingdom. (Strab. i. e. c.; Liv. xxxviii. 39.) Eumenes III. was nearly killed at
Delphi by assassins said to have been hired by Perseus; yet at a later period he favoured the cause of the Macedonian king, and thereby incurred the ill-will of the Romans. Pergamum was mainly indebted to Eumenes II, for its embellishment and extension. He was a liberal patron of the arts and sciences; he decorated the temple of Zeus Nicephorus, which had been built by Attalus outside the city, with walls and plantations, and erected himself many other public buildings; but the greatest monument of his liberality was the great library which he founded, and which yielded only to that of Alexandria in extent and value. (Clem. i. p. 3.) He was succeeded by his son Attalus II; but the government was carried on by the late king's brother Attalus, surnamed Philadelphia, from b. c. 159 to 138. During this period the Pergamenes again assisted the Romans against the Pseudo-Philip. Attalus also defeated Dicygria, king of the Thracian Gauli, and overthrew Prutias of Bithynia. On his death, his ward and nephew, Attalus III, surnamed Philometor, undertook the ruins of government, from b. c. 138 to 133, and on his death bequeathed his kingdom to the Romans. Soon after, Aristonicus, a natural son of Eumenes II, revolted and claimed the kingdom of Pergamum for himself; but in b. c. 130 he was vanquished and thrown into prison. The kingdom of Pergamum became a Roman province under the name of Asia. (Strab. L c., xiv. p. 646.) The city of Pergamum, however, continued to flourish and prosper under the Roman dominion, so that Pliny (L c.) could still call it "longe clarissimum Asiae Pergamum;" it remained the centre of jurisdiction for the districts, and constituted, with all the main-road, the western Asia converged there. Pergamum was one of the Seven Churches mentioned in the book of Revelations. Under the Byzantine emperors the greatness and prosperity of the city declined; but it still exists under the name of Bergama, and presents to the visitor numerous ruins and extensive remains of its ancient magnificence. A wall facing the town on the side of the ancients, of hewn granite, is 1,000 feet long, and engraved into the rock; above it a course of large substructions forms a spacious area, upon which once rose a temple univallated in sublimity of situation, being visible from the vast plain and the Aegean sea. The ruins of this temple show that it was built in the noblest style. Besides this there are ruins of an ancient temple of Asclepius, which, like the Nicephorion, was outside the city (Tac. Ann. iii. 63; Paus. v. 13. § 2); of a royal palace, which was surrounded by a wall, and connected with the Caicus by an aqueduct; of a pythaeum, a theatre, a gymnasion, a stadium, an amphitheatre, and other public buildings. All these remains attest the unusual splendour of the ancient city, and are proof of the admiration of those stupendous greatness. The numerous coins which we possess of Pergamum attest that Olympia were celebrated there; a vase found there represents a torch-race on horseback; and Pliny (x. 25) relates that public cock-fights took place there every year. Pergamum was celebrated for its manufacture of oil, (Bocchi, de Aegypt. p. 231; Plin. xxviii. 46,) and parchment, which derives its name (charta Pergamen) from the city. The library of Pergamum, which is said to have consisted of no less than 200,000 volumes, was given by Antony to Cleopatra. (Comp. Spon and Wheeler, Voy. i. p. 260, &c.; Clozel-Gouffier, Voyage Pittoresque, ii. p. 25, &c.;

COIN OF PERGE.

PERGAMUS (Περγαμος, Herod. vii. 112,) a fortress in the Pieric hollow, by which Xerxes passed in his march, leaving Mt. Pangaean on his right. It is identified with Pränista, where the lower maritime ridge forms a junction with Pangaean, and separates the Pieric valley from the plain of Philippes. (Lesk, Norwich Græce, vol. iii. p. 178.) [E. B. J.] PERGAMUS (Περγαμος), a town of Crete, to which a mythical origin was ascribed. According to Virgil it was founded by Aeaeus (Aes. iii. 133), according to Velleius Paterculus (i. 1) by Agamenon, and according to Servius by the Trojan prisoners belonging to the fleet of Agamemnon (ad Verg. Alex. L c.) Lycurgus, the Spartan legislator, was said to have died at this place, and his tomb was shown there in the time of Aristoxenus. (Plut. Lyc. 32.) It is said by Servius (L c.) to have been near Cydonia, and is mentioned by Pliny (iv. 12. a. 20) in connection with Cydonia. Consequently it must have been situated in the western part of the island, and is placed by Pashley at Platysis. (Travels in Crete, vol. ii. p. 23.) Scylax says (p. 18, Huds.) that the Dictynnaeus stood in the territory of Pergamus.

PERGA'NTIUM (Περγαντιος; Ech. Περγαντος, Steph. B. s. c.), a city of the Lycites. It is the small island named Pergason, on the south coast of France. It is separated by a narrow channel from a point on the mainland which is turned towards Mace, one of the Stockades or Iles d'Hiera. [G. L.]

PERGE or PERGA (Περγη; Ech. Περγης), an ancient and important city of Pamphylia, between the rivers Cataractes and Cestrus, at a distance of 60 stadia from the mouth of the latter. (Strab. xiv. p. 667; Plin. v. 26; Pomp. Mel. i. 14; Ptole. v. 5. § 7.) It was renowned for the worship of Artemis, whose temple stood on a hill outside the town, and in whose honour annual festivals were celebrated. (Strab. L c.; Callim. Hymn. in Dion. 187; Scylax, p. 39; Dionys. Per. 854.) The coins of Perge represent both the goddess and her temple. Alexander the Great occupied Perge with a part of his army after quitting Phaselis, between which two towns he turned towards the interior. (Arrian, Anab. i. 27; comp. Polyb. v. 75, xxii. 25;
PERIMULA.

Liv. xxxviii. 37.) We learn from the Acts of the Apostles (xiv. 24, 25) that Paul and Barnabas preached the gospel at Perge. (Comp. Acts, xiii. 13.) In the ecclesiastical notices and in Hierocles (p. 672) Perge appears as the metropolis of Pamphylia. (Comp. Steph. B. s. v.; Eckhel, Doctr. Num. i. 5, p. 12.) There are considerable ruins of Perge about 16 miles to the north-east of Adalia, at a place now called Eski-Kalees. (Comp. Leake, Asia Minor, p. 132; Texier, Descrip. de l'Asie Mine., where the ruins are figured in 19 plates; Fellows, Asia Minor, p. 190, sqq.) (T. L. S.)

PERIMULA (Περιμούλα, Ptol. vii. 2. § 5), the name of a town of some commercial importance on the W. side of the Sinus Magnus (or gulf of Sicam), on a tongue of land anciently called the Aurea Chersonesus, and now known by the name of Malacca. Lassen places it in lat. 7° N. In its immediate neighbourhood was a small bay or indentation of the coast, which was called the Sinus Perjumpinicus (Περιμούλια κάλως). (V.)

PERIMULICUS SINUS. [PERIMULA.]

PERITHUS (Περίθος, Ptol. iii. 11. § 6, viii. 11. § 7; Xenoph. Anab. vii. 2. § 8; Eih. Περίθων), a great and flourishing town of Thrace, situated on the Propontis. It lay 22 miles W. of Solymbria, on a small peninsula (Ptol. iv. 15) at the bay which bears its name, and was near the point, like an amphitheatre, on the declivity of a hill (Diod. xvi. 76.) It was originally a Samian colony (Marcian, p. 29; Plut. Qu. Gr. 56), and, according to Synesius (p. 238), was founded about b. c. 599. Panofka, however (p. 23), makes it contemporary with Samothrace, that is about b. c. 1000. It was particularly renowned for its marine defences against Philip of Macedon (Diod. xvi. 74—77; Plut. Phoc. 14. At that time it appears to have been a more important and flourishing town even than Byzantium; and being both a harbour and a point at which several main roads met, it was the seat of an extensive commerce (Procop. de Aed. iv. 9). This circumstance explains the reason why so many of its coins are still extant; from which we learn that large and celebrated festivals were held here (Miœnet, i. 399—415; Eckhel, Doctr. Num. vol. iv. p. 445; Morell, Spec. Rei Num. tab. xiii. 143). According to Tzetzes (Chil. iii. 812), it bore at an early period the name of Mygdonia; and at a later date, but not before the fourth century of our era, it assumed the name of Heracleia; in which we find sometimes used alone, and sometimes with the additions H. Thraciae and H. Perinthos. (Procop. L. c. and B. Vandal. i. 12; Zosim. i. 62; Justin. xvi. 3; Eutrop. iv. 15; Anm. Marc. xxii. 2; Ios. Ant. pp. 175, 176, 332; Jorn. de Regm. Succ. p. 51, &c. On the variations in its name, see Taschuck, ad Melam, ii. 2, vol. iii. pt. ii. p. 102, seq.) Justinian restored the old imperial palace, and the squadrants of the city. (Procop. &c.) It is now called Eski Kraghik, and still contains some ancient ruins and inscriptions. (See Clarke's Travels, viii. p. 122, sqq.) (T. H. D.)

PERISADYES (Περισάδιες, Περισάδιτινοι), an Illyrian people, near the silver mines of Damastium, whose name seems to be corrupted (Strab. vii. p. 326; Kramer and Grohau, ad loc.)

PERITUR, a place in Lower Pannonia (Iltin Hieras, p. 562), probably the same as the one mentioned in the Ptolemy. Table under the name of Firelia, and in the Antonine Itinerary (p. 266) under that of Pyrru or Pyrrum, and situated on the road from Petovia to Siscia. (See Wesseling, It. Hieros. l. c.) (L. S.)

PERIZZITES. [Palaestina, p. 599.]

PERMESSUS. [Bozotta, p. 413, a.]

PERNE (Πέρνη), a small island off the coast of Ionia, which, during an earthquake, became united with the territory of Miletus. (Plin. ii. 91.) There was also a town in Thrace of this name, which is mentioned only by Steph. B. (a. n.) (L. S.)

FERNICIACUM, or PERNACUM in the Table, in North Gallia, is placed on a road from Bagacum (Barovii) to Aduaticus (Tomerns). The road passed from Bagacum to Geminiacum (Gemblow). From Geminiacum to Ferniciacum is xii. in the Anton. Itin., and xiii. in the Table; and from Perniacum to Aduaticus is xii. in the Table. The road is generally straight, but there is no place which we can identify as the site of Perniciacum; and the geographers do not agree on any position. (G. L.)

PERORSI (Περόρσης, Περορρος, Ptol. iv. 6. §§ 16, 17; Polyb. ap. Plin. v. 1. 8, vi. 35), a people of Libya, subdued by Sustonius Paulinus, who ingalled a few centuries after the Pergamum mine, and the extent of maritime country between the Canarius, who dwelt opposite to the Fortunate Islands, and the Phaenius, who occupied the banks of the Seneqal. (Leake, London Geog. Journ. vol. ii. p. 17.) (E. B. J.)

PERPERE'NA (Περπερενα), a place in Myasis, on the south-east of Adrianytium, in the neighbourhood of which is an olive-grove where the people of Ephesus used to grow their vines. It was said by some to be the place in which Thucydides had died. (Strab. xiii. p. 607; Plin. v. 32; Steph. B. s. v. Παπρεδατος, from whom we learn that some called the place Perene; while Ptol. v. 2. § 16, calls it Perpe or Permenre; Galen, Παπραδατος, p. 358; comp. Sestini, p. 75.) Some, without sufficient reason, regard Perpe as identical with Theodotopolis, mentioned by Hierocles (p. 661). (L. S.)

PERRANTHES. [Ambracia.]

PERRAEBI, PERRHAE'BA. [Thessalia.]

PERRHIDAE. [Attica, p. 336, n.]

PERS'BORA (Περσαβορα, Zosim. iii. 17), a very strong place in Mesopotamia, on the W. bank of the Euphrates which the emperor Julian crossed in his march across that country. Zosimus, who gives a detailed account of its siege, states that it was in size and importance second only to Ctesiphon. Ammianus, speaking of the same war, calls the place Piri-sabura (xxiv. c. 2); and Libanius Soph. mentions a city of the same name as the then ruling king of Persia, evidently supposing that it derived its name from Saper (or Shakepa). (Oros. Fum. p. 316.) Foriger has conjectured that it is represented by the present Adbor, and that it was situated near the part of the river Euphrates whence the usual Nahar-sarae flows, and no great distance from the Sippaha of Ptolemy (v. 18. § 7.) (V.)
PERSEPOLIS (Περσεπόλις, Dioec. xvi. 70; Pot. vi. 4, § 4; Curt. v. 4, 6; Persepolin, Strab. xv. 729: Ekh. Persepolisyn, the capital of Persia at the time of the invasion of Alexander, and the seat of the chief palaces of the kings of Persia. It was situated at the opening of an extensive plain (now called Marvdasht), and near the junction of the two streams, the Araxes (Bendamir) and the Medus (Palaides). The ruins, which are still very extensive, bear the local name of the Chel Minur, or Forty Columns. According to Diodorus the city was originally surrounded by a great wall of strength and beauty (xvii. 71). Strabo states that it was, after Susa, the richest city of the Persians, and that it contained a palace of great beauty (xv. p. 729), and adds that Alexander burnt this building to avenge the Greeks for the similar injuries which had been inflicted on them by the Persians (xv. p. 730). Arrian simply states that Alexander burnt the royal palace, contrary to the entreaty of Parmenion, who wished him to spare this magnificent building, but does not mention the name of Persepolis. (Anab. iii. 18). Curtius, who probably drew his account from the many extant notices of Alexander's expedition by different officers who had accompanied him, has fully described the disgraceful burning of the palace and temple of Persepolis by the Greek monarch and his drunken companions. He adds that, as it was chiefly built of cedar, the fire spread rapidly far and wide.

Great light has been thrown upon the monuments which still remain at Persepolis by the researches of Niebuhr and Ker Porter, and still more so by the interpretation of the cuneiform inscriptions by C. C. F. Weiland, whose work, although it does not result in their inquiries, it seems doubtful whether any portion of the present ruins ascend to so high a period as that of the founder of the Persian monarchy, Cyrus. The principal buildings are doubtless due to Dareius the son of Hystaspes, and to Xerxes. The palace and city of Cyrus was at Pasargada, while that of the later monarchs was at Persepolis. (J. B. Findlen, Roy. As. Soc. vol. x.; Lassen, in Ezech. and Gruber's Encycl. l.c.; Ferguson, Palaces of Nineveh and Persopolis Restor. Lond. 1851.) It has been a matter of some doubt how far Persepolis itself ever was the ancient seat of the capital; and many writers have supposed that it was only the high place of the Persian monarchy where the most splendid palaces and temples were grouped together. On the whole, it seems most probable that the rock on which the ruins are now seen was the place where the palaces and temples were placed, and that the city was extended at its feet along the circumjacent plain. Subsequent to the time of Alexander, Persepolis is not mentioned in history except in the second book of the Maccabees, where it is stated that Antiochus Epiphanes made a fruitless attempt to plunder the temples. (2 Maccab. ix. 1.) In the later times of the Muhammedan rule, the fortress of Istakhr, which was about 4 miles from the ruins, seems to have occupied the place of Persepolis; hence the opinion of some writers, that Istakhr itself was part of the ancient city. (Niebuhr, ii. p. 181; Chardin, Voyages, viii. p. 245; Ker Porter, vol. i. p. 576; Ouseley, Travels, ii. p. 522.)

PERSICUS SINUS (§ Persicus insula, Strab. vii. 78, xv. p. 727; Pot. vi. 3, § 1, 4, § 1, myxos, Pot. vi. 19, § 1; § kath βασιλείας Κρίνων, Strab. xvi. p. 765; § Περσική Χώρα, Agathem. l. 3; Mars Persicum, Plin. vi. 13. 16), the great gulf which, extending in a direction nearly NW. and SE., separated the provinces of Susiane and Persia, and the western portion of Carmania from the opposite shores of Arabia Felix. There are great differences and great errors in the accounts which the ancients have left of this gulf; nor indeed are the statements of the same author always consistent the one with the other. Thus some writers gave to it the shape of the human head, of which the narrow opening towards the SE. formed the neck (Mela, iii. 8; Plin. vi. 34. 28). Strabo, in one place states, that, at the entrance, it was only a day's sail across (xv. p. 727), and in another (xvi. p. 765) that from Harmuza the opposite Arabian shore of Mace was visible, in which Ammianus (xxii. 6) agrees with him. He appears to have thought that the Persian Gulf was little inferior in size to the Euxine sea (l. c.), and reckons that it was about 20,000 stadia in length. (Cf. Agathem. l. 3.) He placed it also, according to a certain system of parallelism, due S. of the Caspian (ii. p. 131, cf. also xi. p. 519). The earliest mention of the Persian Gulf would appear to be that of Hecataeus (Steph. B. s. v. Κόρση), but a doubt has been thrown upon this passage, as some MSS. read νοτίως instead of αναχώς.

For the ancient monasteries, see Aeschyl. Persa 60. (Curt. iii. 19; Plin. vi. 23. 25; Amm. Marc. xxii. 6, &c.; § Περσικα, Herod. iv. 3. 1: Ekh. Persa, Persia), the province of Persis, which must be considered as the centre of the ancient realm of Persia, and the district from which the arms of the Persians spread over all the neighbouring nations, was bounded on the N. by Media and part of the chain of the Paracosthas (Strab. xv. 737; Arrian, Ind. c. 40; Amm. Marc. xxii. 6; Chardin, Voy. iii. p. 253); the coast-line appears to have been, as it is now, sandy and hilly, and uninhabitable, owing to the poisonous-bearing winds. (Plin. xii. 20.) The principal mountaine chains bore the names of Paracosthas (Elowend) and Ochus (perhaps Nakhlia), and were, in fact, prolongations to the sea of the still higher ranges of Media. It was watered by no great river, but a number of smaller streams are mentioned, some of them doubtless still more fetid; the fountains made their way through these were the Araxes (Bend-amir), the Medus (Palaides), and the Cyrus (Kūr), in the more inland part of the country; and along the coast, the Bagrads, Padagrus, Heratemis, Rhogonias, Orosias, &c. (Plin. vi. 23. a 26; Arrian, Ind. c. 39; Amm. Marc. xxii. 6; Strab. xvi. p. 737, &c.) The principal cities of Persis were Meshkā, its traditional capital, and the site of the tomb of its first monarch, Cyrus; Persepolis, the far-famed seat of the palaces and temples of Dareius the son of Hystaspes, and his successors; Gābak, one of the residences of the Persian kings; Taock, and Arapdāna.

The Perses were properly the native inhabitants
of this small district; though in later times the name
king was applied generally to the subjects of the
great king, whose empire extended, under Dareius the son
of Hystaspes, from India to the Mediterranean.
In the earliest times of the Old Testament they are
not mentioned by name as a distinct people, and
when, in the later days of the captivity, their name
occurs, they must have been either the inhabitants of the
great empire above noticed (Ezek. xxxviii. 5; Esth.
i. 3—18; Ezra, iv. 5; 1 Maccb. i. 1, &c.), and not
simply of the limited district of Persia. According
to Herodotus, the ancient people were divided into
three leading classes, warriors, husbandmen, and
nomades. In the first class, the Parthagades, Mar-
raphil, and Maspi, were the most important sub-
divisions. The Achemenides, from whom their
well-known line of kings descended, was one of
the families of the Parthagades. The tribes of husband-
men bore the names of Pantithalaei, Derusiatei and
Germanii; those of the nomades were called, Dai,
Mardi, Dropici and Sagartili. (Herod. i. 125.) It
is clear from this account that Herodotus is describing
what took place in the later days of the empire
before his own times, and that his view embraces a
territory far more extensive than that of the small
province of Persia. We must suppose, from his notice
of the nomades tribes, that he extended the Persian
race over a considerable portion of what is now called
Khorasan; indeed, over much of the country which at
the present day forms the realm of Persia. In
still later times or other tribes or subdivisions are met
with, as the Parnesaceni, Messabatae, Stabaei, Suzaei,
Hippopaghi, &c. &c. Herodotus states further that
the most ancient name of the people was Artaei
(Herod. vii. 61), a form which modern philology has
shown to be in close connection with that of the
Arii, the earliest title of their immediate neighbours, the
Medes. Both alike are derived from the old Zend and Sanscrit Arya, signifying a people of noble
descent; a name still preserved in the modern Ftrak
(Ariaka). (Muller, Journ. Asiat. iii. p. 259; Lassen,
Ind. Alterth. ii. p. 7.) There can be no doubt that
the name Persae is itself of Indian origin, the earliest
form in which it is found on the cuneiform inscrip-
P. 4.)

The Persian people seem to have been in all
times noted for the pride and haughtiness of their
language (Aescyl. Pera. 795; Amm. Marc. xxiii. 6);
but, in spite of this habit of boasting, in their
everthing, under Cyrus and his immediate suc-
cessors, they appeared to have made excellent soldiers.

Herodotus describes fully the arms and accoutre-
ments of the foot-soldiers, archers, and lancers of
the army of Xerxes (vii. 61), on which description
the well-known sculptures at Persepolis afford a
still living commentary. (Cf. also Strab. xv. p. 734;
Xen. Cyrop. vi. 3. § 31.) Their cavalry also was
celebrated (Herod. L. c. ix. 79, 81; Xen. Cyrop. vi.
4. § 1.). Scbrabo, who for the most part confines
the name of Persae to the inhabitants of Persia,
has fully described some of the manners and cus-
toms of the people. On the subject of their re-
ligious worship Herodotus and Strabo are not at
one, and each writer gives separate and un-
connected details. The general conclusion to be drawn
is that, in the remotest ages, the Persians were pure
fire-worshippers, and that degrees they adopted
what became in later times a characteristic of their
religious system, the Dualistic arrangement of two
separate principles of good and evil, Hormuzd and
Ahriman. (Strab. xv. p. 727—738; Herod. i. 83,
133; Xen. Cyrop. i. 22.) Many of their ancient
religious customs have continued to the present day;
the fire-worshippers of India still contending that
they are the lineal descendants of the ancient
Persians. The language of the ancient people was
strictly Indo-Germanic, and was nearly connected
with the classical Sanscrit, and of the cuneiform inscrip-
tions at Mervah—, the site of Pasargada, and the place where Cyrus was
buried,—and those of Dareius and Xerxes at Perse-
polis and Ecbatanæ, which have been deciphered by
Colonel Rawlinson and Professor Lassen. (Rawlinson,
Journ. As. Soc. vol. 2.; Lassen, Zeitschrift f. Morgen-
enl. vi. 1; Hitzig, Grammat. d. Doris, Zurich,
1847; Benfey, Pers. Keil-Inscrift, Leipzig, 1847.)

The government of Persia was a rigid monarchy.
Their kings lived apart from their subjects in well
secured palaces (Esth. iv. 2, 6), and rejoiced in
great parks (rapaëwros), well stocked with game
and animals for the chase (Cyrop. i. 8. § 14, viii. 1.
§ 38, Anat. i. 2. § 7; Curt. viii. 1. § 11), and
passed (in later times widely extended) their summer at Ecbatanæ, their
spring at Susa, and their winter at Babylon.
(Nabem.
i. 1; Dan. vii. 2; Esth. i. 5, 5; Xen. Anat. iii. 5.
§ 15, Cyrop. viii. 6. § 22.) Like other eastern
monarchs, the Persian kings possessed a well ap-
pointed harem, many curious details of which we
gather from the history of Esther (cf. also Curt.
ili. § 3; Athen. xiii. p. 557; Plut. Alex. c. 18;)
and they were accustomed to receive from their sub-
jects direct adoration (tarpovkéa), as the pre-
sumed descendants or representatives of Hormusd.
(Plut. Themist. c. 7; Curt. vi. 6. § 2, viii. 5. § 6.)
Their local government was a pure despotism; but
in some extraordinary cases a sort of privy council
was called of the seven chief princes, who stood
around the royal throne, like the Ameshabandar
round the throne of Hormusd. (Herod. vii. 8, viii. 67;
Esth. i. 14, 19, viii. 14.) Whatever document had
once passed the king and had been sealed by the
royal signet was deemed irrevocable. (Esth. i. 19,
vi. 8; Dan. vii. 16; cf. also Chardin, Voy. iii. 418.)
Over the individual provinces—which in the time of Dareius was in
hereditary names (her. iii. 89), but were subsequently much more
numerous (Esth. i. 1), probably from the sub-
division of the larger ones—were placed satrap,
whose business it was to superintend them, to collect
the revenues, and to attend to the progress of agriculture.
(Her. iii. 89, 97; Joseph. Ant. xi. 3, &c.)
Between the satraps and the kings was a well or
organised system of couriers, who were called dorypia
or doroïdi (Plut. Fort. Alex. viii. 794, ed. Reiske),
who conveyed their despatches from station to station
on horses, and had the power, when necessary, to press
horses, boats, and even men into their service.
As this service was very irksome and oppressive, the
word dorypia came to mean compulsion or de-
tention under other circumonences. (Joseph. Ant.
xi. 2. § 3; Esth. iii. 13, 15, viii. 10, 14; Bentley's
Memander, p. 56.)

The history of the Persian empire need not be
repeated here, as it is given under the names of the
respective kings in the Dict. of Biogr.
[V.]

PERUSIA, a town of the Ilertes in Hispuni
Terracoenian, which still exists, situated under the old name
on the Alcombire. (Juv. Ant. p. 591.)

PERUSIA (Περυσία: Ekv. Persinian: Pervia),
one of the most important and powerful cities of

P F 2
Etruria, situated nearly on the eastern frontier of that country, on a lofty hill on the right bank of the Tiber, and overlooking the lake of Thraexyane which now derives from it the name of Lago di Perugia. It closely adjoins the frontiers of Umbria, and hence the tradition reported by Servius, that it was originally an Umbrian city, inhabited by the tribe called Sarniates, is at least a very probable one. (Serv. ad Aen. x. 201.) The same author has, however, preserved to us another tradition, which ascribes the foundation of Perusia to a hero named Auletes, the brother of Ocnus, the reputed founder of Mantua. (Is. x. 198.) Justin's assertion that it was of Achaean origin is therefore to be rejected as a mere fable; but whatever historical value may be attached to the statements of Servius, it seems probable that Perusia, in common with the other chief places in the same part of Etruria, was in the first instance an Umbrian city, and subsequently passed into the hands of the Etruscans, under whom it rose to be a powerful and important city, and one of the chief members of the Etruscan confederacy. It is not till B.C. 310, when the Romans had carried their arms beyond the Caminian forest, that the name of Perusia is heard of in history; but we are told that at that period it was one of the most powerful cities of Etruria. (Liv. iv. 37.)

The three neighbouring cities of Perusia, Cortona, and Arretium, on that occasion, with the object of concluding a peace with Rome for thirty years (Liv. L. c.; Dio. xx. 35); but they seem to have broken it the very next year, and shared in the great defeat of the Etruscans in general at the Vadimonian lake. This was followed by another defeat under the walls of Perusia itself, which compelled that city to sue for peace; but the state which had been plundered at discretion, and was occupied by a Roman garrison, is one of those obvious perversions of the truth that occur so frequently in the Roman annals. (Liv. iv. 40.) When we next meet with the name of Perusia, it is still as an independent and powerful state, which in B.C. 295, in conjunction with Clusium, was able to renew the war with Rome; and though the Romans were defeated by Cn. Fulvius at Caudine, the Romans took the lead in renewing the contest the next year. On that occasion they were again defeated with heavy loss by Fabius, 4500 of their troops slain, and above 1700 taken prisoners. (Id. x. 30, 31.) In consequence of this disaster they were compelled before the close of the year to sue for peace, and, by the payment of a large sum of money, obtained a truce for forty years, B.C. 294. (Id. x. 37.) At this time Livy still calls the three cities of Perusia, Volscini, and Arretium (all of which made peace at the same time) the three most powerful states and chief cities of Etruria. (Id. L.c.)

We find no other mention of Perusia as an independent state; and we have no explanation of the circumstances, or furnish under which it ultimately became a dependency of Rome. But during the Second Punic War it figures among the allied cities which then formed so important a part of the Roman power: its cohorts were serving in her armies (Liv. xxviii. 17), and towards the end of the contest it was one of the "populi" of Etruria which came forward with the offer to furnish subsidies to the fleet of Scipio. Its contribution consisted of corn, and timber for shipbuilding. (Id. xxviii. 45.) With this exception, we meet with no other mention of Perusia till near the close of the republican period, when it bore so conspicuous a part in the civil war between Octavian and L. Antonius, in B.C. 41, as to give to that contest the name of Bellum Perusinum. (Suet. Aug. 9; Tac. Ann. v. 1; Oros. vi. 18.) It was shortly after the outbreak of hostilities on that occasion that L. Antonius, finding himself pressed on all sides by three armies under the command of Brutus, Fulvius, and Octavian himself, threw himself into Perusia, trusting in the great natural strength of the city to enable him to hold out till the arrival of his generals, Ventidius and Asinius Pollio, to his relief. But whether from disaffection or incapacity, these officers failed in coming to his support, and Octavian surrounded the whole hill on which the city stands with strong lines of circumvallation, so as to cut him off from all supplies, especially on the side of the Tiber, on which Antonius had mainly relied. Famine soon made itself felt in the city; the siege was protracted through the winter, and Ventidius was foiled in an attempt to compel Octavian to raise it, and drew off his forces without success. L. Antonius now made a desperate attempt to break through the enemy's lines, but was repulsed with great slaughter, and found himself at length compelled to capitulate. His own life was spared, as were those of most of the Roman nobles who had accompanied him; but the chief citizens of Perusia itself were put to death, the city given up to plunder, and an accidental conflagration having been spread by the wind, ended by completely destroying the whole of the city. (Appian, B.C. 64; Dion Cass. lxi. 14; Veil. Pat. ii. 74; Flor. iv. 5; Suet. Aug. 14, 96.) A story related by several writers of Octavian having sacrificed 300 of the prisoners at an altar consecrated to the memory of Caesar, is in all probability a fiction, or at least an exaggeration. (Dion Cass. l.; Suet. Aug. 15; Secund. 11; Merivale's Roman Empire, vol. iii. p. 227.)

Perusia was raised from its ashes again by Augustus, who settled a fresh body of citizens there, and the city assumed in consequence the surname of Augusta Perusia, which we find it bearing in inscriptions; but it did not obtain the rank or title of a colony; and its territory was confined to the district of tribus. (Appian, B.C. 64; Dion Cass. lxi. 14; Orell. Inscr. 93—95, 608.) Notwithstanding this restriction, it appears to have speedily risen again into a flourishing municipal town. It is noticed by Strabo as one of the chief towns in the interior of Etruria, and its municipal consideration is attested by numerous inscriptions. (Strab. v. p. 226; Plin. iii. 5, 8, 9; Pol. iii. 1, 49; Orell. Inscr. 2531, 3795, 4038.) From one of these we learn that it acquired under the Roman Empire the title of Colonia Vibia; but the origin of this is unknown, though it is probable that it was derived from the emperor Trajanus Gallus, who appears to have bestowed some conspicuous benefits on the place. (Vergiliöö, Íphig. Íerseg. pp. 579—580; Zumpt, Íe Coloniae, p. 537.) The name of Perusia is again mentioned in history till after the fall of the Roman Empire, but its natural strength of position rendered it a place of importance in the troubled times that followed; and it figures conspicuously in the Gothic wars, when it is called by Procopius a strong fortress and the chief city of Etruria. It was taken by Belisarius in 547; and with a strong garrison; in 547 it was besieged by Totila, but held out against his arms for nearly two years, and did not surrender till after Belisarius had quitted Italy. It was again recovered by Narses in 552. (Procop. B. G. 1. 16, 17, iii. 6, 25, 35, iv. 53.)
PESLA.

It is still mentioned by Pausanias (Hist. Lang. ii. 16) as one of the chief cities of Tuscia under the Lombards, and in the middle ages became an independent republic. Persugia still continues a considerable city, with 15,000 inhabitants, and is the capital of one of the provinces of the Roman states.

The modern city of Persugia retains considerable vestiges of its ancient date. The most important of these is the remains of the walls, which agree in character with those of Chiusi and Toscan, being composed of long rectangular blocks of travertine, of very regular masonry, wholly different from the ruder and more massive walls of Cortona and Volterra. It is a subject of much doubt whether these walls belong to the Etruscan city, or are of later and Roman times. The ancient gates, two of which still exist, must in all probability be referred to the latter period. The most striking of these is that now known as the Arco d'Augusto, from the inscription "Augusta Perusia" over the arch: this probably dates from the restoration of the city under Augustus, though some writers would assign it to a much earlier period. Another ancient gate was the Porta Marsia, also retains its ancient arch; while several others, though more or less modernised, are certainly of ancient construction as high as the impost. It is thus certain that the ancient city was not more extensive than the modern one; but, like that, it occupied only the summit of the hill, which is of very considerable elevation, and sends down its roots and underfalls on the one side towards the Tiber, on the other towards the lake of Trasymene. Hence the lines of circumvallation drawn round the foot of the hill by Octavian enclosed a space of 56 stadia, or 7 Roman miles (Appian, B. C. v. 33), though the circuit of the city itself did not exceed 3 miles.

The chief remains of the ancient Etruscan city are the sepulchres without the walls, many of which have been explored, and one—the family tomb of the Volturni—has been preserved in precisely the same state as when first discovered. From the inscriptions, some of which are bilingual, we learn that the family name was written in Etruscan "Velrimas," which is rendered in Latin by Volturnus. Other sepulchres belong to the families whose names assumed the Latin forms, Aria, Caesia, Petronia, Vettia, and Vib. Another of these tombs is remarkable for the careful construction and regular masonry of its arched vault, on which is engraved an Etruscan inscription of colossal length. But a far more important monument of that people is an inscription now preserved in the museum at Perugia, which extends to forty-six lines in length, and is the only considerable fragment of the language which has been preserved to us. [Etruria, p. 585.] Numerous sarcophagi, urns, vases, and other relics from the various tombs, are preserved in the same museum, as well as many inscriptions of the Roman period. [Vermiglioli, Iterascrips Perusini, 2 vol. 40; Perugia, 1834; Id. II Sepolcro dei Volturni, 4to, Perugia, 1841; Dennis's Etruria, vol. ii. pp. 458—459.]

We learn from ancient authors that Juno was regarded as the tutelary deity of Persia till after the burning of the city in a.D. 40, when the temple of Vulcan being the only edifice that escaped the conflagration, that deity was adopted by the surviving citizens as their peculiar patron. (Dion Cass. xlvii. 14; Appian. B. C. v. 49.)

PECUS or PESCLA (Not. Imp. c. 28, vol. i. p. 75, ed. Bicking), is probably the border-fortress in the N. of the Thebaid, which Ptosyne (iv. 5. § 71) calls Πεσκονήσου και Πεσκολούς. Pesla stood on the right bank of the Nile, and was the quarters of a German company (turna) of cavalry (D'Anville, Mémo. sur l'Égypte, p. 190). [W. B. D.]

PESER, PESONUS (Peregrina, Persus, Perusius).—The principal town of the Tolistoiboi, in the west of Galatia, situated on the southern slope of Mount Dindymus or Aglatias, near the left bank of the river Sangarius, from whose sources it was about 15 miles distant. (Paus. i. 4. § 3; Strab. xii. p. 567.) It was 16 miles south of Germa, on the road from Ancra to Amorium. (I. Ant. pp. 201, 202.) It was the greatest commercial town in those parts, and was believed to have derived its name from the image of its great patron divinity, which was said to have fallen from heaven. (Herodian, i. 11; Amm. Marc. xxi. 9.) Pessinus owes its greatest celebrity to the goddess Ares or Cybele, whom the natives called Agalatia, and to whom an immensely rich temple was dedicated. Her priests were the civil and military rulers of the place; but in later times their honours and powers were greatly reduced. (Strab. l. c., x. p. 469; Diod. Sic. iii. 58, &c.) Her temple contained her image, which, according to some, was of stone (Liv. xxix. 10, 11), or, according to others, of wood, and was believed to have fallen from heaven. (Apolod. iii. 11; Amm. Marc. R.G.) The name of the goddess appears to have extended all over the ancient world; and in n. c. 204, in accordance with a command of the Sibylline books, the Romans sent a special embassy to Pessinus to fetch her statue, it being believed that the safety of Rome depended on its removal to Italy. (Liv. l. c.; Strab. xii. p. 567.) The statue was set up in the temple of Victory, on the Palatine. The goddess, however, continued nevertheless to be worshipped at Pessinus; and the Galli, her priests, sent a deputation to Manlius when he was encamped on the banks of the Sangarius. (Liv. xxxviii. 18; Polyb. xxx. 4.) At a still later period, the emperor Julian worshipped the goddess in her ancient temple. (Amm. Marc. l. c.) The kings of Parthia adorned the sanctuary with a magnificent edifice and, probably coins of the period. Under the Roman dominion the town of Pessinus began to decay, although in the new division of the empire under Constantine it was made the capital of the province Galatia Salutaris. (Hier. p. 697.) After the sixth century the town is no longer mentioned in history. Considerable ruins of Pessinus, especially a well-preserved theatre, exist at a distance of 9 or 10 miles to the south-east of Vesri Hisar, where they were first discovered by Texier. (Descript. de l'Asie Mineure.) They extend over three hills, separated by valleys or ravines. The marble seats of the theatre are nearly entire, but the scene is already destroyed; the whole district is covered with blocks of marble, shale, and fragments of columns and other fragments, showing that the place must have been one of unusual magnificence. (Hamilton, Researches, i. p. 438, foll.; Leake, Asia Minor, p. 82, foll., who seems to be mistaken in looking for Pessinus on the right bank of the Sangarius. [L. S.]

PETALA, PETALAI, PETALAE, incorrectly called Petalia (Peraia) by Strabo (5. p. 444), small islands off the coast of Euboea, at the entrance of the Euripus, now Petalia. (P. L. iv. 12. a. 23; Leake, Northern Greece, vol. ii. p. 423.)
PETAVONIUM.

PETAVONIUM (Πεταβώνιον, Ptol. ii. 6 § 35), a town of the Superai in Hispania Tarraconensia, SE. of Asturica. (Itin. Ant. p. 423.) [T. H. D.]

PETELIA or PETILLIA (Πέτελια: Edh. Πέτηλιον, Petelium: Str. Rom.]) an ancient city of Brutantium, situated about 12 miles N. of Crotone, and 3 miles from the E. coast of the peninsula. According to the Greek traditions it was a very ancient city, founded by Philoctetes after the Trojan War. (Strab. vi. p. 254; Virg. Aen. iii. 401; Serv. ad loc.) This legend probably indicates that it was really a town of the Chones, an Oenotrian tribe; as the foundation of Chone, in the same neighbourhood, was also ascribed to Philoctetes. It was only a small place (Virg. L. c.), but in a strong situation. We have no account of its receiving a Greek colony, nor is its name ever mentioned among the Greek cities of this part of Italy; but, like so many of the Oenotrian towns, became to a great extent Hel lenised or imbued with Greek culture and manners. It was undoubtedly for a long time subject to Crotone, although comprised within the territory of that city, and probably for this reason its name is never mentioned during the early history of Magna Graecia. But after the irruption of the Lucanians, it fell into the hands of that people, by whom it was strongly fortified, and became one of their most important strongholds. (Strab. i. c.) It is apparently on this account, that Strabo calls it "the metropolis of the Lucanians," though it certainly was not included in Lucania as the term was understood in his day. Petelia first became conspicuous in history during the Second Punic War, when its citizens remained faithful to the Roman alliance, notwithstanding the general defection of the Brutantians around them, n. c. 216. They were in consequence besieged by the Brutantians as well as by a Carthaginian force under Himilco; but though abandoned to their fate by the Roman senate, to whom they had in vain sued for assistance, they made a desperate resistance; and it was not till after a siege of several months, in which they had suffered the utmost extremities of famine, that they were at length compelled to surrender. (Liv. xxii. 20, 21; Appian, M. A. 136; Fronto, Hist. iv. 5, § 18; Val. Max. vi. 6, § 2; Sil. Ital. xii. 431.) The few inhabitants who escaped, were after the close of the war restored by the Romans to their native town (Appian, l. c.), and were doubtless treated with especial favour; so that Petelia rose again to a prosperous condition, and in the days of Strabo was one of the few cities of Brutantium that was still tolerably flourishing and populous. (Strab. vi. p. 254.) We learn from inscriptions that it still continued to be a flourishing municipal town under the Roman Empire (Orell. Inscr. 137, 3058, 3939; Mommsen, Inscr. R. N. pp. 5, 6): it is mentioned by all the geographers and its name is still found in the Tabula, which is quoted by Heiberg from Tacitus to Crotone (Mel. ii. 4, § 8; Plin. iii. 10. 15; Ptol. iii. 1, § 75; Tab. Peut.) But we are unable to trace its history further: its identification with Strongoli is, however, satisfactorily made out by the inscriptions which have been found in the latter city. Strongoli is an episcopal see, with about 7000 inhabitants; its situation on a lofty and rugged hill, commanding the plain of the Noto (Nesithenes), corresponds with the accounts of Petelia, which is represented as occupying a position of great natural strength. There are no ruins of the ancient city, but numerous minor objects of antiquity have been found on the spot, besides the inscriptions above referred to.

The existence of a second town of the name of Petelia in Lucania, which has been admitted by several writers, rests mainly on the passage of Strabo where he calls Petelia the metropolis of Lucania; but he is certainly speaking of the well-known city of the name, which was undoubtedly in Brutantium. The inscriptions published by Antonini, to prove that there was a town of this name in the mountains near Velia, are in all probability spurious (Mommsen, It. R. N. App. p. 2), though they have been adopted, and his authority followed by Romaneili and Cramer. (Romaneili, vol. i. p. 348; Cramer's Italy, vol. ii. p. 367.)

The PETELINESI MONTES (τὰ Πετελίνια ὄρη), mentioned by Pintarch (Cyr. 11), to which Spartacus retired after his defeat by Crassus, are evidently the rugged group of the Apennines S. of the Crathis, between Petelia and Consentia. [E. H. B.]

PETEON (Πέτεος: Edh. Πετεός), a town of Boeotia, mentioned by Herodotus (II. ii. 500), was situated near the road from Thebes to Athens. (Strab. i. p. 410.) Strabo contradicts himself in the course of the same page (l. c.), in one passage placing Peteon in the Thesibis, and in another in the Haliartia. (Comp. Plut. Narr. Am. 4; Plin. iv. 7. s. 12; Steph. B. s. v.) The position of Peteon is uncertain. Leake supposes it may be represented by some ancient town at the southeastern extremity of the lake Paralimni. (Norther Greece, vol. ii. p. 326.)

PETINESCA, in the country of the Helvetii, is placed in the Itins. between Aventicum (Avenocae) and Salodurum (Solodurum); at the distance of xiii. in the Anton. Itin. from Aventicum and xiii. in the Tabularium; at the distance of x. from Salodurum in both the Itinerares. Some geographers have placed Petinesca at a place named Vercà, but the distance does not agree with that given by the Itins. between Petinesca and Salodurum, as D'Anville observes, who also says that the position of Biane (Biel) corresponds to the ancient numbers, if we take them to indicate Gallic leagues. Oliver also placed Petinesca in this position. [G. L.]

PETITARUS. [A. CH. L.]

PETOVIO (Πετώβιος, or Πετώβιος, Ptol. ii. 15. § 4: Petevio), also called Petovio (Itin. Ant. p. 262; and in inscriptions op. Orelli, n. 3592), Petavio, and Petavion, was an important town in Upper Iannia, on the river Dravus and the frontiers of Noricum. In inscriptions it is called a Roman colony, and bears the surname of Ulpius; whence it may be inferred that it received Roman colonists from either Trajan or Hadrian, who probably also extended the place. Its importance is sufficiently attested by the fact that it was the station of the Legio XIII. Gemina, and that an imperial palace existed outside its walls. (Tac. Hist. iii. 1; Amm. Marc. xiv. 56. 4; Hieroc. Hist. iv. 19.) The modern town of Pettas is situated on the left bank of the Draus; and as coins, inscriptions, and other ancient remains are found only on the opposite side, it is probable that the ancient Petovio was situated on the right bank opposite to the modern Pettas. (Comp. K. Mayer, Vorkunde der Steyrerraumsche Alterthümer, Grätz, 1782, 4to; Muchar, Noricum, i. p. 364.)

PETRA (Πέτρα), "rock," the name of several towns. 1. In Europe. 1. PETRA PETRUS, in Umbria. [I. T.]
PETRA.

2. [Πετρα: Εθ. Πετρίνθως, Πετρίνθος: Πετραλία], a city of Sicily, mentioned both by Pliny and Ptolemy among the inland towns of the island. Cicero also notices the Petrini among the communities that suffered from the exactions of Verres (Cic. Vere. iii. 39; Plin. iii. 8. a. 14; Ptol. iii. 4. § 14); and their name is mentioned at an earlier period by Diodorus as submitting to the Romans during the First Punic War. (Diod. xxiii. 18; Esc. H. p. 505.) The name is written Petrasa by Silius Italicus and Ptolemy, and the Petrini of the Antonine Itinerary is in all probability the same place. ([τίμ. Ant. p. 96.) Though so often mentioned by ancient authors, they afford very little clue to its position; but it is probable that the name is retained by the modern Petralia, a small town about 8 miles W. of Gagus, supposed to represent the ancient Eocyum. (Engyton.) Ptolemy indeed places these two towns near one another, though he erroneously transfers them both to the neighbourhood of Syracuse, which is wholly at variance with the mention of Petra in Diodorus among the towns subject to the Carthaginians as late as n. c. 254. (Civer. Sic. p. 367.) [E. H. B.]

3. A fortress of Macedonia, among the mountains beyond Libethra, the pass of which was disputed by the Thessalian Perrhaebi and the Macedonian kings. (Liv. xxxix. 26, xlv. 32.) It commanded a pass which led to Thyrium in Thessaly, by the back of Olympus. By this road L. Aemilius Paulus was enabled to throw a detachment on the rear of the Macedonian army which was encamped on the Enipeus, after the forces of Perseus had been defeated, in the pass of the rock, now called by P. Scipio Nasica, who had been sent against it with the consul's eldest son Q. Fabius Maximus. (Liv. xlv. 41.) Petra was situated on a great insular rock naturally separated from the adjoining mountain at the pass which leads from Elasmos or Serrana into the maritime plains of Macedonia. Here, which is at once the least difficult and most direct of the routes across the Olympos barrier, or the frontier between Macedonia and Thessaly, exactly on the Zygoas, are the ruins of Petra. (Lak. North. Greece, vol. iii. pp. 387, 430.) (E. B. J.)

4. A fortress of the Maedi, in Thrace. (Liv. xl. 22.)

5. A town in Illyricum, situated upon a hill upon the coast, which had only a moderately good harbour. (Cass. B. C. iii. 42.)

6. A place in the Corinthia. [Vol. I. p. 685, a.]

PETRA. II. In Asia. 1. [Πετρα, Ptol. v. 17, § 5, viii. 20, § 19; Pètra or Perä, Said. a. e. Pwóθkox; the Delta of the Old Testament, 2 Kie. xi. 17; Isth. xvi. 1; revising its various names see Robinson, Biblical Researches, vol. ii. Notes and Ill. p. 653), the chief town of Arabia Petraea, once the capital of the Idumeans and subsequently of the Nabataei, now Wady Musa. [NABATAREI.

Petra was situated in the eastern part of Arabia Petraea, in the district called under the Christian emperors of Rome Palæstina Tertia (Vet. Rom. Ital. p. 731, Wessel.; Malal. Chronogr. xvi. p. 400, ed. Bonn.). According to the division of the ancient geographers, it lay in the northern district, Gebalene; whilst the modern ones place it in the southern portion, Edh-Sherah, the Seif, or mountain-land, of the Old Testament (Genesis, xxxvi. 8).

It was seated between the Dead Sea and the Elanitic gulf; being, according to Diodorus Siculus (axa. 96), 300 stadia S. of the former, whilst the Tab. Peut. places it 98 Roman miles N. of the latter. Its site is a wilderness overtopped by Mount Hor, and diversified by cliffs, ravines, plains, and Wady, or watered valleys, for the most part but ill cultivated. Strabo (xvi. p. 779) describes it as seated in a plain surrounded with rocks, hemmed in with barren and streamless deserts, though the plain itself is well watered. For a description of the extent of the plain at rather less than 2 miles, agrees very nearly with that of Strabo, and both are confirmed by the reports of modern travellers. "It is an area in the bosom of a mountain, swelling into mounds, and intersected with gullies." (Irb and Manges, ch. viii.) It must not, however, be understood to be completely hemmed in with rocks. Towards the N. and S. the view is open; and from the eastern part of the valley the summit of Mount Hor is seen over the western cliffs. (Robinson, ii. p. 528.) According to Pliny (l. c.) Petra was a place of great resort for travellers.

Petra was subdued by A. Cornelius Palma, a lieutenant of Trajan's (Dion. Cass. xviii. 14), and remained under the Roman dominion for an indeterminate time, as we hear of the province of Arabia being enlarged by Septimius Severus a. d. 195 (id. Ixxx. 1, 2; Ec. viii. 18). It must have been during this period that those temples and mausoleums were made, the remains of which still arrest the attention of the traveller; for though the predominant style of the architecture is Egyptian, it is mixed with florid Graeco-Roman ornament, which clearly indicate their origin. (Robinson, ii. p. 532.)

The valley of Wady Musa, which leads to the town, is about 150 feet broad at its entrance, and is incircled with cliffs of red sandstone, which gradually increase from a height of 40 or 50 feet to 200 or 250 feet. Their height has been greatly exaggerated, having been estimated by some travellers at 700 and even 1000 feet (Irb and Manges, vii. Stephens, ii. p. 70; see Robinson, ii. p. 517 and note). The valley gradually contracts, till at one spot it becomes only about 12 feet broad, and is so overlapped by the cliffs that the light of day is almost excluded. The ravine or Six of Wady Musa extends, with many windings, for a good English mile. It forms the principal, and the Pharaohs were only the annexers to Petra, the entrance being broken through the wall. (Diod. Sic. ii. 48, xix. 97; Robinson, ii. p. 516; Labord, p. 55.) This valley contains a wonderful necropolis heewn in the rocks. The tombs, which adjoin or surmount one another, exhibit now a front with six Ionic columns, now with four slender pyramids, and by their mixture of Greek, Roman, and Oriental architecture remind the spectator of the remains which are found in the valley of Japhetshaphat and in other parts of Palestine. The further side of the ravine is spanned by a bold arch, perhaps a triumphal one, with finely-sculptured niches evidently intended for statues. This, like the other remains of this extraordinary spot, is ascribed by the natives either to the Pharaohs or to the Jinaars, but the Six. The bottom of the valley, in which it almost vanishes, winds the stream mentioned by Strabo and Pliny, the small but charming Wady Musa. In ancient times its bed seems to have been paved, as many traces still show. Its stream was spanned by frequent bridges, its sides strengthened with stone walls or quays, and numerous small canals derived
from it supplied the inhabitants with water. But now its banks are overgrown with hyacinths, oleanders, and other flowers and shrubs, and overshadowed by lofty trees.

Opposite to where the Siq terminates, in a second ravine-like but broader valley, another monument, the finest one at Petra, and perhaps in all Syria, strikes the eye of the traveller. This is the Khinnak—well preserved, considering its age and climate, and still elegant and interesting. Some of its columns, so fine in work and all the freshness and beauty of its colouring. It has two rows of six columns over one another, with statues between, with capitals and sculptured pediments, the upper one of which is divided by a little round temple crowned with an urn. The Arabs imagine that the urn contains a treasure.—El Khinnak, whence the name,—which they ascribe to Pharnab (Robinson, ii. p. 519). The interior does not correspond with the magnificence of the façade, being a plain lofty hall, with a chamber adjoining each of its three sides. It was either a mausoleum, or, more probably, a temple.

From this spot the cliffs on both sides the Wady are pierced with numerous excavations, the chambers in which are usually small. Among the façades are occasionally of some size and magnificence; all, however, so various that scarce two are exactly alike. After a gentle curve the Wady expands, and here on its left side lies the theatre, entirely hewn out of the rock. Its diameter at the bottom is 120 feet (Irbey and Mangels, p. 428), and its depth, about 70 feet. There are thirty-eight rows of seats, capable of accommodating at least 3000 spectators. Strangely enough, it is entirely surrounded with tombs. One of these is inscribed with the name of Q. Praefectus Florentinum (Loborde, p. 59), probably the governor of Arabia Petraea under Hadrian or Antoninus Pius. Another has a Greek inscription, not yet deciphered. A striking effect is produced by the bright and lively tints of the variegated stone, out of which springs the wild fig and tamarisk, while creeping plants overspread the walls, and thorons and brambles cover the pedestals and cornices (Isisah, xxxiv. 13). Travellers are agreed that these excavations were mostly tombs, though some think they may originally have served as dwellings. A few were, doubtless, temples for the worship of St. George, but subsequently converted into Christian churches.

Proceeding down the stream, at about 150 paces from the theatre, the cliffs begin to expand, and soon vanish altogether, to give place to a small plain, about a mile square, surrounded with gently eminences. The brook, which now turns to the W., traverses the middle of this plain till it reaches a ledge of sandstone cliffs, at a distance of rather more than a mile. This was the site of Petra, and is still covered with heaps of hewn stones, traces of paved streets, and foundations of houses. There are remains of several larger and smaller temples, of a bridge, of a triumphal arch of degenerate architecture, and of the walls of a great public building—Kaur Faron, or the palace of Pharon.

On an eminence south of this is a single column (Zob Faron, i. e. hasta virilis Pharonis), connected with the foundation-walls of a temple whose pillars lie scattered around in broken fragments. Loborde (p. 59) thinks that the Acropolis occupied an isolated hill on the W. At the NW. extremity of the cliffs is the Deir, or cloister, hewn in the rock. A ravine, like the Siq, with many windings, leads to it, and the approach is partly by a path 5 or 6 feet broad, with steps cut in the rock with inexpressible labour. Its façade is larger than that of the Khinnak; but, as in that building, the interior does not answer to it, consisting of a large square chamber, with a recess resembling the niche for the altar in Greek ecclesiastical architecture, and bearing evident signs of having been converted from a heathen into a Christian temple. The inscription carved on the lintel of its doorless doorway, from which Greek Scripture, was at length brought by the Mahometans. From that time it remained unvisited, except by some crusading kings of Jerusalem; and perhaps by the single European traveller, Thetmar, at the beginning of the 13th century. It was discovered by Burckhardt, whose account of it still continues to be the best. (Robinson, ii. p. 527.) Loborde's work is chiefly valuable for the engravings. See also Irbey and Mangels, Travels, ch. viii; Robinson, Bibl. Researches, vol. ii. p. 512, seq. [T. H. D.]

2. A town in the land of the Lazi in Colchis, founded by Joanna Thibias, a general of Justinian, in order to keep the Lazi in subjection. It was situated upon a rock near the coast, and was very strong (Procop. B. Pers. ii. 14, 17.). It was taken by Chosroes in A. D. 541, and its subsequent siege by the Romans is described by Gibbon as one of the most remarkables of the age. The first siege was relieved; but it was again attacked by the Romans, and was at length taken by assault after a long protracted resistance, A. D. 541. It was then destroyed by the Romans, and from that time disappears from history. Its ruins, which are now called Oudjenar, are described by Dubois. [Procop. B. Pers. ii. 17, 20, 30, B. Goth. iv. 11, 12; Gibbon, c. xii. vol. v. p. 201, ed. Smith; Dubois, Voyages autour du Caucase, vol. iii. p. 86, seq.]

3. A very strong fortress in Sagdiana, held by Arimazes when Alexander attacked it. (Curt. viii. 11; comp. Arrian, iv. 19; Strab. xi. p. 517.) It is probably the modern Koiteen, near the pass of Kelepja or Derbend. [See Dict. of Biogr. Vol. I. p. 286.]

PETRAS MAJOR (Πηράς ἡ μέγας), Scyl. p. 45; Ptol. iv. 5 § 3; Stadim. § 39), a harbour of Marmaria, a day's sail from Phoinik Portus, and the same as the large harbour which Strabo (xiv. a. 808) places by Ardanaes Pron. The place is described as lying opposite to Chersonesus of Crete, at a distance of 3000 stadia. It agrees in position with Port Bardia, where there are springs to the W. of Marse Solonum. [E. B. J.]

PETRAS MINOR (Πηράς ἡ μικρός), Scyl. c.; Ptol. iv. 5 § 3; Stadim. § 39), a harbour of Marmaria, half a day's sail from Antipyrgus. It has been identified with Magharab-el-Habab, where there are a great number of catacombs remarkable for their Graeco-Egyptian style. These curious excavations, of which plans are given in Pacco (Voyage dans la Marmarique, Planches, pl. v.), are to be identified according to that traveller (p. 49), with the sinuous caverns of Bombara (Boufara), resembling the Egyptian hypogaeum, which the Greeks called "Syringes," mentioned by Synesius (Ep. 104); but Barth (Wenderungen, p. 512) has shown that the description of the bishop of Potлемai cannot be applied to these catacombs and their locality. A coin with the epigraph ΠΕ-ΠΑ, which Pellerin referred to this port in Marmaria is by Eckhel (iv 116) assigned to a Cretan mint. [E. B. J.]
PETRIA. A fortress in the N. of Britannia Romana, between the Wall and the river Irthing, where the Ala Petriana was quartered. Camden (p. 1030) identifies it with Old Pentir; but Horsley (Brit. Rom. p. 107) and others fix it with more probability, at Cambeck Fort or Castle-steads. (Not. Imp.) It is called Banna by the Geogr. Rav. (Horsley, p. 488.) [T. H. D.]

PETRIANIA. [Petra, No. 2.]

PETROCORII (Πηροκόρει, Ptol. ii. 7 § 12), a Gallic people, whom Ptolemy places in Aquitania. He names the chief city Vesunna, which is Perigord. Caesar mentions them (vi. 75) as sending a contingent of 5000 men to aid in raising the siege of Alesia; this is all that he says about them. The passage in Pliney (iv. 18. s. 83) in which he describes the peoples of the Petrocorii is doubtful: "Cedurici, Nitiobrigae (a correction, see Nitiobriges), Tarne- que amno discreti a Tolosanis Petrocorii." This passage makes the Tarni (Tarn) the boundary between the territory of Tolosa (Toulouse) and the Petrocorii, which is not true, for the Cedurici were between the Petrocorii and the territory of Tolosa. Scarcely less improbable is "Cedurici, Nitiobrigae, Tarne amni discreti a Tolosanis Petrocorii." But this is not true, for the Nitiobriges did not extend to the Tarn. Strabo (iv. pp. 190, 191) mentions the Petrocorii among the people between the Garonne and the Loire, and near the Nitiobriges, Cadurci, Lemovices, and Arverni. He says that there were iron mines in the country. The Petrocorii occupied the diocese of Perigordus and Sarlat (D'Anville). Besides Vesunna their territory contained Correze, Truyet, Dioullion, and some other small places. [G. L.]

PETROMANTALUM, in Gallia, is placed by the Antonine Itinerary on a road which runs from Carcasson to through Rolomagna (Pithmius). It also appears on a road from Caesearonagus (Beaucaire) to Briva Isarae or Pontisae, on the Oise, a branch of the Seine. In the Table the name is written Petumenvico. The site is uncertain. The name bears some resemblance to that of Magni; but the site of Magni does not accurately correspond to the distances in the Itinerary. [G. L.]

PETROSCETA. [Martinville, p. 282, b.]

PETRUIA. [Panthe.

PEUCE (Πεύχε, Ptol. iii. 10 § 2; Strab. vii. p. 305), an island of Moesia Inferior, formed by the two southernmost mouths of the Danube. It derived its name from the abundance of pine-trees which grew upon it. (Eratosth. in Schol Apollon. iv. 310.) It was of a triangular shape (Apollon. I. iv. 23). It was larger as Rhodes. By Ptolemy (v. 84. s. 2) it is called a Getaic island; by Valerius Flaccus (vii. 217) a Sarmatian one. It has been identified with the modern island of Pusina or St. George, between Badabog and Ismael; but we must recollect that these parts were but little known to the ancients, and that in the lapse of time the mouths of the Danube have greatly changed their course. (Plin. iv. 12. s. 24; Mela, ii. 7; Adv. Ausc. Orb. 440; Dion. Perieg. 401; Claud. IV Cons. Honor. 630, &c.) [T. H. D.]

PEUCELATOIS (Πευκελατης, Arrian, Anatol.

PHAEI. [Indic. 4: Πευξεια Περγαμ.] Strab. xv. p. 698; Plin. vi. 17. s. 21: Ech. Peucatenses, Pline; Πευκαλατις, Dionys. Per. 11432), a district of India on the NW. frontier, along the Gophen or Cebul river, in the direction of the Pamir. The actual name of the town, which was probably Peucela, is nowhere found, but the form of the word leaves no doubt that it is, like the majority of the names which have been preserved by Arrian, of gentile Semitic or Indian origin. Strabo and Pliney both call the city itself Peucatenses. Arrian in one place gives the name to a district (iv. 22), without mentioning that of the capital or chief town; in another he calls the capital Peucelactis, or, according to the Florentine MS., Peucela. (Indic. c. 1.) There can be little doubt that this is the same place or district mentioned in Ptolemy under the form of Peucela (vili. 11 § 44), and in the Perip. Mar. Eryth. (c. 47). Both are connected with the Gandarissi, — the Sanscrit Gandarasa,— and both are alike placed in NW. India. Prof. Wilson has shown that the Greek name is derived from the Sanscrit Pukhdkara or Pukhalaka, the Pukhaolaca, of the Hindus, which was placed by them in the country of the Gandarissi, and also by the modern Pandharis of Strabo, and which is still represented by the modern Petchey or Pakholi, in the neighborhood of Pukhdkara. (Wilson, Arrian, pp. 183, 184.)

PEUCETII (Πευκετικης), a people of Southern Italy, inhabiting the southern part of Apulia. This name was that by which the people were identified in the Greeks, but the Romans called them Pescidicti, which, according to Strabo, was the national appellation employed also by themselves. (Strab. vii. pp. 277, 282.) Their national affinities and origin, as well as the geographical details of the country occupied by them, will be found in the article Apulia. [E. H. B.]

PEUCINCUS (Πευκινκος, Ptol. iii. 5 § 18, 10 § 9; Strab. vii. p. 305, seq.; Pline, iv. 14. s. 28) was a branch of the Bastarnae, inhabiting the island of Peuce. Tacitus (Germ. 46) and Jornandes (Goth. 16) write the name Peucini, which also appears in several MSS. of Strabo; whilst Ammianus Marcellinus (xxii. 6. § 43) calls them Peuci, and Zosimus (iv. 42) Peucini. [T. H. D.]

PHABIRANUM (Φαβιρανος), a city in the country of the Chanci Minores, that is, the district between the Albia and Visurgis (Ptol. ii. 11 § 27), is generally identified with the modern city of Bre- men; though some, with more probability, look for its site at Brennero. (Wilhelm, Germaniens, p. 162.) [L. E.]

PHACIUM (Φαξιος; Eth. Φακιος). A town on the coast of Thessaly, in the district Pegasiotis, placed by Leake a little below the right bank of the Peucina at Alifaka, but by Kiepert upon the left bank. Brasidas marched through Phaciium in b. c. 454. (Thuc. iv. 78.) The town was laid waste by Philip, b. c. 198 (Liv. xxiii. 13), and was occupied by the Roman general Plancus, in the war with Aemilius Paulus, b. c. 191. (Liv. xxxvi. 13.) Phaciium is probably the same place as Phucus, which Polybius (xxii. 25) calls a town of Macedonia. (Comp. Steph. B. s. v.: Leaks, Northern Greece, vol. iv. p. 493.)

PHACUSSA (Pline. iv. 12. s. 33: Φαχουσσα, pl. Steph. B. s. v.), an island in the Aegean sea, one of the Sphacteriae. [PHAEOCAE. [Corcyra.]

PHAEIDAEDES. [Delphit. p. 764.]

PHAEIDIAS. [MEGALEXPOLIS. p. 509, b.]

PHALENIANEA (Φαλενια), a town in Raetia
or Vindelicia, only on the lower bank of the Danube is mentioned by Ptolemy (ii. 12. § 4). [L.S.]

PHAENO (Παένος, Euseb. Onomast. s. v. Φαέων; Φαέων, Hieroc. p. 723), formerly a city of Idumaean, and afterwards a village of Arabia Petraea, between Petra and Zoar, containing copper mines, where condemned criminals worked. It was identified with Puxon, one of the stations of the Israelites in their wanderings. (Niem. xxxiii. 42; see Beland, Palasmata, p. 951; Wesseling, ad Hieroc. l. c.)

PHAESTUS. I. (Φαίστιον: Eth. Φαίστιον), a town in the S. of Crete, distant 60 stadia from Gortyna, and 20 from the sea. (Strab. x. p. 479; Plin. iv. 12. s. 20.) It was said to have derived its name from an eponymous hero Phaestus, son of Hercules, who migrated from Silos to Crete. (Paus. ii. 6. § 7; Steph. B. s. v.; Eustath. ad Hom. I. c.) According to others it was founded by Minos. (Diod. iv. 78; Strab. l. c.) It is mentioned by Homer (Il. ii. 648), and was evidently one of the most ancient places in the island. It was destroyed by the Gortynians, who took possession of its territory. (Strab. l. c.) Its port was Matelum, from which it was distant 40 stadia, though it was only 20 from the coast. (Strab. l. c.) We also learn from Strabo that Epimenides was a native of Phaestus. The inhabitants were celebrated for their sharp and witty sayings. (Ath. vii. 261. c.) Phaestus is mentioned also by Skylax, p. 18; Polib. iv. 55.

Stephanus B. (s. v. Φαίστον) mentions in the territory of Phaestus a place called Lissos, which he identifies with a rock in the Odyssey (iii. 293), where in its editions it is not used as a proper name, but as an adjective, -λησθής, "smooth." Strabo (l. c.) mentions a place Olympos or Olyssae in the territory of Phaestus (Ολυμπός τῆς Φαιστίας); but this name is evidently Phaestus, and instead of it we ought probably to read Lissos. This place must not be confounded with Lissus, which was situated much more to the W. (Kramer, ad Strab. l. c.)

COIN OF PHAESTUS.

2. A town of Thessaly in the district of Pelasgiotis, a little to the right of the Peneus. It was taken by the Roman praetor Baebius in B.C. 191. (Liv. xxxvi. 13.)

3. A town of the Locri Oeselae in the interior, with a port called the port of Apollo Phaestina. (Paus. iii. 22.) A lake or lagoon was called Vilia, where are the ruins of a fortress of no great extent, and the port of Apollo near C. Andromakhe. (Leake, Northern Greece, vol. ii. p. 621.)

4. The later name of Phryza in Tripillya in Elymus. (Pryza.)

PHAEGES (Φαέγησ, Hes. opp. Steph. B. s. v.; Steph. ll. v. 27; Strab. vii. p. 331, Fr. 33), a fortress in the Pieric hollow, and the first place after the passage of the Strymon. It is identified with the post station of Orfanon, on the great road from Greece to Constantinople, where Greek coins have been often found, and, among other small productions of Hellenic art, oval sling bullets of lead, or the "glanides" of which Lucan (vii. 512) speaks in his description of the battle of Pharnacia. These are generally inscribed with Greek names in characters of the best kind, or with some emblem, such as a thunderbolt. (Leake, Northern Greece, vol. iii. p. 176; Clarke, Travels, vol. viii. p. 1170.)

PHAIA (Φαία, Stadiasmus. § 43; Φαία, Ptol. iv. 5.) a harbour of Marmarica, the name of which Olshausen (Phoenisches Ortsnamen, in Rhein. Mus. 1852, p. 324) connects with a Phoenician original. Barth (Reise, p. 505) has identified it with a small bay upon the coast, a little to the N. of Wady Tarum.

PHALAC'CHTHIA (Φαλακρίθα), a town of Thessaly in the district of Thessaliotis. (Ptol. iii. 13. § 45.)

PHALACRA (Φαλάκρα), a promontory of Mount Ida, in Mycia, of which the exact position is unknown. (Eustath. ad Hom. ii. viii. 47; Schol. ad Nisam. AS. 276; ad Iuven. 40, 1170.) Stephanus Byz., who mentions it under the name Phalacras, states that all barren and sterile mountains were called Phalacra. [L.S.]

PHALACRINE. [Falarchium.]

PHALACRUM. [Corcyra, p. 669, b.]

PHALAESEAE (Φαλαεσαί: Eth. Φαλαμεσαι), a town of Arcadia, in the district of Malea, on the road from Megapoli to Sparta, 20 stadia from the Hermus towards Bophina. Leake originally placed it near Gordikhe, but subsequently a little to the eastward of Bura, where Gell remarked some Hellenic remains among the ruins of the Burnika Kal-lyvria. (Paus. viii. 35. § 3; Steph. B. s. v.; Leake, Morea, vol. ii. p. 238; Peloponomica, p. 237.)

PHALANNA (Φαλαννα: Eth. Φαλαννα), a town of the Perrhaebi in Thessaly, situated on the left bank of the Peneus, SW. of Gonnus. Strabo says (iv. 9. s. 16) that the Homeric Orthe became the acropolis of Phalanna; but in the lists of Pliny (iv. 9. s. 16) Orthe and Phalanna occur as two distinct towns. Phalanna was said to have derived its name from a daughter of Tyrnis. (Steph. B. s. v.) It was written Phalannus in Ephorus, and was called Hippia by Herodotus. (Steph. B.) Phalanna is mentioned in the war between the Romans and Persians, n. c. 171. (Liv. xii. 54, 65.) Phalanna probably stood at Karadjzak, where are the remains of an ancient city upon a hill above the village. (Leake, Northern Greece, vol. iii. p. 379, iv. p. 239.)

PHALANTHUM (Φαλανθον: Eth. Φαλανθων), a town and mountain of Arcadia, in the district of Orchomenia, near Methydrium. (Paus. viii. 35. § 9; Steph. B. s. v.; Leake, Peloponomica, p. 240.)

PHALARA. [Lamia.]

PHALARUS. [Bosotita, p. 412, b.]

PHALERNUM (Φαλαρένομα: Eth. Φαλαρένομα), a town of Crete, situated on the NW. side of the island, a little S. of the promontory Cimarus or Corycus, described by Dicaearchus as having a closed-up port and a temple of Artemis called Dicitunya. Strabo says that Phalasarna was 60 stadia from Polyrrhenia, of which it was the port-town; and that it was a day's journey from Phalasarna to Phalasarna, which is Phalasarna, being the first city to the west of the island. (Strab. x. pp. 474, 479; Skylax, pp. 17, 18; Dicaearch. Descrip. Grec. 119; Steph. B. s. v.; Plin. iv. 12. s. 20.) The Cydonians had at
PHALERUM.  

one time taken possession of Phalasarna, but were compelled by the Romans to give it up. (Polyb. xxiii. 15.)

There are considerable remains of the walls of Phalasarna. They exist in a greater or less degree of preservation, from its northern side, where it seems to have reached the sea, to its south-western point, cutting off the acropolis and the town along with it as a whole, and other remains, the most curious of which is an enormous chair on the SW. side of the city, cut out of the solid rock; the height of the arms above the seat is 2 feet 11 inches, and its other dimensions are in proportion. It was no doubt dedicated to some deity, probably to Artemis. Near this chair there are a number of tombs, hewn in the solid rock, nearly 30 in number. (Pashley, Travels in Crete, vol. ii. p. 62, seq.)

PHALERUM. [Attica, pp. 304, 305.]

PHALORIA (Liv.; Φαλώρια, Φαλόρια, Steph. B. s. v.; Eth. Φαλόριος, Φαλόριοτης), a town of Histiaeots in Thessaly, apparently between Trieca and the Macedonian frontier. Leake places it in one of the three roadside towns, Attica, Thessaly, Arcadia, in the northward of Trikala, either at Sidinia or at Arditium. (Liv. xxxii. 15, xxxiii. 13, xxxix. 25; Leake, Northern Greece, vol. iv. pp. 528, 529.)

PHALYCUM (Φάλυκος), a town of Megara mentioned by Theophrastus (Hist. Pl. ii. 8), is clearly the same place as the Alycum (Ἀλυκος) of Plutarch, who relates that it derived its name from a son of Sciron, who was buried there. (Theocr. 1. 41.) It perhaps stood at the entrance of the Scironian pass, where Dodwell (vol. ii. p. 179) noticed some ancient vestiges, which he erroneously supposed to be those of Tripodiscus. [Tripodiscus.]

PHAHA, a town in Aetolia. [Paralia.]

PHAHA. [Chios, p. 609.]

PHAHA (Φάθα), a town in Aetolia, Strab. xi. p. 494; Pol. v. 9 § 6; Φαθαγορα, τα Φαθαγορα, Herod. ap. Steph. B. s. v.; Strab. xi. p. 495; Scymn. Ch. 891; Arrian, ap. Eustath. ad Dionys. Per. 306, 549; Φαθαγορα, Dion. Per. 530; comp. Prician, 556; Avien. 735; Φαθαγορα, Steph. B. s. v. Ταμ- ραθ, Φαθαγορα νόσα, Scylx, p. 31; Anonym. Per. de Eustath. p. 216, Phanagoria, Strab. xxiii. 8; Φαθαγορα, Procop. B. Goth. iv. 5; Eth. Φαθαγορατίς, less correctly Φαθαγορατίς, Steph. B. s. v.), a Greek city on the Asiatic side of the Cimmerian Bosporus, founded by the Teians under Phanagoria or Phanagoras, who fled thither from the Persians. (Eustath. ad Dionys. Per.; Scymn. Ch., Steph. B., Persip. B. Eust. ii. 90.) was situated upon an island, now called Timas, formed by the main branch of the Anticytes (Kabos), which flows into the Black Sea, and a smaller branch, which falls into the sea of Aesof. The main branch of the Kabos forms a lake before it enters the sea, called in ancient times Corocondamis (Strab. xi. p. 494), now the Kabanalos Limus, on the left of which, especially near the port, there are extensive remains (Strab. xi. p. 495; respecting Phanagoria being upon an island, see Steph. B., Eustath., Amm. Marc., L. C.) the city became the great emporium for all the traffic between the coast of the Palus Macotis and the countries on the southern side of the Caucasus, and was chosen by the kings of Bosporus as their capital in the early part of the Christian era. (Strab. B. s. v.) It was at Phanagoria that the insurrection broke out against Mithridates the Great, shortly before his death; and his sons, who held the citadel, were obliged to surrender to the insurgents. (Appian, Mithr. 108; Dict. of Biog. Vol. ii. p. 1109 b.) In the sixth century of our era, Phanagoria was taken by the neighbouring barbarians and destroyed. (Procop. B. Goth. iv. 5.) The most remarkable building in Phanagoria seems to have been a temple of Aphrodite, surmounted by a statue of the goddess, when attacked by the giants in this place, is said to have been summoned by her. The body of a serpent, concealed in and having the giants separately to him to be slain (διαφανομένη ἢ Αφροδίτη, Strab. xi. p. 495; Steph. B. s. v. Αφροδίτη; Böckh, Inschr. No. 2120.) We learn from an inscription that this temple was repaired by Saturates, one of the kings of Bosporus. The site of Phanagoria is now only a mass of bricks and pottery; and there is no building above ground. One cause of the disappearance of all the ancient monuments at Phanagoria was in the foundry of the Roman colony of Tamatracibin. Dutour noticed traces of towers towards the eastern extremity of the town, where the citadel of Aetolium stood. The town of Tamatracibin contains several ancient remains, fragments of columns, &c., which have been brought from Phanagoria. There are numerous tombs above the site of Phanagoria, but they have not been explored like those at Pantaipeaum. In one of them, however, which was opened towards the end of last century there was found a bracelets of the purest gold, weighing nearly 300 pounds, and a richly ornamented gold vase with the initials of the inscription of the god, having two heads, which were studded with rubies so as to imitate eyes and also ornamented with rows of gems. It weighed three-quarters of a pound. (Clarke, Travels, vol. i. p. 394, seq.; Pallass, Reisen, vol. ii. p. 236, &c.; Dubois, Voyage autour du Cau- case, vol. v. p. 64, seq.; Uerkert, vol. iii. pt. ii. p. 491.)

PHANAGORIA (Φαναγορία), a strongly fortified town of Chaznia in Epirus, and a place of military importance. It stood on the site of the modern Gourniki, a fortified village 2 miles south of the sea of Epirus, and about 1 mile to the east of the ancient town. (Strab. iii. p. 735.) It was of the same name as the modern town of Phanagoria. (Pol. v. 6 § 3, where it is erroneously called Phanagaros.) Phanagoria contained the towns of Eupatoria, Cabiris, Pokensimon, and others. [PONTUS.] [L. S.]

PHANNOTE (Φάνωτος, Pol.), a strongly fortified town of Chaznia in Epirus, and a place of military importance. It stood on the site of the modern Gourniki, a fortified village 2 miles south of the sea of Epirus, and about 1 mile to the east of the ancient town. (Strab. iii. p. 735.) It was of the same name as the modern town of Phanagoria. (Pol. v. 6 § 3, where it is erroneously called Phanagaros.) Phanagoria contained the towns of Eupatoria, Cabiris, Pokensimon, and others. [PONTUS.] [L. S.]

PHARA (Φάρα). 1. Sometimes PHARA (Φάρα), Strab. viii. p. 388; Phrases, Plin. iv. 6; Φάραι, Herod. i. 145, properly the name of the people: Εθ. Φαραῖος, Strab. i. c.; Φάραιος, Polib. iv. 6; Steph. B. s. v. the territory Φαραί, Strab. i. c.; Polib. iv. 59), a town of Achaea, and one of the twelve cities of the Achaean league situated on the island of the same name, in the sea of Epirus, 70 stadia from the sea, and 150 stadia from Patrae. It was one of the four cities which took the lead in restoring the Achaean League in b. c. 280. In the Social War (b. c. 220, seq.)
suffered from the attacks of the Aetolians and Eleans. Its territory was annexed by Augustus to Patrae, when the latter city was made a Roman colony after the battle of Actium. Pharae contained a large agora, with a curious statue of Hermes. The remains of the city have been found on the left bank of the Kamesizis, near Præceda. (Herod. i. 33. 3; Paus. vi. 38; Strab. vii. 22. § 1, seqq.; Plin. iv. 6; Leake, Moros, vol. ii. p. 155.)

2. (Φαρά, Strab. Paus.; Φήρα, Hom. H. i. v. 543; Φαρά, Ιl. ix. 151; Φαρά, Xeni. Hal. iv. 8; § 7; Ech. Φάρας, Strab. viii. p. 588; Φαράμης, Paus. iv. 30. § 3; Kalamadis), an ancient town of Messenia, situated upon a hill rising from the left bank of the river Neda, and at a distance of a mile from the Messenian gulf. Strabo describes it as situated 5 stadia from the sea (viii. p. 361), and Pausanias 6 (iv. 31. § 3); but it is probable that the earth deposited at the mouth of the river Neda has, in the course of centuries, encroached upon the sea. Pharae occupied the site of Kalamadis, the modern city of Kalamata, and in antiquity it is to be supposed to have been the chief town in the southern Messenian plain. It was said to have been founded by Pharis, the son of Hermes. (Paus. iv. 30. § 2.) In the Iliad it is mentioned as the well-built city of the wealthy Diocles, a vassal of the Atrides (v. 543), and as one of the seven places offered by Agamemnon to Achilles (vii. p. 151); in the Odyssey, Telema- chus rests here on his journey from Fylos to Sparta (iii. 490). After the capture of Messene by the Achaeans in s. c. 182, Pharae, Abia, and Thuria separated themselves from Messene, and became each a distinct member of the league. (Polyb. xxiv. 1.) Pharae was annexed to Laconia by Augustus (Paus. iv. 30. § 2), but it was restored to Messenia by Tiberius. [Messene, p. 345.] Pausanias found at Pharae temples of Fortune, and of Niconaschus and Gorgias, grandsons of Asclepius. Outside the city there was a grove of Apollo Carneius, and in it a fountain of water. (Paus. iv. 30. § 3, seqq., iv. 31. § 1.) Strabo correctly describes Pharae as having an anchorage, but only for summer (viii. p. 361); and a stockade 15 meters of the city was made for safety for Armeanoi, so called from a river strongly impregnated with salt flowing into the sea at this place: it is the ῖδραυλος (H. i. v. 543). Pausanias found (iv. 30. § 2) as on the road from Abia to Pharae.

There are no ancient remains at Kalamadis, which, on looking, as the place has always been well occupied and inhabited. The height above the town is crowned by a ruined castle of the middle ages. It was the residence of several of the Latin chieftains of the Moros. William Villehardouin II. was born here. In 1655 it was conquered and enlarged by the Venetians. It was the head-quarters of the government of 1770, and again of the government of the revolution of 1821, which spread from thence over the whole peninsula. (Leake, Moros, vol. i. p. 342, seq.; Boblaye, Récherches, fac. p. 104; Curtius, Peloponnesos, vol. ii. p. 158.)

3. The latter name of the Homeric Phare or Pharisia in Laconia. [PHA.]

PHA. PHARAN or PHARAN (Φάρας), the name of a district of Palestine, between this country and Aegypt. (Gem. xxi. 21; 1 Kings, xii. 18.) It is usually identified with the Wady Feiδα, a beautiful and well watered valley, surrounded by mountains, NW. of Sinai, and near the western arm of the Red Sea (Niebuhr, Reisebeschreib., vol. i. p. 240, Arabeim, p. 402); but though Feiδα may have preserved the ancient name of the desert, it appears from Numbers (x. 12, 33, xxii. 28) that the latter was situated in the desert of Kadesh, which was upon the borders of the country of the Edomites, and which the Israelites reached after the desert of Mid Sinai, on the road that leads from the land of Edom. (Burckhardt, Syria, p. 618.)

In the Wady Feiδα are the remains of an ancient church, assigned to the fifth century, and which was the seat of a bishopric as early as A. D. 400. (Robinson, Biblical Researches, vol. i. p. 186.)

This city is described under the name of Feiδα by the Arabic Edrais, about A. D. 1150, and by Makritzi about A. D. 1400. (Burckhardt, Syria, p. 617.) It is apparently the same as Pharana (Φαράν), described by Stephanus B. (s. v.) as a city between Aegypt and Arabia, and by Ptolemy (v. 17. §§ 1, 3) as a city of Arabia Petraea near the western arm of the Red Sea. A species of anemmoth in this valley had the name of Pharantia. (Plin. x. 20.) This Pharae is also described by Josephus (B. J. iv. 9. § 4) as obviously a different place from the Wady Feiδα, somewhere in the vicinity of the Dead Sea, and is perhaps connected with the desert of Paran, spoken of above. (Robinson, Biblical Researches, vol. i. p. 553.)

PHARAEAE, PHARABEAETHUS (Φάραβαιτος, Plut. iv. 5. § 59; Steph. B. s. v.: Ed. Φαραβαίτος, Herod. ii. 165; Φαραβείτος, Strab. xvii. p. 802), the capital of the Pharaebite Nome in Lower Aegypt. (Plin. v. 9. s. a.) It stood W. of the Pelaian arm of the Nile, 16 miles S. of Tanais. The name was a Præfet- tura under the Roman emperors; and under the Pharaeboi was one of the districts assigned to the Cæsarian division of the Aegyptian army. Pharaohbeus is now Horbeig, where the French Commission found some remains of Aegyptian statuary (Champlin, E. Egypt, vol. ii. p. 99). [W.B.D.]

PHARACODON (Φαρακόδων, Φαρακόδωος; Ed. Φαρακοδών), a city of Histisaitos in Thessaly, situated to the left of the Peneus, between Pelin- nus and Aigion, 11 miles from the latter city, and at the ruins situated upon the slope of the rocky height above Grasino. (Strab. i. p. 438; Steph. B. s. v.; Leake, Northern Greece, vol. iv. p. 316, seq.)

PHARE or PHARIS, afterwards called PHARAI (Φαραι, Φαρος, Φαρα), a town of Laconia in the Spartan plain, situated upon the road from Amycle to the sea. (Paus. iii. 20. § 3.) It was mentioned in the Iliad (ii. 583), and was one of the ancient Achaean towns. It maintained its independence till the reign of Teleclus, king of Sparta; and, after its conquest, continued to be a Lacedaemonian town under the name of Pharae. (Paus. iii. 2. § 16.) It was said to have been plundered by Aristomenes in the second Messenian War. (Paus. iv. 16. § 8.) It is also mentioned in a corrupt passage of Strabo (vii. p. 364), and by other ancient writers. (Lycophr. 552; Stat. Theb. iv. 226; Steph. B. s. v. Φαρα.) Pharis has been rightly placed at the deserted village of Bajik, which is on the old road from Amycle, and contains an ancient "Treasury," like those of Mycæs and Orchomenus, which is in accordance with Pharis having been one of the old Achaean cities before the Dorian conquest. It is surprising that the French Commission have given no description or drawing of
PHARMACUS.  

this remarkable monument. The only account we possess of it, is by Mure, who observes that "it is, like that of Mycenae, a tumulus, with an interior vault, entered by a door on one side, the access to which was pierced horizontally through the slope of the hill. Its situation, on the summit of a knoll, itself of rather conical form, while it increases the apparent size of the tumulus, adds much to its general loftiness and grandeur of effect. The roof of the vault, with the greater part of its material, is now gone, its shape being represented by a round cavity or crater on the summit of the tumulus. The doorway is still entire. It is 6 feet wide at its upper and narrower part. The stone lintel is 15 feet in length. The vault itself was probably between 30 and 40 feet in diameter." Mure adds: "Mene- lass is said to have been buried at Amyclae. This may, therefore, have been the royal vault of the Spartan branch, as the Mycenaean monument was of the Meemathrm branch. Our information is based on the supposition that the monument to have been a sepulchre, and not a treasury, it stood at the distance of 4 or 5 miles from Amyclae, if this town was placed at Aghiad Kyriaki, and more than 2 miles, even if placed, according to the French Commission, at Skirokothrour. [Amyclae.] In addition to this, Meneleus, ac- cording to Homer, was the first to assert the throne of the Meeleus family, and he is supposed to have been more inno- cent than his brother Telamon; his name is often mentioned in connection with the name of Pharnaces (Mure, Tour in Greece, vol. ii. p. 246; Leake, Morce, vol. iii. p. 3, Peloponnesiaca, p. 354; Curtius, Peloponi- nesos, vol. ii. p. 246.)

PHARMACEUS (Φάρμακος), a small island before the entrance of the bay of Iassus, not far from Cape Poseidion; its distance from Miletus is stated at 12 miles. It is said that this island Atalus was killed, and his Julia Cinara was once captured by pirates. (Stadiacum Mar. Mag. p. 282; Stephan. B. s. v.; Suet. Cesar. 4; Plut. Cesar. 1.) It still bears its ancient name Pharmaco. [L. S.]

PHARMATENUS (Φάρματενος), a small coast river of Pontus, 130 stadia to the west of Pharmacia. (Arrian, Periplus Pont. Eux. p. 17; Anonym. Periplus. P. E. p. 12.) Its inhabitants were once identified with the Boasarai. [L. S.]

PHARMACIA (Φαρμακια; Eth. Φαρμακευτες), an important city on the coast of Pontus Ptolemais, was by sea 150 stadia distant from Cape Zephyrium (Arrian, Periplus Pont. Eux. p. 17; Anonym. Periplus, P. E. p. 12.), but by land 24 miles. According to Pliny, it was a city of 8 miles in length, 6 miles in breadth, and 95 or 100 miles west of Trapezus. (Comp. Tab. Pont., where it is called Cannaecus for Cerasus, this latter city being confounded with Pharmacia.) It was evidently founded by one Pharmaces, probably the grandson of Mithridates the Great; and the latter during his wars with the Romans kept his horse in Pharmacia. Its name is said to have been taken from the neighbouring Cotyrus, and the town was strongly fortified. (Strab. xi. p. 548; Plut. Lucull. 18.) The place acquired great prosperity through its commerce and navigation, and through the iron-works of the Chalybes in its vicinity. (Strab. xi. pp. 549, 551.) According to Sclavus (p. 53) the site of this town had previously been occupied by a small town, on the same site; but whether this is true, however, nothing is known. But that he actually conceived Choredae to have occupied the site of Pharmacia, is clear from the mention of the island of Ares ("Ares ρήσος") in connection with it, for that island is known to have been situated off Pharmacia. (Arrian and Anonym. Periplus, l. c.) Arrian is the only one who affirms that Pharmacia occupied the site of Cerasus; and although he is copied in this instance by the anonymous geographer, yet that writer afterwards correctly places Cerasus 150 stadia further east (p. 15). The error probably arose from a confusion of the names Choredae and Cerasus; but in consequence of this error, the name of Phar- macia was in the middle ages transferred to Pharmacia, which hence still bears the name of Keramant or Keramants. (Comp. Hamilton, Researches, i. pp. 250, 261, foll.; Cramer, Asia Minor, i. p. 281.) Pharmacia is also mentioned by Stephanus Byz., (s. e.), several times by Strabo (ii. p. 126, xi. p. 489, xi. pp. 547, 549, 560, xiv. p. 577), and by Ptolemy (v. 6 § 5). Respecting its coins, see Eckhel (Docet. Num. vol. iii. p. 357). Another town of the same name in Phrygia is mentioned by Stephanus Byz. (s. e.).

PHARODINI. [VARINI.] PHAROS (Φάρος, Ephorus, ap. Steph. B. Fr. 163; Strab. viii. p. 315), an island off the coast of Illyricum, which was colonised by Greek settlers from Paros, who, in the first instance, gave it the name of their own island, which was afterwards changed to Pharos. In this settlement, which took place b. c. 325, they were assisted by the elder Dionysius. When the Romans took over the island, the Phrygians, as a c. 229, Demetrius, a Greek of Pharsa, betrayed his mistress, Queen Teuta, for which he was rewarded with the greater part of her dominions. (Polyb. ii. 11.) The traitor, relying on his connection with the court of Macedon, set the Romans at defiance; he soon brought the vengeance of the republic upon himself and his native island, which was taken by L. Aemilius Lepidus, b. c. 219. (Polyb. iii. 16; Zonar. viii. 20.) Pliny (iii. 30) and Ptolemy (ii. 17. § 14) speak of the island and city under the same name, PHARIA (Φαρία), and Polybius (l. c.) says the latter was strongly fortified. The city, the ancient capital, stood at Stari Grad or Cilka Veca, to the N. of the island, where remains of walls have been found, and coins with the legend ΦΑΡΙΩΝ. After the fall of the Roman Empire the island continued for a long time in the hands of the Narentine pirates. Its Slavonic name is Hvar, a corruption of Pharos; and in Italian it is called Lézina or Lisina. For coins of Pharos see Eckhel, vol. ii. p. 160; Sestini, Monet. Vat. p. 42; Mionnet, Diction. des Mon. p. 46; (Williamson, Diction. des Mon. pp. 243-251; Neibergau, Die Sud-Slav. pp. 107-111.)

PHAROS (Φάρος, Strab. xvii. p. 791, seq.; Steph. B. s. v.: Eth. Φαρα), a long narrow strip of rock lying off the northern coast of Aegypt, having the New Port of Alexandria E. and the Old Harbour SW. [ALEXANDRIA, Vol. L. p. 247.] Its name is said to have been derived from a certain pilot of Meneleus, who, on his return from the Trojan War, died there from a serpent's bite. Pharos is mention'd in the Odyssey (iv. 355), and is described as one day's sail from Aegypt. This account has caused considerable perplexity, since Pharos is actually rather less than a mile from the seaboard of the Delta; and it is not probable that the "island" in the case of that is remote, it is not. It is perfectly intelligible, however, if we suppose the author of the Odyssey to mean by Aegypt, not the country itself but its river, since the Pharos is now even nearly a day's sail from the Canopic arm of the Nile. Any other theory is untenable; for this portion of the coast of the Delta consists of rocky bar and
shelves, which remain unchanged, and, though its surface has been heightened, its superficial area has not been materially increased since the city was peopled. Pharsos was inhabited by fishermen under the Pharaohs of Egypt; but it first became a place of importance under the Macedonian kings. During his survey of the coast, B.C. 332, Alexander the Great perceived that the island would form, with the help of art, an excellent breakwater to the harbor of his projected capital. He accordingly caused its southern extremity to be connected with the mainland by a stone mole seven stadia, or about an English mile, in length, which from this circumstance was called the Heptastadium or Seven-furlong Bridge. At either end the mole was left open for the passage of ships, and the apertures were covered by suspension bridges. In later times a street of houses was erected on the mole itself, converted the island of Pharsae into a suburb of Alexandria, and a considerable portion of the modern city stands on the foundations of the old Heptastadium. Yet, long after its junction with the Delta, Pharsae was spoken of as an island (§ 306, 307) Aetius, Pal. Hist. ii. 28, 29; Mommsen, Zonar. iv. 103, 104). The southern portion of this rocky ledge (קופס), the most densely populated; but the celebrated lighthouse, or the Tower of the Pharsae, stood at the N.E. point, directly in a line with point Pharillon, on the eastern horn of the New Port. The lighthouse was erected, at a cost of 800 talents, in the reign of Ptolemy I. It was planned by Trepaliphs, a successor of Philadelphus. Its architect was Sostratus of Cnidus, who, according to Pliny (xxxvi. 12, s. 18), was permitted by his royal patron to inscribe his own name upon its base. There is indeed another story, in which it is related that Sostratus, being forbidden to engrave his name on his work, secretly cut it in deep letters into a stone of the building, which was eventually covered with some softer and perishable material, on which were inscribed the style and titles of Ptolemy. Thus a few generations would read the name of the king, but posterity would behold the authentic impress of the architect. (Strab. xvii. p. 791; Suidas, s. v. Φόραι; Steph. B. s. v.; Lucian, de Consecr. Hist. c. 62.) Pharsae was the scene of several temples, the most conspicuous of which was one dedicated to Hephaestus, standing near the southern extremity of the Heptastadium. That Pharsae, in common with many of the Deltaic cities, contained a considerable population of Jews, is rendered probable by the fact that here the translators of the Hebrew Scriptures resided during the progress of their work. (Joseph. Antiq. xii. 2. 13.) Julius Caesar established a colony at Pharsae, less perhaps to recruit a declining population than with a view to garrison a post so important as regarded the turbulent Alexandrians. (Caesar, B. C. iv. 112.) Subsequently the island seems to have been comparatively deserted, and inhabited by fishermen almost exclusively. (Monteux, Sur la Phare d'Alexandrie, Mémo. de l'Acad. des Inscript. ix. p. 285.)

PHARPAR. [DAMASCUS.]

PHARRASIL. [PHLEIS.]

PHARSALUS (Φαρσαλος; Ech. Φαρσάλια). The territory is Φαρσαλία, Strab. ix. p. 450), one of the most important cities of Thessaly, situated in the central district of Thessaly, near the confines of Phthiotis, upon the left bank of the Enipeus, and at the foot of Mt. Narthacium. The town is first mentioned after the Persian wars; but it is probable that it existed much earlier, since there is no other locality in this part of the house to be referred to for the combination of strength, resources, and convenience. Hence it has been supposed that the city was probably named Phthia at a remote period, and was the capital of Phthiotis. (See Leake, Northern Greece, vol. iv. p. 484.) Among its ruins there are some remains which belong apparently to the most ancient times. On one side of the northern gateway of the acropolis are the remains of Cyclopean walls; and in the middle of the acropolis is a subterranean construction, built in the same manner as the treasury of Ateus at Myconae. Leake observes that Pharsalus "is one of the most important military positions in Greece, as standing at the entrance of the most direct and central of the passes which lead from the acropolis of Thessaly to the very heart of the Sporades and Thermopylae. With a view to ancient warfare, the place had all the best attributes of a Hellenic polis or fortified town: a hill rising gradually to the height of 600 or 700 feet above the adjacent plain, defended on three sides by precipices, crowned with a small level for an acropolis, watered in every part of it by springs and fountains, its site more abundantly at the foot by sources so copious as to form a perennial stream. With these local advantages, and one of the most fertile plains in Greece for its territory, Pharsalus inevitably attained to the highest rank among the states of Thessaly, and became one of the largest cities of Greece, as its rulers, at the time of its greatest prosperity, built three square miles in circuit, and of the form of an irregular triangle. The acropolis consisted of two rocky tabular summits, united by a lower ridge. It was about 500 yards long, and from 100 to 50 broad, but still narrower in the connecting ridge. Livy speaks of Palaephasalus (xlv. 1), and Strabo distinguishes between Old and New Pharsalus. (Strab. ix. p. 431.) It is probable that at the time of these notices the acropolis and the upper part of the town were known by the name of Palaephasalus, and that it was only the lower part of the town which was then inhabited. Pharsalus is mentioned by Sclavus (p. 23) among the towns of Thessaly. In B.C. 435 it was besieged by Philip, who carried the town by siege. In B.C. 14 the most celebrated victory of Boeotia, but without success. (Thuc. i. 111.) At the commencement of the Peloponnesian War, Pharsalus was one of the Thessalian towns that sent succour to the Athenians. (Thuc. ii. 22.) Medius, tyrant of Larissa, took Pharsalus by force, about B.C. 395. (Diody. xiv. 82.) Pharsalus, under the conduct of Pausanias, was the scene of a battle for a time, but subsequently formed an alliance with him. (Xen. Hell. vi. 1. § 2, seq.) In the war between Antiochus and the Romans, Pharsalus was for a time in the possession of the Syrian monarch; but on the retreat of the latter, it surrendered to the consuls Atilius and Clodius, B.C. 191. (Liv. xxxvi. 14.) Pharsalus, however, is not celebrated for the memorable battle fought in its neighborhood between Caesar and Pompey, B.C. 48. It is a curious fact that Caesar has not mentioned the place where he gained his great victory; and we are indebted for the name to other authorities. The exact site of the battle has been pointed out by Leake with his usual accuracy; (C. Gr. i. 475, seq.) nor has he been without merit in his narrative of the battle (History of the Romans under the Empire, vol. ii. p. 286, seq.), has raised some difficulties in the
PHARSALUS.

Terpretation of Caesar's description, which have been commented upon by Leake in an essay printed in the Transactions of the Royal Society of Literature (vol. iv. p. 66, 2nd Series), from which the following account is taken.

A few days previous to the battle Caesar had taken possession of Metropolis, a city westward of Pharsalus, and had encamped in the plain between these two cities. Meantime Pompey arrived at Larissa, and from thence advanced southwards towards Pharsalus; but Caesar having cut off their approach to the foot of the heights, which are adjacent to the modern Æraus on the east, Caesar's camp, or rather his last position before the battle, was in the plain between Pharsalus and the Enipeus, at the distance of about 3 miles from the still extant north-western angle of the walls of Pharsalus. There was a distance of 30 stadia, or about 4 Roman miles, from the two camps. (Appian, B. C. ii. 65.) Appian adds that the army of Pompey, when drawn up for battle, extended from the city of Pharsalus to the Enipeus, and that Caesar drew up his forces opposite to him. (B. C. ii. 75.) The battle was fought in the plain immediately below the city of Pharsalus to the north. There is a level of about 2½ miles in breadth between the Enipeus and the southern walls of Pharsalus, on which stood the northern walls of Pharsalus. Merivale is mistaken in saying that "the plain of Pharsalus, or 5 or 6 miles in breadth, extends along the left bank of the Enipeus." It is true that 5 or 6 miles is about the breadth of the plain, but this breadth is equally divided between the two sides of the river; nor is there anything to support Merivale's conjecture that the course of the river may have changed since the time of the battle. Leake observes that the plain of 2½ miles in breadth was amply sufficient for 45,000 men drawn up in the usual manner of three orders, each ten in depth, and that there would be still space enough for the 10,000 cavalry, upon which Pompey founded chiefly his hopes of victory, for the breadth of the plain being too great for Caesar's numbers, he thought himself sure of being able, by his commanding force of cavalry, to turn the enemy's right.

At first Pompey drew up his forces at the foot of the hills; but when Caesar refused to fight in this position, and began to move towards Scutussia, Pompey retired into the rear of the hills, and assumed the position already described. His right wing being protected by the Enipeus, which has precipitous banks, he placed his cavalry, as well as all his archers and slingers, on the left. Caesar's left wing was in like manner protected by the Enipeus; and in the rear of his right wing, behind his small body of horse, he stationed six cohorts, in order to sustain the anticipated attack of the enemy's cavalry. Pompey resolved to await the charge. Caesar's line advanced, halted midway to recover their breath, and then charged the enemy. While the two lines were thus occupied, Pompey's cavalry on the left began to execute the movement upon which he placed his hopes of victory; but after doing this, they were unexpectedly assailed by the six cohorts and put to flight. These cohorts now advanced against the rear of Pompey's left; while Caesar at the same time brought up to his front the third line, which had been kept in reserve. Pompey's troops now gave way in every direction. Caesar then advanced to attack the fortified camp of the enemy, which was defended for some time by the cohorts left in charge of it; but at length they fled to the mountains at the back of the camp. Pompey proceeded straightforward to Larissa, and from thence by night to the sea-coast. The hill on which the Pompeians had taken refuge being without water, they soon quitted it and took the road towards Larissa. Caesar followed them with four legions, and, by taking a shorter road, came up with them at the distance of 6 miles. The fugitives now retired into another mountain, at the foot of which there was a river; but Caesar having cut off their approach to the water before nightfall, they descended from their position in the morning and laid down their arms. Caesar proceeded on the same day to Larissa. Leake observes that the mountain towards Larissa to which the Pompeians retired was probably near Scutussa, since in that direction alone is any mountain to be found with a river at the foot of it.

In the time of the Hellenes, Pharsalus was a free state (iv. 8. 15). It is also mentioned by Hierocles (p. 642) in the sixth century. It is now named Æraus (τα Æρασα), and the modern town lies at the foot of the ancient Aeropolis.

PHARUSII. 591

COIN OF PHARUSIS.'s

PHARUSII (Φαρουσίως, Symb. ii. p. 131, xvii. pp. 826, 827; Polt. iv. 6. § 17; Polyb. ap. Plin. v. 1. s. vi. 35), a people on the W. coast of N. Africa, about the situation of whom Strabo, Pliny, and Ptolemy are in perfect agreement with one another, if the thirty journeys of Strabo (p. 826) between them and Lixus (El-Aratta), on the W. coast of Morocco, S. of Cape Bojador, is not to be considered as an error either of his information or of the text; which latter is not improbable, as numbers in MSS. are often corrupt. Nor is this mere conjecture, because Strabo contradicts himself by asserting in another place (p. 828) that the Pharussii had a great desert between them and Mauretania, which they crossed, like natives of the present day, with bags of water hung from the bellies of their horses. (Leake, London Geog. Journ. vol. ii. p. 16.)

This locality, extending from beyond Cape Bojador to the banks of the Senegal, was the seat of the many towns of the Tyrians, amounting, according to some (Strab. p. 825), to as many as 300, which were destroyed by the Phins. Pharsalus was a set town (Comp. Humboldt, Cosmos, vol. ii. p. 129, note 123, trans.) Strabo reckons this number of 300 commercial settlements, from which this part of the coast of the Atlantic received the name of Sinus Emporique, as an exaggeration. He appears in this to have followed the criticism of Artemidorus upon Erate strenue, whom Strabo depreciates. The number 300 may be an exaggeration, or one not intended to be literally taken; but it is incredible that Erate strenue should represent a coast as covered with Phoenician factories where none existed.

When Ezekiel prophesies the fall of Tyre, it is said (xxvi. 10) "The men of Phere (the common version reads Peres), and Lud, and Phut were in thine armies." These shores thus joined with the Phut or Mauretanos, and the Ludim, who were
nomads of Africa (the Septemgint and the Vulgate understand the Lydians), may be reasonably supposed to belong to that region. Without the vowel points, the name will represent the powerful and warlike tribe whom the Greeks call Pharsaei. The similarity of the names seems to have given rise to the strange story which Sallust (B. J. 18) copied from the Punic books, that Hercules had led an army of Persians into Africa. ("Pharsaei quandam Persas"") (litt. v. 11. 1. comp. Pompey, the iii. 10. § 3.) The fierce tribes of Africa thus furnished the Phoenicians with inexterminable supplies of mercenary troops, as they afterwards did to Carthage. (Kenrick, Phoenicia, pp. 135, 277.) [E. B. J.]

PHARYGAE. [TAPFEH.]

PHARYGIUM (Φαρυγίον), a promontory of Phoebe, with a station for shipping, lying E. of Anticyra, between Marathus and Myra, now called Aghid. (Strab. i. p. 423; Leake, Northern Greece, vol. ii. p. 549.)

PHASELIS (Φασελίς, Joseph. Steph. B. s. v. Φασελίς, Ptol. v. 16. § 7; Phaselis, Plin. viii. 4. s. 19. xxii. 5. s. 11. Ed. Φασελίνη), a town of Pamphylia, by Herod. in the Anon. or Chor. N. of Jericho, by which means a tract formerly desert was rendered fertile and productive. (Joseph. xvi. 5. § 2. xvii. 11. § 5. xviii. 2. § 2. B. J. i. 21. § 9.) The name seems still to have existed in the middle ages, for Brucardus, quoted by Robinson, speaks of a village named Phaselisum, situated a league N. of Dik, and corresponding to the position of Ed. Φασελίς, where there are ruins; (Robinson, Biblical Researches, vol. ii. p. 305.)

PHASELIS (Φασελίς, Ed. Φασελίνη), a maritimes town of Lycia, on the Pamphylian gulf, whence some say that it was a town of Pamphylia (Plin. v. 36; Steph. B. s. v. Dionys. Per. 855; Studiam. Mar. Mag. § 205); but Strabo (xiv. p. 667) distinctly informs us that Phaselis belonged to Lycia, and that Olbia was the first Pamphylian town on the coast. The town was a Dorian colony (Herod. ii. 178), situated on a headland, and conspicuous to those sailing from Cilicia to Rhodes. (Liv. xxxvii. 23; Cic. in Terr. ii. 4.) Behind it rose a mountain of the same name, probably in ancient times higher than the modern Mount of the same name (Studiam. Mar. Mag. § 204; Strab. xiv. p. 666); and in its vicinity there was a lake and a mountaingrass leading between Mount Clinax and the sea-coast into Pamphylia. Phaselis had three harbours, and rose to a high degree of prosperity, though it did not belong to the political confederacy of the other Lycian towns, but formed an independent state by itself. It is mentioned by Thucydides (ii. 69, comp. viii. 88, 89; Polyb. xxx. 9) as a place of some importance to the commerce of the Athenians with Phoenicia and Cilicia. At a later period, having become the haunt of the pirates, it was attacked and taken by Servilius Iunius. (Cic. in Verr. iv. 10; Frutol. vi. 3; Flor. iii. 6.) Although it was a small place it was the site of a religious sanctuary which it richly merited its ancient prosperity; and Lucan (viii. 249 &c.) describes it as nearly deserted when visited by Pompey in his flight from Pharsalus. According to Athenaeus (xiv. p. 688) the town was celebrated for the manufacture of rose-perfume, and Nicander (ap. Athen. p. 683) praised its roses. It was the capital of the ancient Phaselis (Φασηλίς), a kind of light sailing boat, were invented at Phaselis, whence all the coins of the town show the image of such a boat. Pausanias (iii. 3. § 6) reports that the spear of Achilles was exhibited in the temple of Athena at Phaselis. In Hierocles (p. 683) the name of the river which is corrupted into Phaydes; and the Acts of Councils show it to have been the sea of a bishop. It may also be remarked that Phaselis was the birthplace of Theodectes, a tragic poet and rhetorician of some note. (Steph. B. s. v.; comp. Scylax, p. 39; Ptol. v. 3. § 5. § 2.; Eckhel, Doctr. Antiq. iii. 6. p. 61; Zosimus, ii. 16.) The Phaselis of the ancients was the ancient Phaselis. The lake in its vicinity, says Beaufort (Karamanias, p. 56), is now a mere swamp, occupying the middle of the isthmus, and was probably the source of those baneful exhalations which, according to Livy and Cicero, rendered Phaselis so unhealthy. The principal port was formed by a stone pier, at the western side of the isthmus; it projected about 200 yards into the sea, by which it has been entirely overthrown. The theatre is scooped out of the hill, and fronting it are the remains of several large buildings. There are also numerous sarcophagi, some of them of the whitest marble, and of very neat workmanship. The modern name of Phaselis is Taurussos. (Comp. Paus. Anti Minor, p. 211, 297; Leake, Anti Minor, p. 190.) [L. S.]

COIN OF PHASELIS.

PHASIA'NI (Φασίανι), a tribe in the eastern part of Pontus, on the river Phasis, from which both they and the district called Φασιανή ἀρχαὶ derived their names. (Xenoph. Anab. iv. 6. § 5, viii. 8. § 25; Diodor. xiv. 29; Eustath. ad Dionys. Per. 689.) [L. S.]

PHASIS (Φασίς), a navigable river in Colchis, on the east of the Euxine, which was regarded in ancient times as the stream which flowed from Colchis to Asia, and as the remotest point in the east to which a sailing on the Euxine could proceed. (Strab. xi. p. 497; Eustath. ad Dionys. Per. 687; Arrian, Perip. Pont. Eu. p. 19; Herod. iv. 40; Plat. Phaed. p. 109; Anonym. Perip. Pont. p. 1; Propopp. Bell. Goth. iv. 2. 6.) Subsequently it came to be looked upon as forming the boundary line between Asia Minor and Colchis. Its sources are in the southeasternmost part of the Montes Moschisci (Plin. vi. 4; Solin. 20); and as these mountains were sometimes regarded as a part of Mount Caucasus, Aristotle and others place its sources in the Caucasus. (Strab. xi. p. 492, xii. p. 548; Aristot. Met. l. 13; Propopp. l. c.; Geogr. Her. iv. 20.) Strabo (xi. p. 497; comp. Procop. Bell. Pers. ii. 29) and some other authors (Arrian, Perip. Pont. Eu. ii. 401) places the Phasis in a general way along the mountains of Armenia, and Apollonius specifies its source as existing in the country of the Ama rantes, in Colchis. For the first part of its course westward it bore the name Bosa (Procopp. Bell. Pers. ii. 29), and after receiving the waters of its tributaries from the Amanarites and the stations themselves, itself a navigable river into the Euxine, near the town of Phasis. (Strab. xii. pp. 498, 500; Plin. l. c.) Some of the most ancient writers believed
that the Phasis was connected with the Northern Ocean. (Schol. ad Apollon, Rhod. iv. 239; Pind. Pyth. iv. 576, Isthm. ii. 61.) The length of its course was also erroneously estimated by some at 800 stadia, or 90 miles, but Aristarchus (Cosmogr. p. 719) states it is more correctly to be only 305 miles. The fact is that its course is by no means very long, but rapid, and of such a nature as to form almost a semicircle; whence Agathemerus (I. 10) states that its mouth was not far from its sources. (Comp. Strab. xii. p. 500; Arsat. Pers. ii. 30; Arsat. Pers. i. 32; Marc. xxii. 8; Piso. 673.) The water of the Phasis is described as very cold, and so light that it swam alike oil on the Euxine. (Arrian, Perip. Pont. Est. p. 7, &c.; Procop. Bell. Persi. ii. 30; comp. Herod. Theog. 340; Heucat. Fragm. 187; Herod. iv. 37, 45, 66; Scalig. p. 25; Polyb. iv. 56, v. 55; Ptole. v. 8, §§ 1, 2.) The different statements of its course and the course of this river probably arose from the fact that different rivers were understood by the name Phasis; but one which in later times was commonly designated by it, is undoubtably the modern Bolor or Bless, which is sometimes also mentioned under the name Foka, a corruption of Phasis. It has formed a part of the boundary of the town of Foka, and the river called Phasis by Aeschylus (Ap. Argum. L. c.) is the Hypanis; and that the Phasis of Xenophon (Anab. iv. 3, § 4) is no other than the Araxes, which is actually mentioned by Constantine Porphyry, (Ad Deum. Imp. 45) under the two names Eruas and Phasis. (L. S.)

The Phasis (or Phasia), the easternmost tributary of the coast of the Euxine, on the southern bank, and near the mouth of the river Phasis, which is said to have received this name from the town having previously been called Arcturus. (Plut. de Flum. s. v.; Eustath. ad Dion. Per. 689.) It was situated in a plain between the river, the sea, and a lake, and had been founded by the Milesians as a commercial station. (Stob. vii. p. 496; Steph. B. s. v.) The country around it was very fertile, and rich in timber, and carried on a considerable export trade. In the time of Ammianus Marcellinus (xxii. 8), the place still existed as a fort, with a garrison of 400 picked men. It contained a temple of Cybele, the great goddess of the Phœnicians. (Comp. Arist. Pol. ii. 30, 4; Ptole. xiv. p. 4; Scalig. p. 32; Strab. xi. pp. 497, 500; Ptole. v. 10, § 2, vii. 19, § 4; Pomp. Mela. i. 19; Plin. vi. 4; Zoil. ii. 38.) Some geographers regard Phasis and Sebastopolis as two names belonging to the same place [Sebastopolis]. The name of the town and river Phasis still survives in the languages of Europe in the wood where the ancient city stood, and in other rivers and places in that island, but hardly possible now to identify it with any modern stream. Forbiger has conjectured that it is the same as the Asaroch. Lassen has supposed it to be the Amb, in that portion of the island which was called Nagadulupa. If this be so, it flowed into the sea a little to the N. of the promontory of rocks which connects Ceylon with the mainland of Hindostan. Forbiger further supposes that this is the same river which Pliny calls Cydras in his account of the island of Taphra (vii. 32, a. 34). [V.]

PHAURA. (Attica, p. 350, &c.)

PHAZAN'TI (φαζαντί), a small town in the west of Pontus, south of Gazelonia, and north of Amasia; it contained hot mineral springs, which, according to Hamilton (Researches, i. p. 333), are the modern baths of Cunea. (Strab. xii. pp. 553, 560, 661.) Pompey, after his victory over Mithridates, planted a colony there, which was afterwards transferred into Neapolis, from which the whole district was called Neapolitica, having previously been called Phazamontis. (Strab. xii. p. 560; Steph. B. s. v. Phazamontis, for thus the name is erroneously written.) Phasemon is generally supposed to correspond in situation with the modern town of Marfus or Marsuf.

PHECA or PREGADUM, a fortress near Gembloni in Thessaly. (Liv. xxxi. 41, xxxii. 14.)

PHEGAEA. (Attica, p. 330, &c.)

PHEGIA. (Proph. Att.)

PHEIA or PHEA (φεια), Hom. II. vii. 138, Od. xvi. 297; Φειά, Thuc. Strab.; Φεια, Steph. B. s. v.; Et. Φειρίας, Steph. B. s. v.), a city of Elis in the Phiaitica, situated near the coast, in the promontory of Ithychus (C. of Katokolo) with the mainland. Strabo erroneously speaks of two promontories upon this part of the coast; one called Phia, from the name of the neighbouring town, and another more to the south, of which he has not given the name. (Strab. viii. 543.) Phia is mentioned by Herodotus, who placed it near the贿on, which is apparently the mountain torrent north of Ithychus, and which flows into the sea on the northern side of the lofty mountain Skaphidik (Hom. L. c.) Upon a very conspicuous peak on the isthmus of Ithychus are the ruins of a castle of the middle age, called Pontikokasero, built upon the remains of the Helenic walls of Phia. On either side of Ithychus there is a gulf, which is a small creek, was the port of Phia; the southern one is the broad bay of Katokolo, which is now much frequented, but was too open and exposed for ancient navigation. The position of these harbours explains the narrative of Thucydides, who relates that in the first year of the Peloponnesian War (B.C. 431), the Athenian fleet, having sailed from Methone in Messenia, landed at Phia (that is, in the bay of Katokolo), and laid waste the country; but a storm having arisen, they sailed round the promontory of Ithychus into the harbour of Phia. In front of the harbour was a small island, which Polybius calls Phiais (Strab. i. c.; Polya. iv. 9). About a mile north of the small creek at Pontikokasero, it is reported there is a harbour called Khoritis, which Leake is disposed to identify with the port mentioned by Thucydides, on the ground that the historian describes it "not as the port of Phia, but as a harbour in the district Phia" (τον τοις Φεια λιμανα); but we think it more probable that the historian intended the creek at the foot of Pontikokasero, or somewhere else in Phia. He stood on the isthmus of Ithychus, and either at Khoritis nor at the mouth of the torrent of Skaphidik, at one or other of which spots Phia is placed by Boblaye, though at neither are there any ancient remains. (Leake, Morea, vol. ii. p. 189, seq.; Peloponnesocon, p. 213, seq.; Boblaye, Naukeiros, &c. p. 131; Curtius, Poloponnesos, vol. ii. p. 44, seq.)

PHELIA. (Lacord. p. 110, &c.)
PHELLOE.

Phellos is mentioned by Homer (H. ii. 605), and was more celebrated in mythical than in historical times. Virgil (Aen. viii. 163) represents it as the residence of Evander; and its celebrity in mythical times is indicated by its connection with Hercules. Pausanias found the city in a state of complete decay. The acropolis contained a ruined temple of Athena Trionia, with a brazen statue of Poseidon Hippius. On the descent from the acropolis was the road by which Phellos was communicated with the place of Iphicles, the brother of Hercules. There was also a temple of Hermes, who was the principal deity of the city. (Paus. viii. 14. § 4, seq.)

The lower slopes of the mountain, upon which the remains of Pheneus stand, is occupied by a village now called Fossikó. There is, however, some difficulty in the description of Pausanias compared with the existing site. Pausanias says that the acropolis was precipitous on every side, and that only a small part of it was artificially fortified; but the summit of the insulated hill, upon which the remains of Pheneus are found, is too small apparently for the acropolis of such an important city, and moreover it has a regular slope, though a very rugged surface. Hence Leake, as well as the rest, supposed that it was not the acropolis of Pheneus, and that the lower town was in part of the subjacent plain; but the entire hill is not of that precipitous kind which the description of Pausanias would lead one to suppose, and it is not impossible that the acropolis may have been on some other height in the neighbourhood, and that the part on which it was visited remains are found may have been part of the lower city.

There were several roads from Pheneus to the surrounding towns. Of these the northern road to Achaia ran through the Pheneis plain. Upon this road, at the distance of 15 stadia from the city, was a temple of Apollo Pythius, which was in ruins in the time of Pausanias. A little above the temple the road divided, the one leading to the left through the city of Mr. Crathis to Aegae and the other to the right running to Pellene: the boundaries of Aegae and Pheneus were marked by a temple of Artemis Pyronia, and those of Pellene and Pheneus by that which is called Forina (Φόρινα Πέρινα), supposed by Leake to be a river, but by Curtius a rock. (Paus. viii. 15. § 1.)

On the left of the Pheneis plain is a great mountain, now called Turtovría, which is not mentioned by Pausanias. He describes, however, the two roads which led westward from Pheneus around this mountain,—that to the right or NW. leading to Nonacris and the river Styx, and that to the left to Cleitor. (Paus. viii. 17. § 6.) Nonacris was in the territory of Pheneus. (NONACRIS.) The road to Cleitor ran at first along the canal of Herculea, and then crossed the mountain, which formed the natural boundary between the Pheneis and Cleitor, close to the village of Lycuria, which still bears its ancient name. On the other side of the mountain the road passed by the sources of the river Ladon, and then turned to the right to Nonacris, where the river ran along a narrow valley, from which the Ladon springs, was called Pentelkhia (Πεντελκήα), Hesych. and Phot. s. v.) The fortress, named Penteleum (Πεντελέα), which Pindar says was near Pheneus, must have been situated upon this mountain. (Pind. Arat. 39, Closs. 17.)

The northern road from Pheneus led to Orchomenos, and was the way by which Pausanias came to the former city. The road passed from the Or-
chomenian plain to that of Pheneia through a narrow ravine (Φεραϊκή), in the middle of which was a fountain called Callimacheus, which gave name to the village of Caryeae. The mountains on either side were named Oxyrhys (Οξύρης) and Scitaitha (Σκίταιθα), and at the foot of either was a subterranean channel, which carried off the water from the plain. (Paus. viii. 13. § 6, § 1.) This ravine is now called Gida, from a village of this name, which occupies the site of Caryae. The mountains on either side are evidently the Oxyrhys and Scitaitha of Pausanias, and at the foot of either there is a katastôlê, as he has remarked.

The eastern road from Pheneia led to Smyrna, across Mt. Geroneum (now Sipheus), which formed the boundary between the territories of the two cities.

To the left of Mt. Geroneum near the road was a mountain called Trigera (Τριγέρα), or the three fountains; and near the latter was another mountain called Sepia (Σεπία), where Aeusus is said to have perished from the bite of a snake. (Paus. viii. 16. §§ 1, 2.) (Leake, Morea, vol. iii. p. 135, seq.; Peloponnesiacs, p. 385, seq.; Curtius, Peloponnesus, vol. i. p. 185, seq.)

PHESY."
PHIGALIA.

(Paus. vii. 39. §§ 4, 5.) In B.C. 375 Phigalia was rent asunder by hostile factions; and the supporters of the Lacedaemonian party, being expelled from the city, took possession of a fortress in the neighbourhood named Hersea, from which they made excursions against Phigalia. (Diod. xV. 40.) In the wars between the Aetolians and Achaean Phigalia became for some time the head-quarters of the Aetolians, who from the walls plundered Messenia, till they were forced to retreat by Philip of Macedon. (Polyb. iv. 3, seq.; 79, seq.) The Phigalians possessed several peculiar customs, respecting which Harmodius of Lepreum wrote a special work. This author relates that they were given to excess both in eating and drinking, to which their cold and vernal climate may perhaps have contributed. (Ath. iv. p. 434.) Such a place was still a place of importance when visited by Pausanias. He describes it as situated upon a lofty and precipitous hill, the greater part of the walls being built upon the rocks. There are still considerable remains of the ancient walls above the modern village of Fesitza. The city was upwards of two miles in circumference. The rock upon which it stood, slopes down towards the Neda; on the western side it is bounded by a ravine and on the eastern by the torrent Lymax, which flows into the Neda. The walls are of the usual thickness, faced with masonry of the second order, and filled in the middle with rubble. On the summit of the acropolis within a distance of 300 yards from a detached citadel 80 yards in length, containing a round tower at the extremity, measuring 18 feet in the interior diameter. In ancient times a temple of Artemis Soteira stood upon the summit of the acropolis. On the slope of the mountain lay the gymnasion and the temple of Dionysus Acratorphus; and on the ground below, where the village of upper Fesitza stands, was the agora, adjoined with a statue of the Panhellenic Arrachion, who lost his life in the Olympic games, and with the sepulchre of the Orestheanians, who perished to restore the Phigalians to their native city. (Paus. vii. 39. §§ 5, 6, 40. § 1.) Upon a rock, difficult to approach, near the union of the Lymax and the Neda, was a temple of Eurynome, supposed to have been erected by the Persians, which was opened only once a year. In the same neighbourhood, and at the distance of 12 stadia from the city, were some warm baths, traces of which, according to the French Commission, are visible at the village of Tragoli, but the waters have long ceased to flow. (Paus. vii. 41. § 4, seq.)

PHIGALIA.

Phigalia was surrounded by mountains, of which Pausanias mentions two by name, Cotilium (Ϋβ Κοτίλιον) and Elaium (Ϋβ 'Ελαίον), the former to the left of the city, at the distance of 30 stadia, and the latter to the right at the distance of 30 stadia. As Cotilium lies to the NE. of Phigalia, and Pausanias in this description seems to have looked towards the east, Mt. Elesion should probably be placed on the opposite side of Phigalia, and consequently to the south of the Neda, in which case it would correspond to the lofty mountain of Kiasoko. Mt. Elesion contained a cavern sacred to Demeter the Black, situated in a grove of oaks. Nor the position of Mt. Cotilium there is no doubt. On it was situated the temple of Apollo Epixenus, which was built in the Peloponnesian War by Ictinus, the architect of the Parthenon at Athens. It was erected by the Phigalians in consequence of a relief afforded by Apollo during the plague in the Peloponnesian War, when he received the surname of Epinicus. The temple stood in a place called Eneas, and according to Pausanias excelled all the temples of Peloponnesus, except that of Athena Alea at Tegea, in the beauty of the stone and the accuracy of its masonry. He particularly mentions that the roof was of stone as well as the rest of the building. (Paus. vii. 41. §§ 7, 8.) This temple still remains almost entire, and is next to the Theseum at Athens the best preserved of the temples of Greece. It stands in a glen (whence the name Baeata, Dor. for Βησάτα, Βίβεα) near the summit of Mt. Cotilium, in the midst of a wilderness of rocks, studded with old knotty oaks. An eye-witness remarks that "there is certainly no remnant of the archaic art in Peloponnesus, and the temple is one that has entirely fascinated the imagination than this temple; whether by its own size and beauty, by the contrast it offers to the wild desolation of the surrounding scenery, or the extent and variety of the prospect from its site." (Murs. Tovt in Greece, vol. ii. p. 270.) A spring rises about 10 minutes SW. of the temple, and soon afterwards loses itself in the ground, as Pausanias has described. North of the temple was the highest summit of the mountain, which one reaches in 10 minutes' time by a broad road constructed by the Greeks. This summit was called Cotilium (Κοτιλίον), whence the whole mountain derived the name of Cotilium; here was a sanctuary of Aphrodite, of which there are still some traces. The ground on the summit of the temple has given to the whole of the surrounding district the name of the Columns (στοάι στόλων ή κολωνίων). The temple is at least two hours and a half from the ruins of the city, and consequently more than the 40 stadia, which Pausanias mentions as the distance from Phigalia to Cotilium; but this distance perhaps is the nearest part of the mountain from the city.

In modern times the temple remained long unknown, except to the shepherds of the country. Chandler, in
PHIGAMUS

PHILAE.

1765, was the first who gave any account of it; it was subsequently visited and described by Gell, Dodwell, and others; and in 1813 the whole temple was cleared of its ruins (see C. Caust., Inst. Ant. i. 220; Strabo, xiii. 2, 528, comp. xii. 579), who places Aspera above the Calycadnus. (Curtius, vol. i. p. 316, sec.)

PHIGAMUS (Φιγάμος or Φυγάμος), a small coastal river in Pontus, flowing into the Euxine 160 stadia west of Polemonium. (Arrian, Perip. Pont. 1. 59.) It bounded the territory of the Thracian Illyrians (Strabo, xiii. 2, 528; comp. xii. 579).

PHILA, one of the small islands on the south coast of Gallia, which Pliny (iii. 5) enumerates between the Sthocheaides (İles d'Héra) and Lero and Lerina (Les Lérins). Pliny's words are: "Tres Sthocheaides ... Ab his Sturrum, Phoeina, Phila ... Liburna et Leren adversamus Antipolis." There seem to be no means of determining which of the islets best ten the İles d'Héra and Santu Maria Margerita represent these three small islands of Pliny. [LE RON.]

PHILA (Φιλία), a frontier fortress of Macedonia towards Magnesia, and distant 5 M. from Heraclea, which stood near the mouth of the Penes, on the left bank. It was occupied by the Romans with the Greeks in 27 B.C. (Xen. Anab. p. 11) [L. S.]

PHILADELPHIA (Φιλαδέλφεια: Eik. Φιλα-

Jeffery.). 1. An important city in the east of Lydia, on the north-western side of Mount Tmolus, and not far from the southern bank of the river Cogamus, at a distance of 28 miles from Sardis. (Plin. vi. 30; It. Ant. p. 336.) The town was founded by Attalus Philadelphus of Pergamum. (Steph. B. s. v.; Strabo, xiii. 2, 528, comp. xii. 579), who places it about 292 B.C. (Curtius, Inst. Ant. i. 220), as it is attested by the book of Revelations (ii. 7). The town, which is men-

tioned also by Ptolemy (v. 2, § 17) and Hierocles (p. 669), resolutely defended itself against the Turks on more than one occasion, until at length it was completely conquered by them in 1565. (Strabo, xiii. 2, 528, comp. xii. 579; Mich. Duc. p. 76; Chalcocd. p. 38.) It now bears the name of Akabaker, but is a mean though considerable town. Many parts of its ancient walls are still standing, and its ruined churches amount to about twenty-four. (Chas. Trusc., p. 310, fol.; Richter, Weltfahrt, p. 313, fol.)

2. A town in the district of Cyzicus, in Chalcedon. The best house on the Calycadnus, above Abyrodesias. (Iul. v. 8, § 5; Hieroc. p. 710, who mentions it among the episcopal sees of Isauria.) Beaufort (Karavannis, p. 223) supposes the site to be represented by the town of Most or Mood, which Leake regards as the site once occupied by Claudinopis (Aeus Minor, P. 17.)

3. A town of Palestine in the district of Peraea, east of Jordan, near the river Jabok, was the later name of Rashbat-Amon, sometimes called Rabbah only, the ancient capital of the Ammonites. (Deut. iii. 11; Jos. xiii. 25.) It was besieged by Joab and taken by David. (2 Sam. xi. 1, xii. 26—31; 1 Chron. xx. 1.) It recovered its independence at a later period, and the early Christian fathers prophesied its destruction. (Jer. xlix. 5; Ezek. xxv. 5.) Subsequently, when this part of Palestine was subject to Alexandria, the city was restored by Ptolemy Philadelphia, who gave it the name of Philadelphia. (Steph. B. s. v.; Euseb. Onom. s. s. Fisid., "Aṣ arousal.) Stephanoz says that Philadelphia was a part of Alexandria in Egypt, and lastly Philadelphia. It is frequently mentioned under its new name by Josephus (B. J. i. 6, § 3, i. 19, § 5, ii. 18, § 1), and also by Ptolemy (v. 17, § 23), Pliny (v. 18, s. 16), Hierocles (p. 722), and upon coins. (Echell, vol. iii. p. 351.) The old name, however, did not go out of use; for Polybius speaks of the city under the name of Rabbath-Ammon ("Φασαρμάς, v. 71); and the ruins are now called Aṣ arousal, a name which they also bore in the time of Abulfeda. (Tab. Sbr. p. 91.) Bürckhardt has given a description of these ruins, with a plan. The most important are the remains of a large theatre. There are also remains of several temples, some of the columns being three feet and a half in diameter. At the bottom of the theatre are the ruins of the town. (Bürckhardt, Syria, p. 357.)

PHILAE (Φιλαί), Strab. i. p. 40, xvii. p. 803, 818, 820; Diod. i. 22; Ptol. iv. 5, § 74; Senec. Quest. Nat. iv. 1; Plin. v. 9, s. 10), was, as the number of the word both in the Greek and Latin denotes, the appellation of two small islands situated in lat. 24° 13', just above the cataract of Syene, on the river Nile. (Strab. vol. iii. p. 399) computes the distance between these islands and Syene at about 64 miles. Philae proper, although the smaller, is, from its numerous and picturesque ruins, the more interesting of the two. It is not more than 1250 English feet, or rather less than a quarter of a mile, in length and about 500 in width; it consists of a composition of Syenite stones: its sides are steep and perhaps escarped by the hand of man, and on their summits was built a lofty wall encompassing the island. For Philae, being accounted one of the burying-places of Osiris, was held in high reverence both by the Egyptians and the Nubians and the Asiatics to the S. and it was not unfrequent for Syrian captives to dwell therein, and was accordingly sequestered and denominated the "unspeakable." (Hes.
PHILAE.

Pliat. In. et Osir. p. 359; Diod. i. 22). It was reported too that neither birds flew over it nor fish approached its shores. (Seneq. Quaest. Nat. iv. 2.) These indeed were the traditions of a remote period; since in the time of the Macedonian kings of Assyry, Philae was struck, repeated to, partly by Egyptians, partly by Greeks, to the tomb of Osiris, partly by persons on secular errands, that the priests petitioned Ptolemy Phryson (n. c. 170—117) to prohibit public functionaries at least from coming thither and living at their expense. The obelisk on which this petition was engraved was brought into England by Mr. Bankes, and its height and inclined with that of the Rosetta stone, threw great light upon the Egyptian phono-
etic alphabet. The islands of Philae were not, however, merely sacerdotal abodes; they were the centres of commerce also between Memoi and Mem-
phia. For the rapidity of the cataracts were at most seasons impracticable, and the commodities exchanged between Assyry and Thebopolitan Philae were reciprocally landed and re-embarked at Syene and Philae. The neighbouring granite-quarries attracted hither also a numerous population of miners and stonemasons; and, for the convenience of this traffic, a gallery or road was formed in the rocks along the E. bank of the Nile, portions of which are still ex-
tant. This road is also remarkable for the singular
effects of light and shade resulting from its position near the tropic of Cancer. As the sun approaches its northern limit the shadows from the projecting cornices and moldings of the temples sink lower and lower down the plain surfaces of the walls, until, the sun having reached its highest altitude, the vertical walls are overspread with dark shadows, formed in contrast with the forms and realities which enshrine all surrounding objects. (Ritter, Erdkunde, vol. i. p. 680, seq.)

The hieroglyphic name of the smaller island is Philaik, or boundary. As their southern frontier, the Pharaohs of Assyry kept there a strong garrison, and, for the same reason, it was a barrack also for Memphite soldiers. The most conspicuous feature of both islands is their architectural wealth. Monuments of very various ages, extending from the Pharaohs to the Caesars, occupy nearly their whole area. The prin-
cipal structures, however, lie at the S. end of the smaller island. The most ancient, at present dis-
covered, are the remains of a temple of Aathor (Aphrodite), built in the reign of Nectanabas. The other ruins are for the most part coeval with the Ptolemaic times, more especially with the reigns of Philadelphia, Epiphane, and Philometer (n. c. 282
—145), with many traces of Roman work as recent as Claudius I. (A. D. 41—54). The chief temple in Philae, dedicated to Ammon Osiris, was ap-
proached from the river through a double colonnade. In front of the propyla were two colossal lions in granite, behind which stood a pair of obelisks, each 44 feet high. The propyla were pyramidal in form and colossal in dimensions. One stood between the drons and pronose, another between the pro-
naos and the portico, while a smaller one led into that which is approached from the char-

The story of Osiris is everywhere represented on the walls of this temple, and two of its inner chambers are particularly rich in symbolic imagery. Upon the two great propyla are Greek inscriptions intersected and partially destroyed by Egyptian figures but the inscrip-
tions belong to the Macedonian era, and are of earlier date than the sculptures, which were prob-
ably inserted during that interval of renaissance for the native religion which followed the extinction of the Greek dynasty in Assyry. (n. c. 30.) The monuments in both islands indeed attest, beyond any others in the Egyptian figurative art, the splendour of the Egyptian art centuries after the last of the Pha-
raos had ceased to reign. Great pains have been taken to mutilate the sculptures of this temple. The work of demolition is attributable, in the first

instance, to the zeal of the early Christians, and afterwards to the policy of the Iconoclasts, who cur-
pried favour for themselves with the Byzantine court by the destruction of statues as well as Christian images. The soil of Philaik was carefully prepared for the reception of its buildings,—being levelled where it was uneven, and supported by masonry where it was crumbling or insecure. For example, the western wall of the Great Temple, and the correspond-
ing part of the dromos, are supported by very strong foundations, and the level of the floor is formed by the resting on the granite which in this region forms the bed of the Nile. Here and there steps are hewn out from the wall to facilitate the communication be-
tween the temple and the river.

At the S. extremity of the dromos of the Great Temple is a smaller temple, apparently dedicated to Isis, and adorned by a number of Egyptian coins, which are surmounted with the head of that goddess. Its porch consists of twelve columns, four in front and three deep. Their capitals represent various forms and combinations of the palm-branch, the dhoum-leaf, and the lotus-flower. These, as well as the sculptures on the columns, the ceilings, and the walls, were painted in the most vivid colours, which, owing to the dreyness of the climate, have lost little of their original brillian.

Philae was a seat of the Christian religion as well as of the ancient Assyryian faith. Ruins of a Christian church are still visible, and more than one admiral bears traces of having been made to serve at different arms the purposes of a chapel of Osiris and of Christ. For a more particular account of the architectural remains of Philae we must refer the reader to the works of Déon, Gau, Boesslin, Rus-
segger, and Hamilton (Assyriacus). The latter has minutely described this island—the Loretto of ancient Assyry. The Greek inscriptions found there are transcribed and elucidated by Leclerq.

A little W. of Philae lies a larger island, anciently called Sfen or Sennut, but now by the Arabs Baghd. It is very precipitous, and from its most elevated peak affords a fine view of the Nile, from its smooth surface S. of the islands to its plunge over the shelves of rock that form the First Cataract. Philae, Baghd, and another lesser island, divide the river into four principal branches. It is the first turn to the W. and then to the N., where the cataract begins. Bagh, like Philae, was a holy island; its rocks are inscribed with the names and titles of Amnon III., Ramesses the Great, Psammitichus, Apries, and Amaasis, together with memorials of the Macedonian and Roman rulers of Assyry. Its principal ruins consist of the propylon and two
PHILAea. columns of a temple, which was apparently of small dimensions, but of elegant proportions. Near them are the fragments of two colossal granite statues, and also an excellent piece of masonry of much later date, having the aspect of an arch belonging to some Greek church or Saracen mosque. [W. B. D.]

PHILAea [Φίλαεα], a fort on the coast of Cilicia, is mentioned only in the Stadiasmus Maria Magdalenae (M. 157, 158). [L.] PHILANETRION PHILAEONORUM AKAEE [Φίλαεος or Φίλαεον Αἰγών, Scyl. p. 47; Polib. iii. 39. § 2, x. 40. § 7; Strab. iii. p. 171, xvii. p. 836; Ptol. iv. 3. § 14, iv. 4. § 8; Stadiam. § 84; Pomp. Mela. i. 7. § 6; Plin. v. 4], the E. frontier of Carthage towards Cyrena, in the middle of the Greater Syria. About the middle of the fourth century B.C., according to a wild story which may be read in Salust (B. J. 79; comp. Val. Max. v. 6. § 4), these monuments commemorated the patriotic sacrifice of the two Philaeus, Carthaginian envoys. These pilgrims, which no longer existed in the time of Strabo (p. 171), continued to give a name to the spot from which they had disappeared. The best account of its entrenchments and topography is given by Boccheius, a little to the W. of Maktar, the modern frontier between Skirt and Barka. The Pentinger Table has a station of this name 25 M. P. from Anabrisia; and, at the same distance from the latter, the Antonine Itinerary has a station Benadaddari, probably a Punic name for Pandynus, the name noted by Strabo for Cyrena. Boccheius, Exposition to the Coast of Africa (p. 218; Barth., Wanderungen, pp. 343, 366, 371). [E. B. J.]

PHILAIADA. [Αρτινια, p. 332, b.]

PHILANOCTERM [Ηρμονεία, p. 1058, a.]

PHILAE (Mela. ii. 2. § 5), or PHILIAS (Tab. Peut.; Geogr. Rav. vi. 6. v. 12; Φίλαιας, Scymn. v. 722; Steph. B. 698, who, however, has also the forms Φίλας and Φιλατις). Paus. v. 1. 2. 7, who also says that it was called Φιλίτας, with which name it is likewise found in Arrian, Per. F. Eur. p. 25; comp. Zosim. i. 34), a town on the coast of Thrace, built by the Byzantines, on a promontory of the same name. It still exists under the slightly altered appellation of Pilea or Plume. [T. H. D.]

PHILIA (Φίλεια ἤρας, Ptol. iii. 11. § 4), a promontory on the coast of Thrace, 310 stadia SE. of Salmydessus (Karos Burnu?), with a town of the same name. [T. H. D.]

PHILIPPI (Φίλιπποι; Εἰκ. Φιλίππειον, Φιλίππιον), a city of Macedonia, which took its name from its founder, Philip, the father of Alexander. Originally, it had been called Creuseus (Κρευσέας, Strab. vii. p. 321; Appian, B. C. iv. 105, 107; Steph. B. s. a. Φίλιππος), or the "Place of Fountains," from the numerous streams in which the Angites takes its source. Near Crenides were the principal mines of gold in a hill called according to Appian (C. C.) Dionysius Collis (Δέσπος Διονυσίου), probably the same as the Mount "Pyramus," on which an encampment of Dionysus interpreted by the Bessi. (Herod. viii. 111.) Crenides does not appear to have belonged to the Thasians in early times, although it was under their dominion in the 105th Olympiad (B.C. 360). When Philip of Macedon got possession of the mines, he worked them with so much success, that they yielded 100 talents a year, although previously they had not been very productive. (Diod. xvi. 4—8.) The old city was enlarged by Philip, after the capture of Amy- phopolis, Pbdna, and Potidaea, and fortified to protect his frontiers against the Thracian mountaineers. On the plain of Philippi, between Boeotia and Pangeus, the last battle was lost by the republicans of Rome. Appian (C. C.) has given a clear description of Philippi, and the position on which Cassius and Brutus encamped. The town was situated on a steep hill, bordered to the N. by the forests through which the Cassian army advanced,—to the W. by a marsh, beyond which was the Ister, by the passes of the Sappae and Corpili, and to the W. by the plains of Myrminus, Drabecus, and the Strymon, which were 350 stadia in length. Not far from Philippi, was the hill of Dionysus, containing the gold mines called Aysla; and 18 stadia from the town, were two other heights, 8 stadia from the enemy. Octavian Caesar was opposed to Brutus on the "left hand of the even field." Here, in the autumn of a. d. 42, in the first engagement, Brutus was successful against Octavius, while Antonius had the advantage over Cassius. Brutus, incompetent to maintain the discipline of his troops, was forced to fight again; and in an engagement he took place on the night of the 20th. Twenty days afterwards, the Republic perished. Regarding the battle a curious mistake was repeated by the Roman writers (Manil. i. 908; Ovid, Met. v. 824; Flor. iv. 42; Lucan, i. 680, vii. 854, iii. 371; Juv. viii. 242), who represented it as fought on the same ground as Pharsalia,—a mistake which may have arisen from the slight error of the lines of Virgil (Georg. i. 490), and favoured by the fact of the double engagement at Philippi. (Merivale, Hist. of Roman Empire, vol. ii. p. 214.) Augustus afterwards presented it with the privileges of "a colony," with the name, Col. Jul. Aug. Philippus. (Orelli, Iac. 512, 3658, 5746, 4064; and coins; Basche, vol. iii. pt. 2. p. 1120, and conferta upon him the title of "Augustus." Liv. t. 4.) It was here, in his second missionary journey, that St. Paul, accompanied by Silas, came into contact with the itinerant traders in popular superstitions (Acts. xvi. 12—40); and the city was again visited by the Apostle on his departure from Greece. (Acts, xx. 6.) The Gospel obtained a home in Europe here, for the first time, according to the Fourth and Fifth of N.T., its great teacher, from his prison, under the walls of Nero's palace, sent a letter of grateful acknowledgment to his Macedonian convert. Philippi was...
PHILIPPI PROM.

PHILIPPI PROM. (Φίλιππος Πρωτ., Stadiums. § 28), a headland on the coast of the Great Syria, identified with the HTRP Παρω. of Ptolemy (iv. 3. 14), and with the remarkable projection of high cliff into the sea, on which are traces of a strong fortress, at Rds Berqasudd. Beechey (Expedition to the N. Coast of Africa. p. 188) identifies this cliff, which he calls Bonergesveld, with Enophrasion; but this is a mistake, as is shown by Barc' (Wandersuss. p. 367), who refers the station to BERKE (Pet. Tab.) to this headland. [E. B. J.]

PHILIPPOPOLIS. 1. (Φιλίπποπολις, Ptol. iii. 11. § 12; Polyb. v. 100; Steph. B. s. v.), a town of Thrace, founded by Philip of Macedon, on the site of a previously existing town, called Eumolpia or Poseuropolis. (Amn. Marc. xxii. 10. § 4; Ptol. iv. 11. a. 16.) From its situation on a hill with three peaks or summits, it was also called Trinomontium. (Ptol. L.; Ptol. L. C.) It lay on the SE. side of the Hauras. The Thracians, however, retained possession of it (Polyb. L. C.; Liv. xxcix. 53), and it remained in their hands till they were subjugated by the Romans. Its size may be inferred from the fact that it was reckoned 100,000 persons in it (Amn. Marc. xxxi. 5. § 17); though doubtless many persons from the environs had taken refuge there. The assumption that it likewise bore the name of Hadrianopolis, rests only on an interpolation in Ptolemy. It is still called Philippopolis, and continues to be one of the most considerable towns of Thrace. (Tae. Amm. iii. 38; Itin. Ant. p. 136; Hieroc. 635.)

2. A city of Arabia, near Bostra, founded by the Roman emperor Philippus, who reigned A.D. 244—249, and who was a native of Bostra. (Aurel. Victor. de Caesar. 28; Cedrenus, p. 257, ed. Paris., vol. i. p. 451, ed. Bonn; Zonar. xix. 19.) Some writers suppose that Philippopolis was only a later name of Bostra, and it may be admitted that the words of Cedrenus and Zonaras are ambiguous; but they are mentioned as two different places in the Councils. (Labbe, Concil. vol. viii. pp. 644, 675; Wesseling, ad Hieroc. p. 723.)

PHILISTINI. [Palaestina.]

PHILOBOEOTUS (Φιλοβοεώτας), a fertile woody hill in the plain of Elateia in Phocis, at the foot of which there was water. (Ptol. Sull. 16.) This description, according to Leake, agrees with the remarkable insulated conical height between Betoa and the Cephissus. (Northern Greece, vol. iii. ii. 42.)

PHILOCALEIA (Φιλοκαλεία), a town on the coast of Pontus Cappadocius, 90 stadia to the east of Argyria, and 100 to the west of Corallia. (Arr. Perip. Pont. Eux. p. 17; Anonym. Perip. P. E. p. 13; Ptol. vi. 4.) Cramer (Asia Minor, i. p. 263) is inclined to identify it with the modern Kisdile, half-way between Kerassos and Trabzon; while Hamilton (Researches, i. p. 254) seeks its site near the promontory of Kara Bouroun, where a large river falls into the sea, which is more in accordance with Pliny's words. [L. S.]

PHILOMETLEIUM, PHILOMETLEM (Φιλομητλεί, Philemetlaos, Philomenes), a town in the south-eastern part of Phrygia, which perhaps derives its name from the number of sibyls found in the district. It was situated in a plain not far from the borders of Lycaonia, on the great road from Synnada to Iconium. (Cic. ad Fam. iii. 8, xvi. 4; Strab. xiv. p. 663, comp. with xii. p. 577; Ptol. v. 2. § 25; Steph. B. s. v.) Philometleum belonged to the conventus of Synnada (Ptol. v. 25), and is mentioned by the historians in their writings as belonging to the rulers of the district (Hiero. p. 679; Ptol. L. C.), the Pisidians in their pronunciation changing its name into Philomedes or Philomede. (Procop. Hist. Arch. 18.) The town is often alluded to by the Byzantine historians in the wars of the Greek emperors with the sultans of Iconium. (Anna Comn. p. 473; Procop. L. C.; Niceph. B. D. 164. C. Leake (Asin Arch. p. 59) believes that the place was situated near the river Iglum; but it is more probable that we have to look for its site at Adsaher, where ruins and inscriptions attest the existence of an ancient town. (Hamilton, Researches, i. p. 472, ii. p. 184; Arundell, Discoveries, i. p. 262, fol.)

PHILÓTEREA. 1. (Φιλότερεα), Strab. xvi. p. 769; Steph. B. s. v.; Ptol. v. 39. a. 33; Polyb. vi. 4. § 14; Philoteria, Apoll. ap. Steph. B. s. v.; Ev. Φιλοτέρειας), a town in Upper Aegypt in the country of the Troglydotes, on the Arabian Gulf, near Myos-Hormus. It was named after a sister of Poltem Philadelpheus, and was founded by Satyrus, who was sent by Poltem to explore the country of the Troglydotes. (Strab. L. C.; see Meineke, ad Steph. B. L. C.)

2. (Ev. Φιλοτέρειας), a city in Cilicia-Syria on the lake of Tibarinis. (Steph. B. s. v.; Polyb. v. 70.) Stephenus says that in consequence of the Ethnic Φιλοτέρεια some called the city Φιλοτέρεια; and in Polybina it is written Φιλοτέρεια.

PHILÔTREIA. [PHILÔTEREA, No. 2.]

PHILÔTERESIS (Φιλότερεσις), an island off the coast of Pontus, in the Euxine. It must have been situated near Cape Zephyrium, opposite the district inhabited by the Philaves, from which, in all probability, it derived its name. (Apollo. Rhod. ii. 1231; comp. Amm. Marc. xxii. 8; Dionys. Per. 766; Steph. B. s. v.; Hamilton (Researches, i. p. 516) identifies it with the small rock 8 miles west of Cape Zephyrion, and between it and the island of Kerassos Aega.)

PHINNI (Φίννι). [ΜΙΝΝΙ.]

PHINOPOLIS (Φίνωπολις, Ptol. iii. 11. § 4; Strab. vii. p. 319), a maritime town of Thrace, not far from the junction of the Busporus with the
PHINTIA.

Eutresis, and close to the town of Philea. It has been variously identified with *Iassakele*, *Mausolos*, and *Derbeas*. (Mela, ii. 2; Plin. iv. 11. s. 18, v. 32. s. 43.)

PHINTIAS (*Phintias*: *Eub. Phintiasis: Aliaceata*), a city on the S. coast of Sicily, situated at the mouth of the river Himera, about midway between Agrigentum and Gela. It was not an ancient city, but a city in the 5th cent. B.C. by Phintias, a tyrant of Agrigentum, who bestowed on it his own name, and laid it out on a great scale, with its walls, temples, and agora. He then peopled it with the inhabitants of Gela, which he utterly destroyed, compelling the whole population to migrate to his newly founded city. (Diod. xxii. 2. p. 495.) Phintias, however, never rose to a degree of importance sufficient to be considered as an independent city, and is mentioned in the First Punic War (B.C. 449) as affording shelter to a Roman fleet, which was, however, attacked in the roadstead by that of the Carthaginians, and many of the ships sunk. (Diod. xxiv. 1. p. 508.) Cicero also alludes to it as a seaport, carrying on a considerable export trade in corn. (De Fin., lib. 1. c. 38. 30 s. c. B.C. by Phintias, a son of the tyrant of Agrigentum, who had to fall into the same state of decay with the other cities on the S. coast of Sicily, as he does not mention it among the few exceptions. (Strab. vi. p. 272.) Pliny, indeed, notices the Phintians (or Phinthineans as the name is written in some MSS.) among the stipendiary towns of Sicily; and its name is referred by Strabo to Phintias, but it is strange that both these writers reckon it among the inland towns of Sicily, though its maritime position is clearly attested both by Didymus and Cicero. The Antonine Itinerary also gives a place called "Phintis," doubtless a corruption of Phintias, which it places on the road from Agrigentum along the coast towards Syracuse, at the distance of 200 stadia from the former city. (Itin. Ant. p. 95.) This distance agrees tolerably well with that from Girgenti to Aliaceata, though somewhat below the truth; and it seems probable that the latter city, which is a place of some trade, though its harbour is a mere roadstead, occupies the site of the ancient Phintias. There is indeed no doubt that it was founded during the 4th cent. B.C. by Phintias, the tyrant of Agrigentum, above Aliaceata, that the site was occupied in ancient times; and, though these have been regarded by local antiquarians as the ruins of Gela, there is little doubt of the correctness of the opinion advanced by Cluverius, that that city is to be placed on the site of *Terracina*, and the vestiges which remain at *Aliaceata* are those of Phintias. (Cluver. loc. cit. p. 200, 214. See also the article GELA.) The remains themselves are of little interest. [E.B.B.]

PHINTONI or PHINTONIS INSULA (Φιντονιών Ἰσλά), a small island in the strait between Sardinia and Corsica, mentioned both by Pliney and Ptolemy. It is probably the one now called the *Isola della Maddalena*, the most considerable of the group so situated. (Plin. vi. 21. 13; Ptol. iii. 3. § 8.)

PHILLA (Φίλλα), an island in the lake Tritonis in the interior of Libya (Herod. iv. 178), which Stephanus B, copying from Herodotus, calls an island in Aegeus, confounding it with the island of Phileas in the Nile.

PHLILUS (Φιλίος; Euth. Φιλίωρος, the territory Φιλιωρία), an independent city in the north-eastern part of Calabria, whose territory was bounded on the N. by Scaena, on the W. by Arcadia, and on the S. by Euboea. This territory is a small valley about 900 feet above the level of the sea, surrounded by mountains, from which streams flow down on every side, joining the river Asopus in the middle of the plain. The mountain in the southern part of the plain, from which the principal sources of the Asopus springs, is called *Carmen* (Καρμέν) in antiquity, now Polyform, (Strab. viii. p. 382.) The territory of Phlius was celebrated in antiquity for its wine. (Athen. i. p. 27, d.) According to Strabo (viii. p. 382), the ancient capital of the country was *Araetaea* (Ἀραεταία) on mount Celosse, which city is mentioned by Homer (Iliad. i. 271); but the inhabitants subsequently went to the city of Phlius, on the Tiber. 30 stadia. Pausanias (vii. 4. § 4, 5), however, does not speak of any migration, but says that the ancient city was named Arantia (Ἀραντία), from its founder Aras, an autochthon, that it was afterwards called Aretaea from a daughter of Aras, and that it finally received the name of Phlius, from Phileus, a son of the Iliad. (vii. 4. § 6.) The name of Arantia was retained in the time of Pausanias in the hill Arantins, on which the city stood. Hence the statement of grammarians that both Arantia and Aretaea were ancient names of Phlius. (Steph. B. s. vo. Φιλίος, Ἀραντία; Schol. ad Apoll. Rhod. i. 115.) According to Stephanus B. (s. vo. Φιλίος, Φιλίωρος, the territory Φιλιωρία), the chief places were *Nymurus* and Chitonophyile. Phlius was subsequently conquered by Dorians under Rhegnesia, who came from Sicyon. Some of the inhabitants migrated to Samos, others to Clazomenae; among the settlers at Samos was Hipparchus, from whom Pythagoras derived his descent. (Paus. ii. 13. § 1, seq.) Like most of the other Doric states, Phlius was governed by an archon; and, though it is subject to a tyrant Leon, a contemporary of Pythagoras. (Diog. Laërt. i. 12, viii. 8; Cic. Tusc. v. 3.) Phlius sent 200 soldiers to Thermopylae (Herod. vii. 202), and 1000 to Plataea (ix. 28). During the whole of the Peloponnesian War, it remained faithful to Sparta and hostile to Argos. (Thuc. v. 57, seq. vi. 14.) But in 346 B.C. it seems to have taken place in the government, for in that year we find some of the citizens in exile who professed to be the friends of the Lacedaemonians. The Phliasians, however, still continued faithful to Sparta, and received a severe defeat from Ephorites in the year already mentioned. So much were they weakened by this blow that they were obliged to admit a Lacedaemonian garrison within their walls, which they had been unwilling to do before, lest their allies should restore the exiles. But the Lacedaemonians did not betray the confidence placed in them, and quitted the city without making any change in the government. (Xen. Hell. iv. 4. § 15, seq.) Ten years afterwards (B.C. 368) the exiles induced the Spartan government to evacuate the place, and the fate of Mantinea before their eyes, the Phliasians thought it more prudent to comply with the request of the Spartans, and received the exiles. (Xen. Hell. v. 2. § 8, seq.) But disputes arising between the returned exiles and those who were in possession of the government, the former again appealed to the Spartans, and Agelaus, king of the phliasians, is recorded in B.C. 380 to reduce the city. At this period Phlius contained 5000 citizens. Agelaus laid siege to the city, which held out for a year and eight months.
PHILUS

It was at length obliged to surrender through failure of provisions in a.c. 379; and Agesilaus appointed a council of 100 members (half from the exiles and half from thebes), with powers of life and death over the citizens, and authorised to frame a new constitution. (Xen. Hell. v. 3, § 10, seq. Plut. Ages. 24; Diod. xv. 20.) From this time the Philians remained faithful to Sparta throughout the whole of the Theban war, though they had to suffer much from the devastation of their territory by their hostile neighbours. The Argives occupied and fortified Tricarmanum above Philus, and the Thracians on the Sicyonian frontier. (Xen. Hell. vii. 2, § 1.) In a.c. 368 the city was nearly taken by the exiles, who, nought belonging to the democratic party, and had been driven into exile after the capture of the city by Agesilaus. In this year a body of Arcadians and Eleians, who were marching through Nemea to join Epaminondas at the Isthmus, were persuaded by the Philian exiles to assist them in capturing the city. During the night the exiles stole to the foot of the Acropolis; and in the morning when the scouts stationed by the citizens on the hill Tricarmanum announced that the enemy were in sight, the exiles seized the opportunity to scale the Acropolis, of which they obtained possession. However, repulsed in their attempt to force their way into the town, and were eventually obliged to abandon the citadel also. The Arcadians and Argives were at the same time repulsed from the walls. (Xen. Hell. vii. 2, §§ 5—9.) In the following year Philus was exposed to a still more formidable attack from the Theban commander at Sicyon, assisted by Euphron, tyrant of that city. The Arcadians on the right Fortified the Thymian, which the Philians had fortified, as already narrated (Xen. Hell. vii. 2, § 1), Thebes having been repulsed by the Thebans on the lofty hill of Spirid, the northern prolongation of Tricarmanum, between the villages Simina and Scipadai, on the summit are the remains of a large round tower, probably built by the Franks or Byzantines. In the southern part of the Thymian, which is mentioned only by Polybius (iv. 67, 68, 73), and which lay on the road from Corinth over the mountain Apelaron into the Symplegia. (Lek. Morea, vol. iii. p. 339, seq.; Ross, Reisen in Peloponnes, p. 25, seq.; Curtius, Peloponnesos, vol. ii. p. 470, seq.)

PHILYA

MAP OF THE NEIGHBOURHOOD OF PHILUS.

A. Philus.
B. Aratta or Arantia.
C. Mount Tricarmanum.
D. The Asopus.
1. Rual, perhaps of Celae.
2. The gate leading to Corinth.
3. Panodasas on Mount Tricarmanum.
4. The way to Nemea.

PHILUS. [Attica, p. 332, b.]
PHYLICONIUM (Philyonion), a city of Phocis, of unknown site, destroyed at the end of the Phocian War. (Paus. x. 3, § 2; Steph. B. s. a.) Pliny calls it Philyon, and erroneously represents it as a city of Boetia (iv. 7, s. a. 12). PHOCAEA (Φοκαία), in Eth. Φωκάεις or Φωκαίας, the most northern of the Ionian cities in Asia Minor, was situated on a peninsula, between the Sinus Cyaneus and the Sinus Hermus, and at a distance of 300 stadia from Smyrna. (Strab. xiv. p. 632; Plin. v. 31; Pomp. Mela, i. 17.) It was said to have been founded by emigrants from Phocaea in Ionia. The government of the two cities was divided, the Phoecines and Philocenes and Damson. (Strab. l. c. p. 633; Paus. vii. 3, § 5.) The first settlers did not conquer the territory, but received it as a gift from the Cumaeans.

The town, however, did not become a member of the Ionian confederacy until it placed princes of the line of Croesus at the head of the government. It had two excellent harbours: Neaustathmus and Lampert, and before the entrance into them was situated the little island of Bacchosion, which was adorned with temples and splendid buildings (Liv. xxviii. 32); and owing to this favourable position, and the enterprising spirit of its inhabitants, the town soon rose to great eminence among the maritime cities of the ancient world. Herodotus (i. 153, &c.) states that the trade of the town occasioned frequent distant voyages, and made themselves acquainted with the coasts of the Adriatic, and the Tyrrhenian and Iberian seas; and that they were the first to visit Tartessus. Arganthesii, king of the Tartessianians, came so attached to them as to try to prevail upon them to quit Ionia and settle in his own dominions, but without success, and then, by a large sum of money to fortify their own city against the Persians. The Phoecaeans accordingly surrounded their city by a wall of several stadia in circumference, and of a very solid construction. In the war of Cyrus, Phocaea was one of the first towns that was besieged by the army of Cyrus, under the command of Hapagoras. Neaustathmus was called upon to surrender, the Phoecaeans, conscious of being unable to resist the enemy much longer, asked and obtained a truce of one day, pretending that they would consider his proposal. But in the interval they embarked with their wives and children and their most valuable effects, and sailed to Chios. There they endeavoured by purchase to obtain possession of the group of islands called Cremnesia, and belonging to the Chians; but their request being refused, they resolved to sail to Corisca, where twenty years before these occurrences they had planted the colony of Alalia. Before setting out they landed at Phocaea and put the Persian garrison to the sword. They then bound themselves by a solemn oath to abandon their native country; nevertheless, however, one half of their number, unable to overcome their feelings, remained behind. The rest proceeded to Corisca, where they were kindly received by their colonists. Soon they became formidable to the neighbouring nations by their piracy and depredations, so that the Tyrrhenians and Carthaginians were obliged to pay their tribute. This obtained indeed in defeating their enemies, but their loss was so great that they despaired of being able to continue the contest, and proceeded to Rhegium, in the south of Italy. Not long after their arrival there, they were induced to settle at Elaea or Velia, in Lucania, which, in the course of time, became a flourishing town. Among the numerous colonies of the Phocaens the most important was Massilia or Marseille, in the south of France, and the most western Marmaca, in Hispania Baetica. After the emigration of half the population, Phocaens continued to exist under the Persian dominion; but was greatly reduced in its commerce and prosperity, we may infer from the fact that it furnished only three ships to the fleet of the revolted Ionians at the battle of Lade; but their commander was nevertheless the oldest man among the Ionians. (Herod. vi. 11—17.) After these events Phoecaea is little mentioned (Thucyd. i. 13, viii. 31; Hymn. Iph. ii. 85; Clayx. p. 37). Later, in the war of the Romans against Antiochus, when Phocaens was besieged by a Roman fleet, Livy (xxxvii. 31) describes the place as follows:—"... The town is situated in the innermost recess of a bay; its shape is oblong, and its walls enclose a space of 2500 paces; they afterwards unite so as to form a narrower wedge: this they themselves call Lampert, and it is about 1200 paces in breadth. A tongue of land running out into the sea a distance of 1000 paces, divides the bay nearly into two equal parts, and forms on each side of the narrow isthmus a very safe port. The one towards the south was called Neaustathmus, from its being able to contain a great number of ships, the other was situated close to the Lampert." At a still later period or earlier, when the Romans, after a desperate resistance, and given up to plunder by the praetor Aemilius, though the inhabitants had voluntarily opened their gates. The town with its territory, however, was restored to the inhabitants by Aemilius. (Liv. l. c. 39; Polyb. xxii. 37, comp. v. 77, xxii. 4; Liv. xxxiii. 89.) At a still later period and probably then, when the Romans by supporting the cause of Aristonicus, the claimant of the throne of Pergamus, and they would have been severely punished had not the inhabitants of Massilia interceded in their behalf. (Justin. xxxvii. 1, xiiii. 3; Strab. p. 646.) The existence of Phocaens can be traced throughout the imperial period from coins, which extend down to the time of the Philipii, and even through the period of the Lower Empire. (Hieron. p. 661.) From Michael Ducas (Ann. p. 89) we learn that a new town was built not far from the ancient city by some Genoese, in A.D. 1421. This latter, situated on the isthmus mentioned by Livy, not far from the ruins of the ancient city, is the place now called Foggia Nova: the ruins bear the name of Palazzo Fecheny (Chandler, Travect, p. 96; Arundell, Seven Churches, p. 294; Hamilton, Researches, ii. p. 4; Eckhel, Doct. Num. i. p. 53, &c.; Racche, Lec. Rei Num. iii. 2, p. 1225, &c.; Sestini, p. 83; Thieven, Phocoasica, Born, 1842, 8vo.)

Another town of the same name in the peninsula of Mount Mycon, in Caria, is mentioned by Stephanus B. (s. v.).

L. S.

COIN OF PHOCAEA.

PHOCAEAE. [L Kontini, p. 159, b.]

PHOCICUM. [Phociis.]

PHOCIS (Φωκης: Eth. Φωκής, Phoecenis), a small country in central Greece, bounded on the N. by Doris, on the NE. and E. by the Locri Epiphanesii and Opuntii, on the SE. by Boeotia, on the W. by the
Osolian Locrians, and on the S. by the Corinthian gulf. The Phocians at one period of their history possessed a sea-seat, Delphi, on the Euboan sea intervening between the Locri Epipolaiti and Opuntii (Strab. x. pp. 424, 425). Phocis is a mountainous country. The greater part of it is occupied by the lofty and rugged range of Parnassus, the lower portion of which, named Cephissus, descends to the Corinthian gulf between Cirrus and Anticyra; between the latter was the fertile valley of Crius, extending to the Corinthian gulf. On the S. it extends into the Peloponnese. The Locrians and the Locrian mountains, lofty and difficult of access on the side of the Epipolaiti, but less precipitous on the side of the Opuntii. [Locrius.] Between Mount Parnassus and the Locrian mountains flowed the river Cephissus, which empties itself into the lake Copais in Boeotia. [Copais, p. 416, seq.] In the valley of Phocis flowing into the Corinthian gulf near Bulis. [Bulis.] Phocis is said to have been originally inhabited by a group of tribes who formed the population of Greece before the appearance of the Hellenes. Among the earliest inhabitants we find mention of Legeus (Diosc. v. p. 401; Thuc. ii. 29; comp. Paus. i. 41 § 8), and Hyantes. (Strab. l. c.) The aboriginal inhabitants were conquered by the Phlegyas from Orchomenus. (Paus. viii. 4 § 4), x. 4 § 1.) The country around Thesprotia and Delphi is said to have been first called Phocis from Phocus, a son of Orion, and grandson of Sisyphus of Corinth; and the name is said to have been afterwards extended to the whole country from Phoc, a son of Aeacus, who arrived there not long afterwards. (Paus. ii. 29 § 3; x. 1 § 1.) This statement would seem to show that the Phocians were believed to be a mixed Aeolic and Achaean race, as Sisyphus was one of the Aeolic heroes, and Aeacus one of the Achaeans. In the Trojan War the inhabitants appear under the name of Phocians, and were led against Troy by Schedus and Epaphroditus, the sons of Iphitus. (Hom. Il. ii. 517.) Phocis owes its chief importance in history to the cultivation of grapes, which was mainly done by the Phocians. But after the Dorians had obtained possession of the temple, they disowned their connection with the Phocians; and in historical times a violent antipathy existed between the Phocians and Delphians. [Delphi, p. 762.] The Phocians proper dwelt chiefly in small towns situated on either side of the Copais and Troy river. They formed an ancient confederation, which assembled in a building named Phocicum, near Paulus. (Paus. x. 5 § 1.) They maintained their independence against the Thessalians, who made several attempts to subdue them before the Persian War, and upon one occasion they inflicted a severe loss upon the Thessalians near Hyampolis. (Herod. vii. 27, seq.; Paus. i. 18, 2.) Next, however, the Thessalians were able to wreak their vengeance upon their ancient enemies. They conducted the Persian army into Phocis, and twice the Phocian cities were destroyed by the invaders. The inhabitants had previously escaped to the summits of Parnassus or across the mountains into the territory of the Locrians on the S. In 329 B.C. some of the Phocians were subsequently compelled to serve in the army of Mardonius, but those who had taken refuge on Mt. Parnassus saluted from their fastnesses and annoyed the Persian army. (Herod. ix. 17, 31; Paus. x. 1 § 11.)

It has been already remarked that the oracle at Delphi originally belonged to the Phocians. The latter, though dispossessed by the Delphians, had never relinquished their claims to it. In 450 B.C. the oracle was again in their possession; the Lacedaemonians sent an army to deprive them of it and restore it to the Delphians; but upon the retreat of the Lacedaemonians against the Aetaeans, a number of Phocians under Ariston, the son of Aineas, as it is thought, handed over the temple to the Phocians. (Thuc. i. 112.) In the Peloponnesian War the Phocians were zealous allies of the Athenians. (Comp. Thuc. iii. 93.) In the treaty of Nicias (a. 421), however, it was expressly stipulated that the Delphians should be independent of the Phocians (Thuc. v. 18); and from this time the temple continued in the undisputed possession of the Delphians till the Sacred War. After the battle of Leuctra (a. 371), the Phocians became subject to the Thebans. (Xen. Hell. vi. 5 § 23.) After the death of Epaminondas they deserted the Theban alliance; and the Thebans, in revenge, induced the Amphictyonic Council to join the Phocians to their alliance. (Xen. Hell. vii. 1 § 6.) The Amphictyonic Council banished the Phocians to Athens; they were afterwards restored, and were allowed to retain the temple of Apollo. (Paus. x. 5 § 9.) They were again expelled after a short time, and were allowed to return, but with all their property seized. (Xen. Hell. vii. 1 § 6.) The Phocians were afterwards restored, and were allowed to retain the temple of Apollo. (Paus. x. 5 § 9.) They were again expelled after a short time, and were allowed to return, but with all their property seized. (Xen. Hell. vii. 1 § 6.) The Phocians were afterwards restored, and were allowed to retain the temple of Apollo. (Paus. x. 5 § 9.) They were again expelled after a short time, and were allowed to return, but with all their property seized. (Xen. Hell. vii. 1 § 6.) The Phocians were afterwards restored, and were allowed to retain the temple of Apollo. (Paus. x. 5 § 9.) They were again expelled after a short time, and were allowed to return, but with all their property seized. (Xen. Hell. vii. 1 § 6.) The Phocians were afterwards restored, and were allowed to retain the temple of Apollo. (Paus. x. 5 § 9.)
PHOCUSA.

PHOCUSAE.

PHOCUSAE, PHUCUSAE (Φοκούσαι), Ptol. iv. 5. § 75; Φοκούσαι, Athen. i. p. 30. d.; Hesych. s. v.; Steph. B.), islands lying off Zephyrion in Marmarica (Μαρμαρία), which the Coast-describer (Stadiasmus. § 20) calls DELPHINE. [E. B. J.]

PHOEBATAE, PHOEBATIS. [DASSARETAE.]

PHOBRIA. [BEPHRA.]

PHOEONCE (Φόιεντζ), a city of Chaeonia in Epeirus, situated a little inland north of Butphroton (Strab. vii. p. 324), upon a river, the ancient name of which is not recorded. It is described by Polybius, in b. c. 230, as the strongest, most powerful, and richest of the cities of Epeirus. (Polyb. ii. 5. 8.) In that year it was captured by a party of Illyrians, assisted by some Gallic mercenaries; and the Epipote, who had marched to the rescue of the place, were surprised by a sally of the Illyrians from the city, and put to the rout with great slaughter. (Polyb. l. c.) Phoenix continued to be an important city, and it was here that a treaty of peace was negotiated between Philip and the Romans towards the close of the Second Punic War, b. c. 204. (Liv. xxxix. 12. Polyb. xxxvi. 27.) Phoenix appears to have escaped the fate of the other Epeirian cities, when they were destroyed by order of the senate, through the influence of Charopus, one of its citizens. (Polyb. xxxxi. 22.) It is mentioned by Polieny (iii. 14. § 7) and Hierocles (p. 633), and was restored by Justinian. (Procop. de Aedif. iv. 1.) Procopius says that it was situated in a low spot, surrounded by marshes, and that Justinian built a citadel upon a neighbouring hill. The remains of the ancient city are found on a hill which still bears the name of Feisiri. * The entire hill was surrounded by Hellenic walls. At the south-eastern extremity was the citadel, 200 yards in length, some of the walls of which are still about 20 ft. in height. . . . About the middle of the height is the emplacement of a very large theatre, the only remains of which are a small piece of rough wall, which enclosed the back of the upper seats; at the bottom, in the place of the scene, is a small circular foundation, apparently that of a town of later date. Between them ran the transept of the citadel, the remains of a Roman construction, built in courses of tiles." (Leake Northern Greece, vol. i. p. 66.)

PHOENICIA, a country on the coast of Syria, bounded on the E. by Mount Lebanon.
PHOENICIA.

that he makes the river Eleutherus the N. boundary, and does not mention Aradus, which lay a little to the N. of that stream. There can be no question, however, that Aradus belonged to Pho- necia. So, too, at the southern extremity, the town of Dover, unquestionably Phoenician, whilst Carafa, the first town S. of the Chersones, be- longed to Palestine.

Phoenicia, as thus defined, lies between lat. 32° 38' and 34° 55' N., and long. 35°—36° E. It forms a narrow slip of land about 120 miles in length, and seldom more, but frequently less, than 12 miles broad. The range of Libanus, which skirts the greater part of its eastern side, throws out spurs which form promontories on the coast, the most remarkable of which are Theb-prosopon (Θέβ- προσόπον) between the towns of Trieris and Botrys, and the Promontorium Album between Tyre and Ecdippa. Farther to the S. Mount Carmel forms another bold promontory. The whole of Phoenicia presents a succession of headlands and bays which are traversed by numerous small rivers which descend from the mountains and render it well watered and fruitful. The coast-line trends in a south-westerly direction; so that whilst its northern extremity lies nearly under long. 36°, its southern one is about under 35°. Aradus, its most northerly town, lies on the side of the entrance of the Bay of Tyre, 2 and 3 miles from the mainland, and nearly opposite to the southern extremity of Mount Barylna. On the coast over against it lay Antaradas. From this point to Tripolis the coast forms an extensive bay, into which several rivers fall, the principal being the Eleutherus (Ναξρ-ελ-Κεβορ), which flows through the district of Ruba and 2 hours from the sea. To the N. of the Eleutherus lie the towns of Simyra and Marathus; to the S. the principal town before arriving at Tripolis was Orthosia, close to the sea-shore. Tripolis stands on a promontory about half a mile broad, and running a mile into the sea. It is washed by a little river now called El-KadiAna, "the holy." Tripolis derived its name from being the federal town of the three leading Phoenician cities, Tyre, Sidon, and Aradus, each of which had here its separate quarter. To the S. of Tripolis the country rises into chalk hills, which press so closely on the sea as to leave no room for cultivation, and scarcely even for a road, and which form the bold promontory already mentioned of Thenprosopon. (Ras-el-Abiad.) The chief towns of this district are Calamos and Trieris. To the S. of Then- prosopon the hills recede a little from the sea, but at a distance of between 20 and 30 miles form another lofty promontory called Climax (Ras Walla Silma), from the circumstance that the steepness of the cliffs rendered it necessary to cut steps in them for the ascent of several rivers descending into the sea, the principal of which is the Adonis (Ναξρ-ελ-Ιβραμ). The chief towns are Botrys, 7 miles S. of Thenprosopon, and Byblis, a little S. of the Adonis. Palai-byblis lay still farther S., but its site is unknown. Aphaeis, noted for its licentious wor- ship of Venus, was seated in the interior, at the source of a stream now called Adonis in Libanus and 2. The promontory of Climax formed the N. point of the bay, now called Karmara, the S. extremity of which, at a distance of about 12 miles, is formed by the head- land Ras-en-Nahr-el-Kelb, on which the town of Berytus formerly stood. At about the middle of this bay the river Lycus (Ναξρ-ελ-Κεβορ) discharges itself into the sea through a narrow channel the nearly perpendicular cliffs of which are 200 feet in height. At the eastern extremity of the valley of the Lycus rises the Gebel-el-Sannis, the highest summit of Libanus. The southern side of this valley is enclosed by steep and almost inaccessible cliffs, which traces of a system of the Nile, still visible, made probably by the Egyptians during their wars in Palestine. A lower and broader road of more gradual ascent was constructed by the em- peror M. Aurelius. To the S. of this spot, the plain between Libanus and the sea at Berytus is of greater length than in any other part of Phoenicia. The latter consists of a tableland of gentle undulations, very fertile, and produces orange and mulberry trees in abundance. This plain extends southwards as far as the river Tamyras, a distance of about 10 miles. Berytus (Beirut) is washed by the river Magoras. From the headland on which it stands— the most projecting point in Phoenicia—the coast again forms a long curve down to Sidon. On this part of it, the land consists of gentle undulations, very fertile, and produces the finest fruits in Syria. Sidon stands on a small promontory of about 2 miles S. of the Bostrænus. From Sidon a plain extends to a distance of about 8 miles S., as far as Sarepta, the Zarephath of the Book of Kings (1 Kings, xviii. 9), which stands on an eminence near the ancient settlement of Samea, or S. Nine miles to the N. of Tyre the site of the ancient Ornithopolis is supposed to be marked by a place called Adrom or Adrom. At this place the plain, which had expanded after passing Sarepta, again contracts to about 3 miles, and runs along the coast in gentle undulations to Tyre, where it expands to a width of about 6 miles. The hills which bound it are, however, of no great height, and are cultivated to the summit. At about 5 miles N. of Tyre this plain is crossed by the river Kasimieh, supposed to be the ancient Leontes, the most considerable of Phoenicia, and the only one which makes its way through the barrier of the mountains. It rises in the valley of Bekaa, between Libanus and Anti- libanus, at a height of about 400 feet above the level of the sea. The upper part of its course, in which it is known by the name of El-Litani, is consequently precipitous and romantic, till it forces its way through the defiles at the southern extremity of Libanus. Sudden and violent gusts of wind frequently rush down its valley, rendering the navigation of this part of the coast very dangerous. From Tamys, the site of which will be found described under its proper head, the coast runs in a westerly direction for a distance of about 8 miles, to the Promontorium Album (Ras-el-Abiad), before mentioned,—a bluff headland consisting of white perpendicular cliffs 300 feet high. The road from Tyre to its summit seems originally to have been constructed of steps, whence it was called Climax Tyrianus or the Tyrian staircase; but subsequently a road was laboriously cut through the rock, it is said, by Alexander the Great. From this promontory the coast proceeds in a straight and almost southerly direction to Pholemais or Acco (Acre), a distance of between 20 and 30 miles. About midway lay
PHOENICIA.

Eclipses, now Zeb, the Achabhi of Scripture (Josh. xix. 29), regarded by the Jews after the captivity as the northern boundary of Judæa. Ptolemais stands on the right bank of the river Belus (Naaman), but at a little distance from it. To the SE. a fertile plain stretches itself out as far as the hills of Galilee.

From Ptolemais the coast forms a deep bay, about 8 miles across, the further extremity of which is formed by the promontory of Carmel. It is now called the bay or gulf of Khafsya. The bold and lofty headland of Carmel, the ancient source of the fire-spur of the mountain of the same name, a range of no great height, from 1200 to 1500 feet, which runs for 18 miles in a direction from SE. to NW., gradually sinking as it approaches the coast. A convent near the capes or promontory is about 582 feet above the sea. On its NE. side flows the Kishon of Scripture, which, when not swollen by rains, is a small stream finding its way through the sand into the sea. Towards the bay the sides of Carmel are steep and rugged, but on the south they slope gently and are more fertile. Carmel was celebrated in Hebrew song for its beauty and fertility; and though its orchards and vineyards no longer exist, the slopes are covered by the profusion of its shrubs and the luxuriance of its wild-flowers. From the promontory of Carmel the coast gradually sinks, and at its lowest point stands Doræ, a town celebrated in ancient times for the manufacture of the Phoenician purple. Beyond this point we shall not pursue the description of the coast; for although between Doræ and Egypt some towns are named by the Bible it is inhabited by Phoenicians, yet in their geographical distribution they belong more properly to Palestine.

That part of the Mediterranean which washed the coast of Phoenicia was called by the Greeks Τῆς Φώκιας ἄλγος (Agathem. ii. 14), or Σιδωνίων Σίλβα (Dion. Per. v. 117), and by the Latins Marseilles (Phyl. v. 13, ix. 12 etc.). Its southern portion, as far as Sidon, is affected by the currents which carry the alluvial soil brought down by the Nile to the eastward; so that towns which were once maritime are now become inland, and the famous harbours of Tyre and Sidon are nearly choked with sand.

On the climate of Phoenicia is tempered by the vicinity of Lebanon, which is capped with snow during the greater part of the year, and retains it in its ravines even during the heats of summer. (Tac. Hist. v. 6.) Hence the temperature is much lower than might be expected from the latitude.

At Seirous, which lies in the centre of Phoenicia, the usual summer heat is about 90° Fahrenheit, whilst the winter temperature is rarely lower than 50°. In the mountains, however, the winter is severe, and heavy falls of snow take place. The rainy season commences towards the end of October, or beginning of November, from which time till March there are considerable falls of rain or snow.

From May till October rain is very unusual. In Phœnicia, as well as in every part of the world, the effects of its configuration and natural features, subject to a great variety of climate, so its vegetable productions are necessarily very various. The sides of Lebanon are clothed with pines, firs, and cypress, besides its far-famed cedars. The lowlands produce corn of all sorts, peaches, pomegranates, grapes, oranges, citrons, figs, dates, and other fruits. It also yields sugar, cotton, tobacco, and silk. The whole coast is subject to earthquakes, the effect of volcanic activity; from which cause, as well as from the action of the currente already mentioned, both Tyre and Sidon have suffered changes which render them no longer to be recognised by the Roman surveyor. Sebastian, a small place, places the coast has been depressed by earthquakes, and at the mouth of the river Lykus are traces of submerged quarries. (Bertol, Topogr. de Tyr. p. 54.) In like manner, the lake Cendivela, at the foot of Carmel, in which Piný (v. 17) describes the river Belus as rising, has now disappeared; though the critical reader (Strabo, v. 15) admits that there was a lake near, and not far from the city. Their postulate is, that the site of the Roman city of Tyre corresponds exactly with the island of Berys, which was a haven for ships. If the present reading of the text is correct, the island once possessed by the Phœnicians was a separate piece of land, and not an islet, or a portion of the mainland laid waste by a sudden deluge. (Ptolem. v. 13, &c.) The geological structure of Phœnicia is recent, and consists of chalk and sandstone, the higher mountains being formed of the Jura limestone. The only metal found is iron, which occurs in considerable quantities in the hills above Berys. In the sandstone of the same district, bituminous wood and brown coal are found, but in small quantities and impregnated with sulphur.

III. ETHNOLOGICAL RELATIONS OF THE PHOENICIANS.

The Phœnicians were called by the Greeks Ἡφαῖες (Hom. Od. iv. 84; Herod. i. 1; Thucyd. i. 8, &c.), and in the Roman period by Phœniciæ (Cic. N. D. ii. 41; Mela, i. 12; Plin. v. 13, &c.). They were a branch of the great Semitic or Aramaean race. The Scriptures give no intimation that they were not indigenous; and when the Hebrews settled in Canaan, Sidon and Tyre were already flourishing cities. (Josh. xix. 28, 29.) By classing, however, the Phœnicians, or Canaanites, among the descend-
PHOENICIA.

makes them to be colonies of their more celebrated namesakes, in opposition to the testimony of Strabo, and without producing any counter authority. The isle of Tylos or Tyrus is likewise mentioned by Pliny (vi. 32). The account given by Justin is in harmony with these authorities (xiv. 3). He describes the Tyrians as having been disturbed in their native seats by an earthquake, and as migrating thence to the eastward, and settle the Asian lake, and subsequently to the shores of the Mediterranean. A recent writer (Kenrick, Phoenicia, p. 47) takes this Assyrian lake to have been Gennesaret or the Dead Sea, as there was no other collection of waters in S. Assyria to which the term could be applied. This would have formed a natural resting-place in the journey of the emigrants. It must not, however, be concealed, that the account of these writers has been rejected by several very eminent authors, as Bochart, Hengstenberg, Heeren, Niebuhr, and others, and more recently by Movers, a writer who has paid great attention to Phoenician history, and who has discussed this question at considerable length. (Die Phönicier, vol. ii. pt. i. pp. 263–69.) His principal objections are to the Phoenicians, and to the Phoenicians, which go back to the primitive chaos, represent even the gods, as well as the invention of all the arts of life, as indigenous; that the Scriptures, whose testimony is preferable, both on account of its antiquity, and because it arose out of the bosom of the people themselves, make no mention of any such immigration, though at that time its name could not have been obliterated had it really occurred, and though it would have served the purpose of the Jews to represent the Canaanites as intruders; and that the name of the people, being derived from the character of the land, as well as the appellations of different tribes, such as the Giblet at Byblus, the Sidonians as ibid, have, mark them as indigenous. But it may be observed, that the Phoenician traditions rest on the equivocal authority of the pretended Sanconiathe, and come to us in so questionable a shape that they may evidently be made to serve any purpose. Thus Movers himself quotes a passage from Sanconiathe (vol. ii. pt. i. p. 28) to the effect that the Tyrians would not build, because it directly contradicts the statement that they were the descendants of a sea-faring people on the shores of the Persian Gulf; although he had previously cited the same passage (vol. i. p. 143) in proof of the Eusemism of Philo-Sancioniatho, who, it is there said, attributed the invention of navigation to the Cabiri merely because the Phoenician mariners considered themselves as sailors under the protection of their deities. Can such testimony be compared with that of the "loyal-hearted and truthful Herodotus," as Movers characterizes him (vol. i. pt. ii. p. 134), who, if he observed, also founds his account on the traditions of the Phoenicians (des abrol ληβηγον, vii. 89), and which he has done. How much more is it, indeed, a question in what the Phoenicians have found any gratification in misleading him on this point, since the tradition lessened, rather than enhanced, the splendour of their origin. The testimony of the Scriptures on the subject is merely suspect; nor, were it otherwise, could they be an infallible criterion of interest in ethnological inquiries. They were not written with that view, and we have already adverted to a discrepancy in their treatment of this subject. The question, however, is too long to be fully discussed in this place. We have merely adverted to some of the principal heads, and they who wish to pursue the inquiry further are referred to the passage in Movers's work already indicated, and to Mr. Kenrick's Phoenicia (chap. iii.).

IV. HISTORY.

Our knowledge of Phoenician history is only fragmentary. Its native records, both literary and monumental, have not survived, and what few there are are thus reduced to gather from scattered notices in the Old Testament and in the Greek and Roman authors, and sometimes to supply by inference, the annals of a country which stands the second in point of antiquity, which for some thousands of years played a considerable part in the world, and to which Europe owes the germs of her civilization.

In accepting the authority of Herodotus, the Phoenicians must have appeared upon the coasts of the Mediterranean at least twenty-seven or twenty-eight centuries before the birth of Christ. In order to ascertain the age of Hercules, respecting which the Egyptian chronology differed very widely from the Greek, that conscientious historian, after long and anxious deliberations, decided to select as the time of its foundation 6040 B.C., the year in which he had heard that there was a famous temple of Hercules. It was, therefore, expressly for the purpose of settling a chronological point that he was at the trouble of making this voyage, and it is natural to suppose that he did not adopt the information which he received from the priests without some discrimination. From these he learned that the temple had existed 3300 years, and that it was coeval with the foundation of Tyre (ii. 43, 44). Now, as Herodotus flourished about the middle of the fifth century before our aera, it follows that Tyre must have been founded about 2750 years B.C. The high antiquity of this date is undoubtedly startling, and on that account has been rejected by several critics and historians. Yet it does not appear why it should be regarded as altogether improbable. The chronology of the Jews is carried back more than 2000 years b. c.; yet the Hebrew Scriptures uniformly intimate the much higher, and indeed immemorial, antiquity of the Cannities. Again, in Egypt, the present 14th dynasty of its kings (2750–2651 B.C.), who had had an historical existence, and to whom many conquests are attributed before this period. This dynasty was followed by that of the Hyksos, who were probably Cannities, and are described by Manetho as skilful in the art of war, and of fortifying camps and cities. (Scc. pp. 118, 114, ed. Schol. in Pluton. Tun. vol. viii. p. 288, ed. Tauchn.)

If Sidon was older than Tyre, and its mother-city, as it claimed to be, this would add some difficulty to the question, by carrying back the chronology to a still higher period. But even this objection cannot be regarded as fatal to the date assigned to Tyre. If, however, a date of such importance might safely have been planted by one another within a very brief space of time from their origin; and the contest between them in ancient times for priority, not only shows that the question was a very ambiguous one, but also leads to the inference that the difference in their dates could not have been very great. The weight of ancient evidence on either side of the question is pretty nearly balanced. On

* This is the date assigned by Movers; but by some authorities it is placed later.
PHOENICIA. 609

federate kings, with the exception of a few fortresses, fell into the power of the Israelites. The defeated host was pursued as far as Sidon; but neither that nor any other town of Phoenicia, properly so called, fell into the hands of the Jews, nor on the whole does the expedition of Joshua to Tyre had much effect on its political condition. Yet there was a constant succession of hostilities between the Phoenicians and some of the Jewish tribes; and in the book of Judges (x. 12) we find the Sidonians mentioned among the oppressors of Israel.

Sidon, then, must have early risen to be a powerful kingdom, as may indeed also be inferred from the Homeric poems, in which no name and the characters are frequently alluded to. Yet a year before the capture of Troy, the Sidonians were defeated by the king of Ascalon, and they were obliged to take refuge—or at all events a great proportion of them—at Tyre. (Justin, xvi. 8. 3.) We are ignorant how this conquest was effected. The name of Ascalon probably refers to the whole province of Philistia; and we know that shortly after this event the Philistines were powerful enough to reduce the kingdom of Israel to the condition of a tributary, and to retain it as such till the time of David. Justin, in the passage just cited, speaks of Tyre as founded by the Sidonians (considering) on this occasion. This expression, however, in no manner implies a first foundation, since in the next chapter he again uses the same word to denote the restoration of Tyre by Alexander the Great. It has been already said, as will appear at a greater length in the account of the Phoenician colonies, that Tyre must have been a city of considerable importance before this period. The research of Justin is corroborated by Josephus, who, in allusion to the foundation of Tyre, says (Ant. viii. 3.), if Justin followed the computation of the Parian marble, the fall of Troy took place in the year 1209 B.C.; and if the disputed date of Solomon's temple be fixed at 969 B.C., the area adopted by Movers (Phoca. ii. pt. i. p. 149) may be a tolerable approximation. It is probable that the city in the passage cited, uses the word dwellings, or a dwelling in, and could no more have meant the original foundation of Tyre than Justin, since that city is mentioned in the Old Testament as in existence two centuries and a half before the building of the temple.

From the period of the Sidonian migration, Tyre must be regarded as the head of the Phoenician nation. During the headship of Sidon, the history of Phoenicia is mythical. Phoenix, who is represented as the father of Cadmus and Europa, is a mere personification of the country; Belus, the first king, is the god Baal; and Agenor, the reputed founder of both of Tyre and Sidon, is nothing but a Greek epithet, perhaps of Hercules. The historical Tyre also, before the age of Solomon, is unconnected. Solomon's relations with Hiram, king of Tyre, led Josephus to search the Tyrian histories of Diodorus and Menander. Hiram succeeded Abiael; and from this time to the foundation of Carthage there is a regular succession of dates and reigns. Tyre was in the ancient city, the original town being on the continent, and the new one on an island about half a mile from the shore. When the latter was founded, the original city obtained the name of Palse-Tyris, or Old Tyre. The island, however, was probably used as a naval station from the very earliest times, and as a place consecrated to the
worship of the national deities Astarte, Belus, and particularly Melcarth, or the Tyrian Hercules. According to Justin, indeed, the oldest temple of Hercules was the Temple of Astarte at Tyre (xvi. 10). Cm. Cant. iv. 5. 2); but this assertion may have been made by the Tyrians in order to evade the request of Alexander, who wished to gain an entrance into their inland city under pretence of sacrificing to that deity.

Hiram succeeded to the crown of Tyre a little before the building of Solomon's temple (c. c. 969). He had already improved the city, and by means of subterranean tunnels gained space enough to build a large square or place, the eurychoros. He maintained friendly relations with king David, which were confirmed by commerce and by intermarriages. Hiram furnished the Jewish monarch with cedarwood and workmen to construct his palace, as well as materials for his proposed temple, the building of which was substantially completed after his death. Solomon, on the other hand, imported the corn and oil of Judah. Under the reign of Solomon this intercourse was cemented by a formal treaty of commerce, by which that monarch engaged to furnish yearly 20,000 cori of wheat, and the like quantity of oil, for the use of Hiram's household, while Hiram, in return, supplied Solomon with workmen to cut flint and prepare the wood for his temple, and others skilful in working metal and stone, in engraving, dyeing, and manufacturing fine linen. Solomon also ceded to Tyre a district in Galilee containing twenty towns. (I Kings, ix. 13; Joseph. Ant. vii. 5.) In these transactions we perceive the relations of Tyre with Phoenicia as an agricultural and an agricultural people; but Hiram was also of great assistance to Solomon in his maritime and commercial enterprises, and his searches after the gold of Ophir, when his victories over the Edomites had given him the command of the Aelianite, or eastern, gulf of the Red Sea. The pilots and mariners for these voyages were furnished by Hiram. Except, however, in connection with the Israelites, we know little concerning the reign of this monarch. He appears to have undertaken an expedition against Cilicia in Cyprus, probably a revolted colony of the Phoenicians, and to have established a festival in honour of Melcarth, or Hercules. (Joseph. L.c.) By his great works at Tyre he established an enormous expense upon the people; and his splendid reign, which lasted thirty-four years, was followed by Israel. His dynasty was continued for seven years in the person of his son, Baleazor, or Baleasartus, and nine years in that of his grandson Abdastatrus. The latter was put to death by the four sons of his nurse, the eldest of whom usurped the supreme power for a space of twelve years. This revolution was checked by Moreru (c. l. p. 349) with the account of the servile insurrection at Tyre given by Justin (xvii. 2), who, however, with his usual neglect of chronology, has placed it a great deal too late. This interregnum, which, according to the account adopted, was a complete reign of terror, was terminated by a counter-revolution. The usurper whose name is not mentioned, either died or was deposed, and the line of Hiram was restored in the person of Astartus,—the Strato of Justin,—a son of Baleasartus. This prince reigned twelve years, and was succeeded by his brother Astarymus, or Asyervmus, who ruled nine years. The latter was murdered by another brother, Phales, who after reigning a few months was in turn assassinated by Ithobaal, a priest of Astarte. Ithobaal is the Ithobaal of Scripture, father of Jessebel, the wife of Ahab, who endeavoured to restore the worship of Baal and Ashtoreth, the kingdom of her husband. (1 Kings, xvi. 31.) In the reign of Ithobaal Phoenicia was visited with a remarkable drought, which also prevailed in Judaea in the time of Ahaz. (Joseph. Ant. viii. 13 § 2; 1 Kings, xvi. 7.) We know nothing further of Ithobaal's reign, except that he founded Botrys, on the coast N. of Sidon, and Aza in Phoenicia. (Joseph. viii. 13 § 2.) He reigned thirty-two years, and was succeeded by his son, Bederon. Bederon, his son, succeeded to the throne, and after a reign of six years was followed by Mattos, or Matta, who reigned for thirty-two years. The reign of his successor, Pygmalion, brings us into contact with classical history and tradition, through the foundation of Carthage by his sister Elisa, or Dido, which took place twenty years after his death. However, this was only a second foundation, as in the case of Tyre itself. The whole story, which indicates a struggle between aristocratical and sacerdotal party and the monarchical power, has been obscured by mythical traditions and the embellishments of poets; but it need not be repeated here, as it will be found in the Dictionary of Biography and Mythology, e. d. Dido.

Pygmalion occupied the throne forty-seven years, and after his reign there is a gap in the history of Tyre. When we can next trace the Phoenicians in the Scriptures, we find them at war with Israel. The prophet Joel, who flourished about the beginning of the ninth century, not long after the conquest of Jerusalem, complained of the outrages committed by Tyre and Sidon on the coasts of Judaea, and his complaints are repeated by Amos, a contemporary prophet. This was the chief period of the maritime ascendancy of the Phoenicians, and their main offence seems to have been the carrying off of youths and maidens and selling them into slavery. Towards the end of the same century we find the Phoenician fleet of Pepheus engaged by the Greeks in the destruction of Tyre.

It was about this period that the Assyrians began to grasp at the countries towards the west, and to seek an establishment on the sea-board of the Mediterranean; a policy which was continued by the succeeding empires of the Babylonians, Medes, and Persians. The expedition of Shalmaneser, who, after the death of Sargon, in 705 B.C., was followed by Ithobaal, king of Tyre. These cities furnished him with sixty ships for a second attempt upon Tyre; but this fleet was defeated by the Tyrians with only twenty vessels. Shalmaneser blockaded them on the land side for a space of five years, and prevented them from having any fresh water except what they could preserve in tanks. How this blockade ended we are not informed, but it was probably by famine.

We have no further accounts of Elihu, except that he had reduced to obedience the revolted town of Cilium in Cyprus previously to this invasion. After his reign another long gap occurs in the history of Phoenicia, or rather of Tyre, its head. This silence would seem to indicate that it was enjoying the blessings of peace, and consequently increasing in prosperity. The Phoenician alliance was courted
by the Egyptian monarchs, and an extensive commerce appears to have been carried on with the port of Naucratis. The next wars in which we find the Phoenicians engaged were with the Babylonians; though the account of Berosus, that Nabopolassar, who reigned towards the end of the seventh century B.C., sailed to Phoenicia in the hope of taking his son Nebuchadnezzar reduced it when in a state of revolt, must be regarded as doubtful. At all events, however, it appears to have been in alliance with the Chaldeans at this period; since we find it related that Apries, king of Egypt, when at war with that nation, conquered Cyprus and Phoenicia. (Herod. ii. 161; Diod. i. 66.) When Nebuchadnezzar succeeded the throne, we find that, after quelling a revolt of the Jews and reducing Jerusalem (b.c. 587), he marched into Phoenicia, took Sidon apparently by assault, with dreadful carnage, and proceeded to invest Tyre. (Ezekiel, xxvi.) For an account of this siege, one of the most memorable in the history of the ancient world, we are again indebted to Josephus (x. 11), but the account is that of the same historian. It is said to have lasted thirteen years. Another Ithobaal was at this time king of Tyre. The description of the siege by Ezekiel would seem to apply to Palae-Tyrus, though it is probable that insular Tyre was also attacked. (Grot. Hist. of Greece, iii. p. 355, note.) The result of the siege is by no means recorded by Herodotus, though as a sequel Joseph. c. Apion. i. 20) that Nebuchadnezzar subdued all Syria and Phoenicia; but there is no evidence of an assault upon Tyre, and the words of Ezekiel (xxix. 17) seem to imply that the siege was unsuccessful. The same dynasty continued to reign. Ithobaal was succeeded by Baal; and the succeeding monarchs for some time preserved internal constancy. The kings were superseded by judges or suffestes, and for a few years the royal line appears to have been restored; but whether by the spontaneous act of the Tyrians, or by compulsion of the Babylonians, is a disputed point.

Ezekiel's description of Tyre at the breaking out of the war as being the head of the Phoenician states. Sidon and Aradus are represented as furnishing soldiers and mariners, and the artisans of Byblus as working in its dockyards. (Ezek. xxvii. 8, 9.) But that war was a severe blow to the power of the Tyrians, which now began to decline. Cyprus was wrested from them by Amasia, king of Egypt, though a branch of the royal family of Tyre appears to have retained the sovereignty of Salamis for some generations. (Herod. v. 104; Isocr. Evag. p. 79. 1, 228.) Merbulus was succeeded by his brother Iribamos, or Huram, during whose reign Cyrus conquered Babylon (538 B.C.). When the latter monarch permitted the Jews to return to Jerusalem, Tyre continued to maintain her independence, and assisted in the work (Ezra, iii. 7), a proof that their commerce was still in a flourishing state. Xenophon (Cyropoeid. i. 1. § 8) represents Cyrus as ruling over Phoenicia as well as Cyprus and Egypt; and though this is not confirmed by any collateral proof, they must at all events have very soon submitted to his son Cambyses. (Herod. iii. 19.) The relations with Persia seem, however, to have been those of a voluntary alliance rather than of a forced subjection; since, though the Phoenicians assisted Cambyses against the Egyptians, they refused to serve against their colonists the Carthaginians. Their fleet was of great assistance to the Persians, and enabled Darius to make himself master of the islands off the coast of Asia Minor. (Thucyd. i. 16; Plat. Menex. c. 9.) Phoenicia, with Palestine and Cyprus, formed the fifth of the twenty nomes into which the empire of Darius was divided. (Herod. iii. 91.) These nomes were, in fact, satrapies; but it does not appear that they interfered with the constitutions of the several countries into which they were established; at all events native princes continued to reign in Phoenicia. Although Sidon became a royal Persian residence, it still had its native king, and so also had Tyre. (Herod. viii. 67.) When Darius was meditating his expedition against Greece, Sidos supplied two triremes and a storehouse to enable Demosthenes to expand his fleet; but this request was not granted. (Herod. iii. 136.) Subsequently the Phoenicians provided the Persians with a fleet wherewith to reduce not only the revolted Ionian cities, but even their own former colony of Cyprus. In the last of these enterprises they were defeated by the Ionian fleet (ib. v. 108, 112); but they were the chief means of reducing the island of Melos (ib. v. 116) by the defeat which they inflicted on the Ionians off Lechaion. (ib. v. 14.) After the subjugation of the Asiatic islands, the Phoenician fleet proceeded to the Thracian Chersonese, where they captured Methiceus, the son of Miltiades (ib. c. 41), and subsequently appear to have sacked the Aegaeus and to have ravaged the coast of Thrace (ib. c. 116). They assisted Xerxes in his expedition against Greece, and along with the Egyptians constructed the bridge of boats across the Hellespont. (ib. vii. 34.) They helped to make the canal over the isthmus of Mount Athos, in which, as well as in other engineering works, they displayed a skill much superior to that of the other eastern nations employed. (ib. c. 26.) In the naval review of Xerxes in the Hellespont they carried off the prize from all competitors by the excellence of their ships and the skill of their mariners; whilst among the Phoenicians themselves the Sidonians were far the most distinguished (ib. cc. 44, 96), and it was in a vessel belonging to the latter people that Xerxes embarked to conduct the review. (ib. c. 90.) The Phoenicians had, it would appear, possessed nearly half of the fleet which Xerxes had collected; yet at the battle of Artemisium they do not appear to have played so distinguished a part as the Egyptians. (ib. vii. 17.) When routed by the Athenians at Salamis they complained to Xerxes, who sat overlooking the battle on his silver-footed throne, that their ships had been treacherously sunk by the Ionians. Just at this instant, however, extraordinary skill and valour were displayed by a Samothracian vessel, and the Great King, charging the Phoenicians with having falsely accused the Ionians in order to screen their own cowardice and ill-conduct, caused many of them to be beheaded. (ib. c. 90.) At the battle of the Eurymedon (c. 466), the Phoenician fleet was totally defeated by the Athenians under Cimon, on which occasion 100 of their vessels were captured (IBid. xi. 62), or according to Thucydides (i. 100) 200, who, however, is probably alluding to the whole number of their fleet. Subsequently the Athenians obtained such naval supremacy that they found them carrying on maritime operations on the coast of Phoenicia of itself; though in their unfortunate expedition to Egypt fifty of their triremes were almost entirely destroyed by the Phoenicians. (Thucyd. i. 109.) This disgrace was wiped out by the Athenians under Anaxicles in a great victory gained over...
PHOENICIA.

the Phoenicians off Salamis in Cyprus, B.C. 449, when 100 of their ships were taken, many sunk, and the remnant pursued to their own harbours. (Ib. c. 112.) A cessation of hostilities now ensued between the Greeks and Persians, as the Phoenician news was employed to be employed by the latter, but was no longer exposed to the attacks of the Athenians. In B.C. 411 the Phoenicians prepared a fleet of 147 vessels, to assist the Spartans against Athens; but after advancing as far as Aspendus in Pamphylia it was suddenly recalled, either because the demonstration was a move made on the part of Thucydides, the Phoenicians were obliged to defend their own coast, now threatened by the Egyptians. (Thucyd. viii. 87, 108; Diod. xiii. 38, 46.) They next appear as the auxiliaries of the Athenians against the Spartans, who had gained the naval supremacy by the battle of Aegospotami, a preponderance which had changed the former policy of Persia. The allied fleet was led by Conon and Pharmaboeus, and after the defeat of the Spartans the Phoenician seamen were employed in rebuilding the walls of Athens. (Diod. xiv. 83; Nep. Cos. c. 4.) These events led to a more intimate connection between Phocaea and Athens; Phoenician traders appear to have settled in that city, where three Phocian inscriptions have been discovered of the date of about 350 B.C. (Gesner, Mon. Pae. i. 111.) A few years later, a decree was passed by the Athenian senate, establishing a connexion between Strato, king of Sidon, and the Athenians; whilst an immunity from the usual burthens imposed on aliens was granted to Sidonians settling at Athens. (Böckh, Corp. inscr. i. 126.) About this time also, the Phoenicians, as the subjects of Persia, engaged in a disastrous war with Evagoras, prince of Salamis in Cyprus, who ravaged their coasts, and, according to Isocrates (Evag. p. 201) and Diodorus (xiv. 98, 110, xv. 2), captured even Tyre itself. But in 336 B.C. Evagoras was defeated in a great naval engagement, and subsequently became a tributary of Persia. (Conon c. 9.) During all this period Sidon appears to have been the most wealthy and prosperous of the Phoenician cities. (Ib. xvi. 41.) The next important event in the history of the Phoenicians is their revolt from Persia, which ended in a disastrous manner. Sidon had been oppressed by the satraps and generals of Artaxerxes Ochus; and in a general assembly of the Phoenicians at Tripolis, in B.C. 352, it was resolved to throw off the Persian yoke. The royal residence at Sidon was destroyed and the Persians massacred. The Phoenicians then fortified Sidon, and invited Nectanebus, king of Egypt, to assist them. In the following year Ochus made great preparations to quell this revolt, and particularly to punish Sidon; where, when the king of that city, alarmed at the fate which menaced him, treacherously negotiated to betray it to the Persians. He inveigled 100 of the leading citizens into the enemy's camp, where they were put to death, and then persuaded the Egyptian mercenaries to admit the Persians into the city. The Sidonians, who had been expelled by the Egyptians, sought refuge to any escape from the common danger, being thus reduced to despair, shut themselves up with their wives and children, and set fire to their houses. Including slaves, 40,000 persons are said to have perished on this occasion. Tyree, however, suffered the merited reward of his treason, and was either put to death by Ochus or committed suicide. This calamity was a great, but not a fatal, blow to the prosperity of Sidon, which even to a much later period retained a considerable portion of her opulence. (Diod. xvi. 41, seq.; Euseb. l. 12.)

The cruelty of the Persians left a lasting remembrance, which was not wholly unrequited. When about twenty years afterwards Alexander entered Phoenicia, Sidon hastened to open her gates to him. The defeat of Darius at Issus, B.C. 333, opened the whole coast of Phoenicia to the Greeks. On his march Alexander was met by Strato, son of Gerasmatus, king of Arabia, who surrendered that island to him, as well as the principal cities of Phoenicia; and the Tyrians, being the main land, and of the Tyrians was received the submission of Byblos, and entered Sidon at the invitation of the inhabitants. He deposed Strato, his king, a vassal of the Persians; and Abdolomus, who was related to Strato, but who at that time followed the humble occupation of a gardener in the suburbs of the city, was nominated to the vacant throne by Alexander's general Hephaestion. (Curt. iv. 4.) The Tyrians now sent an embassy, professing submission to the Macedonians, but without any real design of giving up their city. (Arrian, ii. 15.) It was impossible, however, for Alexander to proceed on his intended expedition, whilst so important a place lay in his rear, as best best friend, and, in the absence of redresses, perhaps, to become a declared foe. With a dissolution equal to that of the Tyrians, he sought to gain possession of their town by requesting permission to enter and sacrifice to Hercules, the progenitor of the royal race of Macedon, as well as the tutelary god of Tyre. But the Tyrians perceiving his design, directed him to another place; and Alexander, on examining, was convinced he might sacrifice in all liberty and with still greater effect, as the fane, they asserted, was more ancient and venerable than that of the new city in the island. Alexander, however, still hankered after the latter, and made preparations for besieging the new town. (Arrian, ii. 15, 16; Curt. iv. 7, seq.) The method by which he succeeded in capturing Tyre will be found described in another place. (Tyros.) It will suffice here to say, that by means of a causeway, and after a seven months' siege, the city of merchant princes yielded to the arms of Alexander, who was assisted in the enterprise by the ships of Sidon, Byblos, and Aradus. The city was burnt, and most of the inhabitants either killed or sold into slavery. Alexander repulsed it, principally, perhaps, with Carians, who seem to have been intimately connected with the Phoenicians, since we find Caria called Phœnicia by Corinna and Bacchylides. (Athén. iv. p. 174.) After the battle of Arbela, Alexander incorporated Phoenicia, Syria and Cilicia into one province. With the true commercial spirit the Phœnicians availed themselves of his conquests to extend their trade, and their merchants, following the track of the Macedonian army, carried home myrrh andnard from the deserts of Gedrosia. (Arrian. vii. 22, Indic. 18.) Alexander employed them to man the ships which were sent down the Hydros and the Indian Ocean, as well as the Tyrrhenian and the Atlantic; and he sent thence to the Phœnicians to open their way to the Euphrates, with the view of descending to Babylon. (Ib.) By these means he intended to colonise the islands and coasts of the Persian Gulf; but his schemes were frustrated by his death, B.C. 323. After that event Ptolemy, to whom Egypt had fallen, annexed Phœnicia, together with Syria and Palestine, to his kingdom.
PHOENICIA. 618

(DED. XVI. 43.) But in the year 315 B.C. Antigonus, returning victorious from Babylon, easily expelled the garrisons of Ptolemy from all the Phoenician towns except Tyre, where he experienced an obstinate resistance. Eighteen years had sufficed to restore it in a considerable degree to its ancient wealth and power; and although the mole still remained it was almost as impregnable as before, and was never reduced till after the siege of fifteen months. From this period down to near the end of the third century B.C. there was an almost constant succession of struggles for the possession of Phoenicia between the Ptolomies on one side and the Seleucids on the other. Ptolemy Eratesus succeeded in reducing it, and it was held by him and his son Philopator down to the year 218 B.C.; when Antiochus the Great, taking advantage of the division and sensus character of the latter, and the consequent disorders of his administration, undertook its recovery. Tyre and Ace were surrendered to him by the treachery of Theodotus, the lieutenant of Philopator, and the Egyptian army and fleet were defeated and driven to take refuge at Sidon. In the following year, Antiochus at Pharnaces took Antiochus at Raphia near the borders of Egypt, and regained possession of Phoenicia and Syria, which he retained till his death, B.C. 205. The reign of his infant son again tempted the ambition of Antiochus. He succeeded in reducing Phoenicia, and after repulsing an attempt of the Egyptians to regain it in B.C. 198, firmly established his dominion, and wished to bring it to its old greatness. Notwithstanding these struggles, Tyre appears to have still enjoyed a considerable share of commercial prosperity, in which, however, she had now to encounter a formidable rival in Alexandria. At first, indeed, that city did not much interfere with her prosperity; but the foundation of Berenice on the Bosphorus by Antiochus Philadelphia, the establishing of a road between that place and Coptos, and the reopening of the canal which connected the gulf of Suez with the Pelusiac branch of the Nile (Strab. p. 781) inflicted a severe blow upon her commerce, and converted Alexandria into the chief emporium for the products of the East.

Phoenicia consisted of several small independent kingdoms, or rather cities, which were sometimes united with and sometimes opposed to one another, just as we find Canna described at the time when it was invaded by the Israelites. (Strab. vi. p. 754; Jos. Ant. x. 279.) This little island was not exempt from the contesting the possession of these kingdoms. The throne was commonly hereditary, but the people seem to have possessed a right of election. (Justin. xvii. 4.) The chief priests exercised great power, and were next in rank to the king. Thus Sicharbas, or Sichaeus, chief priest of the temple of Hercules, was the husband of Dido, and consequently the brother-in-law of king Pygmalion. There seems also to have been a powerful aristocracy, but on what it was founded is unknown. Thus a body of nobles, who are called senators, accompanied the emigration of Dido. (Justin. i. c.) During the interregnum at Tyre after the servile insurrection, the government was carried on by elective magistrates, calledjudges and scribes. (Arch. iii. p. 231.) The constitution also obtained at Gades and Carthage, and probably in all the western colonies of Tyre. (Liv. xxxvii. 37; comp. Mvrs. ii. p. 534.) Kings existed in Phoenicia down to the time of Alexander the Great. (Arrian. ii. 24.) The federal constitution of Phoenicia resembled a Grecian hegemony; either Tyre or Sidon was always at the head, and other cities like Carthage and Bybus likewise had kings. During the earliest period of its history, Sidon appears to have been the leading city; but after its capture by the king
of Ascalon, and the emigration of its inhabitants, as already related, Tyre became dominant, and retained the supremacy till the Persian conquest. Conferences among the Phoenician cities for some common object were frequent, and are mentioned by Joshua and the later historians. These were called Tripos, and subsequent ly, the great council of the Phoenicians assembled on these occasions at Tripoli (Diod. xvi. 41), where, as we have already said, the three leading towns, Sidon, Tyre, and Aradus, had each its separate quarter; from which circumstance, the town derived its name. Aradus, however, does not appear to have retained this privilege till a late period. In Phoenician history, as in the time of Ezekiel it was subordinate to Tyre (xxvii. 8 sqq.); and Byblus, though it had its own king, and is sometimes mentioned as furnishing mariners, seems never to have had a voice in the confederate councils. The population of Phoenicia consisted in great part of slaves. Its military force, as might be supposed from the nature of the country, was chiefly cavalry; and in order to defend themselves from the attacks of the Assyrians and Persians, the Phoenicians were compelled to employ mercenary troops, who were perhaps mostly Africans. (Diod. i. c.; Ezekiel, xxviii.)

VI. RELIGION.

The nature of the Phoenician religion can only be gathered from incidental allusions in the Greek and Roman writers, and in the Scriptures. A few coins and idols have been found in Cyprus, but connected only with the local Phoenician religion in that island. The most systematic account will be found in the Fratresvatio Evangelica of Eusebius, where those who were from Sennacherib's captivity is there mentioned. It is but few and remote times have been translated into Greek by Philo of Byblus. It would be too long to enter here into his fanciful cosmogony, which was of an atheistic nature, and was characterised chiefly by a personification of the elements. From the wind Kol-pis, and Buas, his wife, were produced Aeon and Protagonus, the first mortals. These had three sons, Light, Fire, and Flame, who produced a race of goddesses and mountains were named, as Cassius, Libanus, Anti-libanus and Brathy, and who with their descendants discovered the various arts of life. In later times a human origin was assigned to the gods, that is, they were regarded as deified men; and this new theology was absurdly grafted on the old cosmogony. Elymian, and his wife Beruth, are their progenitors, who dwelt near Byblus. From Elym descend Oros (Heaven), who weds his sister Ge (Earth), and has her four sons, Ilus (or Cronos), Betutus, Dagon, and Atlas; and three daughters, Astarte, Rhes, and Dione. Cronos, grown to man's estate, despoils his father, and puts to death his own son Sed, and one of his daughters. Ouranos, returning from banishment, is treachery-wise put to death by Cronos, who afterwards travels about the world, establishing Athena in Attica and making Tantus king of Egypt. (Kenrick, Phoen. p. 292.)

Baal and Ashtaroth, the two chief divinities of Phoenicia, were the sun and moon. The name of Baal in the Phoenician: Bala and Bentus is the first king of Assyria and Phoenicia. At a later period Baal became a distinct supreme God, and the sun obtained a separate worship (2 Kings, xxviii. 35). As the supreme god, the Greeks and Romans identified him with their Zeus, or Jupiter, and not with Apollo. Bel or Baal was also identified with the planet Saturn. We find his name prefixed to that of other deities, as Baal-Phugor, the god of licentiousness, Baal-Zebub, the god of fleses, etc. as well as to that of many places in which he had temples, as Baal-Gad, Baal-Hamon, etc. Groves on elevated places were dedicated to his worship, and human victims were offered on their altars. (Jerem. xix. 4, 5.) He was worshipped with fana tical rites, his votaries crying aloud, and cutting themselves with knives and lances. Ashtaroth or Astarte, the principal female divinity, was identified by the Greeks and Romans sometimes with Juno, sometimes with Venus, though properly and orig inally with the goddess of the crescent moon. The principal seat of her worship was Sidon. She was symbolised by a heifer, or a figure with a heifer's head, and horns resembling the crescent moon. The name of Astarte was Phoenician (Pa. Lucian, de Dea Syr. c. 4); but she does not appear with that appellation in the early Greek writers, who regard Aphrodite, or Venus Urania, as the principal Phoenician goddess. Herodotus (i. 105, 131, i. 8) says that her worship was transferred from Ascalon, its oldest seat, to Cyprus and Cythera, and identifies her with the Babylonian Mylitta, the character of whose worship was unequivocal. Her original or symbol, like that of many of the oldest deities, was a conical stone, as in the case of the Paphian Venus (Tso. E. ii. 39; Diod. Tyr. Dcc. 36), and of Pessinus (Liv. xxix. 11), and others. In Cyprus her worship degenerated into licentiousness, but the Cyprian coins bear the primitive image of the conical stone. In Carthage, on the contrary, she appeared as a virgin, with martial attributes, and was worshipped with severe rites. She must be distinguished from Astarte, who has also a temple at Ascalon, and was represented as half woman, half fish. It is characteristic of the religion of the Phoenicians, that though they adored false gods, they were not so much idolaters as the Egyptians, Greeks, and Romans, since their temples had either no representation of the deity, or only a rude symbol. The worship of Astarte seems to have been first corrupted at Babylonia, where Adonis was wounded by the boar on Lebanon, was worshipped at Aphaca, about 7 miles E. of Byblus, near the source of the stream which bears his name, and which was said to be annually reddened with his blood. (Zosim. i. 58; Pa. Lucian, de Dea Syr. c. 9.) By the Phoenicians Adonis was also regarded as the sun, and his death typified the return of his rites at Aphaca, when abolished by Constantine, were palliated with every species of abomination. (Euseb. V. Const. i. 55.)

Cronos, or Saturn, is said by the Greek and Latin writers to have been one of the principal Phoenician deities, but it is not easy to identify him. Human victims formed the most striking feature of his worship: but he was an epicurean, and was said to please, and the most acceptable offering was an only child. (Polyb. de Aba. ii. 56; Euseb. Land. Const. i. 4.) His image was of bronze (Diod. xii. 14), and, according to the description of Diodorus, resembled that of Moloch or Milcom, the god of the Ammonites. To Moloch, his sacrifices were offered to several Phoenician deities. The gods hitherto described were common to all the Phoenicians; Melkarth *, whose name literally

* It is singular that the name of Melcarth read backwards is, with the exception of the second and last letters, identical with Hercules.
PHOENICIA.

denotes "king of the city," was peculiar to the Tyrians. He appears in Greek mythology under the slightly altered appellation of Melicertes. Cicero (N. D. iii. 16) calls the Tyrian Hercules the son of Jupiter and Asteria, that is of Baal and Astartoth. There was a festival at Tyre called "The Awakening of Hercules," which was also connected with his character as a sun-god. (Joseph. Ant. viii. 5.) In his temple at Gades there was no image, and his symbol was an ever-burning fire.

Another Phoenician deity was Dagon, who had a fish's tail, and seems to have been identical with the Osannes of Babylon. The Phoenician goddess Ooza was identified by the Greeks with Athena. One of the gates of Tyre was named after her, and she was also worshipped at Corinth. (Euphoron. Stephec. Byz. s. v.; Hesych. s. v.; Taet. ad Lycoch. Cact. 658.) It is even probable that the Athena Polias of Athens was derived from Tyre. The Palladium of Troy was also of Phoenician origin.

As among a maritime people, the Phoenicians had several marine deities, as Poseidon, Nereus, and Pontus. Poseidon was worshipped at Byblos, and a marine Jupiter at Sidon. The present deities of navigation were, however, the Cabiri, the seat of whose worship was also at Byblos, and whose images, under the name of Pataeci, were worshipped at other ports of Phoenicia. (Herod. ii. 37.) They were the sons of Hephaestus, or the Egyptian Isis, and were represented as ridiculous little pigmy figures. By the Greeks and Romans they were identified with their Anaeus, Lares, and Penates. Asclepius, who was identified with the air, was their brother, and also had a temple at Byblos. (Paus. vii. 23. § 6.)

We know nothing of the religious rites and sacred festivals of the Phoenicians. They practised circumcision, which they learned from the Egyptians; but, owing to their intercourse with the Greeks, the rite does not seem to have been very strictly observed. (Herod. ii. 104; Aristoph. Aes. 504.) We are unable to trace their speculative opinions, and little is known of the origin of their deities. They seem to have been material and atheistic, and, like the other Semitic nations, the Phoenicians had no idea of a future state of existence.

VII. MANNERS, LITERATURE, AND ART.

The commercial habits of the Phoenicians did not impair their natural spirit, and Charon (vii. 2) represents the Tyrians as ambitious of military glory. Their reputation for wisdom and enterprise peeps out in the jealous and often irreligious bitterness with which they are spoken of by Hebrew writers. Their wealth and power was envied by their neighbours, who made use of their services, and abused them in return. (Ezek. xxxviii. 2, 12; Isaiah, xxvii. 11.) The unscrupulous character of Phoenician subtlety by the proverb Ἐνα φέος τοῦ Φοινικίου (Suid.), which may be rendered by our " Set a thief to catch a thief," and their reputation for versatility was marked by the saying Πείθου σιωπή Φωνήσεως, "A Phoenician lies." (Strab. iii. p. 170.) But a successful commercial nation is always liable to immorality, which tends to overgrow its commerce, and sometimes in confusion, with Syria, Phoenicia was denounced by the Romans for the corruption of its morals, and as the nursery of mountebanks and musicians. (Hor. Sat. ii. 2. 1; Juv. iii. 62, viii. 159; Athen. xv. 53.) The mines of Tyre and Byblos were renowned far and wide. (Exp. tot. Monici, Hudson, Geogr. Mira. iii. p. 6.)

Ancient authority almost unanimously attributes the invention of an alphabet to the Phoenicians. Lucan (Phars. iii. 230) ascribes the use of writing to them before the invention of the papyrus in Egypt. The Phoenicians of Carthage, who were reputed to have introduced the use of writing among the Ionians; and Herodotus says that he saw the Cyprian letters at Thebes. (Herod. v. 58, 59; Pim. vii. 57; Diod. v. 24; Tac. Ann. xi. 14; Mela, i. 12, &c.) The inscriptions found in Thera and Melos exhibit the oldest forms of Greek letters hitherto discovered; and these islands were colonised by Phoenicians. No inscriptions have been found on the Phoenician colonies — none of which, however, are older than the fourth century B.C. — the Phoenician alphabet is seen to consist, like the Hebrew, of twenty-two letters. It was probably more scanty at first, since the Greek alphabet, which was borrowed from it, consisted originally of only sixteen letters. (Clem. Comment.) (Homoer. ad Akr. 42.) The old Hebrew alphabet had only fifteen. The use of hieroglyphics in Egypt was, in all probability, older. (Tac. l.c.)

The connection of this Phoenetic system with the Phoenician alphabet cannot be traced with any certainty; yet it is probable that the latter is only a more or less simple and primitive form of the Phoenician alphabet. (Ad Aeg. 42.) The Phoenician letters denote some natural object, as aleph, an ox, beth, a house, dalath, a door, &c.; whereas it has been conjectured that the figures of these objects were taken to represent the sounds of the respective letters; but the resemblance of the forms is rather fanciful.

Phoenician bricks, inscribed with Phoenician characters, have long been known, and indicate the residence of Phoenicians at Babylon. In the recent discoveries at Niniveh other bricks have been found with inscriptions both in the Phoenician and cuneiform character. Phoenician inscriptions have also been discovered in Egypt, but in an Aramaean dialect. (Gesen. Mon. Phoen. lib. ii. c. 9.) The purest examples of the Phoenician alphabet are found in the inscriptions of Malta, Athens, Cyprus, and Carthage, and on the coins of Phoenicia and Sicily.

The original literature of the Phoenicians has wholly perished, and even in Greek translations but little has been preserved. Their earliest works seem to have been chiefly of a philosophical and theological nature. Of their two oldest writers, Sanchuniathon and Mochus, or Moschus, of Sidon, accounts will be found in the Dictionary of Biography and Mythology, as well as a discussion of the question respecting the genuineness of the remains attributed to the former; on which subject the reader may also consult Lobeck (Aegyptiaca, ii. p. 1264, sqq.), Orelli (Sanskritorum Theosophia Exeg. p. xiii. &c.), Gresemer (Symbolik, pt. i. p. 110, 3rd edit.), Morev (Die Phönis. i. p. 120, sqq.; and in the Jahrebcher für Theologie u. christl. Philosophie, 1836, vol. vii. p. i.), and Kenrick (Phoenicia, ch. xi.).

Later Phoenician writers are known only under Greek names, as Theodorus, Hypsareutes, Philostratus, &c., and blend Greek legends with their native authors. We find Josephus (Jos. Apion i. 17), that there were at Tyre public records, very carefully kept, and extending through a long series of years, upon which the latter histories seem to have been founded; but unfortunately these have all perished. Thus we are deprived of the
annals of one of the oldest and most remarkable people of antiquity; and, by a perverse fate, the inventors of letters have been deprived of that benefit which their discovery has bestowed on other, and often less distinguished, nations which have borrowed it.

The arithmetical system of the Phoenicians resembled that of the Egyptians. The units were marked by simple strokes, whilst 10 was denoted either by a horizontal line or by a semicircle; 20 by the letter Ν; and 100 had also a special mark, with strokes for the units denoting additional hundreds. (Gesenius. Mon. Phoen. i. c. 6.) Their weights and measures were nearly the same as those of the Jews.

The Phoenicians, and more particularly the Sidonians, excelled in the glyptic and plastic arts. Their drinking vessels, of gold and silver, are frequently mentioned in Homer; as the silver vase which Achilles proposed as the reward of the victor in the funeral games in honour of Patroclus (Iliad, xxi. 743), and the bowl given to Telemachus by Menelaus. (Od. iv. 618; comp. Strabo. vii. p. 757.) The Phoenicians probably also manufactured fictile and glass vessels; but the origin of the vases called Phoenician, found in Southern Italy, rests on no certain authority. They particularly excelled in works in bronze. Thus the pillars which stood for Solomon's temple were 18 cubits in height and 12 in circumference, with capitals 5 cubits high. From the nature of their country their architecture must have consisted more of wood than of stone; but they must have attained to great art in the preparation of the materials, since those designed for the temple of Solomon required no further labour, but only to be put together, when they arrived at Jerusalem. The internal decorations were carvings in olive-wood, cedar, and gold. The Phoenicians do not appear to have excelled in sculpture. This was probably owing to the nature of their religion. Their idols were not, like those of Greece and Rome, elaborate representations of the human form, but mere rude and shapeless statues called Exocti; and frequently their temples were entirely empty. Figures of the Phoenician Venus, but of very rude sculpture, have, however, been found in Cyprus. The Phoenicians brought to great perfection the art of carving and inlaying in ivory, and the manufacture of jewellery and female ornaments, which proved of such irresistible attraction to the Greeks and Jewish women of the time, that Asenath, as may be seen in the story of Exodus in Homer (Od. xvi. 415), and in the indignant denunciations of Isaiah (iii. 19), They likewise excelled in the art of engraving gems. (2 Chron. i. 14.) Music is said to have been an invention of the Sidonians (Sanchoniath. p. 82, ed. Orelli), and a peculiar sort of citara was called κυριάρχης. (Athens. iv. 163.)

VIII. MANUFACTURES, COMMERCE, AND NAVIGATION.

The staple manufacture of Phoenicia was the celebrated purple dye; but it was not a monopoly. Ezekiel (xxvii. 7) characterises the purple dye as coming from Greece; and Egypt and Arabia also rivalled Phoenicia in the export of vegetable materials. The peculiarity of the Phoenician article was that it was obtained from fish of the genera buccinum and murex, which were almost peculiar to the Phoenician coast, and which even there were found in perfection only on the rocky part between the Tyrian Climax and the promontory of Carmel. The liquor is con-

PHOENICIA.

tained in a little vein or canal which follows the spiral line of these molluscs, and yields but a very small drop. The fluid, which is extracted with a pointed instrument, is of a yellowish white, or cream colour, and smells like garlic. If applied to linen, cotton, or wool, and exposed to the sun by day, or the light of the moon, it successively becomes green, blue, red, and deep purple; and when washed in soap and water a bright and permanent crimson is produced. The buccinum, which is so named from its trumpet shape, is found on rocks near the shore, but the murex must be dredged in deep water. The latter, in its general form, resembles the buccinum, but is smaller and more spinous. The Helix tuscumana, also found on the Phoenician coast, yields a similar fluid. The superiority of the Tyrian purple was owing to the abundance and quality of the fish, and probably also to some chemical secret. The best accounts of these fish will be found in Aristotle (H. Anim. lib. v.) and Pliny (ix. 61. 62); and especially in a paper by Heurne in the Memoures de l'Academie des Sciences, 1711; and of the manufacture of the purple in Amati, De Restitutione Purpurariwm, and Don Michael Rosa, Dissertatio dell'Purpore e delle Materie Vesticare presso gli Antichi. The trade seems to have been confined to Tyre, though the posts speak of Sidonian purple. (Ov. Fast. iii. 27.) The Phoenicians had the exclusive privilege of manufacturing the imperial purple, and decrees were promulgated prohibiting its use by all except magistrates. (Flav. Vopisc. Asur. c. 45; Suet. Nero, 32.) The manufacture seems to have flourished till the capture of Constantineople by the Turks. As Tyre was famed for its purple, so Sidon was renowned for its glass, which was made from the fine sand on the coast near Mount Carmel. Pliny (xxxvi. 65) describes its discovery as accidental. Some merchants who had arrived on this coast with a cargo of natron, employed some lumps of it, instead of stones, to prop up their caudron, and the natron being melted by the heat of the fire, produced a stream of glass on the sand. It is probable, however, that the art was derived from Egypt, where it was flourished in very ancient times. The Sidonians made use of the blowpipe, the lathe or wheel, and the graver. They also cast glass mirrors, and were probably acquainted with the art of imitating precious stones by means of glass. (Plin. l. c.) The Phoenicians were also famous for their glass, which was adorned with clear and tinted glass, and embroidered robes, as we see in the description of those brought from Sidon by Paris (πυράκαφα κατακάταχα, ἐπομοντος Σιδώνιος, Iliad, vi. 289), and in Scriptural allusions. (2 Chron. ii. 14, &c.) Phoenicia was likewise celebrated for its perfumes. (Juv. viii. 159; Plin. vi. 3. 8.)

Asyria and Egypt, as well as Phoenicia, had reached a high pitch of civilisation, yet the geographical position of the former, and the habits and policy of the latter, prevented them from communicating it. On the Phoenicians, therefore, devolved the beneficent task of civilising mankind by means of commerce, for which their maritime situation on the borders of Europe and Asia admirably fitted them. Their ships were the carriers of the produce and manufactures of Asyria and Egypt (Herod. i. 1); but their maritime superiority led them to combine with it the profession of piracy, which in that age was not regarded as disgraceful. (Thucyd. i. 5; Hom. Od. xxv. 415, &c.) They were especially noted as slave-dealers. (Herod.
PHOENICIA. 617

which long thus been brought to them overland. (Herod. i. 1.) At a later period, however, they seem to have themselves engaged in the caravan trade, and we have already mentioned their journeys in the track of Alexander. Their pedlars, or retail dealers, probably traversed Syria and Palestine from the earliest times. (Proverbs, xxxi. 24; Jastoph, xxiii. 8.) In the time of Herodotus the Phoenicians had factories, or settlements for the purposes of trade. Thus the Tyrians had a fish-market at Jerusalem (Nehemiah, xiii. 16), chiefly perhaps for the salted tunnies which they brought from the Euxine. They had also a settlement at Memphis (Herod. ii. 118), and, after the close of the wars between the Greeks and Persians, at Athens, as already related, as well as at other places.

In their original seats on the Persian Gulf the Phoenicians used only rafts (Plin. viii. 57); but on the coasts of the Mediterranean they constructed regular vessels. In their early voyages, which combined piracy with trade, they probably employed the pentecostal, a long and swift vessel of 50 oars. (Comp. Herod. i. 163.) The threimone, or dromon, and gadas, or tub-like merchantman adapted for storage, which took its name from a milk-pail, were later inventions. (Ibid. iii. 136.) The excellent arrangements of a Phoenician vessel are described in a passage of Xenophon before cited. (Xenophon. vi. 18; Jastoph. i. 16.) We have already described the Poteirion, or figure-heads of their vessels. The Phoenicians were the first to steer by observation of the stars (Plin. viii. 66; Manil. i. 297, sqq.); and could thus venture out to sea whilst the Greeks and Romans were still creeping along the coast. Astronomy indeed had been previously studied by the Egyptians and Babylonians, but the Phoenicians were the first who applied arithmetic to it, and thus made it practically useful. (Strab. xvi. 757.) Herodotus (iv. 49) relates a story that, at the instance of Neco, king of Egypt, a Phoenician vessel circumnavigated Africa, setting off from the Red Sea and returning by the Mediterranean; and though the father of history doubted the account himself, yet the details which he gives are in themselves so genuine, as well as of the circumnavigators that they had the sun on their right hand, or to the N. of them, as must really have been the case, is so unlikely to have been invented, that there seems to be no good reason for doubting the achievement. (Comp. Remnell, Geogr. of Herodotus, p. 692, sqq.; Grote, Hist. of Greece, iii. pp. 377, sqq.)

IX. Colonies.

The foundation of colonies forms so marked a feature in Phoenician history, that it is necessary to give a general sketch of the colonial system of the Phoenicians, although an account of each settlement appears under its proper head. Their position made them a commercial and maritime people, and the nature of their country, which would not admit of a great increase of inhabitants, led them to plant colonies. Before the rise of the maritime power of the Greeks they had the command of the sea for many centuries, and their colonisation thus proceeded without interruption. Their settlements, like those of the Greeks, were of the true nature of cities, and not, like the Roman system, mere military occupations; that is, a portion of the population migrated to and settled in these distant possessions. Hence they resembled our own colonies in America or
PHOENICIA.

Australia, as distinguished from our occupation of India. A modern writer has, with much erudition and ingenuity, endeavoured to trace the progress of Phoenician colonisation from the threefold cycle of ancient myths respecting the wanderings of Bel or Baal—The Great Crosses of the Greeks, and patron god of Byblus and Berytus; of Astarte or Io (Venus—Urania), who was especially worshipped at Sidon; and of Melchir or the Tyrian Hercules. (Movas, Phoen. vol. ii. pt. ii. ch. 3.) With these myths are combined the legends of the rape of Europa, of the wanderings of Cadmus and Harmonia, of Helen, Didon or Astarte (Venus). The story of the origin of the Phoenicians in Egypt, which may lie at the bottom of these myths can hardly be disputed; but a critical discussion of them would require more space than can be here devoted to the subject, and we must therefore content ourselves with giving a short sketch of what seems to be the most probable march of Phoenician colonisation.

Cyprus, which lies within sight of Phoenicia, was probably one of the first places colonised there. Its name of Chittim, mentioned in Genesis (x.), is preserved in that of Cithium, its chief town. (Cic. Fam. iv. 20.) Paphos and Palaepaphos, at the SW. extremity of the island, and Glyucas, near the SE. point, were the chief seats of the worship of Venus—Urania, the goddess of which was carried over to the Phoenicians by the colonisation of Europe. The origin of the colony is likewise shown by the legend of the conquest of Cyprus by Belus, king of Sidon (— "tum Belus optimum Vastabat Cyprum, et victor ditiones tenetat," Virg. Aen. i. 621, et ib. Serv.), who was the reputed founder of Cithium, Loppathus, and other Cyprian towns. (Alex. Ephes. in Stephanus. v. Adath.) Many inscriptions have been found in this island. Hence the Phoenicians seem to have proceeded to the coast of Asia Minor, the islands of the Greek Archipelago, and the coast of Greece itself. Phoenician myths and traditions are interwoven with the earliest history of Greece, and long preceded the Trojan War. Such are the legends of the flight of Europa and the birth of Cadmus in Rhodes and Crete, of Cadmus in Thasus, Boeotia, Euboea and Thera. Rhodes seems to have been early visited by the Phoenicians; and, if it did not actually become their colony, there are at least numerous traces that they were once predominant in the island. It is mentioned in Genesis (x. 4.) in connection with Cithium and Tartessus. (Comp. Ephialtes. ad. Horae. 30; 33; and Movas, vol. ii. pt. ii. p. 248, note 137.) Conon, a writer who flourished in the Augustan period, mentions that the Heliaides, the ruling dynasty in Rhodes, were expelled by the Phoenicians. (Fab. 47, ap. Phot. p. 187), and numerous other traditions testify their occupation of the island. Traces of the Phoenicians may also be found in Crete, though they are farther north than at Rhodes. It is the scene of the myth of Europa, the Sidonian Astarte: and the towns of Ithaca, which also bore the name of Araden (Steph. B. s. v. "Trason; Hieroc. § 11; Acta, xxvii. 13.), Lebena, and Phoen- nice, were reputed to have been founded by them. We learn from Thucydides (i. 8.) that the greater part of the Cyclades were colonised by Phoenicians. There are traces of them in Eolia, Lycia, and Caria. We have already alluded to their intimate connection with the last-named country, and Thucy- dides, in the passage just cited, mixes the Carians and Phoenicians together. Chios and Samos are also connected with the Phoenicians by ancient myths; and at Tenedos, Melicerte, worshipped with

the sacrifice of infants, is the Tyrian Melchab, also called Palaemon by the Greeks. (Lycophr. Cass. 259.) There are traces of Phoenician colonies in Bithynia, but not more eastward in the Euxine, though it cannot be doubted that their voyages extended farther. Mythological analogies indicate their presence in Imброс and Lemnos, and there are distinct historical evidences of their settlements in the neighbouring island of Thasos. Herodotus had himself beheld the gigantic traces of their mining operations there, in which they appeared to have turned a whole mountain upside-down (v. 47.). The fables of the Phoenicians, and the mythical truth of their geographical travels, has been abundantly confirmed by the discoveries of modern travellers in the interior of Europe. (Id. ii. 44.) They had also settlements for the purposes of mining at Mount Pangaeus, on the opposite coast of Thrace. (Plin. vii. 57; Strab. xiv. p. 680.) According to Strabo (x. p. 447.), Cadmus and his Arabs once dwelt at Chalcis in Euboea, having crossed over from Boeotia. Of the settlement of the Phoenicians in the latter country, there is historical testimony, to whatever credibility the legend of Cadmus may be entitled. (Herod. v. 57.) The name of "Oryxa, or Onea, by which Minerva was worshipped at Thebes, and which was also given to one of the city gates, was pure Pho- nician. (Ephor. ap. Stephan. B. s. v.: cf. Pausan. ix. 12.) From Thebes the Cadmean were expelled by the Sigeanae, and retired amongst the Thracians and an Illyrian people (Herod. v. 61.); and Illirius, a son of Cadmus and Harmonia, was said to have given name to their country. (Apollod. iii. 5. § 4.) The Paphians, the ancient inhabitants of Cephalæa, were the reputed descendants of Cadmus. (Odyss. xv. 428.)

Australia required bold navigation; but with the instinct of a commercial and maritime people, the Phoenicians seized its promontories and adjacent isles for the purpose of trading with the natives. (Thucyd. vi. 2.) Subsequently, however, they were gradually driven from their possessions by the growing power of the Greek colonies in that island and the island of Cyprus, which was ultimately confined to its NW. corner (ib.), which was the nearest approach to the throngh. Daedalus, an epitaph of Hephaestus, the father of the Phoenician Cabiri, is represented as flying from Crete to Sicily. (Diod. iv. 77.) The Venus of Mount Eryx was probably of Phoenician origin from the veneration paid to her by the Carthaginians. (Aelian, H. An. iv. 2; Athen. ix. p. 384.) An inscription found at Segesta mentions a priestess of Venus-Urania, which was the Phoenician Venus. (Rhein. Mus. vol. iv. p. 91.) There is some difficulty, however, with regard to the temples of this deity, from the attempts which have frequently been made to connect them with the wanderings of the Trojans after the capture of their city. Thus Dyonysius of Halicarnassus (Ant. R. i. 90) attributes the temple of Venus at Cythera to Aenes, whilst by Herodotus (i. 105) it is assigned to the Phoenicians. The migration of the latter to the western side of Sicily must have taken place after the year 736 B.C., the date of the arrival of the Greek colonists. There are no traces of the Phoenicians in Italy, but the islands between Sicily and Africa seem to have been occupied by them. Diodorus (v. 12) mentions Melite, or Malta, as a Phoenician colony. In later times, however, it was occupied by the Carthaginians, so that here, as in the rest of these islands, it is difficult to distinguish whether the antiquities belong to them, or to the Phoenicians. Farther westward we may track the
PHOENICIA.

latter in Sardinia, where Claudian (Bell. Gild. 580) mentions Carnalis as founded by the Tyrians, in contradiction to Scril, founded by the Carthaginians. And the coins of Aebusus (Ivocs) seem to denote the occupation of it by the Phoenicians, since they have emblems of the Cabiriac worship.

The very early intercourse between Phoenicians and the north of Spain is attested by the mention of Tarabish, or Tartessus, in the 10th chap. of Genesis. To the same purport is the legend of the expedition of Hercules against Chrysaor, the father of Geryon, which was of course naval, and which sailed from Crete. (Herod. iv. 8; Diod. iv. 17, seqv. v. 17, &c.) The account of Diodorus leads us to conclude that this was an earlier colony than some of the immediately situated ones. The Phoenicians had no doubt carried on a commercial intercourse with Tartessus long before the foundation of Gadeira or Cadiz. The date of the latter event can be ascertained with very remarkable accuracy. Velleius Paterculus (i. 2) informs us that it was founded a few years before Utica; and from Aristotle (de Meta.) we learn that it was founded 287 years before Christianity. Now as the latter city must have been founded at least 800 years B.C., it follows that Gadeira must have been built about eleven centuries before our era. The temple of Hercules, or Melcarth, at this place retained, even down to the time of Silius Italicus, the primitive form, proving its independence among the Phoenicians, of which we have no image, and the only visible symbol of a god was an ever-burning fire; the ministering priests were barefooted and clad in linen, and the entrance of women and swine was prohibited. (Pauic. iii. 22, seq.) Long before this period, however, it had ceased to be a Phoenician colony; for the Phocaeans who sailed to Tartessus in the time of Cyrus, about 556 B.C., were independent states, and not by its own king Arganthonius. (Herod. l. 163.) Many other towns were doubtless founded in the S. of Spain by the Phoenicians; but the subsequent occupation of the country by the Carthaginians renders it difficult to determine which were genuine and which genuine Phoenician. It is possible, however, that some of the Phoenician colonies, or of the Carthaginians, can be traced, as Carteia, Malaca, Sexti, &c., were of Tyrian foundation. To this early and long continued connection with Phoenicia we may perhaps ascribe that superior civilization and inmemmorable use of writing which Strabo (iii. 139) observed among the Tartudii and Turdetani.

Further in the Atlantic, it is possible that the Phoenicians may have had settlements in the Cassiterides, or tin districts on the coast of Cornwall and the Scilly Islands; and that northwards they may have extended their voyages as far as the Belica in search of amber. (Britannicae Ins. Vol. i. p. 453, seq.) (Comp. Hearne, Researches, &c. ii. pp. 53, 68.) But the minting of these islands, or of the Carthaginian colonies, cannot be traced back to the Phoenicians. There are no more described traces of Phoenician occupation on the NW. or Atlantic coast of Africa. Abyssia, like Calpe, was one of the Pillars of Hercules, and his temple at Lixus in Mauretania was said to be older even than that at Gadeira. (Plin. xiii. 4. a. 29.) Tinga was founded by Antaeus, with whom Hercules is said to have principally carried on commerce. (Strab. iii. p. 140); and the Sinus Emporicus (Ευμονη, Strab. xvi. 827), on the W. coast of Mauretania, seems to have been so named from the commercial settlements of the Phoenicians. Carne was the limit of their voyages on this coast; but the situation of Carne is still a subject of discussion. (Cte.)

With regard to their colonies on the N. or Mediterranean coast of Africa, Strabo (l. p. 48) tells us that the Phoenicians occupied the middle parts of Africa soon after the Trojan War, and they were probably acquainted with such former towns. Their earliest recorded settlement was Itaca, or Utica, on the western extremity of what was afterwards called the gulf of Cartaghe, the date of which has been already mentioned. Pliny (xvi. 79) relates that the cedar beams of the temple of Apollo at Utica had lasted since its foundation, 1175 years before his time; and as Pliny wrote about 78 years after the birth of Christ, corroborates the date before assigned to the foundation of Carthage and Utica. The Phoenicians also founded other towns on this coast, as Hippo, Hadrumetum, Leptis, &c. (Sall. Jug. c. 19), and especially Carthage, on which it is unnecessary to expatiate here. (Cart.)

The principal modern works on Phoenicia are, Bochart's Geographic Sacra, a performance of unbounded learning, but the conclusions of which, from the defective state of critical and ethnographical science at the time when it was written, cannot always be accepted; Genesius, Monumenta Pho- enica; Movers' article Phœniciæ, in Erard and Grüber's Encyclop. W. of all nations; and the Phœnicia, of which two volumes are published, but which is still incomplete; and Mr. Kerrich's Phœni- cia, 8vo. London, 1855, to which the compiler of this article is much indebted. The reader may also consult with advantage Hengstenberg, De Rebus Tyrronicis, Berlin, 1839, and Beiräde zur Einlei- tung in das Alte Testament; Herren, Historical Researches, &c. vol. ii. Oxford, 1838; Grae, History of Greece, vol. iii. ch. 18; Forbiger, Handbuch der alten Geschichte, vol. ii. p. 659, seqq.; Russegger, Reisen; Burchard, Syria; Robinson, Biblical Researches, &c.

PHOENICE. [PHILA.]

PHOENICUS. [ MEDBOR. No. 3.]

PHOENICUS. [Boscotia. p. 412, &c.]

PHOENICUS (Φοινικης). 1. A port of Ionias, at the foot of Mount Mimnas. (Thucyd. viii. 34.) Livy (lvvi. 45) notices it in his account of the naval operations of the Romans and their allies against Antiocbus (comp. Steph. B. s. e.); but its identification is not easy, Links (Asia Minor, p. 263) regarding it as the same as the modern port of ?Ithome, and Hamilton (Researches, ii. p. 5) as the port of Egypt-Lemes.

2. A port of Lycia, a little to the east of Patara; it was scarcely 2 miles distant from the latter place, and surrounded on all sides by high cliffs. In the war against Antiocbus a Roman fleet took its station there with a view of taking Patara. (Liv. xxvii. 16.) Beaufort (Karummaca, p. 7) observes that Livy's description answers accurately to the bay of Kalamaki, as to Mount Phoenicus in Lycia, see OLYMPUS, Vol. II. p. 480. [L. S.]

PHOENICUS. [PHYCUS]

PHOENICUS (Φοινικης Αιγαυς, Strab. xvii. p. 799; Ptol. iv. 5. § 7; Diodorus, § 12), a harbor on the E. coast of the Euxine, on the islands Didyma, which must not be confounded with those which Ptolomy (iv. 5. § 76) places off the Cerneousa Parva on the coast of Aegypt. Its position must be sought between Drisynis,
PHRYGIA.

PHRYGIA (Φρυγία), a mountain of Locris, above Thermopylae. (Strab. xiii. pp. 589, 631; Stephan. B. s. a.)

PHRONICOS. [Cyme.]

PHRIXUS (Φρίξος), a tributary of the Erainus, in the Argive. [Argos, p. 201, s.]

PHRUSIS. [From S.]

PHRYGIA (Φρυγία) (Eth. Φρύγης, Phryges), one of the most important provinces of Asia Minor. Its inhabitants, the Phrygians, are to us among the most obscure in antiquity, at least so far as their origin and nationality are concerned. Still, however, there are many indications which seem calculated to lead us to definite conclusions. Some regard them as a Thracian tribe (Briges or Bryges), who had immigrated into Asia; others consider them to have been Armenians; and others, again, to have been a mixed race. Their Thracian origin is mentioned by Strabo (vii. p. 295, x. p. 471) and Stephanus B. (s. v.); and Herodotus (i. 73) mentions a Thracian migration, according to which the Phrygians, under the name of Briges, were the neighbours of the Macedonians before they migrated into Asia. This migration, according to Xanthus (ap. Strab. xiv. p. 680), took place after the Trojan War, and according to Conon (ap. Phot. Cod. p. 130, ed. Beek.) 90 years before that war. All these statements, however, can hardly refer to an original migration of the Phrygians from Europe into Asia, but the migration spoken of by these authors seems to refer rather to the return to Asia of a portion of...
the nation settled in Asia; for the Phrygians are not only repeatedly spoken of in the Homeric poems (II. ii. 882, iii. 185, x. 431, xvi. 717, xxiv. 553), but are generally admitted to be one of the most ancient nations in Asia Minor (see the story in Herod. ii. 2), whence they, or rather a portion of them, must at one time have nested into Europe; so that in our traditions the account of their migrations has been reversed, as in many other cases. The geographical position of the Phrygians points to the highlands of Armenia as the land of their first abode, and the relationship between the Phrygians and Armenians is attested by some singular coincidences. In the army of Xerxes these two nations appear under one command. (Thuc. i. 158.) The Phrygian name of the hero Heracles (vii. 23) adds the remark that the Armenians were the descendants of the Phrygians. Endorus (ap. Steph. B. s. a. V. Apeitia, and Eustath. ad Dion. Per. 694) mentions the same circumstance, and moreover alludes to a similarity in the languages of the two peoples. Both are said to have lived in the same region, that is, to have mingled with the Thracian, and the name of both, lastly, are used as synonyms. (Attic. Græc. Oxom. iv. p. 257, ed. Cramer.) Under these circumstances it is impossible not to come to the conclusion that the Phrygians were Armenians; though here, again, the account of their migrations is unhistorical. These cities are not being descended from the Phrygians, but from the Armenians from the Phrygians. The time when they descended from the Armenian highlands cannot be determined, and unquestionably belongs to the remotest ages, for the Phrygians are described as the most ancient inhabitants of Asia Minor. (Pana. i. 14. § 2; Claudian, in Emp. ii. 251, &c.; Appoll. Alex. iii. 10. 10.) The influence of the Phrygian legend of a great flood, connected with king Annacus or Nanacus, also are very significant. This king resided on Ionia, the most eastern city of Phrygia; and after his death, at the age of 300 years, a great flood overwhelmed the country, as had been foretold by an ancient oracle. (Zosim. vi. 10; Sidon. a. No. ii. 762; 766.) The Phrygians of this part of the world, however, are said to have first risen out of the flood, and the ark and Mount Ararat are mentioned in connection with the Phrygian town of Celeæas. After this the Phrygians are said to have been the first to adopt idolatry. (Oros. Sibyll. i. 196, 262, 266, viii. 12—15.) The influence of the Old Testament upon these traditions is unmistakable, but the identity of the Phrygians and Armenians is thereby nevertheless confirmed. Another argument in favour of our supposition may be derived from the architectural remains which have been discovered in modern times, and are scarcely noticed at all by the ancient writers. Vitruvius (ii. 1) remarks that the Phrygians built many houses of their country, and formed in their passages and rooms for habitations, so far as the nature of the hills permitted. This statement is most fully confirmed by modern travellers, who have found such habitations cut into rocks in almost all parts of the Asiatic peninsula. (Hamilton, Researches, ii. p. 250, 266; Texier, Description de l'Asie Mineure, p. 125.) These immense towns thus formed out of the natural rock.) A few of these architectural monuments are adorned with inscriptions in Phrygian. (Texier and Stuart, A Description of some ancient Monuments with Inscriptions still existing in Lydia and Phrygia, London, 1842.) These inscriptions must be of Phrygian origin, as is attested by such proper names as Midas, Aetes, Areages, and others, which occur in them, though some have unsuccessfully attempted to make out that they are Greek. The impression which these stupendous works, and above all the rock-city, makes upon the beholder, is that he before him works excented by human hands at a most remote period, not, as Vitruvius intimates, because there was a want of timber, but because the first robust inhabitants thought it safest and most convenient to construct such habitations for themselves. They do not contain the slightest trace of a resemblance with Greek or Roman structures; but while we assert this, we cannot, that they must be in the hand, that they display a striking resemblance to those structures which in Greece we are in the habit of calling Pelasgian or Cyclopian, whence Texier designates the above mentioned rock-city (near Boghaghien, between the Hylos and Ibris) by the name of a Pelasgian city. (Comp. Hamilton, Researches, i. p. 288, 405, &c.) Even the lion gate of Mycenae reappears in several places. (Ainsworth, Travels and Researches, ii. p. 58; Leake, Asia Minor, p. 28.) These facts throw a surprising light upon the legend about the migration of the Phrygian Pelops into Argolis, and the tombs of the Phrygians in Peloponnesus, mentioned by Athenaeus (XII. p. 576). But yet much remains to be done by more systematic exploration of the countries in Asia Minor, and by the interpretation of their monuments. One conclusion, however, can even now be arrived at, viz. that there must have been a time when the race of the Phrygians formed, if not the sole population of Asia Minor, at least by far the most important, bordering in the east on their kinmen, in the north and west on tribes of the Semitic race. This conclusion is supported by many facts derived from ancient writers. Independently of several Greek and Trojan legends referring to the southern coasts of Asia Minor, the name of the Phrygian mountain Olympus also occurs in Cilicia and Lycia; the north of Phrygia was called Bithynia was that the town of Otria on the Ascanian lake reminds us of the Phrygian chief Otrus. (Hom. ii. iii. 186.) In the west of Asia Minor, the country about Mount Sipylos was once occupied by Phrygians (Strab. xii. p. 571); the Trojan Thebe also bore the name Mygdonia, which is synonymous with Phrygia (Strab. xiii. p. 589). Mygdonians are mentioned in the neighbourhood of Miletus (Aslian. V. B. viii. 5), and Polyeus (Strat. viii. 37) relates that the Bybryces, in conjunction with the Phocaeans, carried war against the neighbouring barbarians.

From all this we infer that Trojans, Myrians, Maenians, Mygdonians, and Doliomians were all branches of the great Phrygian race. In the Illdid the Trojans appear in an exalted relation, for Hecuba is a Phrygian princess (xxvi. 718). Prigias is the ally of the Phrygians against the Amazons (iii. 184, &c.), the name Hector is said to be Phrygian (Hesych. s. a. Oapis), and the names Paris and Scamandrius seem likewise to be Phrygian for the Greek Alexander and Astyanax. It is as well known that the Roman poets use the names Trojan and Phrygian as synonyms. From the Homeric hymn on Aphrodite (113) it might be inferred that Trojans and Phrygians spoke different languages; but that passage is equally clear, if it is taken as alluding
only to a dialectic difference. Now as the Trojans throughout the Homeric poems appear as a people akin to the Greeks, and are even called Hellenes by Dionysius of Halicarnassus (Ant. Rom. l. 61), it follows that the Phrygians also must have been related to the Greeks. This, again, is further supported by the fact that the tradition about Pelops, which we have already alluded to, king Midas is said to have been the first of all foreigners to have dedicated, about the middle of the eighth century B.C., a present to the Delphic oracle (Herod. i. 14); and Plato (Cratyl. p. 410) mentions several words which were common to the Greeks and the Phrygians. (Strab. iv. 693; Labiadzski, Opera, vol. iii. p. 64, &c. ed. To Water; and, lastly, the Armenian language itself is now proved to be akin to the Greek. (Schröder, Thesaurus Ling. Arm. p. 51.) The radical identity of the Phrygians, Trojans, and Greeks being thus established, we shall proceed to show that many other Asiatic nations belonged to the same stock as the Phrygians. The name of the Mygdonians, as already observed, is often used synonymously with that of the Phrygians (Paus. a. 27. § 1), and in Homer (II. iii. 186) the leader of the Phrygians is called Mygdon. According to Stephanus B. (a. e. Myrdoria), lastly, Mygdonia was the name of a district in Great Phrygia, as well as of a part of Macedonia. The Dolonias, who extended westward as far as the Asopos, were separated from the Mygdonians by the river Rhodacnos. (Strab. xiv. p. 681; Schol. ad Apollon. Rhod. i. 936, 943, 1115.) At a later time they disappear from history, their name being absorbed by that of the Phrygians. The Mygdonians are easily recognisable as a Phrygian people, both from their history and the coins belonging to the same stock as the Phrygians. The name of the Mygdonians, as already observed, is often used synonymously with that of the Phrygians (ad Diom. P. 981; Schol. a. e. oibov xronov.) As to the Eumolpaei, who are mentioned by a few names as a tribe of Asia Minor, which are usually designated by the name Pelasgians, thus unquestionably were branches of the great Phrygian stock, and the whole of the western part of the peninsula was thus inhabited by a variety of tribes all belonging to the same family. But the Phrygians also extended into Europe, where their chief seats were in the central parts of Emathia. (Herod. viii. 138; comp. Strab. xiv. p. 680.) There we meet with Phrygians, or with a modification of their name, Brygion, in all directions. Mardonius, on his expedition against Greece, met Brygians in Thrace. (Herod. vi. 45; Steph. B. a. e. Broce; Plin. iv. 18, where we have probably to read Bryces for Brysce.) The Phrygian population of Thrace is generally supposed to have been in part, when it was inhabited by the Phrygians. But in many places were common to Thrace and Troas. (Strab. xii. p. 590; comp. Thucyd. ii. 99; Suid. a. e. Oep- musa; Solin. 15; Tzetzes. Chil. iii. 812.) Traces of Phrygians also occur in Chalcidice. (Lycoth. 1404; Steph. B. a. e. Kosoroi.) Further south they appear about Monte Orta and even in Attica. (Thucyd. ii. 25; Strab. xii. p. 590.) But the Phrygians are not found in the vicinity of Heloia. (Athen. iv. p. 271.) The latest of these Syrophoenician immigrants seem to have been the Lydians (Lytda), whose struggles with the Phrygians are expressly mentioned. (Strab. xii. p. 612; Scalap. p. 36.) This victorious progress of the

PHRYGIA.
PHRYGIA.

Semitic races exercised the greatest influence upon the Phrygians; for not only was their political importance weakened, but their national independence was lost, and their language and religion were so deeply affected that it is scarcely possible to separate the foreign elements from what is original and indigenous. In the north also the Phrygians were hard pressed, for the same Thracians who had driven them out of Europe, also invaded Asia; for although Homer does not distinctly mention Thracians in Asia, yet, in the historical ages, they occupied the whole coast from the Hellespont to Heracleia, under the names of Thymi, Bithyni, and Mariandyni. (Comp. Herod. vii. 75.) The conflicts between the ancient Phrygians and the Thracians are alluded to in several legends. Thus king Midas killed himself when the Tereus ravaged Asia Minor as far as Paphlagonia and Cilicia (Strab. l. p. 61); the Mariandyni are described as engaged in a war against the Mysians and Bebryces, in which Mygdon, the king of the latter, was slain. (Apollod. l. 9. § 23, ii. 5. § 9; and Diod. iii. 752, 780, 786, with the Schol.; Tzetza, Chil. iii. 808, &c.) The brief period during which the Phrygians are said to have exercised the supremacy at sea, which lasted for twenty-five, and, according to others, only five years, and which is assigned to the beginning of the ninth century B.C., is probably connected with that age of warfare, to which the Phrygians were engaged in the Boeotian wars (Diod. vii. 13; Synesius, p. 181), and it may have been about the same time that Phrygia from the Scamander and from Troy migrated to Sicily. (Paus. v. 25. § 6.)

It was a salutary circumstance that the numerous Greek colonies on the coast of Asia Minor counteracted the spreading influence of the Semitic race; but the Phrygians had retreated from their own empire. During the conquests of Cyrus, Greater and Lesser Phrygia are already distinguished (Xenoph. Cyrop. i. 5. § 3, vi. 2. § 10, vii. 4. § 15, viii. 6. § 7), the former being governed by a satrap (ii. 1. § 5), and the latter, also called Phrygia on the Hellespont, by a king. (vii. 4. § 8.)

After having thus reached the period of authentic history, we are enabled to turn our attention to the condition of the Phrygians, and the country which they ultimately inhabited. As to the name Phryges, of which Breyges, Breges, Breuci, Bebryces, and Bebrycianae are only different forms, we are informed by Harsyckianus (a. v. Boyle) that in the language of the kindred Lydians (that is, Maecians) it signified "freemen." The nation bearing this name appears throughout of a very peaceable disposition, and unable to resist foreign influences and innovations. None of their many traditions and legends points to a warlike spirit; on the contrary, they all have a somewhat mystic and fantastic character. The whole of their early history is connected with the names Midas and Gordius. After the conquest of their country by Persia, the Phrygians are generally mentioned only with contempt, and the Phrygian names Midas and Manes were given to slaves. (Cic. de nat. deor. vii. 2; Strab. vii. p. 181.) But their civilization increased in consequence of their peaceful disposition. Agriculture was their chief occupation; and whoever killed an ox or stole agricultural implements was put to death. (Nicol. Damasc. p. 148, ed. Orelli.) Gordius, their king, is said to have been called from the plough to the throne. (Arrian, Anab. ii. 3. § 1; Justin, xii. 7.) Pliny (vii. 6) calls the bign an invention of the Phrygians. Great care also was bestowed upon the cultivation of the vine; and commerce flourished among them in the very earliest times, as we must infer from their well-built towns mentioned by Homer (II. iii. 400). The foundation of all their great towns, which were at the same time commercial emporia, belongs to the mythical ages, as, e. g., Pessinus, Gordium, Celaenae, and Apamea. The religious ideas of the Phrygians are of great interest and importance, and appear to have exercised a greater influence upon the mythology of the Greeks than is comonly supposed; for many a deity, tradition or legend current among the Greeks must be traced to Phrygia, and can be explained only by a reference to that country. Truly Phrygian divinities were Cybele (Rhea or Agdistis), and Sabazius, the Phrygian name for Dionysus. (Strab. x. p. 470, &c.) With the worship of these deities were connected the celebrated orgies, accompanied by wild music and dances, which were subsequently introduced among the Greeks. Other less important divinities of Phrygian origin were Olympus, Hygia, Lityerxes, and Maraya. It also deserves to be noticed that the Phrygians never took or exacted an oath. (Nicol. Damasc. p. 148.) But all that we hear of the religion of the Phrygians during the early historical times appears to show that it was a mixture of their own original form of worship, with the less pure rites introduced by the Syro-Phoenician tribes.

The once extensive territory inhabited by the Phrygians, had been limited, as was observed above, at the time of the Persian dominion, to LESSER PHRYGIA, on the Hellespont, and GREATER PHRYGIA. It is almost impossible to define the boundaries of the former; according to Sclayx (p. 35; comp. Pomp. Mela, i. 19) it extended along the coast of the Hellespont from the river Gius to Scoustus; but it certainly embraced Troas likewise, for Ptolemy marks the two countries as identical. Towards the interior of the peninsula the boundaries are not known, but it appears as if the land was bordered in the east by Bithynia and Great Phrygia, and in the south on Lydia. GREAT PHRYGIA formed the central country of Asia Minor, extending from east to west about 40 geographical miles, and from south to north about 35. It was bounded in the north by Bithynia and Paphlagonia, and in the east by Cappadocia and Lycaonia, the river Halys forming the boundary. (Herod. v. 32.) The southern frontier towards Phidia and Cilicia was formed by Mount Taurus; in the west Mounts Timlos and Messesos extend to the western extremity of Mount Taurus; but it is almost impossible to define the boundary line towards Mykea, Lydia, and Caria, the nationalities not being distinctly marked, and the Romans having only obliterated the ancient landmarks. (Strab. xii. p. 584, xiii. p. 629.) The most important part in the north of Phrygia was the fertile valley of the Sangarius, where Phrygians lived in the time of Homer (II. iiii. 187, xvi. 719), and where some of their most important cities were situated. Iconium, the easternmost city, was still important in the 1st century A.D.; but the country to the north-west of it, with the salt lake Tatta, was barren and cold, forming a high plateau, which was only fit for pasture, and suffered from frequent droughts. The southern portion of Phrygia, surrounded by Mount Taurus, a
branch of it turning to the north-west, and by the mountains containing the sources of the Maeander, bore the surname Paroriopotis; it was a table-land, but, to judge from the many towns it contained, it cannot have been as barren as the northern plateau. In the first view, Phergys was comprised in the upper valley of the Maeander, and it is there that we find the most beautiful and most populous parts of Phrygia; but that district was much exposed to earthquakes in consequence of the volcanic nature of the district, which is attested by the hot-springs of Hierapolis, and the Plutonium, from which suffocating exhalations were sent forth. (Clast. in. 232, in. 270, &c.; Strab. vii. pp. 517, 622, &c.; Herod. vi. 30; Vitruv. viii. 5.)

Phrygia was a country rich in every kind of produce. Its mountains seem to have furnished gold; for that metal plays an important part in the legends of Midas, and several of the Phrygian rivers are called "auriferi." (Clast. in. 232.) Phrygian marble, especially the species found near Smyrna, was very celebrated. (Strab. viii. p. 579; Paus. i. 18, § 5, &c.; Ov. Fast. v. 539; Stat. Silv. i. 3. 86.) The extensive cultivation of the vine is clear from the worship of Dionysus (Sabaunos), and Homer (II. iii. 184) also gives to the country the attribute Ἀμφαίδερας. The parts most distinguished for their vineyards, however, was subsequently separated from Phrygia and added to neighbouring provinces. But Phrygia was most distinguished for its sheep and the fineness of their wool (Strab. viii. p. 578). King Amyntas is said to have kept no less than 300 flocks of sheep on the barren table-land, whence we must infer that sheep-breeding was carried on there on a very large scale. (Comp. Strab. x. p. 568.)

When Alexander had overthrown the Persian power in Asia Minor, he assigned Great Phrygia to Antiocus, B. C. 333 (Arrian, Anab. i. 29); and during the first division of Alexander's empire that general retained Phrygia, to which were added Lydia and the western part of Thrace. (Polyb. vi. 13; Eut. Loc. de Liv. 192, 135, 136; Liv. xxxix. 51; Strab. p. 568.) After the death of Antiocus, in B. C. 301, Lesser Phrygia fell into the hands of Lysimachus, and Great Phrygia into those of Seleucus (Appian, Syr. 55, who, after conquering Lysimachus, in B. C. 262, united the two Phrygian empires, and empire under Seleucus, which in our maps seems to be three separate states, the district of Greater Phrygia from Paphlagonia and Bithynia; and the ancient towns of Gordium, Ancyra, and Pessinus now became the seats of the Gauls. To the east also Phrygia lost a portion of its territory, for Lycosia was extended so far westward as to embrace the whole of the above mentioned barren

platan. (Strab. xiv. p. 665.) It is not impossible that Attalus I. of Pergamum may have taken possession of Lesser Phrygia as early as B. C. 240, when he had gained a decisive victory over the Gauls, seeing that the Trocmi, one of their tribes, had dwelt on the Hellespont (Liv. xxxviii. 16); but his dominion was soon after reduced by the Syrian kings to its original dimensions, that is, the country between the Sinus Elaeus and the bay of A dramytium. However, after the defeat of Antiochus in the battle of Magnesia, in B. C. 191, Eumenes II. of Pergamum obtained from the Romans the greater part of Asia Minor and with it both the Phrygias. (Strab. vii. p. 546; Liv. xxxviii. 54, &c.)

Phrygia was a country rich in every kind of produce. Its mountains seem to have furnished gold; for that metal plays an important part in the legends of Midas, and several of the Phrygian rivers are called "auriferi." (Clast. in. 232, in. 270, &c.; Strab. vii. pp. 578, 622, &c.; Herod. vi. 30; Vitruv. viii. 5.)

Phrygia was a country rich in every kind of produce. Its mountains seem to have furnished gold; for that metal plays an important part in the legends of Midas, and several of the Phrygian rivers are called "auriferi." (Clast. in. 232, in. 270, &c.; Strab. vii. pp. 578, 622, &c.; Herod. vi. 30; Vitruv. viii. 5.)

Phrygia was a country rich in every kind of produce. Its mountains seem to have furnished gold; for that metal plays an important part in the legends of Midas, and several of the Phrygian rivers are called "auriferi." (Clast. in. 232, in. 270, &c.; Strab. vii. pp. 578, 622, &c.; Herod. vi. 30; Vitruv. viii. 5.)
PHRYGIA PISIDICA.

The remaining part of Phrygia was then divided into Phrygia Salutaris, comprising the eastern part with Synnada for its capital, and Phrygia Piscitana (probably also called Capadocia), which comprised the western part down to the frontiers of Caria. (Notit. imp. c. 5; Hierocl. pp. 664, 676; Constant. Porph. de Them. i. 1; Dupas, p. 92; see the excellent article Phrygia in Paul's Realencyclopaedia, by O. Abel; Cramer, Asia Minor, ii. p. 1, &c.; Niebuhr, Lect on Anc. Hist. i. p. 83, ii. p. 36.)

PHYSCELLA. [Buto: CHEMMISI.]

PHTHIA. [PHALA.]

PHTHIA, PITHYOTIS. [THERASSA.]

PHTHIRA (Φθηρα, Steph. B. a. e.; written Φηθηρα in Meineke's edition of Stephanus), a mountain in Caria, inhabited by the Phthires, is evidently the same as the Φθηρίων βραχύς of Homer (II. i. 388), which, according to Hecataeus, was identical with Mt. Latmus, but which others supposed to be the same as Mt. Gria, running parallel to Mt. Latmus. (Strab. xi. p. 483; Renn. p. 136.)

PHTHIORYPHAGI (Φθηροριφαγοι), &c. "Eaters," a Scythian people, so called from their fish and dirt (κτω τω οδοφάκα κα τον πάνω, Strab. xi. p. 449). Some modern writers endeavour to derive their name from Φθηρα, the fruit of the Φθηριά or fireplace, which served as their food (Ritter, Vorkunde, p. 549). This mountain, then, is usual connected with the annihilation of Strabo, of the sense in which the word was understood in antiquity. This savage people is variously placed by different writers. According to Strabo they inhabited the mountains of Caucanaus (Strab. xi. pp. 492, 499), and according to other writers different parts of the coasts of the Black Sea. (Arrian, Per. F. XXX. p. 18; Mela, i. 18; Plin. vii. 4.) Ptolemy places them in Asiaic Sarmatia beyond the Rhus (v. 9. § 17). According to Pliny (iv. 4) they were subsequently called Salae. The Budini are also said to have ate λιοντα (φθηροτριφύς, Herod. iv. 109).

PITHUTH (Φθυθός, Pluton. iv. 1. § 3; Φθυθόσ, Jos. Ant. i. 6. § 2; Fut, Plin. v. 1), a river of Mauretanian Africa, has been variously placed. In the ethnographic table of Genesis (x. 6), Φθυθός is reckoned among the sons of Ham. This immediate descent of Plut (a name which is generally admitted to indicate Mauretanians, from Ham indicates, like their Greek name, the depth of colour which distinguished the Mauretanians. In Ezekiel (xxii. 10) the men of Φθυθός are represented as servants in the Tyrian palace (comp. Ezek. xlii. 5, 35; 5); as also in Jeremiah (xlvii. 9) they are summoned to the hosts of Egypt; and in Nahum (iii. 9) they are the helers of Nineveh. (Winer, Realeiberbuch, &c.; Kenrick, Phoenicia, pp. 137, 277.)

PINDAUSI (Φινδαίος), a tribe mentioned by Ptolemy (ii. 11. § 12) as inhabiting the provinces Cimbrica in the north of Germany, and dwelling north of the Cobandi and Chali. Zeus (Die Deutschen, p. 152), without satisfactory reasons, regards them as the same with the Seduni mentioned by Caesar (B. G. i. 31, 37, 51.)

PHYSCELLA. [GAELETUS.]

Quadi, and Wilhelm (Germania, p. 230) believes that it existed in Moravia, in the neighbourhood of Znaim. (L. S.)

PHUSIPARA (Φθυσιπάρα), a town of the em. district of Melitene in Armenia Minor, between Ciusia and Eusemara, is mentioned only by Ptolemy (v. 7. § 7).

PHYCUS (Φυκός, Strab. viii. p. 363, xvii. p. 837; Pluton. iv. 5. § 5; Plin. v. 5), the most northerly point of the Libyan coast, 2800 staid from Tanagra, 3850 stade from Puleia, and 125 M. P. from Crete. (Plin. l. c.) Cato bade beached at this point in Africa after leaving Crete, but the natives refused to receive his ships. (Lucan, incarnation 40.) Synnaios, who has given in his letters (Ep. 51, 100, 114, 139) several particulars about this spot, states that it was dangerous to live here because of the stagnant waters, and their fatal exhalations. It had a harbour known to the W., which is confirmed by the coast-describer (Stadium. § 53, where it is by an error called Phoenicus). Scylax (p. 46) placed the gardens and lake of the Hesperides near this headland, now Ráx-al-Rása or Ráx Sem, where Smyth (Mediterraneana, p. 435) marks the coast bold and steep, rising gradually to Cyrene. (Pacho, Fugax, p. 169; Barth, North African Desert, p. 196.)

PHYLACE (Φυλάκη: Athens, Φυλάκων), 1. A town of Phthiotis in Thessaly, one of the places subject to Proteusias, and frequently mentioned in the Homeric poems. (II. ii. 695, iii. 696, xiv. 335, Od. xi. 290; comp. Apoll. Rhod. i. 45; Steph. B. a. e.) It contained a temple of Proteusias. (Pind. Nem. x. 84.) By Phyllacis Coan is often the town of Magnesia (iv. 9. § 16). Strabo describes it as standing between Phanarous and Pithiote Thebes, at the distance of about 100 stadia from the latter (ix. pp. 433, 435). Leake places it about 40 minutes from Chidde, in the descent from a pass, where there are remains of an ancient town. The situation near the entrance of a pass is well suited to the name of Phylacis. (Leake, Northern Greece, vol. iv. pp. 332, 356.)

2. A town of Molossia in Epirus, of uncertain site. (Liv. xliv. 26.)

3. A place in Arcadia, upon the frontiers of Tegae and Laconia, where the Alpheius rises. (Paus. viii. 54. § 1.)

4. A town of Piersia in Macedonia (Ptol. iii. 18. § 40), the inhabitants of which are mentioned by Pliny under the name of Phylacaei (v. 10. § 17).

PHYLACEUM (Φύλακειον or Πυλακεῖον), a town of western Phrygia, at a short distance from Theismison. (Ptol. v. 2. § 26; Tab. Peut.) Geogr. Rer. iv. 18, where it is called Fileacton.) The Phrygian cities of the Φυλακεῖα, mentioned by Ptolemy (v. 2. § 27) undoubtedly derived its name from this place. (L. S.)

PHYLE. [ATTICA, p. 329, b.]

PHYLLEUM, PHYLLUS. [ASTERIUM.]

PHYLLIS (Φυλλίς), a district of Thrace in the neighbourhood of Mt. Pangaeus, bounded by the Angles on the W. and by the Sirmon on the S. (Hieron. n. 119.)

PHYRITES, a small tributary of the Caystrus, having its origin in the western branch of Mount Tmolus, and flowing in a southern direction through the Pegasean marsh (Stagnum Pegaseum), discharges itself into the Caystrus some distance above Ephesus. (Plin. v. 5.)

PHYSICA, PHYSICUS. [EORDAIA.]

PHYSCELLA. [GALETUS.]

S.
PHYSCUS. (Φύκης: Εὐκ. Φύκυς). A town of Caria, in the territory of the Rhodians, situated on the coast, with a harbour and a grove sacred to Lepto. (Strab. xiv. p. 652; Stadiasmus. Mor. Mag. § 245; Ptol. v. 2. § 11, where it is called Φύκυς.) It is impossible to suppose that this Physcus was the port-town of Phocaea. (Steph.  Φύκης.) We may rather assume that Pasalea, the port of Mylasa, also bore the name of Physcus. Our Physcus was the ordinary landing-place for vessels sailing from Rhodes to Asia Minor. (Strab. xiv. p. 663; comp. Steph. B. s. v.) This harbour, now called Μορμονίσσα, and a part of it Physco, is one of the finest in the world, and in 1800 Lord Nelson's fleet anchored here before the battle of the Nile. (L. S.)

PHYSCUS, a tributary of the Tigris. (Τίγρις.)

PHYTEUM (Φύτευμ, Pol. v. 7; Φύτευμ, Steph. B. s. v.; Gavala), a town of Aetolia, probably on the northern shore of the lake Trichonis. (Leake, Northern Greece, vol. i. p. 155.)

PHYTEUM, vol. iv. p. 93, to be a founding-place, and the chief place of the surrounding district. (Steph. Lc.; Liv. xxxiv. 45; Vell. Pat. i. 15.) Physcita, however, did not cease to exist: Florus indeed appears to date its destruction only from the period of the Social War (Flor. iii. 18); but even long after this it is mentioned as a town both by Mela and Pliny, and its name still is found in the Tabulae as late as the 1st century. (M. i. 4. § 9; Plin. iii. 5. § 9; Tab. Peut.) The name of Physcita is still borne by a hamlet on the road from Salerno to Eboli, and the stream on which it is situated is still called the Pisciato; but it is probable that the ancient city was situated rather more inland. (Roumanelli, vol. iii. p. 610; Zannoni, Carta del Regno di Napoli.)

P'ALAE (Παλά), a town in the interior of Pontus Galatiae, mentioned only by Ptolemy (v. 6. § 9). (L. S.)

P'ALAE (Παλαί or Παλαί), vol. vi. 16. § 6), a town of Serica, from which the people Plalae (Παλαί or Παλαί), dwelling as far as the river Oechanus, derived their name. (Ptol. vi. 16. § 4.)

In some MSS. of Pliny (vi. 17. 2) the Plalae are stated to have occupied some country in Scythia intra Iassum, but the hill runs Palesae. (L. S.)

P'ALAE (Παλαί), a town of Histiaeotis in Thessaly, at the foot of Mt. Cercetium, probably represented by the Helenic remains either at Skadion or Arishion. (Steph. B. s. v.; Leake, Northern Greece, vol. iii. p. 574, seq.)

PIRENSII (Πιέρνησες, Ptol. iii. 10. § 9), a people of Moesia Inferior, adjoining its southern or Thracian boundary. (T. H. D.)

PICAIRIA. (Dalmatia.)

PIECENSI (Πιέκενσες), Ptol. iii. 9. § 2), a people seated in the NE. part of Moesia Superior, on the river Timarca. (T. H. D.)

PIECENTES. (Picenum.)

PIECENTIA. (Picentina.)

PIECENTI (Πιέκεντιο, Ptol.; Πιέκεντιο, Strab.), a tribe or people of Central Italy, settled in the southern part of Campania, adjoining the frontiers of Lucania. Their name obviously indicates a close connection with the inhabitants of Picenum on the opposite side of the Italian peninsula; and this is explained by Strabo, who tells us that they were in fact a portion of that people who had been transported by the Romans from their original abodes to the shores of the Tyrrhenian sea. (Strab. v. p. 251.)

The period of this transfer is not mentioned, but it was probably about 110 B.C. (Punic wars). So when we read that they joined the conquest of Picenum by the Romans, a.c. 268. During the Second Punic War, the Picentini espoused the cause of Hannibal, for which conduct they were severely punished after the close of the war, being, like the Lucanians and Bruttians, prohibited from military service, and employed for the inferior duties of public menial offices and herds of oxen. They were at the same time compelled to abandon their chief town, which bore the name of Picentia, and to dispense themselves in the villages and hamlets of the surrounding country. (Strab. l. c.) The more effectually to hold them in check, the Romans in n.c. 144 founded in their territory the colony of Salernum, which was probably about 135 B.C. (Punic wars). The name is still found in the Tabulae as late as the 4th century. (M. i. 4. § 9; Plin. iii. 5. § 9; Tab. Peut.) The name of Picenum is still borne by a hamlet on the road from Salerno to Eboli, and the stream on which it is situated is still called the Pisciato; but it is probable that the ancient city was situated rather more inland. (Roumanelli, vol. iii. p. 610; Zannoni, Carta del Regno di Napoli.)

The latter are indeed so mentioned that we can hardly determine what was the general usage in regard to them. (E. H. B.)

PIECENTI (Πιέκέντιο), a place in Pannonia on the left bank of the Savus, on the road from Siscia to Sirmium. (Ilt. Ant. p. 260.) It is possible that some ancient remains known as Kala may mark the site of the ancient Picentium. (L. S.)

PIECENUM (Πιέκεντιο, Pol., Strab.; Eκ Πιέκεντιος, Strab.; Πιέκεντιος, Ptol.; Picentes, Cist. Var.; but sometimes also Picentini and Picenti), a province or region of Central Italy, extending along the coast of the Adriatic from the mouth of the Aesis to that of the Matrinus, and inland as far as the central ridge of the Appennines. It was thus bounded on the W. by the Umbrians and Sabines, on the S. by the Vestini, and on the N. by...
the territory occupied by the Galli Semones, which was afterwards incorporated into the province of Umbria. The latter district seems to have been at one time regarded as rather belonging to Picenum. Thus Polybius includes the "Gallicus Ager" in Picenum; and Livy even describes the colony of Ariminum as founded "in Picena." (Pol. ii. 21; Liv. Epit. xvi.) The boundaries of Picenum were definitely established, as above stated, in the time of Augustus, according to whose division it constituted the Fifth Region of Italy. (Plin. iii. 13. s. 18; Strab. v. p. 240.) The district thus bounded forms a tract of about 80 geographical miles (800 stadia, Strab. v. p. 341) in length, with an average breadth, which was said to be 30 to 40 miles, so that the territory thus limited was inhabited by a tribe called the Praetutii, who appear to have had to some extent a different people from the Picentes; hence Pliny gives to this district the name of Regio Praetutiana; and Livy more than once notices the Praetutianus Ager, as if it were distinct from the Picenum Ager. (Plin. l. c.; Liv. xxi. 9, xxvii. 43.) The district seems to have been a separate region at least in some degree (Plin. l. c.; Liv. xxi. 9); but both these districts were generally comprised by geographers as mere subdivisions of Picenum in the more common sense.

Very little is known of the history of the Picentes; but ancient writers seem to have generally agreed in assigning them a Sabine origin; tradition reported that they were a colony sent out from the parent country in consequence of a vow, or what was called a sacred spring; and that their name was derived from a Woodpecker (picus), the bird sacred to Mars. They founded the city of Asculum at the mouth of the river, and the region was previously possessed by the Pelasgians; so mention of these is found in any other author, but Pliny speaks of Siculians and Liburnians as having had settlements on this coast, especially in the Praetutian district, where Treuentum was said still to preserve traces of a Liburnian colony (Plin. l. c.); while the foundation of Numans and Ancona, further to the north, was ascribed to the Siculi. (Strab. v. p. 240; Plin. iii. 13. s. 18; Fest. v. Picena, p. 212.) Silus Italicus, on the other hand, derives it from the name of Picus, the Italian divinity, whom he represents as the founder of Asculum (Sil. Ital. viii. 439—445); but this is in substance only another form of the same legend. The Picentes, like the Italic people generally, were regarded by the successors of the Hellenic race as perhaps the most numerous of the Italian tribes; and although they were not among the most important, the Picentes possessed a large number of towns and colonies, which were not only distinguished for their size and strength, but also for their wealth and resources. They were a people of great enterprise, and their energy and activity were well known to the Romans, who often sought their advice and assistance in their wars. They were a warlike people, and their cities were fortified with walls and towers, and were well protected by natural advantages. They were also a people of considerable commercial spirit, and their cities were centers of trade and commerce. They were a people of great industry and ingenuity, and their cities were adorned with fine temples, public buildings, and works of art. They were a people of great hospitality and generosity, and they were known for their kindly and hospitable manners. They were a people of great courage and determination, and they were not easily subdued or overcome. They were a people of great political skill and ability, and they were able to maintain their independence and their rights in the face of the powerful forces that were arrayed against them. They were a people of great religious zeal and devotion, and they were known for their piety and devotion to their gods. They were a people of great wisdom and sagacity, and they were able to guide their cities and their states through the most difficult periods of their history. They were a people of great learning and science, and they were known for their wise and sagacious councilors and their learned and sagacious sages. They were a people of great beauty and grace, and they were known for their elegant and graceful manners. They were a people of great wealth and resources, and they were known for their great wealth and resources. They were a people of great power and influence, and they were known for their great power and influence. They were a people of great independence and self-respect, and they were known for their great independence and self-respect. They were a people of great wisdom and prudence, and they were known for their great wisdom and prudence. They were a people of great moderation and temperance, and they were known for their great moderation and temperance. They were a people of great honesty and integrity, and they were known for their great honesty and integrity. They were a people of great religious zeal and devotion, and they were known for their piety and devotion to their gods. They were a people of great wisdom and sagacity, and they were able to guide their cities and their states through the most difficult periods of their history. They were a people of great learning and science, and they were known for their wise and sagacious councilors and their learned and sagacious sages. They were a people of great beauty and grace, and they were known for their elegant and graceful manners. They were a people of great wealth and resources, and they were known for their great wealth and resources. They were a people of great power and influence, and they were known for their great power and influence. They were a people of great independence and self-respect, and they were known for their great independence and self-respect. They were a people of great wisdom and prudence, and they were known for their great wisdom and prudence. They were a people of great moderation and temperance, and they were known for their great moderation and temperance. They were a people of great honesty and integrity, and they were known for their great honesty and integrity.

The Picentes reaped the advantages of this long peace in the prosperity of their country, which became one of the most populous districts of Italy, so that according to Pliny it contained a population of 360,000 citizens at the time of the Roman conquest. (Plin. l. c.) Nevertheless they seem to have offered but little resistance to the Roman arms, and were almost shamed by the prospect of the Roman legions who advanced to repossess Claudius in a single campaign. (Plin. l. c.) The causes which led to the war are unknown; but the fact that the Picentes and Gallientes were at this time the only two nations of Italy that remained unsubdued is quite sufficient to explain it.

From this it is clear that the allies, he was enabled to render the extraordinary condition of the subject allies of Rome; and though their territory is repeatedly mentioned as suffering from the ravages of the Second Punic War (Pol. iii. 86; Liv. xxi. 9, xxvii. 43), the name of the people does not again occur in history till the great outbreak of the nations of Italy in the Social War, n. c. 90. In that memorable contest the Picentes were beaten in two battles, but they continued to fight against Rome till the end of the war, in which they were cut off, in 89 B.C. (Appian, B. C. i. 38; Liv. Epit. ii. 9; Vell. Pat. ii. 16; Diod. xxxvi. 2.) The first attack of the Roman Syracusae on the frontier of Asculum was repulsed with loss; and it was with difficulty that that general could maintain his footing in Picenum while the other Roman armies were occupied in hostilities with the Marsi, Pergami, and other nations nearer Rome. It was not till the second year of the war that, having obtained a decisive victory over the allies, he was enabled to resume the offensive. Even then the Picente general Judacillus maintained a long struggle against Pomepeus, which was at length terminated by the surrender of Asculum, and this seems to have been followed by the submission of the rest of the Picentes, n. c. 69. (Appian, B. C. i. 47, 48; Liv. Epit. i. 47, xix. 4; Oros. i. 18; Flor. iii. 18.) There can be no doubt that they were at this time admitted, like the rest of the Italian allies, to the Roman franchise.

Picenum was occupied almost without opposition by Caesar at the commencement of the Civil War, n. c. 49 (Cass. B. C. i. 11—15), the inhabitants having previously declared in his favor, and thus compelled the officers of Pompey to withdraw from Auxinum and Asculum, which they had occupied with strong garrisons. In the civil war between Vitellius and Vespasian A. D. 69, it was occupied in like manner without resistance by the forces of the latter. (Tac. Hist. iii. 42.) Picenum appears to have continued to be a flourishing province of Italy throughout the period of the Empire, and although Pliny speaks of it as having much fallen off in population compared to earlier times ("quondam uterbae multis tundita," Plin. iii. 13. s. 18), it still contained a large number of towns, and many of these preserved their consideration down to a late period. It is probable that its proximity to Ravenna contributed to its wealth from the latter part of the period of the Empire, after that city had become the habitual residence of the emperors of the West. Under Augustus, Picenum became the Fifth Region of Italy (Plin. l. c.), but at a later period we find it combined for administrative purposes with the district...
called Flaminia, and the two together constituted a province which comprised all the strip of Umbria along the coast of the Adriatic, as well as the territory of the Sabines, Vestini, Peliini, and Marsi. Hence we find the Liber Coloniarum including the whole of this extensive district under the name of Picenum, and enumerating not only Alba and Nursia, but even Momentum, Fidenae, and Tibur, among the "civitates" Peter of Caesarae (p. 121) lists. But this arrangement did not last long. Flaminia and Valeria were again separated from Picenum, and that province was subdivided into two: the one called "Picenum subrubricium," or simply Picenum, which was the original district of that name, corresponding to the Fifth Region of Augustus; while the name of "Picenum Aetumarianum" was given to the tract from the Aeius to the Rubicon, which had been originally known as the "Gallicus Agger," and in the days of Augustus was comprised under the name of Umbria. (Lib. Colon. pp. 225 ff.; Mommsen, Die Liber Col. pp. 208 ff.; Notiti. dign. ii. pp. 64, 65; Böcking, ad Not. pp. 433, 443; F. diek. ii. 17.)

In the wars between the Goths and the generals of Justinian, Picenum repeatedly became the immediate theatre of hostilities. Auximinum, in particular, was at this time the chief city or capital of the province, was regarded as one of the most important fortresses in Italy, and withstood for a long time the assault of Belisarius. (Procop. B. G. ii. 10, 23 ff.) After the expulsion of the Goths, Picenum became one of the provinces of the exarchate of Ravenna, and as such continued subject to the Greek emperors until the final downfall of the exarchate. It was at that period that arose the geographical designation of the Pentapolis, for a province which comprised the greater part of Picenum, together with the maritime districts of Umbria, namely, Ariminum.

The province of this name was one of those bestowed on the see of Rome by king Pepin after the defeat of the Lombard king Astolphus (A.D. 754), and has ever since continued to form part of the States of the Church.

Picenum is a district of great fertility and beauty. Extending along a broad band of nearly uniform width from the central ranges of the Apennines, which form its boundary on the W., and which here attain their greatest elevation in the Monte Corno and Monti della Sibilla, it slopes gradually from thence to the sea; the greater part of this space being occupied by great hills, the underfauls of the more lofty Apennines which in their more elevated regions are clothed with extensive forests, while the lower slopes produce abundance of fruit-trees and olives, as well as good wines and corn. (Strab. v. p. 240; Liv. xxii. 9.) Both Horace and Juvenal extoll the excellence of its apples, and Pliny tells us its olives were among the choicest in Italy. (Hor. Sat. ii. 3. 272, 4. 70; Juv. xi. 79; Plin. xv. 3. 4.) The whole district is furrowed by beautiful streams, describing with great rapidity from the lofty ranges of the Apennines, partake much of a torrent-like character, but nevertheless serve to irrigate the whole country, which is thus rendered one of the pleasantest in Italy. These streams pursue nearly parallel courses, the direct distance from their sources to the sea in no case exceeding forty miles. They rise generally from S. to N., as follows: (1) The Matrinus, now called La Piomba, a small stream which formed the southern limit of Picenum, separating it from the territory of the Vestini; (2) the Vomano, still called the vomano, which separated the district of Adria from that of the Pretulii; (3) the Baturnus, now called the Tomdino, but sometimes also the Tremitano, which flows by Teramo (Interaures); (4) the Truentum (Tronto), the most considerable of all the streams, which flows under the walls of Ascoli (Asculum); (5) the Tinna, still called the Tenna; (6) the Flumino, now the Chiese; (7) the Portonara, now called the larus; (8) from Ascoli or Marsia, now known as the Musone. These last names are known only from the Tabula: on the other hand Pliny mentions a stream called Albulum, to which are added in some MSS. the names of Sulinae and Helvina. All these are placed apparently between the river Truentus and the town of Cupra Maritima; but besides the uncertainty of the reading, the whole description of this region in Pliny is so confused that it is very unsafe to rely upon his order of enumeration. The Albulum cannot be identified with any certainty, but may perhaps be the stream now called the Salino; and the other two names are probably mere corruptions. 9. The Ascas (Excas), situated as much as a considerable on the western coast of Picenum, into the sea between Accona and Sca Galice, formed the boundary which separated Picenum from Umbria.

The towns of Picenum are numerous, and, from the accounts of the populousness of the country in early times, were probably many of them once considerable, but few have any historical celebrity. Those on the sea coast were: (1) Matrinum, at the mouth of the river of the same name, serving as the port of Adria (Strab. v. p. 241); (2) Castrum Novum, at the mouth of the Baturnus, near Giulia Nuova; (3) Castrum Truentinum or Thurentum, at the mouth of the river of the same name; (4) Cupra Maritima; (5) La Piomba, now about 2 miles from S. Benedicto; (6) Castrum Firmum, now Porto di Fermo, at the mouth of the little river Letta; (6) Potentia (Sta Maria a Potenza), at the mouth of the river of the same name; (7) Numana, still called Umano, at the southern extremity of the mountain headland called Monte Comero; and (8) Ancona, at the northern end of the same headland. This last was by far the most important of the maritime towns of Picenum, and the only one that possessed a port worthy of the name: with this exception all the most important cities of the region were situated inland, on hills of considerable elevation, and thus enjoyed the advantage of strong positions as fortresses. The most important of these were Auximium (Otrino), about 12 miles S. of Accona; Cingoli (Cingoli), in a very lofty situation, between the valleys of the Aeius and Potentia; Firmum (Fermo), on a hill about 6 miles from the sea; Abculum (Ascoli), the ancient capital of Picenum, in a very strong situation on the river Truentus, about 22 miles from its mouth; Interamna (Teramo), the chief city of the Pretulii; and Adria (Atri), almost close to the southern frontier of Picenum. The minor towns in the interior were Berrera, which may perhaps be placed at Cirillella di Tronto, not far from Ascoli; Cupra Montana, so called to distinguish it from the maritime city of the same name, supposed to have occupied the site of the ancient Reipavina, a town proceeding from 4 miles from the sea, and a little to the N. of Fermo; Novana, probably at Monte di Novo, near Montalto; Faleria (Fallerone), in the upper valley of the Tinua; Umba Salvia (Urbisaglia) and Tolevena.
PICTAVI. [Pictonea.]

PICTI. The names of the Picti and Scotti appear only in late writers, by whom they are spoken of as two allied people. The Picts seem to have been identical with the ancient Britons, the Caledonii, the Caetani, the Albanii, the Caltonii, and the Alpinii. Ammianus Marcellinus represents the Picts as divided, in the time of the emperor Constantine, into two tribes, the Dicadion and Vecturiones, and as committing fearful ravages in conjunction with the Attacotti and Scottii (xxvii. 8, 2). The subject of their origin has been already discussed [BRITANNICAE INSULARUM, Vol. I. p. 438.]

The name of Picti, or painted, is commonly supposed to be derived from their custom of painting their bodies, and would thus be only a translation of the British word Britti, signifying anything painted, and which, according to Camden (Gen. Descr. p. xxxvi.), is the root of the name Britton. Such an etymology favours the notion that the Picts were an indigenous race; but on this point nothing positive can be affirmed. (Comp. Ann. Marc. xx. 1, xxvi. 4; Beda, H. Ecol. iii. 4, v. 21.) [T.H.D.]

PICTONEAS [Pictoneas], and, at a later period, PICTI, were a Gallic nation, south of the Loire and on the coast of the Atlantic. Poleni (Hist. ii. 6) places them in Celtogalata Aquitania, and mentions two of their towns, Limonum or Lemosum (Polion) and Batutum. "They occupy," he says, "the most northern parts of Aquitania, those on the river (Liger), and on the sea." Strabo (iv. pp. 190, 191) makes the Loire the boundary between the Nanometes and the Pictones. South of the Pictone he places the Santones, who extend to the Garumna.

The Pictone are mentioned by Caesar. He got ships from them for his war against the Veneti (B. G. iii. 11). The Pictone joined Verecingerix in B. C. 52, when he was raising all Gallia against Caesar. In b. C. 51 C. Caninius, a legatus of Caesar, marched into the country of the Pictones to relieve Lemanum, which was besieged by Dumnacus (B. G. viii. 26). [Lemunum.]

Lucan (i. 436) says that the Pictones were "immunes," or paid no taxes to the Romans:

"Pictones immunes subjungit sua rura."

His authority is not worth much; and besides that, this verse and the four verses which follow are probably apocryphal. (Notes in Oudemorgen's edition of Lucan.)

The territory of the Pictones was bounded on the east by the Turones and Bituriges Cubi. It corresponded to the diocese of Poitiers. [G. L.]

PICTONIUM PROMONTORIUM is now generally written, but in Ptolomy (ii. 7, § 1) Pec- tonium (Παραγοντος) is placed by him on the coast of Gallia Aquitania, between the mouth of the river which he names Canenteus [Canetontica] and the port Secor or Sicor. It is impossible to determine what point of land is Pectonium. D'Anville supposes it is the point of land called le Pointe de Secour on the map of the Siret Nortais; and Casselius takes it to be La Pointe de Bousincet. [G. L.]

PIDA (Πίδα), a town in Pontus Galaticus, on the road leading from Amasia to Neoacisaria. (Ptol. v. 6, § 9; Tab. Peut. where it is called Pidae.) [L. S.]

PIENTGAE (Πηγήγαρα, Ptol. iii. 50, 15), a people in European Sarmatia, supposed by Schaf- rik to be the inhabitants of the river Piane, which falls into the Prijat near Finik (Slavische Alterthümer, vol. i. p. 207.)

PIERAS. [Cheirum.]

PIERES (Πιέρης), a Thracian people, occupying the narrow strip of plain land, or low hill, between the mouths of the Peneus and the Halimacan, at the foot of the great woody steeps of Olympus. (Thuc. ii. 99; Strab. vii. p. 331, Fr. 22, ix. p. 410; Liv. xiv. 9.) This district, which, under the name of PIRIA or PEIRAS (Πιρία, Πιέρις), is mentioned in the Homeric poems (I. xiv. 225), was, according to legend, the birthplace of the Muse Musa (Hesiod. Theog. 271). It is frequently mentioned in the Iliad and Odyssey, and in older Greek song. (Apoll. Argon. i. 23.) When this worship was introduced into Boeotia, the names of the mountains, groves, and springs with which this poetic religion was connected, were transferred from the N. to the S. Afterwards the Pieres were expelled from their original seats, and driven to the N. beyond the Styrmion and Mount Pangeus, where they formed a new settlement. (Herod. vii. 112; Thuc. i. c.)

The boundaries which historians and geographers give to this province vary. In the systematic geography of Ptolomy (iii. 13, § 15) the name is given to the extent of coast between the mouths of the Ludias and the Halimacan. Piersis was bounded on the W. from the continental delta of the Thessalian Perrhusia by the great chain of Olympus, and from Olympus advances along the Piersian plain, in a NW. direction, as far as the ravine of the Halimacan, where the mountains are separated by that chasm in the great eastern ridge of Northern Greece from the portion of it anciently called Bemius. The highest summit of the Piersian range called Piersus Mons (Plin. iv. 15; comp. Paus. i. 18, 19) rises about 8 miles to the N. of Vlko- kolinadho, and is a conspicuous object in all the country to the E. It would seem that there was a city called PIRIA (Πιρία: Eód. Píerneis, Pí-
PIERIA.

pierus, Πιερός, Stephan. B.; Suid. s. e. Kefaros), which may be represented by a "tumulus," overgrown with trees upon the extremity of the ridge of Androthron, where it ends in a point between Drim and Pydna, the other two chief cities of Pieria. Before Pydna was a considerable forest, called "Pieria Silva" (Liv. xiv. 43), which may have furnished the timber used for the ships which had such a high reputation. (Herod. iv. 195; Plin. xiv. 95.) The road from Pella to Larissa in Thessaly passed through Pieria [MACEDONIA, Vol. ii. p. 337, a.], and was probably the route which the consul Q. Marcus Philippus pursued in the third and fourth years of the Pernic War. (Liv. xiv. 1-10; Leske, Northern Greece, vol. iii. pp. 127, 210, 397, 413, 446.) [E. B. J.]

PIERIA (Πιερία). 1. A district in Macedonia, [PIERIAS].

2. A district in Syria; a name given by the Macedonians to the northern coast of Syria, on the right bank of the Orontes. The principal mountain in this district, and which was a southern branch of the mountains, was also called Pieria. (Strab. xvi. pp. 749, 751; Polyb. v. 15 § 8.) The chief town was Seleucia, which is frequently distinguished from other towns of the same name by the addition of τον πιερια, especially on coins. (Eckhel, vol. iii. p. 824; Cio. ad Att. xi. 20.)

PIERIA. [Πιερία.]

PIERIUM. [Πιερίον.]

PIGUNTIA. [Πίγουντια.]

PILOUS (Πιλούς, Herod. vii. 122; Stephan. B.), a town of Sithonia in Macedonia, upon the Singite gulf, between Sane and Cape Ampelus, which probably occupied Πιλιούρι, or one of the harbours adjacent to it on the N. (Leake, Northern Greece, vol. iii. p. 133.)

[ E. B. J.]

PILOULOS (Πιλούλος, a fort in the western part of Pontus, on the river Halys. (Steph. B. s. e.) In Strabo's time (xii. p. 502. where it is called Pimolion) the fortress was destroyed, but the district on both sides of the river was still called Pimoliones.

[L. S.]

PIMPLEIA (Πιμπλεία, Strab. ix. p. 410; Apoll. i. 30; Lycur. 273), a place in Pieria, where Orpheus was said to have been. From which the Muse obtained their epithet of Πιμπλέφη and Πιμπλευκός among the Alexandrian poets. (Orph. Fragm. 46; "Pimpeia dulcis," Horat. Carm. i. 26. 9; Stat. Silv. i. 4. 26.) Leake (Northern Greece, vol. ii. p. 432) identified it with the elevated situation of Kizikho and its commanding prospect.

[L. S.]

PIMPRAEA (Πιμπρωμή, Arrian, Anab. v. 22), a place which appears to have been the capital of the tribe of Aedaeates, a nation mentioned by Arrian as existing about a day's journey from the Hydorades (Irrosado). The name has an Indian form and sound, but has not, so far as we know, been identified with any existing place. [V. A.]

PINARA (Πινάρα; Euk. Πινάρος). 1. A large city of Lycaonia, at the foot of Mount Cragus, and not far from the western bank of the river Xanthis, where the Lycean hero Pandarus was worshipped. (Strab. xiv. 665; Stephan. B. s. e. Arrian, Anab. i. 24; Plin. v. 39; Pol. v. 3 § 5; Hieroc. p. 65.) The city, though it is not often mentioned by ancient writers, appears, from its vast and beautiful ruins, to have been, as Strabo asserts, one of the largest towns of the country. According to the Lycean history of Menecrates, quoted by Stephanus Byz. (s. v. Άρτιμωρας), the town was a colony of Xanthus, and originally bore the name of Arty microscopy, afterwards changed into Pinara, which, in the Lyceian language, signified a round hill, the town being situated on such an eminence. Its ruins were discovered by Sir Charles Fellows, near the modern village of Minares. "From amidst the ancient city," he says (Lyca. p. 139), "rose a singular tripod in the form of a cult image, which had been so long covered with rubbish as to be completely lost among the debris of houses and rubbish." Beneath this cliff lie the ruins of the extensive and splendid city. The theatre is in a very perfect state; all the seats are remaining, with the slanting sides towards the proscaenium, as well as several of its doorways. The walls and several of the buildings are of the Corinthian style, with massive gateways, formed of three immense stones. The tombs are immaculate, and the inscriptions are in the Lycean characters, but Greek also occurs often on the same tombs. Some of these rock-tombs are adorned with fine and rich sculptures. (See the plate in Fellows facing p. 141.)

2. A town of Cilicia (Plin. v. 92), perhaps the same as the one mentioned by Polyb. (v. 15 § 19) as situated in Pieria, a district of Syria; though it should be observed that Pliny (v. 19) mentions the Pinaritae as a people in Cœlesyria. [L. S.]

PINARUS, [Πιναρός, a mountain in the south of Mylas, a branch of Mount Tymphres, stretching towards the western coast, and containing the sources of the river Cetius. (Plin. v. 83.)

PINENISSUS (Πινενισσος), a town of the Eleutherus-Cicities, situated upon a commanding height of Mt. Amarus, which was taken by Cicerone, when he was governor of Cilicia, after a siege of fifty-seven days. (Cio. ad Att. v. 20, ad Fam. ii. 10. 4.)

PINUS (Πινας, Herod. i. 56, vii. 129; Strab. ii. pp. 428, 430, et alii), a long and lofty range of mountains in Northern Greece, running from north to south about midway between the Ionia and Aegean seas, and forming the back-bone of the country, like the Apennines of the Italian peninsula. It is in fact a continuation of the same range which lies parallel with the Balkan, which, from which the name of Pindus where it first intersects the northern boundary of Hellas Proper at the 40th degree of latitude. Pindus forms the boundary between Thessaly and Epeirus. In its northern part it is called Laconom or Lacrom, and here five principal rivers of Northern Greece rise — the Halkomon, Peneia, Achelous, Arachthos, and Aous. [LACRMON.] To that part of the range S. of Lacrom the name of Cercileum was given. (Κερκελίως, Stephan. B. s. v. Παιλία; Κερκελίως λιος, Pol. iii. 13. § 19; Liv. xxxii. 14; Plin. iv. 8. s. 15.) Mount Cercileum is probably the main ridge of Κέρκελίως; and one of the principal passes from Epeirus into Thessaly lies across this mountain. (Leake, Northern Greece, vol. iv. pp. 528, 598.) Still further south, at the 39th degree of latitude, a point in the range of Pindus is called Tymphres (Τυμφρήστας, Strab. ix. p. 433), now Velishki; and from it branch off the two chains of Othsry and Oeta, the former running nearly due east, and the latter more towards the south-east. A little S. of Tymphres the range of Pindus divides into two branches, and no longer bears the same name. [See Vol. i. p. 1012.]

PINDUS (Πινδος), one of the towns of the tetrapolis of Doris, situated upon a river of the same
PINEUS. (Strab. xiii. p. 610.) Under the Roman dominion it belonged to the jurisdiction of Adramytium (Plin. v. 22), and in the ecclesiastical notices it appears as a bishopric. It has been long since deprived of its see. (Hieron. p. 683; Sestini, p. 75.) [L. S.]

PIRAEUS OR PEIRAEEUS. [ATHENAE, p. 306.]

PIRAEUUM OR PEIRAEEUM, in Corinthia [p. 685, b.]

PIRAEUS OR PEIRAEEUS, in Corinthia [p. 685, s.]

PIRAMOTH (Παραμόθ, Joseph., LXX.), a town in the land of Ephraim, and in the mount of the Amalekites, to which Abdon, one of the judges of Israel, belonged, and where he was buried. (Judges, xii. 13, 15.) It was repaired and fortified by Baccides, in his campaign against the Jews (1 Macc. ix. 50; Joseph., Ant. xiv. 3.).

PIRENE OR PEIRENE FONS. [CORINTHIUS, p. 680, b.]

PIRE'SIAE. [ASTERIAE.]

PIRUS OR PEIRUS. [ACHAIA, p. 18, b.]

PIRUSTAE (Πιροσταί, Plut. ii. 17, § 8; Peisostai, Strab. vii. p. 314), a people of Illyria, whom the Romans enslaved for free taxes, because they had assisted the latter in subduing Genucia. Liv. xiv. 26. Strabo (L. c.) calls them a Pannonian people. Respecting the position of the Pirustae on the northern frontier of Dacarstia, see Vol. I. p. 755, b.

PISTA (Πιστα). Ech. Πιστανη, πιστανητικη; a town in Peloponnesus, was in the most ancient times the capital of an independent district, called Pistias (Πιστιανη), which subsequently formed part of the territory of Elia. It was celebrated as a mart of commerce, as the residence of Oenomaus and Pelops, and was the head of a confederacy of eight states, of which, besides Pisa, the following names are recorded:—Salmone, Heraclea, Harpinna, Cyreneum, and Dyspontium. (Strab. viii. p. 365, seq.) Pisa had originally the presidency in the Olympic games; but was deprived of this privilege by the Eleians. The Pisatans, however, made many attempts to recover it; and the history of their wars with the Eleians, which were at last terminated by the destruction of Pisa in a. c. 572, is narrated elsewhere. [ELIS, Vol. I. p. 818, b.] Although Pisa ceased to exist as a city from this time, it is said that the Pisatans retained; and the modern city undoubtedly occupies the same site with the ancient one. Some remains of ancient buildings are extant, but they are of little importance. The name of Pina is found in the Tabula, where it is marked as a place of importance; but the distances annexed are confused and erroneous.

PINTIA (Πιντια, Plut. ii. 6, § 50). 1. A town of the Vassaei in Hispanic Tartessos, and according to the Itinerary (p. 443), on the road from Asturica to Caesaraugusta. It is usually identified with Valladolid (Mariana, x. 7; Nonius, Hist. c. 56; Ubert, vol. ii. p. 1. 432). A stone town of the Celtiberi, situated in Hispanic Tartessos, between Libnia and Carionum. (Plut. ii. 6, § 23.) [T. H. D.]

PIINTUARIA INS. [FORTUNATAR INSULAE.]

PION (Πιόν), a hill in the neighbourhood of Ephesus, at the foot of which that city was situated. (Paus. vii. § 5; Plin. v. 31; Strab. xiv. p. 633, where it is called Mount Pion.)

PIONIA (Πιόνια, Ech. Pionitai), a town in the interior of Mycia, on the river Sattisios, to the north-west of Antandrus, and to the north-east of Gargon.
placed a little east of Olympia, and its acropolis probably occupied a height on the western side of the rivulet of Mervia, near its junction with the Alpheius. Strabo (L.c.) says that it lay between the mountains Olympia and Ossa, which can only have been determined on differences of the river. See its position marked in the map in Vol. II. p. 477. (Leake, Morea, vol. ii. p. 211, Peloponnesiac, p. 6; Mure, Tour in Greece, vol. ii. p. 283; Curtius, Peloponnesiac, vol. ii. p. 51.)

PISAE (Πίσαι, Strab. Pol.; Πίσα, Ttol.; Πίσα, Lycoph.; Exk. Pisanae; Πίσα), an important city of Etruria, nor are there the Mynak of the river Arma, a few miles from its mouth. All authors agree in representing it as a very ancient city, but the accounts of its early history are very confused and uncertain. The identity of its name with that of the city of Elia naturally led to the supposition that the one was derived from the other; and hence the foundation of the Italian Pisa was ascribed by some authors to Pelops himself (Plin. iii. 5. s. 8), while others assigned it to a body of settlers from the Peloponnesian Pisa who had accompanied Nestor to Troy, and on their return wandered to this part of Italy. (Strabo. v. p. 222; Serv. ad Aen. x. 179.) Epicurus, the reputed founder of Metapontum, was, accordingly, considered by some writers as the correct iunctor. (Virg. Aen. x. 179; Claudian, R. Gild. 433; Rutil. Itin. i. 565.)

Cato, however, followed a different tradition, and represented the city as founded by the Etruscans under Tarchon, though the site was previously possessed by a people called the Tarentae, who spoke a different tongue. (Cato. v. p. 234; Serv. ad Aen. x. 179.) Virgil also calls it distinctly an Etruscan city, though he derives its more remote origin from Elia; and the tradition reported by Cato seems to prove at least that it was one of the cities of which the Etruscans claimed to be the founders, and which must therefore have been at one period a genuine Etruscan city. On the other hand, Diodorus mentions it among the cities founded or occupied by the Pelaegi in conjunction with the Aborigines (Dionys. i. 20); and there seems to be some reason to regard it as one of the early Pelaegic settlements on the coast of Etruria, which fell at a later period under the power of the Etruscans.

We know almost nothing of Pisa as an Etruscan city, nor are there any remains of this period of its history. But Strabo still found vestiges of its past greatness, and the tradition of its foundation by Tarchon seems to point it to as one of the principal cities of Etruria. Its inhabitants were trained to arms by frequent contests with their neighbours the Ligurians, while they appear to have been one of the principal maritime powers among the Etruscans, and, like most of their contrymen, combined the pursuits of commerce and piracy. (Strab. v. p. 223.)

We have no account of the period at which it became a dependency of Rome; but the first historical mention of its name is in n. c. 225, when the consul C. Atilius landed there with two legions from Sardinia, to punish the treachery of those who had attacked and defeated the Gaulish army near Telamon. (Pol. ii. 27.) It is clear therefore that Pisa was at this time already in alliance with Rome, and probably on the same footing as the other dependent allies of the republic. Its port seems to have been much frequented, and became a favourite point of departure for the Roman fleets and armies whose destination was Gaul, Spain, or Liguria. Thus it was from thence that the consul P. Scipio sailed to Massilia at the outbreak of the Second Punic War (n. c. 218), and thither also that he returned on finding that Hannibal had already crossed the Alps. (Pol. iii. 43, 56; Liv. xxii. 39.) The long-contested wars of the Romans with the Ligurians added greatly to the importance of Pisa, which became the frontier town of the Roman power, and the customary headquarters of the generals appointed to carry on the war. (Liv. xxxiii. 43, xxxiv. 22, xl. 1, sc.) It was not, however, exempt from the evil consequences of its importance. In n. c. 193 B.C., Pisa was suddenly attacked and besieged by an army of 40,000 Ligurians, and with difficulty rescued by the arrival of the consul Minucius (Liv. xxxv. 3); and on several other occasions the Ligurians laid waste its territory. Hence in n. c. 180 the Pisans themselves invited the Romans to establish a colony in their territory, which was accordingly accorded, on condition that the colony should respect the commons of the aboriginal inhabitants, and settle only in the flat and open parts of the country. (Liv. xl. 43.) From this time we hear but little of Pisa; its colonial condition became merged, like that of other "coloniae Latiniae," in that of a municipium, if not of a municipium virilis. (Liv. xxxvii. 29.) It seems to have been there, however, that the Febrobantes consulted the Etruscan god Arpi, and obtained the oracular answer that they would have war before the year 180, which was accordingly celebrated, and in which the war of Pisa and the Ligurians appears to have served as the reason of a memorable victory gained on the 2nd of January, B.C. 181. (Liv. xxxix. 18.)

We have seen above that the ancient city stood on the same site with the modern Pisa, but natural causes have produced such great changes in the locality, that it would be difficult to recognise the site as described by Strabo, were not the identity of the modern and ancient cities fully established. That author, as well as Rutilius and other writers describes the ancient city as situated on the confluence of the rivers Arno and Ausus or Serchio, and distant only 20 stadia (2 miles) from the sea. (Strab. v. p. 222; Plin. iii. 8. s. 14; Rutil. Itin. i. 565-570.)

At the present day it is more than 6 miles from the sea, while the Serchio does not flow into the Arno at all, but has a separate channel to the sea, the two rivers being separated by a tract of land. It is not certain whether the Serchio was attacked and defeated the Gaulish army near Telamon. (Pol. ii. 27.) It is clear therefore that Pisa was at this time already in alliance with Rome, and probably on the same footing as the other dependent allies of the republic. Its port seems to have been much frequented, and became a favourite point of departure for the Roman fleets and armies whose destination was Gaul, Spain, or Liguria. Thus it was from thence that the consul P. Scipio sailed to Massilia at the outbreak of the Second Punic War (n. c. 218), and thither also that he returned on finding that Hannibal had already crossed the Alps. (Pol. iii. 43, 56; Liv. xxii. 39.) The long-contested wars of the Romans with the Ligurians added greatly to the importance of Pisa, which became the frontier town of the Roman power, and the customary headquarters of the generals appointed to carry on the war. (Liv. xxxiii. 43, xxxiv. 22, xl. 1, sc.) It was not, however, exempt from the evil consequences of its importance. In n. c. 193 B.C., Pisa was suddenly attacked and besieged by an army of 40,000 Ligurians, and with difficulty rescued by the arrival of the consul Minucius (Liv. xxxv. 3); and on several other occasions the Ligurians laid waste its territory. Hence in n. c. 180 the Pisans themselves invited the Romans to establish a colony in their territory, which was accordingly accorded, on condition that the colony should respect the commons of the aboriginal inhabitants, and settle only in the flat and open parts of the country. (Liv. xl. 43.) From this time we hear but little of Pisa; its colonial condition became merged, like that of other "coloniae Latiniae," in that of a municipium, if not of a municipium virilis. (Liv. xxxvii. 29.) It seems to have been there, however, that the Febrobantes consulted the Etruscan god Arpi, and obtained the oracular answer that they would have war before the year 180, which was accordingly celebrated, and in which the war of Pisa and the Ligurians appears to have served as the reason of a memorable victory gained on the 2nd of January, B.C. 181. (Liv. xxxix. 18.)
PISAE.

composite capitals, probably belonging to the vestibule of a temple of the age of the Antonines, now embedded in the wall of the ruined church of St. Felice. (Dennis, Eturiae, vol. ii. p. 68.) But numerous sarcophagi from the same period of very superior workmanship, and some fragments

PISAM. (v. 20) under the name of Liburnum; but there is really no authority for this, or for the names of Portus Liburni, and Portus Hercules Liburni employed by modern writers on ancient geography.

The Antonine Itinerary, however, gives a station "Ad Heremium," which, as it is placed 12 miles from Pisa, could not have been far from Leghorn. (Itin. Ant. p. 293.)

Pliny alludes to the existence of warm springs in the territory of Pisa (ii. 103. s. 106). These are evidently the same now called the Bagni di St. Giuliano, situated about 4 miles from the city, at the foot of the detached group of Apennines, which divide the territory of Pisa from that of Lucca. [E. H. B.]

PISANUS PORTUS. [PIRÁK.]

PISATTIS. [PIRA.]

PISAVAE, in Gallia Narbonensis, is placed in the Table at the distance of xviil. from Aquae Sextiae (Aix), and on a road leading towards Glanum (St. Remis). The place is now called Antraise, from Antraise, the name of the Roman town on the Rhone, which was in his day still much frequented and the scene of an active commerce, as at some distance from the city itself. (Rutil. Itis. i. 531—540, 558—565, ii. 12.) But the exact site has been a subject of much controversy. Claudius and other writers place it at the mouth of the Arno, while Martinus places it on the site of Leghorn or Livorno. But this latter port is distant 10 miles from the mouth of the Arno, and 14 from Pisa, which does not agree with the distance given in the Maritime Itinerary; while the mouth of the Arno is too near Pisa, and it is unlikely that the entrance of the river could ever have been without the reach of the Roman citizens, who built the port (without any mention of the river) formed only by a natural bank of sand-reef, which afforded shelter to the vessels that rode at anchor within it. Much the most probable view is that advocated by a local writer (Targioni Toscani), that the ancient Portus Pisanae was situated at a point between the mouth of the Arno and Leghorn, and is probably the small port on the island about half a mile from the latter city, near an old church of St. Stefano.

The distance of this spot agrees with that of the Maritime Itinerary, and it is certain from mediæval documents that the Porto Pisa, which in the middle ages occupied the port, was under the jurisdiction of the city of Livorno, as shown in the Tabula of Arduini, and in the Torre of the same name, dedicated to the Tabula of Turriti. (Rutil. Itis. i. 527; Tab. Penn.)

There is every probability that the Porto Pisa of the middle ages occupied the same site with the Roman Portus Pisanus, which is mentioned by P. Dianus as still in use under the Lombard kings, and again by a Frankish chronicler in the days of Charles the Magne (P. Dianus, Hist. Lang. vii. 61; Amoin. Rev. Franc. iv. 9); and there is no doubt that the mediæval port was quite distinct from Livorno. The latter town, which has become one of the most important trading places in Italy, was in the 13th century an obscure village, and did not rise to consideration till after the destruction of the Porto Pisa. But it seems probable that it was occasionally used even in ancient times, and is the Labro noticed by Cicero (ad Q. Fr. ii. 6) as a seaport near Pisa. It has been supposed also to be already mentioned by Zosimus.
ACTINUM, B.C. 31. (PLIN. ANTIQUE 60.) It appears, however, to have been restored, and peopleed with fresh colonists by Augustus, for we find it bearing in inscriptions the titles of "Colonia Julia Felix;" and though Pliny does not give it the title of a colony, his expression that it ranked under the city of Trier is abundantly proved by inscriptions. (PLIN. III. 14. a. 19; ORELL. INSCR. 81, 3143, 3698, 4069, 4084.) From the same authority we learn that it was a place of some trade, and that vessels were built there, so that it had a "Collegium Fabrorum Na.
valium." (TB. 4084.) The port was undoubtedly founded by Tiberius, which still affords it a harbour for small vessels. Its position on the great Flaminian Way also doubtless secured to Pisaenum a certain share of prosperity as long as the Roman empire continued; but it was always inferior to the neighbouring Fabrum Fortunae. (EML. II. 6. 5 § 5; PROV. III. I. 6. 22; ASIN. ANTIQUE 100, 128; RIC. HIST. P. 615; TOBI.)

During the Gothic Wars Pisaenum was destroyed by Vitiges, but partially restored by Belisarius (PROCOG. B. G. III. 11); and rose again to prosperity under the exarchate of Ravenna, and became one of the cities of the Pentapolis. (GEOGR. RAV. IV. 31; P. HIST. HIST. LONG. II. 19.) The modern city of Pesaro is still a flourishing place; but has no remains of antiquity to excite any especial interest. Several inscriptions, which have been collected and published with a learned commentary by the Abate Olivieri. (MAR. PISANEAE, fol. PISANEAE 1738.) [E. H. B.]

PISCINEAE, enumerated by Pliny (III. 4. 5) among the Oppida Latins of Gallia Narbonensis. It is generally assumed to be represented by Pescinae in the map of Augustine of Hippo. (FRED. PLIN. VIII. 48. 72.) since a town of the same name, which PLIN. speaks of as a wool that was grown about Piscineae, which was more like hair than wool. [G. L.]

PISIDAI. [NEKO.]

PISIDA, a municipium and station on the Roman road running along the coast-line of Syrcas, 20 M. F. from Cyparissus; Taberna (Tabernum), and 30 M. P. from Villa Magna (Kokali). (ABIT. ANTIC. PONT. TAB.) Potemly has a harbour, Pisidion Portus (ΠΙΣΙΔΙΟΝ ΛΙΜΕΝ, IV. 3. 12), on the coast, which is represented by the harbour of Barakali or Bregia. (BAR. WANDERUNGEN, P. 271.) [B. E. J.]

PISIDIA (ΠΙΣΙΔΙΑ; Exk. PISOBI, PISIDE), a province in the south of Asia Minor, which was in the earlier times always regarded as a part of Phrygia or Pamphylia, but was constituted a separate province in the division of the Roman empire made by Constantine the Great. It bordered in the east on Isauria and Cilicia, in the south on Pamphylia, in the west on Lycaia, Caria, and Phrygia, and in the north on Phyrgia Paroies; but it is almost impossible to mark the exact boundary lines, especially in the north and north-west, as the northern parts of Pisida are often treated as parts of Phyrgia, to which they originally belonged, and from which they are sometimes called Phyrgia Pisida, or Φυργια Πισιδια; but Amyntas separated them from Phyrgia and united them with Pisida. (Strab. XU. 21. 1. 4. 6. 5. 6. 58; DIOSYR. PISIDE 536; &c.; PIV. V. 94; HIEROPL. P. 662, &c., 679, &c.) The country, which was rough and mountainous, though it contained several fertile valleys and plains, which admitted of the cultivation of olives (Strab. L. C.), was divided into several districts, with separate names. The south-western district bordering on Lycaia was called Milias, and another adjoining it bore the name of Callabia. The mountains traversing Pisida consist of ramifications of Mount Taurus, proceeding from Mount Cadyms in Phrygia, in a south-eastern direction, and assuming in the neighbourhood of Termessus the name of Colophon, which runs under the name of the borders of Milies that of Climax. (POTH. TB. 72; STRAB. X. 666.) These mountains contain the sources of the rivers Catacysthites and Cestus, which flow through Pisida and Pamphylia into the bay of Pamphylia. The principal products of Pisida were salt, the root iris, from which perfumes are manufactured, and the olive oil, which was much recommended by ancient physicians. (Strab. XU. 55, XUL. 39, XUL. 39; STRAB. XII. P. 570.) Pisidia also contained several lakes, some of which are assigned to Phrygia or Lametia, e.g. Coralia and Trojanus (Strab. XU. P. 568), the great salt lake Ascania, and Pausias or Pongonas, which is mentioned only by ancient writers. (NIC. CIRAM. Z. 50; CINNAM. HIST. II. 8.)

The inhabitants of Pisida must in a great measure have belonged to the same stock as the Phrygians, but were greatly mixed with Cilikians and Isaurians. They are said to have at first been called Solymi (STEPH. B. S. s. v.); they were warlike and free mountaineers who inhabited those parts and ravines, which were looked upon by the Greeks as barbarians. They were never subdued by neighbouring nations, but frequently harassed the adjoining countries by predatory inroads. (XENOPH. ANAB. I. 3. 5; II. I. 5. 3; &c.; STRAB. XII. P. 130, P. 569, IV. 670, LIV. 17. 38.) Even the Romans were scarcely able to subdue these people, who inhabited those parts and ravines. After the defeat of Antiochus, Pisida was, with the rest of Asia, given to Eumenes, but had to be conquered by the Romans themselves, and then formed the beginning of what subsequently came to be the province of Cilicia, which, about 136 B. C., the three Phrygian districts of Lycaia, Isauria, and Pamphylia, as a separate part of Pisida are now inhabited by the Karamanians, a wild and rapacious people, whose country is little visited by travellers, and consequently little known; but Pisida in general corresponds to that portion of Asia Minor comprised within the government of Lesbos. [L. S.]

PISIUM (ΠΙΣΙΜΟ), a small town of Carea, between Calindea and Caunus, of uncertain site. (Strab. XU. P. 651.)

PISIGARA or PISIGARIA (ΠΙΣΙΓΑΡΙΑ or ΠΙΣΙΓΑΡΙΑ), a town of uncertain site in Armenia Minor. (PROV. VII. 7. 4.) [L. S.]

PISIGARA, according to an inscription (PIRRO. EPISTOR. S. 77) and Dio- scorus, was a town of the Cilician Turias in Isianus Tarraconensis, now the Piso-

era. (UKERT. VOL. II. P. 290.) [T. H. D.]

PISSEKUM (ΠΙΣΎΣΚΟΥ), a town of Pegasus in Epirus, the exact site of which is unknown. (YPH. V. 108; STAB. S. V.)

PISSANTII. [DIABARETAR.]

PISTORIA (ΠΙΣΤΟΡΙΑ; Exk. PISTORIA; PI-
PISTYRUS.

(toja), a town of Etruria, situated in the northern part of that province at the foot of the Apennines, and on the direct road from Florence to Luca, at the distance of 25 miles from each of those cities. (Itin. Ant. p. 284.) We have no account of it as an Etruscan town, nor has it any remains which belong to that people; under the Romans it seems to have been as important as its town of no great importance. (Plin. iii. s. 5; Strabo. iii. § 48; Itin. Ant. l.c.) Its name is known in history only in connection with the final defeat of Catullus, n. c. 62. That general had assembled his forces in the neighbourhood of Faesulae: but on learning the discovery and failure of the conspiracy at Rome, he drew them off into the territory of Pistoria (as agrum Pistorium), with the view of making his escape across the Apennines into Cisalpine Gaul. But finding its retreat on that side cut off by Metellus Celer, while he was closely pressed by the consul C. Antonius in his rear, he suddenly turned upon the latter and gave him battle, but was cut to pieces with the whole of his remaining forces. For some time it appears that the battle must have been fought in the mountains on the confines of the Pistorian territory, which apparently adjoined that of Faesulae; but we have no more precise clue to its locality. Pistoria is mentioned by Ammianus Marcellinus, at a late period of the Roman Empire, as one of the municipal towns of the district called Tuscia Annonaria (Amm. Marc. xxvi. 3. § 11), but it seems to have never been a place of much consideration in ancient times, and first rose to importance in the middle ages. Pistoria now is a considerable town, and is the see of a bishop. [E. H. B.]

PISTYRUS (Πιστύρος), a city and lake in Thrace, which the army of Xerxes passed on its way from Naxus. (Herod. vi. 105.) The lake is described by Herodotus as 30 stadia in circumference, full of fish, and exceedingly salt. The town is called by Stephanus B. Pistoria or Bistiris (α. ς. Πιστύρος, Βιστίρος). Others have the form Pisteira. (Πιστεῖρα, Harpocr. p. 124; 11; Schol. ad Aesch. Pers. 29)

PISTYRIA (Πιστύρια), a city of Cilicia, between Celeris and Seleucis, 45 stadia to the west of Cape Crani, and to the right of the island of Crambusa. (Stadiarum. Mar. Mag. §§ 172, 173.)

PISTE or PITYE (Πιστή, Πιθή; Εθ. Πιστηρή, Πιθηρη), a town of Caria, of which the site is unknown. (Steph. B. s. v.; Constant. de Theb. l. 14, p. 32, ed. Bomn.)

PIATAUM (Plin. v. 29; Πιταών αδες; Εθ. Πιταώες, Steph. B. s. v.; it is not certain if a town of Caria, or of uncertain site.

PIITANE (Πιτανή; Εθ. Πιταναώες), an ancient city on the coast of Asia Minor, was situated near the mouth of the river Evros on the borders of Thrace, one of the eleven ancient Aeolian settlements, and possessed considerable commercial advantages in having two harbours. (Herod. i. 149; Schol. p. 37; Strab. xiii. pp. 581, 607, 614.)

It was the birthplace of the academic philosopher Arcesilus, and in the reign of Titus it suffered severely from an earthquake. (Oros. vii. 12; comp. Plut. v. 2. § 4; Steph. B. s. v.; Plin. v. 23, xxiv. 49; Or. Met. v. 337.) The town is still mentioned in Hierocles, and its site is universally identified with the modern Tschawdeli or Sonderli. Pliny (l. c.) mentions its vicinity a river Canusus, which is not noticed by any other writer; but it may possibly be the river Pitane, spoken of by Ptolemy (iii. 2. § 3), and which seems to derive its name from the town of Pitane. [L. S.]

PIITANE. [Σπάρτα.]

PITHECUSAE INSULAE. [Ἀκράμαλα.]

PITHÔM. [Πατίμων.]

PITINUM (Πιτίνιον), a town of the Vestini, known only from the Tabula Peutingeriana, which places it on a line of road from Interocera (Ἀντιόρδασος) to Aveia. But the stations on each side of it, Priernum and Eruli, are both unknown, and the distances probably correct. Hence, this itinerary affords us no real clue to its position. But Holstenius has pointed out that the name is retained by the Torre di Pitino, about 2 miles N. of Agnano, and has also shown that in the middle ages Pitinum still subsisted as a city, and was an episcopal see. (Tab. Peut.; Holsten. Not. ad Chreer. p. 139; Romanelli, vol. iii. p. 280.) [E. H. B.]

PITULUM (Πιτιλόμος; Πιλό), a town of Umbria, mentioned only by Pliny (iii. 14. s. 19), who enumerates among the towns of Umbria, "Pitilum, cognomine Pilantives et alii Mergentinii." Both names are otherwise unknown, but according to Cluverius there is a village called Piló in the Apennines between Camerino and Matricula, which probably retains the name of one or the other. (Cluver. Ital. p. 814.) [E. H. B.]

PITYEIA (Πίτυεια; Δήμος, Πίτυεια), a town of Myias, on the coast of the Propontis, between Parium and Priapua. It is mentioned even in the time of Homer. (Ili. i. 829; comp. Apollon. Rhod. i. 933; Strab. xiii. 588; Steph. B. s. v.) It is said to have derived its name from the fires which grew there in abundance, and is generally identified with the modern Skamēkē. [L. S.]

PITYODES (Πιτυόδης), a small island in the Propontis off the coast of Bithynia, near Cape Hyris, and 110 stadia to the north of Cape Acriras. (Plin. v. 44; Steph. B. s. v. Πιτυόδης, who speaks of several islands of this name, which is the same as Πιτυόδης.) The island is probably the one now called Boguk Ada, where Pococke (vol. iii. p. 147) found remains of an ancient town. [L. S.]

PITYONESOS, a small island in the Sannic gulf, lying between Aegina and the coast of Epidaurus, and distant 6 miles from the latter. (Plin. iv. 12. s. 19.)

PITYUS (Πιτυος; Πίτυος), a Greek town in Attic Carystia, on the north-eastern coast of the Black Sea, N. of Dioscurias, from which it was distant 260 stadia according to Artemidorus, and 350 according to Arrian. The real distance, however, is understated by these writers; for from C. Isteria (Dioscurias) to Pityus is not less than 400 stadia in a straight line. (Artemidor. ap. Strab. xi. p. 496; Arrian, Per. F. Eux. p. 18.) Artemidorus described it as the great Pityus, and Pliny as an "opisthion opulentissimum;" but between the time of Artemidorus and Pliny it was described by the Hemiochi (Plin. v. 5), whence Arrian mentions it only as a place for anchorage, and the name does not occur at all in Ptolemy. The town was afterwards rebuilt by the Romans, and is described by Zosimus (l. 29.), in the history of Gallienus, as a fortress surrounded with a very great wall, and having a most excellent harbour. (Comp. Procop. En. Goth. iv. p. 473, ed. Bomn; comp. C. Müller, ad Arrian. L. c. ap. Geogr. Graec. Min. vol. i. p. 592.)

PITYUSA (Πιτυούσα or Πιτυουσα), a contr. of
PITUSAE.

Pitúsa, literally, "abounding in pine-trees."
1. An island off the promontory Scyllæum, or Bucephala, in Tresension in Argolis. (Paus. ii. 34. § 6.) Pliny mentions (v. 12. a. 19) an island Pituse in the Argolic gulf, but from the order in which it occurs in Pliny, it would seem to be a different island from the preceding.

One of the Pomerani in the Propontis, according to Herod. (s. e. [Demonstr.]

PITUSAE (Pitúsa or Pitúsa), Strab. iii. p. 167; Pol. ii. 6. § 77; two islands on the S. coast of Spain, 700 stadia, or nearly 100 miles from Dianium (Plin. iii. 5. a. 11; Liv. xxvii. 37). Their position is thus defined by Diodorus (v. 17): they are three nights' and days' sail from the Colossus of Rhodes; Lev. i. 15; Liv. ii. 3; Plin. xx. 245, and one day and night from Libya; whilst, according to the Itinerary (p. 511), they were 300 stadia from the Balearics, and 400 from Carthage Spara- taria, or Carthaginea. The larger of the two islands was called Eubusus (Eubusus, Pol. L c), the smaller Ophiussus (Ophiussus, Bk.); and as they are almost unapproachable from the main land, and as Eubusus, from its great size, was unimportant, they are sometimes confounded together as one island by the ancients (Diod. v. 16; Liv. l. c.; Diodor. i. 92, &c.).

Their name of Pitusae was derived, like that of many other ancient places, from the abundance of pine-trees which grew upon them. They were 46 miles in extent. Diodorus, and their circumference Eubusus with a Circumferentor for size; and according to Strabo (l. c.) it was 400 stadia in circumference, and of about equal length and breadth. It was hilly in some parts, and not very fruitful, producing but little oil and wine; but its fruits were good, and it afforded excellent pasturage. Snakes and noxious animals were not found on it; whilst, on the contrary, the smaller island contained in it deer as to such a degree that it seems to have taken its name from them (Pli. iii. 14. xx. 21, lxxix. 59, &c.; Mela, ii. 7; Avien. Describ. Orb. 621, &c.). The chief town, also named Eubusus, which lay on the SE. side of the island, was a civitas foederata, and had a mint. (Ramus, Cod. A. v. abs. Græc. et Lat. Mss. Roma. De Aegypto, in virginibus, with a good harbour, and was the resort of many barbarians and foreigners, especially Phoenixians. (Strab. Mela, Diod. L c. c.) The larger island is now Tinos, the smaller, Formentara. [T. H. D.]

PLACENTIA. (Placentia: It. Placentia; Placencia), a city of Galla Cisapane, situated near the S. bank of the Po, just below the point where it receives the waters of the Trebbia. It was on the Via Asinaria, of which it originally formed the terminus, that road being in the first instance carried from Ariminum to Placentia; and was 40 miles distant from Parma. We have no account of the existence of a town on the spot previous to the establishment of the Roman colony, which was settled there in n. c. 219, after the great Gallic war, and the same time with Cremona. (Liv. Epit. xx.; Vell. Pat. I. 14; Pol. iii. 40; Ascon. in Plac. p. 3.) It consisted of not less than 6000 colonists, with Latin rights. But the new colony was scarcely founded, and its walls hardly completed, when the news of the approach of Hannibal produced a general rising of the native Gallic tribes, which attacked Placentia, ravaged its territory, and drove many of the colonists to take refuge at Mutina; but were unable to effect anything against the city itself, which was still in the hands of the Romans in the following year, and became the head-quarters of the army of Scipio both before and after the battle of the Trebbia. (Pol. iii. 40. 66; Liv. xvi. 35. 56, 59. 63; Appian, Hann. 5. 7.) At a later period of the same war, in n. c. 209, Placentia was one of the colonies which proved faithful to Rome at its greatest need, and came forward readily to furnish its quota of men and arms for the war, whereas the older colonies had failed in doing so. (Liv. xxvii. 16.) Shortly after this it withstood the arms of Hadrian, who was induced to lay siege to it, after he had crossed the Alps and descended into Carnyx Gaul, and by so doing lost a great deal of valuable time. After a protracted siege he was compelled to abandon the enterprise, and contented himself with the greater part of the inhabitants into captivity. (Id. xxxi. 10.) After the victory of the consul L. Pa- quius Quinctillius Varus, in 9 B.C., an occasion was restored to the colony; and a few years afterwards L. Vatinius###

---

- The text is difficult to understand due to the fragmented nature and the errors in referencing.

---

- The text appears to be a historical account, possibly discussing the locations of Pituse and Placentia, with some mention of Roman colonial settlements and historical events. However, the coherence and accuracy of the text are compromised by the disorganization and errors.
colony, both Pliny and Tacitus giving it this title (Plin. iii. 15. a. 20; Tac. Hist. ii. 19): it had probably received a fresh colony under Augustus. We learn from Tacitus (L.c.) that it was one of the most flourishing and populous cities of the district of Gallia Cispadana; and though of no natural strength, being situated in an open plain, it was well fortified. For the town is bounded by a line from Via Aemilia, and through it is noticed by St. Ambrose, towards the close of the fourth century, as sharing in the desolation that had then befallen the whole of this once flourishing province (Ambro. Ep. 39), it survived all the ravages of the barbarians; and even after the fall of the Western Empire it was a town of some importance. It was there that the Orestes, the father of the unhappy Augustinus, was put to death by Odacer, in A. D. 476. (P. Diss. Hist. Miscell. iv. p. 568.)

Procopius also mentions it during the Gothic wars as a strong fortress and the chief city of the province of Aemilia. It was only taken by Totila, in A. D. 546, by famine. (Procop. B. G. iii. 16, 17.) Considerable later than the Roman period. (P. Diss. Hist. Miscell. iv. 18;) a position which it preserved throughout the middle ages. At the present day it is still a flourishing and populous place, with about 30,000 inhabitants, though partially eclipsed by the superior importance to which Parma has attained since it became the capital of the reigning dukes. There are no remains of antiquity.

Placentia was undoubtedly indebted for its prosperity and importance in ancient times, as well as in the middle ages, to its advantageous situation for the navigation of the Po. Strabo (v. p. 215) speaks of the navigation from thence to Havenna, as if the river first began to be navigable from Placentia downwards; but this is not quite correct. The city itself lay at a short distance from the river; but it had an empirium or port on the stream itself, probably at its confluence with the Trebia, which was itself a considerable town. This was taken and plundered by Hannibal in b. c. 218. (Liv. xxii. 57; Tac. Hist. ii. 19.)

It is clearly mentioned that the Via Aemilia, as originally constructed, led from Ariminum to Placentia, a distance of 178 miles. It was afterwards continued from the latter city to Dertona, from whence a branch proceeded across the Appennines to Genoa (Strab. v. p. 171); while another line was carried from Placentia across the Po direct to Mediolanum, a distance of 120 miles, and thus communicated with the whole of Gallia Transpadana. (Itin. Ant. pp. 98, 127, 258; Itin. Hier. p. 616; Toit. Pet.)

**PLACIA (ПЛЯЦИЯ: Eth. ПЛЯЦИАРЬ), an ancient Pelasgian town in Mycia Olympene, at the foot of Mount Olympus, and on the east of Cyzicus. The place seems to have decayed or to have been destroyed at an early time, as it is not mentioned by later writers. (Herod. i. 57; Scylax, p. 35; Dionys. Hal. i. 23; Stephan. B. s. a. Pidean.)**

**PLACUS (ПЛАКУС), a woodly mountain of Mycia, at the foot of which Thespis is said to have been situated in the iadai (vi. 397, 425, xxii. 479); but Strabo (xiii. p. 614) was unable to learn anything about such a mountain in that neighbourhood. [See PLESCAS.]**

**PLESIA.**

**PLEJURANIA. [ЛУБУРЬЯНЯ.]**

**PLANEIRIA INS. [ФОРТУМУТАР ИНСУЛАЕ.]**

**PLANASIA. [ПЕЛИНА; ЛИБОНА.]**

**PLANASIA.**

**PLANASIA.**

**PLANASSIA, a small island in the Tyrrenhian see, about 10 miles SW. of Ilyta (ИЛЯ), and nearly 40 from the nearest point on the coast of Etruria. It is about 3 miles long by 23 in width, and is low and flat, from whence probably it derived its name. (Plin. iii. 6. a. 12; Procl. i. 1. § 79; Itin. Marius, p. 515.) The Maritime itinerary reckons it 39 miles from Pisa. Strabo says (v. p. 718) that Pliny calls the same distance 38 miles; but this is evidently a mistake for its distance from the mainland. It is remarkable that Pliny mentions Planaria and Planasia as if they were two distinct islands, enumerating the one before and the other after Ilyta; but it is certain that the two names are only different names of the same island, and have been given to the same island. (Varro, Ital. p. 504; Harduin, Ath. iii. 3; Plin. l. c.) In Varro's time it seems to have belonged to M. Piso, who kept large flocks of sheep on the wild state. (Varr. R. R. iii. 5.) It was subsequently used as a place of banishment, and among others it was there that Postumus Agrippa, the grandson of Augustus, spent the last years of his life in exile. (Paul. Aell. l. i. 5; Dion Cass. l. iv. 53, 67; Suet. Aug. 65.) Some ruins of Roman buildings still remain in the island; and its quarries of granite seem to have been certainly worked in ancient times. It is now inhabited only by a few fishermen. [E. H. B.]

**PLANESIA (Плаензия, Strab. iii. p. 189), an island in the Sinus Illinis, on the S. coast of Hispania Tarraconensis, now Isola Piana. [T. H. D.]**

**PLATEA.**

**PLATEA or PLATEAE (ПЛАТЕА, Hom. Herod.; ПЛАТЕА, Thuc. Strab. Paus., &c.; Eth. ПЛАТЭИДС, Plateensis), an ancient city of Boeotia, was situated upon the frontiers of Attica at the foot of Mt. Olithaeron, and between that mountain and the river Asopus, which divided its territory from that of Thebes. (Strab. iv. p. 411.) The two cities were about 61 miles apart by the road, but the direct distance was little more than 5 geographical miles. According to the Thebans Platea was founded by them (Thuc. iii. 61); but Pausanias represents the Plateans as indigenous, and according to their own account they derived their name from a river in Boeotia. (Paus. i. 1. § 1.) Platea is mentioned in Homer among the other Boeotian cities. (Il. 504.) In a. c. 519 Platea, unwilling to submit to the supremacy of Thebes, and unable to resist her powerful neighbour with her own unaided resources, formed a close alliance with Athens, to which she continued faithful during the whole of the Peloponnesian war. (Herod. vi. 198; Thuc. iii. 68.) She sent 1000 men to the assistance of Athens at Marathon, and shared in the glories of that victory. (Herod. l. c.) The Plateans also fought at Artemisium, but were
not present at Salamis, as they had to leave the fleet in order to remove their families and property from the city, in consequence of the approach of the Persian army. (Herod. viii. 44.) Upon the arrival of the Persians shortly afterwards their city was burnt to the ground. (Herod. viii. 50.) In the following year (B.C. 479) their territory was the scene of the memorable battle, which delivered Greece from the Persian invaders. The history of this battle illustrates so completely the topography of the Platæan territory, that it is necessary to give an account of the different positions taken by the contending forces (See accompanying Map). Mardonius proceeded from Attica into Boeotia across Mount Parnes by the pass of Deceleia, and took up a position on the bank of the Asopus, where he caused a fortified camp to be constructed of 10 stadia square. The situation was well selected, since he had the friendly city of Thebes in his rear, and was thus in no danger of falling short of provisions. (Herod. ix. 13.) The Grecian army crossed over from Attica by Mt. Cithaeron; but as Pausanias did not choose to expose his troops to the attacks of the Persian cavalry on the plain, he stationed them on the slopes of the mountain, near Erythrae, where the ground was rugged and uneven. (See Map, First Position.) This position did not, however, altogether preserve them; but, in an attack made by the Persian cavalry, a body of 300 Athenians repulsed them, and killed their leader Mæsitius. This success encouraged Pausanias to descend into the territory of Platæa, more especially as it was better supplied with water than his present position. Marching from Erythrae in a westerly position along the roots of Mt. Cithaeron, and passing by Hysiae, he drew up his army along the right bank of the Asopus, partly upon hills of so great height and partly upon a lofty plain, the right wing being near the fountain Gargaphia, and the left near the chapel of the Platæan hero Andromachus. (Herod. ix. 25—30.) Mardonius drew up his army opposite to them on the other side of the Asopus. (See Map, Second Position.) The two armies remained in this position for some days, neither party being willing to begin the attack. The Persians assailed the Greeks at a distance with their missiles, and prevented them altogether from watering at the Asopus. Meantime the Persian cavalry intercepted the convey of provisions proceeding to the Grecian camp, and on one occasion drove away the Laceraomiasts, who occupied the right wing from the fountain Gargaphia and succeeded in choking it up. This fountain had been of late the only watering-place of the Greeks; and as their ground was now untenable, Pausanias resolved to retreat in the night to a place called the Island (νησος), about 10 stadia in the rear of their present position, and halfway between the latter and the town of Platæa. The spot selected, improperly called an island, was, in fact, a level meadow, comprised between two branches of the river Oreo, which, rising from distinct sources in Mt. Cithaeron,
and running for some space nearly parallel with one another, at length unite and flow in a westery direc-
tion into the gulf of Corinth. (Herod. ix. 51.) The
nature of the ground would thus afford to the
Greeks abundance of water, and protection from the
enemy's cavalry. The retreat, however, though for
so short a space was effectual so as to make all con-
fusion. The Greek centre, chiefly composed of Me-
garians and Corinthians, probably fearing that the
island would not afford them sufficient protection
against the enemy's cavalry, did not halt till they
reached the temple of Hera, which was in front of
the town of Platea. The Lacedaemonians on the
right wing were delayed till the day began to dawn,
by the obstinacy of Amopharetus, and then began to
march across the hills which separated them from
the island. The Athenians on the left wing began
their march at the same time, and got round the
hills to the plain on the other side on their way to
the island. After marching 10 stadia, Pausanias
halted on the banks of the Molos, at a place called
Agrigopias, where stood a temple of the Eleusinian
Demeter. Here he was joined by Amopharetus, and
here he had to sustain the attack of the Persians,
who had rushed across the Asopus and up the hill
after the retreating foe. As soon as Pausanias was
over taken by the Persians, he sent to the Athenians
to entreat them to hasten to his aid; but, being
seen by the Persians prevented them from doing so.
Accordingly the Lacedaemonians and Tegeans had to
encounter the Persians alone without any assist-
ance from the other Greeks, and to them alone
belonged the glory of the victory. The Persians were
defeated with great slaughter, nor did they stop in
their flight till they had again crossed the Asopus
and most of the Boeotians were driven into a com-
fusion, as many as 600 were cut to pieces by the
Theban force. Meantime the Lacedaemonians pur-
sued the Persians to the fortified camp, which, how-
ever, they were unable to take until the Athenians,
more skilled in that species of warfare, came to their
assistance. The barricades were then carried, and a
dreadful battle ensued. With 40,000 men, 40,000 of
which were recruited from the Locrians, and 400,
who retreated with Arrabaxus, only 3000 of the
original 300,000 are said to have escaped. (Herod. ix.
50—70.) On the topography of this battle, see Leake,
Thus this signal victory had been gained on the soil of
Platea, its citizens received especial honour and regu-
lar salaries, and the public money was expended in the
large sum of 80 talents granted to them, which
they employed in erecting a temple to Athens, but
they were charged with the duty of rendering every
year religious honours to the tombs of the warriors
who had fallen in the battle, and of celebrating every
five years the festival of the Eleusinian in com-
memoration of the affair. This festival was known as
the Persian vokes. The festival was sacred to Zeus
Eleutherius, to whom a temple was now erected at
Platea. In return for these services Pausanias and
the other Greeks swore to guarantee the independence
and inviolability of the city and its territory (Thuc.
ii. 71; Plut. Arist. c. 19—21; Strab. i. p. 418;
vantage of it to restore the Plataeans to their native city. (Paus. ix. 1. § 4; Isocrat. Plata. § 13, seq.) But the Plataeans did not long retain possession of their city, for in b.c. 373 it was surprised by the Thebans and again destroyed. The Plataeans were compelled once more to seek refuge at Athens. (Paus. ix. 1. § 4; Diodor. xiv. 46.) The wrongs done to the Plataeans by the Thebans are set forth in a speech of Isocrates, entitled Plataicus, which was perhaps actually delivered at this time by a Plataean speaker before the public assembly at Athens. (Grote's Greece, vol. i. p. 230.) After the battle of Chaeroneia (b.c. 338) the Plataeans were once more restored to their city by Philip. (Paus. ix. 1. § 6; Herod. Lxxx. 27.) It was shortly after this time that Plataea was visited by Dicaearchus, who calls the Plataeans Αθηναίοι Βουκέριοι, and remarks that they have nothing to say for themselves, except that they are colonists of the Athenians, and that the battle between the Greeks and the Persians took place near their town. (Descript. Græc. p. 14, Herod. Lxxx. 27.)

After its restoration by Philip, the city continued to be inhabited till the latest times. It was visited by Pausanias, who mentions three temples, one of Hera, another of Athena Areia, and a third of Demeter Eleusina. Pausanias speaks of only one temple of Hera, which he describes as situated within the city, and to which the adoration and veneration of the Athenians was transferred. (Paus. ix. 4. § 1) The temple of Athena Areia was built according to Pausanias (ix. 4. § 1) out of a share of the spoils of Marathon, but according to Pintarch (Aríst. 20) with the 80 talents out of the spoils of Plataea, as mentioned above. The temple was adorned with pictures by Polygnotus and Onatas, and with a statue of a goddess. Of the temple of Demeter Eleusina we have no details, but it was probably erected in consequence of the battle having been fought near a temple of Demeter Eleusina at Argos. (Herod. i. 57.) The temple of Zeus Eleutherius (Strab. i. p. 413) seems to have been reduced in the time of Pausanias to an altar and a statue. It was situated outside the city. (Paus. ix. 2. §§ 5-7.)

Plataea is mentioned in the sixth century by Hierocles (p. 645, Wesseling) among the cities of Boeotia; and its walls were restored by Justinian. (Procop. de Aedif. iv. 2.)

The ruins of Plataea are situated near the small village of Kòkki. The circuit of the walls may still be traced in great part. They are about two miles and a half in circumference; but this was the size of the city restored by Philip, for not only is the earlier city, before its destruction by the Thebans, described by Thucydides (ii. 77) as small, but we find at the southern extremity of the existing remains more ancient masonry than in any other part. (Paus. ix. 4. § 1; Diodor. xiv. 46.) The Dioscuri, we are told, occupied a part of the ancient city, and their temple was situated on a hill near the sea. It seems certain that the Dioscuri occupied a part of the ancient city, and their temple was situated on a hill near the sea. It seems certain that the Dioscuri occupied a part of the ancient city, and their temple was situated on a hill near the sea. PLEAURON. 641

1. OLD PLEAURON (ὁ παλαντιὸς Πλευρών, Strab. x. p. 451), was situated in the plain between the Achean and the Euenus, W. of Calydon, at the foot of Mount Curium, from which the Curetes are said to have derived their name. Pleuron and Calydon (Strab. x. p. 450) share the town name of Aetolia in the heroic age, and are said by Strabo (x. p. 450) to have been the ancient ornaments (ὑπομνήματα) of Greece. Pleuron was originally a town of the Curetes, and its inhabitants were engaged in frequent wars with the Aetolians of the neighbouring town of Calydon. The Curetes, whose attack upon Calydon is mentioned in an episode of the Iliad (ix. 239), appear to have been the inhabitants of Pleuron. At the time of the Trojan War, however, Pleuron was an Aetolian city, and its inhabitants sailed against Troy under the command of the Aetolian chief Theseus, the son (not the grandson) of Oeneus. (Il. xii. 639, comp. xiii. 217, xiv. 116.) Ephorus related that the Curetes were expelled from Pleuron, which was formerly called Curetes by the Aetolians (ibid. x. p. 465); and this tradition may also be traced in the statement of Thucydides (iii. 109) that the district, called Calydon and Pleuron in the time of the Peloponnesian War, formerly bore the name of Aetolia. Since Pleuron appears as an Aetolian city in the later period of the heroic age, it is represented in some traditions as the birthplace of Peleus, and hence it is said to have derived its name from Pleuron, a son of Aetolus; and at the very time that some legends represent it as the capital of the Curetes, and engaged in war with Oeneus, king of Calydon, others suppose it to have been governed by the Aetolian Theseus, the brother of Oeneus. Theseus was also represented as the father of Peleus, and hence Pleuron had an heroon or a chapel at Sparta, as being the ancestor of Leda, the daughter of Theseus. But there are all kinds of variations in these traditions. Thus we find in Sophocles Oeneus, and not Theseus, represented as king of Pleuron. (Apollod. i. 7. § 7; Pas. iii. 14. § 8; Soph. Trach. 7.) One of the tragedies of Phrynichus, the subject of which is the death of Meleager, the son of Oeneus, was entitled Πελεονώνας, or the “Pleuromanian Women,” and hence it is not improbable that Phrynichus, as well as Sophocles, represented Oeneus as king of Pleuron. (Pas. x. 31. § 4.) Pleuron is rarely mentioned in the historical period. It was abandoned by its inhabitants, says Strabo, in consequence of the ravages of Demetrius, the Aetolian, a surname probably given to Demetrius II., king of Macedon (who reigned B.C. 239—229), to distinguish him from Demetrius Poliorcetes. (Strab. x. p. 451.) The inhabitants now built the town of

2. NEW PLEAURON (Ἠ παλαντιὸς Πλευρών), which was situated at the foot of Mt. Arachthus. Shortly before the destruction of Corinth (B.C. 146), we find Pleuron, which was then a member of the Achaean League, petitioning the Romans to be disfarved from it. (Pas. vii. 11. § 3.) Leake supposes, on satisfactory grounds, the site of New Pleuron to be represented by the ruins called κάστρο Άρακθους, on a platf. Eburneum, E. of the Castle of Lady Irene, about one hour’s ride from Mesolonghi. These ruins occupy the broad summit of one of the steep and rugged heights of Mt. Zogga (the ancient Arachthus), which bounds the plain of Mesolonghi to the north. Leake says that the walls were about a mile in circumference, but More and Dodwell describe the circuit as nearly two miles. The most remarkable
remains within the ruined walls are a theatre about 100 feet in diameter, and above it a cistern, 100 feet long, 70 broad, and 14 deep, excavated on three sides in the rock, and on the fourth constructed of masonry. In the acropolis Leake discovered some remains of Doric shafts of white marble, which he conjectured might be added to the temple of Athena, of which Dicaearchus speaks (l. 55); but the temple mentioned by Dicaearchus must have been at Old Pleuron, since Dicaearchus was a contemporary of Aristotle and Theophrastus, and could not have been alive at the time of the foundation of New Pleuron. Dodwell, who visited the ruins of this city, erroneously maintains that they are those of Oenoeis, which were, however, situated among the marshes on the other side of the Acheleus. Leake places Old Pleuron further south, at a site called Gephyro-bastro, on the edge of the plain of Mesolonghi, where there are a few Hallianic remains.

PLINTHINE (Πλίνθινη, Strab. xvii. p. 799; Ptol. iv. 5. § 8; Steph. B. a. e.), the frontier town of Aegypt towards Libya. It stood at the head of the Plinthine bay, in latitude 30° 40' N., just within the Mareotis nome, but beyond the limits of the nome of Aegypt. Dodwell, who remains unable to determine the exact site of this town; but it cannot have been far from Tapessiris (Aboveri), of which the ruins are still visible about 25 miles W. of Alexandria. An inferior kind of wine was produced in this region of Aegypt; and Hallianus (Fr. 155) says that the people of Plinthine originally discovered the virtues of the grape. (Ath. ix. 21, 22). [W. B. D.]

PLINTHINETICUS SINUS (Πλίνθινητικὸς σύνος, Herod. ii. 6), the westernmost of the Mediterranean harbours of Aegypt. It was indeed little more than a roadstead, and was exposed to the N. and NW. winds. W. of the Sinus Plinthineteticus began the Region Marmarica. [W. B. D.]

PLITANDUS. [Delt. Plit.]

PLITANDUS, a town of Phrygia on the riverÂ Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â Â...
POECILAS.  

POECILAS (Ποικιλας, Ptol. iii. 15. § 3; Ποικιλας, Stad. Am. Magna Mar., p. 258, ed. Heffmann.), a town on the S. coast of Crete, placed by Ptolemy E. of Tarrha, between this place and the promontory Hermasa; but in the Stad. Am. Magna Mar. W. of Tarrha, between this place and Syria, 60 stadia from the former and 50 from the latter. It is probably represented by the ruins near Trygseti, situated between the places mentioned in the Stad. Am. Magna Mar.

POEICLE (Ποικιλας), a rock on the coast of Cilicia, near the mouth of the Calycadnus, and on the coast of Cape Sarpedon, across which a flight of steps cut in the rock led from Cape Zephyrium to Seleucia. (Strab. xiv. p. 670; Stad. Am. Magna Mar. M. § 161.) Its distance of 60 stadia from the Calycadnus will place it about Perakon. Instead of any steps in the rock, there is an extensive ruin of a walled town, with temples, arcades, aseptacles, and tombs, built round a small level, which had some appearance of having once been a harbour with a narrow opening to the sea. An inscription copied by Beaumont from a tablet over the eastern gate of the ruins accounts for the omission of any notice of this rock, which has been a matter of some importance, and explains that it was Belisarius assembled the fleet and army with which he was preparing to cross over to Ravenna. (Procop. B. G. iii. 10.)

The city was considered as an ancient one, and certainly existed before the Roman conquest of Isthia in A. D. 177, though its name is not mentioned on that occasion. It was undoubtedly the advantages of its excellent port that attracted the attention of the Romans, and led Augustus to establish a colony there, to which he gave the name of Pictas Julia. (Mel. I. c.; Plin. iii. 19. s. a. 23.) Several of the still existing remains prove that he at the same time adorned it with public edifices; and there is no doubt that under the Roman Empire it became a considerable and flourishing town, and, next to Tergeste (Trieste), the most important city of Isthia. (Strab. i. c.; Ptol. iii. 1. § 27; Gruter, Inscr. p. 263. 7, p. 360. 1, p. 432. 5.) It is mentioned in history as the place where Cirratus, the eldest son of Constantine the Great, was put to death by order of his father; and again, in A. D. 354, the Caesar Gallus underwent the same fate there by order of Constantius. (Ammian. Marc. xiv. 11.) After the fall of the Roman Empire in the West it continued to be of some importance, and is mentioned in a letter of Eusebius to his friend there that Belisarius assembled the fleet and army with which he was preparing to cross over to Ravenna. (Procop. B. G. iii. 10.) It probably partook of the prosperity which was enjoyed by all Isthia during the period that Ravenna became the seat of empire, and which was continued throughout the whole period of the Eastern Empire; and for this reason, we may suppose that it was connected by a road along the coast with Tergeste, from which it was 77 miles distant, while the direct communication by sea with Iadera (Zara) seems to have been in frequent use, though the passage was 430 stadia, or 56 Roman miles. (Itin. Asiat. pp. 271, 496.)

Pole is remarkable for the importance and preservation of its ancient remains. Of these by far the most important is the amphitheatre, one of the most elegant designs and execution, corresponding in size and general appearance with the Colosseum of Rome, and is a most remarkable specimen of the Roman workman. Its excavations have not been found, and the amphitheatre is not less than that at Verona. Its position and the preservation of its arches, as well as the remains of the temple of Augustus, made it a favourite object of the Roman conquerors, and was originally erected by a private individual of the name of Sergius, now forms the S. gate of the city. Another gate, and several portions of the Roman walls are also preserved. The whole of these monuments are built of the hard white limestone of the country, closely approaching to marble, which adds
much to their effect. Dante speaks of the environs of Polo, as in his time remarkable for the numerous sarcofagi and ancient tombs with which they were almost wholly occupied. These have now disappeared. (Dante, Inf. ix. 15.)

The antiquities of Polo have been repeatedly described, and illustrated with figures; among others, in the fourth volume of Staunt and Beverl's Athens, fol. Lond. 1816, and in the Voyage Pittoresque de l'Istrie et de la Dalmatie, fol. Paris, 1809; also in Allison's Antiquities of Polo, fol., Lond. 1819.

The harbour of Polo is completely landlocked, so as to have the appearance of a small basin-shaped lake, communicating by a narrow channel with the sea. Off its entrance lies a group of small islands called the Isola Brion, which are probably those called by Pliny Ciessa and Pullaria. (Plin. iii. 26. a. 30.) The southernmost promontory of Istria, about 10 miles distant from Polo, derived from it the name of Polatium Promontorium. It is now called Capo Promontorio. [E. H. B.]

POLIUM (Πολιοῦμ), a city on the coast of Puntes, at the mouth of the small river Sidenum, 10 stadia from Phidiasana, and 130 from Cape Issium. (Arrian, Perip. p. 16; Anonym. Perip. p. 11, &c.; Ptol. v. 6. § 4; Steph. B. s. v.) Pliny (vi. 4) places the town 120 Roman miles from Amisus, which seems to be too great a distance. (Comp. Arist. Hist. iii. xi. 1729, 1730, where it is erroneously called Τελαφιοῦμν, &c. Ping. Neither Strabo nor any writer before him mentions this town, and it is therefore generally believed that it was built on the site of the town of Side, which is not noticed by any writer after Strabo. Its name intimates that it was founded, or at all events was named, after one Polion, perhaps the one who was made king of that part of Puntes, about a. c. 36, by M. Antonius. It had a harbour, and seems to have in the course of time become a place of considerable importance, as the part of Puntes in which it was situated received from it the name of Puntes Polionemusica. The town was situated on the western bank of the Sidenum, where its existence is still attested by the ruins of a small church, and the remains of a massive wall; but the ancient name of the place is preserved by the village of Poulemonon, on the opposite side of the river. (Hamilton, Researches, vol. i. p. 270.)

POLICHNA (Πολίχνη). 1. A town of Locania, mentioned only by Polybius (v. 36), is placed by Leake at the foot of the country on the eastern slope of Mt. Parnon at Réonda (và Phòra), where, among the ruins of a fortified town of the lower empire, are some remains of Hellenic walls. (Leake, Peloponnesiana, p. 384.)

2. A town in the NW. of Messenia on the road from Andania to Dorium and Cyprosia. (Paus. iv. 33. § 6.)

3. A town of Megara, mentioned only in a line of Homer, quoted by Strabo, for which the Athenians substituted another to prove that Salamis at the time of the Trojan War was a dependency of Athens. (Strab. v. 64.)

4. (Edh. Πολικηνή), a town of Crete, whose traditions have been lost, and are mentioned by Cydonia, (Thuc. ii. 85.) In b. c. 429 the Athenians assisted the inhabitants of Polichna in making war upon the Cydonians. (Thuc. L c.) Herodotus also mentions the Polichnes, and says that this people and the Praisli were the only people in Crete who did not join the other Cretans in the expedition against Camenis in Sicily in order to revenge the death of Minos (vii. 170; Steph. B. s. v.). Cramer (Ancient Greece, vol. iii. p. 380) supposes the ruins at Polis S. of Aretho to be those of Polichna, which Phalas, however, regards as those of Lappa or Lampo. (Cret. vol. i. p. 83.)

POLICHE (Πολική), a small town in the upper valley of the Aenos in Troas (Strab. xiii. 535; Plin. v. 39; Steph. B. s. v.; Hieroc. p. 662.) Supposing a place bearing the same name near Clazomenae, see Clazomenae. [L. S.]

POLIMARTIUM (Πολιμαρτίου), a town of Eurus, not far from the right bank of the Tibre, and about 18 miles E. of Fidenbo. The name is not found in any writer before Aemilius Paulus (Hist. Liv. iv. 9), and there is therefore no evidence of its antiquity: but it is certain that there existed an ancient Etruscan city about 2 miles N. of the present village of Bormaro. Some ruins and other slight vestiges of ancient buildings still remain, and numerous sepulchres have been discovered, some of which belonged to the最原始 inhabitants of the place. The other tombs also, and some of them are adorned with paintings in the Etruscan style, but apparently not of early date. (Dessius Etruriae, vol. i. p. 214—238.)

POLIS (Πόλις), a village of the Hysae in Locis Osiolias, which Leake supposes occupied the site of Karidas, where he found an inscription. (Thuc. iii. 108.)

POLISMA (Πολίσμα), a small place on the river Sirmeios in Trosa, was originally called Polos; but it was situated in an unsuitable locality, and soon decayed. (Strab. xiii. p. 601.)

POLITORIUM (Πολιτόριον; Ekh. Πολιτοριον, Steph. B.), an ancient city of Latium, destroyed at a very early period of the Roman history. The account of its capture and destruction by Ancus Marcius comprises indeed all we know concerning it; for the statement cited from Cato (Serv. ad Aen. v. 564), which ascribed its foundation to Polites, the son of Priam, is evidently a mere etymological fiction. According to Livy and Dionysius, it was a city of the Fretal Latins, and was the first which Ancus attacked by the Roman king, who, by the defeat himself master of it with little difficulty, and transported the inhabitants to Rome, where he settled them upon the Aventine. But the Latins having soon after recovered the desert city, Ancus attacked it again, and having taken it a second time, entirely destroyed it, that it might not for the future serve as a shelter to his enemies. (Livy L iii. 37, 38, 43.) The destruction appears to have been complete, for the name of Politiorium never again occurs, except in Pliny's list of the cities of Latium that were utterly extinct. (Plin. iii. 5. s. 5.) In its site is consequently involved in the greatest obscurity; the only clue we have is the circumstance that in the above narrative associated with Telissae, which is equally uncertain, and with Ficana, the position of which at Dragoncillo, on the Via Ostiensia, may be considered as well established. [Fician.] Nibby would place Politiorium at a spot called La Torretta near Decimo, on the Via Latina; while cells considers the remains of a tolda, discovered in the above narrative associated with Telissae, which is equally uncertain, and with Ficana, the position of which at Dragoncillo, on the Via Appia, about a mile and a half from Florina, and 10 miles from Rome, as those of Politiorium. There can be no doubt that the ruins at La Giotta—consisting of considerable fragments of walls, built in a very massive and ancient style, and enclosing a long and
POLLENTIA.

narrow space, bordered by precipitous banks — are those of an ancient Latin city; but whether they mark the site of Pollentia, as supposed by Gell, or of Tellenea, as suggested by Nibby and adopted by Abeken, we are wholly without the means of determining. (Cass. Dio. ii. 13; Nibby, Dict. It. iii. p. 146; Abeken, Mitt. It. ii. p. 63.) The ruins at La Giostra are more fully noticed under the article Tellenea.

[E. H. B.]

POLLENTIA. 1. (Póllentia; Eú. Pollentnia; Polema), a city of Liguria, situated in the interior of that province, at the northern foot of the Apennines, near the confluence of the Stura and Tamaro. It was about 7 miles W. of Alba Pompeia. It was probably a Ligurian town before the Roman conquest, and included in the territory of the Statii, but we do not meet with its name in history until near the close of the Roman republic, when it appears as a town of importance. In a. d. 43, M. Antonius, after his defeat at Mutini, was compelled to retreat across the Apennines, with the view of escape on Pollentia, in which he was, however, anticipated by Decimus Brutus, who had occupied the city with five cohorts. (Cic. ad Fam. i. 13; Sulp. v. 110.) Pollentia is mentioned by Pliny among the "nobilia oppida" which adored the tract of Liguria between the Apennines and the Padus. (Plin. iii. 5. a. 7.) It had considerable manufactures of pottery, and the wool produced in its territory enjoyed great reputation, having a natural dark colour. (Plin. viiii. 48. a. 73. xxii. 12. a. 46; Sil. Ital. vii. 297; Polyb. viii. 4.) It is an important municipal town under the reign of Tiberius, having been severely punished by that emperor for a tumult that occurred in its forum. (Suet. Tib. 37.) But its name is chiefly noted in history as the scene of a great battle fought between Silicho and the Goths under Alaric, in a. d. 405. The circumstances of this battle are obscure; but the place and the event are variously related; for while Claudian celebrates it as a glorious triumph, Orosius describes it as a dubious success, and Cassiodorus and Jordanes boldly claim the victory for the Goths. (Cassiod. B. Get. 580—847; Prudent. in Serm. Forc. ii. 668—749; Oros. vii. 37; Procop. Chon. i. 328.)

POLYXENUS. [Ἀρχίς.]

POLYXENUS (Pólyxenos), a desert island in the Aegean sea, near Melos. (Ptol. iii. 15. § 28; Plin. iv. 12. 23; Mela. ii. 7.) It is either Polybos, or perhaps Antimilos with its wild goats. (Ross, Reisen auf den Griech. Inseln, vol. iii. p. 36.)

POLYANTHES. [Ἀμαντία.]

POLYANTHES. (Pólyanthos), a mountain in Epeiros, mentioned by Strabo (vii. p. 327) along with Tomaros.

POLYBOTUS (Pólybotos), a place in the west of Phrygia Major, a little to the south-east of Synnapis, is mentioned only by Hierocles (p. 677) and a few Byzantine writers (Procop. Hist. Arc. 18; Anna Comm. p. 924; Concli. Nissi. ii. p. 350), who, however, do not give the name correctly. It is Polybotus or Polygotos. Col. Leake (Asia Min. p. 53) identifies the site of Polybotus with the modern bulwadar, which he regards as only a Turkish corruption of the ancient name. [L. S.]

POLYGUS, a place on the south coast of Gallia, mentioned in the Ora Maritima of Avienus (v. 611):
POLYMYDIUM.

"Temusagius omnis civitas Polygynom est, Tuam Manse vionis oppidumque Naustrato." There is nothing to say about a place for whose there is no sufficient evidence. Menard supposed it to be Berosus on the Eumyg de Tum. The name seems to be Greek, and the place be one of the Masmallot settlements on this coast. [Naustrato].

POLYMYDIUM (Polymydim, Strab. xiii. pp. 606, 616; Polymina, Plin. v. 30. a. 92), a small place in Mysia, between the permanent Lacum and Assus, and at the distance of 40 stadia from the former.

POLYRHENIUS (Polyrhei, Ptol. iii. 17. § 10; Polye, Ptolem, Steph. B. c. c. corrected by Meineke into Polyei; Polye, Sclayx, p. 18, corrected by Gail; Polye, Zonob. Prov. v. 50; Polyominium, Plin. iv. 12. a. 30: Eta Polyei, Polyb. iv. 53, 55; Strab. x. p. 479), a town of the Nymphaeus, which occupied the whole western extremity of the island, extending from N. to S. (Sclayx, p. 18). Strabo describes it as lying W. of Cydonia, at the distance of 80 stadia from the sea, and 60 from Phalasarna, and as containing a temple of Dytoma. He adds that the Polyrcnians formerly dwelt in villages, and that the name of the city, ascribed to the Acinaces, or, as the Ancoraci and Locacornians, who built a strong city looking towards the south. (Strab. x. p. 479.) In the civil wars in Crete in the time of the Achaeus League, B. c. 319, the Polyrhenians, who had been subject allies of Ocosus, deserted the latter, and assisted the Lycaens against that city. They also sent auxiliary troops to the assistance of the Achaeans, because the Grecians that supported the Asteiotes. (Polyb. iv. 53, 55.) The ruins of Polyrhenia, called Palaeochristou, near Kiasm-Kastelli, exhibit the remnants of the ancient walls, from 10 to 18 feet high. (Passale, Cret. vol. ii. p. 46, seq.)

POLYTIMETUS. [Osia Falsus.]

POMETIA. [Surnia Pometia.]

POMPEII (Pompeia, Strab.; Pompejus, Dion Cass.; Ede Philopompejus, Pompejus: Pompeii), an ancient city of Campania, situated on the coast of the beautiful gulf of the Crater or Bay of Naples, at the mouth of the river Sarno (Sarno), and immediately at the foot of Mount Vesuvius. It was intermediate between Herculanum and Stabiae. (Strab. x. 5. a. 9; Mela, ii. § 9. 3.) All accounts agree in representing it as a very ancient city: a tradition recorded by Solinus (2. § 5) ascribed its foundation to Hercules; but Dionysius, who expressly notices him as the founder of Herculanum, says nothing of Pompeii (Dionys. i. 44). Strabo says it was first occupied by the Oscans, subsequently by the Tyrrhenians (Italicorum) and Pelasgi, and afterwards by the Samnotes (Strab. l. c.). It continued in the hands of these last, that is, of the branch of the nation who had assumed the name of Campanians [Campania], till it passed under the government of Rome. It is probable that it became from an early period a flourishing town, owing to its advantageous situation at the mouth of the Sarno, which rendered it the port of Nola, Nuceria, and all the rich plain watered by that river. (Strab. l. c.) But we meet with no mention of its name in history previous to the Roman conquest of Campania. In B. c. 310 it is mentioned for the first time, when a Roman fleet under F. Cornelius touched there, and the troops on board proceeded from thence to ravage the territory of Nuceria. (Liv. ix. 28.)

POMPEII. There was a report of the outbreak of the Social War (B. c. 91), in which it appears to have taken a prominent part, as the Pompeians are mentioned by Appian apart from the other Campanians, in enumerating the nations that joined in the insurrection (Appian, B. C. i. 80). In the close of the war (B. c. 89) Pompeii was still in the hands of the insurgents, and it was not till after repeated engagements that L. Sulla, having defeated the Samnite forces under L. Cluentius, and forced them to take refuge within the walls of Nola, was able to form the siege of Pompeii. (Appian, ib. 50; Oros. v. 18; Val. Pat. ii. 16.) The result of this is now well known. It is certain that the town ultimately fell into the hands of Sulla; but whether by force or by capitulation we are not informed; the latter is, however, the most probable, as it escaped the fate of Stabiae, and its inhabitants were admitted to the Roman franchise, though they lost a part of their territory, in which a mill probably under Augustus (5th B. C. is) there, he frequently mentions under the name of "Pompeianum," and which appears to have been a considerable establishment, and one of his favourite residences. (Gic. Acad. i. 3, ad Att. i. 50, ad Fam. vii. 3, xii. 30.) Under the Empire it continued to be resorted to for the same purposes. Sempe praises the beauty of this city on account of its situation, and we learn from him and Tacitus that it was esteemed a flourishing town ("cedere oppidum," Tac. Ann. xv. 22; Sen. Nat. Qua. vi. 1.). In addition to the colony which it received (as already mentioned) under Sulla, and which is alluded to in an inscription as "Colonia Veneria Cornelia" (Monumenta, Inscr. R. N. 2201), it seems to have received a colony at some later period, probably under Augustus (5th B. C.), and is termed a colony by Pliny), as it bears that title in several inscriptions (Monumenta, L. c. 2230—2234).

In the reign of Nero (A. D. 59) its tumult took place in the amphitheatre of Pompeii, arising out of a dispute between the citizens and the newly-settled colonists of Nuceria, which ended in a conflict in which fighting happened. (Strab. vi. 5. 9; Mela, ii. § 9. 3.) All Pompeians were punished for this outbreak by the prohibition of all gladiatorial and theatrical exhibitions for ten years. (Tac. Ann. xiv. 17.) Only a few years after, the city suffered severely from an earthquake, which took place on the 5th of February, A. D. 63. The expressions both of Seneca and Tacitus will lead us to suppose that it was in great part utterly destroyed; and we learn from existing evidence that the damage done was unquestionably very great, the public buildings especially having suffered most severely. (Sen. Nat. Qua. vi. 1; Tac. Ann. xiv. 22.) The city had hardly recovered from this calamity, when it met with one far greater: being totally overwhelmed by the famous eruption of Mount Vesuvius in A. D. 79, which buried Pompeii as well as Herculanum, under a dense bed of ashes and cinders. The loss of life in the former city was the greater, because the inhabitants were assembled in the theatre at the time when the catastrophe took place. (Dio Cass. lxv. 23.) The younger Pliny, in his celebrated letters describing the eruption (Epip. vi. 16, 28), does not even notice the destruction of Pompei or Her-
Pompeii; but his attention is directed principally to the circumstances of his uncle’s death and the phenomena which he had himself witnessed.

From this time the name of Pompeii disappears from history. It is not noticed by Ptolemy; and it is certain that the city was never rebuilt. But the name is again found in the Tabula; and it thus appears that a small place must have again arisen on the site, or, more probably, in the neighbourhood, of the buried city. But all trace of Pompeii was subsequently lost; and in the middle ages its very site was entirely forgotten, so that even the learned and diligent Guerrier was unable to fix it with certainty, and was led to place it at Scafes on the Sorvo, about 2 miles E. of its true position. This difficulty arose, in great measure, from the great physical changes produced by the catastrophes of A.D. 79, which diverted the course of the Sorvo, so that it now flows at some distance from Pompeii,—and at the same time pushed forward the line of the coast, so that the city is now above a mile distant from the sea, which in ancient times undoubtedly bathed its walls.

There is no reason to suppose that Pompeii in ancient times ever rose above the rank of a second-rate provincial town; but the re-discovery of its buried remains in the last century has given it a celebrity to its name exceeding that of the greatest cities. The circumstances of its destruction were peculiarly favourable to the preservation of its remains. It was not overthrown by a torrent of lava, but simply buried by a vast accumulation of volcanic sand, ashes, and cinders (called by the Italians laopoli), which forms a mass of very light, dry, and porous character. At the same time, it is almost certain that the present accumulation of this volcanic deposit (which is in most places 15 feet in depth) did not take place at once, but was formed by successive eruptions; and there is little doubt that the ruins were searched and the most valuable objects removed soon after the catastrophes took place. This seems to be proved by the small number of objects of intrinsic value (such as gold and silver plate) that have been discovered, as well as by the fact that comparatively few skeletons have been found, though it appears certain, from the expressions of Dion Cassius, that great numbers of the inhabitants perished; nor have any of these been found in the theatre, where it is probable that the greatest loss of life occurred.

It was not till 1748 that an accidental discovery drew attention to the remains of Pompeii; and in 1755 regular excavations on the site were first commenced by the Neapolitan government, which have been carried on ever since, though with frequent intervals and interruptions. It is impossible for us here even to attempt to give any account of the results of these excavations and the endless variety of interesting remains that have been brought to light. We shall confine ourselves to those points which bear more immediately on the topography and character of the town of Pompeii, rather than on the general habits, life, and manners of ancient times. More detailed accounts of the remains, and the numerous objects which have been discovered in the course of the excavations, especially the works of art, will be found in the great work of Mauro (Les Reues de Pompeii, continued by Gan, 4 vols. fol., Paris, 1812—1838), and in the two works of Sir W. Gell (Pompeiana, 1st series, 2 vols. 8vo. Lond. 1824; 2nd series, 2 vols. 8vo. 1830); also in the little work published by the Society of Useful Knowledge (Pompeii, 2 vols. 12mo. 1831). A recent French publication by Breton (Pompeii, 8vo. Paris, 1855), also gives a good account of the whole process and results of the discoveries (including the most recent excavations) in a moderate compass and inexpensive form. The still more recent work of Overbeck (8vo. Leipzig, 1856), of which the first part only has yet appeared, contains an excellent compendium of the whole sub-
ject, with especial attention to the works of art discovered.

The area occupied by the ancient city was an irregular oval, about 2 miles in circumference. It was surrounded by a wall, which is still preserved round the whole of the city, except on the side towards the sea, where no traces of it have been found, and it seems certain that it had been pulled down in ancient times to allow for the extension of houses and other buildings down to the water's edge. The wall itself is in many places much ruined, as well as the towers that flank it, and though this may be in part owing to the earthquake of 62, as well as the eruption of 79, it is probable that the defences of the town had before that time been allowed to fall into decay, and perhaps even intentionally dismantled after the Social War. There were seven gates, the most considerable and ornamental of which was that which formed the entrance to the city by the high road from Herculaneum: the others have been called respectively the gate of Vesuvius, the gate of Capua, the gate of Nola, the gate of the Sarnus, the gate of Stabiae, and the gate of the Theatres. The entrances to the town from the side of the sea had ceased to be gates, there being no longer any walls on that side. All these names are of course modern, but are convenient in assisting us to describe the city. The walls were strengthened with an Agger or rampart, faced with masonry, and having a parapet or outer

POMPEII

wall on its external front: they were further festined at intervals with square towers, which in some parts occur regularly at about 100 yards from each other, in other parts are added much more sparingly. These towers seem to have been subsequent additions to the original walls, being of a different and less solid style of construction. The walls themselves are very solidly built of large blocks of tufa, with polygonal blocks of these, but with many considerable irregularities of construction: the upper part is more regularly finished, and consists of pereirizo. But both walls and towers are in many places patched with coarser masonry and reticulated work; thus showing that they had been frequently repaired, and at distant intervals of time.

The general form was rounded, and the greater part of the streets ran in straight lines: but the principal line of street, which runs from the gate of Herculanenum to the Forum, is an exception, being irregular and crooked as well as very narrow. Though it must undoubtedly have been one of the chief thoroughfares of the city, and the line followed by the houses built, no result can be drawn from it. It does not exceed 12 or 14 feet in width, including the raised trottoirs or footpaths on each side, so that the carriageway could only have admitted the passage of one vehicle at a time. Some of the other streets are broader: but few of them exceed 20 feet in width, and the widest yet found is only about 30. They are uniformly paved with large polygonal blocks of hard tufa or basalt, in the same manner as were the streets of ancient Rome, and the Via Appia, and other great highways in this part of Italy. The principal street, already noticed, was crossed, a little before it reached the Forum, by a long straight line of street which, passing by the temple of Fortune, led direct to the gate of Nola. In the ancient plan, by the two streets the public baths and Thermes, and between these and the temple of Fortune a short broad street led direct to the Forum, of which it seems to have formed the principal entrance. From the Forum two other parallel streets struck off in an easterly direction, which have been followed till they cross another main street, and then lead direct to the gate of Venusia directly across the city to the gate adjoining the theatres. This last line crosses the street already noticed, leading from the gate of Nola westward, and the two divide the whole city into four quarters, though of irregular size. Great part of the city (especially the SE. quarter) has not yet been explored, but recent excavations, by following the line of these main streets, have clearly shown its general plan, and the regularity with which the minor streets branched off at intervals in parallel lines. There is also little doubt that the part of the city already excavated is the most important, as it includes the Forum, with the public buildings adjoining to it, the theatres, amphitheatre, &c.

POMPEII

to have been surmounted by a gallery or upper story, though no part of this is now preserved. It would seem that this portico had replaced an older arcade on the eastern side of the Forum, a portion of which still remains, so that this alteration was not yet completed when the catastrophe took place. At the north end of the Forum, and projecting out into the open area, are the remains of an edifice which must have been much the Forum of any in the city. It is commonly known, with at least a plausible foundation, as the temple of Jupiter; others dispute its being a temple at all, and have called it the Senaculum, or place of meeting of the local senate. It was raised on a podium or base of considerable elevation, and had a portico of six Corinthian columns, supposed by Sir W. Gell, to be near as large as those in the portico of St. Paul's. From the state in which it was found it seems certain that this edifice (in common with most of the public buildings at Pompeii) had been overthrown by the earthquake of 63, or, at least, so much damaged that it was necessary to restore, and the subsequent work of the process was still incomplete at the time of its final destruction. At the NE. angle of the Forum, adjoining the temple of Jupiter, stood an arch which appears to have been of a triumphal character, though now deprived of all its ornaments: it was the principal entrance to the Forum, and the only one by which the carriages of any description. On the E. side of the Forum there are four edifices, all unquestionably of a public character, though we are much in doubt as to their objects and destination. The first (towards the N.) is generally known as the Pantheon, from its having contained an altar in the centre, with twelve pedestals placed in a circle round it, which are supposed to have supported statues of the twelve chief gods. But no traces have been found of these, and the general plan and arrangement of the building are wholly unlike those of an ordinary temple. A more plausible conjecture is, that it was consecrated to Augustus, and contained a small temple or aedilsica in honour of that emperor, while the court and colonnade was the residence of his priests, the Augustales, who are mentioned in many inscriptions as existing at Pompeii. Next to this building is one which is commonly regarded as the Curia or Senaculum; it had a portico of fluted columns of white marble, which ranged with those of the general portico that surrounded the Forum. South of this again is a building which was certainly a temple, though it is impossible now to say to what divinity it was consecrated; it is commonly called the Temple of Mercury, and is of small size and very irregular form. Between this and the street known as the Street of the Silversmiths, which issued from the Forum near the SE. angle, was a large building which, as we learn from inscription, was a temple to the gods commemorating the building, and was erected by a female priestess named Eumachia. It consists of a large and spacious area (about 130 feet by 65) surrounded by a colonnade, and having a raised platform at the end with a semicircular recess similar to that usually found in a Basilica. But though in this case the founder of the edifice is known, its use is not completely ascertained. It is commonly called the Chalcidicum, but it is probable that that term (which is found in the inscription above noticed) designates only a part of the edifice, not the whole building.
The S. end of the Forum was occupied by three buildings of very similar character, standing side by side, each consisting of a single hall with an apse or semicircular recess at the further extremity. The most probable opinion is that these were the courts of justice, in which the tribunals held their sittings. The western side of the Forum was principally occupied by a Basilica, and a large temple, which is commonly called (though without any authority) the Temple of Venus. The former is the largest.
Pompeii. building in Pompeii; it is of an oblong form, 220 feet in length by 80 in breadth, and abutted endwise on the Forum, from which it was entered by a vestibule with five doorways. The roof was supported by a peristy of 28 Ionic columns of large size, but built of brick, coated with stucco. There is a raised tribunal at the further end, but no ape, which is usually found in buildings of this class. Numerous inscriptions were found scratched on the walls of this edifice, one of which is interesting, as it gives the date of the consulship of M. Lepidus and Q. Catulus (b.c. 78), and thus proves the building to have been erected before that time. Between this edifice and the temple is a street of greater width than usual, which extends from the Forum in a westerly direction, and probably communicated with the port. The Temple of Venus, on the N. side of this street, was an extensive building consisting of a peripteral temple with a small cela, elevated on a podium or basement, surrounded by a much more extensive portico, and the whole again enclosed by a wall, forming the peribolos or sacred enclosure. All parts of the building are profusely decorated with painting. The temple itself is Corinthian, but the columns of the portico seem to have been originally Doric, though afterwards clumsily transformed into Corinthian, or rather an awkward imitation of Corinthian. This is only one among many instances found at Pompeii of very defective architecture, as well as of the frequent changes which the buildings of the city had undergone, and which were still in progress when the city itself was destroyed. The buildings at the NW. corner of the Forum are devoid of architectural character, and seem to have served as the public granaries and prisons.

Temple of Venus.

(The Forum and Temple of Jupiter in the background.)

The open area of the Forum was paved, like that of Rome, with broad slabs of a kind of marble, thus showing that it was never designed for the traffic of any kind of vehicles. It is moreover probable that the whole space, including the porticoes which surrounded it, could be closed at night, or whenever it was required, by iron gates at the several entrances. It was adorned with numerous statues, the pedestals of which still remain: they are all of white marble, but the statues themselves have uniformly disappeared. It is probable either that they had not been re-erected during the process of restoration which the Forum was undergoing, or that they had been searched for and carried off by excavations soon after the destruction of the city. The remaining public buildings of the city may be more briefly described. Besides the temples which surrounded the Forum, the remains of four others have been discovered; three of which are situated in the immediate vicinity of the theatres, a quarter which appears to have had more of architectural ornament than any other part of the city, except the Forum. Of these the most interesting is one which stood a little to the SW. of the great theatre, near the wall of the city, and which is evidently much more ancient than any of the other temples at Pompeii; it is of the Doric order and of pure Greek style, but of very ancient character, much resembling that of Neptune at Paestum and the oldest temples at Selinus. Unfortunately only the basement and a few capitols and other architectural fragments remain.

It is commonly called the Temple of Hercules, but it is obvious that such a name is purely conjectural. It stood in an open area of considerable extent, and of a triangular form, surrounded on two sides by porticoes; but this area, which is commonly called a Forum, has been evidently constructed at a much later period, and with no reference to the temple, which is placed very awkwardly in relation to it. Another temple in the same quarter of the town, immediately adjoining the great theatre, is interesting because we learn with certainty from an inscription that it was consecrated to Iaia, and had been rebuilt by N. Popidius Celerinus from the foundations after its overthrow in the great earthquake of A.D. 63. It is of a good style of architecture, but built chiefly of brick covered with stucco (only the capitals and shafts of the columns being of soft stone), and is of small size. Like most of the temples at Pompeii, it consists of a cela, raised on an elevated podium, and surrounded externally by a more extensive portico. Adjoining this temple was another, the smallest yet found at Pompeii, and in no way remarkable. It has been variously called the temple of Asculapius, and that of Jupiter and Juno. The only temple which remains to be noticed is one situated about 80 yards N. of the Forum at the angle formed by the long main street leading to the gate of Nola, with a short breadth street which led from it direct to the Forum. This was the Temple of Fortune, as we learn from an inscription.
and was erected by a certain M. Tulius, a citizen and magistrate of Pompeii, who has been supposed to be of the family of Cicero; but the absence of the cognomen renders this highly improbable. The epithet of Fortuna Augusta shows that the temple and its inscription are not earlier than the time of Augustus. It is much in ruins, having probably suffered from the earthquake of 62; and has little architectural effect.

Pompeii possessed two Theatres and an Amphitheatre. The former were situated, as seems to have been usual in Greek towns, close together; the larger one being intended and adapted for theatrical performances properly so called; the smaller one serving as a kind of park for exercise. Both were unquestionably of Roman date: the larger one was erected (as we learn from an inscription found in it) by two members of the same family, M. Holocoonus Rufus and M. Holocoonus Celer, both of whom appear to have held high civil offices in the municipal government of Pompeii. The period of its construction may probably be referred to the reign of Augustus. The smaller theatre seems to be of an earlier date, and was erected at the public expense under the direction of the Duumvir or chief magistrates of the city. The large Theatre is to a considerable extent excavated out of the side of a hill, on the slope of which it was situated, thus saving a considerable amount of the expense of construction. But the exterior was still surrounded by a wall, a part of which always rose above the surface of the soil, so that it is singular it should not have long before led to the discovery of the buried city. Its internal disposition and arrangements, without exactly coinciding with the rules laid down by Vitruvius, approach sufficiently near to them to show that it was never built as the Roman, but not the Greek model. Its architect (as we learn from an inscription) was a freedman of the name of M. Ar- torius Primus. It seems to have been almost wholly cased or lined with marble, but the greater part of this, as well as the other decorations of the building, has been carried away by former excavations, probably made after the catastrophe. The interior diameter of the building is 229 feet; it had 29 rows of seats, divided into three stories by galleries or proscinciones, and was capable of containing about 5000 spectators. The smaller Theatre, which communicated with the larger by a covered portico on the level of the orchestra, was not above a fourth of the size of the other, being adapted to receive only about 1500 spectators. We learn from an inscription that it was covered or permanently roofed in, a rare thing with ancient theatres, and doubtless owing to its small size. Its chief architectural peculiarity is that the seats are cut off by the walls at the two sides, so that it is only the lower seats of the cases, of which the semicircle is complete.

POPEII.

of this on the N., where it communicated with the street, was ornamented by a portico or Propylaeum composed of eight Ionic columns of very elegant style, but consisting of the common volcanic tufa, cases with stucco.

The Amphitheatre is situated at the distance of above 500 yards from the Theatres, at the extreme end of the city. It offers no very interesting details, but contains a few differences from other edifices of the same kind; its dimensions (430 feet by 335) are not such as to place it in the first rank even of provincial structures of the class; and from being in great part excavated out of the soil, it has not the imposing architectural character of the amphitheatres of Verona, Nema- nas, or Pula. It had 24 rows of seats, and about 20,000 feet of sitting-room, so that it was adapted to receive at least 10,000 spectators. From one of the inscriptions found in it, it appears that it was built, or at least commenced, by two local magis- trates, named C. Quintius Valgrus and M. Porcius, after the establishment of the colony under Augustus, and probably in the reign of that emperor.

It is impossible here to enter into any details concerning the results of the excavations in regard to the private dwellings at Pompeii, though these are, in many respects, the most interesting, from the light they have thrown upon the domestic life of the ancient inhabitants, their manners and usages, as well as from the purity and variety of the objects discovered. A few words on the general character of the houses and other private buildings of Pompeii are all that our space will admit of. As these are almost the only remains of a similar kind that have been preserved to us, it must be borne in mind that they can hardly be regarded as representing in their purity the arrangements either of the Greek or Roman mode of building. On one hand Pompeii, though strongly tinted with Greek civilisation, was not a Greek city; on the other hand, though there is no doubt that the houses at Pompeii present much more the Roman plan and arrangement than that of the Greeks, we must not conclude that they represent them in all respects. We know, it must be confessed, too little to build, and we know so as to have a direct communication with both, is a large quadrangular court or area (183 feet long by 148 wide), surrounded on all sides by a Doric portico. Its destination is very uncertain, it has been called a provision market (Forum Num- dinarium); but is more generally regarded as having served for the housing of the poor or quarters of the soldiers. Perhaps a more plausible conjecture is that it was a barrack, not of soldiers but of gladiators. On the W. of this, as well as of the great theatre, was the triangular area or forum already noticed, in which the Greek temple was situated. The opening
only of inferior rooms, a kind of garrets, probably serving for the sleeping-rooms of slaves, and in some cases of the females of the family. From the mode of destruction of the city the upper stories have indeed been almost uniformly totally destroyed; but this circumstance itself, as well as the few traces which occasionally remain, seems to prove that they were built wholly of wood, and could never have formed an important part of the houses. It is only on the W. side of the city, where the ground slopes steeply towards the sea, that houses are found which consisted of three stories or more. Externally the houses had little or nothing of an ornamental character; not a single instance has been found of a portico before a private house; and towards the street they presented either dead walls, with here and there a few small and scanty openings as windows, or ranges of shops, or the most part low and mean in character, even when they occupied (as was often the case) the front of dwellings of a superior description. The interior of the houses of the more wealthy class was arranged apparently on the same model as those at Rome; its disposition is given in detail in the Dictionary of Antiquities under the article Domus where a plan is given of the House of Panas, one of the most extensive and complete of those found at Pompeii. In this case the single house with its garden and appurtenances, including as usual several shops, occupied the whole of an insula or the space bounded by four streets or alleys; but this was unusual; in most cases each insula comprised several houses even where they were of a better description, and must have been the residence of persons of some wealth. Among the most remarkable of these may be mentioned the Hesperidum, that of the Tragic Poet, of Castrer and Pollux, of the Labyrinth, &c. The work of Dr. Overbeck (above cited) gives a very interesting series of these houses, selected so as to afford examples of every description of house, from the humblest dwelling, consisting of only two rooms, to the richly decorated and spacious. (Editions of Gallus and Pansa.)

The style of decoration of these houses presents a very general uniformity of character. The walls are almost invariably ornamented with painting, the atrium and peristyle being decorated with columns; but these are composed only of a soft and coarse stone (volcanic tuff) covered with stucco. The prodigal use of marble, both for columns and slabs to encrust the walls, which had become so general at Rome under the first emperors, apparently not having yet found its way to Pompeii. The rooms are generally enriched with mosaics, some of which possess a very high degree of merit as works of art. The most beautiful yet discovered adorned the house known as the House of the Faun, from a bronze statue of a dancing Faun which was also found in it. The illustrations to Gell's Pompeiiana (2nd series, Lond. 1835) will convey to the reader a sufficient idea of the number and variety of the artistic decorations of the private houses at Pompeii; though several of the most richly ornamented have been discovered since the date of its publication.

Outside the gate leading to Herculanum, in a kind of suburb, stands a house of a different description, being a suburban villa of considerable extent, and adapted to have been the abode of a person of considerable wealth. From the greater space at command this villa comprises much that is not found in the houses within the town; among others a large court or garden (Xystus), a complete suite of private baths, &c. The remains of this villa are of much value and interest for comparison with the numerous ruins which occur elsewhere of similar buildings, often on a much more extensive scale, but in a far less perfect state of preservation; as well as for assisting us to understand the descriptions given by Pliny and Vitruvius of similar structures, with their numerous appurtenances. (For the details of their arrangements the reader is referred to the articles in the Dictionary of Antiquities, and to the work on Pompeii, Lond. 1832, vol. ii. ch. 11.) Between this villa and the gate of the city are the remains of another villa, said to be on a larger scale and more richly decorated than the one just described; but its ruins, which were excavated in 1764, were filled up again, and are now not visible. It has been called, though without the slightest authority, the Villa of Cicero. The one still extant is commonly known as the Villa of Arrius Diomedes, but for no other reason than that
POMPTINAE PALULES.

l to which its site may be looked for in the valley of the Anmias, about the modern Tash Kepi, where Captain King (p. 288) found some ancient remains. In the vicinity of the place was a great mine of the mineral called Sandarsch. (Smet l. e.) Pompeiiopolis is often referred to by later writers. Near it is a spring which rises on a very considerable scale, both of size and architectural character; and though they cannot vie with the enormous mausolea which border in a similar manner the line of the Via Appia near Rome, they derive additional interest from the perfect state of preservation in which they remain; and the Street of the Tombs, as it is commonly called, is perhaps one of the most interesting scenes at Pompeii. The monuments are for the most part those of persons who had held magistracies, or other offices, in the city of Pompeii, and in many cases the site was assigned them by public authority. It is therefore probable that this place of sepulture, immediately outside the gate and on one of the principal approaches to the city, was accorded as peculiarly honourable.

Besides the tombs and the two villas already noticed, there have been found the remains of shops and small houses outside the gate of Herculanenum, and there would appear to have been on this side of the city a considerable suburb. This is supposed to be the one designated in the sepulchral inscription of M. Artina Dicesales as the "Papus Angustarius, Felix Suburbamus." We have as yet no evidence of the existence of any suburbs outside the other gates. It is evident that any estimate of the population of Pompeii must be very vague and uncertain; but still from our accurate knowledge of the spaces it occupied, as well as the character of the houses, it is probable that it formed something like an approximation, and it seems certain that the population of the town itself could not have exceeded about 20,000 persons. This is in accordance with the statements of ancient writers, none of whom would lead us to regard Pompeii as having been more than a second or third rate provincial town.

For the inscriptions found at Pompeii, which are often incorrectly given in the ordinary works on the subject, are carefully edited by Mommsen, in his Inscriptiones Regni Neapolitani (pp. 112—122). These do not, however, include a class of much interest, and peculiar to Pompeii, the inscriptions of a temporary kind which were rudely painted on the walls, or scratched on the plaster of the houses and public buildings. It is remarkable that several of these are in the Oscan dialect, and seem to prove that the use of that ancient language must have continued down to a much later period than is commonly supposed. [Osci]. But the public or official use of the Oscan seems to have ceased after the Social War, and the numerous inscriptions of a provincial character which belong to the age of Augustus and his successors are uniformly in the Latin language.

[EB. B.]

POMPEII PRAESIDIUM (Tab. Pest.; Pompeii, It. Ant. p. 134; Pompeii, It. Hieros, p. 566), a place in Meso Superior, between Horreum Margi and Mainsa, identified either with Kachessia (Reich), or with the town of Latine. (Strab. xii. p. 562; Steph. s. v.) Its name seems to indicate that it was founded by Pompey the Great. In the Itinerary it is marked as 27 miles from Sinope; accord-
POMPTINAE PALudes.

time of that writer; though Theophrastus himself
tells us distinctly that the island was in his days
united to the mainland by the accumulated deposits
of certain rivers. (Theophr. H. P. v. 8. § 3; Plin.
iii. 8. a. §.) Another tradition, preserved to us
also, is the following. (Liv. xii. 11.) The body of this
stream was in B.C. 160, by the consul Cornelius Cestheus,
which, according to the brief notice transmitted to
us, would seem to have been for a time successful
(Liv. Epit. xlvi.); but it is probable that the result
attained was in reality but a partial one; and we
find them relapsing into their former state before the
close of the last century. The destruction of these
supposed cities has been preserved; there can therefore be little doubt that the whole story has
arisen from some misconception.

The Pomptine Marshes are generally represented
as deriving their name from the city of Suessa Pometia,
which appears to have been situated somehow on their borders, though we have no clue to its precise position. 
[Via Pometa.] The "Pomptinum ager," which is repeatedly mentioned by Livy, and which was cultivated with corn, and
part of it portioned out in lots to Roman colonists
(Livy. ii. 54, iv. 25, vi. 5, 21) was probably rather
the district bordering on the marshes than the actual swamp tract, which does not appear to have
been more than occasionally inhabited; though a very
moderate amount of industry must at any time have
sufficed to bring into cultivation considerable portions
of the adjoining plain. As early, however, as the
year 312 B.C. the Appian Way appears to have been
carried through the midst of the marshes (Livy.
x. 29; Diod. x. 38); and a canal conducted along with it
was reported to have been made, which became also much resorted to as a mode of traffic.
[Via Appia.] The institution of the Pomptine
tribe in B.C. 558, and of the Ufensi tribe in B.C.
318 (Livy. vii. 15, ix. 20), would seem also to
point to the existence of a considerable population
in the neighbourhood at least of the Pomptine
Marshes; but still we have unequivocal testimony of
the marshy state of the marshes themselves
in all periods of antiquity. (Sil. Ital. viii. 380; Strab.
v. p. 333, &c.)

...
PONS AENI.

Ufens (Virg. Aen. vii. 801; Sil. Ital. viii. 380), must have been situated in the district of the Pontine Marshes, and was probably merely the name of some portion of the swamps included under that more general designation.

The line of the Appian Way was carried in a perfectly straight line through the Pontine Marshes from the station Sub Launus, at the foot of the Alban Hills, to within a short distance of Tarraconia. The stations along its course and the distances are differently given in the Itineraries; but they may all be readily determined with the assistance of inscriptions and Roman milestones still existing. At the beginning of the marshes, or rather in the level tract immediately adjoining them, was the station of TRES TABERNAE, distant 17 miles from Aricia, at point where a branch road from Antium fell into the Appian Way. The site of this was fixed by the Abbé Chaupuy and other writers at a place called Le Castelle, 3 miles on the Roman side of Cisterna; but there seems no reason to reject the distances given in the Antonine Itinerary, which would place it 3 miles further from Rome, or 3 miles beyond Cisterna, where some ruins still remain, referred by Chaupuy to the station Ad Sponnas of the Jerusalem Itinerary, but which would suit equally well for those of Tres Tabernae. Six miles from this spot, and just 39 miles from Rome (as shown by a milestone still remaining there), is a place called Torre di Trepuzzi, marking the site of TREPONTUM, the spot from whence the canal of the Decennionium commenced, and from which therefore the 19 miles from which it derived its name were measured. Four miles further on considerable remains mark the site of FORUM APPII, which in the Augustan age was a busy and thriving town; but in the fourth century had sunk to a mere Musul or post station. The Antonine Itinerary gives the distance from Rome to Forum Appii at 43 miles, which is exactly correct; from thence to Tarraconia it reckons 18 miles; the Jerusalem Itinerary makes the distance 19 miles, and gives an intermediate station called Ad Medias (Palinodie), which was 9 miles from Forum Appii and 16 from Tarraconia. The site of this is still marked by a spot called Torre di Messa, where a striking Roman monument still remains; but the real distance from Forum Appii is only 8 miles, which coincides with the Antonine Itinerary. (Itin. Ant. p. 107; Itin. Hier. p. 611.) The whole of this part of the road has been carefully examined and described by the Abbé Chaupuy (Découvertes de la Maison d'Horace, vol. iii. pp. 385—435); and the distances discussed and corrected by Westphal, (Röm. Kompagn., pp. 67—70). [E. H. B.]

PONS AENI, or, as it is called in the Penting. Table, Ad Asumum, was a frontier fort in Vindelicia on the river Aens, and was garrisoned by a detachment of cavalry. (It. Ant. pp. 335, 337; Not. Imp.) It is commonly believed that its site is now marked by the village of Pysmen, which in the middle ages bore the name of Pontana; but Muchar (Noricum, i. p. 265) identifies it with Ennodium near Krauburg. [L. S.]

PONS AERARIUS, in Gallia Narbonensis, is placed in the Jerusalem Itin. on the road from Nemausus (Nîmes) to Arles (Arlés), at the distance of xlii. from Nemausus and vii. from Arles. The Antonine Itin. marks six, from Nemausus to Arles, in one distance. The road must therefore have been straight between these two places. D'Auneille fixes the Pons at Bec over a canal which Ugerum (Bessacsin) might have crossed. This canal separated Arles, and probably manusus and Arelate, for the toll was paid at this practice in the Ro to a. 60. § 2: "Redempi exigit."}

PONS ALUUT, a station on the road from Apulia, near Egeta (Fuat, P. 181. 190).}

PONS ARGENTI.

PONS AUFIDI.

PONS AUGUSTI, on the road from Tarraconia to the Sarmizegethusa, and placed near Bistri, the river Bistra, by other writers in this, p. ii. p. 616.)

PONS AUREOLI, a highroad from Mediolanum to Milan, a. p. 268. After the death of Augustus, the soldiers of Claudio retained the name of Augus

PONS CAMPAN, by which the Romans passed to the river Bistra, by other writers in this, p. ii. p. 616.)

PONS DUBIS, in Dodea, is marked by the Cabillonum (Chlou, xiv. from Cabillonum; this site may be a place where the waters of an old river crossed the road. [It. Ant. pp. 264, 265.)

PONS MANSEU, a place in Pannonia, near to Juvia; but not

PONS MITIUS, a bridge on the Via Flaminia near Rome called the Fortuna. A bridge existed on this road at some point; there must certainly

PONS FlAMINIA.
mention of the name in history occurs in the Second Punic War, when Livy tells us that the Roman people met in the Campus Martius and marched from the Milvian Bridge to meet the messengers who brought the tidings of the defeat of Hasdrubal, B.c. 207. (Livy. xxvii. 51.) Hence, when Aurelius Victor reckons it among the works constructed by Asellius Scannius in his censorship (b.c. 110), it is evident that this can refer only to its rebuilding or restoration, for the ponte milvius has always been sailable that there was no stone bridge before that time. At the time of the conspiracy of Catalina, the Milvian Bridge was selected as the place where the ambassadors of the Allobroges were arrested by the orders of Cicero. (Sall. Cat. 45; Cic. ad. Cat. iii. 5.) It is probable that under the Emperors, if not earlier, a suburb extended along Via Flaminia as far as the Milvian Bridge. Hence we are told that it was the point from which Caesar (among his other gigantic schemes) proposed to divert the course of the Tiber, so as to carry it further from the city (Cic. ad. Att. xii. 33.); and again, the emperor Gallienus is said to have proposed to extend the Flaminia portico as far as the Milvian Bridge. (Tact. Gall. 16.) As late as the neighborhood of the bridge was occupied by low taverns, which were much resorted to for purposes of debauchery. (Tac. Ann. xiii. 47.) Its proximity to Rome, to which it was the principal approach from the N., rendered the Milvian Bridge a point of importance during civil wars. Hence it is repeatedly mentioned by Tacitus during those wars which followed the death of Nero (Tac. Hist. i. 87, ii. 89, iii. 82); and again, in A.D. 193, it was there that Didius Julianus was defeated by Severus (Eutrop. viii. 17; Victor. Cesar. 19). At a later period, also, it witnessed the defeat of Maxentius by Constantine (A.D. 312), when the usurper perished in the Tiber. (Vict. Cesar. 40; Eutrop. x. 4; Zosimus ii. 16.) Its military importance was recognized also in the Gothic Wars, when it was occupied by Vitiges during the siege of Rome, in A.D. 537; and again, in 547, when Totila destroyed all the other bridges in the neighborhood of Rome, he spared the Milvian alone. (Procop. B. G. i. 19, ii. 24.) The present bridge is in great part of modern construction; but the foundations and principal piers are ancient. (E. H. B.)

Pons Mosae, in northern Gallia, is mentioned by Tacitus (Hist. iv. 66), but there is nothing said to show where this bridge was. A Roman road ran from Adunatia (Tomerga) across the Mosse (Moasa) past Juliaca (Juliaca) to Colonia (Cologne). It is very probable that the Pons Mosae was on this route, and that it was at Maestrict. The termination triact is a corruption of the Roman word Traiectum. [Traiectum.] (G. L.)

Pons Narria. [Gallaecia, p. 934, b.]

Pons Nervinae. [Gallaecia, p. 954, b.]

Pons Nomaiarum. [Nomaiarum.]

Pons Nolea. [Gallaecia, p. 902, a.] A large bridge on the Via Salaria where that highroad crossed the Anio (Teverone) about 2 miles from Rome. From its position this is certainly the bridge meant by Livy under the name of Pons Anienis, on which the single combat of Manlius Torquatus with the Gaul is described as taking place. (Liv. vii. 9.) The situation of Nolea is well described by Pliny in his Historia Naturalis, in an inscription still remaining that the present bridge was constructed by Nares, in the room of the move ancient one which had been destroyed by Totila in A.D. 547, when he broke up the siege of Rome and withdrew to Tibur. (Procop. B. G. iii. 34; Nibby. Dict. Rom. i. p. 594.) (E. B. S.)

Pons Saravi, a bridge over the Saar (Sarve) in Gallia on the road from Divodorum (Mesos) to Argentoratum (Strasbourg). The Table marks 10 from Decem-pagi (Dijemse) to Tabernae (Saverne). Though the distances are not quite correct, it is clear that Saarburk on the Saar must be the Pons Saravi. It is certain that Saarbruck, on the Saar, for Saarbruck is more than 30 miles north of Saarburg, and quite out of the way. This is an instance in which a hasty conclusion has been derived solely from the sameness of name. (G. L.)

Pons Scaldis, or bridge over the Scheldt in North Gallia, is placed both by the Table and the Antonine Itin. The road from Turnacum (Tournay) to Bagnacum (Boulogne) is a place on the Scheldt named Escout-pont between Valenciennes and Condé which may represent the Pons. (G. L.)

Pons Servillii. [Ulytrium, Vol. ii. p. 36, b.] Pons TILURI, a station on the road from Sirmonium to Selena, in the interior of Dalmatia. (Hist. Anton. ; Thirriat; Persen. Tav.; Geogr. Univ. p. 509.) It may be identified with the passage of the river Cetina or Tettina (Tilurus), at Tripoli, with the opposite height of Gardens, where there are vestiges of a Roman town, which was probably the colony of Axium (Alexia nova), Ptol. ii. 16 (17). § 11 ; Itin. Anton.; Tess. Tab.; Orrell, Itinera inacro. 5002), where an inscription has been found commemorating the restoration of the bridge under the name of Pons Hippa, a Gracised form of the Latin name of the town, which was sometimes spelt as Equum. (Wilkinson, Dalматia, vol. i. p. 238; Neigerbar, Das Sud-Sloven, p. 178.) (E. B. J.)

Pons UCASI, a town on the Tissoe, near the Dacian border. (Itin. Ant. p. 567.) (T. H. D.)

Pons ZITHA, a station on the Roman road running along the coast-line of Syrlina, and a municipium. (Itin. Anton.; Geogr. Rav.) In the Peutinger Table it is wrongly called Lilla. Barth (Wanderungen, p. 263) has fixed its site at the promontory opposite to Minucia, where he found remains of a stone bridge. Some consider or the mainland with the island of the Lotophagi. (R.B.J.)

Pontem, AD, a town of Britain, on the road from Lundinum to Lindinum (Itin. Ant. p. 477), identified by Camden (p. 560) with Panton on the Witham, in Lincolnshire, where a great many Roman coins and antiquities have been discovered. Others take it to have been Farmstead, near Southwell, in Nottinghamshire. (T. H. D.)

PONTES, in north Gallia, is placed in the Ant. Itin. on a road from Samarobriva (Ambiens) to Gesoriacum (Boulogne): it is 36 M. P. from Samaro- briva to Pontes, and 39 M. P. from Pontes to Gesoriacum. The Table, which marks a road between Samarobriva and Gesoriacum, does not place Pontes on it, but it has been supposed that the name现金流 was supposed to be Dowriul on the Authe, 'D'Anville concludes that Pontes is Porches on the Authe, at which place we arrive by following the traces of the old road which still exists under the name of Chaussée de Drumixou. (G. L.)

Pontes, a Roman station in the territory of the Atrebates, seat of the Thanes, on the road from Calleva (Silchester) to Londinium (Itin. Ant. p. 478). It was at or near Old Windsor. (T. H. D.)

PONTES TESSEMI (Diezen), a place in
PONTIA.

Vindelicia, on the road from Amber to Parthium. (It. Ast. p. 275; comp. Muchan, Noricum, i. p. 29.)

PONTIA or PONTIAE (Vindelicia; Pontus), an island in the Tyrrhenian sea, situated off the coast of Italy, nearly opposite to the Ciscean promontory. It is the most considerable of a group of three small islands, now collectively known as the Isole di Ponta; the ancient names of which were, Parma-n exiting to the westward and the most westerly of the three, Pontia in the centre, and Simonia (Zannone) to the NE. (Plin. iii. 6. s. 12; Mel. ii. 7. § 18.) They are all of volcanic origin, like the Pithecusee (Apraria and Procytia), nearer the coast of Campania, and the island of Pandataria (now called Vendolissa), about midway between the two groups. Strabo places Pontia about 250 stadia from the mainland (v. p. 233), which is nearly about the truth, if reckoned (as he does) from the coast near Calata; but the distance from the Ciscean promontory does not exceed 16 geo. miles or 160 stadia. We have no account of Pontia previous to the settlement of a Roman colony there in n.c. 313, except that it was inhabited already by communities of Ciscean Volscians. (Liv. ix. 28; Diodor. xix. 101.) The colonisation of an island at this distance from the mainland offers a complete anomaly in the Roman system of settlements, of which we have no explanation; and this is the more remarkable, because it was not, like most of the maritime colonies, a "colonia maritima civium," but was a Colonia Latina. (Liv. xvi. 10.) Its insular situation preserved it from the ravages of war, and hence it was one of the eighteen which during the most trying period of the Second Punic War displayed its seal and fidelity to the Roman senate, when twelve of the Latin colonies had set a contrary example. (Ibid.) Strabo speaks of it as in his time a well peopled island (v. p. 233). Under the Roman Empire it became, as well as the neighbouring Pandataria, a common place of confinement for state prisoners. Among others, it was here that Nero, the eldest son of Germanicus, was put to death by order of Tiberius. (Suet. T. B. 54, Cal. 15.)

The island of Pontia is about 5 miles long, but very narrow, and interrupted by irregular bays. In some places it is only a few hundred yards across. The two minor islands of the group, Palmarvola and Zannone, are at the present day uninhabited. Varro notices Palmaria and Pontia, as well as Pandataria, as frequented by great flocks of turtle doves and quails, which halted there on their annual migrations to and from the coast of Italy. (Varr. R. R. iii. 5. § 7.)

PONTIAE (Istriae Puteoli, Sylv. p. 46), three islands off the coast of the Greater Syria. Ptolemy (iv. 3. § 36; comp. Stadiasmus, §§ 72—75) calls these Misyrys, Pontia, and Gessa. They may be identified with the reefs of Adhra. (Beesby, Expeditions to the N. Coast of Africa, p. 236, App. P. E. B. iv. 158, 159.) Some of the more eastern are wild and savage to the last degree, especially those of the interior; but on the coast Greek colonies continued to be established ever since the middle of the 7th century B.C., and rose to great power and prosperity, spreading Greek culture and civilization around them.

The modern history of the country, tradition stated that it had been conquered by Nimus, the founder of the Assyrian empire (Diod. ii. 2); after the time of Cyrus the Great it certainly was, at least nominally,
under the dominion of Persia (Herod. iii. 94, vii. 77, &c.), and was governed by hereditary satraps belonging to the royal family of Persia. In the time of Xenophon, the tribes of Pontus governed by native chiefs seem to have still enjoyed a high degree of independence. But in n. c. 365, in the reign of Artaxerxes II, Ariobarzanes subduing several of the Pontian tribes, and thereby laid the foundation of an independent kingdom in those parts. (Diod. xv. 90.) He was succeeded in n. c. 337 by Mithridates II, who reigned till n. c. 302, and who, by skilfully availing himself of the circumstances of the times during the struggles among the successors of Alexander, considerably enlarged his kingdom. After him the throne was occupied by Mithridates III, from n. c. 302 to 266; Ariobarzanes III, from n. c. 266 probably till 240. The chronology of this and the following kings, Mithridates IV, Pharmacides, and Mithridates V, is very uncertain. Under Mithridates VI, from n. c. 120 to 63, the kingdom of Pontus attained the height of its extent and power, but his wars with the Romans led to its subjugation and dismemberment. Pompey, the conqueror of Mithridates, in n. c. 65 annexed the western part of Pontus as far as Isichopolis and the frontiers of Cappadocia to Bithynia (Dion Cass. xiiii. 45; Strab. xii. pp. 641, 543; Vell. Pat. ii. 36). The Pontus we have described is that which is separated from the hills in the interior by a strip of flat marshy ground, about 5 miles in width, which in ancient times was occupied in great measure by lagunes or parului; so that its position is nearly analogous to that of the still more striking Monte Argentario. The Maritime Itinerary places it 30 miles S. of the Yas Volaterrae, and thus just about the truth (Ius. Marit. p. 501). Strabo says it was only one of the ancient Etruscan cities which was situated on the sea-shore (Strab. v. p. 223), and the remark is repeated by Piny; thus apparently excluding Cosa as well as Pyrgi and other smaller places from that designation. It is probable at all events the Pontus was the most considerable of the maritime cities, and there are no grounds for regarding it as one of the Twelve Cities of the League, or as ever rivalling in importance the great cities of the interior. Virgil indeed represents it as one of the Etruscan cities which sent forces to the assistance of Aeneas (Aen. x. 179), a statement that seems to prove his belief in its antiquity, and that of other accounts, represented it as a colony of Volaterrae, and therefore of comparatively recent date. Servius tells us that it was first founded by the Corsicans, from whom it was afterwards wrested by the Volaterrans; and distinctly represents it as of later date than the twelve chief cities of Etruria. (Serv. ad Aen. i. 49.) It probably derived itself from the Brygentes, who, according to Strabo, united with the neighbouring island of Ilva, the iron produced in the latter being all conveyed to Populonium to be smelted, and thence exported to other regions. (Strab. i. c.; Pud. Arist. de Miraq. 95; Var. ap Serv. ad Aen. x. 174.) Hence, in n. c. 205, when Scipio was fitting out his fleet for Africa, and the Etruscan cities came forward to represent it as of Pontine contributions, the Populonians endeavoured to combine with him in iron. (Liv. xxviii. 45.) This is the first occasion on which the name is mentioned in history; a few years later (n. c. 202) we are told that the consul Claudius Nero, on his voyage to Sardinia, took refuge with his fleet in the port of Populonium from the violence of a storm. (Id. xxx. 99.) No further mention of it is made, except that Strabo states it is from Strabo that he sustained a siege from the forces of Sulla at the same time with Volaterrae, and it appears to have never recovered the blow it then received; for in the time of that geographer the city itself was almost desolate, only the temples and a few houses remaining. The port, however, was still
frequented, and a town had grown up around it at the foot of the hill. (Strab. v. p. 233.) Its name is still mentioned as an existing town by all the other geographers, and Ptolemy especially notices the city as well as premonitory of Populonium (Mel. ii. 4. § 9; Plin. iii. 5. s. 8; Ptol. iii. i. § 4); but this is the last evidence of its existence; and before the close of the Western Empire it had fallen into complete decay. It is described by Rutillus at the beginning of the fifth century as entirely deserted, nothing remaining but fragments of its massive walls and the fallen ruins of other edifices. Gregory the Great also describes it towards the close of the sixth century, as in a state of complete decay, though retaining an episcopal see; but at a later period of the middle ages a feudal castle was erected on the site, which, with the few adjacent houses, still bears the name of Populonia, and is a conspicuous object from a distance. (Rutull. Ittii. i. 401—414; Gregor. Ep. ap. Checer. Ital. p. 514.)

The only Etruscan remains now existing at Populonia (with the exception of a few tombs of no interest) are those of the ancient walls, which may be traced in fragments all round the brow of the hill, throughout the entire circuit of the city. This did not exceed a mile and a half in circumference; it was of an irregular form, adapted to the requirements of the ground. The walls are constructed of rude masses of stone, arranged, like those of Volterra, in horizontal layers, but with little regularity; they are not, however, nearly so gigantic in character as those of Volterra, Fiesole, or Corsone. Within the circuit of the walls are to be seen some vaulted chambers, six in a row (which have been erroneously called an amphitheatre), a mosaic pavement, and some reservoirs of water, all unquestionably of Roman date. (Dennis's Etruria, vol. ii. p. 236—238.)

On the highest point of the hill, in the days of Rutillus, stood a lonely watch-tower, serving at the same time as a beacon for ships. (Rutull. Ittii. i. 407.) It was from this point that, according to Strabo, the view comprised not only Corsica (which is mentioned in many points of the mainland), but Sardinia also. (Strabo, l. c.) But this last assertion, though it has been repeated by many writers, is certainly erroneous, as, even if the distances were not too great, the nearer mountains of Ebus would effectually conceal those of Sardinia from the view. (Dennis, vol. ii. p. 239.)

We learn from the Tabula that there were hot springs in the territory of Populonium, which had given rise to a bathing-place called the Aqua Populoniac (Tab. Pent.) These were evidently the same now known as Le Caldane, at the foot of Campiglione, about 6 miles from Populonium, which have been identified by some writers with the "aqua calidae" mentioned by Ptolemy (ii. 10. a. 106); but there is no authority for placing Vetulonia in this neighbourhood. (Dennis, vol. ii. p. 225.) [VETULONIA.]

Populonium was the only city of Etruria which had a silver coinage of its own, of a very peculiar style, the reverse being generally quite plain, without type or legend, and not incuse or indented, as on the earliest Greek coins. The ordinary type is a Gorgon's head or mask, similar to that on many Etruscan monuments. The copper coins give the Etruscan name of the city "Populana" at full— ITTIATNA. It is not improbable (as suggested by Millingen) that the Populonians derived the art of coinage from the Phocaeans of Corsica; but there is certainly no ground for admitting the existence of a Phocaean colony at Populonium itself. (Millingen, Nummus. de l'Asie, Italie, p. 163; Eichler, Num. Vet. Anc. op. pp. 10—18.)

POFTHRIS.

PORCIPERA (Pelorina), a river of Liguria, flowing into the sea about 2 miles W. of Genoa. The name is written Porcifera by Pliny (iii. 5. s. 7), the only one of the geographers who mentions it; but in a curious inscription found near Genoa, it is variously written Porcifera and Porcifera. (Genoa.)

PORDOSELENE (Porosulon), Ekt. Porphyreon, the chief of the Heaconites, a group of small islands lying between Lesbos and the coast of Asia. It contained a town of the same name (Sclav. p. 36; Hudson; Strab. xii. p. 618; Steph. Byz. s. v.). Strabo says (l. c.) that some, in order to avoid the dirty pollution presented by this name, called it Porosulon (Porosulon), which is the form employed by Ptolemy (v. 2. § 5); Pliny (v. 31. s. 38), and Aelian (N. A. ii. 6). At a still later time the name was changed into Proselea, under which form the town appears as a bishopric see. (Hieroc. p. 686; Concil. Chalc. p. 530.)

POESINAS. (Phireus.)

POROSELENE. (Porosulon.)

PORPHYREON (Porosulon), Ekt. Porphyreon, a city of Phocis, mentioned by Sclavus (p. 42; Hudson) between Berytos and Sidon, and marked in the Jerusalem itineraries (where it is written Parphyrioni, p. 583, Wessel), as 5 Roman miles N. of Bebulla. Porphyrion is called a village upon the coast. (Hist. Agr. c. 30. p. 164, Bonn.) It is mentioned by Polybius (v. 65) from whose narrative we learn that it was in the neighbourhood of Platannus. (Platana.) Hence it seems to be correctly placed at the Assa Nise Fisazas, where Pococks relates (vol. ii. p. 432) that he saw some broken pillars, a Corinthian capital, and inscriptions on each side of a mountain termus; this is the side of the mountain, at the back of the Assa, where there are extensive excavated tombs, evidently once belonging to an ancient city. The Crusaders regarded Hasina as the ancient Porphyreon; but there is no authority that a city of this name ever stood in the bay of Assa. Justinian built a church of the Virgin at Porphyreon (Procop. de Aedif. v. 9, p. 329); and it was a place of sufficient importance to be made a bishopric under the metropolite of Tyre. (Robinson, Biblical Research, vol. iii. p. 432.)

POFTHRIS. (Nistrus.)
PORPHYRITES MONS.

PORPHYRITES MONS (Porphyrites Mons, Plut. iv. 5. § 27), a long but very lofty range of mountains which ran along the western shore of the Arabian Sea, nearly from lat. 26° to 27° N. Towards the sea its sides were abrupt, although occasionally scooped into serviceable harbours, e.g. the Portus Albus and Phalerotes. On the land side it sloped more gradually, breaking, however, the eastern desert with numerous bluffs and ridges, sending forth Dietes as Tentyes and Antaeopolis B. and N. respectively. [W. B. D.]

PORSLÜKE, another name for Maximianopolis [MAXIMIANOPOLEIS].

PORTA AUGUSTA (Πορτα Αβγουστα, Plut. lii. 6. § 50), a town of the Vaccaei, in Hispania Tarraconensia; perhaps Torcuemada. [T. H. D.]

PORTHEMUS (Πορθήμος), a harbour in Eubea, belonging to Eretria, described by Demosthenes as opposite to Attica, is the modern Porto Bòscolo, immediately opposite to Rhynnos, in the narrowest part of the Euboean channel, where the breadth is only two miles. It was destroyed by Philip, after expelling the Eretrians; but its advantageous port was for many centuries the place of Athenian commerce. [Dem. Phil. iii. pp. 119, 125, iv. p. 133, de Cor. p. 248; Plin. iv. 12. x. 21; Hieroc. p. 645; Harpocr. Phot. Suid. s. v. Πορθήμος; Leake, Northern Greece, vol. ii. p. 435.]

PORTUS ABUCINI, is mentioned in the Notitia of the Gallic province as in a "Provincia Maxima Sequanorum." It appears to be Portus Aosta, a town of the Sequani, of Ant. Sulp. [G. L.]

PORTUS ACHAERIUM, a harbour in European Sarmatia, upon the coast of the Euxine, and upon the strip of land called the Dromos Achilles. (Plin. iv. 12. a. 26.) [See Vol. I. p. 20, a.]

PORTUS AEGEPATIACI, is mentioned in the Notitia Imperii as being in Belgica Secunda; "Tribunus militum Nerviorum portus Apaepatia." It is a Roman town on the coast southeast. (D. Laville Notes, § 2.) [G. L.]

PORTUS AGANUS. [GARGANUS.]

PORTUS ALBURNUS. [ALBURNUS MONS.]

PORTUS ARGUS. [ILVA.]

PORTUS ARTABORUS. [ARTABORUS.

PORTUS.

PORTUS AUGUSTI. [ONTIA.]

PORTUS COSANUS. [UCORA.]

PORTUS DELPHINI (Plin. iii. 11. 7; Phil. Miscell. Ant. p. 292), a small port on the coast of Liguria, still called Porto Fino, situated at the SE. extremity of a great mountain promontory, which projects into the sea between Genoa and Savona, and forms one of the most striking natural features of that coast. [E. H. B. E.]

PORTUS ERICHI. [LUVA.]

PORTUS GARNAE. [GARGANUS.]

PORTUS HANNIBALIS, a town on the S. coast of Lusitania, not far from Lacobriga (Mela, iii. 1; Isid. Or. xvi. 9), near Abor, where there are traces of Punie ruins. (Flores, Exp. s. xiv. p. 311.) [T. H. D.]

PORTUS HERCULI LIBURI. [PHRAS.]

PORTUS HERCULIS MONECOI. [MONECOI.]
POSEIDONIUM, or POSIDIDIUM (Poseidonion, Thuc. iv. 139; Posidion, Liv. xiv. 11), the SW. cape of Pallene, probably so called from a temple to Poseidon, which still retains its name vulgarly pronounced Posidiski. (Leake, Northern Greece, vol. iii. p. 136.) Müller (Geogr. Graec. Mem. vol. i. p. 39) identifies it with the Tharambres of Skylax (p. 26; comp. Θαρμαθρ, Herod. vii. 123; Θαρμαθρ: Eth. Θαρμαθρα, Step. B.; Lycochr. 1405), which Leake and Kiepert place near the Canastrates Prom., but as Skylax interposes Scione between them, Tharambres corresponds better with Posidiski. [E. B. J.]

POSEIDIANUM, or POSIDIDIUM (Poseidonii, to the name of several promontories sacred to Poseidon. I. In Europe. I. A promontory on the coast of Lucania, opposite to the little island of Leucosia, from which it is still called Petra della Locosa. [Leucosia.]

2 The SW. cape of Pallene in Macedonia, also called Poseidonium. [Poseidionum]: Between Onchesmus and Bouthroton, opposite the NE. of Coryra. (Strab. vii. p. 324; Ptol. iii. 14. § 4; Leake, Northern Greece, vol. i. p. 92.)

3 A promontory in Thessaly, in the district Phthiotis, described by Strabo as lying between the Malac and Pagassaeus gulf, is the promontory called (the Pagassaeus gulf of vol. i. p. 85.) It is called Zalasium by Livy, now C. Sestus (Strab. vii. p. 330, Fr. 32; Ptol. iii. 13. § 17; Liv. xxxi. 46, XXXII. 46, North Greece, vol. i. p. 351.).

POSIDIONUM, or POSIDIDIUM (Poseidionii). II. In Asia. 1. The eastermost promontory of the island of Samos. (Strab. xiv. p. 637.)

2 A promontory on the coast of the island of Chios (Strab. xiv. p. 644; Ptol. v. 2. § 80), now called Cape Helene.

3 A promontory of Bithynia, at the northern extremity of the bay of Cius or Myrina, forming the termination of Mount Argonauticus, is now called Cape Bozburun, in the Sea of Marmora. (Ptol. v. 1. § 4; Marcian, p. 70; Skylax, p. 55, where it is called simply δωροφαται ραι της Κασπίας.)

4 A promontory on the coast of Cilicia, 7 stadia to the west of the town of Mandane, is now called C. Kielisman. (Stadiasmus. Mar. Magm. § 175.)

5 A promontory on the south-west coast of Caria, south of Miletus, to the territory of which it belonged. It forms the northern extremity of the Lycos, and is called a small town of the same name. (Polyb. xvi. 1; Strab. xiv. pp. 639, 651, 658; Plin. v. 31; Pomp. Mela, i. 17; Stadiasmus. Mar. Magm. §§ 275, 275, 276.) Its modern name is C. Baba or del Arbora. [L. S.]

6 A promontory in Arabia, on the eastern side of the entrance of the gulf of Beroeopos, where was a garrison of the Rom. army at Poseidon, which was erected by Ariston, one of whom the Ptolemais had sent to explore the Arabian gulf. This promontory is now called Ras Mohammed. (Artemid. ap. Strab. xvi. p. 776; Diod. iii. 42.) Strabo, or

POTENTIA, or POSTUMIA (Postumia). A fortress in Etruria, at the mouth of the river Tiber, according to Livy (ibid. xiv. 37, 53), was the modern Saloedo, between Osgaia and Ascogna. (T. B. D.)

POSTUMIA, or POSTUMIANA CASTEREA, a fortress in Hispania Baetica, seated on a hill near the town of Solothurn, where it is still called Caceria della Leoncini (Marina, iii. 2; Flores, Exp. S. x. p. 150, iii. p. 14.).

POTAMI (Ποταμος), a fort on the north-eastern part of the coast of Pagapagonia, with a harbour for small craft. According to Arrian (Perip. P. E. 157) the Potami was a part of the Paphagonia, but according to others only 190. (Marcian, p. 72; Anonym. Perip. P. E. 7, who places it 100 stadia to the SW. of Cape Syria.)

POTAMIA (Ποταμια), a district in the SW. of Pagapagonia mentioned by Strabo (xii. p. 583), but without defining its extent or limits. [L. S.]

POTAMOS, or POTAMI. [ATTICA, p. 4.) POTAMI (Ποταμια), or POTAMOS, is mentioned, Agatharch. de Ais, Ποταμια, Egypt. § 104, ed. Paris, 1855), a place mentioned by Agatharchides, which Alexander the Great founded at the mouth of the Indus. Diodorus calls it Πωταμος (i. 46). It has been suspected, with some reason, that the name in both of these authors is an error for Potamia (the present Tatta), which is spoken of in similar terms by Arrian (Hist. x. 4, 37; Jason ii. 2) and by Pliny (ii. 75). On the other hand, the name may readily be conceived as a Graecism for Pataos, a common Indian word for a town or city. [V.]

POTENTIA. 1. (Ποταμίας: Eth. Potentias: Σαμαία ο Πόταμων), a town of Picosium, situated at the mouth of the river S. of the same name, still called the Potamia, and 18 miles S. of Ancona. We have no means of determining whether or not there was an ancient town on the spot previous to the Roman conquest of Picosium; but in b. c. 184 a Roman colony was settled there, at the same time with that at Pisaeum in Umbria. (Liv. xxxi. 44, Vell. Pater. i. 15). The older editions of Livy have Potentia, but there seems no doubt that the true reading is Potentia.) It was, as well as the latter, a "colonia civilis," but does not seem to have ever risen to a position of importance; and with the exception of an accidental notice in Cicero of an earthquake that occurred in its territory (Cic. de Fin. 78), it is not mentioned in any history. It is, however, mentioned by all the geographers as one of the towns of Picosium, and at a later period its name is still found in the Itineraries. (Strab. v. p. 241; Mal. ii. 4. § 6; Plin. iii. 13. a. 18; Ptol. iii. 1. § 31; Itin. Asiat. pp. 101, 313; Tab. Peut.) From the Liber Coloniarum we learn that the last-mentioned Potamia, which there is no evidence of its having retained the rank of a colony under the Roman Empire. (Zumpt, de Col. p. 336.) It became
POTHEUS.  -

Episcopal see in the early ages of Christianity; and the time of its decay or destruction seems to be unknown; but the site is now wholly deserted. Considerable remains of the ancient city are still visible in the time of Holstenius in the plain on the right bank of the Potomac, near its mouth; and the name is still retained by an ancient church and abbey called Sio Maria a Potenae, about a mile from the point of Recanati. (Holsten. Not. ad Cines, p. 184.)

2. (Itamella, Pot.; Eth. Potentiana Potenae), a city of the interior of Lucania, situated in the valley of the Casentynus or Basiento, not far from its source, and above 60 miles from the Gulf of Tarentum. No mention of it occurs in history, and though is noticed by Pline, Pashy, and the Liber Coloniarum, among the municipal towns of Lucania, we have no indication of its superior importance. But from the numerous inscriptions discovered there, it is evident that it was, under the Roman empire, a flourishing municipal town, and must at that period have been one of the most considerable in Lucania, the towns of that province having, for the most part, been taken by the Tarentine. The Itineraries give us two lines of road passing through Potentiae, the one from Velurnia southwards towards Grumentum and Nerulum, the other from Salernum and the valley of the Silarus, which appears to have been continued in the direction of Tarentum. (Plin. iii. 11. a. 15; Poli. iii. 1. § 70; L. C. Col. iv. 1. p. 1001; T. P. Post.; Mommsen, J. R. N. pp. 23, 24.) The modern city of Potenza is the capital of the Basilicata, a province which comprises the greater part of the ancient Lucania; it does not occupy precisely the site of the ancient town, the remains of which are visible at a place called La Murata, in the valley below the modern city. (Romanelli, vol. i. p. 435.)

POTHEREUS, a river of Cretes mentioned by Vitruvius (i. 4), is identified by some with the Catahractes of Potomos. (Catahractes.)

POTIDAEA. [Casandra.]  -
POTIDANIA (Poridadia; Eth. Potidanaria), a town in Aetolia Episcetos, on the borders of Locris, and a part of the territory of Pheneus. (Thuc. iii. 96; Liv. xxvii. 1; Steph. B. a. v.)

POTINAE (Pottina; Eth. Potinii, Pottinii, fem. Potinae), a village of Boeotia, on the road from Thbes to Pataea, distant 10 stadia from the former city. It was in ruins in the time of Pausanias, and contained a grove sacred to Demeter and Kore (Proserpine). Potinace is celebrated in mythology as the residence of Glaucus, who was turned to pieces by his infuriated mares. (Xen. Hell. vii. 4. § 51; Paus. ix. 8. §§ 1, 3; Steph. B. a. v.; Pinn. xxv. 8. 53; Virg. Georg. iii. 268; Ov. Met. 557; Dict. of Biogr. art. Glauclus.) According to Strabo (p. 412) some authorities regarded Potinace as the Hypothesis of Homer (ii. 5. 503). Cell places Potinace in the Aetolian province of the modern village of Tafi. (Cell, Itineraries, p. 110; comp. Leake, Northern Greece, vol. ii. p. 323.)

PRAESA. [Phaeata.]  -
PRACTIUS (Praetorius), a small river in the north of Tress, flowing from Mount Ida, and discharging itself into the Hellespont a little below the mouth of the Serebanus. (Procopius, Antiq. i. 12. § 6.) Some identify it with the modern Bajor, and others with the Musakakoi-Sia. (L. S.)

PRAENESTE (Praenestes, Strab. Appian; Praenestus, Dion. Cass. 12. Praenestes, or Praeneestes, Praenestes, Potenae), one of the most ancient, as well as in early times one of the most powerful and important, of the cities of Latium. It was situated on a projecting point or spur of the Apennines, directly opposite to the Alban Hills, and nearly due E. of Rome, from which it was distant 23 miles. (Strab. v. p. 258; Itiner. Rom. p. 502; Westphal, Römische Kompagnie, p. 106.) Various mythical tales were current in ancient times as to its founder and origin. Of these, that adopted by Virgil ascribed its foundation to Caeculus, a reputed son of Vulcan (Virg. Aen. vii. 678); and this, we learn from Solinus, was the tradition preserved by the Praenestines themselves (Solin. v. 3. § 9). Another tradition, obviously of Greek origin, derived its name and foundation from Praenesteus, a son of Latinus, the offspring of Ulysses and Circe (Steph. B. a. v.; Solin. loc. cit.). Strabo also calls it a Greek city, and tells us that it was previously called Plautopseus (Strab. v. p. 258). Another form of the same name is given by Pline (iii. 5. 39), who tells us it is the site of the ancient city, finally, as if to complete the series of contradictions, its name is found in the lists of the reformed colonies of Alba, the foundation of which is ascribed to Latinus Silvius (Vest. Orig. Gens. Rom. 17; Dion. VIII. ap. Euseb. Arm. p. 185). But there seems no doubt that the earlier traditions were those which assigned it a more ancient foundation, and that the first mention of its name in history is in the list of the cities of the Latin League, as given by Dionysius, and there can be no doubt of its having formed an important member of that confederacy. (Dionys. v. 61.) But as early as n. c. 499, according to Livy, it quitted the cause of the confederates and joined the Romans, an event which latter historian places just before the battle of Regillus. (Livy. ii. 19.) Whether its separation from the rest of the Latins was permanent or not, we have no information; but on the next occasion when the name of Praeneste occurs, it was still in alliance with Rome, and suffered in consequence from the ravages of the Volscians and Galatians. (Liv. iii. 8.) The capture of Rome by the Gauls seems, however, to have introduced a change in the relations of the two cities. Shortly after that event (n. c. 383) the Praenestines are mentioned as making hostile incursions into the territories of the Gabians and Labianae; the Romans at first treated this breach of faith with neglect, apparently from unwillingness to provoke so powerful an enemy; but the next year, the Praenestines having sent an army to the support of the revolted colonists of Velitrae, war was formally declared against them. The Praenestines now joined their former enemies the Volscians, and, in conjunction with them, took by storm the Roman colony of Satricum. (Livy. vi. 21, 32.) The next year the Volscians and Praenestines are again joined by Camillus, but no mention is made of the Praenestines as taking part in it. The following season, however (n. c. 380), they levied a large army, and taking advantage of the domestic dissensions at Rome, which impeded the levy of troops, they advanced to the very gates of the city. From thence they withdrew, however, upon the arrival of a Galatian army, which was attacked and defeated by T. Quintius Cincinnatus, who had been named in all haste dictator. So complete was their rout that they not only fled in confusion to the very gates of Praeneste, but
PRAENESTE.

Cincinnatus, following up his advantage, reduced eight towns which were subject to Praeneste by force of arms, and compelled the city itself to submission (Liv. vi. 26—29). There can be little doubt that the statement of Livy which represents this as an unqualified surrender (deditus) is one of the exaggerations by which the peace of this early Roman history, but the inscription noticed by him, which was placed by Cincinnatus under the statue of Jupiter Imperator, certainly seems to have claimed the capture of Praeneste itself as well as its dependent towns. (Fast. s. v. Triesteum. p. 363.)

Yet the very next year the Praenestines were again in arms, and stimulated by other Latin states against Rome. (Liv. vi. 30.) With this exception we hear no more of them for some time; but a notice which occurs in Diodorus that they concluded a truce with Rome in B.C. 351, shows that they were still acting as an independent part, and kept aloof from the other Latins. (Diod. xvi. 45.) It is, however, certain that they took a prominent part in the great war of Rome in B.C. 340. In the second year of that war they sent forces to the assistance of the Pedani, and, though defeated by the consul Aemilius, they continued the contest the next year together with the Tiburtines; and it was the final defeat of their combined forces by Camillus at Pædes (L. c. 338) that eventually terminated the struggle. (Liv. viii. 45.) But in respect to the distinction was put to the sword, and the towns given up to plunder; its fortifications were dismantled, and a military colony settled by Sulla is possession of its territory. (Appian, L. c.; Liv. xii. 194; Strab. v. p. 259; Fl. iii. 21.) The towns are said to have been at this time transferred from the hill to the plain, which enabled the towns of Fortune with its appurtenances so extended and enlarged as to occupy a great part of the site of the ancient city. (Nibby, Dizion. vol. ii. p. 481; but see Bornemann, All. Lat. Chronogr. p. 207, no. 439.)

But the citadel still remained, and the natural height of the position rendered Praeneste always a place of importance as a stronghold. Hence we find it mentioned as one of the points which Catilina was desirous to occupy, but which had been staunchly guarded by Cicero (Gosc. d. cii. 8); and at a later period L. Antonius retired thither in B.C. 41, on the first outbreak of his dispute with Octavius, and from thence endeavoured to dictate terms to his rival at Rome. Fulvia, the wife of M. Antonius took refuge there at the same time. (Appian, B. C. v. 31, 23, 29.) From this time we hear but little of Praeneste in history; it is probable from the terms in which it is spoken of both by Sestus and Appian, that it never recovered the lost influence or prosperity by Sulla (Strab. i. c.; Appian, B. C. i. 94); but the new colony settled at that time rose again into a flourishing and considerable town. Its proximity to Rome and its elevated and healthy situation made it a favorite resort of the Romans during the summer, and the poets of the first century of the Empire abound in allusions to it as a cool and pleasant place of residence. (Ov., Fast. xx. 30; 7. Stat. Serm. iv. 2. 15; Plin. Ep. v. 6. § 45; Flor. i. 11.) Among others it was much frequented by Augustus himself, and was a favorite place of retirement of Horace. (Stat. Aug. 73; Hor. Carm. iii. 4. 25; Ep. i. 2. 1.) Tiburinus also recovered there from a dangerous attack of illness (Galvani, ed. 1803, p. 78), and his descendants built on the site of the old town which, though not comparable to his celebrated villa at Tibur, was apparently on an extensive scale. It was there that the emperor M. Aurelius was residing when he lost his son Annius Verus, a child of seven years old. (Jul. Capit. M. Ant. 31.)

Praeneste appears to have always retained in hands of the Marian party till B.C. 69, when it afforded a shelter to the younger Marius with the remains of his army, after his defeat by Sulla at Sacripontes. The natural strength of the city had been greatly increased by new fortifications, so that Sulla abandoned all idea of reducing it by force of arms; and was content to live in its walls, and to trust to the slower process of a blockade, the command of which he entrusted to Lucretius Oufala, while he himself carried on operations in the field against the other leaders of the Marian party. Repeated attempts were made by these generals to relieve Praeneste, but without effect; and at length, after the great battle at the Colline Gate and the defeat of the Samnite general Postius Teleinus, the inhabitants opened their gates to Oufala. Marius, despairing of safety, after a vain attempt to escape by a subterranean passage, put an end to his own life. (Appian, B. C. i. 87—94; Plut. Mor. 46; Sall. 29, 34, 32; Vell. Pat. ii. 59; Liv. Epit. lxxxvii., lxxxviii.) The city itself was afterwards given to the use of Sulla, and its name and distinction were put to the sword, and the towns given up to plunder; its fortifications were dismantled; a military colony settled by Sulla is possession of its territory. (Appian, L. c.; Liv. xii. 194; Strab. v. p. 259; Fl. iii. 21.) The towns are said to have been at this time transferred from the hill to the plain, which enabled the towns of Fortune with its appurtenances so extended and enlarged as to occupy a great part of the site of the ancient city. (Nibby, Dizion. vol. ii. p. 481; but see Bornemann, All. Lat. Chronogr. p. 207, no. 439.)
colonial rank and condition. Cicero mentions it by the title of a Colonia (Cic. in Cat. i. 8); and though neither Pliny nor the Liber Coloniarum give it that appellation, its colonial dignity under the Empire is abundantly attested by numerous inscriptions. (Zumpt, de Colom. p. 234; Lüb. Colon. p. 236; Orell. Inscr. 1851, 3051, &c.) A Gallius indeed has a story that the Praenestines applied to Tiberius as their coloni and were granted a Colonia Municipiibus; but if their request was really granted, as he asserts, the change could have lasted for but a short time. (Gell. N. A. xvi. 18; Zumpt, L. c.)

We find scarcely any mention of Praeneste towards the decline of the Western Empire, nor does its name figure in the Gothic war which followed; but it appears again under the Lombard possessions and bears a conspicuous part in the middle ages. At this period it was commonly known as the Civitas Praenestina, and it is in this form of the name—which is already found in an inscription of a.p. 408 (Orell. Inscr. 108)—that it has been gradually corrupted into its modern appellation of Palestrina.

The most famous chance to fall upon the site and gigantic substructions of the temple of Fortune, which, after its restoration and enlargement by Sulla, occupied the whole of the lower slope of the hill, the summit of which was crowned by the ancient citadel. This hill, which is of very considerable elevation (being not less than 2400 feet above the sea, and more than 1500 above its immediate base), presents a great buttress or bastion from the angle of the Apennines towards the Alban Hills, so that it looks down upon and seems to command the whole of the Campagna around Rome. It is in this position, combined with the great strength of the citadel arising from the elevation and steepness of the hill on which it stands, and the position of Praeneste having been of such importance. The site of the ancient citadel, on the summit of the hill, is now occupied by a castle of the middle ages called Castel S. Pietro: but a considerable part of the ancient walls still remains, constructed in a very massive style of polygonal blocks of limestone; and two irregular lines of wall of similar character flank the lower town, which they evidently served to connect with the citadel above. The lower, or modern town, rises in a somewhat pyramidal manner on successive terraces, supported by walls or facings of polygonal masonry, nearly resembling that of the walls of the city. There can be no doubt that these successive stages or terraces at one time belonged to towns of the tenth of Fortune; but it is probable that they are of much older date than the time of Sulla, and previously formed part of the ancient city, the streets of which may have occupied these lines of terraces in the same manner as those of the modern town do at the present day. There are in all five successive terraces, the highest of which was crowned by the temple. Originally it stood on one of the terraces similar building with a vaulted roof, the ruins of which remained till the end of the 13th century, when they were destroyed by Pope Boniface VIII. Below this was a hemicycle, or semicircular building, with a portico, the plan of which may be still traced; and on one of the inferior terraces there stood a small temple, the most perfect and interesting in existence. Various attempts have been made to restore the plan and elevation of the temple, an edifice wholly unlike any other of its kind; but they are all to a great extent conjectural. A detailed account of the existing remains, and of all that can be traced of the plan and arrangement, will be found in Nibby. (D'An- torrè, vol. i. p. 494—510.)

The celebrity of the shrine or sanctuary of Fortune at Praeneste is attested by many ancient writers (Ovid, Fast. vi. 61; Sil. Ital. viii. 366; Lucan, ii. 194; Strab. v. p. 238), and there is no doubt that it was derived from a cult connected with the worship of Jupiter and Saturn. Cicero, who speaks of the temple in his time as one of great antiquity as well as splendour, gives us a legend derived from the records of the Praenestines concerning its foundation, and the institution of the oracle known as the Sortes Praestinae, which was closely associated with the worship of Jupiter and Saturn. (Cic. de Div. ii. 41.) So celebrated was this mode of divination that not only Romans of distinction, but even foreign potentates, are mentioned as consulting them (Val. Max. i. 3. § 1; Liv. xlv. 44; Propert. iii. 24. 3); and though Cicero treats them with contempt, as in his day obtaining credit only with the vulgar, we are told by Suetonius that they were revered from religious scruples from interfering with them, and Domitian consulted them every year. Alexander Severus also appears, on one occasion at least, to have done the same. (Suet. Tib. 63, Domit. 15; Lamprid. Alex. Ser. 4.) Numerous inscriptions also prove that they continued to be frequently consulted at a late period of the Empire, and it was not till after the establishment of Christianity that the custom fell altogether into disuse. (Inscr. ap. Bormann, pp. 212, 213; Orelli, Inscr. 1756—1759.)

The Praenestine goddess seems to have been specially known by the name of Fortuna Primigenia, and her worship was closely associated with that of the infant Jupiter. (Cic. de Div. i. c.; Inscr. sup. viii.) Another title given to Jupiter at Praeneste was specially worshipped at Praeneste was that of Jupiter Imperator, and the statue of the deity at Rome which bore that appellation was considered to have been brought from Praeneste (Liv. vi. 29).

The other ancient remains which have been discovered at Palestrina belong to the later city or the colony of Sulla; and are found in the lower town, where they evidently served to connect with the citadel above. The lower, or modern town, rises in a somewhat pyramidal manner on successive terraces, supported by walls or facings of polygonal masonry, nearly resembling that of the walls of the city. There can be no doubt that these successive stages or terraces at one time belonged to towns of the tenth of Fortune; but it is probable that they are of much older date than the time of Sulla, and previously formed part of the ancient city, the streets of which may have occupied these lines of terraces in the same manner as those of the modern town do at the present day. There are in all five successive terraces, the highest of which was crowned by the temple. Originally it stood on one of the terraces similar building with a vaulted roof, the ruins of which remained till the end of the 13th century, when they were destroyed by Pope Boniface VIII. Below this was a hemicycle, or semicircular building, with a portico, the plan of which may be still traced; and on one of the inferior terraces there stood a small temple, the most perfect and interesting in existence. Various attempts have been made to restore the plan and elevation of the temple, an edifice wholly unlike any other of its kind; but they are all to a great extent
tending to prove the continued importance of Prae-
neste throughout the period of the Roman Empire. (Nibby, vol. ii. pp. 513—515; Foggini, l.c. pp. v—
viii.) Other inscriptions mention the existence of a
theatre and an amphitheatre, a portico and curia,
and a gymnasium; but remains of any of these
edifices can be traced. (Gruter, Insacr. p. 132;
Orelli, Insacr. 2552; Bormann, note 434.)

The celebrated grammarians Verrius Flaccus, al-
ready mentioned, was probably a native of Prae-
neste, as was also the well-known author Aelius
 ánus, who, though he wrote in Greek, was a Roman citi-
zen by birth. (Orelli, s. v. Aelius.) The family
of the Anicii also, so illustrious under the Empire,
seems to have derived its origin from Praene
ne, as a Q. Anicius is mentioned by Pliny as a magistrare
of that city as early as b. c. 304. (Plin. xxxii. 1.
6.) It is probable also that in Livy (xliv. 39) we
should read M. Anicius for Mancius. It is re-
markable that the place-names appear to have had
certain dialectic peculiarities which distinguished
them from the other Latins; these are more than
once alluded to by Plautus, as well as by later
grammarians. (Plaut. Trinum. iii. 1. 8, Truc.
iii. 2. 23; Quintil. Inst. i. 5. § 56; Fest. s. a. Vephe
nus, id. s. a. Tongere.)

Praeneste was a purely Latium city noted for the
excellence of its nuts, which are noticed by Cato.
(R. R. 3. 143; Plin. xviii. 13. 21; Nasvius, op.
Macrobr. Sat. iii. 18.) Hence the Praenestines
seem to have been nicknamed Vicusculae; though another explanation of the term is given by
Festus, who derives it from the walnuts (inacea) with
which the Praenestine garrison of Cassilinum
is said to have been fed. (Cic. de Or. ii. 68; Fest.
 s. a. Vicusculae.) Pliny also mentions the roses of Prae-
neste as among the most celebrated in Italy; and its
wine is noticed by Athenaeus, though it was ap-
parently not one of the choicest kinds. (Plin. xxxi.
4. 10; Athen. i. p. 26, f.)

It is evident from the narrative of Livy (vi.
29) that Praeneste, in the days of its independence,
like Tibur, had a considerable territory, with at
least eight smaller towns as its dependencies; but
the names of none of these are preserved to us,
and we are wholly unable to fix the limits of its
territory.

The name of Via Praenestina was given to the
road which, proceeding from Rome through Gabii
direct to Praeneste, from thence rejoined the Via
Latina at the station near Anagnia. It will be
considered in detail in the article VIA 
PRÆNESTINA.

[PRAEÆNÉTUS (Pópóvævo)], a town on the coast
of Bithynia, on the north side of Mount Arganthoni-
nus, and at the south entrance of the Simus
Astacenus. It was situated 28 Roman miles to
the north-west of Nicaea; and Stephanus B., who calls
it Pópóvævo, states that it was founded by the
Phoenicians. If this be true, it would be a very
ancient place, which can scarcely be conceived, as it
is mentioned only by very late writers. (Pallad. Viti.
Chryse. p. 75; Socra. vi. 16; Hieroc. p. 691, where
it is called Printron; Toth. Poëling, where it is
written Procteis.) According to Cedrenus (p. 457),
it was destroyed by an earthquake. Its site seems to
answer to that of Debrende. [L. S.]

PRAETORIA AUGUSTA.

COIN OF PRAEIUS OR PRIAMUS.

PRAETORIA AUGUSTA. [AUGUSTA PRAETORIA.]

PRAETORIUM. There were places of this name in Gallia, Hispania, and in other countries which the Romans occupied. A Praetorium is the residence of a praetor and the seat of the supreme court. The word praesus was also used to signify a praetorian palace or building. The table marks a praetorium in Gallia, on a road from Augustoruma (Limoges). At the Praetorium the road divides, one branch going to Augustonemus (Clermont Ferrand in the Auvergne) and the other to Avaricum (Bourges). It is not possible to fix the site of this Praetorium.

PRAETORIUM. 1. A town in the territory of the Lacotati, in the NE. of Hispania Tarraconensis, and on the road from Taraco, in Gaul, to Barcino. (Iustin. Ant. p. 398). Usually identified with La Roca, where there are still considerable Roman remains. (Marsa, Hisp. ii. 20).

2. (Hercopolicus, Ptol. ii. 5. § 17), a place in the most N. part of Braga in the territory of the Parisi, whence there was a separate road from the Roman Wall to Erboracum (Iustin. Ant. pp. 464, 466). It is supposed by Camden (p. 871) to be Beverley in Yorkshire; by others it has been variously identified with Patrixton, Heberstone, Hornsea, Kingston, and Flingborough. Some writers distinguish the Patauria of Ptolomy from the Praetorium of the Itinerary; and Gale (Inscr. p. 24) identifies the former place with Audley on the Derwent. [T.H.D.]

PRAETORIUM, AD (Ipparropov), a place in Upper Pannonia, south of the Sava, on the road from Scitia to Sirmium. (Tab. Peutin.; Ptol. ii. 15. § 6). It was probably a place where a court of justice was held for the inhabitants of the surrounding district, or it contained an imperial palace where the emperors put up when travelling in that country.

[L. S.]

PRAETORIUM AGRIPPINIAE. This Praetorium appears in the Table, and is distinguished by the representation of a large building. D'Anville conjectures that it may have taken its name from Agrippina, the daughter of Germanicus, mother of Nero, who gave her name to the Colonia Agrrippina (Cologne). The Praetorium is placed above Lugdunum Batavorum (Leiden) at the distance of 11. D'Anville concludes that it is Romsey near Leiden, where it is said that many Roman antiquities have been found. (Uert. Galliae, p. 533).

PRAETORIUM LATOVICORUM, a place in Upper Pannonia, on the site now occupied by Novo-stade, on the river Drusk. (It. Ant. p. 259; Tab. Peutin., called simply Praetorium. [L. S.]

PRAETORIUM (Ipparropov), Ptol.: Ith. Ipparropov, Pol.: Praetorium, a tribe of the Sarmatians, who occupied a district of Picenum, bounded by the river Vomana on the S. and apparently by the stream called by Pliny the Alibola on the N. This last cannot be identified with certainty, and the text of Pliny is probably corrupt as well as confused. He appears to place the Alibola N. of the Truentus; but it is certainly an allusion to the S. channel as far to the N. as the latter river, and it is probable that the stream now called the Solinello was their northern limit. We have no account of the origin of the Praetutii, or their relation to the Picentes, from whom they seem to have been regarded as to some extent a distinct people, though more frequently included under the one general appellation. The "Ager Praetutianus" is mentioned by Livy and Polybius, as well as by Pliny, as a well-known district, and Ptolemy even distinguishes it altogether from Picenum, in which, however, it was certainly generally comprised. (Ptol. iii. 88; Liv. xxii. 9, xxvii. 43; Ptol. iii. 13. a. 18; Ptol. iii. i. § 58.). But the name seems to have continued in general use, and became corrupted in the middle ages into Iupiterius and Atruritum, from whence the modern name of Abruzzi (now applied to all the northernmost provinces of the kingdom of Naples) is generally thought to be derived. (Blondi Flavii, Italia illustrata, p. 394.). The chief city of the Praetutii was Interamna, called for distinction sake Praetutianus, which under the name of Castellum is still the seat or town of one of the provinces of the Abruzzi. Ptolemy also assigns to it the town of Bereum. (Ptol. I. c.). Pliny mentions the "Ager Palmaria" in close connection with the Praetutii ("Ager Praetutianus Palmariae", Ptol. I. c.). But this appears to have been only a small district, which was celebrated, as it was the Praetorian region generally, for the excellence of its wines. (Pbn. xxvii. 4. 27; Dio. v. 19.; Stil. It. xxv. 568.).

PRASIA (Pipus: Ith. Ipparropous), a town of Phthiotis in Thessaly, a little S. of Pharsalus. For its position see NARTHACUM. (Xen. Hell. iv. 3. § 9. Ages. 2. § 8; Steph. B. s. a.)

PRASIA (Pipa: Ith. Ipparropous), a very extensive and rich district in the centre of Elisost, along the banks of the Ganges and the Sora, whose chief town was the celebrated Palibothra. The name of its inhabitants, which is written with slight differences in different authors, is most correctly given as Prasis by Strabo (xv. p. 702, 703), and by Pliny (ix. 19. a. 22), who states that their king supported daily not less than 150,000 foot, 30,000 horse, and 9000 elephants. Dioscorides calls them Prasiou (xvii. 93), as does also Plutarch. (Alex. 62.). In Curtius again they occur under the form of Pharrisus (ix. 2. § 3). It was the name of the king of the Prasis, Sandrocottus (Chandragupta), that the famous mission of Megasthenes by Seleucus took place. (Ptol. I. c.; Curt. ix. 2.; Appian, Syr. 55; Plut. Alex. 62.; Justin, iv. 4. 1.; Justin, iv. 4. 1.; Justin, iv. 4. 1.; Justin, iv. 4. 1.) In the concord in stating that this was one of the largest of the Indian empires, and extended through the richest part of India, from the Gangas to the Pamis. There can be no doubt that Prasis is a Graecised form for...
the Samoset Praceinas (meaning the dwellers in the east). (Bohien, Alte Indien, i. p. 33; Ritter, Erdkunde, vol. v. p. 460.) [V.]

PRASIAE or PRAISIAE (Πράσιας, Thuc. Strab. Aristoph.; Πρεσίας, Syl. p. 17; Pol. iii. 17. § 10; Stephan. B.,) a town on the eastern coast of Laconia, described by Pausanias as the farthest of the Eleuthero-Laconian places on this part of the coast, and as distant 200 stadia by sea from Cyphanta. (Paus. iii. 24. § 3.) Styx (L.c.) speaks of it as a city and a harbour. The name of the town was derived by the inhabitants from the name of the waves, which they named (ἡ πλημμένη). It was burnt by the Athenians in the second year of the Peloponnesian War, b. c. 430. (Thuc. ii. 56; Aristoph. Πρα. 242.) Also in b. c. 414 the Athenians, in conjunction with the Argives, ravaged the coast near Prasiae. (Thuc. vi. 105.)

In the Macedonian period Prasiae, with other Laconian towns on this coast, passed into the hands of the Boeotians, whom they called Lapo (Σ. Λαποῖ), whence the name of one of the Argive towns (viii. p. 368), though in another passage he says that it belonged at an earlier period to the Lacedaemonians (viii. p. 374). It was restored to Laconia by Augustus, who made it one of the Eleuthero-Laconian towns. (Paus. iii. 21. § 7; iii. 24. § 3.) Among the curiosities of Prasiae is a cave, in which Isor nursed Dionysus; a temple of Asclepius and another of Achilles, and a small promontory upon which stood four brass figures not more than a foot in height. (Paus. iii. 24. §§ 4, 5.) Leake places Prasiae at Στραυδίου in the Thyreatis; but it more probably stood at Στρυκός, which is the site assigned to it by Bohien, Alte Indien, vol. i. p. 184; (Leach Currus, vol. ii. p. 102; Ross, Rest. in Peloponn., p. 165; Curtius, Peloponneso. cor. v. 737, b. 729, a.)

PRASIAE, a demus in Attica. [Vol. I. p. 331, b.]

PRASIACUS. [Cerateria.]

PRASIL. [Prasila.]

PRAOIGES (Πραιόης) Κάλλος, Pol. vii. 4. § 4), a gulf which Poltemy places on the SW. side of the island of Tepobane or Ceylon. No such gulf can now be traced upon the outline of this island; and there would seem to be some confusion between the gulf and a sea to which the geographers gives the same name of Praisiges, and which he makes extend along the parallel between the island of Menuthia (Zarnoweth) and the Gulf of Siam (vii. 2. § 1). [V.]

PRASUM PROMONTORIUM (Πρασείων λεκτορήματα, Pol. i. 7. § 2, seq., vii. 3. § 6), or the C. of Leakes, was a headland in the region S. of Meroë, to which the ancient geographers gave the appellation of Barbaria. The position of Prasum is unknown; for it is impossible to identify Prasum, the Green Promontory, with Cape Delgado, i.e. Cape Slender, which, as the name implies, is a mere line upon the water. Neither is it certain that Prasum, although a lofty rock, was a portion of the mainland at all, inasmuch as the coast of Zinobar, where Prasum is probably to be found, is distinguished alike for the verdure of its projections and the bright green islands that stretch along and beyond them. Moreover, Agathemerus (p. 57), and Marcianus Heracleota (ap. Hudson, Geog. Min. i. p. 12) mention a sea in this region called, from its colour, the Prasian, the Green. The coast and islands of

Zingobar derive their rich verdant appearance from the prevalence of the bombex or cotton-tree. All that is known of Prasum is that it was 100 or 150 miles S. of the headland of Khanta, lat. 4° S., and a station for that obscure but active and remunerating trade of the niaba, or laflina, and the Caeccars carried on with the eastern spora of Africa. (Cosley, Claudius Polteny and the Nias, pp. 88-90.) [W. B. D.]

PRASUS. [Praeus.]

PRECIATI, a people of Aquinata, who surrendered to F. Crassus, Caesar's legatus in b.c. 42, the town of Præstum, the name of which, however, is not certain, for the MSS. write in several different ways. (Caes. B. G. iii. 27.) [G. L.]

PRELIUS LACUS, a lake mentioned only by Cicero (pro Mil. 27), and in a manner that affords no indication of its position. But it is probable that it is the same which is called Lacus Aprilis in the Itineraries, and apparently Frisia by Pliney (Arsus Lactus). (Strab. x. 485; Plin. iv. 12. s. 22.)

PRESIALIA, a demus in Arcadia, p. 934, b.)

PRIANUS. [Praisus.]

PRIANTAE, a people of Thrausa, on the Hesper. (Plin. iv. 11. s. 18.) Forbiger (vol. iii. p. 1076) conjectures that they may have inhabited the Boeotia mentioned by Herodotus (vii. 108). [T. B. D.]

PRIAPI POSTUS (Πραοίπος Πόστος), Pol. vii. 4. § 4, a sea-god of Moroney. It had on the east side of the island of Tepobane (Ceylon?) been imagined that it was represented by the present Ngombo. The name may not unnaturally have arisen from the Greeks having noticed at this place the prevalence of the Lingam or Phallic worship. [V.]

PRIAPUS (Πραοίπος; Εθν. Πραοίπος), a town of Mycena on the Propontis, situated on a headland on the N. side of Mount Propylus. Sometimes it was a colony of Milesians, and others regarded it as a settlement of Cyzicus; it derived its name from its worship of the god Priapos. It had a good harbour, and ruled over a territory which produced good wine. (Strab. xiii. p. 587; Thucyd. viii. 107; Pomp. Mela, i. 19; Plin. iv. 24, v. 40; Stephan. B. a. e.; Geogr. Rev. ii. 15, v. 10.) Leach Curtus, vol. ii. p. 184.) It is not certain in what direction these Priapuses of antiquity are to be sought. (Sichter, Wallfahrten, p. 425; Basche, Lex. Nez. iv. i. p. 51.)

PRIENE (Πρίενει; Eθ. Πρίεναις, Πρίενοι), an Ionian city, near the coast of Caria, on the southwestern slope of Mount Mycales, and on a little river called Praes. It had originally been situated on the sea-coast, and had two harbours, one of which could be closed (Στύλαξ, p. 337), and a small fleet (Herod. vi. 6); but at the time when Strabo wrote (xii. p. 579) it was at a distance of 60 stadia from the sea, in consequence of the great silurian deposits of the Meander at its mouth. It was besieged and had been originally founded by Assyrians as a city. (Strab. iv. pp. 633, 636; Plin. vii. 2. § 7; Eustath. ad Dionys. 825; Deq. Lastein. i. 5. 2.) But notwithstanding this admiration of Boeotians, Priene was one of the twelve Ionian cities (Herod. i. 142; Aelian, V. H. viii. 5. Vitriv...
PRIFERNUM. 669

PRIFERNUM, a town of the Vestini, mentioned only in the Tabula, which places it 12 miles from Pitium, the same distance from Amiernum, and 7 miles from Aveia. (Tob. Pest.) But the roads in this district are given in so confused a manner, that notwithstanding these data it is impossible to fix its site with any certainty. It is placed by Romanelli (vol. iii. p. 283) in the neighbourhood of Assergio, but this is little more than conjecture. [E. H. B.]

PRIMIS MAGNA and PAVIA (Πρίμις μέγας, Πρίμις μεγάς, Pol. iv. 7. § 19), the names of two towns in Achaea, situated upon the extreme or right bank of the Nile. Primis Magna, called simply Primis by Pliny (iv. 29. s. 35), and Premnis (Πρεμνής) by Strabo (vii. p. 820), was taken by the Roman commander Petronius in the reign of Augustus. After taking Premnis, which is described as a strong place, the Roman commander advanced against Neapata. (Strab. l.c.) Pilemy places it between Neapata and just above Metapontum. Hence it is identified with Tloris. (Comp. Kennicott, Anc. Egypt. vol. ii. p. 464.)

PRIMUSPOLIS (Πρίμουπολις, Consil. Chalcid. pp. 127, 240; falsely Πρίμουπολις, Hieroc. p. 682, and Πρίμουπολις, Consil. Ephes. p. 529), a town in Pamphylia, the later name of Apphendus. (See Wasseling, ad Hieroc. p. 682.)

PRINASSUS (Πρινασσός: Ἐθν. Πρινασσός), a town in Caria, of uncertain site, taken by Philip V., king of Macedonia, and known also by its coins. (Polyb. xvi. 11; Steph. B. s. a.; Sestini, p. 89; Crater, Asia Minore, vol. ii. p. 217.)

PRINIOSSA, an island of the coast of Lycia, in Acaemania, mentioned only by Pliny (iv. 12. a. 19).

PRINUS. [Mantinea, p. 264.]

PRION (Πριών), a mountain in the island of Cos, which is about 2760 feet high. (Plin. v. 86.) From a scholiast (ad Theocrit. vili. 45) it might be inferred that this was the place where Mount Prion; but according to another ancient commentator Ormecos was either a surname of some divinity, or the name of some wealthy and powerful man. [L. S.]

PRION (Πριόν), a river in Arabia. [PRIONOTUS.]

PRIONOTUS MONS (Πριόνοτος βόρος), a mountain in the southern part of Arabia, in the territory of the Adramites, identified by Forster with Ras Broom, a headland forming the termination of a mountain chain and jutting out prominently into the ocean in long. 49°, about 35 miles NE. of Musaidha. Prion was a river flowing into the sea near this promontory. (Pol. vi. 7. §§ 10, 13; Forster, Arabia, vol. ii. p. 304, note 2.)

PRISTA (Πρίστα) (ad Scott. 10. § 10, where, however, some read Τριστα; called in the Ita. Ant. p. 222, Sexantaprista; in the Not. Imp. Sexantaginta Prista; and in Procopius, de Aed. iv. 11, p. 307, Σεξανταπριστα), a place in Moesia Inferior, on the Danube, the station of the 8th cohort of the 1st Legio Ital. Identified with Russchau. [T. H. D.]

PRIVERNE (Πριβερν) (Ed. Priverne, or Piperno Vecchio), an ancient and important city of the Volsciens, afterwards included, with the rest of the territory of that people, in Latium, in the more extended sense of the name. It was situated in the Volceanian mountains, or Monti Lapini; but not, like Setia and Norba, on the front towards the plain of the Pontine Marshes, but at some distance back, in the valley of the Amuseneus. Virgil represents it as an ancient city of the Volsciens, and the residence of Metabus, the father of Camilla (Aen. xi. 540); and there is no reason to doubt that it was originally a city of that people. Its name is not indeed mentioned during any of the earlier wars of the Volsciens against Rome; but only in the name of the people is generally given collectively, and the brunt of the war naturally fell upon those cities which more immediately adjoined the frontiers of Latium. When the name of Priverne first appears in history it is as a city of considerable power and importance, holding an independent position, and able not only to engage in, but to maintain, a war against Rome single-handed. (Pol. iii. c. 388) The devastations wrought upon themselves the hostility of Rome by plundering the lands of the Roman colonists who had been recently settled in the Pontine Plains. The next year they were attacked by the consuls C. Marcius, their forces defeated in the field, and they themselves compelled to submit (Liv. vii. 15, 16). But though their submission was involuntary, the condition was that of conditional surrender (dedictio), they certainly continued to form an independent and even powerful state, and only a few years afterwards again ventured to attack the Roman colonies of Norba and Setia, for which they were speedily punished by the consuls C. Plautius: their city is said to have been taken, and two-thirds of their territory forfeited. (Id. vii.
42, viii. 1.) This was soon after divided among the Roman plebeians. (Id. viii. 11.) They do not appear to have taken any part in the general war of the Latins and Campanians against Rome; but in a. c. 353 they opposed the single town of Capua to the arms single-handed, with only the assistance of a few of the Fundani. Notwithstanding this, the war was deemed of sufficient importance to employ two consular armies; and it was not till after a long siege that Privernum was reduced by C. Plantius, the consul of the following year. The walls of the city were destroyed, and the enemy appeared to have been actually punished; but the rest of the people were admitted to the Roman citizenship,—probably, however, in the first instance without the right of suffrage, though this also must have been granted them in the year a. c. 316, when the Utentinian tribe was constituted, of which Privernum was the chief town. (Liv. viii. 19—21, account of J. Caecus. Val. ii. cclxvii. 6. 1. 2.) According to Festus (p. 233) it became a Praefectura; but notwithstanding this subordinate condition (which was perhaps confined to the short period before it attained the full franchise), it seems to have been a flourishing municipal town under the Roman government. According to one of those which the agrarian law of Servius Rutilus proposed to assign to the Roman populace (Cic. de Leg. Agr. ii. 25); but though it escaped upon this occasion, it subsequently received a military colony (Lid. Colum. p. 336). The period of this is uncertain: according to Zumpt (de Colon. p. 401) it probably did not take place till the reign of Trajan. In inscription, it bears the title of a colony; though others term it a municipium; and neither Pliny nor Ptolomy assign it the rank of a colony. (Plin. iii. 5. a. 8; Ptol. iii. 1. § 63; Zumpt, l. c.) It was noted, as well as the neighbouring Setia, for the excellence of its wine (Plin. xiv. 6. a. 8); but we hear little of Privernum under the Roman Empire, and have no subsequent account of it. In the invasion of Charles the seventh, no writer mentions the city, nor does mention occurs of it in the Itineraries. The ruins of the ancient city, which according to Cluverius are considerable, are situated about 2 miles N. of the modern Piperno, on the site still called Piperno Vecchio. The period or occasion of the abandonment of the ancient site is unknown; but it is certainly probable that the earthquakes, with which this coast is afflicted, is alluded to by Cicero as taking place at Privernum (Cic. de Div. i. 43). On that occasion, we are told, the earth sank down to a great depth,—a phenomenon which may have given rise to a remarkable charm or curiosity still visible in the neighbourhood of Piperno. The ancient city was more probably deserted in consequence of its elevation, which with a great quake which occasionally is alluded to by Cicero as taking place at Privernum (Cic. de Div. i. 43). On that occasion, we are told, the earth sank down to a great depth,—a phenomenon which may have given rise to a remarkable charm or curiosity still visible in the neighbourhood of Piperno. The ancient city was more probably deserted in consequence of its elevation, which with a great earthquake which occasionally is alluded to by Cicero is taking place there. Piperno Vecchio is a small island off the coast of Campania, situated between Cape Misenum (from which it is distant less than 3 miles) and the larger island of Asenaria or Ischia. In common with the latter it is of volcanic formation, and appears to have been subject in ancient times to frequent earthquakes. Pliny and Strabo even tell us that it was a mere fragment broken off from the neighbouring island of Asenaria by one of the violent convulsions of nature to which it was subject. But this statement certainly has no historical foundation. It has been accredoed by Pliny, that both islands had been thrown up by volcanic action from beneath the sea. Such an event, however true as a geological inference, must have long preceded the historical era. (Strab. i. p. 60, li. p. 133, v. pp. 248, 258; Plin. ii. 68.) The same phenomenon led the poets to associate Privernum with Asenaria, and even to connect it with the fable of the giant Typhoeus (Aenarxia); and Silene Italica even assigned it a giant of its own, Minusa. (Verg. Aen. ix. 715; Sil. Ital. vii. 542, xii. 147; Ovid. Met. xiv. 88.)

Virgin's epitaph of "Prochyta alta" is less appropriate than usual,—the island, though gilt with peculiar floras, is distinguished not either with Ischia or the neighbouring headland of Misenum. There does not appear to have been any town on the island in ancient times. Staises (Sirs. ii. 276) terms it a rugged island, and Juv. (Sat. iii. 5) speaks of it as a wretched and lonely place of residence. At the present day, on the contrary, it is occupied by a modern village and several buildings in the Neapolitan dominions, which is being cultivated like a garden and supporting a population of 4000 inhabitants. It is distant between 2 and 3 miles from Cape Misenum, but only a mile and a half from the nearest point of the mainland, which is now known as the Mausolei Quartieri of St. Elmo. (E. H. B.)

PROEUna

PROCONNESUS (Προκόννησος, or Προκόννησ-ις in Zoizim. ii. 30, and Hieroc. p. 662), an island in the western part of the Propontis, between Priapus and Cyiusc, and not, as Strabo (xiii. 589) has it, between Parium and Priapus. The island was particularly celebrated for its rich marble quarries, which supplied most of the neighbouring towns, and especially Terni, with material, not only for public buildings, but for palaces; the palace of Mussolino, also, was built of this marble, which was white intermixed with black streaks. (Vitr. vii. 8.) The island contained in its southern-western part a town of the same name, of which Aristaeus, the poet of the Arimaspe, was a native. (Herod. iv. 14.; comp. Sejus.) The site of the town is mentioned in the Milesians (Strab. xii. p. 587), but being by a Phoenician fleet, acting under the orders of king Darus. (Herod. vi. 33.) Strabo distinguishes between old and new Proconnesus; and Sejus, besides Proconnesus, notices another island called Elaphæus, with a good harbour. Pliny (v. 44) and the Scholiast on Or. 235, having said low, as compiled Elaphæus only as another name for Proconnesus; but Elaphæus was unquestionably a distinct island, situated a little to the south of Proconnesus. The inhabitants of Cyius, at a time when we cannot ascertain, forced the Proconnesians to dwell together with them, and transferred the statute of the goddess Dindymus to their own city. (Paus. viii. 46. § 4.) The island of Proconnesus is mentioned in the ecclesiastical historians and the acts of the Council of Chalcedon. The celebrity of its marble quarries has changed its ancient name into Merow or Mermora; whence the whole of the Propontis is now called the Sea of Mermora. Respecting some anomalous coins of Proconnesus, see Besel, Ana. Vet. xii. 15.

PROCHYTIA (Προχύτια, Prochida), a small island off the coast of Campania, situated between Cape Misenum (from which it is distant less than 3 miles) and the larger island of Asenaria or Ischia. In common with the latter it is of volcanic formation, and appears to have been subject in ancient times to frequent earthquakes. Pliny and Strabo

PROBALITHUS. [Marathon.]

PROBATA [Bokotlia, p. 412, b.]

PROCARSTASIS, the more correct name of Chalcedon, according to Pliny (v. 32, 4 and 43).

PROCHYTIA [Prochida, Prochida], a small island off the coast of Campania, situated between Cape Misenum (from which it is distant less than 3 miles) and the larger island of Asenaria or Ischia. In common with the latter it is of volcanic formation, and appears to have been subject in ancient times to frequent earthquakes. Pliny and Strabo
PROLAQUEUM.

Thessaly (Strab. ix. p. 454), which Stephanus B. writes Prooera (Ῥυόρηα), and calls by mistake a town near the Mantineans, which had been taken by Antiochus, was recovered by the consul Actius. (Liv. xxxvi. 14.) We learn from this passage of Livy that Prooera stood between Pharsalos and Thaumach, and it is accordingly placed by Leake at Gymnokastiro. (Northern Greece, p. 40.)

PROLAQUEUM (Ῥυόρηα), a village or station on the branch of the Via Flaminia which crossed the Apennines from Nuceria (Νοκερα) to Septempeda (Ϲ. Σεπερενία). It was situated at the foot of the pass on the E. side of the mountains, and evidently derived its name from its being at the outlet of a small lake which discharged its waters into the Po-tamou. Cluverius speaks of the lake as still existing in his time: it is not marked on modern maps, but the village of Proorace still preserves the traces of the ancient name. The Itinerary reckons 16 M. P. from Nuceria to Prolaqueum, and 15 from thence to Septempeda. (Itin. Ant. p. 312; Cluver. Ital. p. 614.)

PROMONA (Ῥυόμονα, Appian, L. 4. 41. 6 — 28; Post. Tax.; Geogr. Rav. iv. 18), a town of the Liburni, situated on a hill, and, in addition to its natural defences strongly fortified. Octavius, in the campaign of B.C. 34, surrounded it and the adjacent rocky heights with a wall for the space of 40 stadia, and defeating Titinius, who had come to its relief, forced an entrance into the town, and obliged the enemy to evacuate the citadel. There is every reason to believe that Promona stood on the skirts of the craggy hills, which, with the neighbouring district, now bear the name of Promina. As the Pentinger Table places it on the road from Barnum to Salona, it must be looked for on the SW. side of the mountain of Promina, in the direction of Derinai. (Wieneke, Dimasewa, i. p. 206.) [B. J. B.]

PRONAI. [NEMESES.]

PRONI, PRONIO, or PRONESUS (Ῥυόνιον, Pol.; Ρρόνιον, Thuc.; Ρρώνησος, Strab.), one of the four towns of Cephallenia, situated upon the southern coast. Together with the other towns of Cephallenia it joined the Athenian alliance in B.C. 190. It was visited by Polybius as a small fortress; but it was so situated as to beset Philip that he did not venture to attack it, but sailed against Pale. (Pol. v. 3.) [P.ALE.]

Livy, in his account of the surrender of Cephallenia to the Romans in B.C. 189, speaks of the Nestiatae, Cranii, Palenes, and Samali. Now as we know that Proni was one of the four towns of Cephallenia, it is probable that Nestiatae is a false reading for Pronesitae, which would be the ethic form of Pronaias, the name of the town in Strabo (x. p. 455). Proni or Pronio was one of the three towns which continued to exist in the island after the destruction of Same. (Comp. Plin. iv. 12. a. 19.)

The remains of Proni are found not far above the shore, where a road, about 3 miles to the northward of C. Kapri. (Leake, Northern Greece, vol. iii. p. 62.)

PROPHETHASIA. [DRANGIANA.]

PROPONTIS (Ῥυόποντις: Σεα Μαρμονα), the sea between Thrace and Asia Minor, forming an intermediate sea between the Aegean and the Euxine, and which is crossed by the narrow strait of the Thracian Bosporus, and with the former through the Hellespont. Its ancient name Propontis describes it as "the sea beyond the entrance of the Pontus" or Euxine; while its modern name is derived from the island of Marmona, the ancient Propontis near the western entrance of the sea. (Appal. de Mundo. p. 6; Steph. B. s. v. Πρωποντίς.) The first authors who mention the Propontis under this name are Aeschylus (Per. 876), Herodotus (iv. 85), and Scylax (pp. 28, 35); and Herodotus seems even to have made an accurate measurement of the strait, its breadth being 1400 stadia, and the breadth 500. Later writers, such as Strabo (ii. p. 125) and Agathemerus (i. 14), abandoning the correct view of their predecessor, state that the breadth of the Propontis is almost equal to its length, although, assuming the Propontis to extend as far as Byzantium, they include in its length a portion of the Thracian Bosporus. Modern geographers reckon about 120 miles from one strait to the other, while the greatest breadth of the Propontis from the European to the Asiatic coast does not exceed 40 miles. The form of the Propontis would be nearly oval, were it not that in its southern-eastern part Mt. Argonautis with the promontory of Poseidon forms two deep bays, that of Aeschylus (Σταύρος) and that of Cius (Ϲιαυτος Σιντος). The most important cities on the coasts of the Propontis are: Περινθος, Σελευμήρια, Βυζάντιον, Χαλκηδών, Αστάγιος, Κύθης, and Κυτικής. In the south-west there are several islands, as Προκονχύστης, Οφίνηρα, and Αλόνη; at the extremity of the eastern side, south of Chalcedon, there is a group of small islands called Δαμωνής, while one small island, Barhe, is situated in front of the bay of Cius. (Comp. Polyb. iv. 59, 42; Strab. xii. p. 574, xiii. pp. 563, 583; Post. v. 2. § 1, vi. § 5, viii. 11. § 2, 17. § 2; Agath. i. 13; Dionys. Per. 137; Pompon. Mela, i. 3, 19, ii. 2, 7; Plin. iv. 24, v. 40; Kruse, Uber Herodotes Anmerkung des Pontus Euxinis, in. Breslau, 1820.)

PROSCHIUM (Ῥυόσχιον, Εθν. Προσχίους), a town of Aetolias, between the Achelean and the Eureuns, is said to have been founded by the Aeolians when they removed from the Homerian Pylen higher up into the country. [PYLENE.] Proschium also laid claim to high antiquity, since it possessed a shrine said to have been founded by Hercules to a cup-bearer Cymbaces, whom he had unintelligently slain. It is clear, from a narrative of Thucydides, that Proschium lay west of Calydon and Pfeon, and not at great distance from the Acheleans. Leake places it on the western part of Mt. Zygus (the ancient Arcacinthus), near the monastery of St. George between the Aetolians and the Phocians. (Strab. x. p. 451; Athen. x. p. 411, a; Thess. iii. 102, 106; Steph. B. s. w.; Leake, Northern Greece, vol. i. p. 112.)

PROSEIUS. [ARACDIA, p. 192, b. No. 7.]

PROSOLENE. [PORDOSILENE.]

PROSPALTA. [ATTICA, p. 332, a.]

PROSTMNA (Ῥυόστμνα: Εθν. Προστμνας), Steph. B. a. s., an ancient town in the Argive, in the territory of the Aeguanae, whose territory the Lacedaemonians called the temple of Hera, stood. (Strab. viii. p. 375.) Statius gives it the epithet "celas" (Theb. iv. 44). Pausanias (ii. 17. § 2) mentions only a district of this name. (Leake, Peloponnesiacs, pp. 264, 269.) [See Vol. i. p. 206, 207.]

PROTA (Ῥυόντα), one of a group of small islands in the east of the Hellespont, near the Chalcedonian Bosporus. (Steph. B. s. v. Χαλκείτης.) Its distance from Chalceita was 40 stadia, and it is said still to bear the name of Protea. [L.S.]
PROTE (Προτε). 1. An island off the western coast of Messenia. [See Vol. II. p. 348, b.]

2. One of the Stoichæoi off the southern coast of Gaul. [STOICHEIDES.]

PROTONICA, a place in Bithynia, on the road from Nicaea to Ancyrà. (Ibn. Hieros. p. 573.) It is possibly the same place as Protocoma (Πρωτοκομῆς) mentioned by Ptolemy (v. i. § 13). [I. 35] The location of Protocoma is uncertain. Some, like Caesar, believed that this was the town of Gallia on Italy and was bounded on the south by the Mediterranean. It is possible that the term Gallia Provinçia (Cæsar. B. G. i. 19), a term by which Caesar sometimes distinguishes this part of Gallia from the rest, which he calls "omnis Gallia" (B. G. i. 1) or "tota Gallia." (B. G. vii. 66). The Provinciа in Caesar's time was bounded on the north by the Rhone from the western extremity of the Lacus Lemannus (Lacus of Lemnas) to the junction of the Rhone and the Sarden. Geneva, which belonged to the Allobroges, was the furthest town in that direction. [GENÈVE.]

Along the southern side of the Lake of Geneva the limit was the boundary between the Allobroges who were in the Province and the Nantuates who were not. (B. G. iii. 3.) The eastern part of the Province was called the Orientales (OCCIDENTALIA) and was included in the Province of Gallia Cisalpina, and the country of the Voconzi was in the Ulterior Province or in the Province Gallia (B. G. i. 10). On the west the Mons Cevenna (Cévennes) southward from the latitude of Lugdunum (Léon) was the boundary. The Volcana C evenica divided between the Provinces of Tarraconensis and Narbonensis, and the towns of Narbo (Narbonnae), Carcasi (Carcassonne), and Tolosa (Toulouse), as well as the adjacent countries, were placed in Narbonensis by Ptolemy and Pliny (iii. c. 4). Northern boundary. On the north-west to the north of the Rhone the towns of Novatore (Noves) and Aquincum were included in the Province of Narbonensis, while the towns of Novatorum and Aquincum were included in the Province of Narbonensis therefore then from the Pyrenees northwards, and passed west of Toulouse. It was reached northwards to the Tarn (Thau). We cannot determine the point where the Cévennes became the boundary, but if part of the Eastern was still in the Narbonensis, the boundary may have run along the Rhone to the Cevennes and the Hérault between the eastern and the Pyrenees. Thus in the eastern limit of the Narbonenus the Pointe was the point of the range (la Lozère). From the Lozère northwards the mountain country bordered the Rhone as far as Aquitania. The northern boundary of Narbonensis ran along the Rhone from Lugdunum to Geneva at the west end of the Leman Lake. Pinoy mentions the Bregence (Bregence) and the Jurassische boundary of the Narbonensis but his notion of the direction of the Jurassische was not, though it is true that the range touches a part of the northern boundary. The story makes the Auvergne the southern limit of the eastern boundary of Belgium (ii. 9. § 8); and the Auvergne is also the northern limit of the eastern boundary of Narbonensis. The northern boundary of Belgium from the Adula westward was the northern boundary of Narbonenis. It is difficult to say whether the geographer is making a boundary of his own or following an administrative division; but we may certainly conclude that the Narbonensis contained the upper valley of the Rhone (the Vals), for the Béarnais Alpes form the northern side of the Haute Vallée (Val de la Vals). In this respect the Helvetii were not in the Vals (Helvetia). We may conclude that the Neuchâtel, Sérent, and Nantuates, who were not within the Province as defined by Caesar, were within the limits of the Narbonensis. One of the common roads to Italy was from Octodurus (Martigny in the Valais) or from Aosta, Gressoney (Gressoni. St. Bernard). The Narbonensis is thus a natural division including the upper valley of the Rhone, the Leman lakes and the countries south of it to the Alpes, the country on the south side of the Rhone from the lake
Lyon, and the country south of Lyon. The part of the Provincia south of Lyon is a valley between the Alps on the east and the Cévennes on the west, which becomes wider as we advance south. On the east side the lower Alps and the Alpine valleys cover a large part of the country. On the west, the Cévennes and the mountains north of them leave a very narrow tract between the Rhone and the mountains till we come to the latitude of Ariminum and Nimes. The southern part of the Rhone valley between Massilia and the Pyrenees contains a large extent of level country. The southern part of this great valley is more Italian than Gallic in position, climate, and products. The Rhone, which cuts it into two parts, has numerous branches which join it from the Alps; but the mountain streams which flow into it from the Cévennes are few [Rhodanus].

The rivers of the Provincia west of the Rhone flow from the Cévennes and from the Pyrenees into the Mediterranean. They are all comparatively small. The Clas=muis of Arvius is probably the Caussouen, so far as we can connect it with the Lecus; the Latis, which flows by Montpeller; the Arauris (Héraules) flows west past Agathe (Aude); the Libria or Liria may be the Lèvrons [Libria]; the Obris or Orbis (Orbe); the Narbo or Atax (Aude), which passes Narbonne; the Rusceno or Teta (Têt), and the Tichis (Teich), which enters the Mediterranean near the mouth of the Rhone. Between the Var and the Rhone there are very few streams, for the form of the surface is such that nearly all the drainage runs into the Rhone. There is the Argenteus (Argens), and a few insignificant streams between the Argenteus and the delta of the Rhone.

The extreme western part of the Provincia comprehends a portion of the basin of the Garonne, for Toulous is on this river. The valley of the Aude between the Cévennes and the Pyrenees forms an easy approach from the Mediterranean to the waters of the Garonne and to the Atlantic,—a circumstance which facilitated the commerce between the Mediterranean and the Atlantic, and made this a common route for the trade of the West (Lutetia). The coast from the Pyrenean Promontorium to a point a few miles south of Massilia forms a great bay called the Gallus Sinus; it is generally flat, and in many places it is lined by marshes and lakes. This part of the coast contains the Delta of the Rhone. East of Massilia the country is hilly and dry. The port of Massilia is naturally a poor place. East of it is the port of Telo Martini (Toulon), and a few other ports of little value. Metta’s remark (ii. 5) is true: “On the shore of the Provincia there are some places with some names; but there are few cities, because there are few ports and all the coast is exposed to the Auster and the Africa.” There are a few small islands along the eastern coast, the Stesicsias, Planesia, Lero, and other rocky islets.

The dimensions of the Provincia, according to Agrrippa’s measurement, are said to be 270 M. P. in length and 248 M. P. in breadth. But we neither know how the measures were taken, nor whether the numbers in Pliny’s text (iii. 4) are correct. However we learn that this, like many other parts of the empire, was surveyed and measured under Agrrippa’s orders.

The length of the coast of Narbonensia is above 260 miles. The direct distance from Toulous to the mouth of the Var is near 300 miles; and from the junction of the Rhone and the Saône, the direct distance to the sea measured along a meridian is about 180 miles. But these measures give only an imperfect idea of the area of the country, because the outline is irregular. Strabo (iv. pp. 178, 179) has preserved a measurement which has followed a Roman road from the Pyrenees to the Var. The distances from the temple of Apollo at the Pyrenees to Narbo is 68 Roman miles; thence to Nemaussus 85; from Nemaussus through Ugernum and Tarasco to the warm springs called Sextiae (Aqua Sextiae), which are near Massilia, 53; and thence to Antipolis and to the Varus, 75; the whole making 277 miles. Some reckon, he says, from the Apollo to the Varus 260 stadia, and some add 200 more, for all which there is no agreement about the distance. Two thousand six hundred stadia are 325 Roman miles. When Strabo wrote, the distance along the road from Narbo to the Var was not measured, or he did not know it. The other great road which he describes is a road through the Vocontii and the territory of Cottius: As far as Ugernum he says the road from Narbo to Massilia is the same as the route just described; but from Tarasco to the borders of the Vocontii over the Drusenta and through Caballio (Cavaillon) on the Durance is 63 miles; and again, from Caballio to the other limit of the Vocontii toward the land of Cottius to the village Ebroodunum (Embrunum, Embres) is 40 miles; then through the village Brigantum (Brignon) and Scinecuniae and the passage of the Alpes (the pass of Mont Genevieve) to Ocelum [Ocelum], the limit of the land of Cottius; the country from Scinecunia is reckoned a part of Italy, and from there to Ocelum is 27 miles.” He says in another place (iv. p. 187) that this road through the Vocontii is the shorter, but though the other road along the Massilia did not and the Ligurian territory is longer, the passes over the hills into Italy are easier, for the mountains in those parts sink lower.

These were the two great roads in the Provincia. There was a road in the west from Narbo through Garasso to Tolosa. There was also a road from Arelates (Arètè) to Avenio, Aratus, Valentina, and Vienna (Vienna), to Lugdunum: this was one of Agrippa’s roads (Strab. iv. p. 208). There was no road on the opposite side of the river, or no great road, the land on that side not being well adapted for the construction of a road. There were other roads over the Alps. There was a road from Lugdunum and Vienna up the valley of the Isara (Isère) to the Alpis Graia (Little St. Bernard), which in the time of Augustus was much used (Strab. iv. p. 208); and there was the road from Augusta Praetoria (Acosta) in Italy over the Great St. Bernard to Octodurus (Martigny) and Penniculcia, at the east end of the Lakes of Geneva; and thence into the country of the Helvetii.

Within the limits of Narbonensia there is every variety of surface and climate, Alpine mountains and Alpine valleys, stately rocky tracts and fertile plains, winter for nine months in the year and summer for as many months. Pliny says of it: “Agro Rum cultu, virorum morumque dignatione, ampitudo opum, ornatus provinciae esse potestatem, qua saeculo Romanae Italiae verius quam provincia.” (Pliny, iii. 4.) The climate is only mild in the south part and in the lowlands. As we descend the Rhone a difference is felt. About Arausio (Orange) the olive appears, a tree that marks a warm climate. “All
the Narbonitza," says Strabo, "has the same natural products as Italica; but as we advance towards the north and the Cenomnes (Cévennes), the land planted with the olive and the fig terminates, but all the other things are grown. The grapes also does not ripen well as we advance further north" (v. p. 178). Some of these trees were about the olive itself, and others two or three miles in advance from Nimes by the great road to Clermont Ferrand in the Auvergne, we ascend gradually in a north-west direction to a rocky country well planted with vines, mulberry trees, and olives. After proceeding a few miles further the olives suddenly disappear, a sign that we have passed the limits of the temperature which they require. The country is now an irregular plateau, rocky and sterile, but in parts well planted with mulberries and vines; and there is a little wheat. Before descending to Andusia (Andalousie), which is deep sunk in a gorge of the Vardo (Gardon), a few more olives are seen, but these are the last. We are approaching the rugged Cévennes.

The native population of the Provincia were Aquitani, Celtae, and Ligures. The Aquitani were in the parts along the base of the Pyrenees. The Ligures in the historical period occupied the south-east part of the Provincia, north and east of Marsaille, and it is probable that they were once on the west side of the Rhone also. The Greeks were on the coast, east and west of the city of Marsaille [Marseille]. After the country was reduced to the form of a Province, the Italians flocked to the Provincia to make money. They were petty dealers (mercatores), bankers, and money-lenders (negotatores), sheep-feeders, agriculturists, and traders. (Cic. pro P. Quinctio, c. 3, pro M. Fonteio, c. 5.) The wine of Italy was imported into the Provincia in Cicero's time, and a duty was levied on it, if not at the port, at least in its transit through the country (pro Fonteio, c. 9). Cicero sneeringly says, "We Romans are the most just of men, for we do not allow the Transalpine nations to plant the olive and the vine, in order that our olive plantations and vineyards may be worth more" (de Re Publica, lib. 6). He does not accuse them, for the reasons given above, but rather as a selfish order was made. But the vine is a native of Narbonensis, and the Greeks made wines, as we might safely assume, and they sold it to the Galli. Posidonius, whom Cicero knew, and who had travelled in the country, says that the rich Galli bought Italian wine and wine from the Massaliota. (Posidonius, ep. Athen. iv. p. 192.) If any of the Galli got this wine, the Galli of the Provincia would have it.

This favourite province of the Romans was full of large cities, which under the Empire were ornamented with works both splendid and useful, amphitheatres, temples, theatres, and aqueducts. Many of these buildings have perished, but the magnificent monuments at Arles and Nimes, and the less striking remains in the Provençal Turquerie, show what this country was under Roman dominion.

The tribes or peoples within the limits of the Provincia are very numerous. Pliny has a long list. On the west side of the Rhone at the foot of the Pyrenees were the Consorani and Sordones or Sordi. North of them were the Volcae Tectosages, whose capital was Tolosa; and the Rutani Provinciales. The Volcae Arecomici occupied the country east of the Tectosages and extended to the Rhone. The position of the Tascani, a small people mentioned by Pliny, is only a matter of conjecture [TASCO]. North of the Arecomici only one people is mentioned between the Cévennes and the Rhone, the Helvii [HELVI]. The Ardeche (a mountain stream from the Cévennes) flows through their country into the Rhone. It was by the valley of the Ardeche that Caesar got over the Cévennes into the country of the Arverni through the snow in the depth of winter (B. G. viii. 55). He could go on and tell us for he tells us that he went through the territory of the Helvii.

East of the Rhone the tribes were very numerous for the surface is larger and full of valleys. It has been already observed that the Sedani, Veragi, and Nanthates must have been included in the Narbonenses of Augustus. The Allobroges occupied the country south-west of Geneva, to the Istrie and the Rhone. Pliny's list of names in the Provincia comprises all Picardy's, with some slight variations, except the Commoni, Eliocci, and Senti. Some of the names in Pliny are probably corrupt, and nothing is known about some of the peoples. The following are the principal peoples south of the Narbonenses and Allobroges, the Centonenses, Graecolati, Magi, Catae, Tricori, Segovallaeans, Tricastes, Caures, Vozcenti, Vulcigeles, Bodontici, and Albici, all of them north of the Drusentia or its branches. South of them were the Salyes or Salluvii, the neighbours of Massilia; the Sueci, Oxybi, Decies, and the Nerusi, who were separated from Italy by the Fur.

**PRUSA.** (Προύσα: Eta. Πρωοοεια), generally with the addition of ιδιοι or οιναυς ου Οδοες, to distinguish it from another place of the same name, was situated at the northern foot of Mount Olympus, in Myria. Pliny (v. 45) states that the town was built by Hannibal during his stay at Prusa, which can only mean that it was built by Prusias, whose name it bears, the advice of Hannibal. According to the common text of Strabo (xii. p. 564), it was founded by one Prusias, who waged war against Croesus, for whom Stephano B. (s.v.) substitutes Cyrus. As no such Prusias is known in the age of Croesus or Cyrus, various conjectures have been made upon the passage of Strabo, but with little success. At all events, it is not a town which was by Dion Chrysostomus (Ovart. xiii. p. 585), who was a native of the town, that it was neither very ancient nor very large. It was, however, as Strabo remarks, well governed, continued to flourish under the Roman emperors (Plin. Epiat. x. 85), and was celebrated for its warm baths, which still exist, and bore the name of "the royal waters." (Attal. ii. p. 43; Steph. B. s. v. Προσα.) Under the Greek emperors it suffered much during the wars against the Turks (Nicet. Chron. pp. 386, 389); when at last it fell into their hands, it was for a time the capital of their empire under the name of Brusa or Brousse, which it still bears, for it is still one of the most flourishing towns in Asia Minor. (Brown's "History of Turkey," vol. ii. p. 133; Smith, G. E. "Dictionary of the As. Mon. Vol. V. p. 70; Hamilton, Researches, i. p. 71, &c.)

Plutonien (v. I. § 13) and Pliny (v. 43) mention a town of the same name on the river Hyphasis or Hyphasis, in Bithynia, which, according to Memnon (cc. 39, 42, 49), had formerly been called Cieras (Klepa), and had belonged to the territory of Heraclea, but had been taken by Prusias, who changed its name. But there seems to be some confusion here between Cieras and Clus, the latter of which is known to have received the name of Prusias from the king of that name. (Strab. xii. pp. 556, 556.)
PRYMNESIA or PRYMNESIUS (Πρυμνεια, Πρυμνησις; Etth. Πρυμνησιος), a small town in central Phrygia. (Ptol. v. 2. § 24; Hieroc. p. 677; Conc. Chalcid. p. 673.) Poocke (Travels, iii. c. 15) found an inscription containing the name of the town near Asfom Cara-bisnur. This town (Asia Minor, p. 55) shows that the inscription does not refer to Prynemis, but to some person whose name ended in "mena." No inference, therefore, can be drawn from it as to the site of that town. Franz (Fürst. Inschriften, p. 5) has proved, by incontrovertible arguments from other inscriptions, that Prynemis must have been situated at Seid-el-Ghazii, between Esî-Shahr and Condiâ, where a few remains of an ancient town still exist. (L. S.)

PRYTNANIS (Πρυτανος), a small river in the east of Pontus, which has its sources in the Moeshchii Montes, and flows by the town of Abgabes. (Arrian, Peripl. P. E. p. 7; Anonymous, Peripl. P. E. p. 15, where it is called Prytanaea.) It is perhaps the same river as that called by Scylax (C.C. 255) Pordanias. (L. S.)

PSACUM (Φακα), a promontory on the NW. coast of Crete, forming the termination of Mt. Tityros, now called C. Spada. (Ptol. iii. 15. § 8.)

PSAMATHUS. [Tarsabum.]

PSAPHUS. [Antica. p. 390, a.]

PSCH. or PSEDO PSCH. (PSD) (Πσκόλος, Πςδ. πνευματικι, Πςδ. α. b.) the modern Tunas, one of the enormous lakes S. of Merot, which feed the principal tributaries of the Nile. The 10th parallel of N. latitude nearly bisects the lake Psebau. According to Stephanus, it was five days' journey from Aethiopia, i.e. from Asüma. In the centre of the lake was a populous island — a depot of the ivory trade (Geog. ii. 6. 4); and the inhabitants, no doubt, also by the hunters of the Hippopotamuses, the hides of which animal were exported to Egypt, and employed as coverings for shields. On the S. side the lake was encompassed by lofty mountains, which abounded in mineral wealth (Theophr. de Lapid. p. 695, ed. Schneider), and whose periodical torrents, according to Strabo (c. 5. 7. 6), carried away, when Actaeon was boasting of his prowess, their waters over the plains of the Trogodytes. (W. B. D.)

PSKLICIS (Πςκλης, Strab. xvii. p. 820; Isæus, Anton. p. 162; Πςκλης, Aristid. Aegypt. p. 512), was a town of the region Dodecachosmos situated on the left bank of the Nile. Originally Pseiés was little more than a suburb of the older Aethiopian town Tischompos; but it speedily outgrew its parent, so that in process of time Tischompos was denominated contra-Pselcis. In B.C. 23 the Aethiopian nation, alarmed by the approach of the Romans to their frontiers, harassed the neighbourhood of Philae and Syene, and it became necessary to repel their incursions. C. Petronius, accordingly, on the death of Actaeon, who was then in the government of Egypt, undertook to drive them back, and Pselcis was one of the towns which submitted to him. (Strab. L. c.; Dion Cass. liv. 5.) So long as the Romans maintained their hold on Northern Aethiopia, Pselcis was the permanent headquarters of a troop of German horse. The modern harbour of Passi occupies a portion of the ancient Pselcis. (W. B. D.)

PSESII, or PSESSI (Ψεσσι, Ptol. v. 9. § 17; Ψςσες, Apoll. op. Steph. B. s. c.; in Plin. vi. 7, the old editions have Passi, but Silig reads Pessi; it appears from an inscription that Pessi is the correct form, Insbr. in Jahn's Jahrbucher, vol. xxxvi. p. 225), a people in Sarmatia Asistica, placed by Ptolemy between the lake Macotis and the Hippici Montes after the Siraceni.

PSEUDOCHELIS (Ψευδοχηλις), a town of the Elytiai in Arabia Felix, identified by some modern writers with Moskha. (Ptol. vii. 7. § 7.)

PSEUDOPENIUS. [Harpodera, a city in Asia Minor, p. 21.]

PSEILIS (Ψειλης), a small river on the coast of Phrygia, flowing into the Euxine between Arvania and Calpe, and affording at its mouth a good road for small vessels (Strab. xii. p. 543; Ptol. v. 1. § 5; Anonymous, Peripl. P. E. p. 3; Plin. vi. 1; Arrian, Peripl. P. E. p. 13, where it is called Pilleis; Mari- dian, p. 69, where it is written Pallaus; comp. Steph. B. a. c. 'Aρβανίας.) (L. S.)

PSEPHIS (Ψψφης: Ekh. Ψψφης), a city in the NW. extremity of Arcadia, bounded on the N. by Arcadia, and on the W. by Elis. It was a very ancient place. It is said to have been originally called Ermmathus, and its territory to have been ravaged by the Ermmathian boar. (Paus. viii. 24. § 2; Recast. op. Steph. B. s. v. Ψψφης; Apollod. ii. 5. § 4.) It afterwards received the name of the city of Phiegeus (Ψψφης, Ψψφης), apparently from the oaks (φυγαει), which are still found upon the site of the town; though the ancients, as usual, derived the name from an eponymous founder, Phiegeus. (Steph. B. s. v. Ψψφης, Ψψφης; Paus. L. c.) It was called Psephus by Eusebius and Pseudo-Marcus, sons of Her- cules, who are said to have come from Sicily and dedicated to the town this name after their mother Psephis. (Paus. L. c.) Psephus, while still called Phiegeus, was celebrated as the residence of Alcamen, who fled thither from Argos, after slaying his mother, and married Alphisebioe, the daughter of Phiegeus. (Paus. viii. 24. § 8; Dict. of Sgr. s. v. Αλκαμαζος.) In consequence of their connection with Alcamen, the Psephidi took part in the second expedition against Tedebe, and refused to join the other Greeks in the Trojan War. (Paus. viii. 24. § 10.)

Psephus is rarely mentioned in history. In B.C. 219 it was in possession of the Eleians, and was taken by Philip, king of Macedon, who was then in alliance with the Achaeans. In narrating this alliance Polybius gives an accurate description of the town. "Psephus," he says, "is confidently an ancient foundation of the Arcadians in the district Asania. It is situated in the central part of Peloponnesus, but in the western corner of Arcadia, and adjoining the Achaeans dwelling furthest towards the west. It also overarches conveniently the country of the Eleians, with which it was in close alliance. Philip marched thither in three days from Caphyas, and encamped upon the hills opposite to the city, where he could safely have a view of the whole city and the surrounding places. When the king observed the strength of the place, he was at a

x x 2
loss what to do. On the western side of the town there is a rapid torrent, impassable during the greater part of the winter, and which, rushing down from the mountains, makes the city exceedingly strong and inaccessible, in consequence of the size of the ravine which it has formed. On the eastern side flows the Erymanthus, a large and impetuous river, concerning which there are so many stories. As the western torrent joins the Erymanthus on the southern side of the city, its three sides are surrounded by rivers, and rendered secure in the manner described. On the remaining side towards the north a strong wall hangs over, surrounded by a wall, and serving the purpose of a well-placed citadel. The town itself also is provided with walls, remarkable for their size and construction." (Polyb. iv. 70.)

From this description it is evident that the Erymanthus on the eastern side of the city is the river of Sophos; and that the western torrent, which we learn from Pausanias (viii. 24, § 5) bore the name of Aronas, is the river of Chermodesia. About 300 feet below the junction of these rivers the united stream is joined by a third, smaller than the other two, called the river of Lopès or Skupus, which rises on the frontiers of Cleftor, near Seirae. From these three rivers the place is now called Tripotamno. The banks of the Erymanthus and the Aronas are precipitous, but not very high; between them and the steep summit of the hill upon which the town stood there is a small space of level or gently-rising ground. The summit is a sharp ridge, sending forth two roots, one of which descends nearly to the angle of junction of the two streams, the other almost to the bank of the Erymanthus at the eastern extremity of the city. (Leake, Morea, vol. ii. p. 242.)

Philip, in his attack upon Psophis, crossed the bridge over the Erymanthus, which was probably in the same position as the modern bridge, and then drew up his men in the narrow space between the river and the walls. While the Macedonians were attempting to scale the walls in three separate parties, the three rivers were sally from one side of the upper part of the town. They were, however, driven back by the Cretans in Philip's army, who followed the fugitives into the town. Euripidas and the garrison then retreated into the citadel, and shortly afterwards surrendered to Philip. (Polyb. iv. 71, 72.)

Pausanias saw at Psophis a ruined temple of Aphrodite Erechthe; here was Promachus and Echephron, the tomb of Alcmeon, and near the Erymanthus a temple sacred to that stream. (Paus. viii. 24, § 7.) Leake also noticed a part of a theatre, not mentioned by Pausanias, on the side of the hill towards the Aronas. Nine hundred feet above the junction of the two rivers, and near the walls on the bank of the Erymanthus, they also found some remains of a public building, 96 feet in length, below which there is a source of water in the bank. He conjectures that they may be the remains of the temple of Erymanthus.

Psophis was about 2 miles in circumference. The town-walls followed the crest of the ridge to the northward and the bank above the two rivers on the opposite side; and they are traceable nearly throughout the entire circuit of the place. On the north-eastern side of the town, which is the only part not protected by the two rivers or by the precipices at the back of the hill, there was a double inclosure. Leake could not trace the inclosure of the citadel.

At the distance of 30 stadia from Psophis was

**PSYCHIUM (Ψεκίον, Steph. B. a. v.; Ptol. iii. 17, § 4; Ψεκία, Stadiasmus. Mar. Magn. p. 228, Hoffmann: Eik. Ψεκίον), a town on the south coast of Crete, placed by Ploemey between the mouths of the river Massalia and Eletra, and by the Stadiasmus 12 stadia to the west of Scius, a distance which agrees very well with the situation of Kastrí.** (Paslyly, Crete, vol. i. p. 30.)

**PSYCHIEUS (Ψεκίος), a small river in the est. of Pontus, forming the boundary between the tribes of the Colchis and Sarmi. (Arrian, Perip. P. E. p. 6; Anony. Perip. P. E. p. 14, i. 8.)**

**PSYLLI (Ψώλλιοι, Hecat. Fr. 303, ed. Klemm, Herod. iv. 173; Strab. lii. p. 131, xiii. p. 388, xvii. p. 814, 838: Pliny. v. 4, vi. 2, viii. 38, xii. 30, xxv. 76, xxviii. 6; Alciat, Nat. An. vi. 33), a people on the shores of the Greater Syris, who bordered on the Nasamones, occupying that part of the shores of Sort which lies between Aedale Sinnes and Aedale Naus. According to Herodotus (1. 4) they sailed forth against Notes, or the S. wind, and were buried in the sands which were raised by the offended wind. Their country was afterwards occupied by the Nasamones.**

The story gives a vivid picture of those seas of sand, unbathed by dew or rain, where the fine dusty-like particles, rising through the rarefied air, met in dark oppressive clouds. They were supposed by the ancients to have a secret art enabling them to secure themselves from the poison of serpents, like the "Háwees," or snake jugglers of Cairo. (Wilkinson, Ancient Egyptians, vol. v. p. 241; Lale, Modern Egyptians, vol. ii. p. 214; Quatremère, Mém. sur l'Egypte, vol. i. pp. 205—211.)
brought some of these people in his train when he led the way into the depths of the desert which skirts the Lesser Syrtis (Plut. Cat. Min. 56; Lucan, ix. 891); and Octavius made use of the services of these poison-suckers, it was said, in order to restore his victim, Cleopatra, to life. (Dion Cass. ii. 14; comp. Lucan, ix. 891) [E. B. J.]

PSTYLIUM (Ψτυλίον, Ψτυλείριον, or Ψτυλή), a fortified emporium on the coast of Bithynia, between Crenides and Timrippus. (Ptol. v. l. § 7; Arrian, Perip. P. E. 14: Anonym. Perip. P. E. p. 5; Marcian, p. 70; Steph. B. s. v. Ψτυλή; Tab. Presp.: erroneously calls it Scyllum.) [L. S.]

PYRA (Ψυρᾶ), a small island in the Aegean sea, to the north-west of Chios, at a distance of 50 stadia from Cape Maleaeus in Chios, and having only 40 stadia in circumference. It was a lofty, rocky island, and contained on its south-east coast a small town of the same name. (Strab. xiv. p. 645; Plin. v. 56; Steph. B. s. v.; Hom. Od. iii. 171.) Its modern name is Φύρα [E. B. J.]

PSYTTALEIA (Ψυτταλεία), a small island off the Attic coast between Perirrhenis and Salamina. For details see SALAMIS.

PTANDARI or PTANDARA, a place in Cappadocia on the south-west of Arabissus (It. Ant. pp. 178, 180, 310, 212, &c., where we sometimes read the ablatival P tenantis, and sometimes P tenantem.) [L. S.]

PTARENEUS (Πταρνέους, Arrian, Ind. c. 4), a small tributary of the Upper Indus, which flows into that river a little above Peskhwar. Lassen conjectures that it is the present Burrenda. (Lassen, Map of Anc. India.) [V.]

PETELEA, an ancient name of Ephesus. (Plin. v. 56, s. n. 31.)

PETELOS (Πτελεός), a small lake in Mycia, near Ephraim on the coast of the Hellespont (Herod. viii. 43; Strab. xiii. p. 595; Schol. ad Ptol. v. 2 § 8.) [L. S.]

PETELEUM. 1. (Πτέλευμα: Eth. Πτέλευδαι, Πτελεεωδος, Πτελεεωτας), a town of Thessaly, on the south-western side of Pelion, and near the boundary, in the trince of the Siusus, Pagassaeus. It stood between Antron and Halos, and was distant from the latter 110 stadia, according to Artemidorus. (Strab. iv. p. 433.) It is mentioned by Homer as governed by Proteus, to whom the neighbouring town of Antron also belonged. (II ii. 687.) In s. c. 192, Antherea made an incursion on Peloponnesus in order to await the war against the Romans in Greece (Liv. xxxv. 43.) In n. c. 171, the town, having been deserted by its inhabitants, was destroyed by the consul Licinius. (Liv. viii. 67.) It seems never to have recovered from this destruction, as Pliny speaks of Pteleum only as a forest (" nomen Pteleum, Plin. iv. 8. a. 15.) The form Pteleus is used by Lucan (vii. 485), by Ovid, N., x. 271, in the modern village of Ptelea, or Pfeldo, upon a peaked hill crowned by the remains of a town and castle of the middle ages, called Old Pfeldo. On its side is a large marsh, which, as Laken observes, was probably in the more flourishing ages of Greece a rich and productive meadow, and hence the epithet of πελεεωδος which Ovid (loc. cit.) gives to it in order to red to Pteleum. (Laken, Northern Greece, vol. i. p. 541, seq.)

2. A town of Triphyllia, in Elis, belonging to Nestor (H. Hom. II. li. 594), is said by Strabo to have been a colony from the Thessalian Pteleum. This town had disappeared in Strabo's time; but its uninhabited woody site was still called Pteleasinum. (Strab. viii. pp. 349, 350.)

3. A fortress in the territory of Erythrae, in Ionia. (Thuc. vii. 24, 31.) Pliny (v. 29. s. 31) mentions Pteleon, Helos, and Dorium as near Erythrae, but those places are confused by Pliny with others of the Triphyllian towns in Homer (I. c.).

PTERIA (Πτερία), the name of a town and district in Cappadocia, mentioned only by Herodotus (i. 76), who relates that a great battle was fought in this district between Cyrus and Croesus. Stephanus B. mentions Pterium, a town of the Medes, and Pteria, a town of the Sinopes (s. v. Πτερία).

PETELOS, one of four islands—the other three being Labataenis, Coboris, and Sambrasctae—lying off the coast of the Sabaei in Arabia, and corresponding in number and, the last of the four in name, with the Solias islands. (Plin. vi. 28. s. 32; Forster, Arabia, vol. ii. p. 230.)

PTELODERMA (Πτελόδερμα), a town of the Trebus, in Arcadia, which was deserted consequent on the removal of its inhabitants to Megapolis. (Paus. viii. 27. § 3.)

PTOLEMAIS. 1. (Πτόλεμας Ptol. iv. 5. § 87), a small town of the Aranitou nome in Middle Egypt. It was situated between Henu and Abydos, near the point of junction between the Black and White Niles. The modern village of El-Lakham occupies a portion of the site of the Aranite Ptolemais.

2. PTOLEMAIS THERON (Πτολεμαίας θερόνιος, Ptol. i. § 8, iv. 7. § 7, vii. 16. § 10; Ptolemais, Strab. xvii. pp. 768—76; Agatharch. op. Phot. pp. 457—459, ed. Bekker; Ptolemais Epithereia, Ptol. vi. 29. s. 34), was originally an Aethiopian village situated on the southern coast of the forest which extended from the s. side of the Trogodrytico Bericei to lat. 17° N. Its convenient situation on the coast of the Red Sea and in the heart of the region where elephants abounded induced Ptolemy Philadelphus (s. c. 282—246) to occupy, enlarge, and fortify the village, which thenceforward was named Ptolemais after its second founder. Philadelphus, indeed, before he colonised this outpost of his kingdom, used every effort to persuade the Aethiopian hunters [Elephantophagi] to abstain from the flesh of these animals, or to reserve a portion at least of them for the royal stables. But they rejected his offers, replying that for the kingdom of Egypt they would not be satisfied with the pleasant ing and eating elephants. Hitherto the Aegyptians had imported these animals from Asia, the Asiatic breed being stronger and larger than the African. But the supply was precarious: the cost of importation was great; and the Aethiopian forests afforded an ample supply both for war and the royal household. As the depth of the elephant trade, including that also in the present world, Ptolemais attained a high degree of prosperity, and ranked among the principal cities of Aethiopia. From its market it is probable that Carthage also derived its supply of elephants, since about the period of Ptolemais' reign the Carthaginians employed these animals more frequently in war. (Liv. xvii. Epit.; Florus, ii. 2. § 23.) Ptolemais occupied a pleasantly situated harbor, and the Aegyptian vessels were compelled to run up to Berenice whenever the N. or E. winds prevailed: in the present day the Red Sea coast at this point is approachable only by boats. The roadstead of Ptolemas, however, was partially sheltered from the E. winds by an island covered with olive-trees. In its x x 3
neighbourhood the freshwater lake Monoleos afforded it a good supply of water and fish. The shell of the true land-tortoise was found at Ptolemais: it is described by Agatharchides (ap. Geogr. Minos. p. 40. Lib. ii. c. 11) as covered with small lanceolate-shaped plates, of the whiteness of the pearl-oyster. To ancient geographers the position of Ptolemais was of great importance, being one of the points from which their computations of latitude were made. Modern geographers, however, are not agreed as to the degree in which it should be placed, some identifying it with Botra-Apis, opposite the island of Wellesley, while others (Vincent, *Voyage of Nearchus*, vol. ii. p. 99) prefer a more southerly site, near the port of Mishrâ- Mombarkh. (Comp. Mannert, vol. x. i. p. 48, seq.)

3. (Πτολεμαίας ή Ερετίων. Ptol. l. 15. § 11. iv. § 56. Πτολεμαίας οικ. Strab. xvii. p. 619), a city of Upper Asia, N.W. of Abydus, and situated on the western side of the Nile. It can hardly be regarded, however, as an Egyptian city, its population and civil institutions being almost exclusively Greek, and its importance derived entirely from the favour of the Ptolemies. The ruins of Ptolemais Hermi are supposed to be at the modern town of Ptolemais Hermiou (Champollion, *L'Egypte*, vol. i. p. 253, seq.) [W. B. D.]

PTOLEMAIS (Πτολεμαίας), a small town on the coast of Pamphylia, between the river Melas and the town of Coscinium, is mentioned only by Strabo (xiv. p. 667). Leake (Asia Minor, p. 197) conjectures that Ptolemais did not stand upon the coast, as it is not on any of the Irish mosaics placed in the situation of the modern town of Alara, where is a river, and upon its banks a steep hill crowned with a Turkish castle. (Comp. Richter, *Walfahrten*, p. 334.) [L. S.]

PTOLEMAIS CYRENAICAE. [BARCA.]

PTOLEMAIS PHOENICIAE. [ACEC.]

PTOIJOS. [Ματθαία, p. 262, b.]

PTOUM. [Βοργουτά, p. 412, a.]

PTYCHIA. [Γορκτρα, p. 671, b.]

PUBLICA'NOS, AD, in Gallia, is placed in the Itins, on a road which leads from Vienna (Vienne) on the Rhone to the Alpe Graia (Little St. Bernard). In following this road Ad Publicanos comes after Mantala [Μαντάλα], and its position is at the northern extremity of the territory of the Centrones or La Tarentaise. Wesseling observes that the name Ad Publicanos indicates a toll place at a bridge. [ΠΟΣ ΑΡΑΒΙΟΣ]. D'Anville supposes that Ad Publicanos was at the point where the Aris, a tributary of the Iére, is crossed, near which there was an ancient Hospital or Sibylum, as it was called, such as we find on several Roman roads. This place is now called L'Hôpital de Conflans, and is near the junction of the Aris and the Iére. Ad Publicanos was probably on the boundary of the Allobroges and Centrones, where some dues would be paid. These dues or customs were established in a period of Gallic history even anterior to the Roman conquest. (v. p. 410) 1) it was loaded with these imposts, which continued to the time of the French Revolution of 1789. The distance between Mantala and Ad Publicanos is marked xvi. in the Itins, which does not agree with the site fixed by D'Anville. Other geographers place Ad Publicanos at the village of Des Fontaines. [G. L.]

PUCINIA (Ποτίνια, Duino), a town of Venetia, in the territory of the Carni (Plin. iii. 18. a. 22), though Ptolemy assigns it to Istri (Ptol. iii. 1. § 28). It is placed by Pliny between the river Timavus and Tergaste, which leaves little doubt that it is the place called Duino, about 16 miles from Trieste, and 7 miles from the river Timavus. It stands on the brow of a steep rocky ridge or slope facing the sea; and the neighboring district is still noted for its wine, which was famous in the days of Pliny, and was reckoned particularly wholesome, so that Livia the wife of Augustus assigned the great age to which she attained principally to her use of it. (Plin. xiv. 6. l. 13. a. 4. [E. B. B.]

PULCHRUM PRON. [APOLENIUS PRON.]

PULL'ARI'AES INSULAE. [POLA.]

PULT'OVIÀ, a place in Upper Pannonia, on the south-west of Petovio, on the river Pulas. (L. H. E. p. 561; comp. Musgar, Noriciam, i. p. 249.)

PUNICUM (Sia Marina), a village or station on the coast of Etruria, mentioned only in the Tabula, which places it 6 miles beyond Pyrgi (Sia Senova) on the Via Aurelia; and this distance enables us to fix its site at the modern village or hamlet of Sia Marina, where there are still some traces of a Roman port, and more extensive remains of a harbour (Tab. Pent.; Nibby, *Diotarsi di Roma*. vol. ii. p. 318; Dennis's *Etruria*, vol. ii. p. 7.) [E. B. B.]

PUNICUM, called by Procopius (de Aed. iv. 6. p. 287) *νουκέω*, a town of Moeisia Superior, at the mouth of the Pingus (Tab. Pent.). [T. H. D.]

PUPILICA, a town of the Liburni (Geogr. liv. 16. 2. 24), which has been identified with it on the main land facing the S. of the island of Arde. (Niceerger, *Die Sud-Slaven*, p. 325.) [E. B. J.]

PURA. [SEGBROSLA.]

PUPUR'ARIÆ INIS, islands off the coast of Manartiaca, which are said to have been discovered by Juba (Plin. vi. 57), who established there a manufactory of purple. If his description of them as being 625 M. P. from the Fortunate Islands be received, they cannot be, as D'Anville supposed, *Lamserota* or *Fuentis Ventura*, the two nearest of the Camarites to the African continent. Still greater difficulties exist in supposing them to be *Moderi* and *Porto Santo*, which are too remote from Juba's kingdom to be the seat of a manufacture of purple carried on by him. *Lamserota* (Cassius Longinus for *Carthagerin* and *Griechen*, p. 140) considers them to be the islands of Lamserota *Sia Clara*, with the smaller ones of *Graecos* and *Aelegantos*. (Kanić, *Phoenicia*, p. 229; Humboldt, *Cosmos*, vol. ii. p. 129, trans.) [E. B. J.]

PUTEOLI. (Pouretou, Ptol. Disc. G. Ces. *Levitans Strab.*, Act. Apolet. Et. Puteolanus; Pas- sesol), a maritime city of Campania situated on the northern shore of the Sinus Cumanus at Crater and on the east side of the smaller bay known as the Sinus Baianus. It was originally a Greek city of the name of *Dicarearchia* (Δικαραρχεία, Strab.; Do- xarxarchia, Steph. B.: Et. Dicararchia and Dicar- archia). The *Etruscans* (v. p. 190) 1) it was loaded with these imposts, which continued to be the name of *Cassius Munus* to, which it served as a port. (Strab. v. p. 245.) There can be little doubt of the accuracy of this statement, but Stephanus of Byzantium and Eusebius ascribe its foundation to a colony from Samos; and it is not improbable that in this as in many similar instances, the colony from Cunus was reinforced by a fresh band of emigrants from Samos (Steph. B. s. v. *Heraclea*; Euseb. ii. p. 199, ed. ...
Scal.). The date assigned to this Samian colony by Eusebius is as late as B.C. 531. No mention occurs of Dicaearchia in history previous to the conquest of Cumae by the Campanians; from its surviving as the port of Cumae it could probably never have taken any active or independent part; but there seems good reason that it must have become a populous and flourishing town. The name of Dicaearchia continued to be applied to it by Greek writers long after it had assumed the new appellation of Puteoli. (Diod. iv. 22, v. 13, &c.)

The period of this change is uncertain. It is generally said that the Romans bestowed on it the new name when they established their colony there; but there seems good reason to believe that it was considerably more ancient. The name of Puteoli is applied to the city by Livy during the Second Punic War (Liv. xxv. 7), and there is much probability that the coins with the Ocean inscription "Phistiae," sometimes Graecised into Phistalos, belong to Puteoli during the period preceding that of the Roman colony. (Millingen, Nomism. de P. L. ital., p. 201; Friedhöfer, Ostliche Mynten, p. 29.) According to the Roman writers the name of Puteoli was derived either from the stem arising from the numerous sulphurous springs in the neighbourhood, or (with more probability) from the wells (putei) or sources of a vegetable nature which it is supposed (Varro, v. 25; Fest. s. a. Puteoli; Plin. xxxii. 2; Strab. v. p. 245; Stephan. B. s. v. Puteoli) that Claudius Nero embarked with two legions for Spain. (Id. xxvi. 7, 12, 13.) Livy speaks of Puteoli as having first become frequented as a port in consequence of the war; and though this is not strictly correct, as we know that it was frequented long before under the name of Dicaearchia, it is probable that it then first rose to the high degree of commercial importance which it subsequently retained under the Romans. Thus in B.C. 212 it became the principal port where the supplies of corn from Etruria and Sardinia were landed for the use of the Roman army that was besieging Capua (Liv. xxv. 22); and in the next year it became a place of importance to make himself master of the city, the possession of its port being an object of the greatest importance to him. (Liv. xxv. 7, 12, 13.)

The first mention of Puteoli in history is during the Second Punic War, when it was fortified by Q. Fabius by order of the senate, and protected by a strong garrison to secure it from the attacks of Hamilcar, B.c. 215. That general, indeed, in the following year made an unsuccessful attempt to dislodge the Roman garrison, to make himself master of the city, the possession of whose port was an object of the greatest importance to him. (Liv. xxv. 7, 12, 13.)

That general, indeed, in the following year made an unsuccessful attempt to dislodge the Roman garrison, to make himself master of the city, the possession of whose port was an object of the greatest importance to him. (Liv. xxv. 7, 12, 13.)
Puteoli certainly continued to enjoy under the Empire the rank of a colony. (Plin. iii. 5. a. 9; Orell. Inscr. 1694, 3697, &c.) In addition to the original "colonia civium" settled there, as already mentioned, in 194, it appears to have received once or twice from being a fresh colony under Sulla (Val. Max. ii. 3. § 8; Mast. Sull. 37; Zumpt, de Colae. p. 260), and certainly was again colonised by Augustus. (Lib. Col. p. 336.) The inhabitants had, as we learn from Cicero (Phil. ii. 41), warmly espoused the cause of Brutus and Cassius after the death of Caesar, which may explain why Augustus sought to secure so important a point with a colony of veterans.

But, as was often the case, the old inhabitants seem to have continued apart from the colonists, with separate municipal rights, and it was not till the reign of Nero that these also obtained admission into the colony. (Tac. Ann. xiv. 27.) In A. D. 69 the site was situated between Puteoli and Pompaeian (Tac. Hist. iii. 67), and it was probably in consequence of this that the city afterwards assumed the honorary title of "Colonia Flavia Augustae Puteiota," by which we find it designated in inscriptions. (Orell. Inscr. 3698; Zumpt, l. c. p. 395; Mommsen, 2492, 2493.) It is not improbable, however, that it may at the same time have received a fresh accession of colonists.

In addition to its commercial importance, Puteoli, or rather its immediate neighbourhood, became, before the close of the Republic, a favourite resort of the Roman nobility, in common with Baiae and the whole of this beautiful district. Thus Cicero, as we learn from himself, had a villa there, to which he gave the name of Augustus; he more often mentions merely his at Puteolana. (Cic. de Fas. 1, ad Att. i. 4, xiv. 7, xv. 1, &c.) It passed after his death into the hands of Antistius Veturius, and the outbreak of a thermal spring there became the occasion of a well-known epigram, which has been preserved to us by Pliny. (Pline. xxii. 2. a. 3.) This villa was situated between Puteoli and the lake Avernus; it was subsequently chosen as the place of burial of the emperor Hadrian. (Spart. Hadr. 25.)

We hear little of Puteoli in history during the later periods of the Roman Empire, but there is every reason to suppose that it continued to be a flourishing town, whose walls and port were repaired by Antoninus Pius (Mommsen, Inscr. 2490), and numerous inscriptions have been found there, some of which belong to a late period, and attest the continued importance of the city down to the reign of Honorius. (Mommsen, 2494—2500.)

But it shared to the full extent in the calamities of the declining empire; it was taken and plundered by Alaric in A. D. 410, and again by Genseric in 455, and by Totila in 545. Nor did it ever recover these repeated disasters. After having for some time been almost deserted, it partially revived in the middle ages; but again suffered severely, both from the ravages of war and from the volcanic eruptions of the Solfatara in 1198, and, of the Monte Nuovo in the sea in 1942. But Puteoli, though retaining its episcopal see, and about 8000 inhabitants, is a poor place, and suffers severely from malaria in summer.

It, however, retains many remains of its ancient greatness. Among these one of the most conspicuous is the amphitheatre, on the hill behind the town, which is of considerable size, being larger than that at Pompell, and calculated to be capable of containing 25,000 spectators. It is in poor preservation, and, having been recently excavated and cleared out, affords in many respects a good specimen of such structures. It derives additional interest from being one of the oldest so far traced by ancient writers. Thus Suetonius mentions that Augustus provided at games there, and it was in consequence of an insult offered to a senator on that occasion that the emperor passed a law assigning distinct seats to the senatorial order. (Sext. Aug. 44.) It was there also that Nero entertained Tim. Near the amphitheatre are some ruins, commonly known as the temple of Diana, but which more probably belonged to a range of thermae or baths; as well as several piscinae or reservoirs for water on a great scale, some of which are supposed to have been connected with the springs of the amphitheatre. Near them are the remains of an aqueduct, intended for the supply of the city, which seems to have been a branch of that which led to Misenum. In the city itself the modern cathedral is in great part constructed out of the remains of a Roman temple, which, as we learn from an inscription at the architrave, was erected by Augustus by L. Calpurnius. From another inscription we learn that the architect was L. Corcinius Acustus, evidently the same who is mentioned by Strabo as having been employed by Agrippa to construct the tunnel at Postilippo. (Mommsen, I. R. 2484, 2485; Strab. v. p. 243.) The masonry is of white marble, and there still remain six beautiful Corinthian columns of the columnar base of Augustus by L. Calpurnius. Much more celebrated than these are the remains of a building commonly known as the temple of Serapis or Serapeum. The interest which attaches to these is, however, more of a scientific than antiquarian character, from the evidence they afford of repeated changes in the level of the soil on which they stand. (Livy. xcviii. 5. 4; Mommsen, On Volcanoes, p. 206.) The edifice is one of a peculiar character, and the received attribution is very doubtful. Recent researches have rendered it more probable that it was a building connected with the mineral spring which rises within it, and was adapted both for purposes of worship and for the water-supply of the town. The general plan is that of a large quadrangular atrium or court, surrounded internally by a portico of 48 columns, with chambers at the sides, and a circular temple in the centre. Not far from the temple of Serapis are the ruins of two other buildings, both of which now under water: the one of which is commonly known as the temple of Neptune, the other as the temple of the Nymphs; but there is no real foundation for either name. We know, however, from Cicero that there was a temple of Neptune at Puteoli, as might naturally be expected at so frequented a seaport, and that its portico faced the bay. (Cic. Acad. ii. 25.)

The remains of the ancient mole have been already men- tioned, and are seen from Flinders. Dogger Bank, though lying one of which is still visible above water.

On the coast proceeding from Ponsaelli towards the Lucrine lake (or rather on the ancient cliff which rises above the low line of coast) are some ruins called (with at least more probability than in most similar cases) those of the villa of Cicero, which was certainly, as we learn from Flinders, situated between Puteoli and the Lucrine lake. (Pline. xxi. 2. 3.)
PUTEOLANUS SINUS.

About a mile from Posseoli to the NE., on a hill between the town and the Lago d' Agnano, is the remarkable spot now called the Solfatara, and in ancient times known as the FORUM VULCANI (Ἅφαντον ἄγαγνον, Strab.). It is evidently the crater of an extinct volcano, retaining only so much of its former activity as to emit constantly sulphurous gases in considerable quantity, the deposit of which forms large accumulations of sulphur. It is well described by Strabo, in whose time it seems to have been rather more active than at present, as well as in a more poetical style by Petronius (Carus. B. C. 67—75); and is noticed also by Lucullus, who justly points to the quantity of sulphur produced, as an evidence of igneous action, though long extinct. (Strab. v. p. 246; Lucil. Aen. 451.) It does not seem to have ever broken out into more violent action, in ancient times than in modern, times; but in the middle ages on one occasion (in 1198) it broke into a violent eruption; and a stream of trachytic lava, which has flowed from the crater in a SE. direction, is probably the result of this outbreak. The effect of the sulphureous exhalations on the soil of the surrounding country is manifest, and to the country people of the surrounding country is manifest, and to the country people of them a peculiar whiteness of aspect, whence they were called the LECUCOAEI COLLINI. (Plin. xxviii. 11. s. 29, xxxv. 15. s. 50.) Pliny also mentions in connection with them some mineral springs, to which he gives the name of LECUCOAEI FONTES. (Id. xxxi. 3. s. 8.) They are probably those now known as the termali.

There were two ancient roads leading from Puteoli, the one to Capua, the other to Neapolis. Both of them may still be distinctly traced, and were bordered, for some distance after they quitted the city, with ranges of tombs similar to those found outside the gate of Pompeii, though of course in less perfect preservation. They are nevertheless in many respects similar to modern roads, and are still used. It is probable that the road north leading from Puteoli to Capua was the tract on the left of this towards Cumae that was the district properly called the CAMPI LABORINI, or LABORIAE, distinguished even above the rest of Campania for its surpassing fertility. (Plin. xvii. 11. s. 29.) Concerning the topography and road leading from Posseoli, see Mazzaia, Situs et Antiquitiae Poscelorum in Graevius and Burmann's Theaurus, vol. iv. part ii.; Romaniel, Viaggio a Posseoli, Svo. Naples, 1817; and Jorio, Guida di Posseoli, Svo. Naples, 1830. [E. E. B.]

PUTEOLANUS SINUS. [CHARTER: PUTEIUT, a violent act in Africa, 12 M. P. from Neapolis (Nabia) (Itin. Anton.; Pent. Tab.), which has been identified by Barth (Wanderungen), pp. 142, 143) with Ἡλεμίατα. Sir G. Temple (Excursions, vol. ii. p. 10) considers it to be SAGUL (Σαγόλλo, Prot. iv. s. 9), because of the two inscriptions with Civitas Signtitanis, which Shaw found at Helimia. (Prot. 156.) [E. E. B.]

PYDARAS. [ATHYRAS.]

PYDANA (Πυδάνα, Scyl. p. 26; Scymn. Ch. 652; Prot. iii. 13. s. 15; Steph. B.; Plin. iv. 17.), a town which originally stood on the coast of Pitoria, in the Thermae gulf. Themistocles was conducted by two Phenicians to the mountains and found a merchant ship about to sail for Asia. (Thuc. ii. 137.) Pydna was blockaded by the Athenians, who, after prosecuting the siege in vain, concluded a convention with Perdiccas. (Thuc. i. 61.) It was taken a. c. 411 by Arachneia, who removed its site 20 stadia from the sea. (Diodor. xiii. 49.) Afterwards it was gained for Athens by Timoleon; but in the two first years of the disastrous Social War 358—356, Pydna, about the exchange of which for Amphipolis there had been a secret negotiation, was betrayed to Philip by a party of traitors in the town. (Demost. ed. Legoer, p. 476, § 71. Olympik. i. p. 10. § 5. Olympik. ii. p. 19. § 6; Usan. ad loc.; Theopompos, Fr. 189, ed Didot.) Several Athenian citizens were taken in Pydna, and sold into slavery, whom Demosthenes ransomed from his own funds. (Pint. Vit. X. Orator. p. 851, ed. Reiske.) Towards the close of the year a. c. 316, Olympia reigned to Pydna, where she was besieged by Cassander, and taken prisoner by him. (Diodor. xix. 49; Polyb. iv. 11. § 3.) In the spring of a. c. 169, Perseus abandoning Diom, retreated before the consul Q. Marcus Philippus to Pydna. (Liv. xliv. 6.) After again occupying the strong line of the Enipus, Perseus, in consequence of the dexterous flank movement of P. Scipio Nasica to Salapia, was compelled to fly from Pydna. On the 22nd of June, a. c. 168 (an eclipse fixes the date, Clinton, F. H. vol. iii. p. 82), the fate of the Macedonian monarchy was decided in a plain near the town, which was traversed by a small river, and bordered by heights affording a convenient retreat and shelter to the light infantry, while the plain afforded the baseground necessary for the phalanx. (Liv. xliv. 23—26.) The Epitomist of Strabo and a Scholiast upon Demosthenes (Olympik. i. p. 10) assert that the Krypto of their time was the same place as Pydna; but their authority is of no great weight, and Colonel Leake (Northern Greece, vol. iii. pp. 429—432) has shown that the ancient site is better referred to a plain, where still Hellican remains, and, on the slope towards the sea, two "tumuli," probably monuments of the battle. Kñro, it may be supposed, rose upon the decay of Pydna and Methone, between which it lies. For autonomous coins of Pydna, see Eckeh. vol. ii. p. 76. [E. B. J.]

PYDANA or PYDANO (Πυδάνος), a small town on the coast of the Caystranian bay, a little to the south of Ephemus, was said to have been founded by Agamemnon, and to have been peopled with the remnants of his army; it contained a temple of Artemis Myndychia. (Enopoli. Helos. i. 2. § 3; Scymn. xiv. p. 639; Steph. B. s. v.; Harpocr. x. v. p. 739, ed. Schol.); there was also a temple of Apollo, where Prop. Mela, i. 17; Liv. xxvii. 1.) Dioscorides (v. 13) commends the wine of this town, which is still celebrated. Chandler (Travelr. p. 176) observed its remains on a hill between Ephemus and Scala Nova. (Comp. Leake, Asia Minor, p. 261.) [L. S.]

PYGELA or PHYGELE (Πυγέλα, Φυγέλα; Eth. Πυγελάδης, a small town on the coast of the Caystranian bay, a little to the south of Ephemus, was said to have been founded by Agamemnon, and to have been peopled with the remnants of his army; it contained a temple of Artemis Myndychia. (Enopoli. Helos. i. 2. § 3; Scymn. xiv. p. 639; Steph. B. s. v.; Harpocrat. x. v. p. 739, ed. Schol.); there was also a temple of Apollo, where Prop. Mela, i. 17; Liv. xxvii. 1.) Dioscorides (v. 13) commends the wine of this town, which is still celebrated. Chandler (Travelr. p. 176) observed its remains on a hill between Ephemus and Scala Nova. (Comp. Leake, Asia Minor, p. 261.) [L. S.]

PYLAI. [THERMOPTEIA.]

PYLAE CHIL. [Πυλαία, Πυλαί.] PYLAE SYRIAE. [AMANIDAE; ISMEL.] PYLAEA (Πυλαία), a suburb of Delphi,
the place of meeting of the Amphictyonic Council (Dorla, vi. 767, b.)

PYLENE (Py-le-ke; Eik. Πυλαία), an ancient town of Aetolia, between the Acheron and the Evrenos, mentioned in the Homeric catalogues of the Grecian ships, is placed by Pline on the Corinthian gulf. It would therefore seem to have existed in later times; although Strabo says that the Aetolians, having removed Pylene higher up, changed its name into Phyle (Strabo viii. 328), though uncertain (Hom. /I. ii. 639; Plin. iv. 3; corpolosa Pylene, Stat. Theb. iv. 108; Steph. b.s. v.)

PYLON (Πώλιον), a town on the Via Egnatia, being the frontier town of Illyria and Macedonia. (Strab. viii. p. 323.) It is not mentioned in the Itineraries.

PYLUS (Πώλιομ; Eik. Πώλια), the name of three towns on the western coast of Peloponnesus.
